CITY OF LAS CRUCES

PROFESSIONAL SERVICES AGREEMENT

THIS AGREEMENT, made and entered into on this _____ day of _____, 2024 by and between the City of Las Cruces, New Mexico, hereinafter called "CITY" and Water Works Engineers, LLC, of 8650 Alameda Blvd NE, Ste 103E, Albuquerque, NM, 87122, hereinafter called "CONTRACTOR".

1. PROJECT DESCRIPTION
General Engineering Services on an as needed basis via Project Assignment Agreements (Attachment "A") during the term of this AGREEMENT.

2. SCOPE OF SERVICES
In a satisfactory and proper manner, the CONTRACTOR shall perform SERVICES, as proposed in response to the CITY'S RFP No. 23-24-051, as set forth in Exhibit A, attached hereto and made a part of this Agreement.

The CONTRACTOR is authorized to extend the same terms and conditions of this Agreement to other governmental entities conditioned upon the procurement laws and regulations of those entities. The CITY shall not be a party nor have any liability relating to such extensions.

3. APPROPRIATIONS
The terms of this Agreement are contingent on sufficient appropriations and authorization being made by the City Council for the performance of this Agreement. If sufficient appropriations and authorizations are not made by the City Council, this Agreement shall terminate upon written notice given by the CITY to CONTRACTOR. The CITY'S decision as to whether sufficient appropriations and authorizations exist shall be accepted by CONTRACTOR and shall be final.

4. COMPENSATION
The CITY shall compensate CONTRACTOR for the performance of SERVICES under this Agreement an amount agreed to for each assigned project, plus applicable taxes. CONTRACTOR shall perform the SERVICES upon receipt of a purchase order or written Notice to Proceed for each assigned project from the CITY. The CITY cannot authorize costs to be incurred prior to such written Notice to Proceed. CONTRACTOR shall submit invoices upon completion of the project. CITY shall pay invoices Net 30 days upon receipt of undisputed invoice.

CONTRACTOR is responsible for payment of State of New Mexico Gross Receipts Tax levied on the amounts payable under this Agreement. CONTRACTOR agrees to comply with all federal and state tax payments and report all items of gross receipts as income from the operations of its business.

5. DEVOTION OF ADEQUATE TIME
CONTRACTOR will devote the necessary hours each week to the performance of projects that are required by the CITY and it will serve the CITY diligently and faithfully,

and according to its best ability in all respects and will promote the best interests of the CITY.

6. TERM AND SCHEDULE
This Agreement shall become effective on June 1, 2024 for a term of 5 years through May 31, 2029.

CONTRACTOR shall perform the SERVICES in accordance with the time set forth as agreed upon by the CITY and CONTRACTOR and as agreed to for each project assigned under the terms of this Agreement.

7. EXTENSIONS, CHANGES, AND AMENDMENTS
This Agreement shall not be extended, changed, or amended except by instrument in writing executed by the parties. The CITY shall not be liable for payment of any extra services nor shall CONTRACTOR be obligated to perform any extra services except upon such written agreement. Such written approval shall indicate the date said extension, change, or amendment is effective and shall be signed by the parties to this Agreement. In the event that the parties cannot reach agreement as to a particular change, the issue shall be resolved pursuant to Article 21.

8. CHANGES AND EXTRA SERVICES BY THE CITY
The CITY may make changes within the general scope of the SERVICES plus may also request CONTRACTOR to perform other extra services not incorporated within the Services set forth in this Agreement. If the CONTRACTOR is of the opinion that such change causes an increase or decrease in the cost and/or the time required for performing the changes or other services required by the City, CONTRACTOR shall so notify the CITY of that fact within five (5) business work days from the date of receipt of change by the CITY. The CITY shall provide written response to the CONTRACTOR within five (5) business work days from the date of receipt of CONTRACTOR'S written notification.

9. CHANGES AND EXTRA SERVICES BY THE CONTRACTOR
In the event a condition is identified by the CONTRACTOR which, in the opinion of the CONTRACTOR, changes the services, costs, and/or time required for performance under this Agreement, the CONTRACTOR shall provide written notification to the CITY within five (5) business work days of such identification. The CITY shall respond in writing to such notification within five (5) business work days from the date of receipt of CONTRACTOR'S notification.

10. DELAYS
In the event that performance of SERVICES is delayed by causes beyond reasonable control of CONTRACTOR, and without the fault or negligence of CONTRACTOR, the time and total compensation for the performance of the SERVICES may be equitably adjusted by written agreement to reflect the extent of such delay. CONTRACTOR shall provide the CITY with written notice of delay pursuant to Article 9 including therein a description of the delay and the steps contemplated or actually taken by

CONTRACTOR to mitigate the effect of such delay. The CITY will make the final determination as to reasonableness of delays.

11. TERMINATION
This Agreement may be terminated by either party hereto upon fifteen (15) calendar days written notice in the event of substantial failure by the other party to perform in accordance with the terms of this Agreement through no fault of the terminating party. This Agreement may also be terminated by the CITY for its convenience or because the PROJECT has been permanently abandoned, but only upon fifteen (15) calendar days written notice to CONTRACTOR.

In the event of termination, CONTRACTOR shall be compensated for all services performed and costs incurred up to the effective date of termination for which CONTRACTOR has not been previously compensated.

Upon receipt of notice of termination from the CITY, CONTRACTOR shall discontinue the SERVICES unless otherwise directed and upon final payment from the CITY deliver to the CITY the required number of copies of all data, drawings, reports, estimates, summaries, and such other information and materials as may have been accumulated by CONTRACTOR in the performance of this Agreement, whether completed or in process.

12. RECORDS AND AUDITS
CONTRACTOR will maintain records indicating dates, length of time, and services rendered. The CITY has the right to audit billings both before and after payment, and contest any billing or portion thereof. Payment under this Agreement does not foreclose the CITY'S right to recover excessive or illegal payments. CONTRACTOR will retain records for five (5) years after the completion of the project.

13. DISCLOSURE AND OWNERSHIP OF DOCUMENTS, PRODUCTS, DESIGN, ELECTRONIC FILES
All technical data, electronic files, and other written and oral information not in the public domain or not previously known, and all information, electronic files, and data obtained, developed, or supplied by the CITY will be kept confidential and CONTRACTOR will not disclose to any other party, directly or indirectly, without the CITY'S prior written consent unless required by lawful order.

All technical data, electronic files, products developed, operational parameters, blueprints, and other information and work of the CONTRACTOR shall be the sole property of the CITY and shall be delivered to the CITY when requested and at the end of the Agreement.

14. INDEPENDENT CONTRACTOR
CONTRACTOR represents that it has, or will secure, at its own expense, all personnel required in performing the SERVICES under this Agreement. Such personnel shall not be employees of, nor have any contractual relationship with the CITY. CONTRACTOR,

consistent with its status as an independent contractor, further agrees that its personnel will not hold themselves out as, nor claim to be officers or employees of the CITY by reason of this Agreement.

To the extent that CONTRACTOR employs any employees, CONTRACTOR shall be solely responsible for providing its own form of insurance for its employees and in no event shall CONTRACTOR's employees be covered under any policy of the CITY.

CONTRACTOR'S retention hereunder is not exclusive. Subject to the terms and provisions of this Agreement: (i) CONTRACTOR is able, during the Term hereof, to perform services for other parties; and (ii) CONTRACTOR may perform for its own account other professional services outside the scope of this Agreement.

CONTRACTOR is and shall be an Independent Contractor and shall be responsible for the management of its business affairs. In the performance of the work under this Agreement, CONTRACTOR will at all times be acting and performing as an Independent Contractor, as that term is understood for federal and state law purposes, and not as an employee of the CITY. Without limitation upon the foregoing, CONTRACTOR shall not accrue sick leave, jury duty pay, retirement, insurance, bonding, welfare benefits, or any other benefits, which may or may not be afforded employees of the CITY. CONTRACTOR will not be treated as an employee for purposes of: Workers' Compensation benefits; the Federal Unemployment Tax Act; Social Security; other payroll taxes, federal or any state income tax withholding; or the employee benefit provisions described in the Internal Revenue Code of 1986, as amended. Neither the CITY, nor its agents or representatives, shall have the right to control or direct the manner, details or means by which CONTRACTOR accomplishes and performs its services. Nevertheless, CONTRACTOR shall be bound to fulfill the duties and responsibilities contained in the Agreement.

15. NO JOINT VENTURE OR PARTNERSHIP

Nothing contained in this Agreement shall create any partnership, association, joint venture, fiduciary or agency relationship between CONTRACTOR and CITY. Except as otherwise specifically set forth herein, neither CONTRACTOR nor CITY shall be authorized or empowered to make any representation or commitment or to perform any act which shall be binding on the other unless expressly authorized or empowered in writing.

16. ASSIGNMENT

CONTRACTOR shall perform all the services under this Agreement and shall not assign any interest in this Agreement or transfer any interest in same or assign any claims for money due or to become due under this Agreement without the prior written consent of the CITY.

17. INSURANCE
CONTRACTOR shall obtain and maintain insurance at its own cost and expense during the life of this Agreement, and shall require Subcontractors, if any, to maintain during the life of his subcontract:

1. Commercial General Liability Insurance
   a. $1,000,000 per occurrence / $2,000,000 aggregate
   b. Coverage must include premises and operations, products and completed operations, and personal and advertising injury.
   c. The City of Las Cruces must be named as an Additional Insured for all coverages listed above on endorsements acceptable to the City.
   d. Coverage must be primary and non-contributory.
   e. Coverage must be per project or per location.
   f. Coverage must be on an occurrence form.
   g. Subrogation must be waived.
2. Commercial Auto Liability
   a. $1,000,000 per occurrence
   b. Coverage must be for “owned, leased, hired, and non-owned autos” or “any autos.”
3. Workers’ Compensation and Employers Liability
   a. Statutory Limits
   b. Employer liability – $1,000,000 each accident, $1,000,000 each employee by disease, $1,000,000 policy limit
   c. Subrogation must be waived.
4. Professional Liability: $1,000,000 per claim

Endorsements for additional insured coverage and waivers of subrogation must be provided as a condition of this Agreement and shall be noted on the certificate.

CONTRACTOR shall furnish the CITY with a certificate(s) of insurance showing CONTRACTOR and Subcontractors, if any, have complied with this Article. The CONTRACTOR shall provide insurance certificates before work is to start on the project and shall provide the CITY thirty (30) days written notification of cancellation of such policies.

18. INDEMNITY AND LIMITATION
CONTRACTOR shall indemnify, defend, and hold harmless the CITY from and against any and all claims, suits, actions, judgments, demands, losses, costs, expenses, damages, and liability caused in whole or in part by, resulting in whole or in part from, or arising in whole or in part out of the negligent acts, errors, or omissions of CONTRACTOR, its officers, employees, agents, or representatives in the performance of SERVICES under this agreement.

19. APPLICABLE LAW
This Agreement and the rights and obligations of the parties shall be governed by and construed by the laws of the State of New Mexico applicable to Agreements between

New Mexico parties made and performed in that state, without regard to conflicts of law principles. Venue shall be in the Third Judicial District, State of New Mexico.

CONTRACTOR shall abide and be governed by all applicable state law, CITY ordinances, and laws regarding the CONTRACTOR'S services or any work done pursuant to this Agreement, including anti-discrimination.

20. BREACH
In the event CONTRACTOR breaches any obligation contained in this Agreement, prior to instituting any action or dispute resolution procedure, the CITY shall give CONTRACTOR written notice of such breach. In the event CONTRACTOR fails to remedy the breach within five (5) working days of receiving such written notice, the CITY, at its sole discretion, without any obligation to do so and in addition to other remedies available under applicable law, may remedy CONTRACTOR'S breach and recover any and all costs and expenses in so doing from CONTRACTOR.

21. DISPUTE RESOLUTION
In the event that a dispute arises between CITY and CONTRACTOR under this Agreement or as a result of breach of this Agreement, the parties agree to act in good faith to attempt to resolve the dispute.

22. NOTIFICATION
All notices required or permitted under this Agreement shall be in writing and shall be deemed sufficiently served if served by Registered Mail addressed as follows:

TO CITY:	City of Las Cruces PO Box 20000 Las Cruces, NM 88004 ATTENTION: Tony Trevino
With Copies to:	City Attorney Purchasing Manager
TO CONTRACTOR:	Water Works Engineers, LLC 8650 Alameda Blvd NE, Ste 103E Albuquerque, NM 87122 ATTENTION: Michael Fisher

23. SCOPE OF AGREEMENT
This Agreement incorporates all of the agreements, covenants, and understandings between the parties hereto concerning the subject matter hereof and that all such covenants, agreements, and understandings have been merged into this written agreement. No prior agreement or understanding verbal or otherwise of the parties or their agents shall be valid or enforceable unless embodied in this agreement.

24. SEVERABILITY
The parties agree that each provision of this Agreement is severable and the invalidity or unenforceability of any one or more of the provisions of this Agreement shall not affect the validity or enforceability of any other provision of this Agreement, and this Agreement shall be construed in all respects as if such invalid or unenforceable provisions were omitted.

25. CONFLICT OF INTEREST
CONTRACTOR represents and warrants that CONTRACTOR has no business, professional, personal, or other interest, including, but not limited to, the representation of other clients, that would conflict in any manner or degree with the performance of its obligations under this Agreement. If any such actual or potential conflict of interest arises under this Agreement, CONTRACTOR shall immediately inform the CITY in writing of such conflict. If, in the reasonable judgement of the CITY, such conflict poses a conflict to and with the performance of CONTRACTOR'S obligations under this Agreement, or is otherwise a violation of the CITY'S current policy or ordinances, then the CITY may terminate the Agreement immediately upon written notice to CONTRACTOR; such termination of the Agreement shall be effective upon the receipt of such notice by CONTRACTOR.

City Attorney

EXHIBIT A
SERVICES

A. Project Assignments

A Project assignment is initiated by the City providing the selected Engineering firm(s) a detailed project description, including scope of work and any other special instructions needed by the Engineering firm(s) to prepare all deliverables as requested. The awarded Engineering firm(s) shall provide engineering services that may include, but not be limited to, the following:

1. Master Planning
2. Structural design of buildings, retaining walls, etc.
3. Roadway, transportation, and parking lot design
4. Site development (drainage and grading design)
5. Electrical design (wells, booster stations, lift stations, odor control stations, building electrical system design)
6. Computer network analysis for Gas (GasWork), Water (InfoWater), and Wastewater (InfoSewer). The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility
7. Supervisory Control and Data Acquisition (SCADA) design
8. Mechanical design, gas system design, plumbing and HVAC design
9. Water, wastewater and natural gas utility system design and analysis
10. Traffic Impact Studies and Transportation Modeling Studies
11. Photometrics/street lighting design
12. Drainage Studies, including FEMA Flood Studies
13. Storm drainage
14. Solid waste studies, landfill system design and analysis
15. Environmental surveys, assessments monitoring and management, such as indoor air quality, asbestos, mold, and other related services for the City
16. Geotechnical Assessments, such as soil and groundwater testing for contamination and remediation, and other related services for the City
17. Expert witness in a judicial and/or quasi-judicial setting.
18. Project Management
19. Construction Inspection

B. Project Assignment Agreements

A Project Assignment Agreement (a template of which is incorporated herein as ATTACHMENT “A”) will be negotiated and executed on a case-by-case basis for each specific project, and will include a cost proposal from the Engineering firm(s) proposing to do the work. The cost proposal may utilize one of the following pricing formats:

1. Lump Sum
2. Unit pricing to include:
    a. Hourly rate for various types of services requested by the City
    b. Charges for miscellaneous items such as blueprints, data, discs, rental of special equipment, etc.
    c. A statement of the billing procedures including minimum billing units, if any.
    d. Cost of sub-consultants, if any

3. An alternative unit cost breakdown

C. Deliverables
Each project contract will require a list of deliverables, schedule/timeline and cost. The Engineer may be required to supply to the City an of the following items, when specified and as requested on the Scope of Work for each individual project.
1. Preliminary report containing schedule of work and cost estimate.
2. Construction drawings and documents. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility. Provide hard copies and PDF format of the construction plans for Purchasing Section use.
   a. As-built drawings on electronic media and reproducible prints. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. All horizontal and vertical location datum information shall be coordinated with the City Surveyor. The utility location information shall be tied to project control monuments and referenced to project construction stationing. The project control survey shall be certified by a New Mexico Registered Land Surveyor. Metadata or “data about the data” shall be submitted with each as-built electronic file, preferably as a separate text file on the electronic submittal media, and shall include:
      - Name, address, and phone number of the responsible land surveyor.
      - Date of completion of survey.
      - Equipment used to conduct the survey.
      - Horizontal and vertical control marks used to tie the survey to the City approved control.
      - Transformation factors needed to reduce Ground (local coordinate system) to Grid and combined scale factor used.
   b. “RECORD DRAWINGS” shall be clearly labeled on each sheet.
3. Computer network analysis for gas, water, and wastewater shall be provided to the City in appropriate electronic format. It shall include the entire model, including changes and a text summary (report) of the network analysis that includes assumptions, procedures, and results, and any graphics that clarify the analysis. The Engineering firm(s) shall verify the report format with the City. The computer network analysis shall be provided using the software listed below. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility.
   a. Computer network analysis for Gas: GasWork
   b. Computer network analysis for Water: InfoWater
   c. Computer network analysis for wastewater: InfoSewer
   d. Other design computer programs as approved by the City
4. Project reports.
5. Any other item specified in the contract for that project.

CI. The selection of an Engineer for a specific project shall be based on experience with similar projects, references, performance in similar projects, and availability. This will include the ability to meet schedules, cost control, and responsiveness to client.

CII. The Engineer shall have an engineering staff on-site everyday who is responsible, on behalf of the Engineer, for providing timely completion and response for performance of

the terms of each Project Assignment Agreement during the progress of each individual project. Any deviation from this requirement is at the discretion of the City and must be approved in writing by the City prior to the start of any individual project.

RE: Proposal for the City of Las Cruces General Engineering Services – RFP No: 23-24-051

Dear Members of the Selection Committee:

Water Works Engineers LLC (Water Works) is pleased to submit one (1) electronic version of our proposal for the City of Las Cruces (City) General Engineering Services. At this time we would like to acknowledge Addendum One dated 2/13/24 and Addendum Two dated 2/23/24.

Over the past 19 years, Water Works has provided engineering design services for water, wastewater, and recycled water infrastructure for municipal utility districts and agencies across the western United States. We have built a reputation of providing high quality and cost-effective services in a timeline consistent with varying schedules associated with on-call engineering services. We recognize that maintaining an excellent level of service to repair, rehabilitate, and replace aging infrastructure **requires excellent planning, technical expertise, and execution.**

Water Works will provide the City the full depth and breadth of our western United States experience through our local team. Our Project Manager and Lead Project Engineer ***Mohsen Karbakhsh, PE***, will be managing the nuts and bolts of this project from our Albuquerque office. ***His hands-on approach to design, attention to details, construction experience, and exceptional communication skills are what make his projects successful***. At Water Works Engineers, we believe and insist that our Project Managers have an in-depth involvement in the technical execution of the projects they manage. This significantly differentiates us from other firms, who see Project Management as a strictly administrative function. When you work with Water Works Engineers, the Project Manager is a one-stop shop for resolution of all project issues, from start to finish. This means that Mohsen will be responsible for the technical execution of much of the work, while efficiently targeting the full range of Water Works technical expertise and resources.

We have the experience, judgement, and leadership skills to keep projects on track and delivered while balancing the expectations and goals of all project participants. Water Works Engineers is a firm that was built from the ground up around ***experienced staff whose focus is engineering and technical work*** —not marketing – thereby limiting overhead functions to provide our clients with cost effective services. This combination of experienced staff and competitive rates will allow us to offer exceptional value.

Water Works acknowledges and agrees to comply with the insurance requirements listed in the RFP. If you have any questions regarding this proposal, please contact Mohsen Karbakhsh at (505) 932-8480 or mohsenk@wwengineers.com.

Very Truly Yours

Mohsen Karbakhsh, PE
Project Manager/Lead Project Engineer
(PROPOSAL CONTACT)

Mike Fisher, PE
Sr. Technical Lead, Managing Member
(PRINCIPAL IN CHARGE)

WATERWORKS ENGINEERS

Evaluation Criteria No. 1 – Technical Approach

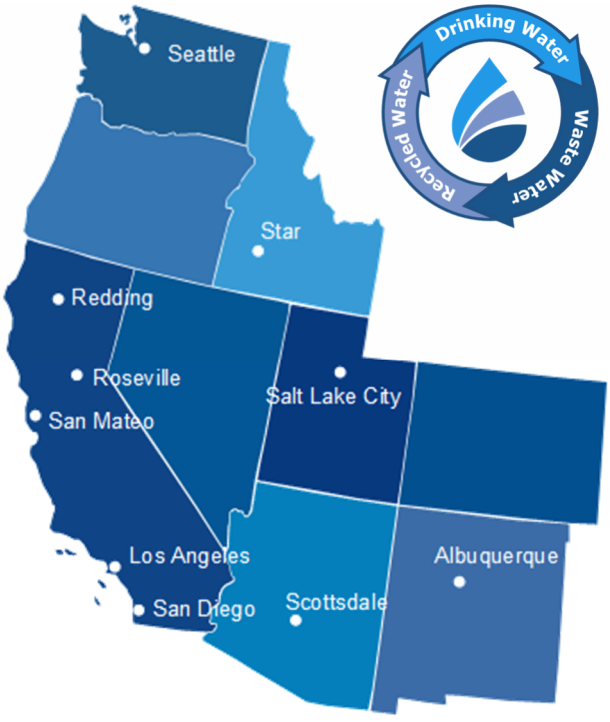
Specialized Design and Technical Competence

Water Works Engineers (Water Works) was formed in 2005 by engineers who believed that water and wastewater engineering and consulting could be done a better way by combining the best attributes of large and small firms: *the* ***technical expertise of a large firm and efficiency and personal attention of a small one***. Our vision was the formation and growth of a new kind of engineering firm, *a firm built on providing exceptional client service from highly experienced engineers in a "hands-on" highly interactive and enjoyable environment.*

To accomplish our vision, Water Works Engineers provides high-level staffing on every project with a *leaner overall firm structure* that is focused on delivering high quality work for client-specific needs. ***We focus solely on collection, conveyance, water/wastewater treatment, water, and recycled water systems infrastructure***. This focus makes us efficient, keeps us up to date, and allows us to provide the highest level of service. Our focus and work approach allow us to provide high quality planning and design products. ***We take great pride in the fact that we don't just create documents, we facilitate projects***.

This focus and approach have fueled a consistent increase in our clients and projects, with 10 offices and 105 employees with approximately $30M in yearly revenue. ***By focusing exclusively on water and wastewater engineering, Water Works provides focused expertise rather than the broad umbrella approach of many civil engineering firms***. It is with these core values in mind that we assembled our team for this project.

Based on our experiences, we strongly believe that people execute projects, not firms. For that reason, the Water Works team is committing high quality, senior staff with in-depth experience directly relevant to the City's Improvement Projects. The Project team are experienced professionals who have been directly involved in the design and successful implementation of collection, distribution, conveyance, and treatment system projects across Arizona, California, Utah, and New Mexico.

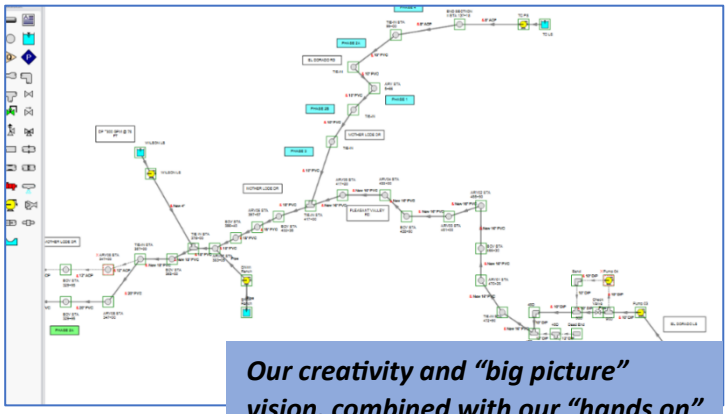


In addition to our civil and environmental capabilities with respect to water/wastewater treatment, infrastructure, and hydraulics, Water Works Engineers has in-house **structural**, **electrical and control, and mechanical** engineers and designers that will be involved with the City as needed.

Major Tasks to be Accomplished

Collection and Distribution System Master Planning and Design

Water Works Engineers understands that the infrastructure outside the treatment plant (water distribution and wastewater collection systems) is often our communities' single largest investment. We pride ourselves on delivering innovative and quality work products in all phases of a project, on schedule and within budget. We have extensive experience in gravity and pressurized pipelines; booster pumps and lifts stations; steel and concrete storage tanks; metering and pressure reducing facilities; water quality monitoring stations; and manholes and junction structures. Our experience includes 90-inch transmission and interceptor pipeline design all the way down to small backyard residential lateral and mainline replacements. We have expertise with vertical turbine wet/dry well solids-handling self-cleaning sewage pumps stations, as well as smaller "duplex" and "air-pot" package stations. Water Works has experience in designing 15-MGD booster pumps stations with 5-MG pre-stressed concrete storage tanks and complex water age mitigation controls to replacing aging 40,000-gallon redwood water tanks serving 70 customers.

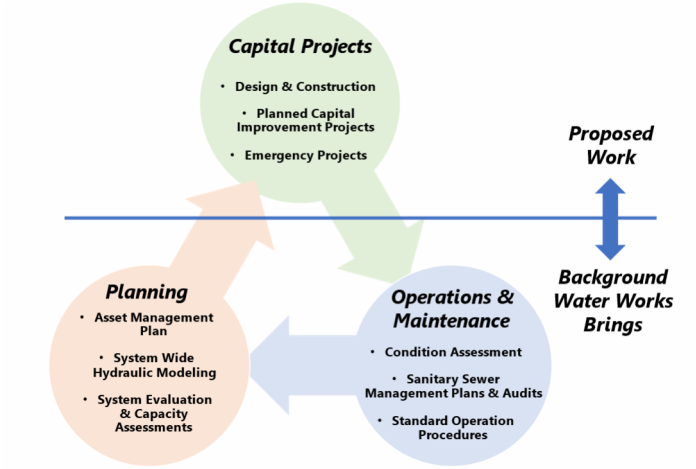


Our creativity and "big picture" vision, combined with our "hands on" construction phase experience, allows us to balance project budgets and schedule demands with the ever increasing environmental and political constraints.

In addition, Water Works Engineers has completed water distribution computer models for large cities and 50 connection developments. These models have supported regional water supply planning efforts and simple utility connections. Our engineers have utilized multiple water and wastewater hydraulic modeling platforms (Sewer/WaterCAD, Water/SewerGEMS, InfoWater/Sewer, H2ONet, InfoWorks ICM, AFT Fathom, etc.) to complete extended period simulation computer models to analyze and identify current and future pipeline capacity upgrades, as well as develop mitigation for water quality concerns. Our planning and design efforts often facilitated the extension of utility service to communities previously not served; extended the life of existing infrastructure through rehabilitation/repair; or provided new facilities to replace aging infrastructure.

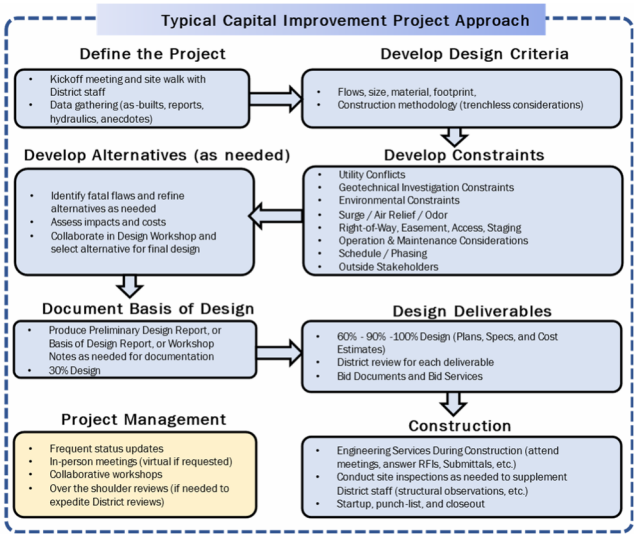
Project Planning and Capital Improvement Projects

Planning phase starts with understanding of the existing structure. Water Works will meet with the City staff to understand the ultimate goals for improving existing infrastructure. Water Works can efficiently create preliminary studies, maps, and calculations to support the City's upcoming

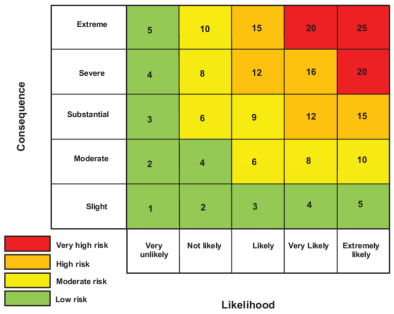


needs. With our full depth and breath of understanding of water and wastewater subject matter we can address nay needs and goals the City may have.

Our successful implementation of Capital Improvement Projects (CIPs) is also informed by understanding the work that went into developing the projects. We have developed and updated master plans, ran condition assessments, reviewed CCTV, and developed asset management programs. We have also developed numerous collection system and distribution system hydraulic models and master plans.



Our understanding of the entire procurement process allows us to ensure that we properly understand how to optimize and apply each CIP with the right input from capital, planning, and Operations and Maintenance (O&M) staff. Our approach is always tailored to fit the nuances of the project but is centered upon active communication and collaboration with the City. We do not silo our engineering process, and it is important for us that the City is engaged as decision makers and the individuals who understand their system the best. A typical Water Works approach to a Capital Improvement Project is displayed in the following figure.



Groundwater Treatment

Water Works Engineers' highly skilled and qualified professionals have been involved in over 200 groundwater contaminant treatment projects. Since the beginning of the firm, groundwater treatment has been one of our core competencies. Our staff have conceptualized, designed, and overseen construction, start-up, and operational optimization for dozens of cost-effective groundwater treatment facilities across the West. We understand the complexities of groundwater treatment for both organic and inorganic contaminants as well as the implications of various treatment approaches on waste disposal, general water quality, corrosion control, and disinfection byproduct formation in distribution systems. Our considerable knowledge and

experience in the study and treatment of challenging groundwater supplies with complex water quality issues has allowed us to pride ourselves on our ability to design and implement cost effective treatment systems that treat/remove multiple co-occurring groundwater contaminants while minimizing maintenance costs and operational "headaches".

Surface Water Treatment

We have engineered water systems for surface water systems throughout the western United States, including New Mexico, Arizona, and California. We have a wide array of experience when it comes to the following challenges associated with surface water treatment:

- Department of Public Health permitting assistance
- Treatment of eutrophic sources with prolific algal blooms and associated challenges
- Treatment of high turbidity sources impacted by colloidal clays.
- Chemical pretreatment selection and optimization
- Filtration performance assessment and optimization
- Disinfection byproduct formation minimization
- Taste and Odor Control
- UV Disinfection
- Recycling of residuals dewatering water

Our team pulls from experiences on these projects to develop the most effective treatment process for your systems.

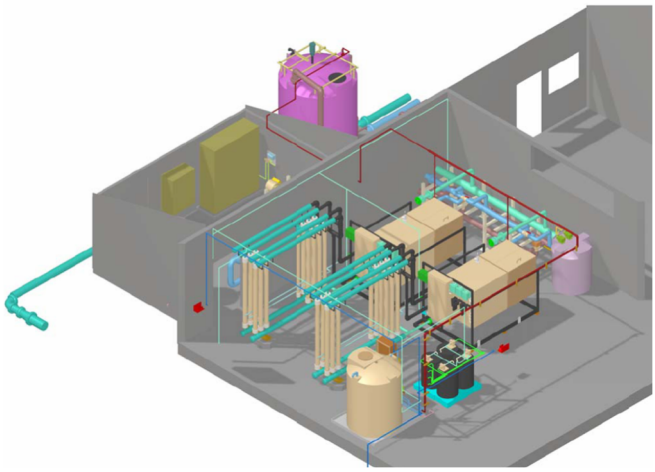
Water and Wastewater Treatment Process Design

Water Works Engineers has designed several water and wastewater treatment plants that are successfully operating. We are experienced and adept in all facets of water and wastewater treatment process design, including:

- Identification of the most appropriate and cost-effective treatment process for the client's needs
- Selection of treatment processes, technologies, and equipment
- Process BioWin modeling and calibration
- Optimal sizing of the treatment system's components
- Specification, layout and optimization of the equipment, piping, valving, and instrumentation
- Coordination of mechanical design with process & instrumentation diagrams and electrical requirements
- Development of treatment process control narratives, control loop descriptions and operating guidelines

Water Works selects and designs treatment processes that reliably meet or exceed treatment goals and are easily operated by treatment plant staff while minimizing capital and O&M costs.

3-Dimensional CADD Modeling, Revit, and BIM 360



We have capabilities to perform detailed design using 3-dimensional CADD tool and combine those with Revit/BIM 4D building information modeling application capable with tools to plan and track various stages in the building's lifecycle, from concept to construction and later maintenance and/or demolition. This is our standard practice and leads to better coordination, integrated cross-checking, and clearer contract documents. The 3-dimensional CADD Model also functions as an invaluable communications tool, allowing better and more thorough visualization of the finished product at every stage of design, bidding, and construction. Production of 3-dimensional PDF files allow project team members anywhere in the `world to view the CADD model and review a 3-dimensional image of the facility during any stage of the design process.

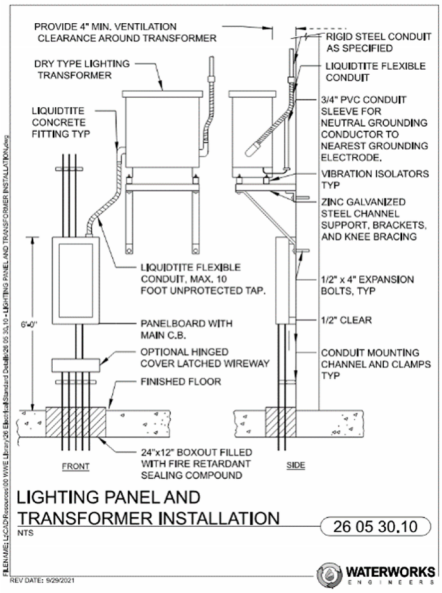
The 3-dimensional CADD models provide a clear understanding of facility geometry, access and clearance issues, and overall system functionality, help bidding contractors quickly understand the project, expedite the bidding process, and help on site construction and inspection personnel quickly familiarize themselves with the facility.

Site development

Whether we are designing a well booster station, sewer lift station, or a treatment plant component, our civil designers and engineers work closely with our other disciplines in developing the site layout and component configurations. This includes drainage and grading, utilities, electrical buildings, retaining walls, parking lot, access roads and bending radius of utility trucks, fences and gates, security measures, fuel and chemical storage, odor control, onsite generator, as well all other components required for robust O&M procedures.

Structural Design

Our structural engineering group has supported many water and wastewater utilities through engineering on-call contracts. Our projects have ranged widely from small rehabilitation projects and inspections to large facility design. We have completed tasks related to the design of new facilities, reinforced concrete, precast concrete, concrete rehabilitation, rebar design, steel and aluminum framing, masonry wall design, structural analyses, retaining walls, buildings, condition assessments, construction administration and inspection, and special structural inspections.



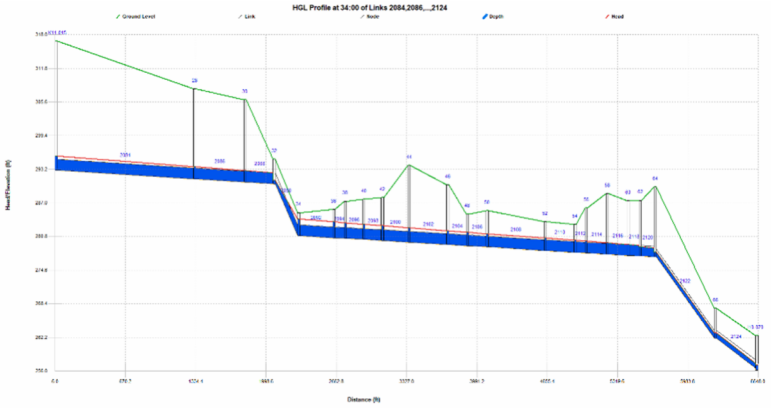
Electrical, Control, and SCADA

Water Works Engineers provides Electrical, Instrumentation & Control (I&C), as well as Supervisory Control and Data Acquisition (SCADA) services for all projects we are involved with. We have an extensive library of standard details and specifications that we can quickly use to supplement the City's standard in any project. In addition, we can team up with any trusted subconsultants, that may have better local knowledge, if recommended by the City.

Infrastructure Computer Network Analysis

Water Works has an extensive familiarity with the industry standard water and wastewater computer modeling software packages, including but not limited to InfoSewer, InfoWater, and InfoWorks ICM. For instance, the City's sewer hydraulic model in Innovyze InfoSewer has been discontinued by Innovyze and its parent company AutoDesk and every agency or consultant with an existing license is unable to renew whenever their individual licenses expire in 2024.

It is anticipated that Innovyze will push for the City to upgrade at significant subscription-based cost to the non-ArcGIS Innovyze InfoWorks ICM (assuming the City owns and operates its existing sewer hydraulic model). This is a very robust software with integrated storm 2D surface modeling features that is not needed by most users. InfoWorks ICM is a standalone program and does not have any connectivity to ArcGIS databases. It is our opinion that there is a significant benefit to maintaining a sewer hydraulic model within



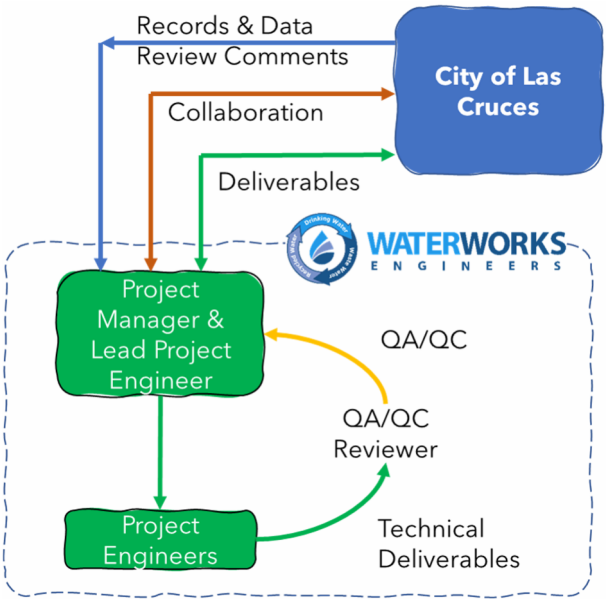
an ArcGIS environment and Water Works could do so with Aquanuity AquaTwin Sewer, which is a streamlined and lower cost alternative to InfoWorks ICM.

Currently there is tremendous pressure on current InfoSewer license holders to the get their sewer models imported into a new software as soon as possible and there is very limited information and upgrades processes to do so. Water Works is assisting several clients with this exact transition and has developed an approach and procedures to import and validate existing sewer models, be it Innovyze InfoWorks ICM or Aquanuity AquaTwin Sewer. We look forward to discussing this with you and developing the right tactic for the City, whether the City is interested in purchasing the select software and maintaining the model in house, or tasking that to an experienced Consultant like Water Works.

Mechanical Design

Water Works Engineers provides detailed analysis and design for a wide range of mechanical, pluming, and HVAC systems. We use hydraulic analysis tools that we have developed to create mechanical systems that perform well. From pump stations that can accommodate a range of changing hydraulic conditions utilizing a wide range of pump technologies to mixing systems that provide complete mixing of tanks to chemical feed systems that are reliable and safe to air distribution systems that function over a wide range of temperatures and air flows, Water Works Engineers designs mechanical systems that work well, are durable, and easy to operate and maintain.

Alternative Project Delivery



Water Works Engineers has extensive experience in alternative project delivery, which is now 20% of our business. While these delivery systems (design-build, CM at risk, job order contracting, etc.) are becoming far more common in the delivery of water and wastewater conveyance and treatment projects, the breadth of our experience successfully delivering these projects sets us apart. We have successfully executed projects ranging from $0.5M to over $400M in project value using alternative project delivery methods.

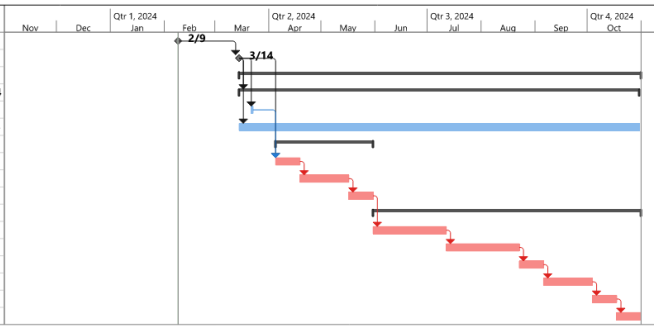
Project Management, QA/QC, and Schedule

At Water Works, we believe and insist that our Project Managers (PM) have an in-depth involvement and contribute towards the technical execution of projects they manage. They are not only aware and responsible for project management tasks and functions but *are involved and integrated into the*

design decision making process at all levels with all disciplines. This significantly differentiates us from other firms. Continuous Quality Control and Technical Review are key tools in Water Work's project management philosophy. Quality, budget, and schedule performance are all optimized when technical issues are identified and resolved as early as possible in the project delivery process. A cornerstone of our Quality Control philosophy, and our work philosophy in general at Water Works is that senior staff are integrally involved with the development of all deliverables, and that junior level staff are not left to produce a majority of the work without hands-on involvement and mentoring from our highly experienced staff. Junior level staff perform tasks that are appropriate for their level of experience which helps improve the cost efficiency of our work, but are not thrown in "over their heads", which is a common root cause of projects that go "off the tracks".

All technical work products are reviewed with the Quality Assurance/Quality Control (QA/QC) Reviewer in an internal workshop setting prior to finalizing Project Deliverables. The QA/QC Reviewer for this project will be involved on a daily basis, to "check in" on the work and ensure that key client concerns and over-arching project requirements are addressed throughout the project execution. At each deliverable Water Works will provide a statement certifying that the deliverables were reviewed through our QA/QC program prior to submittal. Water Works will also provide background documentation, calculations, model files, etc. A quality work deliverable is one that meets our contractual requirements with the City and is prepared in accordance with accepted standards of professional practice. It is the responsibility of Water Works to plan and execute work so that quality deliverables are produced to meet those requirements.

ID	Task Mode	Task Name	Duration	Start	Finish
1		Task Order Submittal	0 days	Fri 2/9/24	Fri 2/9/24
2		Notice to Proceed	0 days	Thu 3/14/24	Thu 3/14/24
3		**Project Title**	**165 days**	**Fri 3/15/24**	**Thu 10/31/24**
4		**Task 1 - Project Management**	**164 days**	**Fri 3/15/24**	**Wed 10/30/24**
5		Kickoff meeting	1 day	Fri 3/22/24	Fri 3/22/24
6		PM related tasks	164 days	Fri 3/15/24	Wed 10/30/24
7		**Task 2 - Preliminary Design Services**	**40 days**	**Fri 4/5/24**	**Thu 5/30/24**
8		Background review and site recon	10 days	Fri 4/5/24	Thu 4/18/24
9		Conceptual package	20 days	Fri 4/19/24	Thu 5/16/24
10		Review Period	10 days	Fri 5/17/24	Thu 5/30/24
11		**Task 3 - Final Design Services**	**110 days**	**Fri 5/31/24**	**Thu 10/31/24**
12		Survey services	30 days	Fri 5/31/24	Thu 7/11/24
13		80% Deliverable	30 days	Fri 7/12/24	Thu 8/22/24
14		Review period	10 days	Fri 8/23/24	Thu 9/5/24
15		100% Deliverable	20 days	Fri 9/6/24	Thu 10/3/24
16		Review period	10 days	Fri 10/4/24	Thu 10/17/24
17		Construction documents	10 days	Fri 10/18/24	Thu 10/31/24



Our project managers will work with the City's project managers to develop specific project schedules during initial phases of each project. These projects will be created using the Critical Path Method (CPM) and will be frequently updated and submitted at each project milestone. In addition, we will include review periods, typically 2 weeks, at each deliverable, followed by a review workshop opportunity, where we sit down with the City's staff and operators to hear their feedback on the overall progress. An example of our project schedule is shown below.

Construction Support

Water Works has extensive experience in construction inspection, contract administration, office services during construction (review of Contractor submittals, Requests for Information, Requests for Change, etc.), final inspection and punch-list, and record drawing production. We offer these services either in a traditional Design, Bid, Build environment, or in conjunction with alternative delivery methods. Our experience in collaborating with contractors, operations and maintenance staff, and owners helps us manage construction documents and correspondence in an effective

way, while providing professional review and recommendations when reviewing material and installation submittals.

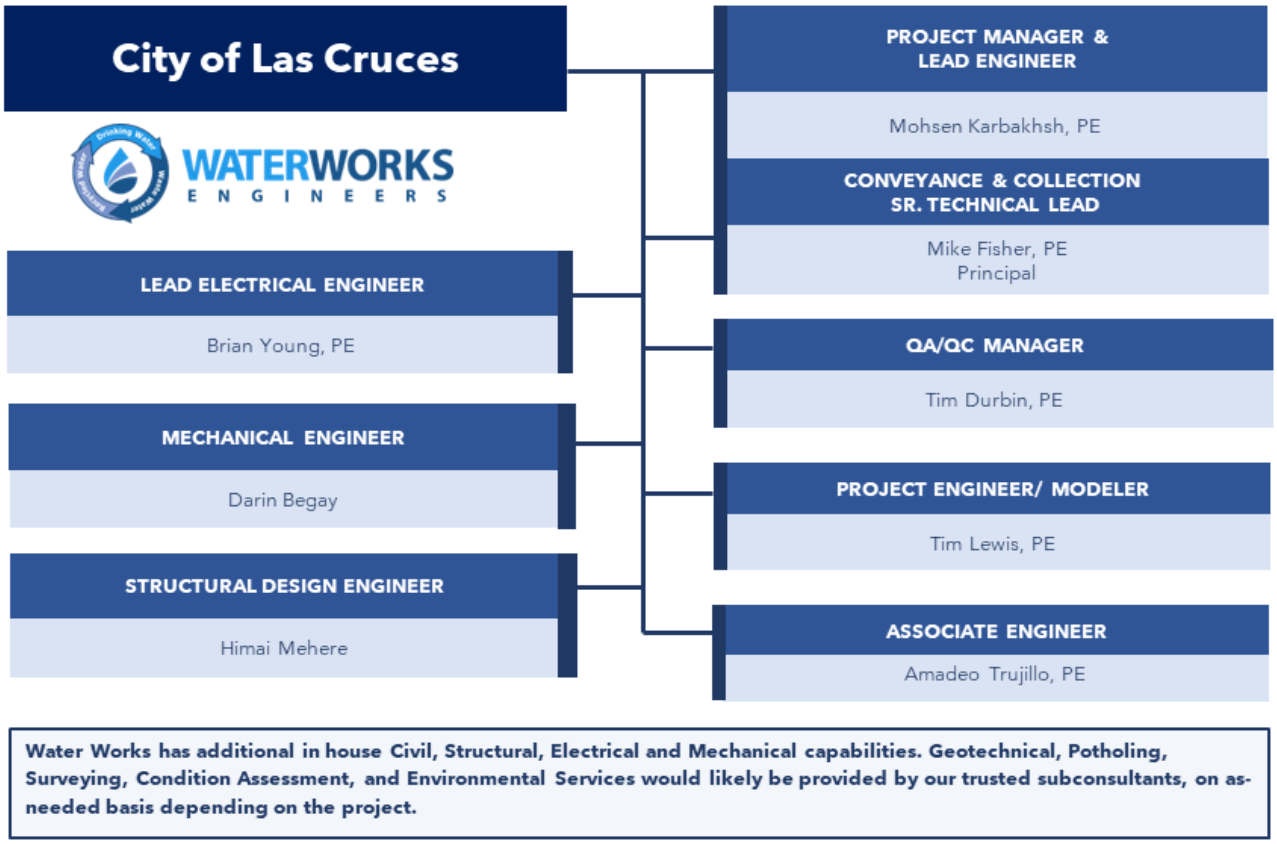
Other Tasks

Water Works will perform the majority of the required task by the City in house, however, there are a few tasks that are outside of our specialties, including but not limited to traffic studies, transportation, photometrics/lightning, environmental studies, solids waste management, as well as geotechnical assessments. In order for us to provide our established high-quality services, it is important for us to stay focused on our specialized technical services. This means we need to rely on subconsultants to provide us necessary support in other areas, upon approval of the City.

Evaluation Criteria No. 2 – Qualifications/Competence

Key Personnel

The core of the project team, and most critical to any project's success, is the Project Manager. In this instance, Mohsen Karbakhsh, P.E. will serve as Project Manager and Lead Project Engineer. Tim Lewis, P.E. will serve as Project Engineer and Amadeo Trujillo, P.E., as our Associate Engineer. Our team will be supported by Mike Fisher, P.E as Sr. Technical Lead for collection and conveyance systems (and Principal-in-Charge). Brian Young, P.E., will be our Sr. Electrical and Control lead. Himai Mehre will be our structural lead, and Darin Begay will be our Mechanical Engineer. Tim Durbin, P.E., will serve as our QA/QC manager as needed. The core design team at Water Works is shown in the organizational chart below.



Mohsen Karbakhsh, Ph.D., PE
Lead Project Engineer/Project Manager
NM PE – 27062 Civil
CA PE – 91008 Civil
PACP/MACP/LACP
mohsenk@wwengineers.com
(505) 932-8480

Availability: 75%
Areas of Competence
Water and Wastewater Treatment
Distribution and Collection System Modeling
Groundwater treatment and distribution

Mohsen is a civil/environmental professional engineer who lives and works locally in our Albuquerque office. Mohsen has over 9 years of experience, as well as 3 years of research experience at the New Mexico State University, where he worked on pilot scale algal bioreactors at the Jacob Hands WWTP. Mohsen's experience ranges from developing O&M manuals for existing treatment facilities, to hydraulic and process modeling (Fathom, SewerCAD, BioWin, InfoWater, InfoSewer, InfoWorks ICM), GIS , condition assessment, funding, planning, design, bid, and construction of various water/wastewater treatment and infrastructure systems.

Mohsen will be the single point of contact for Water Works. The City of Las Cruces will see a familiar face who will carry the project and maintain continuous institutional knowledge. He will be committed from start to finish, working closely with City of Las Cruces, our New Mexico staff, subconsultants, and regulatory agencies, and will ensure all parties are updated accordingly. Not only will Mohsen be providing project leadership and direction, he also will be responsible for technical execution of much of the work. He will be assigning the right mix of individuals with specific experience for each type of project.

Mike Fisher, P.E.
Principal In Charge/Manager of the Firm
CA PE – 67194 Civil
UT PE – 11698124-2202 Civil
mikef@wwengineers.com
(916) 227-9027

Areas of Competence
Senior Technical Lead in Distribution and Collection System

Mike is a managing partner of Water Works Engineers with 27 years' experience and leads our Linear Infrastructure Design Group. He is proficient in hydraulic modeling; GIS; existing infrastructure condition/capacity assessment; preparation of plans and specifications; cost estimation; right-of-way assessment; and permitting assistance. Mike's experience in hydraulic analysis ranges from small 10-mile gravity only systems, to over 5,000-mile pressure and gravity systems splitting flow between multiple treatment plants that are cross-connected for redundancy. His "hands-on" approach to design, attention to detail, and exceptional communication skills are what make his projects successful.

Brian Young, P.E.
Lead Electrical Engineer
AZ PE – 52847
CA PE – E20743
UT PE – 8841511-2202

Areas of Competence
Senior Technical Lead
Electrical Design
Instrumentation and Controls
SCADA
Electrical Life and Safety Systems

Brian has 34 years of experience and has acquired in comprehensive understanding of all facets of water and wastewater treatment facilities and distribution electrical and control systems. His

experience includes the design of electrical systems for municipal facilities, industrial facilities, and primary electric transmission, booster and lift stations, wells, odor control stations, SCADA, and distribution lines. He has provided technical leadership, quality assurance, design, and analysis of electrical distribution and generation systems including multiple services and generators.

Darin Begay
Mechanical Engineer
darinb@wwengineers.com
(480) 719-2341

Availability: 50%
Areas of Competence
Master Planning and Hydraulic Modeling
System Modeling (InfoWater & InfoSewer)
Booster Stations and Groundwater

Darin has 16 years of experience providing mechanical engineering in support of pumping systems, mechanical piping, HVAC, and plumbing design projects for clients throughout Arizona – including a variety of large and small-scale wastewater facilities. His specialty is hydraulic systems and the conveyance of all water types – this includes the design of gravity and pressurized pipelines, pumping stations, hydraulic and surge analysis, and pump selection.

Himai Mehere
Structural Design Engineer
himaih@wwengineers.com
(480) 465-7464

Availability: 50%
Areas of Competence
Structural Design

Himai over 7 years of experience in structural design engineering with projects in residential, mixed-use, and commercial building sector. Proficient in steel, concrete, timber, masonry, and light-gage steel design. Detail oriented, team player with proven ability to deliver fast paced projects from planning, design, permitting to construction phase.

Tim Durbin, P.E.
Quality Assurance Manager
CA PE – 75456 – Civil
timd@wwengineers.com
(916) 460-8636

Availability: As needed
Areas of Competence
Quality Assurance/Quality Control

Tim is a civil/environmental engineer with 20 years of experience in the field of water and wastewater treatment and pumping systems. He started his career doing advanced research in wastewater chemistry, with a focus on strategies to minimize the formation of disinfection by-products. He has since applied his knowledge of chemistry and treatment processes to the design of water and wastewater treatment facilities. Mr. Durbin has worked on projects in California and other Western states related to treatment facility design, pumping of water and wastewater, chlorination, energy recovery, and chemical storage and feed system design. He currently serves as Quality Assurance Manager, where he oversees QA/QC procedures and technical reviews for projects across the firm.

Tim Lewis, P.E.
Project Engineer

ABCWUA Corrales Well 2 & 3 Arsenic Water Treatment Plant Preliminary Design Assessment

Albuquerque, NM

Project Type
Groundwater Treatment

Project Timeframe
Preliminary Design:
May 2011 – November 2012

Project Cost
Preliminary Design Fee: $110k
Construction Cost: n/a

Team Members
Sami Kader, Project Engineer

Project References
David Price, ABCWUA (505)768-3670
Victoria Dery, ABCWUA (505)873-7040
Scott Salvas, ABCWUA (505)239-2344

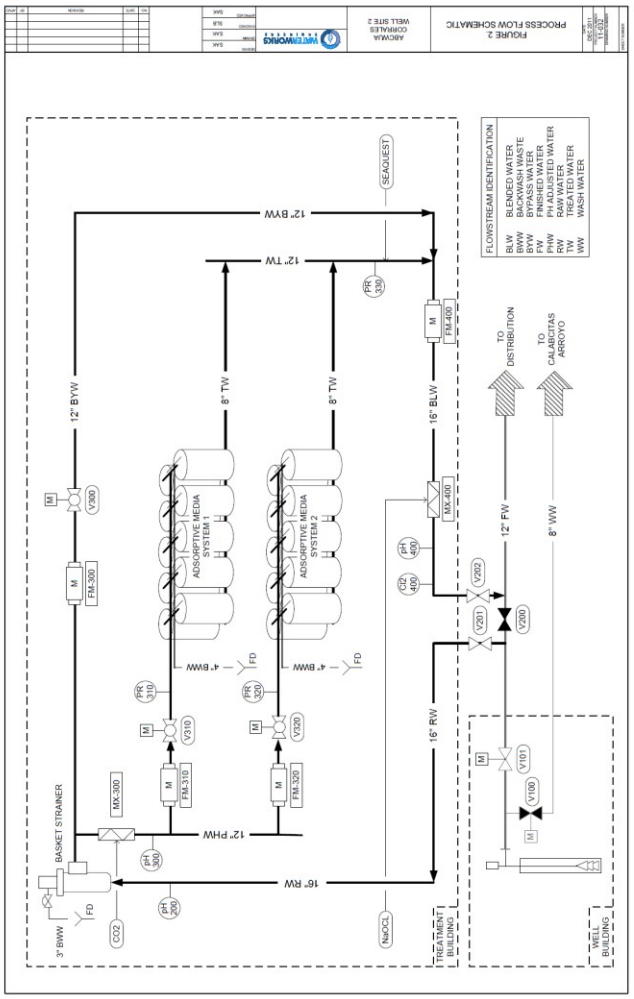
The Albuquerque Bernalillo County Water Utility Authority (ABCWUA) owns and operates Well 2 & 3, both of which have arsenic in exceedance of the regulatory limit of 10 µg/L. Corrales Well 2 (3000-gpm) currently has no treatment system, while Corrales Well 3 (2000-gpm) has a treatment system which is in need of upgrade. Three project alternatives were examined:

Alternative 1: Use Corrales Well 2 source water and relocate the treatment system at Corrales Well 3 to Well 2

Alternative 2: Use Corrales Well 3 source water and upgrade the treatment system at Corrales Well 3 in-place.

Alternative 3: Use the source water from Corrales Well 2 and pump it to Corrales Well 3, upgrade the treatment system at Corrales Well 3, and treat the Corrales Well 2 source water with the upgraded Corrales Well 3 treatment system at Corrales Well 3.

Water Works Engineers provided preliminary design analysis for all three alternatives, including facility assessments, process design, mechanical layouts, facility planning, site planning, pipeline route study, preliminary surge analysis, preliminary environmental and planning assessments, etc. Based on capital and net present worth cost estimates of operation and maintenance, as well as non-costs assessments of the alternatives, Alternative 3 was recommended.



City of Surprise Special Planning Areas (SPAs) 1-5 Master Planning

Project Reference
Michael Boule 16000 N. Civic Center Plaza
Surprise, AZ 85374, 623-222-7040

Wastewater/ Water Planning, Design, and Construction Administration

Project Timeframe
June 2020- March 2021

Project Cost
$86K

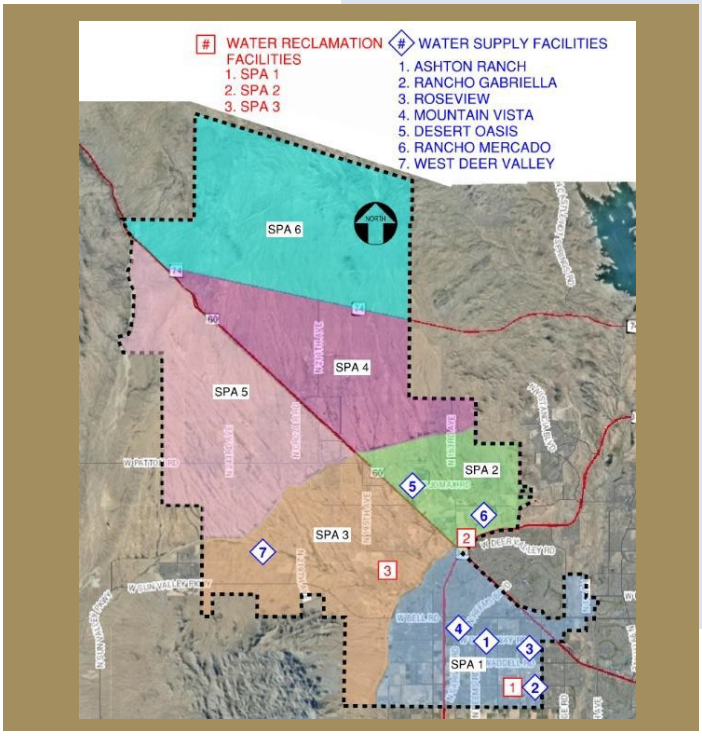
Team Members
John Matta, Principal/Project Manager
Abel Ramarui, Project Engineer

The City of Surprise (City) is a growing community with population expected to reach 400,000 by 2030 within the planning area shown below. To prepare for this, the City has been updating Integrated Water Master Plans with Water Resources and Water Infrastructure components. The City planned its water systems that extends over 299 square miles into six special planning areas (SPAs) - SPA 1 through SPA 6.

WaterWorks has been assisting Surprise for the past 10 years and was selected to review the original masterplan and optimize it, coordinate with private developers to incorporate their needs into the plan and assist in developing adaptive and flexible plans to maximize the synergy between the City budget and the developers impact fees. WaterWorks' involvement in each SPA included the following:

Water Systems: WaterWorks assisted the City in coordinating the needs of over 10 developers and the City's previous commitments at SPAs 2, 3, 4, 5 and 6. WaterWorks reviewed the masterplans developed and devised a plan that updates the water demands and consolidated water facilities (wells, storage, treatment, and pumping systems) to reduce costs and provide better financial planning for future facilities. WaterWorks also updated the pressure zone limits and transmission line connections to enhance system redundancies.

Based on the revised plan, WaterWorks designed additional wells and water facilities (storage, treatment, pumping) to accommodate the increased planned developments in the City of Surprise.



Wastewater and Reclaimed Water Systems: WaterWorks devised an expansion plan for the 14 mgd SPA 1 reclamation plant and is in the process of designing a system that augments the treatment capacity of the newer structures and abandons old facilities while increasing the treatment capacity to 16 mgd. For SPA 2 and 3 WRFs, WaterWorks completed a condition assessment report and developed recommendations for upgrades before the City takes over the plant from the private developer. This plan included the design of recharge basins.

City of Folsom, On-Call Projects

Citywide Water and Wastewater Infrastructure Rehab / Replacement

Project Type: Pipeline Replacement (ongoing)

Timeframe: 2009-Ongoing
Eng. Fee: >$800K (total)

Water Works Engineers provided and continues to provide preliminary engineering, design, and construction administration services for the City's ongoing proactive water distribution and wastewater collection system pipeline rehabilitation and replacement program (most recent project completed in 2022). The work has also included including manholes, cleanouts, sewer laterals, water services and meters, back-flow preventers, fire hydrants, and water quality sampling stations. The work also included retrofits to existing sewer lift stations.

Folsom Plan Area Engineering Services

Project Type: Pipeline, Pump Station, Lift Station, Modeling
Timeframe: 2016-2017
Eng. Fee: > $500K

Water Works Engineers provided design and engineering services for a sewer lift station and forcemain, water booster pump station, and hydraulic modeling for the upstream collection system. The sewer lift station incorporates a self-cleaning trench style wetwell design, and the water booster pump station includes custom architectural features due to its proximity to HWY 50 and high visibility.

Sewer Collection System Hydraulic Model

Project Type: Hydraulic Modeling & Master Plan
Timeframe: 2016-2018
Eng. Fee: $250K

Water Works Engineers completed a comprehensive update to the City's sewer collection system GIS, including updates based on recent capital improvement projects and systematic data quality control procedures. Water Works then ran and calibrated the hydraulic model, identified system capacity deficiencies, and developed a capital improvement program to address the deficiencies for current conditions and future growth.

Water Meter Database and User Interface

Project Type: O&M
Timeframe: 2016-2017
Eng. Fee: $250K

Water Works Engineers assisted with implementation of the City Water Meter Replacement Program, including development of a customized meter read database to locally host the City's data. WWE is "on-call" to implement additional custom improvements requested by Staff as needed.

Folsom Blvd. Sewer Trunk Relief Line

Project Type: Sewer Trunk
Timeframe: 2019-Ongoing
Eng. Fee: $300K

Water Works Engineers is providing design and construction administration services for 5,000-LF of parallel relief pipeline for the Folsom Blvd. 27" trunkline, which conveys over 1/3rd of the City's daily wastewater flows.

PROJECT ASSIGNMENT AGREEMENT

23-24-051 GENERAL ENGINEERING SERVICES

PROJECT NAME

Pursuant to terms and conditions of City of Las Cruces (CITY) Contract No. 23-24-051 dated June 1, 2024 between the CITY and Water Works Engineers, LLC (ENGINEER), as amended and incorporated herein by reference, the City and Contractor hereby agree on this _____ day of _____, 20___, as follows:

1. In a satisfactory and proper manner, the ENGINEER shall perform SERVICES as proposed in response to the CITY's RFP No. 23-24-051 and ENGINEER's proposal as set forth in ATTACHMENT A attached hereto.

2. The estimated completion date is number days after a Notice to Proceed is issued by the CITY to the ENGINEER.

3. In consideration for the satisfactory completion of the work agreed to herein, compensation shall be made in the amount of $dollars.cents, plus NMGRT. Invoices issued by the ENGINEER shall be made monthly / upon completion of project with payment by the CITY being made within 30 days upon receipt of undisputed invoice.

CITY OF LAS CRUCES

PROFESSIONAL SERVICES AGREEMENT

THIS AGREEMENT, made and entered into on this_____day of _____ ,2024 by and between the City of Las Cruces, New Mexico, hereinafter called “CITY” and Wilson & Company, Inc., Engineers & Architects, of 414 N. Main St, Ste A, Las Cruces, NM, 88001, hereinafter called “CONTRACTOR”.

1. PROJECT DESCRIPTION
General Engineering Services on an as needed basis via Project Assignment Agreements (Attachment “A”) during the term of this AGREEMENT.

2. SCOPE OF SERVICES
In a satisfactory and proper manner, the CONTRACTOR shall perform SERVICES, as proposed in response to the CITY’S RFP No. 23-24-051, as set forth in Exhibit A, attached hereto and made a part of this Agreement.

The CONTRACTOR is authorized to extend the same terms and conditions of this Agreement to other governmental entities conditioned upon the procurement laws and regulations of those entities. The CITY shall not be a party nor have any liability relating to such extensions.

3. APPROPRIATIONS
The terms of this Agreement are contingent on sufficient appropriations and authorization being made by the City Council for the performance of this Agreement. If sufficient appropriations and authorizations are not made by the City Council, this Agreement shall terminate upon written notice given by the CITY to CONTRACTOR. The CITY’S decision as to whether sufficient appropriations and authorizations exist shall be accepted by CONTRACTOR and shall be final.

4. COMPENSATION
The CITY shall compensate CONTRACTOR for the performance of SERVICES under this Agreement an amount agreed to for each assigned project, plus applicable taxes. CONTRACTOR shall perform the SERVICES upon receipt of a purchase order or written Notice to Proceed for each assigned project from the CITY. The CITY cannot authorize costs to be incurred prior to such written Notice to Proceed. CONTRACTOR shall submit invoices upon completion of the project. CITY shall pay invoices Net 30 days upon receipt of undisputed invoice.

CONTRACTOR is responsible for payment of State of New Mexico Gross Receipts Tax levied on the amounts payable under this Agreement. CONTRACTOR agrees to comply with all federal and state tax payments and report all items of gross receipts as income from the operations of its business.

5. DEVOTION OF ADEQUATE TIME
CONTRACTOR will devote the necessary hours each week to the performance of projects that are required by the CITY and it will serve the CITY diligently and faithfully,

and according to its best ability in all respects and will promote the best interests of the CITY.

6. TERM AND SCHEDULE
This Agreement shall become effective on June 1, 2024 for a term of 5 years through May 31, 2029.

CONTRACTOR shall perform the SERVICES in accordance with the time set forth as agreed upon by the CITY and CONTRACTOR and as agreed to for each project assigned under the terms of this Agreement.

7. EXTENSIONS, CHANGES, AND AMENDMENTS
This Agreement shall not be extended, changed, or amended except by instrument in writing executed by the parties. The CITY shall not be liable for payment of any extra services nor shall CONTRACTOR be obligated to perform any extra services except upon such written agreement. Such written approval shall indicate the date said extension, change, or amendment is effective and shall be signed by the parties to this Agreement. In the event that the parties cannot reach agreement as to a particular change, the issue shall be resolved pursuant to Article 21.

8. CHANGES AND EXTRA SERVICES BY THE CITY
The CITY may make changes within the general scope of the SERVICES plus may also request CONTRACTOR to perform other extra services not incorporated within the Services set forth in this Agreement. If the CONTRACTOR is of the opinion that such change causes an increase or decrease in the cost and/or the time required for performing the changes or other services required by the City, CONTRACTOR shall so notify the CITY of that fact within five (5) business work days from the date of receipt of change by the CITY. The CITY shall provide written response to the CONTRACTOR within five (5) business work days from the date of receipt of CONTRACTOR'S written notification.

9. CHANGES AND EXTRA SERVICES BY THE CONTRACTOR
In the event a condition is identified by the CONTRACTOR which, in the opinion of the CONTRACTOR, changes the services, costs, and/or time required for performance under this Agreement, the CONTRACTOR shall provide written notification to the CITY within five (5) business work days of such identification. The CITY shall respond in writing to such notification within five (5) business work days from the date of receipt of CONTRACTOR'S notification.

10. DELAYS
In the event that performance of SERVICES is delayed by causes beyond reasonable control of CONTRACTOR, and without the fault or negligence of CONTRACTOR, the time and total compensation for the performance of the SERVICES may be equitably adjusted by written agreement to reflect the extent of such delay. CONTRACTOR shall provide the CITY with written notice of delay pursuant to Article 9 including therein a description of the delay and the steps contemplated or actually taken by

CONTRACTOR to mitigate the effect of such delay. The CITY will make the final determination as to reasonableness of delays.

11. TERMINATION
This Agreement may be terminated by either party hereto upon fifteen (15) calendar days written notice in the event of substantial failure by the other party to perform in accordance with the terms of this Agreement through no fault of the terminating party. This Agreement may also be terminated by the CITY for its convenience or because the PROJECT has been permanently abandoned, but only upon fifteen (15) calendar days written notice to CONTRACTOR.

In the event of termination, CONTRACTOR shall be compensated for all services performed and costs incurred up to the effective date of termination for which CONTRACTOR has not been previously compensated.

Upon receipt of notice of termination from the CITY, CONTRACTOR shall discontinue the SERVICES unless otherwise directed and upon final payment from the CITY deliver to the CITY the required number of copies of all data, drawings, reports, estimates, summaries, and such other information and materials as may have been accumulated by CONTRACTOR in the performance of this Agreement, whether completed or in process.

12. RECORDS AND AUDITS
CONTRACTOR will maintain records indicating dates, length of time, and services rendered. The CITY has the right to audit billings both before and after payment, and contest any billing or portion thereof. Payment under this Agreement does not foreclose the CITY'S right to recover excessive or illegal payments. CONTRACTOR will retain records for five (5) years after the completion of the project.

13. DISCLOSURE AND OWNERSHIP OF DOCUMENTS, PRODUCTS, DESIGN, ELECTRONIC FILES
All technical data, electronic files, and other written and oral information not in the public domain or not previously known, and all information, electronic files, and data obtained, developed, or supplied by the CITY will be kept confidential and CONTRACTOR will not disclose to any other party, directly or indirectly, without the CITY'S prior written consent unless required by lawful order.

All technical data, electronic files, products developed, operational parameters, blueprints, and other information and work of the CONTRACTOR shall be the sole property of the CITY and shall be delivered to the CITY when requested and at the end of the Agreement.

14. INDEPENDENT CONTRACTOR
CONTRACTOR represents that it has, or will secure, at its own expense, all personnel required in performing the SERVICES under this Agreement. Such personnel shall not be employees of, nor have any contractual relationship with the CITY. CONTRACTOR,

consistent with its status as an independent contractor, further agrees that its personnel will not hold themselves out as, nor claim to be officers or employees of the CITY by reason of this Agreement.

To the extent that CONTRACTOR employs any employees, CONTRACTOR shall be solely responsible for providing its own form of insurance for its employees and in no event shall CONTRACTOR's employees be covered under any policy of the CITY.

CONTRACTOR'S retention hereunder is not exclusive. Subject to the terms and provisions of this Agreement: (i) CONTRACTOR is able, during the Term hereof, to perform services for other parties; and (ii) CONTRACTOR may perform for its own account other professional services outside the scope of this Agreement.

CONTRACTOR is and shall be an Independent Contractor and shall be responsible for the management of its business affairs. In the performance of the work under this Agreement, CONTRACTOR will at all times be acting and performing as an Independent Contractor, as that term is understood for federal and state law purposes, and not as an employee of the CITY. Without limitation upon the foregoing, CONTRACTOR shall not accrue sick leave, jury duty pay, retirement, insurance, bonding, welfare benefits, or any other benefits, which may or may not be afforded employees of the CITY. CONTRACTOR will not be treated as an employee for purposes of: Workers' Compensation benefits; the Federal Unemployment Tax Act; Social Security; other payroll taxes, federal or any state income tax withholding; or the employee benefit provisions described in the Internal Revenue Code of 1986, as amended. Neither the CITY, nor its agents or representatives, shall have the right to control or direct the manner, details or means by which CONTRACTOR accomplishes and performs its services. Nevertheless, CONTRACTOR shall be bound to fulfill the duties and responsibilities contained in the Agreement.

15. NO JOINT VENTURE OR PARTNERSHIP

Nothing contained in this Agreement shall create any partnership, association, joint venture, fiduciary or agency relationship between CONTRACTOR and CITY. Except as otherwise specifically set forth herein, neither CONTRACTOR nor CITY shall be authorized or empowered to make any representation or commitment or to perform any act which shall be binding on the other unless expressly authorized or empowered in writing.

16. ASSIGNMENT

CONTRACTOR shall perform all the services under this Agreement and shall not assign any interest in this Agreement or transfer any interest in same or assign any claims for money due or to become due under this Agreement without the prior written consent of the CITY.

17. INSURANCE
CONTRACTOR shall obtain and maintain insurance at its own cost and expense during the life of this Agreement, and shall require Subcontractors, if any, to maintain during the life of his subcontract:

1. Commercial General Liability Insurance
   a. $1,000,000 per occurrence / $2,000,000 aggregate
   b. Coverage must include premises and operations, products and completed operations, and personal and advertising injury.
   c. The City of Las Cruces must be named as an Additional Insured for all coverages listed above on endorsements acceptable to the City.
   d. Coverage must be primary and non-contributory.
   e. Coverage must be per project or per location.
   f. Coverage must be on an occurrence form.
   g. Subrogation must be waived.
2. Commercial Auto Liability
   a. $1,000,000 per occurrence
   b. Coverage must be for “owned, leased, hired, and non-owned autos” or “any autos.”
3. Workers’ Compensation and Employers Liability
   a. Statutory Limits
   b. Employer liability – $1,000,000 each accident, $1,000,000 each employee by disease, $1,000,000 policy limit
   c. Subrogation must be waived.
4. Professional Liability: $1,000,000 per claim

Endorsements for additional insured coverage and waivers of subrogation must be provided as a condition of this Agreement and shall be noted on the certificate.

CONTRACTOR shall furnish the CITY with a certificate(s) of insurance showing CONTRACTOR and Subcontractors, if any, have complied with this Article. The CONTRACTOR shall provide insurance certificates before work is to start on the project and shall provide the CITY thirty (30) days written notification of cancellation of such policies.

18. INDEMNITY AND LIMITATION
CONTRACTOR shall indemnify, defend, and hold harmless the CITY from and against any and all claims, suits, actions, judgments, demands, losses, costs, expenses, damages, and liability caused in whole or in part by, resulting in whole or in part from, or arising in whole or in part out of the negligent acts, errors, or omissions of CONTRACTOR, its officers, employees, agents, or representatives in the performance of SERVICES under this agreement.

19. APPLICABLE LAW
This Agreement and the rights and obligations of the parties shall be governed by and construed by the laws of the State of New Mexico applicable to Agreements between

New Mexico parties made and performed in that state, without regard to conflicts of law principles. Venue shall be in the Third Judicial District, State of New Mexico.

CONTRACTOR shall abide and be governed by all applicable state law, CITY ordinances, and laws regarding the CONTRACTOR'S services or any work done pursuant to this Agreement, including anti-discrimination.

20. BREACH
In the event CONTRACTOR breaches any obligation contained in this Agreement, prior to instituting any action or dispute resolution procedure, the CITY shall give CONTRACTOR written notice of such breach. In the event CONTRACTOR fails to remedy the breach within five (5) working days of receiving such written notice, the CITY, at its sole discretion, without any obligation to do so and in addition to other remedies available under applicable law, may remedy CONTRACTOR'S breach and recover any and all costs and expenses in so doing from CONTRACTOR.

21. DISPUTE RESOLUTION
In the event that a dispute arises between CITY and CONTRACTOR under this Agreement or as a result of breach of this Agreement, the parties agree to act in good faith to attempt to resolve the dispute.

22. NOTIFICATION
All notices required or permitted under this Agreement shall be in writing and shall be deemed sufficiently served if served by Registered Mail addressed as follows:

TO CITY:	City of Las Cruces PO Box 20000 Las Cruces, NM 88004 ATTENTION: Tony Trevino
With Copies to:	City Attorney Purchasing Manager
TO CONTRACTOR:	Wilson & Company, Inc., Engineers & Architects 414 N. Main St, Ste A Las Cruces, NM 88001 ATTENTION: Edward Cordova

23. SCOPE OF AGREEMENT
This Agreement incorporates all of the agreements, covenants, and understandings between the parties hereto concerning the subject matter hereof and that all such covenants, agreements, and understandings have been merged into this written agreement. No prior agreement or understanding verbal or otherwise of the parties or their agents shall be valid or enforceable unless embodied in this agreement.

24. SEVERABILITY
The parties agree that each provision of this Agreement is severable and the invalidity or unenforceability of any one or more of the provisions of this Agreement shall not affect the validity or enforceability of any other provision of this Agreement, and this Agreement shall be construed in all respects as if such invalid or unenforceable provisions were omitted.

25. CONFLICT OF INTEREST
CONTRACTOR represents and warrants that CONTRACTOR has no business, professional, personal, or other interest, including, but not limited to, the representation of other clients, that would conflict in any manner or degree with the performance of its obligations under this Agreement. If any such actual or potential conflict of interest arises under this Agreement, CONTRACTOR shall immediately inform the CITY in writing of such conflict. If, in the reasonable judgement of the CITY, such conflict poses a conflict to and with the performance of CONTRACTOR'S obligations under this Agreement, or is otherwise a violation of the CITY'S current policy or ordinances, then the CITY may terminate the Agreement immediately upon written notice to CONTRACTOR; such termination of the Agreement shall be effective upon the receipt of such notice by CONTRACTOR.

EXHIBIT A
SERVICES

A. Project Assignments

A Project assignment is initiated by the City providing the selected Engineering firm(s) a detailed project description, including scope of work and any other special instructions needed by the Engineering firm(s) to prepare all deliverables as requested. The awarded Engineering firm(s) shall provide engineering services that may include, but not be limited to, the following:

1. Master Planning
2. Structural design of buildings, retaining walls, etc.
3. Roadway, transportation, and parking lot design
4. Site development (drainage and grading design)
5. Electrical design (wells, booster stations, lift stations, odor control stations, building electrical system design)
6. Computer network analysis for Gas (GasWork), Water (InfoWater), and Wastewater (InfoSewer). The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility
7. Supervisory Control and Data Acquisition (SCADA) design
8. Mechanical design, gas system design, plumbing and HVAC design
9. Water, wastewater and natural gas utility system design and analysis
10. Traffic Impact Studies and Transportation Modeling Studies
11. Photometrics/street lighting design
12. Drainage Studies, including FEMA Flood Studies
13. Storm drainage
14. Solid waste studies, landfill system design and analysis
15. Environmental surveys, assessments monitoring and management, such as indoor air quality, asbestos, mold, and other related services for the City
16. Geotechnical Assessments, such as soil and groundwater testing for contamination and remediation, and other related services for the City
17. Expert witness in a judicial and/or quasi-judicial setting.
18. Project Management
19. Construction Inspection

B. Project Assignment Agreements

A Project Assignment Agreement (a template of which is incorporated herein as ATTACHMENT “A”) will be negotiated and executed on a case-by-case basis for each specific project, and will include a cost proposal from the Engineering firm(s) proposing to do the work. The cost proposal may utilize one of the following pricing formats:

1. Lump Sum
2. Unit pricing to include:
    a. Hourly rate for various types of services requested by the City
    b. Charges for miscellaneous items such as blueprints, data, discs, rental of special equipment, etc.
    c. A statement of the billing procedures including minimum billing units, if any.
    d. Cost of sub-consultants, if any

3. An alternative unit cost breakdown

C. Deliverables
Each project contract will require a list of deliverables, schedule/timeline and cost. The Engineer may be required to supply to the City an of the following items, when specified and as requested on the Scope of Work for each individual project.
1. Preliminary report containing schedule of work and cost estimate.
2. Construction drawings and documents. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility. Provide hard copies and PDF format of the construction plans for Purchasing Section use.
   a. As-built drawings on electronic media and reproducible prints. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. All horizontal and vertical location datum information shall be coordinated with the City Surveyor. The utility location information shall be tied to project control monuments and referenced to project construction stationing. The project control survey shall be certified by a New Mexico Registered Land Surveyor. Metadata or “data about the data” shall be submitted with each as-built electronic file, preferably as a separate text file on the electronic submittal media, and shall include:
      - Name, address, and phone number of the responsible land surveyor.
      - Date of completion of survey.
      - Equipment used to conduct the survey.
      - Horizontal and vertical control marks used to tie the survey to the City approved control.
      - Transformation factors needed to reduce Ground (local coordinate system) to Grid and combined scale factor used.
   b. “RECORD DRAWINGS” shall be clearly labeled on each sheet.
3. Computer network analysis for gas, water, and wastewater shall be provided to the City in appropriate electronic format. It shall include the entire model, including changes and a text summary (report) of the network analysis that includes assumptions, procedures, and results, and any graphics that clarify the analysis. The Engineering firm(s) shall verify the report format with the City. The computer network analysis shall be provided using the software listed below. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility.
   a. Computer network analysis for Gas: GasWork
   b. Computer network analysis for Water: InfoWater
   c. Computer network analysis for wastewater: InfoSewer
   d. Other design computer programs as approved by the City
4. Project reports.
5. Any other item specified in the contract for that project.

CI. The selection of an Engineer for a specific project shall be based on experience with similar projects, references, performance in similar projects, and availability. This will include the ability to meet schedules, cost control, and responsiveness to client.

CII. The Engineer shall have an engineering staff on-site everyday who is responsible, on behalf of the Engineer, for providing timely completion and response for performance of

the terms of each Project Assignment Agreement during the progress of each individual project. Any deviation from this requirement is at the discretion of the City and must be approved in writing by the City prior to the start of any individual project.

Re: RFP # 23-24-051, General Engineering Services

Dear Selection Committee Members,

The City of Las Cruces (City) provides a critical service to the community by maintaining and improving its infrastructure to enhance safety and support growth. Wilson & Company, Inc., Engineers & Architects (Wilson & Company) is a multidisciplinary professional consulting firm prepared to commit the expertise of our experienced staff to assist the City with the project assignments that will be issued through this on-call services contract. Our local team and leadership is intimately familiar with the City's infrastructure, staff, policies, and procedures. We will focus on collaboration, building on our strong relationship to meet your short- and long-term goals. We will remain dedicated to delivering successful projects by:

Employing the same team that has a successful project history with the City. Our unmatched knowledge from prior City contracts like the East Mesa Recreation Complex, various roadway and drainage-related tasks, and traffic assignments under previous on-call services contracts minimizes delays and readies this team for action. Since 2014, our Las Cruces office has grown to over 30 employees and is supported by 212 employees statewide. Our strategic partner, Intertek PSI Solutions (Intertek-PSI), has local experience and is eager to provide geotechnical, construction materials testing, and groundwater sampling services as needed.

Developing, engaging, design-innovative concepts while meeting your on-call objectives. Our staff brings performance-based solutions to a growing community. Our team has assisted numerous New Mexico communities with on-call engineering services like pedestrian studies, traffic calming design, and public involvement. Our team's on-call experience reflects many years of dedicated technical know-how to address your infrastructure challenges while providing efficient solutions to optimize your budget. Our roadway and drainage engineers, surveyors, environmental scientists, and construction administration professionals have the experience to control costs and initiate early coordination efforts to prevent delays.

Offering additional services to enhance your on-call needs. Our team includes funding specialists who have experience successfully assisting municipalities, including the City, in securing grant money.

Our local office, only minutes from City Hall on Main Street, enables our team to continue fostering our partnership with the City, contributing to improving your infrastructure with our knowledge, experience, and enthusiasm for collaboration. We have provided many services to the City over the past decades and will continue to support your goals. We look forward to another partnership with the City under this contract. We hope that the information we provided has helped you to see why our team is the best fit for the on-call contract. If additional information is required, please reach out to me at 505 259 7259 or edward.cordova@wilsonco.com.

Sincerely,

Edward Cordova, PE
Senior Vice President, Principal-in-Charge

Brigitte Fuller, PE
Program Manager

Our Purpose

We bring people together to practice their craft, to create value, and to accomplish great things.

Firm commitment

Wilson & Company is committed to providing excellence in client services. Higher Relationships is the foundation of this commitment. Our focus is on continuously improving services to our clients, building relationships with community stakeholders, providing quality deliverables, and understanding our clients' needs. Our experience is important, but what matters most is your experience. That is why we focus on your specific needs to deliver professional services with Higher Relationships in mind.

Like many communities across New Mexico, the City continues to balance the needs of an ever-expanding community while maintaining its current infrastructure—aging roadways and traffic equipment, bridges and wall structures, utility systems, and drainage conveyance with limited funding sources and budget. Wilson & Company understands this challenge and has been serving the City for many years, leading us to open an office on Main Street in 2014 to increase our level of service.

Organizational structure

Wilson & Company is headquartered in Albuquerque, New Mexico, and has brought more than 700 people together in 15 offices over nine states to hone their craft with us. Our services include civil, mechanical, electrical, and structural engineering; architecture; planning; environmental; surveying; mapping; GIS specializations; drone piloting; financial analyses; program management; construction administration and observation; and a growing number of multidisciplinary specialties.

With over 200 employees in New Mexico and our local office only minutes from the City's office, we can be on your doorstep quickly to address your on-call needs.

91 years in business

81 years in New Mexico

10 years in Las Cruces

In ten years, our Las Cruces office has grown to 32 experienced staff.

Criteria 1

Technical approach

Program manager Brigitte Fuller, PE, will serve as the main point of contact for the City. Brigitte will work closely with the Public Works Director and design staff and be available to the City's executive team to review priorities, including technical and non-technical support. During visits, Brigitte will be available to meet with staff to discuss various topics and projects, which can be further investigated as needed. She will include additional Wilson & Company staff at these meetings so coordination with the proper team members can occur.

For every project assignment, Brigitte will prepare a detailed scope of work and fee estimate. She will work with the appropriate technical staff to verify the assignment is adequately addressed and develop a project proposal. Our team will work with the City to develop a project assignment proposal that confirms both parties understand the work involved and are aligned with the project expectations and outcomes. Project assignments will be presented to the City Council for

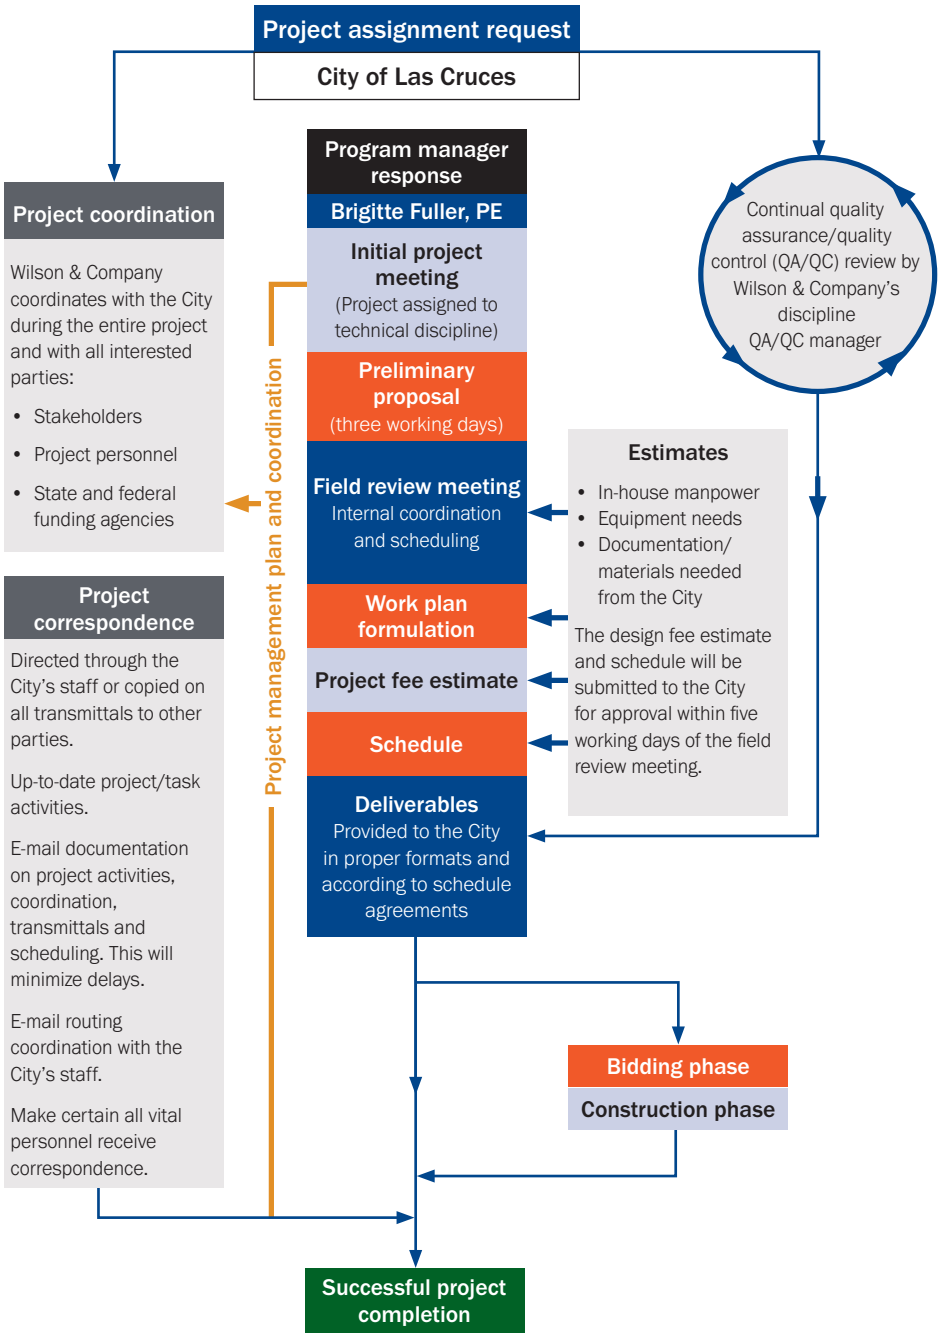
acceptance where required by the City Manager.

Upon acceptance of a project assignment proposal, Brigitte will work directly with the City to execute the assignment and move towards a Notice to Proceed (NTP).

Following acceptance of the project assignment proposal, our team will hold an initial project meeting with internal team members. The goal of the meeting is to communicate the schedule and establish critical milestones and submittal dates (field check, office check, final completion, etc.). During this meeting, our team will define the sources of available project data, which may require field survey, data collection, or geotechnical services. Our team will discuss the governing design criteria and design issues to make sure all parties are aware of the concerns that could be encountered. Brigitte will work the key task lead to develop a Project Management Plan (PMP) for the project team. The PMP is essential in our process to confirm budget and schedule requirements are met and to comply with our internal Quality Assurance Program.

A PMP will be developed for every project. The plan is Wilson & Company's project guide detailing critical project elements and communication protocols. Milestones and team responsibilities are clearly defined.

Figure 1. Wilson & Company's on-call process



Major tasks to be accomplished and a detailed statement of services to be provided under each task

Successfully performing services under an on-call contract requires a team that is invested and committed to meeting your goals. Our dedicated and consistent team offers familiarity with City staff and your processes and provides expert services to reach your objectives. We offer the following services as identified in the RFP.

Master planning: Wilson & Company has a proven track record with jurisdictions for master planning. We have assisted in the visualization, creation, design, and construction of master plans throughout the Southwest. Our experience in master planning and redevelopment projects includes Sunland Park and the Santa Teresa area, Los Alamos County, City of Santa Fe, McKinley County, and Grants-Milan. Team members are well-versed in

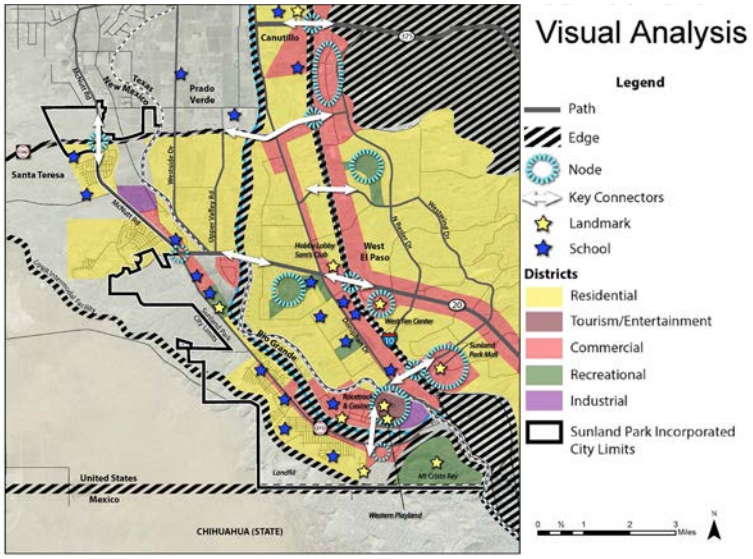
the public engagement required for planning these developments and coordinating the engagement process to gather needed input for achieving the goals and outcomes. We formulate design options for the master plans based on stakeholder feedback. Our team understands the regulatory framework required to master plan areas within local jurisdictions. Wilson & Company is currently working with the state of New Mexico and Doña Ana County to develop a land use and infrastructure masterplan for Santa Teresa.

Structural engineering services: Senior-level staff have demonstrated experience with a diverse array of structure types. We are well-versed with the current International Building Code and American Association of State Highway and Transportation Officials Load and Resistance Factor Design (AASHTO LRFD) editions. Working directly with contractors through alternative deliveries has enhanced our ability to provide cost-effective solutions to our clients. Structural engineering services include analysis and design of the following:

- Retaining walls, culverts, foundations, and buildings
- Non-typical drainage structures
- Load ratings for bridges
- Sign and traffic signal structures
- Temporary structures for construction
- Precast concrete structures
- Concrete tanks for treatment and storage

Our structural team has also provided structure evaluations for existing structures, emergency repair design, construction engineering and observation, and accelerated bridge construction. Our structural team is currently assisting Doña Ana County with a bridge over the Union Pacific Railroad in Santa Teresa.

Wilson & Company designed improvements to Three Crosses and Spitz Avenue with curb and gutter, sidewalks, American with Disabilities Act (ADA)-compliant driveways and wheel chair ramps, lighting, signing, striping, landscaping, signalized intersection upgrades and a redi-rock wall.



Wilson & Company has aided in Sunland Park's implementation efforts, including developing zoning overlay districts, assisting with successful grant applications for desired investments, and streamlining development review processes for new and redevelopment.

Roadway, transportation and parking lot design: Our team's extensive experience with rural and urban roadway designs ranges from local residential streets to major urban arterials. Our experience spans from initial alignment alternative analysis to preliminary and final design and construction administration. Critical elements considered in roadway design are horizontal and vertical alignments, drainage mitigation and improvements, lane capacity requirements and configuration, queuing analysis for turn lane need determination, signalized intersection modeling and design, lighting, temporary traffic control, permanent signing and striping, and right-of-way (ROW) requirements. **Under recent on-call contracts, Wilson & Company assisted the City with Sonoma Springs Extension and Camino Coyote roadway projects.** Our transportation services include:

- Parking lot planning and design
- Roadside safety audits
- Urban roadway and geometric design
- Sidewalk and multi-use trail planning and design
- Existing ROW determination and new
- ROW mapping

Site development: Wilson & Company has considerable experience in site development. We facilitate the site development approval process for obtaining construction permits by interacting with planning and zoning committees in numerous municipalities in New Mexico. In the review process,

we help draft optimal site development agreements and clarify the easements and covenants governing the property. Our team designed and constructed a 1,300-sf restroom building for East Mesa Recreation Complex in Phase I, and Phase II includes a sports complex design. Our site development team offers services in these areas:

- Due diligence
- Residential and commercial master planning
- Development agreement assistance
- Public infrastructure coordination
- Grading and drainage
- Utility plans
- Revised platting
- Annexation
- Public meetings

Electrical design: Wilson & Company has executed a multitude of electrical system designs to support water and wastewater projects, such as booster pump stations, lift stations, and odor control stations. The electrical design encompasses a comprehensive approach that integrates power distribution, control systems, and monitoring systems. We design the power system from the local power utility company down to lights and receptacles. We also develop backup power systems, including standby generators and automatic transfer switches, to maintain facility operation in the event of a utility service failure. We design, size, and specify key electrical equipment components, which include transformers, power panels, and motor control centers. We develop facility lighting systems and perform calculations to provide appropriate light levels. Depending on the application, Wilson & Company assesses the electrical area classification requirements using the appropriate National Fire Protection Association (NFPA) standards that are applicable to water and wastewater facilities.

Mechanical, plumbing, and heating, ventilating and air conditioning (HVAC) engineering: We design projects to meet the users' needs and provide a quality, maintainable, and built-to-last system, including energy-efficient systems that are simple to understand and operate. Our mechanical engineering team performs building condition assessments, evaluations, and energy audits for clients wanting to improve the performance of their facilities. Energy costs for HVAC, lighting, and electrical systems are significant over the life of any facility. With our design experience, LEED concept planning, and building energy modeling software knowledge, we provide the tools and guidance to building owners and make informed decisions regarding facility operations. Wilson & Company also offers building pressure testing, infrared thermography, and commissioning services tailored to suit the needs of the project. Wilson & Company has staff certified as Commissioning Process Providers; we can provide functional testing and commissioning for designated mechanical and electrical systems or commissioning for the entire building design process.

Supervisory Control and Data Acquisition (SCADA): The electrical and mechanical design teams collaborate with each other in the development and implementation of control systems to manage the operation of booster pump stations, lift stations, and odor control stations. We assist in developing and reviewing process and instrumentation diagrams (P&IDs) that incorporate the necessary meters, control valves, transmitters, and gas detectors to provide monitoring and feedback on the system. Based on the P&IDs, Wilson & Company develops an I/O list, block diagrams, and SCADA systems that are then used by third-party control system integrators who will provide the PLC panels and control programming.

Water/wastewater/natural gas: Communities depend on infrastructure to support essential services. Our experts and support staff are experienced in utility design for all dry and wet utilities, including gas, electric, cable, fiber optic, water, storm sewer, and sanitary sewer. We embrace sustainable design concepts, especially reuse and recharge, and many of our past projects incorporate recycled and environmentally friendly materials. Our team has experience in the design and construction administration of water, wastewater, reuse, and utility system improvement projects. Our experienced and dynamic professionals are committed to providing clients with quality, full-service engineering solutions, and our in-house expertise is valuable when planning full roadway reconstruction and mitigating utility conflicts or relocation.

Traffic impact studies and transportation modeling studies: Our team is fully capable of assisting the City with traffic design support. Wilson & Company has in-house hardware capabilities to perform vehicle turning

movement counts and tube counts on intersections and roadways for traffic impact analyses, safety studies, and intersection analyses. Our professionals are adept in software such as HCS, TransModeler, VISTRO, VISSIM, Synchro, and SimTraffic for intersection analysis and simulation; SIDRA and RODEL for roundabout evaluations; and PetraPro and STARnext for traffic data collection. We are invested in video-based counting equipment that enables us to collect up to 150 hours of continuous data. Since the award of our first City Traffic Engineering On-Call in 2014, Wilson & Company has provided the City with traffic assessments, design, and reviews. Recent completed studies include Mulberry Traffic Calming Study, Sonoma Ranch Boulevard and Golf Club Road Safety Study, Alameda Road Diet, and Jornada Multi-Way Stop Analysis.

Photometrics/street lighting design: Wilson & Company has experience with numerous lighting projects ranging from single-circuit to extensive multi-circuit layouts throughout New Mexico. Our in-house traffic and electrical engineers use a variety of software packages, such as AGI32, to produce optimal lighting layout designs. Our experience with roadway lighting involves the knowledge of many software and equipment suppliers that we have worked with on past projects. Wilson & Company has also maintained a great working relationship with El Paso Electric, which is critical in successfully completing this type of design.

Drainage studies, including Federal Emergency Management Agency (FEMA) studies, and storm drain: Wilson & Company offers an experienced surface hydrology/hydraulic (H&H) group that has provided individual drainage mitigation solutions for flood control authorities, cities, and counties throughout the Southwest. In addition to the City of Las Cruces, we have assisted clients such as Doña Ana County Flood Control, and various other flood control authorities in central New Mexico.

We can assist with levee certification, FEMA applications, project restoration and mitigation, development review, and infrastructure planning. We use the latest software tools to assess drainage conditions and develop sensible solutions for drainage mitigation. As development continues, our team is committed to making sure the quality of life and safety of the citizens of Las Cruces are protected. Other relevant services include:

- FEMA flood map revisions and coordination
- Urban storm drainage master planning
- Storm drainage infrastructure design
- Levee assessments and design (FEMA and US Army Corp of Engineers)

Solid waste studies: It is inevitable that we will always produce and dispose of solid waste. However, more stringent regulations and increased public scrutiny have made locating and designing new solid waste facilities quite challenging. Our local expertise and national office network can provide you with innovative and cost-effective solutions to meet your waste management needs. Our in-house professionals provide:

- Permit registrations, including preparation of general facility information, adjacent land ownership maps, waste acceptance plans, transportation increase studies, preliminary transfer station layouts, drainage calculations, closure, and post-closure plans, and site operating plans
- Transfer station building layouts
- Erosion control plans
- Design of a liner and leachate collection system and force mains, leachate sumps, pumps, and pond designs
- Groundwater monitoring wells engineering and designs, and gas probe layouts and designs

Environmental surveys: Wilson & Company has the expertise to provide environmental and cultural resource services, including National Environmental Policy Act (NEPA) documentation, National Historic Preservation Act (NHPA) document preparation, Endangered Species Act compliance, Clean Water Act permitting, biological and cultural resource surveys, Phase I Environmental Site Assessments (ESA), regulatory compliance, project management, resource and environmental planning, public involvement, geographic information system (GIS) mapping, administrative records, and agency coordination. Our thorough understanding of NEPA and other federal,

Wilson & Company's design team delivered lighting plans for the East Mesa Recreation Complex.

tribal, state, and local laws, regulations, and policies governing environmental documents and land use planning is valuable to our clients.

Geotechnical assessments: With the inclusion of Intertek PSI as geotechnical investigations experts, the Wilson & Company team offers geotechnical and materials testing services. These services encompass geotechnical investigations, aggregate source exploration, erosion, control design, foundation and retaining systems/structure design, slope stability studies, deep foundation load testing, laboratory testing, quality control and quality acceptance testing, and inspection. Intertek PSI's experience with local projects like Paseo Real and County Line, Rio Grande Avenue Pavement, and Sunland Park Drive Phase I provides the technical competence and accuracy for efficient designs.

Construction observation: Our experienced construction observers work closely with the design team to verify the constructed project is built per the drawings and technical specifications. Our specifications detail start-up procedures, documentation, and training for primary mechanical systems. Full mechanical system commissioning is an option that can alleviate many functional issues in the future. During the start-up and training phase, we work closely with the equipment manufacturer's representatives and the City's staff to make sure mechanical facilities are working properly.

Our construction management team is well versed in construction documents, including the Engineers Joint Contract Documents Committee (EJCDC), American Institute of Architects (AIA), Community Development Block Grant (CDBG), New Mexico Department of Transportation (NMDOT) Standard Specifications for Highway and Bridge Construction, New Mexico American Public Works Association (APWA) Specifications for Public Works Construction, Uniform Building Code, International Building Code, Uniform Plumbing Code, Occupational Safety and Health Administration (OSHA), Environmental Protection Agency, and Stormwater Pollution Prevention Plan (SWPPP).

Our observers are certified by the National Institute for Certification in Engineering Technologies (NICET) and the American Concrete Institute (ACI). Observers are also certified to operate nuclear densometers and regularly attend courses at the Associated Contractors of New Mexico (ACNM) facility in Albuquerque and attend other local and regional training.

Project schedule/timeline

Our project schedule is the cornerstone of our project management strategy. We've created a sample schedule demonstrating our commitment to achieving each project milestone. The project milestones are the building blocks of our internal project timeline, which will be a tool to track our progress. This timeline will sequentially outline the tasks to move from one milestone to the next. Our internal timeline will be realistic and adjustable to meet the scope of work and the City's needs, reflecting our commitment to your schedule, which directly correlates to your budget.

Sample project assignment schedule *Timeline will vary for each specific task.	Mo 1			Mo 2			Mo 3			Mo 4			Mo 5

Wilson & Company's succesfull on-call contract record with the City demonstrates our commitment to your program. We understand that projects may arise where immediate attention is required due to a safety issue or concern for protecting life and property, and we stand prepared to assist with the right team.

Gabriel has experience in various aspects of civil engineering including water and wastewater, site plan development, and roadway design. His primary responsibilities include municipal entity coordination, hydraulic/hydrologic analysis, site development, plan production, technical specifications, and coordination through the entire project. **(Located in Las Cruces)**

Experience:

- North Fork LOMR, City of Las Cruces, NM | Drainage engineer
- Mesquite/Tornillo Drainage Planning, City of Las Cruces, NM | Drainage engineer
- McClure Pond Improvements, City of Las Cruces, NM | Engineer of record
- South Anthony Arroyo Design, City of Anthony, NM | Drainage engineer
- Lily Pond Preliminary Design, Doña Ana County, NM | Drainage engineer
- Rockhound Road and McCan Road Improvements Project, Luna NM | Drainage engineer
- LPOE Diversion Berms and Flood Control Project Re-design Phase I, Luna County, Village of Columbus, NM | Drainage engineer

Audra Gallegos, PE | Project manager: traffic impact studies and transportation modeling studies

Experience
17 years

Education
B.S., Civil Engineering, University of New Mexico

License
NM PE #23573

Audra is widely experienced in data collection, traffic impact studies, parking studies, and signal optimization/coordination. Her experience includes plan development for plan and profiles, traffic control plans, permanent signing and striping, structure placement sections, utility plans, and cost estimates. She is adept in traffic modeling programs, such as Synchro, HCS, VISSIM, and Rodel. Audra has acted as an augmented traffic engineer for the cities of Santa Fe and Las Cruces. She has experience performing traffic studies in urban areas for the cities of Las Cruces, Albuquerque, Rio Rancho, and Bernalillo County.

Experience:

- Alameda Boulevard Road Diet Study, City of Las Cruces, NM | Project manager
- Alameda & Hoagland Traffic Study, City of Las Cruces, NM | Project manager
- Chandler Park Traffic Study, City of Las Cruces, NM | Project manager
- TIA Reviews, City of Las Cruces, NM | Project manager
- Sonoma Ranch Safety Study, City of Las Cruces, NM | Project manager
- East Mesa Road Study, City of Las Cruces, NM | Project engineer
- 2nd Street Rehabilitation/Sidewalk and Lighting Improvement, City of Albuquerque, NM | Project manager
- Corridor Studies, NMDOT, NM | Project manager
- US 491 Road Safety Audits (three total), Navajo DOT (NDOT), NM | Project manager

Greg Gentle, PE | Project manager: structural

Experience

Greg specializes in designing bridge projects using innovative approaches to structural design. Greg designs for true value and the service life of the structure. He is driven to create solutions that benefit and strengthen communities and enjoys designing and problem-solving, providing deliverables that effectively communicate the proposed solution. **(Located in Las Cruces)**

Experience:

- Industrial Drive Grade Separation, Doña Ana County, NM | Structural engineer
- Toadlena Bridge, NDOT, NM | Structural engineer
- NM 109 Jarales Rd. BNSF Grade Separation, NMDOT | Project engineer
- Bridge #9826 Riata Rd, La Luz Creek, Otero County, NM | Structural engineer
- AMAFCA-Valle de Oro outlet, Albuquerque, NM | Structural engineer
- N5012 Sanostee Wash Bridge, NDOT, NM | Structural engineer
- Canal Street Bridge, Village of Hatch, NM | Structural engineer

Many of our team members participated in NMDOT's Tribal/Local Public Agency (T/LPA) training program. This program educates individuals to assist tribal or local public agencies to comply with federal requirements and manage a project from the beginning to end.

Subconsultants

Our selected teaming partner was strategically selected based on their strong performance, specialized skill sets, and knowledge of City of Las Cruces processes and procedures.

Intertek-PSI has provided geotechnical engineering and construction services to southern New Mexico for over 20 years, with material testing, inspection, and investigation services. All PSI laboratory and field technical staff maintain certifications in testing and inspections in their areas of expertise. The PSI office is accredited through the AASHTO Materials Reference Laboratory (AMRL). **Wilson & Company and Intertek PSI are currently teamed on several infrastructure projects across the Southwestern US.**

Intertek will provide geotechnical services and is located at:

5044 Doniphan Drive, Bldg D
El Paso, TX 79932

P: 915 584 1317

Ruben Barrientos, Jr., PE, PMP | Geotechnical services

Experience

Ruben possesses more than 12 years of expertise in geotechnical engineering consulting and management. His professional background encompasses diverse market sectors such as industrial, institutional, government, and commercial.

Experience:

- Paseo Real and County Line (with Wilson & Company), Las Cruces, NM
- Mesilla Valley Bosque State Park (with Wilson & Company), Las Cruces, NM
- Rio Grande Avenue (with Wilson & Company), Las Cruces, NM
- Sunland Park Drive Phase I (with Wilson & Company, Las Cruces, NM
- Industrial Avenue Bridge (with Wilson & Company, Las Cruces, NM

Did you know?

Quality management procedures are employed on every project

- Accurate data is used throughout the collection and analysis process
- Work completed during each task is executed by experienced professionals
- Essential information is documented, checked, transmitted, and regularly reviewed for completeness and accuracy
- Project design deliverables and studies are checked and reviewed by qualified internal staff

This team has a long history of working within the City's project administration requirements. Program manager Brigitte Fuller will provide direction and leadership, producing streamlined results, quality deliverables, and value to your on-call tasks.

Focusing on you

Through our work under the 2020-2024 on-call contract, our team developed strong relationships with City staff and gained intimate knowledge of your processes and standards. We know your expectations and strive to exceed them, from schedule and budget to sustainable and innovative concepts.

Criteria 3

Performance of the firm

The following projects showcase our experience delivering successful solutions for various projects. Through these projects, we have gained critical insight that can be applied to your on-call tasks, resulting in similar successes. We invite you to make inquiries of the provided references regarding our qualifications, performance, and quality of results.

1 Adams Park Baseball Field
City of Anthony, New Mexico

Contact:
Mario Juarez-Infante, PE

Phone:
505 715 2541

Email:
minfante@cityofanthonynm.org

Services:
Roadway design
Storm drain
Curb and gutter/sidewalk
Roadway reconstruction
Construction

Adams Park Baseball Field was a multi-funded project that included the construction of a multipurpose recreation and drainage facility. The facility includes a baseball field with ponding areas, subsurface storm drain infrastructure, roadway reconstruction, embankment, curb & gutter, and sidewalk. The project included the realignment of Livesay Street to the south and parking along Morales and 4th Streets.

The project connects to the storm drain system that was constructed in a previous project in Anthony, 4th Street Phase IV, and outfalls into the existing Adams Park Baseball Field Pond. The South Anthony Arroyo project will involve diversion and outfall into the Adams Park Baseball field. A pump station will be constructed to facilitate the conveyance of stormwater from Adams Park Pond to the existing South Anthony Arroyo near NM 460.

2 Guadalupe Street Reconstruction City of Santa Fe, New Mexico

The City of Santa Fe contracted Wilson & Company to make improvements for safety, multimodal accessibility and facilities, and driveway access control to the Guadalupe Street corridor from Agua Fria Street to Paseo de Peralta.

Guadalupe Street was primarily a 4-lane street (two lanes for the northbound and southbound) through a predominately commercial area with turning lanes and narrow raised medians in select locations. The existing pedestrian facilities did not meet ADA standards, and bicyclists shared the road with traffic. Special challenges include limited existing ROW, significant business driveway access, and the project being located within a Historic Preservation District.

Contact:
Romella Glorioso-Moss, PhD, AICP, CPO
Capital Projects Manager & BPAC Staff Liaison

Phone:
505 955 6623

Email:
rsglorioso-moss@santafenm.gov

Services:
Corridor safety design
ADA-compliant design
Stakeholder coordination/ engagement

Wilson & Company conducted an extensive public engagement process to identify safety and access improvements along Guadalupe Street. Improvements included pedestrian and bicycle facilities, enhanced ADA accessibility, and better access to businesses. High visibility crosswalks and new ADA-compliant sidewalk ramps were among the proposed improvements.

Wilson & Company worked with the City, corridor stakeholders, and the community to develop a multimodal vision for the corridor, including a road diet, enhanced bicycle and pedestrian accommodation, street furniture, lighting enhancements, and drainage improvements. Wilson & Company adhered to the NMDOT State Highway Access Management Manual requirements for the driveways and to the Public ROW Access Guidelines for all ADA facilities. Improvements included raised medians, ADA-compliant sidewalks, improved bicycle facilities, and new bike lanes. The project is now in construction.

3 Gardner Dam Breach and Flood Control Improvements Doña Ana County, New Mexico

Contact:
John Gwynne, PE, CFM
Flood Commission Director

Phone:
575 525 5554

Email:
johngw@donaanacounty.org

Services:
H&H analysis report
Design
Construction

Gardner Dam, near Santa Teresa, NM, was identified as a high-hazard dam, containing no as-built or design data. Wilson & Company authored the H&H analysis report, concluding that breaching the dam and constructing the proposed conditions will provide a benefit to the community downstream of Gardner Dam by reducing the risk due of a catastrophic dam failure. Wilson & Company authored the design reports and the final signed and sealed construction bidding documents for the dam breach, including upstream and downstream watershed flood control improvements.

Breaching the dam and constructing below-grade pond facilities to convey and attenuate the 100-year, 24-hour event was a more cost-effective solution than reconstructing the Jurisdictional Dam. Improvements upstream from the breach included a detention pond excavated below the natural ground elevation with approximately 9 acre-foot retention capacity and a detention pond attenuating the 100-year, 24-hour runoff volume. The detention pond's principal spillway and the retention area serves as a water quality, infiltration, and habitat replacement area. The project required downstream improvements to convey the outflow to a point of discharge, including stabilization and armoring for two diversion structures to confine the flow path to the proposed floodway. Easements and improvements to the existing ponds at McNutt Road include an outfall to the downstream drain.

Recent relevant experience specifically completed for the City:

- Sonoma Ranch Safety Study
- Alameda Boulevard Road Diet Study
- Traffic Impact Analysis Reviews
- Jornada Road Study
- East Mesa Public Recreation Complex
- East Mesa Public Recreation Complex Phase 2
- East Mesa Road Study
- East Mesa Public Rec Center Access Road Design
- East Mesa Public Rec Center Camino Coyote Lane
- La Llorona Park
- McClure Pond Improvements
- Mesquite Tornillo Drainage Planning
- North Fork LOMR
- Chandler Park Traffic Study
- Alameda & Hoagland Traffic Study

As noted below, Wilson & Company has significant experience managing on-call contracts for many clients throughout New Mexico. Our team completed numerous task orders ranging from a few hundred dollars to multimillion-dollar, multidisciplined task orders. In addition, we provide statewide on-call engineering services that further demonstrate our familiarity with other agencies that may require additional coordination with the City, illustrating our capacity and capability to deliver multiple tasks concurrently.

CITY OF LAS CRUCES

PROFESSIONAL SERVICES AGREEMENT

THIS AGREEMENT, made and entered into on this _____ day of _____, 2024 by and between the City of Las Cruces, New Mexico, hereinafter called "CITY" and Zia Engineering & Environmental Consultants, LLC, of 755 S Telshor Blvd, Ste Q-201, Las Cruces, NM, 88011, hereinafter called "CONTRACTOR".

1. PROJECT DESCRIPTION
General Engineering Services on an as needed basis via Project Assignment Agreements (Attachment "A") during the term of this AGREEMENT.

2. SCOPE OF SERVICES
In a satisfactory and proper manner, the CONTRACTOR shall perform SERVICES, as proposed in response to the CITY'S RFP No. 23-24-051, as set forth in Exhibit A, attached hereto and made a part of this Agreement.

The CONTRACTOR is authorized to extend the same terms and conditions of this Agreement to other governmental entities conditioned upon the procurement laws and regulations of those entities. The CITY shall not be a party nor have any liability relating to such extensions.

3. APPROPRIATIONS
The terms of this Agreement are contingent on sufficient appropriations and authorization being made by the City Council for the performance of this Agreement. If sufficient appropriations and authorizations are not made by the City Council, this Agreement shall terminate upon written notice given by the CITY to CONTRACTOR. The CITY'S decision as to whether sufficient appropriations and authorizations exist shall be accepted by CONTRACTOR and shall be final.

4. COMPENSATION
The CITY shall compensate CONTRACTOR for the performance of SERVICES under this Agreement an amount agreed to for each assigned project, plus applicable taxes. CONTRACTOR shall perform the SERVICES upon receipt of a purchase order or written Notice to Proceed for each assigned project from the CITY. The CITY cannot authorize costs to be incurred prior to such written Notice to Proceed. CONTRACTOR shall submit invoices upon completion of the project. CITY shall pay invoices Net 30 days upon receipt of undisputed invoice.

CONTRACTOR is responsible for payment of State of New Mexico Gross Receipts Tax levied on the amounts payable under this Agreement. CONTRACTOR agrees to comply with all federal and state tax payments and report all items of gross receipts as income from the operations of its business.

5. DEVOTION OF ADEQUATE TIME
CONTRACTOR will devote the necessary hours each week to the performance of projects that are required by the CITY and it will serve the CITY diligently and faithfully,

and according to its best ability in all respects and will promote the best interests of the CITY.

6. TERM AND SCHEDULE
This Agreement shall become effective on June 1, 2024 for a term of 5 years through May 31, 2029.

CONTRACTOR shall perform the SERVICES in accordance with the time set forth as agreed upon by the CITY and CONTRACTOR and as agreed to for each project assigned under the terms of this Agreement.

7. EXTENSIONS, CHANGES, AND AMENDMENTS
This Agreement shall not be extended, changed, or amended except by instrument in writing executed by the parties. The CITY shall not be liable for payment of any extra services nor shall CONTRACTOR be obligated to perform any extra services except upon such written agreement. Such written approval shall indicate the date said extension, change, or amendment is effective and shall be signed by the parties to this Agreement. In the event that the parties cannot reach agreement as to a particular change, the issue shall be resolved pursuant to Article 21.

8. CHANGES AND EXTRA SERVICES BY THE CITY
The CITY may make changes within the general scope of the SERVICES plus may also request CONTRACTOR to perform other extra services not incorporated within the Services set forth in this Agreement. If the CONTRACTOR is of the opinion that such change causes an increase or decrease in the cost and/or the time required for performing the changes or other services required by the City, CONTRACTOR shall so notify the CITY of that fact within five (5) business work days from the date of receipt of change by the CITY. The CITY shall provide written response to the CONTRACTOR within five (5) business work days from the date of receipt of CONTRACTOR'S written notification.

9. CHANGES AND EXTRA SERVICES BY THE CONTRACTOR
In the event a condition is identified by the CONTRACTOR which, in the opinion of the CONTRACTOR, changes the services, costs, and/or time required for performance under this Agreement, the CONTRACTOR shall provide written notification to the CITY within five (5) business work days of such identification. The CITY shall respond in writing to such notification within five (5) business work days from the date of receipt of CONTRACTOR'S notification.

10. DELAYS
In the event that performance of SERVICES is delayed by causes beyond reasonable control of CONTRACTOR, and without the fault or negligence of CONTRACTOR, the time and total compensation for the performance of the SERVICES may be equitably adjusted by written agreement to reflect the extent of such delay. CONTRACTOR shall provide the CITY with written notice of delay pursuant to Article 9 including therein a description of the delay and the steps contemplated or actually taken by

CONTRACTOR to mitigate the effect of such delay. The CITY will make the final determination as to reasonableness of delays.

11. TERMINATION
This Agreement may be terminated by either party hereto upon fifteen (15) calendar days written notice in the event of substantial failure by the other party to perform in accordance with the terms of this Agreement through no fault of the terminating party. This Agreement may also be terminated by the CITY for its convenience or because the PROJECT has been permanently abandoned, but only upon fifteen (15) calendar days written notice to CONTRACTOR.

In the event of termination, CONTRACTOR shall be compensated for all services performed and costs incurred up to the effective date of termination for which CONTRACTOR has not been previously compensated.

Upon receipt of notice of termination from the CITY, CONTRACTOR shall discontinue the SERVICES unless otherwise directed and upon final payment from the CITY deliver to the CITY the required number of copies of all data, drawings, reports, estimates, summaries, and such other information and materials as may have been accumulated by CONTRACTOR in the performance of this Agreement, whether completed or in process.

12. RECORDS AND AUDITS
CONTRACTOR will maintain records indicating dates, length of time, and services rendered. The CITY has the right to audit billings both before and after payment, and contest any billing or portion thereof. Payment under this Agreement does not foreclose the CITY'S right to recover excessive or illegal payments. CONTRACTOR will retain records for five (5) years after the completion of the project.

13. DISCLOSURE AND OWNERSHIP OF DOCUMENTS, PRODUCTS, DESIGN, ELECTRONIC FILES
All technical data, electronic files, and other written and oral information not in the public domain or not previously known, and all information, electronic files, and data obtained, developed, or supplied by the CITY will be kept confidential and CONTRACTOR will not disclose to any other party, directly or indirectly, without the CITY'S prior written consent unless required by lawful order.

All technical data, electronic files, products developed, operational parameters, blueprints, and other information and work of the CONTRACTOR shall be the sole property of the CITY and shall be delivered to the CITY when requested and at the end of the Agreement.

14. INDEPENDENT CONTRACTOR
CONTRACTOR represents that it has, or will secure, at its own expense, all personnel required in performing the SERVICES under this Agreement. Such personnel shall not be employees of, nor have any contractual relationship with the CITY. CONTRACTOR,

consistent with its status as an independent contractor, further agrees that its personnel will not hold themselves out as, nor claim to be officers or employees of the CITY by reason of this Agreement.

To the extent that CONTRACTOR employs any employees, CONTRACTOR shall be solely responsible for providing its own form of insurance for its employees and in no event shall CONTRACTOR's employees be covered under any policy of the CITY.

CONTRACTOR'S retention hereunder is not exclusive. Subject to the terms and provisions of this Agreement: (i) CONTRACTOR is able, during the Term hereof, to perform services for other parties; and (ii) CONTRACTOR may perform for its own account other professional services outside the scope of this Agreement.

CONTRACTOR is and shall be an Independent Contractor and shall be responsible for the management of its business affairs. In the performance of the work under this Agreement, CONTRACTOR will at all times be acting and performing as an Independent Contractor, as that term is understood for federal and state law purposes, and not as an employee of the CITY. Without limitation upon the foregoing, CONTRACTOR shall not accrue sick leave, jury duty pay, retirement, insurance, bonding, welfare benefits, or any other benefits, which may or may not be afforded employees of the CITY. CONTRACTOR will not be treated as an employee for purposes of: Workers' Compensation benefits; the Federal Unemployment Tax Act; Social Security; other payroll taxes, federal or any state income tax withholding; or the employee benefit provisions described in the Internal Revenue Code of 1986, as amended. Neither the CITY, nor its agents or representatives, shall have the right to control or direct the manner, details or means by which CONTRACTOR accomplishes and performs its services. Nevertheless, CONTRACTOR shall be bound to fulfill the duties and responsibilities contained in the Agreement.

15. NO JOINT VENTURE OR PARTNERSHIP

Nothing contained in this Agreement shall create any partnership, association, joint venture, fiduciary or agency relationship between CONTRACTOR and CITY. Except as otherwise specifically set forth herein, neither CONTRACTOR nor CITY shall be authorized or empowered to make any representation or commitment or to perform any act which shall be binding on the other unless expressly authorized or empowered in writing.

16. ASSIGNMENT

CONTRACTOR shall perform all the services under this Agreement and shall not assign any interest in this Agreement or transfer any interest in same or assign any claims for money due or to become due under this Agreement without the prior written consent of the CITY.

17. INSURANCE
CONTRACTOR shall obtain and maintain insurance at its own cost and expense during the life of this Agreement, and shall require Subcontractors, if any, to maintain during the life of his subcontract:

1. Commercial General Liability Insurance
   a. $1,000,000 per occurrence / $2,000,000 aggregate
   b. Coverage must include premises and operations, products and completed operations, and personal and advertising injury.
   c. The City of Las Cruces must be named as an Additional Insured for all coverages listed above on endorsements acceptable to the City.
   d. Coverage must be primary and non-contributory.
   e. Coverage must be per project or per location.
   f. Coverage must be on an occurrence form.
   g. Subrogation must be waived.
2. Commercial Auto Liability
   a. $1,000,000 per occurrence
   b. Coverage must be for “owned, leased, hired, and non-owned autos” or “any autos.”
3. Workers’ Compensation and Employers Liability
   a. Statutory Limits
   b. Employer liability – $1,000,000 each accident, $1,000,000 each employee by disease, $1,000,000 policy limit
   c. Subrogation must be waived.
4. Professional Liability: $1,000,000 per claim

Endorsements for additional insured coverage and waivers of subrogation must be provided as a condition of this Agreement and shall be noted on the certificate.

CONTRACTOR shall furnish the CITY with a certificate(s) of insurance showing CONTRACTOR and Subcontractors, if any, have complied with this Article. The CONTRACTOR shall provide insurance certificates before work is to start on the project and shall provide the CITY thirty (30) days written notification of cancellation of such policies.

18. INDEMNITY AND LIMITATION
CONTRACTOR shall indemnify, defend, and hold harmless the CITY from and against any and all claims, suits, actions, judgments, demands, losses, costs, expenses, damages, and liability caused in whole or in part by, resulting in whole or in part from, or arising in whole or in part out of the negligent acts, errors, or omissions of CONTRACTOR, its officers, employees, agents, or representatives in the performance of SERVICES under this agreement.

19. APPLICABLE LAW
This Agreement and the rights and obligations of the parties shall be governed by and construed by the laws of the State of New Mexico applicable to Agreements between

New Mexico parties made and performed in that state, without regard to conflicts of law principles. Venue shall be in the Third Judicial District, State of New Mexico.

CONTRACTOR shall abide and be governed by all applicable state law, CITY ordinances, and laws regarding the CONTRACTOR'S services or any work done pursuant to this Agreement, including anti-discrimination.

20. BREACH
In the event CONTRACTOR breaches any obligation contained in this Agreement, prior to instituting any action or dispute resolution procedure, the CITY shall give CONTRACTOR written notice of such breach. In the event CONTRACTOR fails to remedy the breach within five (5) working days of receiving such written notice, the CITY, at its sole discretion, without any obligation to do so and in addition to other remedies available under applicable law, may remedy CONTRACTOR'S breach and recover any and all costs and expenses in so doing from CONTRACTOR.

21. DISPUTE RESOLUTION
In the event that a dispute arises between CITY and CONTRACTOR under this Agreement or as a result of breach of this Agreement, the parties agree to act in good faith to attempt to resolve the dispute.

22. NOTIFICATION
All notices required or permitted under this Agreement shall be in writing and shall be deemed sufficiently served if served by Registered Mail addressed as follows:

TO CITY:	City of Las Cruces PO Box 20000 Las Cruces, NM 88004 ATTENTION: Tony Trevino
With Copies to:	City Attorney Purchasing Manager
TO CONTRACTOR:	Zia Engineering & Environmental Consultants, LLC 755 S Telshor Blvd, Ste Q-201 Las Cruces, NM 88011 ATTENTION: Edward H. Martinez

23. SCOPE OF AGREEMENT
This Agreement incorporates all of the agreements, covenants, and understandings between the parties hereto concerning the subject matter hereof and that all such covenants, agreements, and understandings have been merged into this written agreement. No prior agreement or understanding verbal or otherwise of the parties or their agents shall be valid or enforceable unless embodied in this agreement.

24. SEVERABILITY
The parties agree that each provision of this Agreement is severable and the invalidity or unenforceability of any one or more of the provisions of this Agreement shall not affect the validity or enforceability of any other provision of this Agreement, and this Agreement shall be construed in all respects as if such invalid or unenforceable provisions were omitted.

25. CONFLICT OF INTEREST
CONTRACTOR represents and warrants that CONTRACTOR has no business, professional, personal, or other interest, including, but not limited to, the representation of other clients, that would conflict in any manner or degree with the performance of its obligations under this Agreement. If any such actual or potential conflict of interest arises under this Agreement, CONTRACTOR shall immediately inform the CITY in writing of such conflict. If, in the reasonable judgement of the CITY, such conflict poses a conflict to and with the performance of CONTRACTOR'S obligations under this Agreement, or is otherwise a violation of the CITY'S current policy or ordinances, then the CITY may terminate the Agreement immediately upon written notice to CONTRACTOR; such termination of the Agreement shall be effective upon the receipt of such notice by CONTRACTOR.

SERVICES

A. Project Assignments

A Project assignment is initiated by the City providing the selected Engineering firm(s) a detailed project description, including scope of work and any other special instructions needed by the Engineering firm(s) to prepare all deliverables as requested. The awarded Engineering firm(s) shall provide engineering services that may include, but not be limited to, the following:

1. Master Planning
2. Structural design of buildings, retaining walls, etc.
3. Roadway, transportation, and parking lot design
4. Site development (drainage and grading design)
5. Electrical design (wells, booster stations, lift stations, odor control stations, building electrical system design)
6. Computer network analysis for Gas (GasWork), Water (InfoWater), and Wastewater (InfoSewer). The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility
7. Supervisory Control and Data Acquisition (SCADA) design
8. Mechanical design, gas system design, plumbing and HVAC design
9. Water, wastewater and natural gas utility system design and analysis
10. Traffic Impact Studies and Transportation Modeling Studies
11. Photometrics/street lighting design
12. Drainage Studies, including FEMA Flood Studies
13. Storm drainage
14. Solid waste studies, landfill system design and analysis
15. Environmental surveys, assessments monitoring and management, such as indoor air quality, asbestos, mold, and other related services for the City
16. Geotechnical Assessments, such as soil and groundwater testing for contamination and remediation, and other related services for the City
17. Expert witness in a judicial and/or quasi-judicial setting.
18. Project Management
19. Construction Inspection

B. Project Assignment Agreements

A Project Assignment Agreement (a template of which is incorporated herein as ATTACHMENT “A”) will be negotiated and executed on a case-by-case basis for each specific project, and will include a cost proposal from the Engineering firm(s) proposing to do the work. The cost proposal may utilize one of the following pricing formats:

1. Lump Sum
2. Unit pricing to include:
    a. Hourly rate for various types of services requested by the City
    b. Charges for miscellaneous items such as blueprints, data, discs, rental of special equipment, etc.
    c. A statement of the billing procedures including minimum billing units, if any.
    d. Cost of sub-consultants, if any

3. An alternative unit cost breakdown

C. Deliverables
Each project contract will require a list of deliverables, schedule/timeline and cost. The Engineer may be required to supply to the City an of the following items, when specified and as requested on the Scope of Work for each individual project.
1. Preliminary report containing schedule of work and cost estimate.
2. Construction drawings and documents. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility. Provide hard copies and PDF format of the construction plans for Purchasing Section use.
   a. As-built drawings on electronic media and reproducible prints. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. All horizontal and vertical location datum information shall be coordinated with the City Surveyor. The utility location information shall be tied to project control monuments and referenced to project construction stationing. The project control survey shall be certified by a New Mexico Registered Land Surveyor. Metadata or “data about the data” shall be submitted with each as-built electronic file, preferably as a separate text file on the electronic submittal media, and shall include:
      - Name, address, and phone number of the responsible land surveyor.
      - Date of completion of survey.
      - Equipment used to conduct the survey.
      - Horizontal and vertical control marks used to tie the survey to the City approved control.
      - Transformation factors needed to reduce Ground (local coordinate system) to Grid and combined scale factor used.
   b. “RECORD DRAWINGS” shall be clearly labeled on each sheet.
3. Computer network analysis for gas, water, and wastewater shall be provided to the City in appropriate electronic format. It shall include the entire model, including changes and a text summary (report) of the network analysis that includes assumptions, procedures, and results, and any graphics that clarify the analysis. The Engineering firm(s) shall verify the report format with the City. The computer network analysis shall be provided using the software listed below. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility.
   a. Computer network analysis for Gas: GasWork
   b. Computer network analysis for Water: InfoWater
   c. Computer network analysis for wastewater: InfoSewer
   d. Other design computer programs as approved by the City
4. Project reports.
5. Any other item specified in the contract for that project.

CI. The selection of an Engineer for a specific project shall be based on experience with similar projects, references, performance in similar projects, and availability. This will include the ability to meet schedules, cost control, and responsiveness to client.

CII. The Engineer shall have an engineering staff on-site everyday who is responsible, on behalf of the Engineer, for providing timely completion and response for performance of

the terms of each Project Assignment Agreement during the progress of each individual project. Any deviation from this requirement is at the discretion of the City and must be approved in writing by the City prior to the start of any individual project.

ATTACHMENT C – COST PROPOSAL FORM RFP 23-24-051 – General Engineering Services
(NOTE: This form shall not to be modified in any way)

Consulting Firm _____

ITEM	DIRECT LABOR / CLASSIFICATION	HOURLY RATE*
1	Principal Engineer	$ 140.00
2	Project Engineer/Project Manager	$ 117.00
3	Senior Engineer	$ 104.00
4	Design Engineer	$ 87.00
5	Engineer Intern	$ 75.00
6	Engineering Technician	$ 82.00
7	Drafting Technician	$ 63.00
8	Survey Crew**	$ Subcontracted
9	Construction Inspector/Observer	$ 86.00
10	Administrative/Clerical	$ 59.00
11	Field Testing and Investigations	$ 82.00
		PERCENT MARKUP
12	Subcontractor Cost Markup	(%) 15
ITEM	**MATERIALS / REIMBURSABLE EXPENSES**	**RATE**
	Travel	
13	Per Diem (per day) – Pre-Approval Required	City of Las Cruces Rate
14	Vehicle Mileage Rate (per mile)	Current IRS Rate
	Reproduction Services	
15	Black and White Copies (per copy)	$ 0.15
16	Color Copies (per copy)	$ 0.25
17	Prints 24x36 (per sheet)	$ 3.00
18	Mylars 24x36 (per sheet)	$ 9.50
19	Photo Quality Plots (per plot)	$ 32.50

RE : Response to RFP. No 23-24-051
General Engineering Services

Dear Bid Clerk and Members of the Selection Advisory Committee

In order to serve the City of Las Cruces' (City) needs, Zia Engineering & Environmental Consultants, LLC (Zia) is proposing a highly experience, locally based team bringing over 160 years of combined experience in the various disciplines of engineering and science required by this General Engineering Services RFP. Zia's team can respond to any aspect of the services required by the City under this RFP.

Zia brings the following distinguishing features to support the City of Las Cruces for the completion of general engineering work under this RFP:

- Zia is a **locally owned, locally headquartered, Las Cruces based** professional environmental consulting firm with 24-years history of providing services in the area.
- Our experience in similar projects throughout the region over the last 23 years includes engineering services and projects similar to the scope of work outlined by the City, including multiple awards of **on-call contracts by the City in prior years including for General Engineering Services.**
- **Zia has a strong** history **of client satisfaction, project innovation, cost effectiveness, and budget and schedule adherence including multi-million dollar government contracts with WSMR, Fort Bliss, Spaceport America and others.**
- Zia is providing a **locally based, strong subconsultant team** of firms well known and with prior extensive experience with the City of Las Cruces.
- **We are confident that our team will deliver the highest quality of project on time and on budget to the City.** Zia's staff brings the knowledge and sensitivity toward local issues and an on-going professional relationship with the City staff and other government and regulatory agencies. **Because of these reasons, we are capable of handling the City's projects with zero learning time.**

Should you have questions or need additional information, please contact the undersigned at 575.680.1996 or via email at ehmartinez@ziaeec.com.

Sincerely,
Zia Engineering & Environmental Consultants, LLC

Edward H. Martinez, PE
President / Principal Engineer

CITY OF LAS CRUCES

RFP COMPLIANCE DECLARATION

RFP TITLE: **General Engineering Services**

RFP NO.: **23-24-051**

DUE DATE/TIME: **February 27, 2024 / 4:00 p.m.**

In compliance with the requirements of this RFP, I, the undersigned, offer and agree to furnish any or all materials and/or services to the City of Las Cruces within the time agreed.

I further certify that this company has not been debarred, suspended, or otherwise made ineligible for participation in Federal Assistance programs under Executive Order 12549 Debarment and Suspension as described in the Federal Rules and Regulations.

Receipt of Addenda Nos.: One is hereby acknowledged (where none received, place a zero in this space)

1.0 TECHNICAL AND MANAGEMENT APPROACH

1.1 INTRODUCTION

Zia Engineering & Environmental Consultants, LLC (Zia) is providing this Proposal in response to the City of Las Cruces (CLC) issued Request for Proposal (RFP) No. 23-24-051 for General Engineering Services. This Proposal is organized per the RFP requirements listed in Section IV – Proposal Content of the RFP to address the Scope requirements of the RFP listed in Section III.

Zia is a Professional Engineering and Environmental Consulting firm, headquartered in Las Cruces since 2000. We have approximately 45 personnel located in four locations with the majority of our personnel located in the Las Cruces area. Our experience and expertise is in civil and environmental engineering, drainage analysis and stormwater and erosion control, environmental investigations and permitting, air quality, water and wastewater systems analysis, NEPA environmental compliance, RCRA investigations and remediation, land use studies and feasibility analyses, cultural and natural resources studies, environmental Phase I and II investigations, and asbestos and lead investigations. Our senior personnel have provided expert witness support related to judicial actions and routinely provide public outreach support when required. Many of our projects require construction phase services support to include support through the bid and award process and during and through the construction process.

Zia has more than 14-years of experience in providing engineering and environmental consulting services to the City of Las Cruces through various on-call and individual contracts on such projects as the design and permitting of the City's Recycling Center, air permitting of the City's electrical cogeneration facility at the wastewater treatment facility, annual development of the City's Water Consumer Confidence Report, civil design of the City's water and wastewater laboratory facility, response to City water and wastewater distribution issues, permitting support for renewal of the City's wastewater reuse facility and multiple environmental investigations (Phase I ESA's), NEPA studies and cultural and biological clearance surveys.

1.2 TECHNICAL APPROACH

This is an as requested on-call contract and as such, there is currently no identified project to specifically develop a technical approach response. As such the technical approach discussion below outlines the process that Zia will follow in general once a task request has been issued by the City. This approach may vary from task to task depending on project specifics but is the process that Zia anticipates to be applied based on prior experience with other City projects and projects of a similar nature completed for others.

Task Order Issuance and Review of Scope: Upon receiving a request for professional services from the City, Zia's Program Manager (PgM), Mr. Edward Martinez, PE will review the scope of services requested to determine whether there are any questions regarding scope, anticipated schedule, deliverables or coordination with the City. If there are questions, Mr. Martinez will coordinate with the City to address them prior to undertaking the task order response.

Identification of Personnel Needs and Requirements: Based on the project type, Zia's PgM will review Zia's staff and identify key personnel or subconsultants required to address the scope and any subconsultants that may be necessary (survey, geotechnical or other specialty services). Identification will take into account any requirements for certifications, training or other specific

needs required by that task based on applicable regulations, certifications (i.e. – PE license, asbestos and/or lead certifications, cultural resources licenses, etc.) or other needs.

Some of these projects may encompass a multi-disciplined approach to delivery of the professional services including such diverse disciplines as electrical systems design, mechanical design or design of SCADA systems. Zia will coordinate with our identified subconsultants as necessary to ensure that these specialty services are adequately addressed.

Task Order Response: The PgM will identify a proposed Task/Project Manager (PM) to bring the necessary technical background and experience to lead and complete the project successfully and in a timely manner. The PgM and PM will coordinate to complete the anticipated staffing and develop a task order response. In certain instances depending on technical area, the Zia PgM may also serve as the PM for individual projects.

The PM will prepare a task order response outlining the technical content and extent of the project, estimated project cost, project time schedule, and target completion dates of various tasks and subtasks. Zia utilizes advanced software to include Microsoft Project and other systems for project and task scheduling and project cost accounting (Microsoft Dynamics). All projects conducted for the City will utilize these systems to address City requirements and project needs. This Task Order Response will be submitted to the City for consideration of award of the assigned task.

If the project involves other private or government entities and/or regulatory agencies (such as the New Mexico Department of Transportation (NMDoT), the New Mexico Environment Department (NMED), US Environmental Protection Agency (EPA), US Army Corps of Engineers (USACE). Elephant Butte Irrigation District (EBID), the PM will establish an operational / management approach to establish line of communications with agencies and identify the points of contact.

Zia's team will provide the City with cost-effective approaches to address the requirements of the scope by having a local presence and breaking down the approach into subtasks. Breaking the approach down into subtasks allows for a more detailed approach, enabling clear identification of the tasks our team needs to complete. Our local presence also allows us to understand the community and the City's growth concerns while supporting the City in maintaining optimum delivery of its services with the highest level of public and environmental safety.

Task Order Award and Kick-Off: Upon receiving the authorization to proceed on a task / project under the annual professional services agreement, the PM will acquire the background data, drawings, study reports, and surveys, from the City. If needed, the PM and PgM may conduct kick-off meetings with the City and applicable regulatory agencies' points of contact to determine the necessary requirements, constraints, and agency review requirements. When applicable, the PM and/or the PgM will advise the City of any concerns regarding budget inadequacies or unrealistic time constraints to meet the objectives of the City and keep open lines of communication.

Task Order Implementation: For smaller and shorter assignments, Zia's PM will coordinate with the City typically on a weekly basis through the completion of the assigned project and will ensure timely invoicing for the completed work. For these smaller efforts, the coordination often will be informal either via phone and/or email unless issues are encountered which require more formal documentation. Typically smaller efforts would be anticipated to be completed in 30-days or less.

For larger projects, Zia's PM will have a formal work scope with tasks and subtasks charted and scheduled per the approved task order response with assigned task managers who report to the PM. These efforts would require Zia's PM to have formal coordination with the City at least every other week (unless required more often) to update progress, identify and discuss any issues and track schedules and budgets. For projects that go longer than 30-days, Zia will provide progress invoicing monthly through completion of the effort.

Task Order Close Out: Once a task/project is completed, the Zia PM will coordinate to provide hard copy and/or electronic copies of all final reports and related documents as agreed to within the approved task order. Copies of communications with regulatory agencies will also be provided for documentation purposes for City files.

When projects have a construction phase which Zia is involved with, Zia will provide engineer's cost estimates, bid phase services and construction site visits as agreed to between the City and Zia and as defined within the approved task order. Zia will also provide as-built/record drawings when approved under task order. Zia also routinely provides environmental monitors when required during construction activities.

Specialized Services: Zia provides specialized services to include the activities listed below:

- For projects that may require it, Zia can develop and implement public information and public relations programs. When necessary, Zia can implement public outreach in bilingual format.
- Either the PM or one of Zia's principals will be available to make technical presentations to the City Council, City Administration or other appointed or elected bodies if required.
- Several of Zia's principals have experience in providing expert witness support related to engineering and/or construction issues in judicial formats, either through depositions and/or through formal hearings.

1.3 MAJOR TASKS AND SERVICES PROVIDED

Provided on the next page is a summary table of each task proposed to be provided by Zia under this proposal, the proposed services to be provided under each task and identification of which firms (Zia and/or subconsultant) will provide the services.

Major Task / Firm Providing Services	**Services Provided By the Zia Team**
Master Planning Zia Engineering Cobb Fendley	• Identify Goals and Objectives and Project Requirements • Identify Functional Relationships • Identify Opportunities / Constraints (Physical / Environmental) • Identify and Review Alternatives • Master Plan Development, Schedule and Phasing Plan • Identify Funding Sources / Constraints
Structural Design Stubbs Engineering Zia Engineering	• Building and Foundations Design • Retaining Walls Systems Design • Tank Systems Design • Tower Systems Design

Major Task / Firm Providing Services	**Services Provided By the Zia Team**
	• Garage Structures Design
Roadway Transportation and Parking Lot Design Zia Engineering COZ Engineering (Geo) Gem Surveying	• Roadway Design • Linear Surveys (total station / lidar) • Utilities As-Builts • Geotechnical Investigations • Drainage Analyses • Right of Way / Land Acquisitions • Parking Lot Layouts and Designs
Site Development Zia Engineering Gem Surveying	• Site and Topographic Surveys • Drainage Analyses • Grading Layout(s) • Mass Balance Analyses (Cut / Fill Estimates) • Stormwater Pollution Prevention Plans / NOI/NOT Filings
Electrical Design RBM Engineering	• Electrical and control systems design for utilities systems • Electrical and control systems design for building systems • Solar electrical systems designs • Electrical design of traffic control systems and street lights
Computer Network Analysis Cobb Fendley Zia Engineering	• Network analysis of water and wastewater systems (Infowater, InfoSewer) • Network analysis of stormwater systems (StormCAD) • Network analysis of gas systems (GasWork)
SCADA Design RBM Engineering	• Identification of Data Acquisition Needs and Uses • Review of existing SCADA systems infrastructure • SCADA systems design • SCADA installation and training • Remote systems monitoring and controls
Mechanical Design RBM Engineering	• Mechanical design for utilities systems • HVAC and mechanical systems design for buildings • Mechanical design of gas systems and networks
Water, Wastewater and Gas Systems Design Cobb Fendley Zia Engineering	• Water and wastewater systems analyses and designs • Wastewater treatment systems designs and modifications • Design of water treatment systems and water storage • Design of water pump stations • Industrial wastewater systems analyses • Gas networks systems analyses and designs • Subsurface utilities location services
Traffic Impact Studies /	• Traffic operations and safety evaluations

Major Task / Firm Providing Services	**Services Provided By the Zia Team**
Transportation Modeling Civil Transformations Inc. (CTI)	• Warrant studies • Traffic impact analyses / Transportation master plans • Signal timing plan development • Neighborhood traffic calming • Bicycle/pedestrian studies
Photometrics / Street Lighting Design Civil Transformations Inc. (CTI)	• Street lighting plans • Camera and control systems designs and installations • Speed control studies • Traffic operations and safety evaluations
Drainage Studies Zia Engineering	• Hydrologic analyses / basins analyses • Dam analyses / dam stability / dam break analyses • Drainage master planning
Storm Drainage Zia Engineering	• Channel and stormdrain systems analyses / design • Pond systems analyses / design • Erosion and Sediment Control Plans • Urban runoff analyses
Solid Waste Studies / Landfill Systems Design Zia Engineering	• Solid waste master planning • Landfill permitting, design, closure plans • Transfer station, MRF planning / designs and permitting • Rate studies • Recycle program reviews and designs • Landfill gas capture systems design/ permitting and monitoring
Environmental Surveys, Assessments, Monitoring and Management Zia Engineering	• Phase I / II environmental site investigations • Asbestos / lead studies • Air permitting, indoor air monitoring, air emissions modeling • Site remedial systems investigations, designs and installations • NEPA Environmental studies (EA, EIS, etc.) • Groundwater modeling and monitoring
Geotechnical Assessments COZ Engineering	• Preconstruction geotechnical investigations • Environmental drilling for field studies • Foundations and pavement designs • Construction materials testing
Expert Witness All team firms as applicable to technical area of support	• Deposition preparation and support • Expert witness in formal deposition or court setting • Technical review of case histories • Technical support of Notice of Violations and related hearings • Technical support of mediation or arbitration hearings

Major Task / Firm Providing Services	**Services Provided By the Zia Team**
Project Management Zia Engineering & All team firms as applicable to technical area of support	• Task order response • Project scheduling • Budgets development • Cost / Project estimating • Project staffing / management • Client communications / coordination • Project trouble shooting
Construction Inspection Zia Engineering	• Construction phase monitoring and documentation • Construction management • Construction inspection services • Project as-built drawings

1.4 TYPICAL PROJECT SCHEDULE / TIMELINE

Outlined below is a recent schedule for a proposed 2.0 mile long rural roadway project for a client. Typically we will initiate services within 3-5 business days from the date of authorization to proceed. Zia typically will provide a breakdown of anticipated tasks and a Gantt chart type of format for project schedule.

Typical Project Schedule

Description	Oct	Nov	Dec	Jan	Feb	Mar	Apr
Task 1 - Topographic Survey							
Task 2 - Geotechnical Investigation							
Task 3 - Drainage Analysis							
Task 4 - Civil Design Services							
Task 5 – SWPPP and NOI							
Task 6 - Construction Phase Services							

Please note that Zia cannot make any guarantees for reviewing time frames required reviewing agencies. This schedule assumes no extraordinary delays in reviews by the Clients and no delays in receiving required data by others including surveys, geotechnical analysis and/or site layouts and data from others. Should conditions be encountered that necessitate a revision to this schedule, Zia will inform the Client and negotiate a modification.

2.0 QUALIFICATIONS / COMPETENCE

2.1 KEY PERSONNEL ASSIGNED

A summary of key personnel assigned, their proposed roles and their assumed involvement in this contract as a percent of their full time availability is summarized in Table 1. Typically City issued tasks do not require the involvement of any individual Zia staff member more than 5-10% of their

available time within a given year. Summary resumes for these personnel describing their areas of competence are provided below.

Table 1: Project Team Qualification Matrix

Name	Years of Experience	% Time Assumed	Education / Registration	Master Planning	Structural Design	Roadway, Parking Lot Design	Site Development (Drainage / Grading)	Electrical & Mechanical Designs	Utiliites Analyses and Design	Traffic Studies	Solid Waste Services	Environmental Studies	Geotechnical Assessments	Expert Witness	Construction Inspection

Edward H. Martinez, P.E., Program Manager (PgM), Principal Engineer		
Project Role	Program Manager, Principal Engineer in Charge, Solid Waste Services	
Education	B.S. Civil Engineering, New Mexico State University, 1984	
Qualifications / Certifications	Registered Professional Engineer, New Mexico No. 13731; Certified Environmental Reviewer; HAZWOPER	
Years of Experience	38 years	

Mr. Edward Martinez, P.E., is the founder and President of Zia. He has served as Principal Engineer, and PM on projects of various complexities and will serve as the overall Program Manager and Principal Engineer for various projects under this contract including engineering, drainage and solid waste services. As President of Zia, Mr. Martinez has the authority to insure that adequate resources are provided to projects to meet schedule and budget needs.

He has also prepared and managed master drainage plans/analyses and investigations, regulatory compliance and permitting, including NPDES, surface hydrology and hydraulic systems, water and wastewater, municipal utilities, environmental compliance, and water rights. He has conducted runoff and floodplain analyses on basin-wide river systems and urbanized runoff analyses for individual projects and watersheds.

Mr. Martinez has an extensive background in solid waste management planning, design, closure, environmental site investigations, environmental site remediation, solid waste facilities permitting and recycling dating to the early 1980's. He has also directed and/or managed investigation and/or closure of over 35 landfill facilities throughout the Southwest. He has worked closely in landfill permitting and closure efforts to pursue and manage grants and loan funds for solid waste projects. He has also been involved in design and permitting of various MRFs, transfer and convenience centers.

He has conducted and supervised numerous investigations for environmental due diligence, air quality impacts, surface and groundwater hydrology, soil remediation, remedial systems design, and, site characterizations. His expertise includes analysis of both air quality and surface / groundwater impacts associated with various projects

Mr. Martinez has also provided expert witness testimony for projects related to groundwater and soils contamination and has supported several clients in depositions and expert witness roles related to environmental compliance and drainage issues.

Ronald M. Trujillo, PE • Civil Engineering		
Project Role	Civil / Environmental Engineering, Solid Waste, Construction Phase Services	Education	B.S. Civil Engineering, New Mexico State University, 1988 Graduate Studies in Construction Contracting and Traffic Engineering, University of New Mexico	
Qualifications Certifications	Registered Professional Engineer, NM License No. 12584	
Years of Experience	33 years	

Mr. Trujillo has 33 years in project management and construction management on complex engineering projects across the State of New Mexico. At Zia he has designed and performed Quality Assurance/Quality Control (QA/QC) reviews for waterlines, drainage, and roadway projects; developed solid waste management plans; assisted in the monitoring of landfill gases and in landfill projects that involved lining and venting landfills. He has also performed QA/QC reviews, and spill prevention control and countermeasure plans (SPCC).

Mr. Trujillo has 19 years of experience with NMDOT's Plans, Specifications, and Estimates (PS&E) Bureau as Bureau Manager. This included involvement with project letting, authorization, letting administration, contracts, and standards and specifications units, which are primary units of the PS&E Bureau. As a former Bureau Manager with NMDOT, he is familiar with coordinating with city, state, and federal agencies. Additionally with NMDOT, Mr. Trujillo has six years' experience in the Final Design Unit, Verifications Unit, Highway Design Section (which included geotextile lining for slope protection of roadways); and Traffic and Bridge Design and Drainage Sections.

Carmella Apodaca Irwin • Engineering Design	
Project Role	Staff Engineer / CAD
Education	BS: Civil Engineering, New Mexico State University, 1985
Qualifications / Certifications	NPDES & SWPPP, Civil 3D CAD Design
Years of Experience	30 years

Ms. Irwin is a civil engineering leader with more than 30 years of experience in providing thorough, quality management of all aspects of irrigation projects mainly focused on Farming, and livestock watering facilities for Ranching. She worked directly with NRCS personnel and landowners on engineering problems in connection with investigating and determining feasibility, preparing cost

estimates, planning, designing, and installing practices. She is skilled in complex problem solving and the implementation of innovative procedures to ensure health and safety compliance.

As a civil engineer for the U.S. government, Ms. Irwin conducted multiple trainings including Concrete Lined Ditch Design, Pipeline Design, Irrigation Water Management, Total Station, Trimble, Topcon, AutoCAD, Irrigation System Design, Surveying, Hydraulics; Land Leveling.

Miguel A. Martinez, CSP. • Safety / Environmental and Taffic Modeling / Permitting	
Project Role	Safety/Environmental Compliance/Environmental Permitting
Education	B.S. Chemical Engineering, New Mexico State University, 1992
Qualifications / Certifications	RABQSA ISO 14001:2004 EMS Auditor Certified Environmental and Safety Compliance Officer 40 Hour HAZWOPER / Supervisor DOT Hazardous Waste Training Industrial Incipient Fire Training
Years of Experience	31 years

Mr. Martinez has a very broad spectrum of experience in the environmental and engineering fields. His environmental experience includes projects covering the management of RCRA and groundwater remediation programs, designing an Environmental Management Information System, water reclamation, treatment, storage and disposal of cooling tower effluent, groundwater and soils contamination delineations, designed and implemented an ISO 14001 program, Title V and New Source Review permitting, Mine Safety and Health Administration Surface Miner Instructor, and Terminal and Tank Farm Environmental and NESHAP Management.

Mr. Martinez has supported City of Las Cruces projects including permitting of the solid waste recycle center, air permitting of the cogeneration units for the wastewater treatment plant, process safety management for the Utilities Division and permit renewal for the wastewater reuse plant.

He has also provided air quality, environmental permitting and safety support on Zia contracts with WSMR, Spaceport America and Fort Bliss. He also provides compliance support for industrial stormwater management permitting and industrial wastewater pretreatment programs for many of the City's industrial dischargers.

Joseph Sandoval • Senior Civil Designer		
Project Role	Sr. Engineering Designer, Project Manager, Construction Phase Services	
Education	Associates Civil/Survey Technology, 2013	
Qualifications / Certifications	NPDES SWPPP Designer AutoCAD Civil 3D AutoCAD Revit AutoCAD Storm and Sanitary Analysis AutoCAD Mad3D	
Years of Experience	18 years	

Mr. Sandoval's overall experience in civil design includes full residential, commercial site development and drainage. He is very hands on within the design process from coordinating and

delegating project budgets and tasks to civil design including site drainage analysis, grading design including single and multiple parcel subdivision development, utilities including pipe networks, erosion control (including SWPPP reports), landscape requirements, design and preparation of construction documents.

Mr. Sandoval has site development design experience including commercial, subdivision single- and multiple-parcel development, landscape requirements, layout design, demolition, grading and drainage utilities, erosion control, and preparation of construction documents. His road design experience includes vertical and horizontal alignments, slope design, milling and paving, drainage analysis, utility coordination, and traffic control. Design and modeling programs he has used include AutoCAD, AutoCAD Civil 3D, AutoCAD Revit, AutoCAD Storm and Sanitary Analysis, AutoCAD Mad3D, and Microsoft Office.

Jesse Betancourt-Simental, Designer/CADD	
Project Role	Designer / CADD / Construction Inspection
Education	A.D. in Drafting and Design/, Doña Ana Community College, 2013 Bachelor of Science in Architecture at Texas Tech University, 2016
Qualifications / Certifications	BIM/CAD Designer AUTODESK Education Team (Building Performance Analysis)
Years of Experience	10 years

Mr. Jesse Simental brings a diverse background in civil & architectural design. His experience includes civil site development & full design services with residential, commercial, and federal entities. Mr. Simental has experience in site and road drainage analysis, grading, development design, including single and multiple parcel subdivision development, utilities, erosion control, landscape requirements, design of layout, and preparation of construction documents. He has gained experience in design services as part of the design and project management team for several projects to include: Lordsburg High School renovation and Curry County Detention Center addition & renovations. He has participated in projects from preliminary design up to construction documents & construction administration delivering satisfaction & quality services for his clients.

Victoria Trujillo Brown, PMP • Senior Scientist		
Project Role	Project Manager/Senior Scientist	
Education	M.A. History, NMSU, 2008 BA History, New Mexico State University, 2000	
Qualifications/ Certifications	Project Management Professional (PMP) NM Historic Preservation Office Permitted Qualified Supervisory Personnel in History BLM Permitted Field Supervisor OSHA 40hr HAZWOPER / Supervisor AHERA Asbestos Inspector / Management Planner	
Years of Experience	24 years	

Victoria T. Brown is a project manager with more than 24 years of professional experience in New Mexico and the Southwestern United States. Ms. Brown conducts and manages ASTM Phase I and II Environmental Site Assessments, as well as environmental sampling and surveys including: vapor, soil and groundwater sampling; Covid-19 wastewater and industrial pre-treatment sampling;

asbestos inspection and management planning; wetlands studies; radon sampling; radiation testing; vapor and indoor air surveys; noise and vibration surveys; as well as lead and mold surveys.

Ms. Brown conducts fieldwork, report writing, technical editing, health and safety plans, quality control plans, QA/QC reviews, excavations and data recovery. Additionally, Ms. Brown conducts has completed multiple Environmental Assessments, Categorical Exclusions, Environmental Information Documents and other NEPA related documents.

She is very experienced in development of presentation information and has been responsible for putting together public information packets, preparing posters and other visual aids for public meeting(s), and participating in public meetings as an expert in her field. She has previously served as Zia's Project Manager on multiple master services contracts and individual assigned City projects over the last 14-years.

2.2.1 SUBCONTRACTORS

Structural Design: *Stubbs Engineering Inc.*			
Address	277 E. Amador Ave. Suite 200, Las Cruces, NM 88001	**Phone**	(575) 993-5228

Stubbs Engineering, Inc. was founded by **Michael A. Stubbs, PE, (NM License # 16814)** DBIA in 2010, to provide superior Structural Engineering services to southern New Mexico and West Texas. Mr. Stubbs has over 15 years of experience in structural engineering and construction including commercial projects, religious facilities, schools, municipal buildings, medical offices, and hospitals to industrial facilities.

Stubbs Engineering's focus is on providing creative structural designs that provides clients with the aesthetics they desire at the most economical method possible. Michael Stubbs has vast experience in both design and construction methods. This experience gives him the unique ability to provide a level of service beyond that of normal structural engineering. His experience includes: Las Cruces High School (ongoing), Las Cruces Sun-News, Rio Grande Medical Office, Building (Las Cruces, NM), Las Cruces City Hall Solar Panels, NMSU – Stewart Street Tunnel Collapse.

Electrical / Mechanical / SCADA Design: RBM Engineering, Inc.			
Address	1065 S. Main Bldg. D Ste A, Las Cruces, NM 88005	**Phone**	(575) 647-1554

RBM Engineering, Inc. was created in 1993 as a firm specializing in mechanical, electrical and plumbing consulting engineering. RBM has a long history of work experience in the Las Cruces / El Paso area and combines the experience of three different firms: Morris, Toothman & Associates; Fluid Systems, Inc.; and Coupland Moran Engineers, Inc. RBM currently employs nine engineers, designers, and E.I.T.s.

Mr. Bryan Morris, P.E., (NM License #3408) is the President of RBM Engineering. Mr. Morris has over 25 years of experience as an Electrical Engineer. Bryan has dealt with all aspects of the consulting engineering business, from project management, to coordinating with the owner, utilities, and other design professionals. He has additional experience in studies of facility electrical distribution systems, facility surveys and reports and teaching a lighting course at a vocational school.

Traffic Impact Studies / Transportation Modeling: Civil Tranformations, Inc. (CTI)			
Address	2929 Coors Blvd. NW, Suite 309 Albuquerque, NM 87120-1425	**Phone**	505.508.3374

Civil Transformations Inc. (CTI) provides state-of-the-practice infrastructure planning and engineering services for multi-disciplinary projects of various sizes with emphasis in all facets of transportation and traffic engineering, including: conceptual analysis, location studies, geometric design, transportation planning, traffic engineering, safety evaluations, ITS, and construction administration. , CTI provides field collection of traffic counts to traffic modeling and simulations to infrastructure designs.

Mr. Timothy Simmons, PE (NMPE #12722) has over 34 years of experience including all facets of transportation and traffic engineering that has included numerous traffic studies, geometric designs and roadway PS&E packages. Types of studies Mr. Simmons has been responsible for have included interchange access change requests (IACR); traffic operations and safety evaluations; warrant studies; traffic impact analyses of site development; transportation master plans; signal timing plan development; neighborhood traffic calming; bicycle/pedestrian studies; and complete streets evaluations. In addition, Mr. Simmons has participated in public involvement activities for these studies, including presentations, charrettes, and project workshops. Also, Mr. Simmons has designed or overseen designs of more than 150 traffic signals and 30 lighting projects, hundreds of miles of communications media (copper, fiber, wireless), and numerous traffic control plans.

Geotechnical Assessments: *COZ Engineering*			
Address	PO Box 13331 Las Cruces, NM 88013	**Phone**	(575) 642-7671

Zia will utilize the COZ Engineering for geotechnical work under this contract. **Mr. Dan Cosper, P.E. (NM License # 14477)** is the owner and principal engineer for COZ. He has over 20 years of experience in geotechnical and construction materials engineering. Mr. Cosper has provided geotechnical evaluation and reporting for projects including pavement sections, retaining walls and drainage structures. He has performed wastewater treatment plant design including embankments, slopes and borrow areas. He has provided project management on projects involving foundation design for bridges, commercial and industrial structures, municipal water storage tanks, and lift stations. Mr. Cosper has a B.S. in Geological Engineering from NMSU.

Utilities Engineering / Utilities Network Analyses; Cobb Fendley			
Address	11427 Rojas Dr Ste B, El Paso, TX 79936	**Phone**	(575) 650-0649

Since its founding in 1980, CobbFendley has evolved into a versatile infrastructure solutions provider, offering a range of integrated services. Our work history was built on private utility relocations and has expanded to include fundamental and specialized services needed to complete the most innovative projects. CobbFendley was founded on providing utility solutions and today we're a trusted partner in the design for new utility facilities and the design of relocations for existing facilities.

Chris Almy, P.E. (NM License #19120), who is a resident of Las Cruces, will serve as a supervising engineer for Cobb Fendley. Mr. Almy has 17 years of experience in civil and water resources engineering. Mr. Almy has studied and conducted projects in ET Instrumentation, ASTER Observations of Water Surface Temperature for Elephant Butte Reservoir, Investigated ET Depletion of Treated and Non-Treated Saltcedar in the Elephant Butte Reservoir Delta and of Crop ET for Doña Ana County, NM. He is familiar with the requirements for land development,

roadway and utilities projects. He has participated in projects from feasibility through construction, including plan development, survey, design, specification preparation, construction, and inspections. He earned his B.S and M.S. in Civil Engineering from NMSU.

Surveying Services: Gem Surveying			
Address	4405 Johnson Lane, Las Cruces, NM 88011	**Phone**	(575) 635-0176

GEM Surveying, LLC offers Land Surveying, Topographic Mapping, ALTA/ACSM Land Title Surveys and Construction Staking in New Mexico, Texas, Colorado and Arizona. We offer Land Surveying and construction layout for New Mexico, Colorado, Texas and Arizona. We are a small firm specializing in rural, large area surveys and specialty construction staking. Drawing on over 100 years of combined surveying experience, we will work diligently and quickly to achieve the task set before us. Our staff consists of two licensed surveyors and experienced CAD technicians and field technicians. We have years of experience presenting projects to city councils and local governments.

2.2 Principal Member / Officer of Zia Responsible for Administration of Contract and Engineering Professional In Direct Charge of Work

Edward Martinez, PE - President / Principal Engineer (NM-PE License # 13731)
755 S. Telshor Blvd., Suite Q-201, Las Cruces, NM 88011
575-680-1996 / ehmartinez@ziaeec.com

2.3 Location Where Work Will Be Performed

Zia anticipates that at least 80% of the work performed on assigned tasks under this contract will be completed by our Las Cruces based staff through our local Las Cruces office and/or subconsultants offices located in Las Cruces. Up to 15% of the work effort may be completed by staff in our Albuquerque office or subconsultants located in Albuquerque and potentially up to 5% of the work may be completed by subconsultants located in El Paso offices. Zia anticipates approximately 70% of the work will be self-performed.

3.0 PERFORMANCE OF THE FIRM

3.1 Project Descriptions

Provided in this section are the required three past contracts similar in scope with references.

Project Title	Contract Number
Feasibility and Environmental Analyses, Civil Design and Permitting Services for Commercial Solar Sites	CED-ZIA Master Services Agreement
Owner and Contact Information	**Capacity Held**
RWE Clean Energy (Previously - Con Edison Clean Energy Businesses) 100 Summit Lake Drive Valhalla, NY 10595 Greg Carey - Project Developer Gregory.Carey@rwe.com Office +617- 834-8568	**Zia's Role: Prime Contractor** **Contract Amount** $949,773 – (2021 – 2023) **Contract Durations** 09//2021 – present

Zia was selected by Con-Edison Clean Energy Business (since renamed RWE Clean Energy) to provide feasibility siting, preliminary coordination, environmental assessments and clearances, civil site design and agency permitting and zoning support for approximately 15 sites throughout New Mexico. Zia provided initial siting and feasibility analysis support for approximately 5-sites in Dona Ana County and west Texas areas related to potential projects with El Paso Electric and has also provided environmental investigations, zoning, permitting and civil and electrical site design services for up to 5 sites within the Public Service Company of NM service area and an additional 5 sites within the XCEL Energy service area. Zia is currently the exclusive engineering and environmental support consultant to Con-Edison (RWE) within New Mexico.

Feasibility siting support has consisted of determination of potential transmission distribution layout to include base mapping or layout of transmission systems in the New Mexico portion of the EPE service area as well as related substation locations. Once the transmission systems information was obtained, as well as resources from County and federal data sources, Zia identified potential locations that may be suitable for siting solar array facilities.

Sites suggested and located by Zia were presented on aerial and/or assessor basemaps which identified land ownership and approximate acreage. For selected sites, Zia conducted pre-feasibility screening to include: terrain/wetlands and drainage ways; zoning compatibility and/or zoning process; desktop review of potential cultural and biological issues if any; and desktop review of suitability of site soils for proposed solar array installation; and site access descriptions. For solar site assessments work Zia provided a review of title, zoning, and permitting requirements, as well as environmental and physical conditions reviews of proposed sites.

Civil site design and permitting support has included zoning support for proposed approximatgely 30-35 acre commercial solar projects and formal civil site design and development of construction drawings for the proposed project. Specific activities have included zoning support, preconstruction surveys, drainage analyses and civil site design, SWPPP documents preparation, site permitting.

Project Title	**Contract Number**
Environmental Compliance, Civil Design, Master Planning	23-495-P770-23015
Owner and Contact Information	**Zia's Role – Prime Contractor**
NEW MEXICO SPACEPORT AUTHORITY Melissa K. Force / General Counsel Melissa.Force2@spaceportamerica.com Office +1 575 267-8558	**Contract Amount** $1,747,669.61 (2006– 2026) **Contract Durations** 07/01/2023 – 06/30/2026 (Original Start in 2006)

Since 2006, Zia has provided a wide range of environmental, civil engineering, environmental compliance and cultural and natural resources services with New Mexico Spaceport Authority (NMSA). NMSA contracted Zia to complete various on-call environmental and civil planning and design tasks for the Spaceport America site in Doña Ana and Sierra Counties. Work is coordinated through the BLM, New Mexico State Land Office, and NMDOT.

Much of the work is conducted as part of an Environmental Impact Statement (EIS) for a site license issued by the Federal Aviation Administration. Zia provided initial NEPA support to

Spaceport America for the original FAA permit for the facility. This included cultural and biological surveys of the vertical and horizontal launch areas and other infrastructure locations, totaling over 3,000 acres to support the Environmental Impact Statement.

Zia was also part of the originally awarded consultant management team to provide support for development of the facility's safety and environmental compliance programs.

Since the original NEPA support, Zia has continued to provide planning, environmental surveys and clearances and civil design services related to infrastructure expansions and planned test activities. Currently Zia is providing engineering design of roadway projects, drainage analysis, water line systems design and feasibility and master planning support services under various tasks.

Project Title	Contract Number
Las Alamedas Development Master Planned 3,000-acre Community, Las Cruces. Master Planning, Drainage Analysis, and Design Services.	Various awarded contracts since 2004
Owner and Contact Information	**Zia's Role – Prime Contractor**
ALAMEDA LAND INVESTMENT CORP. Phillip Custer maxpopo@aol.com Office +1 505 264-6062	**Contract Amount** $880,000 (2004– present) **Contract Durations** 2004 - current (Original Start in 2004)

Zia has provided master planning, platting, design, drainage analysis, traffic impacts studies and other environmental and engineering services for this 3000-acre master planned, mixed-use development on the east mesa of the City of Las Cruces. This project was originally master planned in the mid 1980's; several of Zia's personnel actively worked on this major undertaking. Portions of the master planned project was designed by team members (who are now with Zia) and built during the 1980's. Starting in about 2000 the project was re-energized. Since that time, Zia has been providing professional services for the planning, flood plain analysis and drainage, design of infrastructure, platting, surveying and other related services.

Zia provided professional services that included surface hydrologic modeling; subdivision planning and platting; site roadway, utilities master planning and design; hydrologic/hydraulic analysis, floodplain mapping; and design of hydraulic structures. The work involved analysis of three major watersheds impacting the City of Las Cruces and included detailed residential and commercial subdivision design along with related hydraulics systems design and analysis for more than 1000 acres of the development. To date, more than 15 separate design and construction packages have been developed to include design construction drawings, specifications and bid documents.

Title: **A RESOLUTION AUTHORIZING THE CITY OF LAS CRUCES (CITY) TO ACCEPT GRANT AWARDS FOR VARIOUS CITY DEPARTMENTS THROUGH AN AMENDMENT TO THE CITY'S ADOPTED FY2024 BUDGET AND THE FY2024 CAPITAL IMPROVEMENTS PROGRAM (CIP).**

TYPE OF ACTION: **☒ Administrative** **☐ Legislative** **☐ Quasi-Judicial**

PURPOSE(S) OF ACTION:

To accept awarded grants and adjust the FY24 budget and FY24 CIP.

BACKGROUND / KEY ISSUES / CONTRIBUTING FACTORS:

The City of Las Cruces (City) relies on grant funding for many of the critical programs provided each year for the residents of Las Cruces. Grant funding awards are received throughout the fiscal year and are not budgeted during the normal fiscal year budgeting process. Funds are not budgeted until the City has received a grant award agreement due to the unpredictable nature of funding levels and timing.

Per the City's Grants Administration Program Policy, the City Manager, or his designee, may execute grant agreements with funding agencies. Upon receipt of the fully executed agreement from the funding agency, the Council may adjust the budget.

The request for City Council is to accept the budget adjustments to be used by the departments for the scope of work as defined by each grant agreement.

Does this action align with Elevate Las Cruces?

☒ Yes

☐ No

OPTIONS / ALTERNATIVES:

1. Vote “Yes”; this will approve the Resolution to accept the budget adjustments as presented and amend the City’s FY2024 Budget and FY2024 CIP.
2. Vote “No”; this will not approve the Resolution to adjust the FY2024 Budget and FY2024 CIP as presented and return the funds to the granting agency.
3. Vote to “Amend”; this could delay the Resolution and the process of spending the grant funds within the predetermined grant schedule and require direction to staff.
4. Vote to “Table”; this will delay the Resolution and will impact the implementation of the grant agreement, the City department's ability to utilize the funds and return the grant funds to the granting agency.

RESOLUTION 24-117

A RESOLUTION AUTHORIZING THE CITY OF LAS CRUCES (CITY) TO ACCEPT GRANT AWARDS FOR VARIOUS CITY DEPARTMENTS THROUGH AN AMENDMENT TO THE CITY'S ADOPTED FY2024 BUDGET AND THE FY2024 CAPITAL IMPROVEMENTS PROGRAM (CIP).

The City Council is informed that:

WHEREAS, the City has received notice of grant awards for various City departments; and

WHEREAS, the grants will be used as designated in the scope of work and within the specified time period as shown in the grant agreements executed by the City Manager, or his designee; and

WHEREAS, the grant agreements that are the subject of this budget adjustment will be attached to the Resolution with a Summary, as Attachment "A"; and each agreement will be attached as subsequent attachments.

NOW, THEREFORE, Be it Resolved by the Governing Body of the City of Las Cruces:

(I)

THAT the City hereby amends the FY2024 City Budget accept all grant awards as shown in the Fund Summary, Exhibit "A", attached hereto and made part of this Resolution, are hereby approved.

(II)

THAT the FY2024 CIP, is hereby amended as outlined in Exhibit "B", attached hereto and made part of this Resolution, are hereby approved.

(III)

THAT the City staff is hereby authorized to do all deeds necessary in the accomplishment of the herein above.

WWIF - *Wastewater Impact Fees*

CITY OF LAS CRUCES

The following grant has been awarded to the City of Las Cruces

Today's Date: 04/19/2024
Application Submission Date:
Requested Amount: $84,500.00
Award Notification Date: 09/15/2023
Funding Agency: North Central New Mexico Economic Development District Non-Metro Area Agency on Aging

Grant Team Representative: Gabriela Prats
Council Budget Adjustment Date: 05/20/2024
Grant Award Amount: $ 84,500.00
Grant Agreement #: 2023-24-64014-ARP

CFDA #: 93.043, 93.044, 93.045, 93.052
Funder MUNIS CID #: 63264

PROJECT INFORMATION

Grant Project Title: American Rescue Plan SubAward

Contract No. 2023-24-64014-ARP

North Central New Mexico Economic Development District
Non-Metro Area Agency on Aging

AMERICAN RESCUE PLAN SUB-AWARD

This Agreement is made and entered into this 1st day of December 2023, by and between the North Central New Mexico Economic Development District (NCNMEDD) Non-Metro Area Agency on Aging (Non-Metro AAA), hereinafter referred to as the "Agency" and City of Las Cruces, hereinafter referred to as the "Subrecipient Contractor."

The Agency's Senior Citizens Services program is designed to promote the development of a comprehensive and coordinated service delivery system to meet the needs of older individuals (age 60 and older). This agreement provides a mechanism for the creation of an individualized network of community resources on a client-by-client basis through the Older Americans Act, as amended, the State of New Mexico Aging and Long-Term Services Department, and the Agency.

1. **SCOPE OF SERVICES**

A. Services. The Subrecipient Contractor agrees to provide service(s) to eligible consumers as identified in accordance with the Subrecipient Contractor application or Service Delivery Plan, all required assurances, licenses, and certifications, as applicable.

B. Service Area: The Subrecipient Contractor agrees to provide service(s) to eligible consumers in the service area as identified in the Subrecipient Contractor application or Service Delivery Plan attached by reference.

C. Deliverables. The Subrecipient Contractor shall provide services based on the assessed need of the community and individuals receiving services under this Agreement and as identified in the Subrecipient Contractor application or Service Delivery Plan and attached by reference. The service units and consumers detailed in the Service Delivery Plan and Budget sections are estimates. Budgeted services are to be provided in accordance with the Aging and Long-Term Services Department (ALTSD) Units of Service Definitions; to be monitored through the Subrecipient Contractor's submission of monthly WellSky data, activity reports, and through Agency monitoring reviews. Final determination of service units and consumer performance measures shall be established by the ALTSD, and should the Contractor not meet the established units, reimbursement requests should reflect the same.

D. Targeting: Target populations include persons aged 60 or older and their spouses of any age, younger disabled persons who reside with persons aged 60 or older, caregivers of any age who care for persons aged 60 or older, caregivers aged 60 or older who care for children or younger disabled persons, and the recipients of their care.

Per the Older Americans Act, an effort must be given to serving eligible persons with the greatest social or economic need, with particular attention to minority individuals with low incomes. Efforts must also be given to targeting individuals residing in rural and frontier areas, individuals with limited English proficiency, and individuals with Alzheimer's disease and related disorders, with severe disabilities or at-risk of institutionalization and their caregivers.

E. Payment for Services: For the services determined by the Agency to be satisfactorily provided by Subrecipient Contractor hereunder, the Agency shall pay the Subrecipient Contractor, during the term, an aggregate amount, including gross receipts tax, not to exceed **$84,500.00**. Said aggregate amount is to be derived from the following sources.

1. **$25,000.00** from ARP Title III-B of the OAA [Assistance Listing Number 93.044].

2. **$10,000.00** from ARP Title III-C1 of the OAA [Assistance Listing Number: 93.045].

3. **$25,000.00** from ARP Title III-C2 of the OAA [Assistance Listing Number: 93.045].

4. **$0.00** from ARP Title III-D of the OAA [Assistance Listing Number: 93.043].

5. **$24,500.00** from ARP Title III-E of the OAA [Assistance Listing Number: 93.052]; and

F. Payment for services shall be consistent with all applicable federal and state laws and regulations.

G. Payments to the Subrecipient Contractor will be made after receipt of funds by the Agency. Any expenditure made prior to the receipt of funds or pending the Agency's approval shall be made at the Subrecipient Contractor's own risk, and the Agency shall not be liable for such expenditures.

H. Payments to the Subrecipient Contractor may be withheld or denied by the Agency for expenditures which are not authorized by, or are in excess of, the regulations, terms and conditions contained in this Agreement or for expenditures which are not properly documented or substantiated by the Subrecipient Contractor. The Subrecipient Contractor agrees to hold the Agency harmless against all audit exceptions arising from the Subrecipient Contractor's violation and shall make restitution to the Agency of such amounts of money due to the Subrecipient Contractor's non-compliance.

I. Subrecipient Contractor must submit a detailed statement accounting for all services performed and expenses incurred. Reimbursements shall be made by the Agency on a monthly basis upon receipt of monthly expenditures and reports furnished by the Subrecipient Contractor. If the Agency finds that the services are not acceptable, within thirty days after the date of receipt of written notice from the Subrecipient Contractor that payment is requested, it shall provide the Subrecipient Contractor a letter of exception explaining the defect or objection to the services and outlining steps the Subrecipient Contractor may take to provide remedial action. Upon certification by the Agency that the services have been provided and accepted, payment shall be tendered to the Subrecipient Contractor within thirty days after the date of acceptance.

J. Payments to the Subrecipient Contractor will be made electronically through the Automated Clearing House (ACH) Network.

K. Subrecipient Contractor shall track and report all information needed for the State Program Report for Administration for Community Living (ACL) through the Older Americans Act Performance System (OAAPS). Subrecipient Contractor shall adopt the standard universal consumer assessment instrument provided by the Aging & Long-Term Services Department to capture information for all data fields on the tool, as required by OAAPS and state and federal reporting requirements.

2. TERMS OF AGREEMENT

In addition to the other provisions contained in this Agreement, the parties agree to the following:

A. The Subrecipient Contractor agrees to:

1. Provide services in accordance with current or revised Agency and State of New Mexico Aging and Long-Term Services Department policies and the OAA.
2. Target services to older individuals with greatest economic and social need, including low-income individual, low-income minorities, older individuals at risk of institutional placement, individuals with limited English proficiency, and older individuals residing in rural areas, as applicable.
3. Record timely and accurate consumer service delivery into WellSky Aging & Disabilities Database. Data should be recorded daily.
4. Submit timely and accurate consumer/client assessment and reassessment documentation (including transmittals), on the day conducted.
5. Ensure consumer contact and demographic information is accurate in WellSky Aging & Disabilities database.
6. Encourage client contributions (program income) on a voluntary and confidential basis. Such contributions will be properly safeguarded and accurately accounted for as receipts and expenditures on its financial reports, if they are not required to be forwarded to the Agency. Client contributions (program income) will be reported fully and in the service category where generated, as required, to the Agency. Subrecipient Contractor agrees to

expend all program income to expand or enhance the program/service under which it is earned.

7. Maintain communication and correspondence with the Agency concerning clients' status, emergency situations, and program operations.
8. Submit contingency plan to address unforeseen circumstances when service delivery is threatened.
9. Submit timely and accurate information necessary for reimbursement.
   a. All service performance data should be verified and reconciled by the Subrecipient Contractor prior to submitting the Verification Statement and the Agency Summary Report (ASR) to the Non-Metro AAA office by the 5th business day of the month. The Agency Summary Report (ASR) is the official document used to initiate reimbursement of services provided by the Subrecipient Contractor and must be reviewed and certified by the Agency each month.
   b. Subrecipient Contractors shall invoice the Agency on or before the 5th business day of the month for prior month expenditures. The Agency may extend these dates on a case-by-case basis if the Subrecipient Contractor reports a hardship. However, the Agency will not accept, process, or pay invoices submitted fifteen (15) days or more after the deadline(s) until the next reimbursement cycle if within the fiscal year. The Subrecipient Contractor shall submit to the Agency utilizing OAA-SYS system provided by the Agency.
   c. Supporting documentation to validate reported expenses to include general ledger, purchase orders, and invoices.
   d. Quarterly financial reports, to include approved budget, year-to-date expenses, year-to-date revenue, are due by the 15th business day of the month following the end of the quarter.
   e. Quarterly program narrative reports by the 15th business day of the month following the end of the quarter.
10. This agreement does not guarantee a total level of reimbursement other than for individual units/services authorized, contingent upon availability of Federal funds.
11. Subrecipient Contractor employees shall not solicit nor accept gifts or favors of monetary value by or on behalf of clients as a gift, reward, or payment.

B. The Agency further abides to:
   1. Review and process consumer intake and assessment documents completed by the Subrecipient Contractor, as applicable, to determine eligibility for service provision.
   2. Maintain communication and correspondence concerning consumers' status.
   3. Provide timely consultation and technical assistance to the Subrecipient Contractor as requested and as available.

4. Conduct quality-assurance procedures, which may include on-site visits, monitoring, and/or compliance assessments to ensure health, safety, and quality services are being provided.
5. Provide written policy, procedures and standard documents concerning client authorization to release information (both a general and medical/health related release), ability to contribute to the cost of services provided, quality survey instrument, and complaints/grievances and appeals to all consumers.
6. Employ a full-time manager and financial individual to oversee funds contracted through Non-Metro AAA.

3. ASSURANCES

A. *Americans with Disabilities Act of 1990 –*
The Subrecipient Contractor shall comply with the requirements, established under the Americans with Disabilities Act, in meeting statutory deadlines under the Act as they pertain to operation for employment, public accommodations, transportation, state and local government operations and telecommunications.

B. *Section 504 of the Rehabilitation Act of 1973 –*
The Subrecipient Contractor shall provide that each program activity, when viewed in its entirety, is readily accessible to and usable by persons with disabilities in keeping with 45 CFR, Part 84.11, etc. Seq., and as provided for in Section 504 of the Rehabilitation Act of 1974, as amended. When structural changes are required, these changes shall be in keeping with 45 CFR, Part 74. The Subrecipient Contractor shall ensure that benefits and services available under the agreement are provided in a non-discriminatory manner as required by Title VI of the Civil Rights Act of 1964, as amended.

C. *Age Discrimination in Employment Act of 1967 –*
The Subrecipient Contractor shall comply with the Age Discrimination in Employment Act of 1967 (29 USC 621, etc. Seq.).

D. *Drug Free Workplace*
The Subrecipient Contractor shall comply with the Drug-Free Workplace Act of 1988.

E. *Certification Regarding Debarment*
The Subrecipient Contractor shall certify annually that it is not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded by any Federal department or agency.

F. *Financial Management*
The Subrecipient Contractor must implement financial management standards in accordance with the Federal standards outlined in the United States Department

of Health and Human Services Federal Regulation 45 CFR Part 75, 2 CFR Uniform Grants Guidance Part 200 and New Mexico Fiscal Requirements.

G. *Budget Adjustment*

The Subrecipient Contractor shall submit to the Agency, as necessary, any budget adjustment request(s) for review and approval. Under no circumstances may budget adjustment request(s) be submitted to the Agency later than March 15th unless authorized by the Agency in writing. The Agency shall review and approve or deny budget adjustment request(s) at its sole discretion.

H. *Incentive Compensation*

Use of federal and state funds for incentive compensation to employees based on cost reduction, efficient performance, suggestion awards, safety awards, etc. is un-allowable and will not be recognized by the Agency as a reimbursable expense. The use of federal or state funds for staff recognition or employee gifts is also unallowable.

I. *Independent Audit*

The Subrecipient contractor shall provide a financial and compliance audit report(s) to the Agency covering the period of October 1, 2023, through June 30, 2024. The Subrecipient Contractor is considered an independent contractor and is subject to audit requirements under Title 2, Subtitle A, Chapter II, Part 200 of Code of Federal Regulations and Government Audit Standards, regardless of the amount of federal funding the Subrecipient Contractor receives.

1. The Audit report(s) provided to the Agency must include a copy of the Auditor's management letter.
2. The audit report shall include a schedule of administrative and program expenses for each separate federal title or program (Title IIIB, Title IIIC-1, Title IIIC-2, Title IIID, Title IIIE, NSIP, etc.), which facilitates a reconciliation of audited costs to the final report.
3. Submittal of the audit report for government entities shall be within ten (10) working days after release by the New Mexico State Auditor's Office. For non-governmental entities, the audit report is due four (4) months after the end of the entity's fiscal year.

J. *Equal Opportunity Compliance*

The Subrecipient Contractor agrees to abide by all federal and state laws, rules, regulations, and executive orders of the Governor of the State of New Mexico, pertaining to equal employment opportunity. In accordance with all such laws of the State of New Mexico, the Subrecipient Contractor agrees to assure that no person in the United States shall, on the grounds of race, religion, color, national origin, ancestry, sex, age, physical or mental handicap, or serious medical condition, spousal affiliation, sexual orientation or gender identity, be excluded from employment with or participation in, be denied the benefits of, or be

otherwise subjected to discrimination under any program or activity performed under this Agreement. If Subrecipient Contractor is found not to be in compliance with these requirements during the life of this Agreement, Subrecipient Contractor agrees to take appropriate steps to correct these deficiencies.

K. *Compliance with Aging and Long-Term Services Department Functions.*
The Subrecipient Contractor shall perform in accordance with the Federal Older Americans Act (OAA) and directives of the U.S. Administration on Aging; Rules, regulations, State Plan, policies and procedures established by the Aging and Long-Term Services Department, for the provision of services, and administration of programs funded under the OAA and the New Mexico State Legislature; New Mexico Administrative Code, Title 9, Chapter 2, Parts 1-24; The Aging & Long-Term Services Act, NMSA 1978, Sections 9-23-1 et seq.; The New Mexico Environment Department Food Establishment Rules and Regulations; Dietary Guidelines for Americans; Dietary Reference Intakes (DRIs); the approved Agency Area Plan, Agency Policy and Procedures; the approved Service Plan; State and Federal emergencies and public health/emergency orders enacted by the Governor of the State of New Mexico; Title II Part 200 of the Code of Federal Regulations; and the terms and conditions of this Agreement.

L. *Non-Discrimination Service Delivery.*
The Subrecipient Contractor, in determining (a) the services or other benefits provided under this Agreement, (b) the class of individuals to whom, or situation in which such services or other benefits will be provided under this program, or (c) the class of individuals to be afforded an opportunity to participate in the program, will not utilize criteria or methods of administration which have the effect of subjecting individuals to discrimination because of their race, religion, color, national origin, ancestry, sex, sexual preference, age or handicap, or have the effect of defeating or substantially impairing accomplishment of the objectives of the program in respect to individuals of a particular race, religion, color, national origin, ancestry, sex, sexual preferences, age or handicap.

M. *Targeting and Outreach.*
The Subrecipient Contractor shall engage in targeting and outreach activities, as required by the OAA, to all potential recipients of services as referenced in section 2.A.2. The Subrecipient Contractor shall conduct ongoing community outreach to assess needs and inform potential recipients of available services. The Subrecipient Contractor shall report all activities in its quarterly program reports submitted to the Agency.

N. *Consumer Feedback.*
The Subrecipient Contractor shall utilize the standardized survey instrument to obtain and evaluate consumer opinions of the quality of services received.

O. *Emergency Preparedness Requirements.*
The Subrecipient Contractor shall monitor and notify the Agency of any situation which has the potential to be an emergency in which older adults or adults with disabilities may be adversely affected.

a. Subrecipient Contractor shall complete and submit the Agency's Contingency & Emergency Preparedness Response Plan annually.
b. Subrecipient Contractor shall provide and update emergency contact information for all emergency management personnel in a format provided by the Agency; currently contained within the Contingency & Emergency Preparedness Response Plan.
c. Subrecipient Contractor agrees to notify the Agency of service modifications in the event of a holiday, emergency, or other situation as soon as those service modifications are known.
d. Subrecipient Contractor agrees to notify the Agency of emergency situations and events as soon as they are known, regardless of service modification.
e. Subrecipient Contractor shall ensure continuation of services during emergency events to the extent possible and will request assistance from the Agency in the event it cannot perform this requirement.
f. Subrecipient Contractor agrees to perform well-check calls to consumers during emergency events, regardless of the open or closed status of facilities and services. Subrecipient Contractor agrees to utilize well-check call scripts and systems provided by the Agency in this process. Subrecipient Contractor will request assistance from the Agency in the event it cannot perform this requirement.

4. TERM

This Agreement shall begin on October 1, 2023, and terminate on June 30, 2024, unless terminated pursuant to Paragraph 5, below or for any other reason allowed by law.

5. TERMINATION

A. This Agreement may be terminated by the Agency without cause upon written notice delivered to the Subrecipient Contractor at least thirty (30) days prior to the intended date of termination. By such termination, neither party may nullify obligations already incurred for performance prior to the date of termination. This Agreement may be terminated immediately, upon written notice to the Subrecipient Contractor, if the Subrecipient Contractor becomes unable to perform the services contracted for, as determined by the Agency, or if, during the term of this Agreement, the Subrecipient Contractor or any of its officers, employees or agents is indicted for fraud, embezzlement or other crime due to misuse of state funds or due to the Appropriations paragraph herein, or if the Subrecipient Contractor fails to comply with any of the terms contained herein or is in breach of this Agreement as set forth in Paragraph 6, below. This provision is not exclusive and does not waive the Agency's

other legal rights and remedies caused by the Subrecipient Contractor's default or breach of this Agreement. This Agreement may also be terminated by the Subrecipient Contractor upon thirty (30) days written notice to the Agency.

B. Termination Management. Immediately upon receipt of notice of termination of this Agreement by either the Agency or the Subrecipient Contractor, the Subrecipient Contractor shall: 1) not incur any further obligations for salaries, services or any other expenditure of funds under this Agreement without written approval of the Agency; 2) comply with all directives issued by the Agency in the notice of termination as to the performance of work under this Agreement; and 3) take such action as the Agency shall direct for the protection, preservation, retention or transfer of all property titled to the Agency and client records generated under this Agreement and any non-expendable personal property or equipment purchased by the Subrecipient Contractor with contract funds shall become property of the Agency upon termination. On the date the notice of termination is received, the Subrecipient Contractor shall furnish to the Agency a complete, detailed inventory of non-expendable personal property purchased with funds provided under the existing and previous Agency agreements with the Subrecipient Contractor; the property listed in the inventory report including client records and a final closing of the financial records and books of accounts which were required to be kept by the Subrecipient Contractor under the paragraph of this Agreement regarding financial records.

6. BREACH OF AGREEMENT BY SUBRECIPIENT CONTRACTOR

A. In addition to the breach of any term, provision, covenant, agreement, or obligation of Subrecipient Contractor contained in this Agreement, the following constitute a breach of Subrecipient Contractor's obligations and duties hereunder:

1. The Subrecipient Contractor's failure to provide proof of insurance coverage sufficient to meet the requirements of this Agreement or any applicable federal, state, or local laws, rules, or regulations.
2. The Subrecipient Contractor's failure to adequately safeguard its assets in such a manner that would adversely impact the interests of the intended recipients of the
services to be performed, hereunder, and jeopardize their receipt of such services.
3. Unless otherwise duly authorized in writing by the Agency, the Subrecipient Contractor's failure to meet line-item budgetary ceilings set forth in its approved budget for delivering the services contemplated hereunder.

B. Upon a determination by the Agency that the Subrecipient Contractor shall be in breach of this Agreement, the Agency shall provide written notice to the Subrecipient Contractor specifying the facts and circumstances constituting the breach(es) and advising the Subrecipient Contractor that such breach(es) must be cured to the Agency's satisfaction within thirty (30) days from the date of such written notice. If

such cure is not timely made, then the Agency may elect to implement one or more of the following intermediate sanctions:

1. The Agency may install a program monitor for a specified time period to closely observe the Subrecipient Contractor's efforts to comply with obligations remaining under this Agreement. Unless otherwise deemed confidential under applicable law, such monitor shall have authority to review any or all the Subrecipient Contractor's records, policies, procedures, and financial records germane to the Subrecipient Contractor's delivery of the services contemplated by this Agreement. Such monitor may also serve as a consultant to the Subrecipient Contractor to advise on the correction of the determined deficiencies. All costs associated with the Agency's selection and installation of such monitor shall be paid from the state and federal funds awarded to the Subrecipient Contractor hereunder.
2. The Agency may appoint a temporary manager who shall have primary responsibility to oversee the operation of the Subrecipient Contractor's services contemplated by this Agreement. All costs associated with the Agency's selection and installation of such a temporary manager shall be paid from the compensation awarded to the Subrecipient Contractor.
3. The Agency may deem the Subrecipient Contractor ineligible for the receipt of any additional funds to be paid to Subrecipient Contractor hereunder.
4. The Agency may cancel, terminate, or suspend this Agreement in whole or in part.
5. In addition to other remedies available to the Agency hereunder, the Agency may, in its discretion, establish a period of probation with specific objectives to be accomplished by the Subrecipient Contractor hereunder, or to be in compliance with applicable policies, procedures, laws, and regulations.
6. The Agency may pursue any other remedy as may be provided under applicable law.

7. APPROPRIATIONS

The terms of this Agreement are contingent upon sufficient appropriations and authorization being made by the Legislature of New Mexico and utilized by the Agency for the performance of this Agreement. If sufficient appropriations and authorization are not made by the Legislature, this Agreement shall terminate immediately upon written notice being given by the Agency to the Subrecipient Contractor. The Agency's decision as to whether sufficient appropriations are available shall be accepted by the Subrecipient Contractor and shall be final. If the Agency proposes an amendment to the Agreement to unilaterally reduce funding, the Subrecipient Contractor shall have the option to terminate the Agreement or agree to the reduced funding, within thirty (30) days of receipt of the proposed amendment.

8. STATUS OF SUBRECIPIENT CONTRACTOR

The Subrecipient Contractor, its agents, and employees are independent contractors performing professional services for the Agency and are not employees of the Agency. The Subrecipient Contractor, its agents and employees shall not accrue leave, retirement, insurance, bonding, use of Agency vehicles, or any other benefits afforded to employees of the Agency as a result of this Agreement. The Subrecipient Contractor acknowledges that all sums received hereunder are reportable for income tax purposes.

9. ASSIGNMENT

The Subrecipient Contractor shall not assign or transfer any interest in this Agreement, assign any claims for money due, or to become due under this Agreement, without the prior written approval of the Agency.

10. SUBCONTRACTING

The Subrecipient Contractor shall not subcontract any portion of the services to be performed under this Agreement without the prior written approval of the Agency.

11. RELEASE

Final payment of the amounts due under this Agreement shall operate as a release of the Agency, its officers and employees, and the State of New Mexico from all liabilities, claims and obligations, whatsoever arising from or under this Agreement. The Subrecipient Contractor agrees not to purport to bind the Agency to any obligation not assumed herein unless the Subrecipient Contractor has express written authority to do so, and then only within the strict limits of that authority.

12. CONFIDENTIALITY

Any information provided to or developed by the Subrecipient Contractor in the performance of this Agreement shall be kept confidential and shall not be made available to any individual or organization, by the Subrecipient Contractor without the prior written approval of the Agency. Disclosure of confidential information shall only be made in accordance with the Inspection of Public Records Act or the applicable state or federal laws or regulations. Subrecipient Contractor shall establish a method to guarantee the confidentiality of all information relating to clients in accordance with applicable federal, state and local laws, rules and regulations, as well as the terms of this Agreement. However, this provision shall not be construed as limiting the rights of the Agency or any other federal or state authorized representative to access client case records or other information relating to clients served under this Agreement.

13. PRODUCT OF SERVICE – COPYRIGHT

All materials developed or acquired, by the Subrecipient Contractor, under this Agreement, shall become the property of the Agency and shall be delivered to the Agency no later than the termination date of this Agreement. Nothing produced, in whole or in part, by the Subrecipient Contractor, under this Agreement, shall be the subject of an application for copyright or other claim of ownership, by or on behalf, of the Subrecipient Contractor.

effect and retain them for a period of three (3) years from the date of final payment under this Agreement. The records shall be subject to inspection by the Agency, the Department of Finance and Administration and the State Auditor. The Agency shall have the right to audit billings both before and after payment. Payment under this Agreement shall not foreclose the right of the Agency to recover excessive or illegal payments. If, pursuant to this Agreement, the Subrecipient Contractor receives federal funds subject to the Single Audit Act, the Subrecipient Contractor shall submit to the Agency an audit conducted by a certified public accountant in compliance with the Single Audit Act.

21. INDEMNIFICATION

Neither party shall be responsible for liability incurred as a result of the other party's acts or omissions in connection with this Agreement. Any liability incurred in connection with this Agreement is subject to the immunities and limitation of the New Mexico Tort Claims Act.

22. INTERNAL DISPUTE MEDIATION

The Subrecipient Contractor shall attempt to resolve all disputes with participants by negotiation in good faith and with such mediators as may be acceptable to the parties involved. The Subrecipient Contractor shall implement an internal grievance policy with procedures in place to effectively and fairly negotiate and resolve disputes with participants. The Subrecipient Contractor must provide all participants with notice, at the commencement of the contract year, that disputes may be resolved in this manner. If negotiation and mediation through the grievance procedure fail, any party may submit the dispute to the ALTSD in accordance with the following provisions:

1. In any dispute submitted, the Agency and the Subrecipient Contractor hereby agree and consent to the ALTSD mediation of the dispute.
2. Mediation may only be instituted by written request, which request shall include a statement of the matter in controversy.
3. Initial contacts and negotiations shall be conducted by the appropriate Agency staff.
4. Any resolution of the matter shall be binding and final on the Subrecipient Contractor and the Subrecipient Contractor hereby agrees to be bound by said resolution.
5. Failure of the Subrecipient Contractor to resolve any dispute pursuant to the procedures set forth herein or to comply with a resolution ordered by the ALTSD shall amount to a material breach of Agreement.
6. Internal Dispute Mediation does not supersede the appeal hearing policies and procedures.

23. PARTICIPANT GRIEVANCE

The Subrecipient Contractor will establish a system through which applicants for, and recipients of services, may present grievances about the operation of the service program. The Subrecipient Contractor will advise applicants and recipients of their right to appeal denial of service and their right to a fair hearing of these respects. The Subrecipient Contractor shall notify the Agency of termination of services, to a client, as part of a monthly service report, on any

services funded by this Agreement. The Agency reserves the right to perform follow-up investigations with the client to determine adequate performance and adherence to due process.

24. KEY PERSONNEL

The Agency shall be notified of changes in, and must concur with the selection process for, Key Personnel. The Agency considers the following positions as Key Personnel:

1. Program Director
2. Financial Manager

The Subrecipient Contractor will maintain full-time Key Personnel throughout the term of this agreement.

25. INVALID TERM OR CONDITION

If any term or condition of this Agreement shall be held invalid or unenforceable, the remainder of this Agreement shall not be affected and shall be valid and enforceable.

26. ENFORCEMENT OF AGREEMENT

A party's failure to require strict performance of any provision of this Agreement shall not waive or diminish that party's right thereafter to demand strict compliance with that or any other provision. No waiver by a party of any of its rights under this Agreement shall be effective unless express and in writing, and no effective waiver by a party of any of its rights shall be effective to waive any other rights.

27. NOTICES

Any notice required to be given to either party by this Agreement shall be in writing and shall be delivered in person, by courier service or by U.S. mail, either first class or certified, return receipt requested, postage prepaid, as follows:

AGENCY:
NCNMEDD Non-Metro AAA
Neil Segotta, AAA Director
3900 Paseo Del Sol
Santa Fe, NM 87507

SUBRECIPIENT CONTRACTOR:
City of Las Cruces
Gabriela M. Prats, Grant Manager
P. O. Box 20000
Las Cruces, NM 88004

28. INSURANCE

The Subrecipient Contractor shall secure and maintain, during the term of this Agreement, at its own expense, comprehensive and general public liability insurance and/or other types of insurance as the Agency may require. The Subrecipient Contractor shall secure and maintain, during the term of this Agreement, at its own expense, workers' compensation insurance in the amounts required by the applicable laws of the State of New Mexico covering the Subrecipient Contractor's employees. ~~All policies of liability insurance that Subrecipient Contractor is obligated to maintain, according to this Agreement, except for any policy of workers' compensation insurance, shall name Agency as an additional insured.~~ The Subrecipient Contractor shall furnish to the Agency, directly from its insurance carrier, a memorandum or certification of all insurance carried before the payment of any monies as consideration for the

services rendered hereunder shall be made. Upon such certificates and/or memoranda being furnished to the Agency, the same shall be annexed to this Agreement and by reference made a part hereof.

29. AUTHORITY

The individual(s) signing this Agreement on behalf of Subrecipient Contractor represents and warrants that he or she has the power and authority to bind Subrecipient Contractor, and that no further action, resolution, or approval from Subrecipient Contractor is necessary to enter into a binding contract.

30. SIGNATURES

For the faithful performance of the terms of this agreement, the parties affix their signatures and bind themselves effective October 1, 2023.

STATE OF NEW MEXICO
AGING AND LONG-TERM SERVICES DEPARTMENT
FUND 89200 CAPITAL APPROPRIATION PROJECT

THIS AGREEMENT is made and entered into as of this 19th day of April, 2024, by and between the Aging and Long-Term Services Department, hereinafter called the "Department" or abbreviation such as "ALTSD", and City of Las Cruces, hereinafter called the "Grantee". This Agreement shall be effective as of the date it is executed by the Department.

RECITALS

WHEREAS, in the Laws of 2023, Chapter 199, Section, Paragraph 16, the Legislature made an appropriation to the Department, funds from which the Department is making available to the Grantee pursuant to this Agreement; and

WHEREAS, the Department is granting to Grantee, and the Grantee is accepting the grant of, funds from this appropriation, in accordance with the terms and conditions of this Agreement; and

WHEREAS, State Agency on Aging (28-4-1 to 28-4-9 NMSA 1978): successor agency, Aging and Long-Term Services Department (9-23-1 to 9-23-12 NMSA 1978) may enter into grants and contracts as appropriated by law.

AGREEMENT

NOW, THEREFORE, in consideration of the mutual covenants and obligations contained herein, the parties hereby mutually agree as follows:

ARTICLE I. PROJECT DESCRIPTION, AMOUNT OF GRANT AND REVERSION DATE

A. The project that is the subject of this Agreement is described as follows:

A23H-2019 $1,636,200.00 APPROPRIATION REVERSION DATE: 30-JUN-2027
Laws of 2023, Chapter 199, Section 4, Paragraph 14, one million six hundred thirty-six thousand two hundred dollars, $1,636,200.00, to plan, design, construct, equip and furnish the Robert P. Munson senior center in Las Cruces in Dona Ana County.

The Grantee's total reimbursements shall not exceed one million six hundred thirty-six thousand two hundred dollars $1,636,200.00 (the "Appropriation Amount") minus the allocation for Art in Public Places ("AIPP amount")[1], if applicable, sixteen thousand three hundred sixty-two dollars $16,362, which equals one million six hundred nineteen thousand eight hundred thirty eight dollars $1,619,838.00 (the "Adjusted Appropriation Amount").

[1] The AIPP amount is "an amount of money equal to one percent or two hundred thousand dollars ($200,000), whichever is less, of the amount of money appropriated for new construction or any major renovation exceeding one hundred thousand dollars ($100,000)." Section 13-4A-4 NMSA 1978.

In the event of a conflict among the Appropriation Amount, the Reversion Date, as defined herein and/or the purpose of the Project, as set forth in this Agreement, and the corresponding appropriation language in the laws cited above in this Article I(A), the language of the laws cited herein shall control.
This project is referred to throughout the remainder of this Agreement as the "Project"; the information contained in Article I(A) is referred to collectively throughout the remainder of this Agreement as the "Project Description." Attachment A sets forth additional or more stringent requirements and conditions, which are incorporated by this reference as if set forth fully herein. If Optional Attachment A imposes more stringent requirements than any requirement set forth in this Agreement, the more stringent requirements of Attachment A shall prevail, in the event of irreconcilable conflict. The Grantee shall reference the Project's number in all correspondence with and submissions to the Department concerning the Project, including, but not limited to, Requests for Payment and reports.

ARTICLE II. LIMITATION ON DEPARTMENT'S OBLIGATION TO MAKE GRANT DISBURSEMENT TO GRANTEE

A. Upon the Effective Date of this Agreement, for permissible purposes within the scope of the Project Description, the Grantee shall only be reimbursed monies for which the Department has issued, and the Grantee has received a Notice of Department's Obligation to Reimburse[2] Grantee (hereinafter referred to as "Notice of Obligation"). This Grant Agreement and the disbursement of any and all amounts of the above referenced Adjusted Appropriation Amount are expressly conditioned upon the following:

(i) Irrespective of any Notice of Obligation, the Grantee's expenditures shall be made on or before the Reversion Date and, if applicable, an Early Termination Date (i.e., the goods have been delivered and accepted or the title to the goods has been transferred to the Grantee and/or the services have been rendered for the Grantee); and

(ii) The total amount received by the Grantee shall not exceed the lesser of: (a) the Adjusted Appropriation Amount identified in Article I(A) herein or (b) the total of all amounts stated in the Notice(s) of Obligation evidencing that the Department has received and accepted the Grantee's Third-Party Obligation(s), as defined in subparagraph iii of this Article II(A); and

(iii) The Grantee's expenditures were made pursuant to the State Procurement Code and execution of binding written obligations or purchase orders with third party contractors or vendors for the provision of services, including professional services, or the purchase of tangible personal property and real property for the Project, hereinafter referred to as "Third Party Obligations"; and

(iv) The Grantee's submittal of timely Requests for Payment in accordance with the procedures set forth in Article IX of this Agreement; and

(v) In the event that capital assets acquired with Project funds are to be sold, leased, or licensed to or operated by a private entity, the sale, lease, license, or operating agreement:

   a. must be approved by the applicable oversight entity (if any) in accordance with law; or
   b. if no oversight entity is required to approve the transaction, the Department must approve the transaction as complying with law.

Prior to the sale, lease, license, or operating agreement being approved pursuant to Articles II(A)(v)(a) and II(A)(v)(b) herein, the Department may, in its sole and absolute discretion and unless inconsistent with State Board of Finance imposed conditions, reimburse the Grantee for necessary expenditures

[2] "Reimburse" as used throughout this Agreement includes Department payments to the Grantee for invoices received, but not yet paid, by the Grantee from a third party contractor or vendor, if the invoices comply with the provisions of this Agreement and are a valid liability of the Grantee.

incurred to develop the Project sufficiently to make the sale, lease, license, or operating agreement commercially feasible, such as plan and design expenditures; and

(vi) The Grantee's submission of documentation of all Third Party Obligations and amendments thereto (including terminations) to the Department and the Department's issuance and the Grantee's receiving of a Notice of Obligation for a particular amount in accordance with the terms of this Agreement shall be governed by the following:

a. The Grantee shall submit to the Department one copy of all Third Party Obligations and amendments thereto (including terminations) as soon as possible after execution by the Third Party **but prior to execution by the Grantee.**

b. Grantee acknowledges and agrees that if it chooses to enter into a Third Party Obligation prior to receiving a Notice of Obligation that covers the expenditure, it is solely responsible for such obligations.

c. The Department may, in its sole and absolute discretion, issue to Grantee a Notice of Obligation for the particular amount of that Third Party Obligation that only obligates the Department to reimburse Grantee's expenditures made on or before the Reversion Date or an Early Termination Date. The current Notice of Obligation form is attached to this Agreement as Exhibit 2.

d. The date the Department signs the Notice of Obligation is the date that the Department's Notice of Obligation is effective. After that date, the Grantee is authorized to budget the particular amount set forth in the Notice of Obligation, execute the Third Party Obligation and request the Third Party to begin work. Payment for any work performed or goods received prior to the effective date of the Notice of Obligation is wholly and solely the obligation of the Grantee.

B. The Grantee shall implement, in all respects, the Project. The Grantee shall provide all necessary qualified personnel, material, and facilities to implement the Project. The Grantee shall finance its share (if any) of the costs of the Project, including all Project overruns.

C. Project funds shall not be used for purposes other than those specified in the Project Description.

D. Unless specifically allowed by law, Project funds cannot be used to reimburse Grantee for indirect Project costs.

ARTICLE III. NOTICE PROVISIONS AND GRANTEE AND DEPARTMENT DESIGNATED REPRESENTATIVES

Whenever written notices, including written decisions, are to be given or received, related to this Agreement, the following provisions shall apply.

The Grantee designates the person(s) listed below, or their successor, as their official representative(s) concerning all matters related to this Agreement:

Grantee: City of Las Cruces
Name: Sonia Saldana
Title: Project Manager
Address: 700 N Main St. Las Cruces, NM 88001
Email: ssaldana@lascruces.gov

Telephone: 575-541-2464
The Grantee designates the person(s) listed below, or their successor, as their Fiscal Officer or Fiscal Agent concerning all matters related to this Agreement:

Grantee: City of Las Cruces
Name: Gabriela Prats
Title: Grants Manager
Address: 700 N Main St. Las Cruces, NM 88001
Email: grants@lascruces.gov
Telephone: 575-541-2430

The Department designates the persons listed below, or their successors, as the Points of Contact for matters related to this Agreement.

Department: Aging and Long-Term Services Department
Name: Sarah Jacobs
Title: Deputy Cabinet Secretary
Address: 2550 Cerrillos Road, Santa Fe, NM 87505
Email: sarah.jacobs@altsd.nm.gov
Telephone: 505-303-8684

The Grantee and the Department agree that either party shall send all notices, including written decisions, related to this Agreement to the above-named persons by email or regular mail. In the case of mailings, notices shall be deemed to have been given and received upon the date of the receiving party's actual receipt or five calendar days after mailing, whichever shall first occur. In the case of email transmissions, the notice shall be deemed to have been given and received on the date reflected on the delivery receipt of email.

ARTICLE IV. REVERSION DATE, TERM, DEADLINE TO EXPEND FUNDS

A. As referenced in Article I(A), the applicable law establishes a date by which Project funds must be expended by Grantee, which is referred to throughout the remainder of this Agreement as the "Reversion Date." Upon being duly executed by both parties, this Agreement shall be effective as of the date of execution by the Department. It shall terminate on June 30, 2027, the Reversion Date unless Terminated Before Reversion Date ("Early Termination") pursuant to Article V herein.

B. The Project's funds must be expended on or before the Reversion Date and, if applicable, Early Termination Date of this Agreement. For purposes of this Agreement, it is not sufficient for the Grantee to encumber the Project funds on its books on or before the Project's Reversion Date or Early Termination Date. Funds are expended and an expenditure has occurred as of the date that a particular quantity of goods are delivered to and received by the Grantee or title to the goods is transferred to the Grantee and/or as of the date particular services are rendered for the Grantee. Funds are ***not*** expended, and an expenditure has ***not*** occurred as of the date they are encumbered by the Grantee pursuant to a contract or purchase order with a third party.

ARTICLE V. EARLY TERMINATION

A. Early Termination Before Reversion Date Due to Completion of the Project or Complete Expenditure of the Adjusted Appropriation or Violation of this Agreement

Early Termination includes:

(i) Termination due to completion of the Project before the Reversion Date; or
(ii) Termination due to complete expenditure of the Adjusted Appropriation Amount before the Reversion Date; or
(iii) Termination for violation of the terms of this Agreement; or
(iv) Termination for suspected mishandling of public funds, including but not limited to, fraud, waste, abuse, and conflicts of interest.

Either the Department or the Grantee may early terminate this Agreement prior to the Reversion Date by providing the other party with a minimum of fifteen (15) days' advance, written notice of early termination. Grantee hereby waives any rights to assert an impairment of contract claim against the Department or the State of New Mexico in the event of Early Termination of this Agreement by the Department pursuant to Article V(A).

B. Early Termination Before Reversion Date Due to Non-appropriation

The terms of this Agreement are expressly made contingent upon sufficient appropriations and authorization being made by the Legislature of New Mexico for the performance of this Agreement. Throughout this Agreement the term "non-appropriate" or "non-appropriation" includes the following actions by the New Mexico Legislature: deauthorization, reauthorization or revocation of a prior authorization. The Legislature may choose to non-appropriate the Appropriation referred to in Article I and, if that occurs, the Department shall early terminate this Agreement for non-appropriation by giving the Grantee written notice of such termination, and such termination shall be effective as of the effective date of the law making the non-appropriation. The Department's decision as to whether sufficient appropriations or authorizations are available shall be accepted by the Grantee and shall be final. Grantee hereby waives any rights to assert an impairment of contract claim against the Department or the State of New Mexico in the event of Early Termination of this Agreement by the Department pursuant to Article V(B).

C. Limitation on Department's Obligation to Make Grant Disbursements to Grantee in the Event of Early Termination

In the event of Early Termination of this Agreement by either party, the Department's sole and absolute obligation to reimburse the Grantee is expressly conditioned upon the limitations set forth Article II.

ARTICLE VI. SUSPENSION OF NEW OR FURTHER OBLIGATIONS

A. The Department may choose, in its sole and absolute discretion, to provide written notice to the Grantee to suspend entering into new and further obligations. Upon the receipt of such written notice by the Grantee:

(i) The Grantee shall immediately suspend entering into new or further written obligations with third parties; and
(ii) The Department will suspend the issuance of any new or further Notice of Obligation under this Agreement; and
(iii) The Department may direct the Grantee to implement a corrective action plan in accordance with Article VI(D) herein.

B. In the event of Suspension of this Agreement, the Department's sole and absolute obligation to reimburse the Grantee is expressly conditioned upon the limitations set forth in Article II herein.

C. A suspension of new or further obligations under this Agreement shall remain in effect unless or until the date the Grantee receives written notice given by the Department informing the Grantee that the Suspension has been lifted or that the Agreement has been Early Terminated in accordance with Article V herein. If the Suspension is lifted, the Department will consider further requests for Notice of Obligation.

D. Corrective Action Plan in the Event of Suspension

In the event that the Department chooses, in its sole and absolute discretion to direct the Grantee to suspend entering into new or further written obligations with third parties pursuant to Article VI(A), the Department may, but is not obligated to, require the Grantee to develop and implement a written corrective action plan to remedy the grounds for the Suspension. Such corrective action plan must be approved by the Department and be signed by the Grantee. Failure to sign a corrective action plan or meet the terms and deadlines set forth in the signed corrective action plan, is hereby deemed a violation of the terms of this Agreement for purposes of Early Termination, Article V(A)(iii). The corrective action plan is in addition to, and not in lieu of, any other equitable or legal remedy, including but not limited to Early Termination.

ARTICLE VII. AMENDMENT

This Agreement shall not be altered, changed, or amended except by instrument in writing duly executed by both the parties hereto.

ARTICLE VIII. REPORTS

A. Database Reporting

The Grantee shall report quarterly Project activity by entering such Project information as the Department and the Department of Finance and Administration may require, such information entered directly into a database maintained by the Department of Finance and Administration (Budget & Formulation Management System). Additionally, the Grantee shall certify on the Request for Payment form (Exhibit 1) that updates have been maintained and are current in the database. The Grantee hereby acknowledges that failure to perform and/or certify updates into the database will delay or potentially jeopardize the reimbursement of funds. The Department shall give Grantee a minimum of thirty (30) days' advance written notice of any changes to the information the Grantee is required to report.

Quarterly reports shall be due on the last day of the month that is 30 days prior to the end of the quarter following execution of this Agreement by the Department and ending during the quarter of the submission of the final request for reimbursement for the Project, or the following quarter.

B. Requests for Additional Information/Project Inspection

During the term of this Agreement and during the period of time during which the Grantee must maintain records pursuant to Article VIII, the Department may:

(i) request such additional information regarding the Project as it deems necessary; and

(ii) conduct, at reasonable times and upon reasonable notice, onsite inspections of the Project.

Grantee shall respond to such requests for additional information within a reasonable period of time, as established by the Department.

ARTICLE IX. REQUEST FOR PAYMENT PROCEDURES AND DEADLINES

A. The Grantee shall request payment by submitting a Request for Payment, in the form attached hereto as Exhibit 1. Payment requests are subject to the following procedures:

(i) The Grantee must submit a Request for Payment; and

(ii) Each Request for Payment must contain proof of payment by the Grantee or liabilities incurred by the Grantee showing that the expenditures are valid or are liabilities incurred by the Grantee in the form of actual unpaid invoices received by the Grantee for services rendered by a third party or items of tangible personal property received by the Grantee for the implementation of the Project; provided, however, that the Grantee may be reimbursed for unpaid liabilities only if the Department, in its sole and absolute discretion, agrees to do so and in accordance with any special conditions imposed by the Department.

(iii) In cases where the Grantee is submitting a Request for Payment to the Department based upon invoices received, but not yet paid, by the Grantee from a third party contractor or vendor, if the invoices comply with the provisions of this Agreement and are a valid liability of the Grantee, the Grantee shall make payment to those contractors or vendors within five (5) business days from the date of receiving reimbursement from the Department or such shorter period of time as the Department may prescribe in writing. The Grantee is required to certify to the Department proof of payment to the third-party contractor or vendor within ten (10) business days from the date of receiving reimbursement from the Department.

B. The Grantee must obligate 5% of the Adjusted Appropriation Amount within six months of acceptance of the grant agreement and must have expended no less than 85% of the Adjusted Appropriation Amount six months prior to the reversion date.

C. **Deadlines**

Requests for Payments shall be submitted by Grantee to the Department on the earlier of:

(i) Immediately as they are received by the Grantee but at a minimum thirty (30) days from when the expenditure was incurred, or liability of the Grantee was approved as evidenced by an unpaid invoice received by the Grantee from a third party contractor or vendor; or

(ii) Twenty (20) days from date of Early Termination; or

(iii) Twenty (20) days from the Reversion Date.

D. The Grantee's failure to abide by the requirements set forth in Article II and Article IX herein will result in the denial of its Request for Payment or will delay the processing of Requests for Payment. The Department has the right to reject a payment request for the Project unless and until it is satisfied that the expenditures in the Request for Payment are for permissible purposes within the meaning of the Project Description and that the expenditures and the Grantee are otherwise in compliance with this Agreement, including but not limited to, compliance with the reporting requirements and the requirements set forth in Article II herein to provide Third Party Obligations and the Deadlines set forth in Article IX herein. The Department's ability to reject any Request for Payment is in addition to, and not in lieu of, any other legal or equitable remedy available to the Department due to Grantee's violation of this Agreement.

ARTICLE X. PROJECT CONDITIONS AND RESTRICTIONS; REPRESENTATIONS AND WARRANTIES

A. The following general conditions and restrictions are applicable to the Project:

(i) The Project's funds must be spent in accordance with all applicable state laws, regulations, policies, and guidelines, including, but not limited to, the State Procurement Code (or local procurement ordinance, where applicable).

(ii) The Project must be implemented in accordance with the New Mexico Public Works Minimum Wage Act, Section 13-4-10 through 13-4-17 NMSA 1978, as applicable. Every contract or project in excess of sixty thousand dollars ($60,000) that the Grantee is a party to for construction, alteration, demolition or repair or any combination of these, including painting and decorating, of public buildings, public works or public roads and that requires or involves the employment of mechanics, laborers or both shall contain a provision stating the minimum wages and fringe benefits to be paid to various classes of laborers and mechanics, shall be based upon the wages and benefits that will be determined by the New Mexico Department of Workforce Solutions to be prevailing for the corresponding classes of laborers and mechanics employed on contract work of a similar nature in the locality. Further, every contract or project shall contain a stipulation that the contractor, subcontractor, employer or a person acting as a contractor shall pay all mechanics and laborers employed on the site of the project, unconditionally and not less often than once a week and without subsequent unlawful deduction or rebate on any account, the full amounts accrued at time of payment computed at wage rates and fringe benefit rates not less than those determined pursuant to Section 13-4-11 (B) NMSA 1978 to be the prevailing wage rates and prevailing fringe benefit rates issued for the project.

(iii) The Project may only benefit private entities in accordance with applicable law, including, but not limited to, Article IX, Section 14 of the Constitution of the State of New Mexico, the "Anti-Donation Clause."

(iv) The Grantee shall not for a period of 10 years from the date of this agreement convert any property acquired, built, renovated, repaired, designed or developed with the Project's funds to uses other than those specified in the Project Description without the Department's and the Board of Finance's express, advance, written approval, which may include a requirement to reimburse the State for the cost of the project, transfer proceeds from the disposition of property to the State, or otherwise provide consideration to the State.

(v) The Grantee shall comply with all federal and state laws, rules and regulations pertaining to equal employment opportunity. In accordance with all such laws, rules and regulations the Grantee agrees to assure that no person shall, on the grounds of race, color, national origin, sex, sexual preference, age or handicap, be excluded from employment with Grantee, be excluded from participation in the Project, be denied benefits or otherwise be subject to discrimination under, any activity performed under this Agreement. If Grantee is found to be not in compliance with these requirements during the life of this Agreement, Grantee agrees to take appropriate steps to correct any deficiencies. The Grantee's failure to implement such appropriate steps within a reasonable time constitutes grounds for terminating this Agreement.

B. The Grantee hereby represents and warrants the following:

(i) The Grantee has the legal authority to receive and expend the Project's funds.

(ii) This Agreement has been duly authorized by the Grantee, the person executing this Agreement has authority to do so, and once executed by the Grantee, this Agreement shall constitute a binding obligation of the Grantee, enforceable according to its terms.

(iii) This Agreement and the Grantee's obligations hereunder do not conflict with any law or ordinance or resolution applicable to the Grantee, the Grantee's charter (if applicable), or any judgment or decree to which the Grantee is subject.

(iv) The Grantee has independently confirmed that the Project Description, including, but not limited to, the amount and Reversion Date, is consistent with the underlying appropriation in law.

(v) The Grantee's governing body has duly adopted or passed as an official act a resolution, motion, or similar action authorizing the person identified as the official representative of the Grantee to sign the Agreement and to sign Requests for Payment.

(vi) The Grantee shall abide by New Mexico laws regarding conflicts of interest, governmental conduct and whistleblower protection. The Grantee specifically agrees that no officer or employee of the local jurisdiction or its designees or agents, no member of the governing body, and no other public official of the locality who exercises any function or responsibility with respect to this Grant, during their tenure or for one year thereafter, shall have any interest, direct or indirect, in any contract or subcontract, or the proceeds thereof, for work to be performed or goods to be received, pursuant to this Grant. Further, Grantee shall require all of its contractors to incorporate in all subcontracts the language set forth in this paragraph prohibiting conflicts of interest.

(vii) No funds have been paid or will be paid, by or on behalf of the Grantee, to any person for influencing or attempting to influence an officer or employee of this or any agency or body in connection with the awarding of any Third Party Obligation and that the Grantee shall require certifying language prohibiting lobbying to be included in the award documents for all subawards, including subcontracts, loans and cooperative agreements. All subrecipients shall be required to certify accordingly.

ARTICLE XI. STRICT ACCOUNTABILITY OF RECEIPTS AND DISBURSEMENTS; PROJECT RECORDS

A. The Grantee shall be strictly accountable for receipts and disbursements relating to the Project's funds. The Grantee shall follow generally accepted accounting principles, and, if feasible, maintain a separate bank account or fund with a separate organizational code, for the funds to assure separate budgeting and accounting of the funds.

B. For a period of six (6) years following the Project's completion, the Grantee shall maintain all Project related records, including, but not limited to, all financial records, requests for proposals, invitations to bid, selection and award criteria, contracts and subcontracts, advertisements, minutes of pertinent meetings, as well as records sufficient to fully account for the amount and disposition of the total funds from all sources budgeted for the Project, the purpose for which such funds were used, and such other records as the Department shall prescribe.

C. The Grantee shall make all Project records available to the Department, the Department of Finance and Administration, and the New Mexico State Auditor upon request. With respect to the funds that are the subject of this Agreement, if the State Auditor or the Department of Finance and Administration finds that any or all of these funds were improperly expended, the Grantee may be required to reimburse to the State of New Mexico, to the originating fund, any and all amounts found to be improperly expended.

ARTICLE XII. IMPROPERLY REIMBURSED FUNDS

If the Department determines that part or all of the Appropriation Amount was improperly reimbursed to Grantee, including but not limited to, Project funds reimbursed to Grantee based upon fraud, mismanagement, misrepresentation, misuse, violation of law by the Grantee, or violation of this Agreement, the Grantee shall return such funds to the Department for disposition in accordance with law.

ARTICLE XIII. LIABILITY

Neither party shall be responsible for liability incurred as a result of the other party's acts or omissions in connection with this Agreement. Any liability incurred in connection with this Agreement is subject to immunities and limitations of the New Mexico Tort Claims Act.

ARTICLE XIV. SCOPE OF AGREEMENT

This Agreement constitutes the entire and exclusive agreement between the Grantee and Department concerning the subject matter hereof. The Agreement supersedes any and all prior or contemporaneous agreements, understandings, discussions, communications, and representations, written or verbal.

ARTICLE XV. REQUIRED NON-APPROPRIATIONS CLAUSE IN CONTRACTS FUNDED IN WHOLE OR PART BY FUNDS MADE AVAILABLE UNDER THIS AGREEMENT

The Grantee acknowledges, warrants, and agrees that Grantee shall include a "non-appropriations" clause in all contracts between it and other parties that are (i) funded in whole or part by funds made available under this Agreement and (ii) entered into after the effective date of this Agreement that states:

"The terms of this Agreement are contingent upon sufficient appropriations and authorization being made by the Legislature of New Mexico for the performance of this Agreement. If sufficient appropriations and authorization are not made by the Legislature, the City of Las Cruces may immediately terminate this Agreement by giving Contractor written notice of such termination. The City of Las Cruces's decision as to whether sufficient appropriations are available shall be accepted by the Contractor and shall be final. Contractor hereby waives any rights to assert an impairment of contract claim against the City of Las Cruces or the Aging and Long-Term Services Department or the State of New Mexico in the event of immediate or Early Termination of this Agreement by the City of Las Cruces or the Department."

ARTICLE XVI. REQUIRED TERMINATION CLAUSE IN CONTRACTS FUNDED IN WHOLE OR PART BY FUNDS MADE AVAILABLE UNDER THIS AGREEMENT

Grantee acknowledges, warrants, and agrees that Grantee shall include the following termination clause in all contracts that are (i) funded in whole or part by funds made available under this Agreement and (ii) entered into after the effective date of this Agreement:

"This contract is funded in whole or in part by funds made available under an Aging and Long-Term Services Department Grant Agreement. Should the Aging and Long-Term Services Department early terminate the grant agreement, the City of Las Cruces may early terminate this contract by providing Contractor written notice of such termination. In the event of termination pursuant to this paragraph, the City of Las Cruces] only liability shall be to pay Contractor for acceptable goods delivered and services rendered before the termination date."

Grantee hereby waives any rights to assert an impairment of contract claim against the Department or the State of New Mexico in the event of Early Termination of this Agreement by the Department.

ARTICLE XVII. COMPLIANCE WITH UNIFORM FUNDING CRITERIA.

A. Throughout the term of this Agreement, Grantee shall:

1. submit all reports of annual audits and agreed upon procedures required by Section 12-6-3(A)-(B) NMSA 1978 by the due dates established in 2.2.2 NMAC, reports of which must be a public record pursuant to Section 12-6-5(A) NMSA 1978 within forty-five days of delivery to the State Auditor;
2. have a duly adopted budget for the current fiscal year approved by its budgetary oversight agency (if any);
3. timely submit all required financial reports to its budgetary oversight agency (if any); and
4. have adequate accounting methods and procedures to expend grant funds in accordance with applicable law and account for and safeguard grant funds and assets acquired by grant funds.

B. In the event Grantee fails to comply with the requirements of Paragraph A of this Article XVII, the Department may take one or more of the following actions:

1. suspend new or further obligations pursuant to Article VI(A) of this Agreement;
2. require the Grantee to develop and implement a written corrective action plan pursuant to Article VI(D) of this Agreement to remedy the non-compliance;
3. impose special grant conditions to address the non-compliance by giving the Grantee notice of such special conditions in accordance with Article III of this Agreement; the special conditions shall be binding and effective on the date that notice is deemed to have been given pursuant to Article III; or
4. terminate this Agreement pursuant to Article V(A) of this Agreement.

ARTICLE XVIII. SEVERANCE TAX BOND AND GENERAL OBLIGATION BOND PROJECT CLAUSES

A. Grantee acknowledges and agrees that the underlying appropriation for the Project is a severance tax bond or general obligation bond appropriation, and that the associated bond proceeds are administered by the New Mexico State Board of Finance (SBOF), an entity separate and distinct from the Department. Grantee acknowledges and agrees that (i) it is Grantee's sole and absolute responsibility to determine through SBOF staff what (if any) conditions are currently imposed on the Project; (ii) the Department's failure to inform Grantee of a SBOF imposed condition does not affect the validity or enforceability of the condition; (iii) the SBOF may in the future impose further or different conditions upon the Project; (iv) all SBOF conditions are effective without amendment of this Agreement; (v) all applicable SBOF conditions must be satisfied before the SBOF will release to the Department funds subject to the condition(s); and (vi) the Department's obligation to reimburse Grantee from the Project is contingent upon the then current SBOF conditions being satisfied.

B. Grantee acknowledges and agrees that the SBOF may in its sole and absolute discretion remove a project's assigned bond proceeds if the project doesn't proceed sufficiently. Entities must comply with the requirement to encumber five percent (5%) of Project funds within six months of bond issuance as certified by the grantee in the Bond Questionnaire and Certification documents submitted to the SBOF. Failure to comply may result in the bond proceeds reassignment to a new ready project. If this should occur this grant agreement will be suspended until the entity has demonstrated readiness as determined by the SBOF and the Department.

C. Grantee acknowledges and agrees that this Agreement is subject to the SBOF's Bond Project Disbursements rule, NMAC 2.61.6, as may be amended or re-codified. The rule provides definitions and interpretations of grant language for the purpose of determining whether a particular activity is allowable under the authorizing language of the agreement.

[THIS SPACE LEFT BLANK INTENTIONALLY]

IN WITNESS WHEREOF, the parties have duly executed this Agreement as of the date of execution by the Department.

1 Administrative and/or Indirect Cost – generally, the legislation authorizing the issuance of bonds prohibits the use of its proceeds for indirect expenses (e.g. penalty fees or damages other than pay for work performed, attorney fees, and administrative fees). Such use of bond proceeds shall not be allowed unless specifically authorized by statute.

OPTIONAL ATTACHMENT A
SPECIAL CONDITIONS

The capital outlay oversight requires grantees' accounting methods and procedures, including their internal control framework, to be scrutinized, so as to safeguard State capital outlay appropriations and assets acquired with such appropriations.

This Capital Outlay Special Grant Condition(s) **Attachment A** is necessary pursuant to Executive Order 2013-006 (2.A.2.a-c, if applicable), due to the Grantees' material weaknesses, significant deficiencies, or findings that raised concerns as to the ability to expend grant funds in accordance with applicable law in the organization's FY2022 audit. The Special Conditions identified below apply to the authorized agent, City of Las Cruces.

Procurement - All purchases or contracts the Grantee enters that shall use funding from the Department capital appropriations grant must be approved by the Department prior to the initiation of implementing purchasing documents. The Grantee shall receive such prior approval via official correspondence from the Department, which may be through letter or email. The Grantee shall submit the following to the Department in pursuit of prior approval: purchasing policies and procedures, CFO certification, documentation of management and program approval, policies and procedures governing purchasing and contracting, a copy of the current procurement and contracting policies, and documentation regarding informing staff responsible for purchasing and contracting on such policies and procedures.

Budget - Provide documentation of approval of your current budget from DFA Local Government or other authoritative agency. Provide policies and procedures on who is responsible for and how annual budgets (expenditures and revenue) are established, monitored and adjusted. Provide a corrective action plan on how budget issues identified in your audit will be/have been addressed. Also include documentation on how staff responsible for budgeting is informed on budget policies and procedures.

Capital Assets - Provide a complete list of inventory including inventory control numbers and current location. Provide policies and procedures on capital assets and inventory and specify how the proposed purchased items will be included, tagged, and tracked in capital asset inventory. Also include documentation on how staff responsible for capital assets is informed on capital asset policies and procedures.

Travel and Per Diem - Provide policies and procedures on travel and per diem. Also include how staff who travel and those responsible for travel reimbursement are informed on travel and per diem policies and procedures.

Timely Audits – Provide policies and procedures on annual audits. Provide documentation on how and who is responsible for insuring that annual audits are completed timely. Also include documentation on how staff responsible for the annual audit is informed on audit policies and procedures.

Cash Management – policies and procedures on cash management of federal funds. Provide procedures used to draw and disburse federal funds. Provide procedures to reconcile draw amounts, deposits and disbursements; and to prepare federal cash reporting documents to ensure compliance with federal regulations.

The <Grantee> was required to and has provided sufficient documentation regarding [insert specific names of the Special Condition(s)], as referenced in the City of Las Cruces's 2022 Audit file. Therefore, the criteria to enter into this agreement have been met.

SCOPE OF WORK

GUIDANCE FOR COMPLETING PROJECT DESCRIPTION FORM

SCOPE OF WORK (SOW)

(Please email SOW to CPB staff listed below in WORD format)

The Aging and Long-Term Services Department (hereinafter "ALTSD") has standardized the requirements for a Project Description/Scope of Work (hereinafter "SOW") to be incorporated as part of the legal contract for the project. A SOW must be submitted to ALTSD upon notice of a grant award and before a Grant Agreement (hereinafter "GA") can be drafted. A SOW is also a requirement of the grant application. The following information is required in a SOW:

1. **Name of Grantee** (The City, County, Village, Town, Tribal (Include Fiscal Agent Name if different than Grantee)
2. **Project Title** (Construction, Renovation, Code Compliance, Meals Equipment, Other Equipment, Vehicle
3. **Grant Agreement Number** (As indicated on the notice of grant award letter (example A22G2014)
4. **Background Narrative** – Stating how the project came to be, why the project/purchase is needed and describing what the project will accomplish.
5. **Work Plan** – Consisting of at least one paragraph describing the actual tasks that will be required to execute the project, including details and specifics about what is to be done, who is going to do it, the project proposed completion date, deliverables, and cost. (Example: "the funds will be used to plan, design, and renovate a __ sq. foot addition, to include __ sq. feet of carpet replacement, __ sq. feet of plumbing replacement, __ sq. feet of ceiling tile replacement, installation of __ ADA compliant doors with automatic door opener(s) and construction of __ sq. feet of asphalt pavement including base course and millings.")
6. **Budget Detail/Project Cost** – The "State Funds" section of the budget must equal the amount appropriated by the legislature for the capital project. Include and describe "other funds" available to the project. Art in Public Places is applicable to new construction or major renovation projects exceeding $100,000. One percent (1%) must be set aside for the acquisition of art for the facility.[1]
7. **Performance Measures –** Explain specific tasks that will be accomplished and how you will measure that task
8. **Results Expected –** Explain the benefits to the community being served and the objectives that will be met.
9. **Time Frame/Milestones** – List the activities and tasks to be accomplished in sequential order, in other words – when is purchase being made/delivered, when is construction starting/finishing, and state when major components of the project will be completed.
10. **Responsible Staff** – Include the name of the person who will manage the project (very important) and the name of the fiscal/procurement contact, as well as their mailing addresses, email addresses, and phone numbers.

The SOW (in WORD) must be forwarded to ALTSD Capital Projects Bureau, for review to assure that it is within the legislative intent of the appropriation. Upon approval, the SOW will be incorporated into the Grant Agreement.

NOTICE: Requests for changes to the scope of work must be submitted and approved by the Capital Projects Bureau (CPB) prior to expenditures being made.

Art in Public Places Program – In 1986, the Legislature of the State of New Mexico passed, and the Governor signed into law the Art in Public Places Act (§13-4A-1, NMSA 1978, as amended). The legislation declares it to be "a policy of the State that a portion of appropriations for capital expenditures be set aside for the acquisition or commissioning of works of art to be used in, upon, or around public buildings." (§13-4A-2, NMSA 1978). The resulting AIPP is often referred to as the One Percent for Art Program because of the requirement in the law. The primary provision in the AIPP Act is that "all agencies shall allocate. . . one percent or $200,000, whichever is less, of the amount of money appropriated for new construction or a major renovation exceeding $100,000 to be expended for the acquisition of art (§13-4A-4). For questions about AIPP, please contact staff at: https://www.nmarts.org/art-in-public-places/, in Santa Fe 505-827-6490.

Please contact the ALTSD Capital Projects Bureau (CPB) for additional guidance on the Project Description/Scope of Work.

Rebecca Martinez, Rebecca.Martinez@altsd.nm.gov

PROJECT DESCRIPTION FORM
SCOPE OF WORK (SOW)
(Please email this completed form to ALTSD in MS Word format)

1. **Name of Grantee/ Fiscal Agent:**
   City of Las Cruces

2. **Project Title:**
   ROBERT P. MUNSON SENIOR CTR-CONSTRUCT

3. **Grant Agreement Number:**
   A23H-2019

4. **Background Narrative**:
   Munson is the largest of all the City's senior centers, serving an average of 395 seniors per day, pre-pandemic, however, in FY 2021 there were 195 seniors per day, and through April 2022 the average per day is only 83 for FY2022 onsite. Services are provided through a wide array of nutrition, fitness, recreation, and social programs. The seniors are choosing other options for service post-pandemic. Munson provides the congregate meals for both the East Mesa Senior Center/Sage Café and the Papen Center, as well as grab and go meals provided at those two facilities, making the total meals prepared at Munson an average of 322 for FY2022 through April 2022. Adding a dedicated space for fitness and recreation will allow Senior Programs to serve an increased number of participants in appropriate fitness, aerobics, core exercise, free weight, dancing, tai-chi, balance, and fall prevention, and other classes essential for the health and well-being of seniors. A limited selection of these classes is currently held in the dining hall but due to space and time limitations, classes can only be offered before 9 am or after 2 pm. This is due to the daily set-up and tear-down of tables and chairs for congregate meals. This set-up/tear-down costs approximately $10,650 annually in staff time, adds undue wear and tear on the dining hall floor and equipment, increases maintenance costs, and increases the potential for hazards and contamination. Pre-COVID shutdown, 153 seniors were participating daily in limited fitness class offerings at Munson Center, and it is expected that number will increase by at least 50 percent in the first year after the addition is complete. Munson Center is currently not offering any fitness classes due to providing additional sanitization in the dining room.

   The limited fitness class times also prohibit many participants who arrive by public transportation from participating in classes. The space limitations in the dining hall mean many seniors who would like to participate cannot. The daily set-up and tear-down impact the fitness class hours, which are limited to early mornings or late afternoons; and congregate meal participants often must wait elsewhere for lunch, until set-up is complete. The need for a dedicated space and substantially more fitness and recreation offerings has been an urgent need identified by seniors during public input and feedback sessions. This expansion will enable more seniors to participate in additional fitness and recreation classes, especially those limited by public transportation and those arriving for congregate meals. Growing the number of classes, activities, and services is proven to increase the social connectivity and quality of life of seniors, particularly those who live alone. It would also enable those seniors ages 50 to 60 years old, that do not qualify for congregate meals, to participate in classes and activities while meals are served and possibly on their lunch breaks from jobs around the community; making Munson a part of the lives of young seniors before they need the other services offered by Senior Program.

   Additionally, the building serves as an important emergency facility, providing heating and cooling shelters for the entire community during weather crises – and the expansion would provide an invaluable space for housing seniors and other vulnerable groups should such a need arise. During the pandemic,

it was clear that more space to social distant seniors during classes, activities, and meals is a need that in general can provide a healthier environment to engage in programming. Indeed, many seniors continue to be the most vulnerable population at risk for infection of the COVID variants, as well as other infectious diseases. New service provisions were started during the COVID shutdown that may be continued as they provide enhanced service options to seniors.

5. **Work Plan**:

The City is requesting the remaining funding necessary to complete the 5,014 sq. ft. addition to the Munson Senior Center. The expansion will provide a dedicated exercise room with fitness equipment, padded flooring, bathrooms with ADA-compliant showers, and an area for group fitness classes. Fitness classes are currently held in the dining hall which limits instruction hours, class sizes, and types of activities. The new addition will allow for an expanded fitness and training session offerings and provide seniors with access to skill-appropriate fitness equipment. The goal is to enhance the services for seniors currently attending the center and to partner with community organizations, medical facilities, and other groups serving seniors to offer fitness classes, recreation programs, fall prevention and stability courses, balance improvement activities, and home safety education. Our strategic objective is to substantially increase the health and well-being of seniors through increased fitness class offerings.

The expansion will be a design/bid/build project with the planning and design phase led by a contracted architectural firm that will gather community input through meetings, surveys, staff recommendations, and participant feedback to develop schematic designs for review before construction commences. The design phase is complete with the initial capital outlay funding and take approximately eight months to complete. The City has started the Request for Proposal (RFP) process to contract with a construction firm. The RFP and contract approval process takes approximately four months. Because sufficient funding is unavailable, and the recent capital outlay agreement (assuming the passage of the bond vote in November 2022) is not expected until the fall of 2023, the RFP will have to be phased. Construction will begin with site preparation to include the removal of exterior infrastructure and landscaping in the construction area. Construction of the new addition will take approximately 15 months, in addition, purchase and equipment installation and furnishings will take an additional three months. The expansion is anticipated to be completed within two years.

The building expansion construction will include all required utility and exterior lighting relocations, site preparation, and the addition of 5,014 square feet of space that includes VCT floors, ceiling tiles, LED lighting, audio-visual equipment, security cameras, fire suppression sprinklers, fire alarms, drywall, paint, doors and hardware, ADA-compliant restrooms with showers, a thermoplastic polyolefin (TPO) roof system, and an additional HVAC system. All required fixtures and equipment will be installed. New concrete sidewalks, landscaping, and parking improvements will be installed per the City Code. The new expansion will include a nearly 3,000 sq. ft. group fitness classroom; an 850 sq. ft. exercise area with treadmills, stationary bikes, and free weights; and ADA-compliant restrooms with showers. The building will continue to be occupied during the construction to provide meals and activities as appropriate while ensuring the safety of seniors. Senior Programs does not anticipate any disruption to current activities as the new addition is located on the south side of the building and will be built off the existing office and staff meeting space.

6. **Budget Detail:**

Project Cost Activities *(These are only examples. Insert activities specific to the proposed project.)*	**Other Funds**	**State Funds**
Architect/Engineer		
Construction		$1,619,838.00
Renovation		
Improvements for Code Compliance		
Equipment ***NOTE: Equipment purchased with capital appropriations must be valued at $10,000.00 or more.**		
Meals Equipment ***NOTE: Equipment purchased with capital appropriations must be valued at $10,000.00 or more.**		
Vehicle Purchase		
Other Costs (specify)		
AIPP (if applicable)		$16,362.00
Totals		**$1,636,200.00**

7. **Performance Measures:** ELE, 11.1.2 Expand Senior citizen's facilities and activities when feasible. The City Manager, Ifo Pili, is the authorized signer for all grant agreements. Assistant City Manager, Sonya Delgado, oversees the Public Works Director, David Sedillo, who heads a professional team of 50 employees, including several licensed engineers and design professionals. Public Works' Property & Construction Management section will oversee Munson expansion design work, which will be contracted to an experienced, external architectural firm. The firm will garner senior and community input through public meetings, solicitate staff feedback, prepare schematic designs for approval, and complete design and construction drawings sufficient to solicit an RFP for construction. Assuming sufficient funding is secured, an RFP will be issued, and a construction firm chosen who will manage demolition, construction, and the installation of fixtures, furnishings, and equipment. Additionally, the City's Finance Department will oversee accounting and purchasing functions, the Legal Department will provide contract oversight, and the Budget and Grant Administration Administration Department will help administer the grant funds for the project, all helping to ensure the project is on time and within budget.

8. **Results Expected:**
Senior Programs will no longer be limited in providing critical physical fitness classes and recreation programs to seniors in the community. Las Cruces seniors will no longer classes be subjected to limited access or limited hours of classes. Once construction is completed, citizens will realize the increased class offerings demanded in public input sessions, and the City will continue to incur set-up/tear-down, and wear and tear costs associated with sharing the dining hall. As noted earlier, pre-COVID number of participants exceed 150 per day, and that number will return and increase by at least 50 percent in the first year after the addition is complete.

9.

Time Frame/ Milestones: Upon full execution of the Grant Agreement the following tasks will commence to meet the time frame/milestones. *(These are only examples. Insert milestones specific to the proposed project.)*

Expected date City receives fully executed agreement	February 2024
Expected date City processes the agreements	March 2024
RFP/Quotes Secured	April 2024
Bid Closing	May 2024
Bid Award to Contractor/Vendor	June 2024

NOTICE: The Grant Application, if approved for funding by the Aging and Long Term Services Department (ALTSD) and any attachments to the Grant Application are incorporated by reference into the scope of work. In the event of a conflict between any of the documents that are part of the Agreement, the ALTSD Cabinet Secretary, at the sole discretion of ALTSD, shall resolve that conflict.

STATE OF NEW MEXICO
AGING AND LONG-TERM SERVICES DEPARTMENT
FUND 89200 CAPITAL APPROPRIATION PROJECT

THIS AGREEMENT is made and entered into as of this 19th day of April, 2024 by and between the Aging and Long-Term Services Department, hereinafter called the "Department" or abbreviation such as "ALTSD", and City of Las Cruces, hereinafter called the "Grantee". This Agreement shall be effective as of the date it is executed by the Department.

RECITALS

WHEREAS, in the Laws of 2023, Chapter 199, Section, Paragraph 14, the Legislature made an appropriation to the Department, funds from which the Department is making available to the Grantee pursuant to this Agreement; and

WHEREAS, the Department is granting to Grantee, and the Grantee is accepting the grant of, funds from this appropriation, in accordance with the terms and conditions of this Agreement; and

WHEREAS, State Agency on Aging (28-4-1 to 28-4-9 NMSA 1978): successor agency, Aging and Long-Term Services Department (9-23-1 to 9-23-12 NMSA 1978) may enter into grants and contracts as appropriated by law.

AGREEMENT

NOW, THEREFORE, in consideration of the mutual covenants and obligations contained herein, the parties hereby mutually agree as follows:

ARTICLE I. PROJECT DESCRIPTION, AMOUNT OF GRANT AND REVERSION DATE

A. The project that is the subject of this Agreement is described as follows:

A23H-2017 $127,500.00 APPROPRIATION REVERSION DATE: 30-JUN-2027
Laws of 2023, Chapter 199, Section 4, Paragraph 14, One hundred- twenty-seven thousand five hundred dollars, $127,500.00, to plan, design, construct, equip and furnish the Benavidez Senior Center in Las Cruces in Dona Ana County.

The Grantee's total reimbursements shall not exceed one hundred twenty-seven thousand five hundred dollars $127,500.00 (the "Appropriation Amount") minus the allocation for Art in Public Places ("AIPP amount")[1], if applicable, one thousand two hundred seventy-five dollars $1,275.00, which equals one hundred twenty-six thousand two hundred twenty-five dollars $126,225.00 (the "Adjusted Appropriation Amount").

[1] The AIPP amount is "an amount of money equal to one percent or two hundred thousand dollars ($200,000), whichever is less, of the amount of money appropriated for new construction or any major renovation exceeding one hundred thousand dollars ($100,000)." Section 13-4A-4 NMSA 1978.

In the event of a conflict among the Appropriation Amount, the Reversion Date, as defined herein and/or the purpose of the Project, as set forth in this Agreement, and the corresponding appropriation language in the laws cited above in this Article I(A), the language of the laws cited herein shall control.
This project is referred to throughout the remainder of this Agreement as the "Project"; the information contained in Article I(A) is referred to collectively throughout the remainder of this Agreement as the "Project Description." Attachment A sets forth additional or more stringent requirements and conditions, which are incorporated by this reference as if set forth fully herein. If Optional Attachment A imposes more stringent requirements than any requirement set forth in this Agreement, the more stringent requirements of Attachment A shall prevail, in the event of irreconcilable conflict. The Grantee shall reference the Project's number in all correspondence with and submissions to the Department concerning the Project, including, but not limited to, Requests for Payment and reports.

ARTICLE II. LIMITATION ON DEPARTMENT'S OBLIGATION TO MAKE GRANT DISBURSEMENT TO GRANTEE

A. Upon the Effective Date of this Agreement, for permissible purposes within the scope of the Project Description, the Grantee shall only be reimbursed monies for which the Department has issued, and the Grantee has received a Notice of Department's Obligation to Reimburse[2] Grantee (hereinafter referred to as "Notice of Obligation"). This Grant Agreement and the disbursement of any and all amounts of the above referenced Adjusted Appropriation Amount are expressly conditioned upon the following:

(i) Irrespective of any Notice of Obligation, the Grantee's expenditures shall be made on or before the Reversion Date and, if applicable, an Early Termination Date (i.e., the goods have been delivered and accepted or the title to the goods has been transferred to the Grantee and/or the services have been rendered for the Grantee); and

(ii) The total amount received by the Grantee shall not exceed the lesser of: (a) the Adjusted Appropriation Amount identified in Article I(A) herein or (b) the total of all amounts stated in the Notice(s) of Obligation evidencing that the Department has received and accepted the Grantee's Third-Party Obligation(s), as defined in subparagraph iii of this Article II(A); and

(iii) The Grantee's expenditures were made pursuant to the State Procurement Code and execution of binding written obligations or purchase orders with third party contractors or vendors for the provision of services, including professional services, or the purchase of tangible personal property and real property for the Project, hereinafter referred to as "Third Party Obligations"; and

(iv) The Grantee's submittal of timely Requests for Payment in accordance with the procedures set forth in Article IX of this Agreement; and

(v) In the event that capital assets acquired with Project funds are to be sold, leased, or licensed to or operated by a private entity, the sale, lease, license, or operating agreement:

   a. must be approved by the applicable oversight entity (if any) in accordance with law; or
   b. if no oversight entity is required to approve the transaction, the Department must approve the transaction as complying with law.

Prior to the sale, lease, license, or operating agreement being approved pursuant to Articles II(A)(v)(a) and II(A)(v)(b) herein, the Department may, in its sole and absolute discretion and unless inconsistent with State Board of Finance imposed conditions, reimburse the Grantee for necessary expenditures

[2] "Reimburse" as used throughout this Agreement includes Department payments to the Grantee for invoices received, but not yet paid, by the Grantee from a third party contractor or vendor, if the invoices comply with the provisions of this Agreement and are a valid liability of the Grantee.

incurred to develop the Project sufficiently to make the sale, lease, license, or operating agreement commercially feasible, such as plan and design expenditures; and

(vi) The Grantee's submission of documentation of all Third Party Obligations and amendments thereto (including terminations) to the Department and the Department's issuance and the Grantee's receiving of a Notice of Obligation for a particular amount in accordance with the terms of this Agreement shall be governed by the following:

a. The Grantee shall submit to the Department one copy of all Third Party Obligations and amendments thereto (including terminations) as soon as possible after execution by the Third Party **but prior to execution by the Grantee.**

b. Grantee acknowledges and agrees that if it chooses to enter into a Third Party Obligation prior to receiving a Notice of Obligation that covers the expenditure, it is solely responsible for such obligations.

c. The Department may, in its sole and absolute discretion, issue to Grantee a Notice of Obligation for the particular amount of that Third Party Obligation that only obligates the Department to reimburse Grantee's expenditures made on or before the Reversion Date or an Early Termination Date. The current Notice of Obligation form is attached to this Agreement as Exhibit 2.

d. The date the Department signs the Notice of Obligation is the date that the Department's Notice of Obligation is effective. After that date, the Grantee is authorized to budget the particular amount set forth in the Notice of Obligation, execute the Third Party Obligation and request the Third Party to begin work. Payment for any work performed or goods received prior to the effective date of the Notice of Obligation is wholly and solely the obligation of the Grantee.

B. The Grantee shall implement, in all respects, the Project. The Grantee shall provide all necessary qualified personnel, material, and facilities to implement the Project. The Grantee shall finance its share (if any) of the costs of the Project, including all Project overruns.

C. Project funds shall not be used for purposes other than those specified in the Project Description.

D. Unless specifically allowed by law, Project funds cannot be used to reimburse Grantee for indirect Project costs.

ARTICLE III. NOTICE PROVISIONS AND GRANTEE AND DEPARTMENT DESIGNATED REPRESENTATIVES

Whenever written notices, including written decisions, are to be given or received, related to this Agreement, the following provisions shall apply.

The Grantee designates the person(s) listed below, or their successor, as their official representative(s) concerning all matters related to this Agreement:

Grantee: City of Las Cruces
Name: Sonia Saldana
Title: Project Manager
Address: 700 N Main St. Las Cruces, NM 88001

Email: ssaldana@lascruces.gov
Telephone: 575-541-2464

The Grantee designates the person(s) listed below, or their successor, as their Fiscal Officer or Fiscal Agent concerning all matters related to this Agreement:
Grantee: City of Las Cruces
Name: Gabriela Prats
Title: Grant Manager
Address: 700 N Main St. Las Cruces, NM 88001
Email: grants@lascruces.gov
Telephone: 575-541-2430

The Department designates the persons listed below, or their successors, as the Points of Contact for matters related to this Agreement.

Department: Aging and Long-Term Services Department
Name: Sarah Jacobs
Title: Deputy Cabinet Secretary
Address: 2550 Cerrillos Road, Santa Fe, NM 87505
Email: sarah.jacobs@altsd.nm.gov
Telephone: 505-303-8684

The Grantee and the Department agree that either party shall send all notices, including written decisions, related to this Agreement to the above-named persons by email or regular mail. In the case of mailings, notices shall be deemed to have been given and received upon the date of the receiving party's actual receipt or five calendar days after mailing, whichever shall first occur. In the case of email transmissions, the notice shall be deemed to have been given and received on the date reflected on the delivery receipt of email.

ARTICLE IV. REVERSION DATE, TERM, DEADLINE TO EXPEND FUNDS

A. As referenced in Article I(A), the applicable law establishes a date by which Project funds must be expended by Grantee, which is referred to throughout the remainder of this Agreement as the "Reversion Date." Upon being duly executed by both parties, this Agreement shall be effective as of the date of execution by the Department. It shall terminate on June 30, 2027, the Reversion Date unless Terminated Before Reversion Date ("Early Termination") pursuant to Article V herein.

B. The Project's funds must be expended on or before the Reversion Date and, if applicable, Early Termination Date of this Agreement. For purposes of this Agreement, it is not sufficient for the Grantee to encumber the Project funds on its books on or before the Project's Reversion Date or Early Termination Date. Funds are expended and an expenditure has occurred as of the date that a particular quantity of goods are delivered to and received by the Grantee or title to the goods is transferred to the Grantee and/or as of the date particular services are rendered for the Grantee. Funds are ***not*** expended, and an expenditure has ***not*** occurred as of the date they are encumbered by the Grantee pursuant to a contract or purchase order with a third party.

ARTICLE V. EARLY TERMINATION

A. Early Termination Before Reversion Date Due to Completion of the Project or Complete Expenditure of the Adjusted Appropriation or Violation of this Agreement

Early Termination includes:

(i) Termination due to completion of the Project before the Reversion Date; or

(ii) Termination due to complete expenditure of the Adjusted Appropriation Amount before the Reversion Date; or

(iii) Termination for violation of the terms of this Agreement; or

(iv) Termination for suspected mishandling of public funds, including but not limited to, fraud, waste, abuse, and conflicts of interest.

Either the Department or the Grantee may early terminate this Agreement prior to the Reversion Date by providing the other party with a minimum of fifteen (15) days' advance, written notice of early termination. Grantee hereby waives any rights to assert an impairment of contract claim against the Department or the State of New Mexico in the event of Early Termination of this Agreement by the Department pursuant to Article V(A).

B. Early Termination Before Reversion Date Due to Non-appropriation

The terms of this Agreement are expressly made contingent upon sufficient appropriations and authorization being made by the Legislature of New Mexico for the performance of this Agreement. Throughout this Agreement the term "non-appropriate" or "non-appropriation" includes the following actions by the New Mexico Legislature: deauthorization, reauthorization or revocation of a prior authorization. The Legislature may choose to non-appropriate the Appropriation referred to in Article I and, if that occurs, the Department shall early terminate this Agreement for non-appropriation by giving the Grantee written notice of such termination, and such termination shall be effective as of the effective date of the law making the non-appropriation. The Department's decision as to whether sufficient appropriations or authorizations are available shall be accepted by the Grantee and shall be final. Grantee hereby waives any rights to assert an impairment of contract claim against the Department or the State of New Mexico in the event of Early Termination of this Agreement by the Department pursuant to Article V(B).

C. Limitation on Department's Obligation to Make Grant Disbursements to Grantee in the Event of Early Termination

In the event of Early Termination of this Agreement by either party, the Department's sole and absolute obligation to reimburse the Grantee is expressly conditioned upon the limitations set forth Article II.

ARTICLE VI. SUSPENSION OF NEW OR FURTHER OBLIGATIONS

A. The Department may choose, in its sole and absolute discretion, to provide written notice to the Grantee to suspend entering into new and further obligations. Upon the receipt of such written notice by the Grantee:

(i) The Grantee shall immediately suspend entering into new or further written obligations with third parties; and

(ii) The Department will suspend the issuance of any new or further Notice of Obligation under this Agreement; and
(iii) The Department may direct the Grantee to implement a corrective action plan in accordance with Article VI(D) herein.

B. In the event of Suspension of this Agreement, the Department's sole and absolute obligation to reimburse the Grantee is expressly conditioned upon the limitations set forth in Article II herein.

C. A suspension of new or further obligations under this Agreement shall remain in effect unless or until the date the Grantee receives written notice given by the Department informing the Grantee that the Suspension has been lifted or that the Agreement has been Early Terminated in accordance with Article V herein. If the Suspension is lifted, the Department will consider further requests for Notice of Obligation.

D. Corrective Action Plan in the Event of Suspension

In the event that the Department chooses, in its sole and absolute discretion to direct the Grantee to suspend entering into new or further written obligations with third parties pursuant to Article VI(A), the Department may, but is not obligated to, require the Grantee to develop and implement a written corrective action plan to remedy the grounds for the Suspension. Such corrective action plan must be approved by the Department and be signed by the Grantee. Failure to sign a corrective action plan or meet the terms and deadlines set forth in the signed corrective action plan, is hereby deemed a violation of the terms of this Agreement for purposes of Early Termination, Article V(A)(iii). The corrective action plan is in addition to, and not in lieu of, any other equitable or legal remedy, including but not limited to Early Termination.

ARTICLE VII. AMENDMENT

This Agreement shall not be altered, changed, or amended except by instrument in writing duly executed by both the parties hereto.

ARTICLE VIII. REPORTS

A. Database Reporting

The Grantee shall report quarterly Project activity by entering such Project information as the Department and the Department of Finance and Administration may require, such information entered directly into a database maintained by the Department of Finance and Administration (Budget & Formulation Management System). Additionally, the Grantee shall certify on the Request for Payment form (Exhibit 1) that updates have been maintained and are current in the database. The Grantee hereby acknowledges that failure to perform and/or certify updates into the database will delay or potentially jeopardize the reimbursement of funds. The Department shall give Grantee a minimum of thirty (30) days' advance written notice of any changes to the information the Grantee is required to report.

Quarterly reports shall be due on the last day of the month that is 30 days prior to the end of the quarter following execution of this Agreement by the Department and ending during the quarter of the submission of the final request for reimbursement for the Project, or the following quarter.

B. Requests for Additional Information/Project Inspection

During the term of this Agreement and during the period of time during which the Grantee must maintain records pursuant to Article VIII, the Department may:

(i) request such additional information regarding the Project as it deems necessary; and
(ii) conduct, at reasonable times and upon reasonable notice, onsite inspections of the Project.

Grantee shall respond to such requests for additional information within a reasonable period of time, as established by the Department.

ARTICLE IX. REQUEST FOR PAYMENT PROCEDURES AND DEADLINES

A. The Grantee shall request payment by submitting a Request for Payment, in the form attached hereto as Exhibit 1. Payment requests are subject to the following procedures:

(i) The Grantee must submit a Request for Payment; and

(ii) Each Request for Payment must contain proof of payment by the Grantee or liabilities incurred by the Grantee showing that the expenditures are valid or are liabilities incurred by the Grantee in the form of actual unpaid invoices received by the Grantee for services rendered by a third party or items of tangible personal property received by the Grantee for the implementation of the Project; provided, however, that the Grantee may be reimbursed for unpaid liabilities only if the Department, in its sole and absolute discretion, agrees to do so and in accordance with any special conditions imposed by the Department.

(iii) In cases where the Grantee is submitting a Request for Payment to the Department based upon invoices received, but not yet paid, by the Grantee from a third party contractor or vendor, if the invoices comply with the provisions of this Agreement and are a valid liability of the Grantee, the Grantee shall make payment to those contractors or vendors within five (5) business days from the date of receiving reimbursement from the Department or such shorter period of time as the Department may prescribe in writing. The Grantee is required to certify to the Department proof of payment to the third-party contractor or vendor within ten (10) business days from the date of receiving reimbursement from the Department.

B. The Grantee must obligate 5% of the Adjusted Appropriation Amount within six months of acceptance of the grant agreement and must have expended no less than 85% of the Adjusted Appropriation Amount six months prior to the reversion date.

C. **Deadlines**

Requests for Payments shall be submitted by Grantee to the Department on the earlier of:

(i) Immediately as they are received by the Grantee but at a minimum thirty (30) days from when the expenditure was incurred, or liability of the Grantee was approved as evidenced by an unpaid invoice received by the Grantee from a third party contractor or vendor; or

(ii) Twenty (20) days from date of Early Termination; or

(iii) Twenty (20) days from the Reversion Date.

D. The Grantee's failure to abide by the requirements set forth in Article II and Article IX herein will result in the denial of its Request for Payment or will delay the processing of Requests for Payment. The Department has the right to reject a payment request for the Project unless and until it is satisfied that the expenditures in the Request for Payment are for permissible purposes within the meaning of the Project Description and that the expenditures and the Grantee are otherwise in compliance with this Agreement, including but not limited to, compliance with the reporting requirements and the requirements set forth in Article II herein to provide Third Party Obligations and the Deadlines set forth in Article IX herein. The Department's ability to reject any Request for Payment is in addition to, and not in lieu of, any other legal or equitable remedy available to the Department due to Grantee's violation of this Agreement.

ARTICLE X. PROJECT CONDITIONS AND RESTRICTIONS; REPRESENTATIONS AND WARRANTIES

A. The following general conditions and restrictions are applicable to the Project:

(i) The Project's funds must be spent in accordance with all applicable state laws, regulations, policies, and guidelines, including, but not limited to, the State Procurement Code (or local procurement ordinance, where applicable).

(ii) The Project must be implemented in accordance with the New Mexico Public Works Minimum Wage Act, Section 13-4-10 through 13-4-17 NMSA 1978, as applicable. Every contract or project in excess of sixty thousand dollars ($60,000) that the Grantee is a party to for construction, alteration, demolition or repair or any combination of these, including painting and decorating, of public buildings, public works or public roads and that requires or involves the employment of mechanics, laborers or both shall contain a provision stating the minimum wages and fringe benefits to be paid to various classes of laborers and mechanics, shall be based upon the wages and benefits that will be determined by the New Mexico Department of Workforce Solutions to be prevailing for the corresponding classes of laborers and mechanics employed on contract work of a similar nature in the locality. Further, every contract or project shall contain a stipulation that the contractor, subcontractor, employer or a person acting as a contractor shall pay all mechanics and laborers employed on the site of the project, unconditionally and not less often than once a week and without subsequent unlawful deduction or rebate on any account, the full amounts accrued at time of payment computed at wage rates and fringe benefit rates not less than those determined pursuant to Section 13-4-11 (B) NMSA 1978 to be the prevailing wage rates and prevailing fringe benefit rates issued for the project.

(iii) The Project may only benefit private entities in accordance with applicable law, including, but not limited to, Article IX, Section 14 of the Constitution of the State of New Mexico, the "Anti-Donation Clause."

(iv) The Grantee shall not for a period of 10 years from the date of this agreement convert any property acquired, built, renovated, repaired, designed or developed with the Project's funds to uses other than those specified in the Project Description without the Department's and the Board of Finance's express, advance, written approval, which may include a requirement to reimburse the State for the cost of the project, transfer proceeds from the disposition of property to the State, or otherwise provide consideration to the State.

(v) The Grantee shall comply with all federal and state laws, rules and regulations pertaining to equal employment opportunity. In accordance with all such laws, rules and regulations the Grantee agrees to assure that no person shall, on the grounds of race, color, national origin, sex, sexual preference, age or handicap, be excluded from employment with Grantee, be excluded from participation in the Project, be denied benefits or otherwise be subject to discrimination under, any activity performed under this Agreement. If Grantee is found to be not in compliance with these requirements during the life of this Agreement, Grantee agrees to take appropriate steps to correct any deficiencies. The Grantee's failure to implement such appropriate steps within a reasonable time constitutes grounds for terminating this Agreement.

B. The Grantee hereby represents and warrants the following:

(i) The Grantee has the legal authority to receive and expend the Project's funds.

(ii) This Agreement has been duly authorized by the Grantee, the person executing this Agreement has authority to do so, and once executed by the Grantee, this Agreement shall constitute a binding obligation of the Grantee, enforceable according to its terms.

(iii) This Agreement and the Grantee's obligations hereunder do not conflict with any law or ordinance or resolution applicable to the Grantee, the Grantee's charter (if applicable), or any judgment or decree to which the Grantee is subject.

(iv) The Grantee has independently confirmed that the Project Description, including, but not limited to, the amount and Reversion Date, is consistent with the underlying appropriation in law.

(v) The Grantee's governing body has duly adopted or passed as an official act a resolution, motion, or similar action authorizing the person identified as the official representative of the Grantee to sign the Agreement and to sign Requests for Payment.

(vi) The Grantee shall abide by New Mexico laws regarding conflicts of interest, governmental conduct and whistleblower protection. The Grantee specifically agrees that no officer or employee of the local jurisdiction or its designees or agents, no member of the governing body, and no other public official of the locality who exercises any function or responsibility with respect to this Grant, during their tenure or for one year thereafter, shall have any interest, direct or indirect, in any contract or subcontract, or the proceeds thereof, for work to be performed or goods to be received, pursuant to this Grant. Further, Grantee shall require all of its contractors to incorporate in all subcontracts the language set forth in this paragraph prohibiting conflicts of interest.

(vii) No funds have been paid or will be paid, by or on behalf of the Grantee, to any person for influencing or attempting to influence an officer or employee of this or any agency or body in connection with the awarding of any Third Party Obligation and that the Grantee shall require certifying language prohibiting lobbying to be included in the award documents for all subawards, including subcontracts, loans and cooperative agreements. All subrecipients shall be required to certify accordingly.

ARTICLE XI. STRICT ACCOUNTABILITY OF RECEIPTS AND DISBURSEMENTS; PROJECT RECORDS

A. The Grantee shall be strictly accountable for receipts and disbursements relating to the Project's funds. The Grantee shall follow generally accepted accounting principles, and, if feasible, maintain a separate bank account or fund with a separate organizational code, for the funds to assure separate budgeting and accounting of the funds.

B. For a period of six (6) years following the Project's completion, the Grantee shall maintain all Project related records, including, but not limited to, all financial records, requests for proposals, invitations to bid, selection and award criteria, contracts and subcontracts, advertisements, minutes of pertinent meetings, as well as records sufficient to fully account for the amount and disposition of the total funds from all sources budgeted for the Project, the purpose for which such funds were used, and such other records as the Department shall prescribe.

C. The Grantee shall make all Project records available to the Department, the Department of Finance and Administration, and the New Mexico State Auditor upon request. With respect to the funds that are the subject of this Agreement, if the State Auditor or the Department of Finance and Administration finds that any

or all of these funds were improperly expended, the Grantee may be required to reimburse to the State of New Mexico, to the originating fund, any and all amounts found to be improperly expended.

ARTICLE XII. IMPROPERLY REIMBURSED FUNDS

If the Department determines that part or all of the Appropriation Amount was improperly reimbursed to Grantee, including but not limited to, Project funds reimbursed to Grantee based upon fraud, mismanagement, misrepresentation, misuse, violation of law by the Grantee, or violation of this Agreement, the Grantee shall return such funds to the Department for disposition in accordance with law.

ARTICLE XIII. LIABILITY

Neither party shall be responsible for liability incurred as a result of the other party's acts or omissions in connection with this Agreement. Any liability incurred in connection with this Agreement is subject to immunities and limitations of the New Mexico Tort Claims Act.

ARTICLE XIV. SCOPE OF AGREEMENT

This Agreement constitutes the entire and exclusive agreement between the Grantee and Department concerning the subject matter hereof. The Agreement supersedes any and all prior or contemporaneous agreements, understandings, discussions, communications, and representations, written or verbal.

ARTICLE XV. REQUIRED NON-APPROPRIATIONS CLAUSE IN CONTRACTS FUNDED IN WHOLE OR PART BY FUNDS MADE AVAILABLE UNDER THIS AGREEMENT

The Grantee acknowledges, warrants, and agrees that Grantee shall include a "non-appropriations" clause in all contracts between it and other parties that are (i) funded in whole or part by funds made available under this Agreement and (ii) entered into after the effective date of this Agreement that states:

"The terms of this Agreement are contingent upon sufficient appropriations and authorization being made by the Legislature of New Mexico for the performance of this Agreement. If sufficient appropriations and authorization are not made by the Legislature, the City of Las Cruces may immediately terminate this Agreement by giving Contractor written notice of such termination. The City of Las Cruces's decision as to whether sufficient appropriations are available shall be accepted by the Contractor and shall be final. Contractor hereby waives any rights to assert an impairment of contract claim against the City of Las Cruces or the Aging and Long-Term Services Department or the State of New Mexico in the event of immediate or Early Termination of this Agreement by the City of Las Cruces or the Department."

ARTICLE XVI. REQUIRED TERMINATION CLAUSE IN CONTRACTS FUNDED IN WHOLE OR PART BY FUNDS MADE AVAILABLE UNDER THIS AGREEMENT

Grantee acknowledges, warrants, and agrees that Grantee shall include the following termination clause in all contracts that are (i) funded in whole or part by funds made available under this Agreement and (ii) entered into after the effective date of this Agreement:

"This contract is funded in whole or in part by funds made available under an Aging and Long-Term Services Department Grant Agreement. Should the Aging and Long-Term Services Department early terminate the grant agreement, the City of Las Cruces may early terminate this contract by providing Contractor written notice of such termination. In the event of termination pursuant to this paragraph, the City of Las Cruces] only liability shall be to pay Contractor for acceptable goods delivered and services rendered before the termination date."

Grantee hereby waives any rights to assert an impairment of contract claim against the Department or the State of New Mexico in the event of Early Termination of this Agreement by the Department.

ARTICLE XVII. COMPLIANCE WITH UNIFORM FUNDING CRITERIA.

A. Throughout the term of this Agreement, Grantee shall:

1. submit all reports of annual audits and agreed upon procedures required by Section 12-6-3(A)-(B) NMSA 1978 by the due dates established in 2.2.2 NMAC, reports of which must be a public record pursuant to Section 12-6-5(A) NMSA 1978 within forty-five days of delivery to the State Auditor;
2. have a duly adopted budget for the current fiscal year approved by its budgetary oversight agency (if any);
3. timely submit all required financial reports to its budgetary oversight agency (if any); and
4. have adequate accounting methods and procedures to expend grant funds in accordance with applicable law and account for and safeguard grant funds and assets acquired by grant funds.

B. In the event Grantee fails to comply with the requirements of Paragraph A of this Article XVII, the Department may take one or more of the following actions:

1. suspend new or further obligations pursuant to Article VI(A) of this Agreement;
2. require the Grantee to develop and implement a written corrective action plan pursuant to Article VI(D) of this Agreement to remedy the non-compliance;
3. impose special grant conditions to address the non-compliance by giving the Grantee notice of such special conditions in accordance with Article III of this Agreement; the special conditions shall be binding and effective on the date that notice is deemed to have been given pursuant to Article III; or
4. terminate this Agreement pursuant to Article V(A) of this Agreement.

ARTICLE XVIII. SEVERANCE TAX BOND AND GENERAL OBLIGATION BOND PROJECT CLAUSES

A. Grantee acknowledges and agrees that the underlying appropriation for the Project is a severance tax bond or general obligation bond appropriation, and that the associated bond proceeds are administered by the New Mexico State Board of Finance (SBOF), an entity separate and distinct from the Department. Grantee acknowledges and agrees that (i) it is Grantee's sole and absolute responsibility to determine through SBOF staff what (if any) conditions are currently imposed on the Project; (ii) the Department's failure to inform Grantee of a SBOF imposed condition does not affect the validity or enforceability of the condition; (iii) the SBOF may in the future impose further or different conditions upon the Project; (iv) all SBOF conditions are effective without amendment of this Agreement; (v) all applicable SBOF conditions must be satisfied before the SBOF will release to the Department funds subject to the condition(s); and (vi) the Department's obligation to reimburse Grantee from the Project is contingent upon the then current SBOF conditions being satisfied.

B. Grantee acknowledges and agrees that the SBOF may in its sole and absolute discretion remove a project's assigned bond proceeds if the project doesn't proceed sufficiently. Entities must comply with the

requirement to encumber five percent (5%) of Project funds within six months of bond issuance as certified by the grantee in the Bond Questionnaire and Certification documents submitted to the SBOF. Failure to comply may result in the bond proceeds reassignment to a new ready project. If this should occur this grant agreement will be suspended until the entity has demonstrated readiness as determined by the SBOF and the Department.

C. Grantee acknowledges and agrees that this Agreement is subject to the SBOF's Bond Project Disbursements rule, NMAC 2.61.6, as may be amended or re-codified. The rule provides definitions and interpretations of grant language for the purpose of determining whether a particular activity is allowable under the authorizing language of the agreement.

[THIS SPACE LEFT BLANK INTENTIONALLY]

IN WITNESS WHEREOF, the parties have duly executed this Agreement as of the date of execution by the Department.

1 Administrative and/or Indirect Cost – generally, the legislation authorizing the issuance of bonds prohibits the use of its proceeds for indirect expenses (e.g. penalty fees or damages other than pay for work performed, attorney fees, and administrative fees). Such use of bond proceeds shall not be allowed unless specifically authorized by statute.

OPTIONAL ATTACHMENT A
SPECIAL CONDITIONS

The capital outlay oversight requires grantees' accounting methods and procedures, including their internal control framework, to be scrutinized, so as to safeguard State capital outlay appropriations and assets acquired with such appropriations.

This Capital Outlay Special Grant Condition(s) **Attachment A** is necessary pursuant to Executive Order 2013-006 (2.A.2.a-c, if applicable), due to the Grantees' material weaknesses, significant deficiencies, or findings that raised concerns as to the ability to expend grant funds in accordance with applicable law in the organization's FY2022 audit. The Special Conditions identified below apply to the authorized agent, City of Las Cruces.

Procurement - All purchases or contracts the Grantee enters that shall use funding from the Department capital appropriations grant must be approved by the Department prior to the initiation of implementing purchasing documents. The Grantee shall receive such prior approval via official correspondence from the Department, which may be through letter or email. The Grantee shall submit the following to the Department in pursuit of prior approval: purchasing policies and procedures, CFO certification, documentation of management and program approval, policies and procedures governing purchasing and contracting, a copy of the current procurement and contracting policies, and documentation regarding informing staff responsible for purchasing and contracting on such policies and procedures.

Budget - Provide documentation of approval of your current budget from DFA Local Government or other authoritative agency. Provide policies and procedures on who is responsible for and how annual budgets (expenditures and revenue) are established, monitored and adjusted. Provide a corrective action plan on how budget issues identified in your audit will be/have been addressed. Also include documentation on how staff responsible for budgeting is informed on budget policies and procedures.

Capital Assets - Provide a complete list of inventory including inventory control numbers and current location. Provide policies and procedures on capital assets and inventory and specify how the proposed purchased items will be included, tagged, and tracked in capital asset inventory. Also include documentation on how staff responsible for capital assets is informed on capital asset policies and procedures.

Travel and Per Diem - Provide policies and procedures on travel and per diem. Also include how staff who travel and those responsible for travel reimbursement are informed on travel and per diem policies and procedures.

Timely Audits – Provide policies and procedures on annual audits. Provide documentation on how and who is responsible for insuring that annual audits are completed timely. Also include documentation on how staff responsible for the annual audit is informed on audit policies and procedures.

Cash Management – policies and procedures on cash management of federal funds. Provide procedures used to draw and disburse federal funds. Provide procedures to reconcile draw amounts, deposits and disbursements; and to prepare federal cash reporting documents to ensure compliance with federal regulations.

The <Grantee> was required to and has provided sufficient documentation regarding [insert specific names of the Special Condition(s)], as referenced in the City of Las Cruces's 2022 Audit file. Therefore, the criteria to enter into this agreement have been met.

SCOPE OF WORK

1. **Name of Grantee/ Fiscal Agent:**
   City of Las Cruces
2. **Project Title:**
   Las Cruces Benavidez CTR-Ren
3. **Grant Agreement Number:**
   A23H-2017
4. **Background Narrative**: The Benavidez Senior Center kitchen floor is in critical need of replacement. The floor is estimated to be the original to the building over 25 years old. The floor has many tears and holes from constant use. Mop water has the potential to accumulate under the many holes and tears causing potential for mold or other bacteria growth. The many tears create trip and fall hazards for the staff, volunteers, delivery drivers, food deliveries, and anyone entering the kitchen. The Benavidez kitchen is a congregate center and cooks for 6 home-delivered routes.

   To prepare, replace, install, and acquire kitchen flooring at the Benavidez Senior Center kitchen, including but not limited to hazardous materials testing, mitigation, and abatement, removal and disposal of current flooring, and purchase and installation of new flooring.

5. **Work Plan**:
   The City of Las Cruces requests $127,500.00 in funds to test, remove, dispose, purchase, and install flooring at the Benavidez Senior Center. The City's Subject Matter Expert in the Public Works Department has determined that the current flooring has met its useful life. They also have concerns that the flooring may be original and will need to be tested for hazardous materials and abated as necessary prior to being replaced. The goals of this project are to remove hazards from the Benavidez Senior Center Kitchen floor to ensure the program can continue to provide high-quality services to seniors in a safe, healthy environment. To achieve these goals, the City will first bring the grant award before City Council to accept the funding. Upon award execution, the City's Public Works Department then will issue a bid to identify a qualified vendor to conduct the testing, appropriate removal, and replacement of the flooring. The City's Purchasing code will be followed, and a bid process will be conducted. Once a vendor is secured and a project management meeting is scheduled, the work is expected to require up to eight months to complete.

6. **Budget Detail**:

Project Cost Activities	Other Funds	State Funds
Architect/Engineer		
Construction		$126,225.00
AIPP (if applicable)		1,275.00
Totals		**$127,500.00**

7. **Performance Measures**:
   Elevate Las Cruces Comprehensive Plan
   Community Prosperity (CP) 11.1.2 Expand Senior citizen's facilities and activities when feasible.

8. **Results Expected**:
The new floor will significantly decrease the potential for trips and falls. It will also decrease the potential for mold or other bacteria growth through the spread of mop water accumulated in the tears and holes. Will provide a safe environment to cook congregate and home delivered meals. 8.

9.

Time Frame/ Milestones: Upon full execution of the Grant Agreement the following tasks will commence to meet the time frame/milestones.	February 2024
Expected date City receives fully executed agreement	
Expected date City process the agreement	March 2024
RFP/Quotes Secured	April 2024
Bid Closing	May 2024
Bid Award to Contractor/Vendor	June 2024
Construction	July – November 2024
Project Completion & Review	November 2024
Submit Exhibit 1 – Monthly / Final Report Form & Request for Payment according to contractual requirements as set forth in Articles VIII & IX of the Grant Agreement	

10. **Responsible Staff** *(include Project Manager and Fiscal Contact):*

Contract ID# 24-780-P707-00510

STATE OF NEW MEXICO
CRIME VICTIMS REPARATION COMMISSION
INTERGOVERNMENTAL SERVICE AGREEMENT
CONTRACT #24-780-P707-00510

An Intergovernmental Service Agreement between **Board of Commissioners, City Las Cruces** and **New Mexico Crime Victims Reparation Commission.**

This Agreement is made and entered into by and between the State of **New Mexico Crime Victims Reparation Commission**, hereinafter referred to as "Agency," and **Board of Commissioners, City Las Cruces** (hereinafter referred to as "Contractor"). The contract is scheduled to begin on approximately April 10, 2024, or upon receiving all required state approvals, whichever is later.

IT IS AGREED BETWEEN THE PARTIES:

1. **Scope of Work.**
The Contractor shall perform the following:
- Will support the acquisition of cellular phones for the Las Cruces Police Department.
- Will support broadband services and related equipment for the organization of the Las Cruces Police Department.

2. **Compensation.**

A. The total amount payable to the Contractor under this Agreement, including gross receipts tax and expenses, shall not exceed $19,711.00 in FY24. This amount is a maximum and not a guarantee that the work assigned to Contractor under this Agreement to be performed shall equal the amount stated herein.

B. The Agency shall pay to the Contractor for services satisfactorily performed, pursuant to the scope of work and in accordance with the budget. Such compensation shall not exceed $19,711.00, including gross receipts tax in FY24. Payment is subject to availability of funds pursuant to the Appropriations Paragraph set forth below and to any negotiations between the parties from year to year pursuant to Paragraph I, Scope of Work. All invoices MUST BE received by the Agency no later than the tenth (10) day after the end of the month in which the services were delivered. Final invoice is due no later than July 10, 2024 for services rendered prior to June 30, 2024. Invoices received after such date WILL NOT BE PAID.

C. Contractor must submit monthly a detailed statement accounting for all services performed and expenses incurred. The Contractor will use the invoice and accounting sheet template provided by the Agency when submitting invoices. If the Agency finds that any work and/or expenses are not acceptable, within thirty days after the date of receipt of written notice from the Contractor that payment is requested, it shall provide the Contractor a letter of exception explaining the defect or objection to the work and/or expenditures, and -outlining steps the Contractor may take to provide remedial action. Upon certification by the Agency that the work and/or expenditures are accepted, payment shall be tendered to the Contractor within thirty days after the date of acceptance. If payment is made by mail, the payment shall be deemed tendered on the date it is postmarked. However, the

agency shall not incur late charges, interest, or penalties for failure to make payment within the time specified herein.

3. Term.

THIS AGREEMENT SHALL NOT BECOME EFFECTIVE UNTIL APPROVED BY THE AGENCY. This Agreement shall terminate on **JUNE 30, 2024**, unless terminated pursuant to Paragraph 4 (Termination), or Paragraph 5 (Appropriations). In accordance with NMSA 1978, Section 13-1-150, no contract term for a professional services contract, including extensions and renewals, shall exceed four years, except as set forth in NMSA 1978, Section 13- 1-150.

4. Termination.

A. Termination - This Agreement may be terminated by either of the parties hereto upon written notice delivered to the other party at least thirty (30) days prior to the intended date of termination. Except as otherwise allowed or provided under this Agreement, the Agency's sole liability upon such termination shall be to pay for acceptable work performed prior to the Contractor's receipt of the notice of termination, if the Agency is the terminating party, or the Contractor's sending of the notice of termination, if the Contractor is the terminating party; provided, however, that a notice of termination shall not nullify or otherwise affect either party's liability for pre-termination defaults under or breaches of this Agreement. The Contractor shall submit an invoice for such work within thirty (30) days of receiving or sending the notice of termination. Notwithstanding the foregoing, this Agreement may be terminated immediately upon written notice to the Contractor if the Contractor becomes unable to perform the services contracted for, as determined by the Agency or if, during the term of this Agreement, the Contractor or any of its officers, employees or agents is indicted for fraud, embezzlement or other crime due to misuse of state funds or due to the Appropriations paragraph herein. *THIS PROVISION IS NOT EXCLUSIVE AND DOES NOT WAIVE THE STATE'S OTHER LEGAL RIGHTS AND REMEDIES CAUSED BY THE CONTRACTOR'S DEFAULT/BREACH OF THIS AGREEMENT."*

B. Termination Management - Immediately upon receipt by either the Agency or the Contractor of notice of termination of this Agreement, the Contractor shall: 1) not incur any further obligations for salaries, services or any other expenditure of funds under this Agreement without written approval of the Agency; 2) comply with all directives issued by the Agency in the notice of termination as to the performance of work under this Agreement; and 3) take such action as the Agency shall direct for the protection, preservation, retention or transfer of all property titled to the Agency and records generated under this Agreement. Any non-expendable personal property or equipment provided to or purchased by the Contractor with contract funds shall become property of the Agency upon termination and shall be submitted to the agency as soon as practicable.

5. Appropriations.

The terms of this Agreement are contingent upon sufficient appropriation and authorization being made by the Legislature for the performance of this Agreement. If sufficient appropriations and authorization are not made by the NM Legislature, this Agreement shall terminate immediately upon written notice being given by the Agency to the Contractor. The Agency's decision as to whether sufficient appropriations are available shall be accepted by the Contractor and shall be final. If the

DocuSign Envelope ID: 65E5F2AD-BCCE-4DE5-8CF0-8886B0239601

Agency proposes an amendment to the Agreement to unilaterally reduce funding, the Contractor shall have the option to terminate the Agreement or to agree to the reduced funding, within thirty (30) days of receipt of the proposed amendment.

6. Assignment.

The Contractor shall not assign or transfer any interest in this Agreement or assign any claims for money due or to become due under this Agreement without the prior written approval of the Agency.

7. Subcontracting.

The Contractor shall not subcontract any portion of the services to be performed under this Agreement without the prior written approval of the Agency. No such subcontract shall the primary Contractor from its obligations and liabilities under this Agreement, nor shall any subcontract obligate direct payment from the Agency.

8. Confidentiality.

Any confidential information provided to or developed by the Contractor in the performance of this Agreement shall be kept confidential and shall not be made available to any individual or organization by the Contractor without the prior written approval of the Agency.
Exceptions to Confidentiality:

- Information which is or becomes publicly known through no fault of the Contractor;
- Information learned from a third party entitled to disclose it;
- Information already known to or developed by the Contractor before receipt from the Agency, as shown by the Contractor's prior written records;
- Information reasonably necessary to protect the Contractor's interests in a lawsuit, alternative dispute resolution process, or government investigation;
- Information reasonably necessary to process insurance claims;
- Information required by law to be disclosed;
- Information developed independently by the Contractor without use or reference to information provided by the Agency.

9. Product of Service - Copyright.

Contractor will retain ownership of all copyrightable materials created under this Agreement, except as otherwise specifically agreed. Contractor hereby grants to the Agency a nonexclusive license for noncommercial purposes in all works created under this Agreement in which Contractor retains a copyright. Contractor may retain title to, and apply for, patents for the products produced under this Agreement. The provisions of this paragraph are subject to any limitations or requirements that may be placed upon the parties by any state or federal law, rule, regulation, or condition of acceptance of the funding used in conjunction with the Agreement.

10. Conflict of Interest; Governmental Conduct Act.

The Contractor certifies that it presently has no interest and, during the term of this Agreement, shall not acquire any interest, direct or indirect, which would conflict in any manner or degree with the performance of work or services required under the Agreement. The Contractor certifies that the requirements of the Governmental Conduct Act, NMSA 1978, Sections 10-16-1 through 10-16-18, regarding contracting with a public officer or state employee or former state employee, have been followed.

DocuSign Envelope ID: 65E5F2AD-BCCE-4DE5-8CF0-8886B0239601

11. Amendment.

A. This Agreement shall not be altered, changed or amended except by instrument in writing executed by the parties hereto and all other required signatories.

B. If the Agency proposes an amendment to the Agreement to unilaterally reduce funding due to budget or other considerations, the Contractor shall have the option to terminate the Agreement or to agree to the reduced funding, within thirty (30) days of receipt of the proposed amendment.

12. Merger.

This Agreement incorporates all the Agreements, covenants and understandings between the parties hereto concerning the subject matter hereof, and all such covenants, Agreements and understandings have been merged into this written Agreement. No prior Agreement or understanding, oral or otherwise, of the parties or their agents shall be valid or enforceable unless embodied in this Agreement.

13. Penalties for violation of law.

The Procurement Code, NMSA 1978, Sections 13-1-28 through 13-1-199, imposes civil and criminal penalties for its violation. In addition, the New Mexico criminal statutes impose felony penalties for illegal bribes, gratuities, and kickbacks. The provisions of the Procurement Code (Sections 13-1-28 through 13-1-199 NMSA 1978) shall not apply to: Procurement of items of tangible personal property or services by a state agency or a local public body from a state agency, a local public body or external procurement unit except as otherwise provided in Sections 13-1-135 through 13-1-137 NMSA 1978 (NMSA 1978, Section 13-1-98(A)).

14. Equal Opportunity Compliance.

The Contractor agrees to abide by all federal and state laws and rules and regulations, and executive orders of the Governor of the State of New Mexico, pertaining to equal employment opportunity. In accordance with all such laws of the State of New Mexico, the Contractor assures that no person in the United States shall, on the grounds of race, religion, color, national origin, ancestry, sex, age, physical or mental handicap, or serious medical condition, spousal affiliation, sexual orientation or gender identity, be excluded from employment with or participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity performed under this Agreement. If Contractor is found not to be in compliances with these requirements during the life of this Agreement, Contractor agrees to take appropriate steps to correct these deficiencies.

15. Applicable Law.

The laws of the State of New Mexico shall govern this Agreement, without giving effect to its choice of law provisions. Venue shall be proper only in a New Mexico court of competent jurisdiction in accordance with NMSA 1978, Section 38-3-1(G). By execution of this Agreement, Contractor acknowledges and agrees to the jurisdiction of the courts of the State of New Mexico over any and all lawsuits arising under or out of any term of this Agreement.

DocuSign Envelope ID: 65E5F2AD-BCCE-4DE5-8CF0-8886B0239601

16. Workers Compensation.

The Contractor agrees to comply with state laws and rules applicable to workers compensation benefits for its employees. If the Contractor fails to comply with the Workers Compensation Act and applicable rules when required to do so, this Agreement may be terminated by the Agency.

17. Records and Financial Audit.

The Contractor shall maintain detailed expenditure records that indicate the date, nature and cost of services rendered during the Agreement's term and effect and retain them for a period of three (3) years from the date of final payment under this Agreement. The records shall be subject to inspection by the Agency, the Department of Finance and Administration and the Auditor. The Agency shall have the right to audit billings both before and after payment. Payment under this Agreement shall not foreclose the right of the Agency to recover excessive or illegal payments

18. Liability.

As between the parties, each party acknowledges that it will be responsible for claims or damages arising from personal injury or damage to persons or property to the extent they result from the negligence of that party's employees or agents. The liability of the Contractor shall be subject in all cases to the immunities and limitations of the New Mexico Tort Claims Act, NMSA 1978, Sections 41-4-1 through 41-4-30.

19. Invalid Term or Condition.

If any term or condition of this Agreement shall be held invalid or unenforceable, the remainder of this Agreement shall not be affected and shall be valid and enforceable.

20. Enforcement of Agreement.

A party's failure to require strict performance of any provision of this Agreement shall not waive or diminish that party's right thereafter to demand strict compliance with that or any other provision. No waiver by a party of any of its rights under this Agreement shall be effective unless express and in writing, and no effective waiver by a party of any of its rights shall be effective to waive any other rights.

21. Notices.

Any notice required to be given to either party by this Agreement shall be in writing and shall be delivered in person, by courier service or by U.S. mail, either first class or certified, return receipt requested, postage prepaid, as follows:

Title: **A RESOLUTION AUTHORIZING AN AMENDMENT TO THE FY2024 BUDGET AND CAPITAL IMPROVEMENTS PROGRAM (CIP) FOR THE BONDS DESIGNATED AS TAXABLE GENERAL OBLIGATION IMPROVEMENT BONDS, SERIES 2024 (2024 GO BONDS).**

TYPE OF ACTION: ☒ **Administrative** ☐ **Legislative** ☐ **Quasi-Judicial**

PURPOSE(S) OF ACTION:
To amend the FY2024 Budget and FY2024 CIP.

BACKGROUND / KEY ISSUES / CONTRIBUTING FACTORS:
On August 1, 2022, City Council approved Resolution 23-015 calling for the submission of General Obligation Bond questions to all qualified voters at the general election held on November 8, 2022. There were four (4) questions submitted to the Dona Ana County Clerk. All four (4) questions were approved.

On March 04, 2024, City Council approved Ordinance 3062, Attachment "A", which authorized City staff to issue and sell Taxable General Obligation Improvement Bonds, Series 2024 (2024 GO Bonds) in the principal amount of $6,000,000, payable from Ad Valorem Taxes levied on all taxable property within the City.

The budget adjustment is to issue a budget for bond proceeds, debt issuance cost, and expenditures related to one (1) of the four (4) questions. City Council approval of this Resolution will authorize the adjustment to the FY2024 Budget and FY2024 CIP to allow expenditures of the 2024 GO Bond proceeds.

DOES THIS AMEND THE BUDGET?:

☒ Yes
☐ No

BUDGET / FISCAL IMPACT:

BUDGETED AMOUNT: Various **AVAILABLE AMOUNT:** $0 **EXPENDITURE AMOUNT:** Various

Funding Source(s):
See Attached Exhibit "A"

Overall Budget Impact:
Increase the budget for the GO Bond, Series 2024 Bonds.

Does this action amend the Capital Improvement Plan (CIP)?
☒ Yes
☐ No

Does this action align with Elevate Las Cruces?
☒ Yes
☐ No

OPTIONS / ALTERNATIVES:

1. Vote "Yes"; this will authorize a budget adjustment for proceeds and expenses associated with the GO Bond, Series 2024 Bonds.
2. Vote "No"; this will not authorize a budget adjustment for proceeds and expenses associated with the GO Bond, Series 2024 Bonds.
3. Vote to "Amend"; this could delay the expenditures for the one (1) GO Bond question where the GO Bond, Series 2024 Bonds is the funding source.
4. Vote to "Table"; this could delay the expenditures to complete the one (1) GO Bond question where the GO Bond, Series 2024 Bonds is the funding source.

A RESOLUTION AUTHORIZING AN AMENDMENT TO THE FY2024 BUDGET AND CAPITAL IMPROVEMENTS PROGRAM (CIP) FOR THE BONDS DESIGNATED AS TAXABLE GENERAL OBLIGATION IMPROVEMENT BONDS, SERIES 2024 (2024 GO BONDS).

The City Council is informed that:

WHEREAS, on August 1, 2022, City Council approved Resolution No. 23-015, calling for the submission of General Obligation Bond questions to all qualified voters at the general election held on November 8, 2022; and

WHEREAS, on March 04, 2024, City Council adopted Ordinance 3062 as shown in Attachment "A" for the issuance and sale of Taxable General Obligation Improvement Bonds, Series 2024; and

WHEREAS, the FY2024 Budget and FY2024 CIP will be amended to allow expenditures of the GO Bond, Series 2024 Bond proceeds.

NOW, THEREFORE, Be it Resolved by the Governing Body of the City of Las Cruces:

(I)

THAT the FY2024 Budget is hereby amended as shown in Exhibit "A", attached hereto and made a part of this Resolution.

(II)

THAT the FY2024 CIP, is hereby amended as shown in Exhibit "B", attached hereto and made a part of this Resolution, are hereby approved.

(III)

THAT City staff is hereby authorized to do all deeds as necessary in the accomplishment of the herein above.

ORDINANCE 3062; COUNCIL BILL 24-020

AN ORDINANCE AUTHORIZING THE ISSUANCE AND SALE OF CITY OF LAS CRUCES, NEW MEXICO, TAXABLE GENERAL OBLIGATION IMPROVEMENT BONDS, SERIES 2024, IN THE PRINCIPAL AMOUNT OF $6,000,000, PAYABLE FROM AD VALOREM TAXES LEVIED ON ALL TAXABLE PROPERTY WITHIN THE CITY, LEVIED WITHOUT LIMIT AS TO RATE OR AMOUNT; PROVIDING FOR THE FORM, CERTAIN TERMS AND CONDITIONS OF THE BONDS, THE MANNER OF THEIR EXECUTION, AND THE METHOD OF AND SECURITY FOR PAYMENT THEREOF; PROVIDING FOR THE METHOD OF SALE OF THE BONDS PURSUANT TO A PUBLIC COMPETITIVE SALE; PROVIDING FOR THE MATURITY DATES AND AMOUNTS, INTEREST RATES, PRICES, REDEMPTION FEATURES AND OTHER FINAL TERMS OF THE BONDS TO BE ESTABLISHED IN AN AWARD CERTIFICATE; DELEGATING AUTHORITY TO THE CITY MANAGER AND CITY FINANCIAL SERVICES DIRECTOR TO AWARD THE BONDS TO THE PURCHASER; AND PROVIDING FOR OTHER DETAILS CONCERNING THE BONDS.

The City Council is informed that:

WHEREAS, at the general obligation bond election held for the City of Las Cruces (the "City"), State of New Mexico, on the 8th day of November, 2022, the electors of the City authorized the City Council, the governing body of the City (the "Governing Body") to contract bonded indebtedness on behalf of the City and upon the credit thereof by issuing its City of Las Cruces, New Mexico Taxable General Obligation Improvement Bonds, Series 2024 (the "Bonds") to secure funds for the following purposes in the following amounts:

Purpose	Amount Authorized By Election	Amount Previously Issued	Amount to Be Issued
Shall the City of Las Cruces issue general obligation bonds, payable from property taxes, in an amount up to $6,000,000 and placed into the Affordable Housing Trust Fund, to provide resources to plan, design, construct, acquire, and preserve housing affordable for low to moderate income households, including acquisition of necessary land?	$6,000,000	$0	$6,000,000

WHEREAS, the Governing Body has determined, and does hereby determine, that it is necessary and in the best interest of the City and the inhabitants thereof that the $6,000,000 of the general obligation bonds authorized at the election (the "Bonds"), be authorized for issuance at this time; provided, however, that a satisfactory price for the Bonds be obtained in a public sale; and

WHEREAS, the Governing Body expects to sell the Bonds in a public competitive sale to the best bidder, as determined pursuant to the Award Certificate (as defined herein) supplementing this Bond Ordinance; and

WHEREAS, the Governing Body desires to delegate authority to the City Manager or City Financial Services Director (collectively, the "Delegate") (1) to determine the specific principal amounts, interest rates, maturity dates, prices, redemption features, and other final terms and features of the Bonds, including, without limitation, provisions concerning a Bond Insurance Policy (if any), (2) to execute and deliver an award certificate establishing the final terms of the Bonds (the "Award Certificate") as authorized by Section 6-14-10.2 NMSA 1978, and (3) to award the Bonds to the best bidder for the Bonds (the "Purchaser") provided that the

final terms of the Bonds set forth in the Award Certificate be within the parameters set forth in this Ordinance; and

WHEREAS, the Governing Body intends that the specific details of and requirements for bidding for the Bonds shall be provided in an official notice of sale (the "Notice of Sale") to be approved on behalf of the City by the City Financial Services Director or Treasurer or her designee; and

NOW, THEREFORE, Be it Ordained by the Governing Body of the City of Las Cruces:

(I)

Section 1.Ratification. All actions heretofore taken by the Governing Body and the officers and employees of the City directed toward the issuance and sale of the Bonds to secure funds for the Improvement Project (as defined herein) be, and the same hereby are, ratified, approved and confirmed.

Section 2.Improvement Project Authorization. Proceeds of the Bonds are hereby authorized to be placed into the Affordable Housing Trust Fund, to provide resources to plan, design, construct, acquire, and preserve housing affordable for low to moderate income households, including acquisition of necessary land and to pay the costs of issuance of the Bonds (collectively, the "Improvement Project").

Section 3.Findings.

A.The issuance of the Bonds under the home rule powers of the City granted by the City Charter, this Bond Ordinance, Sections 6-14-8 through 6-14-11 NMSA 1978, and Sections 6-15-1 through 6-15-22 NMSA 1978, for the purpose of providing funds to finance the costs of the Improvement Project, is necessary and in the interest of the public health, safety, morals and welfare of the residents of the City.

B.The Bonds shall be authorized by an affirmative vote of a majority of all the members of the Council.

C.The City will finance the costs of the Improvement Project, in whole or in part, with the proceeds of the Bonds.

D.The Net Effective Interest Rate on the Bonds shall not exceed the statutory maximum of 10% per annum.

Section 4.Bonds are General Obligations. The Bonds shall constitute the general obligation debt of the City, payable from general ad valorem taxes which shall be levied without limitation as to the rate or amount. The full faith and credit of the City shall be, and hereby is, irrevocably pledged to the payment of the principal of and interest on the Bonds.

Section 5.Authorization, Parameters and Detail.

A.Authorization. This Bond Ordinance has been adopted by the affirmative vote of a majority of all of the members of the Council. For the purpose of protecting the public health, conserving the property, and protecting the general welfare and prosperity of the citizens of the City, it is hereby declared necessary that the City, pursuant to the Act, issue its negotiable, fully registered, general obligation bonds in one or more series in the total aggregate principal amount not to exceed $6,000,000 to be designated in the Award Certificate as the "City of Las Cruces, New Mexico Taxable General Obligation Improvement Bonds, Series 2024," and the issuance, sale and delivery of the Bonds is hereby authorized.

The forms of the Continuing Disclosure Undertaking and Preliminary Official Statement as presented to the Governing Body, with the adoption of this Ordinance, and the sale of the Bonds to the Purchaser within the parameters set forth in this Ordinance are hereby approved by the Governing Body with the approval of the final terms of the Bonds to be accepted in the Award Certificate, and approval of the final forms of the

Preliminary Official Statement and Continuing Disclosure Undertaking delegated to the Delegate or designee as permitted by Section 6-14-10.2 NMSA 1978. The use and distribution of the Preliminary Official Statement and Official Statement by the Purchaser in connection with the sale of the bonds to the public are hereby ratified, authorized, approved and acknowledged.

B.Parameters Authorized. The Bonds shall be issued subject to the following parameters:

(1)The Bonds shall be issued in an aggregate principal amount not to exceed $6,000,000 for the Improvement Project.

(2)The net effective interest rate on the Bonds shall not exceed 10% per annum.

(3)The final maturity of the Bonds shall not be later than August 1, 2043.

(4)The Bonds shall be sold pursuant to a public competitive sale.

(5)The Purchaser's discount shall not exceed 4% of the par amount of the Bonds.

(6)The Bonds shall be in substantially the form set forth in this Ordinance.

(7)The Bonds shall not be sold for less than the par amount of Bonds plus accrued interest from the date of the Bonds to the date of delivery of the Bonds to the Purchaser.

(8)The Bonds shall be dated as of their date of issuance and delivery.

(9)The Bonds shall be issued as federally taxable under the Internal Revenue Code of 1986.

The Delegate is hereby authorized pursuant to this Ordinance to award the Bonds to the Purchaser, to approve the final terms of the Bonds as permitted by Section 6-14-10.2 NMSA 1978, and to execute and deliver the Award Certificate consistent with the parameters set forth in this Ordinance.

C.Details of Bonds.

(1)The forms, terms, and provisions of the Bonds in the form set forth in Section 11 are hereby approved with only such changes therein as are not inconsistent with this Bond Ordinance and as shall be approved in the Award Certificate.

(2)The Bonds shall be negotiable instruments but shall be issued only as fully registered bonds, in such numbers and denominations as may be requested by the Purchaser, but exchangeable for other fully registered Bonds of any denominations which are multiples of $5,000. The Bonds shall be numbered separately and consecutively, shall be dated the date of their delivery to the Purchaser, shall mature on August 1 of each year and shall bear interest from the most recent date to which interest has been paid or provided for or, if no interest has been paid or provided for, from their date, payable semi-annually on February 1 and August 1 in each year commencing on August 1, 2024, or such other date specified in the Award Certificate, until their respective maturities. The Bonds shall bear the rates of interest, maturities and provisions for redemption prior to maturity as shall be established in the Award Certificate.

D.Notice of Sale. The Official Notice of Sale appended to the form of preliminary official statement presented to the Governing Body in connection with this Ordinance (the "Preliminary Official Statement") is hereby approved with such changes as are approved by the City Financial Services Director consistent with this Ordinance. The City Financial Services Director is hereby authorized and directed to have published once, at least one week prior to the date of sale, a summary of the notice of sale of the Bonds in a newspaper of general circulation in the City, and the City Financial Services Director is hereby authorized and directed to give such other notice of the bond sale as she shall determine, including the publication of the notice in

financial papers and periodicals and the distribution among investment bankers and others of the Preliminary Official Statement.

E.Final Terms; Award of Bonds. The exact principal amounts, maturity dates, interest rates, prices, redemption features and other final terms of the Bonds shall be as set forth in the Award Certificate. The Bonds shall be awarded to the Purchaser as provided in the Award Certificate.

F.Series Date; Numbering; Interest Payment Dates. The Bonds shall be dated the date of delivery (herein the "Series Date"), will be issued in one or more series and shall consist of bonds numbered consecutively from R-1 upward, issuable in the denomination of $5,000 each or integral multiples thereof (provided that no individual bond will be issued for more than one maturity); shall bear interest from the Series Date to maturity at the rates set forth in the Award Certificate, payable to the registered owner thereof, or registered assigns, on August 1, 2024, (or such other date as set forth in the Award Certificate) and semiannually thereafter on February 1 and August 1 in each year in which the Bonds are outstanding and shall mature on August 1 of each year as set forth in the Award Certificate.

Section 6.Redemption of Bonds Prior to Maturity.

A.Optional Redemption and Mandatory Sinking Fund Redemption. Redemption of the Bonds prior to maturity at the option of the City shall be as provided in the Award Certificate. The Bonds may be subject to mandatory sinking fund redemption as set forth in the Award Certificate.

B.Notice of Redemption. Notice of redemption shall be given by the Registrar/Paying Agent by sending a copy of such notice by first-class, postage prepaid mail at least thirty (30) days prior to the redemption date to the registered owner of each Bond, or portion thereof, to be redeemed at the address shown as of the close of business of the Registrar/Paying Agent on the fifth day prior to the mailing of notice on the registration books kept by the Registrar/Paying Agent. The City shall give notice of redemption of the Bonds to the Registrar/Paying Agent at least forty-five (45) days prior to the redemption date. The Registrar/Paying Agent's failure to give such notice to the registered owner of any Bond, or any defect therein, shall not affect the validity of the proceedings for the redemption of any Bonds for which proper notice was given. Notices of redemption shall specify the maturity dates and the number or numbers of the Bonds to be redeemed (if less than all are to be redeemed) and if less than the full amount of any Bond is to be redeemed, the amount of such Bond to be redeemed, the date fixed for redemption, and that on such redemption date there will become and be due and payable upon each Bond to be redeemed at the office of the Registrar/Paying Agent the principal amount to be redeemed plus accrued interest to the redemption date and that from and after such date interest will cease to accrue on such amount. Such notice may be a conditional notice of redemption – the money required to pay the principal of and interest on the Bonds to be called for redemption need not be on deposit with the Registrar/Paying Agent at the time of mailing the conditional notice of redemption. Notice having been given in the manner hereinbefore provided, the Bond or Bonds so called for redemption shall become due and payable on the redemption date so designated and if an amount of money sufficient to redeem all Bonds called for redemption shall on the redemption date be on deposit with the Registrar/Paying Agent, the Bonds to be redeemed shall be deemed not outstanding and shall cease to bear interest from and after such redemption date. Upon presentation of the Bonds to be redeemed at the office of the Registrar/Paying Agent, the Registrar/Paying Agent will pay the Bond or Bonds so called for redemption with funds deposited with the Registrar/Paying Agent by the City.

Section 7.Execution of Bonds.

A.The Bonds shall bear the facsimile or manual signature of the Mayor of the City and shall be attested by the facsimile or manual signature of the City Clerk and shall bear the facsimile or original seal of the City. The Bonds shall be authenticated by the manual signature of an authorized officer of the Registrar/Paying Agent. The Bonds bearing the signatures or facsimile signatures of the officers in office at the time of the signing thereof shall be the valid and binding obligations of the City, notwithstanding that before the delivery of the Bonds and payment therefor, or before the issuance thereof upon transfer or exchange, any or all of the persons whose signatures appear on the Bonds shall have ceased to fill their respective offices. The Mayor

and City Clerk may, by the execution of a signature certificate pertaining to the Bonds, adopt as and for their respective signatures the facsimiles thereof appearing on the Bonds; and, at the time of the execution of the signature certificate, the Mayor and City Clerk may each adopt as and for his or her facsimile signature the facsimile signature of his or her predecessor in office in the event that such facsimile signature appears upon any of the Bonds. If facsimile signatures are to appear on the Bonds, the Mayor and City Clerk, pursuant to Sections 6-9-1 through 6-9-6, inclusive, NMSA 1978, shall each forthwith file his or her manual signature, certified by him or her under oath, with the Secretary of State of New Mexico, provided that such filing shall not be necessary for any officer where any previous filing shall have application to the Bonds.

B.No Bond shall be valid or obligatory for any purpose unless the certificate of authentication, substantially in the form hereinafter provided, has been duly executed by the Registrar/Paying Agent. The Registrar/Paying Agent's certificate of authentication shall be deemed to have been duly executed by it if manually signed by an authorized officer of the Registrar/Paying Agent, but it shall not be necessary that the same officer sign the certificate of authentication on all of the Bonds issued hereunder.

Section 8. Registration of Bonds.

A.Books for the registration and transfer of the Bonds shall be kept by the City Treasurer, as Registrar/Paying Agent, who is hereby appointed by the City as registrar and as paying agent for the Bonds. Upon the surrender for transfer of any Bond at the principal office of the Registrar/Paying Agent, duly endorsed for transfer or accompanied by an assignment duly executed by the registered owner or his attorney duly authorized in writing, the Registrar/Paying Agent shall authenticate and deliver not more than three business days after receipt of the Bond to be transferred in the name of the transferee or transferees a new Bond or Bonds in fully registered form of the same aggregate principal amount of authorized denominations, and of the same maturity, interest rate and series, bearing a number or numbers not contemporaneously outstanding. Bonds may be exchanged at the principal office of the Registrar/Paying Agent for an equal aggregate principal amount of Bonds of other authorized denominations, and of the same maturity, series and interest rate. The Registrar/Paying Agent shall authenticate and deliver not more than three business days after receipt of the Bond to be exchanged a Bond or Bonds which the registered owner making the exchange is entitled to receive, bearing a number or numbers not contemporaneously outstanding. Exchanges and transfers of Bonds as herein provided shall be without charge to the owner or any transferee, but the Registrar/Paying Agent may require the payment or reimbursement by the owner of any Bond requesting exchange or transfer of any transfer fee, tax or other governmental charge required to be paid with respect to such exchange or transfer. The Registrar/Paying Agent shall close the registration books fifteen days prior to each interest payment date for change of name or address of the registered owners. Transfers shall be permitted within fifteen days prior to each interest payment date but such transfer will not include transfer of interest payable on such interest payment date.

B.The person in whose name any Bond shall be registered on the registration books kept by the Registrar/Paying Agent, shall be deemed and regarded as the absolute owner thereof for the purpose of making payment thereof and for all other purposes except as may otherwise be provided in this ordinance with respect to payment of interest; and payment of or on account of either principal or interest on any Bond shall be made only to or upon the written order of the registered owner thereof or his legal representative, but such registration may be changed upon transfer of such Bond in the manner and subject to the conditions and limitations provided herein. All such payments shall be valid and effectual to discharge the liability upon such Bond to the extent of the sum or sums so paid.

C.If any Bond shall be lost, stolen, destroyed or mutilated, the Registrar/Paying Agent shall, upon receipt of the mutilated Bond and such evidence, information or indemnity relating thereto as it may reasonably require and as may be required by law, authenticate and deliver a replacement Bond or Bonds of a like aggregate principal amount of authorized denominations, and of the same maturity, interest rate and series, bearing a number or numbers not contemporaneously outstanding. If such lost, stolen, destroyed or mutilated Bond shall have matured, the Registrar/Paying Agent may pay such Bond in lieu of replacement.

D.Bonds which are reissued upon transfer, exchange or other replacement shall bear interest from the most recent interest payment date to which interest has been fully paid or provided for in full or, if no interest has been paid, from the Series Date.

E.The officers of the City are authorized to deliver to the Registrar/Paying Agent fully executed but unauthenticated Bonds in such quantities as may be convenient to be held in custody by the Registrar/Paying Agent pending use as herein provided.

F.Whenever any Bond shall be surrendered to the Registrar/Paying Agent upon payment thereof, or to the Registrar/Paying Agent for transfer, exchange or replacement as provided herein, such Bond shall be promptly canceled by the Registrar/Paying Agent, and counterparts of a certificate of such cancellation shall be furnished by the Registrar/Paying Agent to the City.

G.The Bonds may be issued or registered, in whole or in part, in book-entry form from time to time with no physical distribution of bond certificates made to the public, with a depository acting as securities depository for the Bonds. A single certificate for each maturity date of the Bonds issued in book-entry form will be delivered to the depository and immobilized in its custody. The book-entry system will evidence ownership of the Bonds in authorized denominations, with transfer of ownership effected on the books of the depository and its participants ("Participants"). As a condition to delivery of the Bonds in book-entry form, the purchaser will, immediately after acceptance of delivery thereof, deposit, or cause to be deposited, the Bond certificates with the depository, registered in the name of the depository or its nominee. Principal, premium, if any, and interest will be paid to the depository or its nominee as the registered owner of the Bonds. The transfer of principal, premium, if any, and interest payments to Participants will be the responsibility of the depository; the transfer of principal, premium, if any, and interest payments to the beneficial owners of the Bonds (the "Beneficial Owners") will be the responsibility of Participants and other nominees of Beneficial Owners maintaining a relationship with Participants (the "Indirect Participants"). The City will not be responsible or liable for maintaining, supervising or reviewing the records maintained by the depository, Participants or Indirect Participants.

(1)If (i) the Bonds are not eligible for the services of the depository, (ii) the depository determines to discontinue providing its services with respect to the Bonds or (iii) the City determines that a continuation of the system of book-entry transfers through the depository ceases to be beneficial to the City or the Beneficial Owners, the City will either identify another depository or certificates for the Bonds will be delivered to the Beneficial Owners or their nominees, and the Beneficial Owners or their nominees, upon authentication of Bonds and registration of those Bonds in the Beneficial Owners' or nominees' names, will become the owners of the Bonds for all purposes. In that event, the City shall mail an appropriate notice to the depository for notification to Participants, Indirect Participants and Beneficial Owners of the substitute depository or the issuance of bond certificates to Beneficial Owners or their nominees, as applicable.

(2)Authorized Officers of the City are authorized to sign agreements with the depository relating to the matters set forth in this Section.

(3)Notwithstanding any other provision of this ordinance, so long as all of the Bonds are registered in the name of the depository or its nominee, all payments of principal, premium, if any, and interest on the Bonds, and all notices with respect to the Bonds, shall be made and given by the Registrar/Paying Agent or the City to the depository as provided in this ordinance and by the depository to its Participants or Indirect Participants and to the Beneficial Owners of the Bonds.

Section 9. Successor Registrar/Paying Agent. If the Registrar/Paying Agent initially appointed hereunder shall resign, or if the City shall reasonably determine that such Registrar/Paying Agent has become incapable of fulfilling its duties hereunder, the City may, upon notice mailed to each registered owner of Bonds at the address last shown on the registration books, appoint a successor registrar/paying agent. Every such successor registrar/paying agent shall be a bank or trust company located in and in good standing in the

United States and having shareholders' equity (e.g., capital stock, surplus and undivided profits), however denominated, of not less than $10,000,000.

Section 10.Bonds Negotiable. Subject to the registration provisions hereof, the Bonds hereby authorized shall be fully negotiable and shall have all the qualities of negotiable paper, and the registered owner or owners thereof shall possess all rights enjoyed by the holders of negotiable instruments under the provisions of the Uniform Commercial Code.

Section 11.Form of Bonds. The Bonds shall be in substantially the following form:

[Form of Bond]

REGISTERED REGISTERED

NO. R-____ $

UNITED STATES OF AMERICA
STATE OF NEW MEXICO
CITY OF LAS CRUCES
DOÑA ANA COUNTY, NEW MEXICO
TAXABLE GENERAL OBLIGATION IMPROVEMENT BONDS
SERIES 2024

Registered Owner:

Principal Amount: _____ DOLLARS

Interest Rate	Maturity Date	Series Date
____% per annum	August 1, _____	_____, 2024

The City Council of the City of Las Cruces (the "Governing Body "), on the faith, credit and behalf of the City of Las Cruces, Doña Ana County, New Mexico (the "City"), for value received, hereby promises to pay to the registered owner named above, or registered assigns, the principal amount hereof on the Maturity Date and to pay interest on the principal amount at the Interest Rate on August 1, 2024, and thereafter on February 1 and August 1 of each year (the "Interest Payment Date") from the Series Date to its maturity. The principal of the bonds of the series of which this is one (the "Bonds") and interest due at maturity shall be payable to the registered owner thereof as shown on the registration books kept by the City Treasurer, as "registrar/paying agent" (such registrar/paying agent and any successor thereto, the "Registrar/Paying Agent") for the Bonds, upon maturity and upon presentation and surrender thereof at the principal office of the Registrar/Paying Agent. If any Bond shall not be paid upon such presentation and surrender at or after maturity, it shall continue to draw interest at the rate borne by said Bond until the principal thereof is paid in full. Payment of interest on the Bonds (other than at maturity) shall be made by check or draft mailed by the Registrar/Paying Agent (or by such other arrangement as may be mutually agreed to by the Registrar/Paying Agent and such registered owner), on or before each Interest Payment Date (or, if such Interest Payment Date is not a business day, on or before the next succeeding business day), to the registered owner thereof as of the close of business on the Record Date (defined below) at his address as it appears on the registration books kept by the Registrar/Paying Agent. All such payments shall be made in lawful money of the United States of America. The term "Record Date" as used herein with respect to any Interest Payment Date shall mean the 15th day of the month preceding the Interest Payment Date. The person in whose name any Bond is registered at the close of business on any Record Date with respect to any Interest Payment Date shall be entitled to receive the interest payable thereon on such Interest Payment Date notwithstanding any transfer or exchange thereof subsequent to such Record Date and prior to such Interest Payment Date; but interest on any Bond which is not timely paid or duly provided for shall cease to be payable as provided above and shall be payable to the

person in whose name such Bond is registered at the close of business on a special record date (the "Special Record Date") fixed by the Registrar/Paying Agent for the payment of any such overdue interest. The Special Record Date shall be fixed by the Registrar/Paying Agent whenever moneys become available for payment of overdue interest, and notice of any such Special Record Date shall be given not less than ten days prior thereto, by first-class mail, to the registered owners of the Bonds as of the fifth day preceding the mailing of such notice by the Registrar/Paying Agent, stating the Special Record Date and the date fixed for the payment of overdue interest.

The Bonds are fully registered and are issuable in denominations of $5,000 and any integral multiple thereof (provided that no individual bond may be issued for more than one maturity).

The series of Bonds of which this bond is one is limited to the total principal amount of $6,000,000 of like tenor except as to number, denomination, maturity date, and interest rate, issued by the City of Las Cruces, Doña Ana County, New Mexico, for the purposes of providing funds to be placed into the Affordable Housing Trust Fund, to provide resources to plan, design, construct, acquire, and preserve housing affordable for low to moderate income households, including acquisition of necessary land and to pay the costs of issuance of the Bonds.

The Bonds are issued under the authority of and in full conformity with the charter of the City, the Constitution and laws of the State of New Mexico (particularly Sections 3-30-1 through 3-30-9 NMSA 1978, the provisions of Sections 6-14-8 through 6-14-11 NMSA 1978, Sections 6-15-1 through 6-15-22 NMSA 1978, and acts amendatory and supplemental thereto), and pursuant to Ordinance No. 3062 of the Governing Body duly adopted on March 4, 2024 and made a law of the City prior to the issuance of this bond (the "Bond Ordinance").

The Bonds maturing on or after August 1, 20__, are subject to prior redemption at the City's option on and after August 1, 20___, in whole or in part at any time, in one or more units of principal of $5,000 in such order of maturities as the City may determine (and by lot if less than all of the Bonds of any maturity are called, such selection by lot to be made by the Registrar/Paying Agent in such manner as it shall consider appropriate and fair) The purchase price for Bonds selected for redemption will be equal to the principal amount of each bond (or portion thereof) so redeemed, plus accrued interest thereon to the redemption date.

The Registrar/Paying Agent will maintain the books of the City for the registration of ownership of the Bonds. Upon the surrender for transfer of any Bond at the principal office of the Registrar/Paying Agent, duly endorsed for transfer or accompanied by an assignment duly executed by the registered owner or his attorney duly authorized in writing, the Registrar/Paying Agent shall authenticate and deliver not more than three business days after receipt of the Bond to be transferred in the name of the transferee or transferees a new Bond or Bonds in fully registered form of the same aggregate principal amount of authorized denominations, and of the same maturity, interest rate and series, bearing a number or numbers not contemporaneously outstanding. Bonds may be exchanged at the principal office of the Registrar/Paying Agent for an equal aggregate principal amount of Bonds of other authorized denominations, and of the same maturity, series and interest rate. The Registrar/Paying Agent shall authenticate and deliver not more than three business days after receipt of the Bond to be exchanged a Bond or Bonds which the registered owner making the exchange is entitled to receive, bearing a number or numbers not contemporaneously outstanding. Exchanges and transfers of Bonds as herein provided shall be without charge to the owner or any transferee, but the Registrar/Paying Agent may require the payment or reimbursement by the owner of any Bond requesting exchange or transfer of any transfer fee, tax or other governmental charge required to be paid with respect to such exchange or transfer. The Registrar/Paying Agent shall close the registration books fifteen days prior to each Interest Payment Date for change of name or address of the registered owners. Transfers shall be permitted within fifteen days prior to each Interest Payment Date but such transfer will not include transfer of interest payable on such Interest Payment Date.

The person in whose name any Bond shall be registered on the registration books kept by the Registrar/Paying Agent, shall be deemed and regarded as the absolute owner thereof for the purpose of making payment thereof and for all other purposes except as may otherwise be provided with respect to

payment of interest; and payment of or on account of either principal or interest on any Bond shall be made only to or upon the written order of the registered owner thereof or his legal representative, but such registration may be changed upon transfer of such Bond in the manner and subject to the conditions and limitations provided herein. All such payments shall be valid and effectual to discharge the liability upon such Bond to the extent of the sum or sums so paid.

If any Bond shall be lost, stolen, destroyed or mutilated, the Registrar/Paying Agent shall, upon receipt of the mutilated Bond and such evidence, information or indemnity relating thereto as it may reasonably require and as may be required by law, authenticate and deliver a replacement Bond or Bonds of a like aggregate principal amount of authorized denominations, and of the same maturity, interest rate and series, bearing a number or numbers not contemporaneously outstanding. If such lost, stolen, destroyed or mutilated Bond shall have matured, the Registrar/Paying Agent may pay such Bond in lieu of replacement.

For the punctual payment of the principal of and interest on this bond as aforesaid and for the levy and collection of taxes in accordance with the statutes authorizing the issuance of this bond, the full faith and credit of the City is hereby irrevocably pledged. The Governing Body has, by the Bond Ordinance, ordered the creation of an interest and sinking fund for the payment of the Bonds. Such fund is to be held in trust for the benefit of the owner or owners of the Bonds.

It is hereby certified, recited and warranted that all the requirements of law have been complied with by the proper officials of the City in the issuance of this bond; that the total indebtedness of the City, including that of this bond, does not exceed any limit of indebtedness prescribed by the Constitution or laws of the State of New Mexico; that provision has been made for the levy and collection of annual taxes sufficient to pay the principal of and the interest on this bond when the same become due. This bond shall not be valid or obligatory for any purpose until the Registrar/Paying Agent shall have manually signed the certificate of authentication hereon.

IN TESTIMONY WHEREOF, the Governing Body of the City of Las Cruces, in Doña Ana County, New Mexico, constituting the governing board of the City, has caused the seal of the City to be hereto affixed and this bond to be signed and executed with the facsimile or manual signature of the Mayor of the City and subscribed and attested with the facsimile or manual signature of the City Clerk, all as of the Series Date.

Section 12.Delivery of Bonds. When the Bonds have been duly executed and authenticated, they shall be delivered to the Purchaser named in the Award Certificate. The funds realized from the sale of the Bonds shall be applied solely to the specified purposes for which the Bonds were issued, but the Purchaser of the Bonds shall in no manner be responsible for the application of or disposal by the City, or any of its officers, of any of the funds derived from the sale thereof.

Section 13.Levy of Taxes. In order to pay the principal of and interest on the Bonds as they become due and, at the option of the City, to reimburse the general fund or other funds for the payment of principal of or interest on the Bonds for which property taxes were not available, there shall be an annual assessment and levy upon all of the taxable property of the City subject to taxation which provides an amount sufficient to pay the principal of and the interest on the Bonds as they become due and payable. However, the City may, at its option, apply any other funds lawfully available for the purpose to the payment of principal or interest on the Bonds as they become due, and the levies required by this Section may be reduced to the extent other revenues are or will be available and used for payment of the Bonds. To the extent property taxes are not available for that purpose, the principal of and interest accruing on the Bonds shall be paid from the City's general fund or from any other fund lawfully available for that purpose. The taxes shall be assessed, levied and collected annually at the time and in the manner as other City taxes are assessed, levied and collected. Annually, the Governing Body shall take all reasonable action to insure the levy and collection of taxes by the governmental authority charged with legal responsibility to levy and collect taxes in amounts sufficient at the time to pay the principal of and interest on the Bonds. The money produced by the levy of taxes provided in this Section to pay the principal of and interest on the Bonds is appropriated for that purpose and that amount shall be included in the annual budget adopted and passed by the Governing Body each year. The taxes collected shall be maintained in an interest and sinking fund, which is hereby created, and kept for and applied

only to the payment of the principal of and interest on the Bonds when due and as otherwise required or permitted by law.

Section 14.Additional Action of Authorized Officers; Delegation of Authority to Determine Final Terms of the Bonds and Award Bonds to the Purchaser.

A.The Mayor, City Clerk and other officers of the City be and they hereby are authorized and directed to take all action necessary or appropriate to effectuate the provisions of this ordinance, including without limiting the generality of the foregoing, the deposit of $6,000,000 of the proceeds of the Bonds, plus an allocable share of net premium, if any, into an acquisition fund for payment of the costs of the Improvement Project and the costs of issuance allocable to the Improvement Project, the execution and delivery of a continuing disclosure undertaking to enable the Purchaser of the Bonds to comply with Securities and Exchange Commission Rule 15c2-12(b)(5), the printing of the Bonds, and the execution of such certificates as may be required by the Purchaser relating to the signing of the Bonds, the tenure and identity of City officials, and the receipt of the purchase price of the Bonds from the Purchaser and the absence of litigation, pending or threatened, if in accordance with the facts, affecting the validity of the Bonds.

B.Pursuant to Section 6-14-10.2, NMSA 1978, the City Manager or City Financial Services Director, each as Delegate, are hereby delegated authority to execute an Award Certificate, and to determine any or all of the final terms of the Bonds, including, without limitation, the exact principal amounts, maturity dates, interest rates, prices, redemption features, municipal bond insurance, and other final terms of the Bonds subject to the parameters and conditions contained in this Bond Ordinance. The Delegate shall present the Award Certificate to the Governing Body in a timely manner, before or after delivery of the Bonds, at a regularly scheduled public meeting of the Governing Body.

Section 15.Defeasance.

A.Any Bond and the interest thereon shall be deemed to be paid, retired, and no longer outstanding (a "Defeased Bond") hereunder when payment of the principal of such Bond, plus interest thereon to the due date (whether such due date be by reason of maturity, upon redemption, or other) either (i) shall have been made or caused to be made in accordance with the terms thereof (including the giving of any required notice of redemption), or (ii) shall have been provided for on or before such due date by irrevocably depositing with or making available to a qualified depository for such payment (1) lawful money of the United States of America sufficient to make such payment or (2) Government Obligations which mature as to principal and interest in such amounts and at such times as will ensure the availability, without reinvestment, of sufficient money to provide for such payment (as verified by a certified or registered public accountant), and when proper arrangements have been made by the City with a qualified depository for the payment of its services until all Defeased Bonds shall have become due and payable. At such time as a Bond shall be deemed to be a Defeased Bond hereunder, such Bond and the interest thereon shall no longer be secured by, payable from, or entitled to the benefits of the ad valorem taxes herein levied and pledged as provided in this ordinance, and such principal and interest shall be payable solely from such money or Government Obligations.

B.Any moneys so deposited with the qualified depository may, at the written direction of the City, also be invested in Government Obligations, maturing in the amounts and times required to make payments when due on the Defeased Bonds, and all income from such Government Obligations received by the qualified depository which is not required for the payment of the Defeased Bonds and interest thereon, with respect to which such money has been so deposited, shall be turned over to the City for deposit in the interest and sinking fund for payment of principal and interest on the Bonds. The term "Government Obligations" means direct obligations of the United States of America, including obligations the principal of and interest on which are unconditionally guaranteed by the United States of America which may be United States Treasury Obligations such as its State and Local Government Series, which may be in book-entry form.

Section 16. Investment of Bond Proceeds. Moneys in any fund not immediately needed may be invested as provided by state law and applicable federal statutes and regulations.

Section 17.Ordinance Irrepealable. After any of the Bonds have been issued, this ordinance shall constitute a contract between the City and the holder or holders of the Bonds and shall be and remain irrepealable and unalterable until the Bonds and the interest thereon shall have been fully paid, satisfied and discharged, defeased or until such payment has been duly provided for.

Section 18.Severability. If any section, paragraph, clause or provision of this ordinance shall for any reason be held to be invalid or unenforceable, the invalidity or unenforceability of such section, paragraph, clause or provision shall not affect any of the remaining provisions of this ordinance.

Section 19.Form of Notice of Adoption. The following notice shall be published one time in a newspaper having general circulation in the City as soon as is practicable following the adoption hereof and this ordinance shall be effective five days after such publication as provided by law.

[Form of Notice]

LEGAL NOTICE

City of Las Cruces, New Mexico
Notice of Adoption of Ordinance

NOTICE IS HEREBY GIVEN that the Governing Body of the City of Las Cruces, Doña Ana County, New Mexico did, on the 4th day of March, 2024, adopt an ordinance entitled:

AN ORDINANCE AUTHORIZING THE ISSUANCE AND SALE OF CITY OF LAS CRUCES, NEW MEXICO, TAXABLE GENERAL OBLIGATION IMPROVEMENT BONDS, SERIES 2024, IN THE PRINCIPAL AMOUNT OF $6,000,000, PAYABLE FROM AD VALOREM TAXES LEVIED ON ALL TAXABLE PROPERTY WITHIN THE CITY, LEVIED WITHOUT LIMIT AS TO RATE OR AMOUNT; PROVIDING FOR THE FORM, CERTAIN TERMS AND CONDITIONS OF THE BONDS, THE MANNER OF THEIR EXECUTION, AND THE METHOD OF AND SECURITY FOR PAYMENT THEREOF; PROVIDING FOR THE METHOD OF SALE OF THE BONDS PURSUANT TO A PUBLIC COMPETITIVE SALE; PROVIDING FOR THE MATURITY DATES AND AMOUNTS, INTEREST RATES, PRICES, REDEMPTION FEATURES AND OTHER FINAL TERMS OF THE BONDS TO BE ESTABLISHED IN AN AWARD CERTIFICATE; DELEGATING AUTHORITY TO THE CITY MANAGER AND CITY FINANCIAL SERVICES DIRECTOR TO AWARD THE BONDS TO THE PURCHASER; AND PROVIDING FOR OTHER DETAILS CONCERNING THE BONDS.

The Ordinance directs and authorizes the issuance of City of Las Cruces, Taxable General Obligation Bonds in the aggregate principal amount of $6,000,000 for the purpose of placing the proceeds into the Affordable Housing Trust Fund to provide resources to plan, design, construct, acquire, and preserve housing affordable for low to moderate income households, including acquisition of necessary land and to pay the costs of issuance of the Bonds; provides parameters for the Bonds; provides the form of the Bonds; delegates authority to the City Manager and City Financial Services Director to determine exact principal amounts, maturity dates, interest rates, prices, redemption features and other final terms of the Bonds within the parameters established in this Ordinance, to award the Bonds to the Purchaser pursuant to an Award Certificate; provides for the delivery of the Bonds; provides for levy of taxes to pay the principal of and interest on the bonds; makes certain covenants for the benefit of the owners of the Bonds; and provides other details concerning the bonds.

Complete copies of the Ordinance are available for public inspection during the normal and regular business hours of the City Clerk, Las Cruces City Hall, 700 North Main Street Las Cruces, New Mexico. This notice constitutes compliance with Section 6-14-6 NMSA 1978.

DATED this 4th day of March, 2024.

CITY OF LAS CRUCES

Christine Rivera, City Clerk

(End of Form of Notice for Publication)

Section 20.Repealer Clause. All acts and resolutions in conflict with this ordinance are hereby rescinded, annulled and repealed.

(II)

THATCity staff is hereby authorized to do all deeds as necessary in the accomplishment of the herein above.

TYPE OF ACTION: ☒ **Administrative** ☐ **Legislative** ☐ **Quasi-Judicial**

PURPOSE(S) OF ACTION:
Issue debt.

BACKGROUND / KEY ISSUES / CONTRIBUTING FACTORS:
The City of Las Cruces (City) took four questions to voters at the November 8, 2022, election:

1. Shall the City of Las Cruces issue general obligation bonds, payable from property taxes, in an amount up to $10,000,000 to acquire, plan, design, construct a new fire station facility (North of US Highway 70 and East of Interstate 25), including acquisition of necessary land?
2. Shall the City of Las Cruces issue general obligation bonds, payable from property taxes, in an amount up to $5,000,000 to acquire, plan, design, construct, and equip the regional community recreation facility known as East Mesa Public Recreation Complex, including acquisition of necessary land?
3. Shall the City of Las Cruces issue general obligation bonds, payable from property taxes, in an amount up to $6,000,000, and placed into the Affordable Housing Trust Fund, to provide resources to plan, design, construct, acquire, and preserve housing affordable for low to moderate income households, including acquisition of necessary land?
4. Shall the City of Las Cruces issue general obligation bonds, payable from property taxes, in an amount up to $2,000,000 to renovate and improve existing parks and recreational facilities?

All four questions were approved.

The City intends to use the proceeds of the $6,000,000 Taxable General Obligation Improvement Bonds, Series 2024, on question 3. The bonds will be payable from ad valorem taxes on property within the City, also known as property taxes.

With this issuance, there will be no remaining authority to issue bonds as approved by voters in 2022.

COMMITTEE/BOARD REVIEW:

None

DOES THIS AMEND THE BUDGET?:

☐ Yes
☒ No

Does this action amend the Capital Improvement Plan (CIP)?

☐ Yes
☒ No

Does this action align with Elevate Las Cruces?

☐ Yes
☒ No

OPTIONS / ALTERNATIVES:

1. Vote "Yes"; this will approve the Ordinance authorizing the issuance of $6,000,000 Taxable General Obligation Improvement Bonds, Series 2024 for question 3 authorized by voters on November 8, 2022.
2. Vote "No"; this will not approve the Ordinance, thus not authorizing the issuance of $6,000,000 Taxable General Obligation Improvement Bonds, Series 2024 for question 3 authorized by voters on November 8, 2022.
3. Vote to "Amend"; this could delay issuance of the bonds and would require further direction from Council and staff.
4. Vote to "Table"; this could delay issuance of bonds.

$6,000,000*
CITY OF LAS CRUCES, NEW MEXICO
TAXABLE GENERAL OBLIGATION IMPROVEMENT BONDS,
SERIES 2024

Preliminary Official Statement, subject to completion,
dated March 7, 2024

The Preliminary Official Statement, dated March 7, 2024 (the "Preliminary Official Statement"), relating to the above-described bonds (the "Bonds") of the City of Las Cruces, New Mexico (the "City"), has been posted on the internet as a matter of convenience. The posted version of the Preliminary Official Statement has been formatted in Adobe Portable Document Format (Adobe Acrobat XI). Although this format should replicate the Preliminary Official Statement available from the City, appearance may vary for a number of reasons, including electronic communication difficulties or particular user software or hardware. Using software other than Adobe Acrobat XI or later may cause the Preliminary Official Statement that you view or print to differ in appearance from the Preliminary Official Statement. Paper copies of the Official Statement are available from the Issuer by contacting the municipal advisor, RBC Capital Markets, LLC, Erik Harrigan, at (505) 872-5999.

The Preliminary Official Statement and the information contained therein are subject to completion or amendment or other change without notice. Under no circumstances shall the Preliminary Official Statement constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of the Bonds in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction.

For purposes of Rule 15c2-12 promulgated by the Securities and Exchange Commission, the Preliminary Official Statement alone, and no other document or information on the internet, constitutes the "Official Statement" that the City has deemed "final" as of its date in respect of the Bonds, except for certain information permitted to be omitted therefrom.

No person has been authorized to give any information or to make any representations other than those contained in the Preliminary Official Statement in connection with the offer and sale of the Bonds and, if given or made, such information or representations must not be relied upon as having been authorized. The information and expressions of opinion in the Preliminary Official Statement are subject to change without notice and neither the delivery of the Official Statement nor any sale made thereunder shall, under any circumstances, create any implication that there has been no change in the affairs of the City since the date of the Preliminary Official Statement.

By choosing to proceed and view the electronic version of the Preliminary Official Statement, you acknowledge that you have read and understood this Notice.

Preliminary Official Statement dated March 7, 2024.

* Preliminary; subject to change.

This Preliminary Official Statement and the information contained herein are subject to completion and amendment. Under no circumstances shall the Preliminary Official Statement constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of such jurisdiction.

PRELIMINARY OFFICIAL STATEMENT DATED MARCH 7, 2024

NEW ISSUE RATING: Moody's: ___

In the opinion of Modrall, Sperling, Roehl, Harris & Sisk, P.A., Bond Counsel based on existing laws of the State of New Mexico as enacted and construed, interest on the Bonds is exempt from all taxation by the State of New Mexico or any political subdivision thereof. The Bonds are being issued as taxable under the Internal Revenue Code of 1986, as amended. For a more complete description of such opinion of Bond Counsel and a description of certain provisions tax treatment of interest on the Bonds for certain owners of such bonds, see "TAX STATUS" herein.

$6,000,000*
CITY OF LAS CRUCES, NEW MEXICO
TAXABLE GENERAL OBLIGATION IMPROVEMENT BONDS
SERIES 2024

Dated: Date of Delivery **Due: August 1, as shown below**
Book-Entry Only

The City of Las Cruces, New Mexico Taxable General Obligation Improvement Bonds, Series 2024 (the "Bonds") are issuable as fully registered bonds and when initially purchased will be registered in the name of Cede & Co., as nominee of The Depository Trust Company, New York ("DTC"). Purchases of the Bonds will be made in book-entry form only, in the principal amount of $5,000 or any integral multiple thereof, through brokers and dealers who are, or who act through, DTC Participants. Beneficial owners of the Bonds will not be entitled to receive physical delivery of bond certificates so long as DTC or a successor securities depository acts as the securities depository with respect to the Bonds. Interest on the Bonds is payable on each February 1 and August 1, commencing August 1, 2024. As long as DTC or its nominee is the registered owner of the Bonds, reference in this Official Statement to the registered owner will mean Cede & Co., and payments of principal or interest on the Bonds will be made directly to DTC by the Paying Agent. Disbursement of such payments to DTC Participants is the responsibility of DTC. See "The Bonds – Book-Entry Only System" herein. The City Treasurer is the Registrar and Paying Agent for the Bonds.

The Bonds are issuable only as fully registered bonds in denominations of $5,000 each or any integral multiple thereof. The Bonds will bear interest from the delivery date.

The Bonds are subject to optional redemption prior to their stated maturity as described herein.

The Bonds are general obligations of the City of Las Cruces, New Mexico (the "City"), payable from general (*ad valorem*) taxes which shall be levied against all taxable property in the City without limitation as to rate or amount.

The City has undertaken, for the benefit of the owners of the Bonds, to provide certain annual and periodic disclosures described under the caption "CONTINUING DISCLOSURE INFORMATION" herein.

The Bonds are being issued pursuant to the powers of the City Council under Sections 3-30-1 through 3-30-9 and Sections 6-15-1 through 6-15-22 NMSA 1978, as amended and supplemented, the Constitution and other laws of the State, including the City's home rule powers, for the purpose of placing the proceeds into the City's Affordable Housing Trust Fund, to provide resources to plan, design, construct, acquire, and preserve housing affordable for low to moderate income households, including acquisition of necessary land and paying the costs of issuance of the Bonds (collectively, the "Improvement Project"). The Bonds are offered when, as and if issued by the City, subject to the approval of Modrall, Sperling, Roehl, Harris & Sisk, P.A., as Bond Counsel and certain other conditions. It is expected that the Bonds will be available for delivery on or about April 11, 2024 through the facilities of the Depository Trust Company, New York, New York.

Electronic bids will be opened at 8:30 a.m, prevailing Mountain Time, March 14, 2024.

Dated: March 7, 2024

* Preliminary, subject to change.

USE OF INFORMATION IN THIS OFFICIAL STATEMENT

No dealer, salesman or other person has been authorized by the City of Las Cruces, New Mexico (the "City") to give any information or to make any statements or representations, other than those contained in this Official Statement, and, if given or made, such other information, statements or representations must not be relied upon as having been authorized. This Official Statement does not constitute an offer to sell or solicitation of an offer to buy any of the Bonds in any jurisdiction in which such offer or solicitation is not authorized, or in which any person making such offer or solicitation is not qualified to do so, or to any person to whom it is unlawful to make such offer or solicitation in such jurisdiction. The information set forth or included in this Official Statement has been provided by the City and from other sources believed by the City to be reliable. The information and expressions of opinion herein are subject to change without notice, and neither the delivery of this Official Statement nor any sale hereunder shall create any implication that there has been no change in the financial condition or operations of the City described herein since the date hereof. This Official Statement contains, in part, estimates and matters of opinion that are not intended as statements of fact, and no representation or warranty is made as to the correctness of such estimates and opinions or that they will be realized.

The Bonds have not been registered under the Securities Act of 1933, in reliance upon exemptions contained in such Act. The registration and qualification of the Bonds in accordance with applicable provisions of the securities law of the states in which the Bonds have registered or qualified and the exemption from registration or qualification in other states cannot be regarded as a recommendation thereof. Neither the Securities and Exchange Commission nor any other federal, state, municipal or other governmental entity, nor any agency or department thereof, has passed upon the merits of the Bonds or the accuracy or completeness of this Official Statement. Any representation to the contrary may be a criminal offense.

This Official Statement is "deemed final" by the City for purposes of Rule 15c2-12 of the Municipal Securities Rulemaking Board. The City has covenanted to provide such annual financial statements and other information in the manner as may be required by regulations of the Securities and Exchange Commission or other regulatory body.

IN MAKING AN INVESTMENT DECISION INVESTORS MUST RELY ON THEIR OWN EXAMINATION OF THE CITY AND THE TERMS OF THE OFFERING, INCLUDING THE MERITS AND RISKS INVOLVED. THESE SECURITIES HAVE NOT BEEN RECOMMENDED BY ANY FEDERAL OR STATE SECURITIES COMMISSION OR REGULATORY AUTHORITY. FURTHERMORE, THE FOREGOING AUTHORITIES HAVE NOT CONFIRMED THE ACCURACY OR DETERMINED THE ADEQUACY OF THIS DOCUMENT. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

This Official Statement contains statements that are "forward-looking statements" as defined in the Private Securities Litigation Reform Act of 1995. When used in this Official Statement, the words "estimate," "project," "intend," "expect," and similar expressions are intended to identify forward-looking statements. Such statements are subject to risks and uncertainties that could cause actual results to differ materially from those contemplated in such forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof.

OFFICIAL STATEMENT

$6,000,000*
CITY OF LAS CRUCES, NEW MEXICO
TAXABLE GENERAL OBLIGATION IMPROVEMENT BONDS
SERIES 2024

INTRODUCTION AND SUMMARY

This Official Statement is furnished to prospective purchasers of the City of Las Cruces, New Mexico, Taxable General Obligation Improvement Bonds, Series 2024 (the "Bonds"), issued in the aggregate principal amount of $6,000,000* by the City of Las Cruces, New Mexico (the "City"). The offering of the Bonds is made only by way of this Official Statement and the Official Notice of Bond Sale, authorized by Ordinance No. 3062 adopted by the City Council on March 4, 2024, as supplemented by the Award Certificate executed on March __, 2024 (collectively, the "Bond Ordinance"). Additional information concerning the City, the Bonds and other aspects of this offering may be obtained either from the City or from RBC Capital Markets, LLC (the "Municipal Advisor") at the addresses set forth in the section entitled "ADDITIONAL INFORMATION."

The following material is qualified in its entirety by the more complete information contained throughout this Official Statement, and detachment or other use of this "INTRODUCTION AND SUMMARY" without the entire Official Statement, including the cover page and the appendices, is unauthorized.

All terms used in this Official Statement that are not defined herein shall have the meanings given such terms in the Bond Ordinance.

The Issuer

The City is a political subdivision of the State of New Mexico (the "State"), organized and existing under the Constitution, and general laws of the State. The City was incorporated in 1907 and is located in southern New Mexico. It is New Mexico's second largest city. It operates under a Council-Manager form of government with the Mayor elected at large. The City's Fiscal Year ends June 30 and is referred to in this Official Statement as the "Fiscal Year."

Authority for Issuance and Purpose

The Bonds are issued in accordance with the Constitution and laws of the State of New Mexico, in particular, Sections 3-30-1 through 3-30-9 and Sections 6-15-1 through 6-15-22 NMSA 1978, as amended and supplemented. $6,000,000* in principal amount of the Bonds represents the second and final series of general obligation bonds approved in aggregate amount of $23,000,000 by the qualified electors of the City at an election held on November 8, 2022. The Bonds are being issued for the purpose of placing the proceeds into the City's Affordable Housing Trust Fund, to provide resources to plan, design, construct, acquire, and preserve housing affordable for low to moderate income households, including acquisition of necessary land and paying the costs of issuance of the Bonds (collectively, the "Improvement Project").

The Bonds

The Bonds will be registered as to principal and interest, issued in denominations of $5,000 each, or integral multiples thereof, in conformance with the Constitution and laws of the State and pursuant to

* Preliminary, subject to change.

the Bond Ordinance. The Bonds shall mature in the principal amounts and on the dates shown on the cover page hereof. Interest shall be payable February 1 and August 1 of each year commencing August 1, 2024 to registered owners shown on the books of the Registrar on the 15th day of the month preceding each regularly scheduled interest payment date thereafter ("Record Date"). The Bonds will be issued only in fully registered form and will be initially registered and delivered to Cede & Co., the nominee of The Depository Trust Company pursuant to the book-entry only system described herein.

Security

The Bonds are secured by the City's full faith and credit and are general obligations of the City payable from *ad valorem* taxes to be levied, without limitation as to rate or amount, against all taxable property within the City. See "SECURITY AND REMEDIES"

Financial Statements

The City's audited financial statements as of and for the year ended June 30, 2023 including the opinions rendered thereon of certified public accountants, are attached as Appendix B.

Selected Debt Ratios

The following table sets forth details relating to the ratio of general debt and overlapping debt to population and assessed valuation:

2023 Assessed Valuation	$ 3,008,373,421
2023 Estimated Actual Valuation[1]	$9,909,936,090
City Debt as a % of	
Assessed Valuation	1.23%
Estimated Actual Valuation	0.37%
Direct and Overlapping Debt as a % of	
Assessed Valuation[2][3]	5.01%
Estimated Actual Valuation[2][3]	1.52%
City General Obligation Debt Outstanding[3][4]	$37,010,000
City General Obligation Debt[2][3]	$37,010,000
Estimated Direct & Overlapping G/O Debt[2][3]	$150,774,905
2023 Estimated Population[5]	114,450
City Net Debt Per Capita[2][4]	$278.84
Direct and Overlapping Debt Per Capita[3]	$1,317.39

(1) Actual valuation is computed by adding 2023 exemptions to the 2023 assessed valuation and multiplying by three.

(2) Figure includes proposed 2024 Bonds.

(3) Figure is not net of accumulated Debt Service Fund amounts.

(4) Figure is net of accumulated debt service fund amounts attributable to the upcoming principal payment. The net cash balance in the debt service fund as of February 7, 2024 was $6,722,665 of which 75.81% was properly attributable to principal reduction.

(5) Based on 2020 population from US Census and the estimated growth rate of .9%.

See "DEBT AND OTHER FINANCIAL OBLIGATIONS – General Obligation Debt" herein.

Tax Matters

In the opinion of Modrall, Sperling, Roehl, Harris & Sisk, P.A. ("Bond Counsel"), based on existing laws of the State of New Mexico as enacted and construed, the Bonds and income from the Bonds are exempt from all taxation by the State of New Mexico or any political subdivision thereof. The Bonds are being issued as federally taxable under the Internal Revenue Code of 1986, as amended.

Agents and Advisors

At the time of the issuance and sale of the Bonds, Modrall, Sperling, Roehl, Harris & Sisk, P.A., as Bond Counsel, will deliver the bond opinion included in Appendix A hereto. See "LEGAL MATTERS" herein. Certain legal matters relating to the Bonds will be passed on for the City by Modrall, Sperling, Roehl, Harris & Sisk, P.A., as Disclosure Counsel.

RBC Capital Markets, LLC ("RBC") is employed as Municipal Advisor to the City in connection with the issuance of the Bonds. The Municipal Advisor's fee for services rendered with respect to the sale of the Bonds is contingent upon the issuance and delivery of the Bonds. RBC, in its capacity as Municipal Advisor, has not verified and does not assume any responsibility for the possible impact of any present, pending or future actions taken by any legislative or judicial bodies. The Municipal Advisor is not obligated to undertake, and has not undertaken to make, an independent verification of, or assume responsibility for, the accuracy, completeness, or fairness of the information in this Official Statement.

Additional Information

This Official Statement is accurate only as of its date, and no representation is made that the information contained herein has not changed since that date. This Official Statement is intended to be made available to investors through the Municipal Advisor.

The quotations from, and summaries and explanations of, the statutes, regulations and documents contained herein do not purport to be complete, and reference is made to those statutes, regulations and documents for full and complete statements of their provisions. Copies, in a reasonable quantity, of those statutes, regulations and documents may be obtained upon request directed to the City, and upon payment to the City of a charge for copying, mailing and handling, at the City of Las Cruces, 700 North Main, Las Cruces, NM 88001, telephone number (575) 541-2000, Attention: City Manager.

Any statements in this Official Statement involving matters of opinion, whether or not expressly so stated, are intended as such and not as representations of fact. This Official Statement is not to be construed as a contract between the City and the purchasers or holders of any of the Bonds.

THE BONDS

Description

The Bonds are general obligation bonds to be issued by the City in the total principal amount of $6,000,000* and will be dated the Date of Delivery, which is expected to be on or about April 11, 2024. The Bonds will be issued as fully registered bonds in denominations of $5,000 or integral multiples thereof, bearing interest from their date to maturity at the rates specified on the cover page of this Official Statement payable semiannually on February 1 and August 1 each year, commencing on August 1, 2024, and maturing as set forth on the cover page of this Official Statement.

The Bonds will be issued only in fully registered form and will be initially registered and delivered only to Cede & Co., the nominee of The Depository Trust Company ("DTC"), pursuant to the book-entry only system described herein. No physical delivery of the Bonds will be made to the owners hereof.

Principal of, premium, if any, and interest on the Bonds will be payable by the Paying Agent/Registrar to Cede & Co., which will make distribution of the amounts so paid to the beneficial owners of the Bonds. See "THE BONDS – Book-Entry Only System" herein.

Authorization

The Bonds are being issued pursuant to the City Council's powers under Article IX, Section 10 of the Constitution of the State of New Mexico, and Sections 3-30-1 through 3-30-9 and 6-15-1 through 6-15-22 NMSA 1978, as amended and supplemented, the Bond Ordinance of the City Council delegating authority to the City Manager or delegate awarding the Bonds to the successful bidder for the Bonds in the public sale to be held on March 14, 2024. A copy of the Official Notice of Bond Sale is attached to this Official Statement as Appendix D.

Bond Registrar and Paying Agent

The City Treasurer will serve as the Bond Registrar (the "Registrar") and Paying Agent (the "Paying Agent") for the Bonds.

Payment of Principal and Interest; Record Date

The principal of the Bonds is payable to the registered owners of the Bonds at the principal office of the Paying Agent. Interest on the Bonds is payable by check or draft of the Paying Agent mailed on or before each interest payment date to the registered owners of the Bonds as of the close of business on the 15th day of the calendar month preceding the interest payment date (the "Regular Record Date") at the addresses appearing in the registration books maintained by the Registrar; but any such interest not so timely paid or duly provided for shall cease to be payable to the person who is the registered owner thereof at the close of business on the Regular Record Date and shall be payable to the person who is the registered owner thereof at the close of business on the date to be fixed by the Registrar whenever moneys become available for the payment of defaulted interest (the "Special Record Date").

Optional Redemption of Bonds

The Bonds maturing on and after August 1, 2033, may be redeemed prior to their scheduled maturity on August 1, 2032, or on any date thereafter, in whole or in part, at the option of the City Council at par plus accrued interest to the date of redemption, if any.

Exchange or Transfer of Bonds

The Registrar/Paying Agent will maintain the books of the City for the registration of ownership of the Bonds. Upon the surrender for transfer of any Bond at the principal office of the Registrar/Paying Agent, duly endorsed for transfer or accompanied by an assignment duly executed by the registered owner or his attorney duly authorized in writing, the Registrar/Paying Agent shall authenticate and deliver not more than three business days after receipt of the Bond to be transferred in the name of the transferee or transferees a new Bond or Bonds in fully registered form of the same aggregate principal amount of authorized denominations, and of the same maturity, interest rate and series, bearing a number or numbers not contemporaneously outstanding. Bonds may be exchanged at the principal office of the Registrar/Paying Agent for an equal aggregate principal amount of Bonds of other authorized denominations, and of the same maturity, series and interest rate. The Registrar/Paying Agent shall authenticate and deliver not more than three business days after receipt of the Bond to be exchanged a Bond or Bonds which the registered owner making the exchange is entitled to receive, bearing a number or numbers not contemporaneously outstanding. Exchanges and transfers of Bonds as herein provided shall be without charge to the owner or any transferee, but the Registrar/Paying Agent may require the payment by the owner of any Bond requesting exchange or transfer of any tax or other governmental charge required

to be paid with respect to such exchange or transfer. See "THE BONDS – Book-Entry Only System" herein for a description of the system to be utilized initially in regard to ownership and transferability of the Bonds.

Book-Entry Only System

The information in this section concerning DTC and DTC's book-entry system has been obtained from sources that the City believes to be reliable, but neither the City, Municipal Advisor nor Bond Counsel take responsibility for the accuracy thereof.

The Depository Trust Company ("DTC"), New York, New York, will act as securities depository for the Bonds. The Bonds will be issued as fully-registered securities registered in the name of Cede & Co. (DTC's partnership nominee) or such other name as may be requested by an authorized representative of DTC. One fully-registered Bond will be issued for each maturity of the Bonds, each in the aggregate principal amount of Bonds of such maturity, and will be deposited with DTC.

DTC, the world's largest securities depository, is a limited-purpose trust company organized under the New York Banking Law, a "banking organization" within the meaning of the New York Banking Law, a member of the Federal Reserve System, a "clearing corporation" within the meaning of the New York Uniform Commercial Code, and a "clearing agency" registered pursuant to the provisions of Section 17A of the Securities Exchange Act of 1934. DTC holds and provides asset servicing for over 3.5 million issues of U.S. and non-U.S. equity issues, corporate and municipal debt issues, and money market instruments (from over 100 countries) that DTC's participants ("Direct Participants") deposit with DTC. DTC also facilitates the post-trade settlement among Direct Participants of sales and other securities transactions in deposited securities, through electronic computerized book-entry transfers and pledges between Direct Participants' accounts. This eliminates the need for physical movement of securities certificates. Direct Participants include both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, clearing corporations, and certain other organizations. DTC is a wholly-owned subsidiary of The Depository Trust & Clearing Corporation ("DTCC"). DTCC is the holding company for DTC, National Securities Clearing Corporation and Fixed Income Clearing Corporation, all of which are registered clearing agencies. DTCC is owned by the users of its regulated subsidiaries. Access to the DTC system is also available to others such as both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, and clearing corporations that clear through or maintain a custodial relationship with a Direct Participant, either directly or indirectly ("Indirect Participants"). DTC has Standard & Poor's rating of AA+. The DTC Rules applicable to Direct Participants are on file with the Securities and Exchange Commission. More information about DTC can be found at www.dtcc.com and www.dtc.org. The City undertakes no responsibility for and makes no representations as to the accuracy or the completeness of the content of such material contained on that website as described in the preceding sentence including, but not limited to, updates of such information or links to other Internet sites accessed through the aforementioned website.

Purchases of the Bonds under the DTC system must be made by or through Direct or Indirect Participants, which will receive a credit for the Bonds on DTC's records. The ownership interest of each actual purchaser of each Bond ("Beneficial Owner") is in turn to be recorded on the Direct and Indirect Participants' records. Beneficial Owners will not receive written confirmation from DTC of their purchase. Beneficial Owners are, however, expected to receive written confirmations providing details of the transaction, as well as periodic statements of their holdings, from the Direct or Indirect Participant through which the Beneficial Owner entered into the transaction. Transfers of ownership interests in the Bonds are to be accomplished by entries made on the books of Direct and Indirect Participants acting on behalf of Beneficial Owners. Beneficial Owners will not receive certificates representing their ownership interests in the Bonds, except in the event that use of the book-entry system for the Bonds is discontinued.

To facilitate subsequent transfers, all Bonds deposited by Direct Participants with DTC are registered in the name of DTC's partnership nominee, Cede & Co. or such other name as may be requested

by an authorized representative of DTC. The deposit of Bonds with DTC and their registration in the name of Cede & Co. or such other DTC nominee do not affect any change in beneficial ownership. DTC has no knowledge of the actual Beneficial Owners of the Bonds; DTC's records reflect only the identity of the Direct Participants to whose accounts such Bonds are credited, which may or may not be the Beneficial Owners. The Direct and Indirect Participants will remain responsible for keeping account of their holdings on behalf of their customers.

Conveyance of notices and other communications by DTC to Direct Participants, by Direct Participants to Indirect Participants, and by Direct Participants and Indirect Participants to Beneficial Owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time.

While the Bonds are in the book-entry only system, redemption notices will be sent to DTC. If less than all of the Bonds are being redeemed, DTC's practice is to determine by lot the amount of the interest of each Direct Participant in such issue to be redeemed.

Neither DTC nor Cede & Co. (nor any other DTC nominee) will consent or vote with respect to the Bonds unless authorized by a Direct Participant in accordance with DTC's MMI Procedures. Under its usual procedures, DTC mails an Omnibus Proxy to the City as soon as possible after the record date. The Omnibus Proxy assigns Cede & Co.'s consenting or voting rights to those Direct Participants to whose accounts the Bonds are credited on the record date (identified in a listing attached to the Omnibus Proxy).

Redemption proceeds, distributions, and dividend payments on the Bonds will be made to Cede & Co., or such other nominee as may be requested by an authorized representative of DTC. DTC's practice is to credit Direct Participants' accounts, upon DTC's receipt of funds and corresponding detail information from the City or agent on payable date in accordance with their respective holdings shown on DTC's records. Payments by Participants to Beneficial Owners will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers in bearer form or registered in "street name," and will be the responsibility of such Participant and not of DTC, agent, or the City, subject to any statutory or regulatory requirements as may be in effect from time to time. Payment of redemption proceeds, distributions, and dividend payments to Cede & Co. (or such other nominee as may be requested by an authorized representative of DTC) is the responsibility of the City or agent, disbursement of such payments to Direct Participants will be the responsibility of DTC, and disbursement of such payments to the Beneficial Owners will be the responsibility of Direct and Indirect Participants.

DTC may discontinue providing its services as depository with respect to the Bonds at any time by giving reasonable notice to the City. Under such circumstances, in the event that a successor depository is not obtained, certificates representing the Bonds are required to be printed and delivered.

The City may decide to discontinue use of the system of book-entry transfers through DTC (or a successor securities depository). In that event, certificates representing the Bonds will be printed and delivered to DTC.

SECURITY AND REMEDIES

General

The Bonds are general obligations of the City payable from *ad valorem* taxes, which may be levied against all taxable property within the City without limitation as to rate or amount. The Bonds are secured by the obligation of the City to levy and collect upon all taxable property within the City a tax rate levy sufficient, together with other legally available revenues, to pay the debt service on the Bonds. Such annual levy for debt service creates a statutory tax lien that can be enforced personally against the owner of the

property or enforced by sale of the property. Neither the State nor any other political subdivision has any responsibility to pay the debt service on the Bonds.

Legal Matters

Various State laws and constitutional provisions apply to the assessment and collection of *ad valorem* property taxes. There is no assurance that there will not be any amendment, change in the interpretation of, or addition to the applicable laws, provisions and regulations that would have a material effect, directly or indirectly, on the affairs of the City.

Limitations on Remedies Available to Owners of Bonds

There is no provision for acceleration of maturity of the principal of the Bonds in the event of a default in the payment of principal of or interest on the Bonds. Consequently, remedies available to the owners of the Bonds may have to be enforced from year to year.

The enforceability of the rights and remedies of the owners of the Bonds, and the obligations incurred by the City in issuing the Bonds, are subject to the following: the Federal Bankruptcy Code and applicable bankruptcy, insolvency, reorganization, moratorium, or similar laws relating to or affecting the enforcement of creditor's rights generally, now or hereafter in effect; usual equity principles, which may limit the specific enforcement under State law of certain remedies; the exercise by the United States of America of the powers delegated to it by the federal Constitution; and the reasonable and necessary exercise, in certain exceptional situations, of the police power inherent in the sovereignty of the State and its governmental bodies in the interest of serving a significant and legitimate public purpose. Bankruptcy proceedings, or the exercise of powers by the federal or State government, if initiated, could subject the owners of the Bonds to judicial discretion and interpretation of their rights in bankruptcy or otherwise, and consequently may entail risks of delay, limitation, or modification of their rights.

SPECIAL FACTORS AFFECTING THE PAYMENT OF DEBT SERVICE ON THE BONDS AND AVAILABLE REMEDIES

Cybersecurity

The City operates a large and complex information technology infrastructure to support internal and external operations. As is the case with any such environment, the threat of cybersecurity incidents is constant. Such incidents may arise from multiple sources, including unintentional events or actions, intentional insider threat, and deliberate malicious attacks from outside entities. The effect of such threats may include unauthorized access to City systems, data or resources, inappropriate exposure or use of City information, disruption of City services, and damage to City systems.

The City maintains a cybersecurity program that uses a multilayer, multi-vendor approach. Staffing for the program consists of a cybersecurity administrator who is CASP+ certified and an information security specialist. The City has an IT Governance program which provides a technology review, including the review of security standards, for new technology purchases. The City has a Protected Information Management Committee which sets standards for the use and security of protected information within the City. The City has cyber security insurance policy with coverage comparable to coverage carried by other U.S. municipalities of a similar size.

Security technology used by the City includes a unified threat management security system, end point security software on all computers, internal and external network traffic inspection, centralized event log correlation and alerting, and honey pot technologies. All computer operating system environments are updated with security updates as they are released. All updates are centrally managed. All City staff are

required to attend a cybersecurity awareness training annually. Security penetration testing is performed bi-annually using a third-party auditor.

Climate Change and Natural Disasters

The City could experience, and is susceptible to additional, weather events and natural disasters that could be deemed extreme including, without limitation, periods of heat, droughts, floods, mud slides, tornadoes and other wind conditions and wildfires, which could result in negative economic impacts on the City. Such effects may be exacerbated by a longer term shift in the climate over several decades, commonly referred to as climate change. Numerous scientific studies on climate change show that, among other effects on the global ecosystem, extreme temperatures may become more common, and extreme weather events may become more frequent as a result of increasing global temperatures attributable to atmospheric pollution. As a result, the City could lose tax revenues and many residents, businesses, and governmental operations could be displaced. Additionally, climate change concerns have led, and may continue to lead, to new laws and regulations at the federal and state levels (including but not limited to air, water, hazardous substances and waste regulations) that could have a material adverse effect on the operations and/or financial condition of the City. The City cannot predict the occurrence or extent of any future extreme weather events or natural disasters or the economic impacts that the occurrence of any such events may have on the City.

PURPOSE AND PLAN OF FINANCING

The Bonds will be issued in a principal amount of $6,000,000*, which represents the second and final series of general obligation bonds approved by the qualified electors of the City at an election held on November 8, 2022 in a maximum aggregate amount of $23,000,000. The Bonds will be issued for the purpose of placing the proceeds into the City's Affordable Housing Trust Fund, to provide resources to plan, design, construct, acquire, and preserve housing affordable for low to moderate income households, including acquisition of necessary land and paying the costs of issuance of the Bonds (collectively, the "Improvement Project").

From the deposit of the Bond proceeds in the City's Affordable Housing Trust Fund, the City expects to fund projects to support affordable housing in the City. The projects include, but are not limited to, portions of the projects listed below. Other projects may be funded in combination with other funding sources. Each of the proposed projects listed has numerous sources of funding that, when combined with the proposed City contribution from the Affordable Housing Trust Fund, fully fund the projects:

1. The Three Sisters Apartments – 70 units housing families at or below 60% of the Area Median Income (AMI)
2. Pedrena Apartments – 80 units housing senior citizens ages 55 and older with income at or below 60% of the AMI
3. Peachtree Canyon Apartments Phase I – 144 units for households at or below 60% of the AMI

* Preliminary, subject to change.

SOURCES AND USES OF FUNDS

The sources and uses of funds relating to the Bonds, other than accrued interest, are set forth in the following table.

SOURCES OF FUNDS	
Bond proceeds	$
[Net] Premium	
TOTAL SOURCES OF FUNDS	$
USES OF FUNDS	
Deposit to Acquisition Fund	$
Underwriter's Discount	
Costs of Issuance[1]	
TOTAL USES OF FUNDS	$

(1) Includes Municipal Advisor fees, rating agency fees, legal fees, fees of the paying agent/registrar, and other miscellaneous costs and expenses related to the issuance of the Bonds.

DEBT AND OTHER FINANCIAL OBLIGATIONS

General Obligation Debt

Article IX, Section 13, of the New Mexico Constitution prohibits municipalities, including the City, from incurring general obligation debt in an aggregate amount, including existing indebtedness, exceeding four percent of the value of the taxable property within such municipality, as shown by the last preceding general assessment. A test for maximum general obligation bonds outstanding of the City follows:

2023 Assessed Valuation[1]	$3,008,373,421
2023 Estimated Actual Valuation	$9,909,936,090
City Bonded Debt Outstanding[2]	$37,010,000
Minus Debt Service Fund Balance Attributable to Principal	(5,096,341)
NET DEBT	$31,913,659
Ratio of City Outstanding Debt to 2023 Assessed Valuation[2]	1.23%
Ratio of City Outstanding Debt to 2023 Estimated Actual Valuation[2]	0.37%
Per Capita Bonded Debt [2]	$323.37
2023 Estimated Population[3]	114,450

(1) New Mexico Assessed Values represent 33-1/3% (the maximum assessment ratio permitted by the New Mexico Constitution) of the actual property value after deduction of certain exemptions. Property tax levies are based upon the certified assessed valuation.

(2) Includes proposed Series 2024 Bonds not net of debt service fund balance attributable to principal..

(3) Based on 2020 population from US Census and the estimated growth rate of .9%.

As of the date of this Official Statement, the City has outstanding general obligation indebtedness consisting of principal of $6,895,000 of its Series 2019 Bonds, principal of $9,305,000 of its Series 2020 Bonds, and principal of $14,810,000 of its 2023 Bonds. The combined debt service requirements of the Series 2019 Bonds, Series 2020 Bonds, Series 2023 Bonds and the anticipated debt service requirements of the Series 2024 Bonds are shown in the following table.

	Current Requirements			Series 2024 Bonds*			Total Requirements*		
Year	Principal	Interest	Total	Principal	Interest	Total	Principal	Interest	Total
2024	$3,790,000	$1,304,200	$5,094,200	$1,850,000	$91,667	$1,941,667	$5,640,000	$1,395,867	$7,035,867
2025	3,150,000	1,114,700	4,264,700	1,400,000	207,500	1,607,500	$4,550,000	$1,322,200	$5,872,200
2026	3,095,000	957,200	4,052,200	275,000	137,500	412,500	$3,370,000	$1,094,700	$4,464,700
2027	3,095,000	802,450	3,897,450	275,000	123,750	398,750	$3,370,000	$926,200	$4,296,200
2028	3,095,000	657,550	3,752,550	275,000	110,000	385,000	$3,370,000	$767,550	$4,137,550
2029	3,095,000	553,400	3,648,400	275,000	96,250	371,250	$3,370,000	$649,650	$4,019,650
2030	3,095,000	449,250	3,544,250	275,000	82,500	357,500	$3,370,000	$531,750	$3,901,750
2031	2,110,000	345,100	2,455,100	275,000	68,750	343,750	$2,385,000	$413,850	$2,798,850
2032	2,145,000	270,500	2,415,500	275,000	55,000	330,000	$2,420,000	$325,500	$2,745,500
2033	1,080,000	195,200	1,275,200	275,000	41,250	316,250	$1,355,000	$236,450	$1,591,450
2034	1,080,000	141,200	1,221,200	275,000	27,500	302,500	$1,355,000	$168,700	$1,523,700
2035	1,080,000	87,200	1,167,200	275,000	13,750	288,750	$1,355,000	$100,950	$1,455,950
2036	1,100,000	44,000	1,144,000				$1,100,000	$44,000	$1,144,000
Total	$31,010,000	$6,921,950	$37,931,950	$6,000,000	$1,055,417	$7,055,417	$37,010,000	$7,977,367	$44,987,367

*Preliminary, subject to change. Interest on Series 2024 Bonds computed at 5.00% per annum for illustration purposes only.

Statement of Estimated Direct and Overlapping Debt

The following calculation analyzes the debt load and per capita debt of the City payable from property taxes. In addition to outstanding debt of the City, the calculation takes into account debt attributable to taxing entities that is the responsibility of taxpayers within the boundaries of the City.

Taxing Entity	2023 Assessed Valuation	General Obligation Debt Outstanding	Percentage Applicable	Amount
State of New Mexico	$110,879,706,059	$541,270,000	2.71%	$14,685,666
Doña Ana County	5,607,428,928	4,110,000	53.65%	2,205,006
Doña Ana Com. Col.	5,691,157,467	18,750,000	52.86%	9,911,341
City of Las Cruces	3,008,373,421	37,010,000[(1)(2)]	100.00%	37,010,000[(1)(2)]
Las Cruces Schools	4,358,294,851	125,985,000	69.03%	86,962,892
Total Direct and Overlapping Debt				$150,774,905

Ratio of Estimated Direct & Overlapping Debt to 2023 Assessed Valuation:	5.01%
Ratio of Estimated Direct & Overlapping Debt to 2023 Estimated Actual Valuation:	1.52%
Per Capita Direct & Overlapping Debt:	$1,353.64

Source: Doña Ana County Assessor's Office, State Assessed Property Tax Division and individual entities.

(1) Includes proposed Series 2024 Bonds.

(2) Figure is not net of Debt Service Fund Balance.

Analysis of Assessed Valuation

Assessed Valuation of property within the City is calculated as follows: Of the total assessed valuation of all taxable property in the City, 33 1/3% is legally subject to *ad valorem* taxes. After deduction of certain personal exemptions, the 2023 Assessed Valuation is $3,008,373,421. The actual value of personal property within the City (see "Assessments" below) is determined by the Doña Ana County Assessor. The actual value of certain corporate property within the City (see "Centrally Assessed" below) is determined by the State of New Mexico, Taxation and Revenue Department, Property Tax Division.

The analysis of Assessed Valuation in the City of Las Cruces is as follows:

	2023	2022	2021	2020	2019
Assessments					
Value of Land	$669,137,957	$ 657,946,481	$ 643,226,071	$ 628,874,074	$ 617,132,989
Improvements	2,473,701,170	2,261,910,366	2,098,853	2,028,024,992	1,929,579,112
Personal Property	73,211,428	74,520,534	64,245,761	65,230,658	71,440,024
Mobile Homes	27,622,580	25,333,289	24,594,089	23,835,529	23,336,016
Livestock	11,932	11,948	13,282	12,899	11,081
Assessor's Taxable Value	$3,243,685,067	$3,019,722,618	$2,830,932,638	$2,745,978,152	$2,641,499.222
Less Exemptions					
Head of Family	$ 25,167,569	$ 25,133,106	$ 25,741,064	$ 26,069,893	$ 26,649,447
Veterans	72,339,335	61,259,054	54,936,784	49,285,089	45,420,622

History of Assessed Valuation

The following is a history of assessed valuation for the City and Doña Ana County.

Tax Year	City of Las Cruces	Doña Ana County
2023	$3,008,373,421	$5,607,428,928
2022	2,810,356,108	5,223,570,138
2021	2,629,782,733	4,935,560,916
2020	2,552,890,119	4,783,117,888
2019	2,452,517,126	4,602,866,403

Source: Dona Ana County Assessor's Office

Article VIII, Section 2, of the New Mexico Constitution limits the total *ad valorem* taxes for operational purposes levied by all overlapping governmental units within the City to $20.00 per $1,000 of assessed value. This limitation does not apply to levies for public debt and levies for additional taxes if authorized at an election by a majority of the qualified voters of the City voting on the question. The following table summarizes the tax rates on residential property located within the City for 2022-2023 Fiscal Year and the previous four fiscal years. The City expects no change in the level of its taxes in the foreseeable future but is unable to predict what overlapping entities might do. A high level of taxation may adversely impact the City's ability to repay bonds.

Yield Control Limitation

State law limits property tax increases from the prior property tax year. Specifically, no taxing entity may set a rate or impose a tax (excluding oil and gas production *ad valorem* and oil and gas production equipment *ad valorem* taxes) or assessment that will produce revenues that taxes exceed the prior year's tax revenues from residential and non-residential property multiplied by a "growth control factor." The growth control factor is the percentage equal to the sum of (a) "percent change I" plus (b) the prior property tax year's total taxable property value plus "net new value," as defined by statute, divided by such prior property tax year's total taxable property value; however, if that percentage is less than 100 percent, then the growth control factor is (a) "percent change I" plus (b) 100%. "Percent change I" is based upon the annual implicit price deflator index for state and local government purchases of goods and services (as published in the United States Department of Commerce monthly publication entitled "Survey of Current Business," or any successor publication) and is a percent (not to exceed 5%) that is derived by dividing the increase in the prior calendar year's index over the index for the calendar year next preceding the prior calendar year (unless there was a decrease, in which case zero if used) by the index for such calendar year next preceding the prior calendar year. *The growth control factor applies to authorized operating levies and to any capital improvements levies, but does not apply to levies for paying principal and interest on public general obligation debt.*

Limitations on Residential Property Tax Increases

In an effort to limit large annual increases in residential property taxes in some areas of the State (particularly the Santa Fe and Taos areas which have experienced large increases in residential property values in recent years), an amendment to the uniformity clause (Article VIII, Section 1) of the New Mexico Constitution was approved by a wide margin by New Mexico voters on November 3, 1998.

The amendment directs the Legislature to provide for valuation of residential property in a manner that limits annual increases in valuation. The limitation may be applied to classes of residential property

taxpayers based on occupancy, age or income. The limitations may be authorized statewide or at the option of a local jurisdiction and may include conditions for applying the limitations.

Section 7-36-21.2 NMSA 1978 establishes a statewide limitation on residential property valuation increases beginning in tax year 2001. Annual valuation increases will be limited to the greater of 3% over the prior year's valuation or 6.1% over the valuation from two years prior. These limitations do not apply under the following exceptions:

1. When residential property is being valued for the first time;
2. When physical improvements (except for solar energy system installations) are made to the property or are omitted in a prior tax year;
3. When the property is transferred to a person other than a spouse, or a child who occupies the property as his principal residence and who qualifies for the head of household exemption on the property under the Property Tax Code;
4. When a change in zoning or use of property occurs; and
5. To property that is subject to the valuation limitations under Section 7-36-21.3 NMSA 1978.

Section 7-36-21.3 NMSA 1978 places a limitation on the increase in value for property taxation purpose for single-family dwellings occupied by low-income owners who are 65 years of age or older or who are disabled and whose modified gross income for the prior taxable year did not exceed the income thresholds provided by statute. The statute fixes the valuation of the property to the valuation in the year that (a) for a person 65 or older, in the tax year in which the owner qualifies and files an application, or (b) for a person who is disabled, in the tax year in which the owner qualified and files an application the owner turned 65 or became disabled. The Section 7-36-21.3 limitation does not apply:

1. To property that is being valued for the first time;
2. To a change in valuation resulting from physical improvements made to the property in the preceding year; and
3. To a change in valuation resulting from a change in the zoning or permitted use of the property in the preceding year.

Amendments to State laws affecting residential property taxes are proposed from time to time and may be proposed in the future by the Legislature. Such amendments, if enacted, could result in an increase to the tax rate imposed on residential property tax within the City in order to pay the principal of and interest on general obligation bonds issued by the City, including the Bonds.

The constitutionality of the property tax limitation has been challenged in a number of venues. On March 28, 2012, the New Mexico Court of Appeals upheld the statutory valuation cap and its application under Section 7-36-21.2 NMSA 1978, which ruling was affirmed by the New Mexico Supreme Court in June, 2014.

Tax Collections on Locally Assessed and Centrally Assessed Property

General (*ad valorem*) taxes (other than taxes on certain property and business that are centrally assessed) for all units of government are collected by the Doña Ana County Treasurer and distributed monthly to the various political subdivisions to which they are due. Property taxes are due in two installments. The first half installment is due on November 10 and becomes delinquent on December 10. The second half installment is due on April 10 and becomes delinquent on May 10. In 2019, the legislature enacted temporary provisions for tax years 2019 and 2021 which extended the due date from November

10th to December 6th in 2019 and 2021 respectively, and the date of delinquency for the first installment from December 10th to January 9th in 2020 and 2022, respectively. Those temporary provisions have expired.

Collection statistics for Doña Ana County are presented here:

Tax Year	Fiscal Year	Net Taxes Charged to Treasurer	Current Tax Collections[1]	Current Collections as of % of Net Levied	Current/ Delinquent Tax Collection[2]	Current/ Delinquent Collections as a % of Net Levied

Source: Dona Ana County Treasurer's Office

For tax year 2023 (fiscal year 2023-2024), net taxes charged to the Treasurer were $171,829,149.

Interest on Delinquent Taxes

Pursuant to Section 7-38-49, NMSA 1978, if property taxes are not paid for any reason within thirty (30) days after the date they are due, interest on the unpaid taxes shall accrue from the thirtieth (30th) day after they are due until the date they are paid. Interest accrues at the rate of 1% per month or any fraction of a month. However, in the case of a timely protest, interest payable shall be computed on a principal amount equal to the unpaid taxes finally determined to be due upon resolution of the protest.

Penalty for Delinquent Taxes

Pursuant to Section 7-38-50 NMSA 1978, if property taxes become delinquent, a penalty of one percent of the delinquent tax for each month, or any portion of a month, they remain unpaid shall be imposed, but the total penalty shall not exceed five percent (5%) of the delinquent taxes. The minimum penalty imposed is $5.00. A county can suspend application of the minimum penalty requirement for any tax year.

If property taxes become delinquent because of intent to defraud by the property owner, 50% of the property taxes due or $50.00, whichever is greater, shall be added as a penalty.

Remedies Available for Non-Payment of Taxes

Pursuant to Section 7-38-47 NMSA 1978, property taxes are the personal obligation of the person owning the property on the date on which the property was subject to valuation for property taxation

purposes. A personal judgment may be rendered against the taxpayer for payment of taxes that are delinquent, together with any penalty and interest on the delinquent taxes. The sale or transfer of property after its valuation date does not relieve the former owner of personal liability for the property taxes imposed for that tax year.

Taxes on real property are a lien against the real property. A lien runs in favor of the State and secures the payment of property taxes and any penalty and interest until such payments are made. Such lien is a first lien and paramount to any other interest in the property, perfected or unperfected. Pursuant to Section 7-38-65 NMSA 1978, delinquent taxes on real property may be collected by selling the real property on which taxes are delinquent at any time after the expiration of three years from the first date shown on the tax delinquency list on which the taxes became delinquent.

Pursuant to Section 7-38-53 NMSA 1978, delinquent property taxes on personal property may be collected by asserting a claim against the owner(s) of the personal property for which taxes are delinquent.

Protest

Pursuant to Section 7-38-39 NMSA 1978, after receiving his or her property tax bill and after making payment prior to the delinquency date of all property taxes due in accordance with the bill, a property owner may protest the value or classification determined for his or her property for property taxation purposes, the allocation of value of his or her property to a particular governmental unit, the application to his or her property of an administrative fee adopted pursuant to Section 7-38-36.1 NMSA 1978 or a denial of a claim for an exemption by filing a claim for refund in the district court. Pursuant to Section 7-38-41 NMSA 1978, the portion of any property taxes paid to the County Treasurer that is not admitted to be due and is the subject of a claim for refund will be deposited in a "property tax suspense fund." Moneys in the property tax suspense fund may not be used for the payment of debt service on the Bonds.

FINANCES OF THE CITY

Budget Process

Pursuant to the City Charter (the "Charter"), the City adheres to the following procedure in establishing its annual budget: At least sixty (60) days prior to the start of the fiscal year (July 1), the City Manager shall submit a budget and budget message to the council for the ensuing fiscal year. The City Manager's message shall explain the budget both in fiscal terms and in terms of work programs. It shall outline the proposed financial policies of the City for the ensuing fiscal year and describe the important features of the budget. It shall indicate any major changes from the current year in financial policies, expenditures, and revenues together with the reasons for such changes. The budget message shall summarize the City's debt position and include any other material the City Manager deems desirable.

The budget itself shall provide a complete financial plan of all City funds and activities for the ensuing year. The budget shall show in detail all estimated income, indicating the estimated property tax levy, estimated tax revenues, and all proposed expenditures, and shall be arranged to show comparative figures for actual and estimated income and expenditures of the current fiscal year. It shall also show actual income and expenditures of the preceding fiscal year to date and estimated income and expenditures for the remaining months of the fiscal year. The budget shall include the following: (1) proposed expenditures for current operations during the ensuing fiscal year; (2) proposed capital expenditures during the ensuing fiscal year, detailed by offices, departments and agencies when practicable, and the proposed method of financing each capital expenditure; and (3) anticipated reserves for the ensuing fiscal year of each enterprise owned by the City and the proposed method of the disposition of those reserves. Subsidiary budgets for each

enterprise giving detailed income and expenditure information shall be attached as appendices to the budget. The total of proposed expenditures for a year shall not exceed the total of estimated resources for that year.

Following a public hearing on the proposed budget, the City Council may adopt the budget, with or without amendment. The City Council may add or increase programs or amounts and may delete or decrease any programs or amounts, except for expenditures required by law, for debt service or for estimated cash deficit. No amendment to the budget or capital improvements program shall increase the authorized expenditures to an amount greater than the total of estimated resources available during the fiscal year. The City Council shall adopt the budget no later than thirty (30) days before the beginning of the fiscal year. If it fails to adopt the budget by the beginning of the fiscal year, the amounts appropriated for current operation for the current fiscal year are deemed adopted for the ensuing fiscal year on a month-to-month basis, with all items in it prorated accordingly, until the City Council adopts a budget. Nothing in the Charter shall preclude the City from meeting its debt service when due. Adoption of the budget shall constitute appropriations of the amounts specified therein as expenditures from the funds indicated in the budget.

If during the fiscal year the City Manager certifies that resources are available for appropriation in excess of those estimated in the budget, the City Council may make supplemental appropriations for the year up to the amount of the excess. If at any time during the fiscal year, the City Manager believes that the resources available may be insufficient to meet the amount appropriated, the City Manager shall so report to the City Council, indicating the estimated amount of the deficit, any remedial action taken or to be taken by the City Manager, and recommendations as to any other steps to be taken. The City Council shall then take any action deemed necessary to prevent any deficit, and for that purpose it may reduce any appropriation. No appropriation for debt service may be reduced or transferred. No appropriation may be reduced below any amount required by law to be appropriated or by more than the amount of the unencumbered balance thereof.

As a management control device, the City employs formal budgetary integration at the line item level. Deficit financing is not permitted under New Mexico law.

The Government Finance Officers Association ("GFOA") awarded to the City the Distinguished Budget Presentation Award in 2022, which is the 16th consecutive year the City has achieved this designation. The City also received the Certificate of Achievement of Excellence in Financial Reporting, for the 19th consecutive year for the City's 2022 Annual Certified Financial Report.

Financial Statements

The following General Fund Balance Sheet and Statement of Revenues, Expenditures and Changes in Fund Balances have been included herein for informational purposes only. Figures were taken from the audit reports prepared by the City. Audited figures are excerpts of the audit reports and do not purport to be complete. Reference is made to the complete audit reports which are available upon request.

THE CITY

General

The Las Cruces/Doña Ana County area borders Texas and Mexico and has a rich and colorful history, ranging from 16th century Spanish explorations to the landing of the space shuttle. Las Cruces is the second largest city in the State and is the commercial service and cultural center of southern New Mexico. The City of Las Cruces is located approximately 45 miles north of El Paso, Texas and Cuidad Juárez, Mexico and 225 miles south of Albuquerque, New Mexico.

The economy of the Las Cruces MSA (Metropolitan Statistical Area) is diversified with the major employers being government which accounted for approximately 21,500 jobs as of November 2023. The remaining non-agricultural jobs are in private education and health services (18,400), trade/ transportation/ utilities (11,400), leisure and hospitality (9,200), professional and business services (7,200), mining and construction (3,900), manufacturing (3,500), financial activities (2,400), information (600), and all other services (1,600) (as reported in the New Mexico Department of Workforce Solutions Labor Market Review, November 2023).

Growth in the economy is demonstrated in the growth of gross receipts from retail trade, assessed valuation, building permits, housing prices, and median household income.

Government

The City was founded in 1849 and incorporated in 1907 and operates under a home rule charter with a Council-Manager form of government. Nonpartisan elections are held for members of the City Council of the City (the "Council") for the election of councilors from six single-member districts and for a Mayor to be nominated and elected at large by the resident and qualified voters of the City.

Councilors and the Mayor are elected for staggered four year terms. The Mayor and the Council and the date of expiration of their current terms are as follows:

Name	Office	Current Term Expires
Eric Enriquez	Mayor	December 31, 2027
Cassie McClure	Councilor – District 1	December 31, 2027
Bill Mattiace	Councilor – District 2	December 31, 2027
Becki Graham	Councilor – District 3	December 31, 2025
Johana Bencomo	Councilor – District 4	December 31, 2027
Becky Corran	Councilor – District 5	December 31, 2025
Yvonne M. Flores	Councilor – District 6	December 31, 2025

Administrative Officers

City Manager Ifo Pili began his duties as Las Cruces City Manager in September 2020. Before coming to Las Cruces, Mr. Pili was the city administrator in Eagle Mountain City, Utah since 2012. He also served as Eagle Mountain City's assistant city administrator and economic development coordinator for six years before becoming city administrator. He also was the district administrator for the Unified Fire Service Area, which served 11 Utah municipalities and unincorporated Salt Lake County. Mr. Pili was also an adjunct professor in the Master of Public Administration program at Brigham Young University, teaching local government management. He earned a Bachelor of Science degree in political science and a Master of Public Administration degree from BYU.

Finance Director of Financial Services Leeann DeMouche joined the City of Las Cruces in 2011 with an extensive analytical background in economics and project management. Ms. DeMouche spent ten years with New Mexico State University as the Water Resource Specialist. In 2011, she began her career with the City as the Water Conservation Coordinator. In 2013 she was promoted as the Rate and Economic Analyst Manager, 2015 Fleet Administrator, 2018 Chief Budget Officer, and 2021 Finance Director. Ms. DeMouche is a graduate of New Mexico State University with a BA and MA in Economics.

City Treasurer Erika Jaquez, MBA, as the Treasurer for the City of Las Cruces, has responsibility for management and direction of treasury operations including short-term investment portfolio management, long and short term debt issuance, operational budgeting, bank relationship management and credit card processing. She started with the City in October 2011 and has held various positions in finance, public works, and internal audit. Ms. Jaquez earned her Master of Business Administration and Master of Accountancy from New Mexico State University.

City Clerk Christine Rivera has been with the City of Las Cruces since 2012, was appointed interim city clerk in October of 2019, and became city clerk in August 2020. She received her Certified Municipal Clerk designation in 2016. She earned her Bachelors in Psychology from Louisiana College in 2001 and her Masters in Psychology from Capella University in 2016.

City Attorney Linda A. Samples became the Las Cruces City Attorney on July 31, 2023. Immediately prior to becoming City Attorney, Ms. Samples served as Associate General Counsel for the Texas Tech University System. Previously, Ms. Samples served as Senior Assistant City Attorney for the City of El Paso from August 2013 to August 2017, in which she advised all department and the Public Services Board on personnel matters. Additionally, Ms. Samples' professional experience includes serving as El Paso Independent School District's first In-House Counsel and an Associate with the El Paso Baskind and Hosford Law Firm. Ms. Samples currently serves on the State Bar of Texas Grievance Committee, is the Chair of the State Bar of Texas' Women in the Profession Committee and serves as Treasurer of the Texas Government Law Council. Ms. Samples earned her Juris Doctorate degree from the University of Michigan where she served as Managing Editor of the "Michigan Journal of Race and Law" and earned her Bachelor of Arts degree in psychology with honors and cum laude from the University of Texas at El Paso, where she was named a Top Ten Senior.

Other Employees

As of June 30, 2023, the City had approximately 1861 full time equivalent employees, approximately 419 of which are represented by labor unions. The City believes that relations with its employees are good.

Retirement Plan

The City participates in a pension plan organized on a statewide basis and operated by the State of New Mexico. The Public Employees' Retirement Association of New Mexico (the Plan"), established by Chapter 167, Laws of 1947, New Mexico Statutes Annotated, 1978 Compilation, as amended, requires contributions, computed as a percentage of salary, from both employee and employer for all full-time employees. The majority of State and municipal employees in New Mexico participate in the Plan. The Plan requires contributions by the City and by employees at rates established by statute.

In addition to retirement benefits, the Plan provides disability benefits, surviving spouse and children's benefits, deferred benefits option and cost of living adjustments for all eligible participants. Employer contributions to the pension plan amounted to $10,795,053 for the fiscal year ended June 30, 2023. The City's liability under the Plan is limited to the periodic employer contributions, that it is required to make for its participating employees. Future deficits of the Plan are expected to be financed by the State.

On June 25, 2012, the Governmental Accounting Standards Board approved Statement No. 68 which requires governments providing defined benefit pensions to recognize their long-term obligation for pension benefits as a liability for the first time, and to more comprehensively and comparably measure the annual costs of pension benefits. Statement No. 68 requires cost-sharing employers, such as the City, to record a liability and expense equal to their proportionate share of the collective net pension liability and expense for the cost-sharing plan. Statement No. 68 was effective for fiscal years beginning after June 15, 2014.

The City offers other post-employment benefits through the Retiree Health Care Fund, a cost-sharing multiple employer defined benefit plan administered by the New Mexico Retiree Healthcare Authority. This plan is used to provide post-employment health insurance benefits for eligible employees and their dependents. The contribution requirements are established by and may be amended by the statute. The City's contribution to the fund for Fiscal Year 2023 was $1,800,812. For additional information regarding the post-employment benefit plan, please refer to Note 11 to the City's audited financial statements.

City Budgets

The City adheres to the following procedure in establishing its annual budget: the City Staff prepares a budget which is forwarded to the City Council prior to May 1 for the fiscal year commencing the following July 1; public input is sought by the City Council during the month of May through public hearings; the budget is approved by the City Council and forwarded for approval to the State of New Mexico, Local Government Division of the Department of Finance and Administration; the final budget is returned to the City with recommended changes and modifications; and the final budget is acknowledged by the City Council.

The operating budget includes proposed expenditures and the means of financing them.

The City Manager is authorized to transfer budgeted amounts that are within a designated organizational unit, are within the same fund and do not increase spending for any fund. The City Manager must obtain approval of the City Council and the State prior to making revisions that alter the total expenditures of any fund. As a management control device, the City employs formal budgetary integration at the line item level.

Deficit financing is not permitted under New Mexico law. The level of classification detail at which expenditure may not legally exceed appropriation for each budget item is the fund level (i.e., General, Water, Sewer, etc.).

City Strategic Plan

The City Council adopted a new strategic plan for 2021 through 2026. The strategic plan is a mid-term planning tool used by the City Council, City Management, and Staff to identify community priorities and budget accordingly.

The strategic plan is organized into six themes and related objectives:

- Community Prosperity
    - Expanded housing options for all income levels
    - Enhanced economic diversity and business strength
- Education and community services
    - Enhanced physical and mental resources
    - Improved access to healthy food options

- Environmental sustainability
    - Achieve the goals included in the climate action plan adopted in 2020
    - Promote balanced growth
- Capital improvements and infrastructure
    - Quality infrastructure that meets the community's needs
    - Expanded transit access and options, including pedestrian and bicycle improved road and pavement conditions
- Communication, involvement, and follow-up
    - Robust communication channels with residents between City departments
    - Timely and consistent follow-up by City staff to residents and the public
- Public safety
    - A more humane criminal justice system
    - A safe and secure community

Each theme in the strategic plan contains several goals for a total of 55 goals. The majority of these goals were developed during the two-year planning for Elevate Las Cruces, the City's comprehensive plan. In addition to these, the City Council identified nine council goals, also to be prioritized in the short-to-mid-term planning horizon. Performance measures were developed by staff during the update of department strategic business plans.

Industry

A combination of a well-educated labor force, favorable tax rates and a high quality of living has attracted industry to Las Cruces. The blend of industries contributing to the diversification of the City's economy include: TMC Design (DOD contractor); Pony Carburetor (manufacturer); White Sands Missile Range and Test Facility (U.S. Army, private industry testing facility), Mountain View Medical Center (hospital), NASA LBJ Test Facility (rocket testing), Sapphire Energy (alternative energy production); Wal-Mart (retail); Tresco, Inc. (sheltered employment); VMC (technical support/communication); Saputo Inc. (cheese manufacturer); and NMSU Physical Science Laboratory.

Education

The Las Cruces School District No. 2 (the "District") is the second largest in the State, with an enrollment of approximately 24,999 students. The district has 40 schools: 24 elementary schools (grades pre-K-5), one combined elementary and middle school (K-8), 8 middle schools (grades 6-8), 7 high schools (grades 9-12). Two of the seven high schools are early college high schools and are located on the campus of New Mexico State University. The District also has a virtual learning academy serving elementary through high school students.

New Mexico State University

New Mexico State University (the "University"), was originally founded in 1888, and in 1889 was established as a land grant college. The University consists of its main campus in the City, with branch campuses located in Alamogordo, Grants, Doña Ana and a satellite learning center in Albuquerque. As of September 1, 2023, the University had enrollment of approximately 21,797 students across all campuses, and its Las Cruces Campus had a Fall 2023 enrollment of approximately 14,779 undergraduate and graduate students. The University has 29 doctoral programs, 68 master's degree programs, and 97 undergraduate degree programs, 24 graduate certificate programs, and one education specialist program are available in the University's 6 colleges (Agriculture, Consumer and Environmental Sciences; Arts and Sciences;

Business; Engineering; Health, Education and Social Transformation; and Honors) and the Graduate School.

The University's main campus encompasses approximately 900 acres and consists of more than 211 academic, research, and auxiliary buildings, and over 400 housing buildings. As or September 15, 2023 the University employed 1604 faculty members (of which 1090 are located on the Las Cruces campus) and 2,783 staff (of which 2,394 are located on campus in Las Cruces). The University's largest single research operation is the Physical Science Laboratory. Research for engineering, space technology, and farm production and related industries are also conducted by various University departments. The University is classified as an R2 Doctoral/Research institution as rated by the Carnegie Foundation. The University anchors the southern end of New Mexico's Rio Grande Research Corridor. The statewide Water Resources Research Institute is situated at the University and studies the State's water supply and demands, conservation and use, as well as ecological and other aspects thereof.

The Doña Ana Community College, affiliated with the University and the area's occupational training school, offers approximately 6,849 students a variety of programs designed to train students for meaningful employment. The program is designed to be flexible and can be programmed to meet the specific training needs of employers.

Agriculture

Many private and commercial farms are located in Doña Ana County. Principal crops include cotton, pecans, alfalfa, onions, lettuce, chile, barley, nursery stock, and feed grains. Water for the various agricultural operations is provided by surface water diverted from the Rio Grande River and approximately 900 irrigation wells. The area's growing season averages about 200 days each year. The livestock, dairy cattle, Stahmann Pecan Farms (3,200 acres), and the poultry industry also provide a significant portion of agricultural income. Several chile processing plants are located in the area with seasonal employment growing to nearly 1,000.

Transportation

Historically a crossroads of the Southwest, Las Cruces is serviced by Interstate Highways I-10 (east-west) and I-25 (north-south). In addition, the City is served by five major U.S. highways and seven State highways. More than 20 interstate, regional, and local motor carriers serve Las Cruces; four of them operate terminals in the area.

Commuter air service and corporate and general aviation service is available at the City's international airport. Major scheduled airline service is provided by El Paso International Airport, approximately 50 miles from Las Cruces.

Daily rail service, with piggyback and container service, is provided by the Santa Fe and Southern Pacific railroads.

Labor Force and Percent Unemployed

The following table, derived from information supplied by the New Mexico Department of Workforce Solutions, presents information on employment within the Las Cruces MSA (Doña Ana County), the State and the United States, for the periods indicated. Unless otherwise noted, the annual unemployment figures indicate average rates for the entire year and do not reflect monthly or seasonal trends.

Employment Information

Year[1]	Las Cruces MSA (Doña Ana County) Labor Force	Las Cruces MSA (Doña Ana County) Percent Unemployed	State of New Mexico Labor Force	State of New Mexico Percent Unemployed	United States Percent Unemployed

Effective Buying Income

The following table reflects the percentage of households by Effective Buying Income ("EBI") and a five-year comparison of the estimated median household income. EBI is personal income less personal tax and non-tax payments. Personal income includes wages and salaries, other labor income, proprietors' income, rental income, dividends, personal interest income, and transfer payments. Deductions are made for federal, state, and local taxes, non-tax payments such as fines and penalties, and personal contributions for social security insurance. The following chart depicts the median household EBI level for the Las Cruces MSA, the State of New Mexico and the United States.

Effective Buying Income Group	Las Cruces MSA	New Mexico	United States
Under $25,000	23.56%	21.01%	15.66%
$25,000 – 34,999	9.44%	8.87%	7.25%
$35,000 – 49,999	13.21%	12.16%	10.82%

TAX STATUS

General

In the opinion of Modrall, Sperling, Roehl, Harris & Sisk, P.A., Bond Counsel, to be delivered at the time of original issuance of the Series 2024 Bonds, based on existing laws of the State of New Mexico as enacted and construed, interest on the Bonds is excludable from net income for present State of New Mexico income tax purposes.

The Bonds are being issued as federally taxable under the Internal Revenue Code of 1986, as amended (the "Code").

CONTINUING DISCLOSURE INFORMATION

The City will enter into an undertaking (the "Undertaking"), in the form attached as Appendix D, for the benefit of the holders of the Bonds to provide (i) certain financial information by no later than March 31st of each year, beginning March 31, 2025 until the Bonds are no longer outstanding, and (ii) operating data, and to provide notice of certain events, pursuant to the requirements of section (b)(5)(i) of Rule 15c2-12 of the Securities and Exchange Commission (17 C.F.R. § 240.15c2-12). A failure by the City to provide any information required thereunder shall not constitute an Event of Default under the Master Ordinance. The City has previously entered into continuing disclosure undertakings (each a "Prior Undertaking" and collectively, the "Prior Undertakings") with respect to certain other obligations of the City in accordance with Section Rule 15c2-12 and, during the last five years, the City has complied in all material respects with those Prior Undertakings.

Compliance with Continuing Disclosure Undertakings in Future Years

The City intends to maintain compliance with its continuing disclosure undertakings in future years through the collective oversight and effort of current City finance staff and private consultants, all of whom have experience and knowledge related to the City's continuing disclosure obligations. Additionally, the City has Continuing Disclosure Procedures on file with the current City finance staff and the City's private consultants, which were adopted by the City Council on July 7, 2014.

LITIGATION

At the time of the original delivery of the Bonds, the City will deliver a no-litigation certificate to the effect that no litigation or administrative action or proceeding is pending or, to the knowledge of the appropriate City officials, threatened, restraining or enjoining, or seeking to restrain or enjoin, the issuance and delivery of the Bonds, effectiveness of the Bond Ordinance, or contesting or questioning the proceedings and authority under which the Bonds have been authorized and are to be issued, sold, executed or delivered, or the validity of the Bonds.

The City of Las Cruces is party to various legal proceedings seeking damages or injunctive relief and generally incidental to the operations of the City. In addition, the City is a defendant in several cases involving City Police Department action which, if determined unfavorably to the City, may involve significant damages or settlement. The litigation to which the City is a party is unrelated to and does not question the validity of the Bonds, the proceedings under which the Bonds are issued, nor the City's ability to levy and collect property taxes to pay the debt service on the Bonds. The City is self-insured with respect to all but one of the cases for which there is private insurance. Payment of any settlement or judgement may require the City to access funds in its unrestricted reserves. The ultimate disposition of such proceedings is not presently determinable. Given the current status of the cases, the nature of the claims in the cases, the uncertainty of monetary damages, if any, the amount of any loss through jury verdict or settlement is not reasonably subject to estimation at this time. The City continues to defend itself vigorously against the allegations.

RATINGS

Moody's Investors Service ("Moody's") has assigned a ____ rating to the Bonds. An explanation of the significance of the ratings given by Moody's may be obtained from Moody's at 7 World Trade Center at 250 Greenwich Street, New York, NY 10007 or https://www.moodys.com.

Such rating reflects only the view of Moody's, and there is no assurance that such ratings will continue for any given period of time after obtained or that such ratings will not be revised downward or withdrawn entirely by the rating agencies if, in their judgment, circumstances so warrant. Any such downward revision or withdrawal of such ratings may have an adverse effect on the market price of the Bonds. Neither the City nor the initial purchasers of the Bonds have undertaken any responsibility to bring to the attention of the owners of the Bonds any proposed change in or withdrawal of such ratings once received or to oppose any such proposed revision.

MUNICIPAL ADVISOR

RBC Capital Markets, LLC is employed as Municipal Advisor to the City in connection with the issuance of the Bonds. The Municipal Advisor's fee for services rendered with respect to the sale of the Bonds is contingent upon the issuance and delivery of the Bonds. RBC Capital Markets, LLC, in its capacity as Municipal Advisor, has relied on the opinion of Bond Counsel and does not assume any responsibility for the information, covenants and representations contained in any of the legal documents with respect to the federal income tax status of the Bonds, or the possible impact of any present, pending or future actions taken by any legislative or judicial bodies.

The Municipal Advisor to the City has provided the following sentence for inclusion in this Official Statement. The Municipal Advisor has reviewed the information in this Official Statement in accordance with, and as part of, its responsibilities to the City and, as applicable, to investors under the federal securities laws as applied to the facts and circumstances of this transaction, but the Municipal Advisor does not guarantee the accuracy or completeness of such information.

LEGAL MATTERS

The legality of the Bonds will be approved by Modrall, Sperling, Roehl, Harris & Sisk, P.A., Albuquerque, New Mexico, Bond Counsel, whose unqualified opinion approving the legality of the Bonds will be furnished at the closing.

TRANSCRIPT AND CLOSING DOCUMENTS

A complete transcript of proceedings and a no-litigation certificate (described above under "LITIGATION") will be delivered by the City when the Bonds are delivered. The City will at that time also provide a certificate relating to the accuracy and completeness of this Official Statement.

ADDITIONAL INFORMATION

All summaries of the statutes, resolutions, opinions, contracts, agreements, financial and statistical data and other related reports described in this Official Statement are subject to the actual provisions of such documents. The summaries do not purport to be complete statements of such provisions and reference is made to such documents, copies of which are either publicly available or available for inspection during normal business hours at the offices of the City located at 700 North Main, Las Cruces, New Mexico 88001 or at the offices of RBC Capital Markets, LLC, 6301 Uptown Boulevard, N.E., Suite 100, Albuquerque, New Mexico 87110.

OFFICIAL STATEMENT CERTIFICATION

As of the date hereof, this Official Statement is true to the best of my knowledge, complete and correct in all material respects, and does not include any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made herein, in light of the circumstances under which they are made, not misleading.

The preparation of this Official Statement and its distribution have been authorized by the City Council. The Official Statement is hereby duly approved by the City Council as of the date on the cover page hereof.

ERIC ENRIQUEZ, MAYOR

APPENDIX A

OPINION OF BOND COUNSEL

April __, 2024

City of Las Cruces
Las Cruces, New Mexico

$6,000,000
City of Las Cruces, New Mexico
Taxable General Obligation Improvement Bonds
Series 2024

Ladies and Gentlemen:

We have acted as bond counsel to the City of Las Cruces (the "City"), Dona Ana County, State of New Mexico (the "State"), in connection with the issuance and sale of its $6,000,000 Taxable General Obligation Improvement Bonds, Series 2024 (the "Bonds"), dated April __, 2024, with interest payable on August 1, 2024 and semi-annually thereafter on February 1 and August 1 in each year in which the Bonds are outstanding, being issued in registered form and maturing serially on August 1 in the years 2024 through 20__, inclusive. The Bonds are being issued pursuant to Ordinance No. 3062 by the City Council on March 4, 2024 as supplemented by the Award Certificate executed on March __, 2024 .

We have examined the transcript of proceedings (the "Transcript") relating to the issuance of the Bonds and the law under authority of which the Bonds are issued. Based on our examination, we are of the opinion that, under the law existing on the date of this opinion, subject to the provisions of federal bankruptcy law and other laws affecting creditors' rights and further subject to the exercise of judicial discretion in accordance with general principles of equity:

1. The Bonds constitute legal, valid and binding general obligation debt of the City and the principal of and interest on the Bonds, unless paid from other sources, are to be paid from the proceeds of the levy of ad valorem taxes on all property within the City subject to *ad valorem* taxes levied by the City, which taxes are unlimited as to rate or amount.

2. The Bonds and the income from the Bonds are exempt from all taxation by the State or any political subdivision of the State.

The opinions expressed herein are based upon existing laws as of the date of issuance and delivery of the Bonds. We express no opinion as of any date subsequent hereto, and our engagement with respect to the Bonds has concluded with their issuance. We disclaim any obligation to update this opinion.

The obligations of the City related to the Bonds are subject to the reasonable exercise in the future by the State and its governmental bodies of the police power inherent in the sovereignty of the State and to the exercise by the United States of the powers (including bankruptcy powers) delegated to it by the United States Constitution. The obligations of the City and the security provided therefor, as contained in the Bond Ordinance, may be subject to general principles of equity which permit the exercise of judicial discretion and are subject to the provisions of applicable bankruptcy, insolvency, reorganization, moratorium or similar laws relating to or affecting the enforcement of creditors' rights generally, now or hereafter in effect.

The foregoing opinions represent our legal judgment based upon a review of existing legal authorities that we deem relevant to render such opinions and are not a guarantee of result. We express no opinion with respect to any pending legislation.

We are passing upon only those matters set forth in this opinion and are not passing upon the accuracy or completeness of any statement made in connection with any sale of the Bonds or upon any tax consequences arising from the receipt or accrual or interest on, or the ownership of, the Bonds except those specifically addressed in paragraphs 2 above.

Respectfully submitted,

APPENDIX B

AUDITED FINANCIAL STATEMENTS – JUNE 30, 2023

The City has not requested the consent of Patillo, Brown & Hill, LLP, which performed the audit of the City's Financial Statements, to the inclusion of the audit report and excerpts thereof in this Official Statement, and the auditor has not conducted a post-audit review of those Financial Statements.

APPENDIX C

FORM OF CONTINUING DISCLOSURE UNDERTAKING

CONTINUING DISCLOSURE UNDERTAKING

Section 1. Recitals. This Continuing Disclosure Undertaking (the "Undertaking") is executed and delivered by the City of Las Cruces, New Mexico (the "City"), in connection with the issuance of the City of Las Cruces, New Mexico Taxable General Obligation Improvement Bonds, Series 2024 (the "Bonds"). The Bonds are being issued pursuant to Ordinance No. 3062 adopted by the City Council on March 4, 2024, as supplemented by the Award Certificate executed on March __, 2024 (collectively, the "Bond Ordinance"). Pursuant to the Bond Ordinance, to allow the owners of the Bonds to comply with the Rule (defined below), the City is required to make certain continuing disclosure undertakings for the benefit of owners (including beneficial owners) of the Bonds (the "Owners"). This Undertaking is intended to satisfy the requirements of the Rule.

Section 2. Definitions.

(a) "Annual Financial Information" means the financial information (which will be based on financial statements prepared in accordance with generally accepted accounting principles, as in effect from time to time ("GAAP"), for governmental units as prescribed by the Governmental Accounting Standards Board ("GASB")) and operating data with respect to the City, delivered at least annually pursuant to Sections 3(a) and 3(b) of this Undertaking, consisting of information of the type set forth under the captions "DEBT AND OTHER FINANCIAL OBLIGATIONS" and "FINANCES OF THE CITY" in the Official Statement.

(b) "Audited Financial Statements" means the City's annual financial statements which financial statements have been audited as may then be required or permitted by the laws of the State.

(c) "EMMA" means the MSRB's Electronic Municipal Market Access system located on its website at emma.msrb.org.

(d) "Event Information" means the information delivered pursuant to Section 3(d) of this Undertaking.

(e) "Financial Obligation" shall mean a (i) debt obligation; (ii) derivative instrument entered into in connection with, or pledged as security or a source of payment for, an existing or planned debt obligation, or (iii) guarantee of (i) or (ii). The term Financial Obligation shall not include municipal securities as to which a final official statement has been provided to the Municipal Securities Rulemaking Board in compliance with the Rule.

(f) "MSRB" means the Municipal Securities Rulemaking Board. The current address of the MSRB is 1900 Duke Street, Suite 600, Alexandria, Virginia 22314, telephone (703) 797-6600, fax (703) 797-6708.

(g) "Official Statement" means the Official Statement dated March __, 2024, delivered in connection with the original issue and sale of the Bonds.

(h) "Report Date" means March 31 of each year, beginning in 2025.

(i) "Rule" means Rule 15c2-12 promulgated by the SEC under the Securities Exchange Act of 1934, as amended (17 C.F.R. Part 240, Section 240.15c2-12), as the same may be amended from time to time.

(j) "SEC" means the Securities and Exchange Commission.

(k) "State" means the State of New Mexico.

Section 3. Provision of Annual Financial Information and Reporting of Event Information.

(a) The City, or its designated agent, will provide the Annual Financial Information for the preceding fiscal year to EMMA on or before each Report Date while the Bonds are outstanding.

(b) If Audited Financial Statements are not provided as a part of the Annual Financial Information, the City will provide Audited Financial Statements to EMMA when and if available.

(c) The City, or its designated agent, may provide Annual Financial Information by specific reference to other documents, including information reports and official statements relating to other debt issues of the City, which have been submitted to EMMA or filed with the SEC; provided, however, that if the document so referenced is a "final official statement" within the meaning of the Rule, such final official statement must also be available from the MSRB.

(d) At any time the Bonds are outstanding and the City obtains knowledge of the occurrence of any of the following events with respect to the Bonds, the City shall file, in a timely manner not in excess of ten (10) business days after the occurrence of the event, a notice of such occurrence with EMMA:

(i) principal and interest payment delinquencies;

(ii) non-payment related defaults, if material;

(iii) unscheduled draws on debt service reserves reflecting financial difficulties;

(iv) unscheduled draws on credit enhancements reflecting financial difficulties;

(v) substitution of credit or liquidity providers, or their failure to perform;

(vi) adverse tax opinions, the issuance by the Internal Revenue Service of proposed or final determinations of taxability, Notices of Proposed Issue (IRS Form 5701-TEB) or other material notices or determinations with respect to the tax status of the security, or other material events affecting the tax status of the security;

(vii) modifications to rights of Bondholders, if material;

(viii) bond calls, if material, or tender offers;

(ix) defeasances;

(x) release, substitution or sale of property securing repayment of the Bond, if material;

(xi) rating changes;

(xii) bankruptcy, insolvency, receivership or a similar event with respect to the City or an obligated person;

(xiii) the consummation of a merger, consolidation, or acquisition involving an obligated person or the sale of all or substantially all of the assets of the obligated person, other than in the ordinary course of business, the entry into a definitive agreement to undertake such an action or the termination of a definitive agreement relating to any such actions, other than pursuant to its terms, if material;

(xiv) appointment of a successor or additional trustee, or a change of name of a trustee, if material;

(xv) the incurrence of a financial obligation of the obligated person, if material, or agreement to covenants, events of default, remedies, priority rights, or other similar terms of a financial obligation of the obligated person, any of which affect security holders, if material; and

(xvi) a default, event of acceleration, termination event, modification of terms, or other similar events under the terms of a financial obligation of the obligated person, any of which reflect financial difficulties.

(e) The City or its designated agent, will provide, in a timely manner not in excess of ten (10) business days after the occurrence of the event, to EMMA, notice of any: (i) failure of the City to timely provide the Annual Financial Information and Audited Financial Statements as specified in Sections 3(a) and 3(b); (ii) changes in its fiscal year-end; and (iii) amendment of this Undertaking.

Section 4. Method of Transmission. Unless otherwise required by law and subject to technical and economic feasibility, the City, or its designated agent, will employ such methods of electronic or physical information transmission as is requested or recommended from time to time by EMMA, the MSRB and the SEC.

Section 5. Enforcement. The obligations of the City under this Undertaking are for the benefit of the Owners. Each Owner is authorized to take action to seek specific performance by court order to compel the City to comply with its obligations under this Undertaking, which action will be the exclusive remedy available to it or any other Owner. The City's breach of its obligations under this Undertaking will not constitute an event of default under the Bond Ordinance and none of the rights and remedies provided by the Bond Ordinance will be available to the Owners with respect to such a breach.

Section 6. Term. The City's obligations under this Undertaking will be in effect from and after the issuance and delivery of the Bonds and will extend to the earliest of (i) the date all principal and interest on the Bonds has been paid or legally defeased pursuant to the terms of the Ordinance; (ii) the date on which the City is no longer an "obligated person" with respect to the Bonds within the meaning of the Rule; or (iii) the date on which those portions of the Rule which require this Undertaking are determined to be invalid or unenforceable by a court of competent jurisdiction in a non-appealable action, have been repealed retroactively or otherwise do not apply to the Bonds. The City shall file a notice of any such termination with EMMA.

Section 7. Amendments. The City may amend this Undertaking from time to time, without the consent of any Owner, upon the City's receipt of an opinion of independent counsel experienced in federal securities laws to the effect that such amendment:

(a) is made in connection with a change in circumstances that arises from a change in legal requirements, a change in law, a change in the identity, nature or status of the City or a change in the availability or character of financial information for the City;

(b) this Undertaking, as amended, would have complied with the Rule at the time of the initial issue and sale of the Bonds, after taking into account any amendments or interpretations of the Rule, as well as any changes in circumstances; and

(c) the amendment does not materially impair the interests of the Owners.

Any Annual Financial Information containing amended operating data or financial information will explain, in narrative form, the reasons for the amendment and the impact of the change in the type of operating data or financial information being provided. If an amendment changes the accounting principles to be followed in preparing financial statements, the Annual Financial Information and Audited Financial Statements for the year in which the change is made will present a comparison between the financial statements or information prepared on the basis of the new accounting principles and those prepared on the basis of the former accounting principles.

Section 8. Beneficiaries. This Undertaking binds and inures to the sole benefit of the City and the Owners and creates no rights in any other person or entity.

Section 9. Limited Obligation. This Undertaking is subject to the availability of necessary funds appropriated by the City.

Section 10. Governing Law. This Undertaking is governed by and is to be construed in accordance with the law of the State.

Date: April __, 2024.

APPENDIX D

OFFICIAL NOTICE OF BOND SALE

$6,000,000
City of Las Cruces, New Mexico
Taxable General Obligation Improvement Bonds
Series 2024

PUBLIC NOTICE IS HEREBY GIVEN that electronic bids will be received by the City Council (the "Council") of the City of Las Cruces, New Mexico (the "City"), for the purchase of all of the City's Taxable General Obligation Bonds, Series 2024 (the "2024 Bonds"), more particularly described below. The 2024 Bonds will be awarded to the winning bidder for the 2024 Bonds by 5:00 p.m., prevailing Mountain Time, March 14, 2024. The City Manager or City Financial Services Director will take action to award the Bonds and certify in writing that the final terms comply with the parameters and conditions established in the Bond Ordinance adopted by the City Council on March 4, 2024.

Bids for the purchase of the 2024 Bonds will be accepted through the Ipreo BiDCOMP/Parity electronic bidding web site. No other method of submitting bids will be accepted. The date and time for submitting bids will be as follows:

Bid Date: March 14, 2024
Bid Time: Between 10:30 a.m. and 11:00 a.m. Eastern Time
(Between 8:30 a.m. and 9:00 a.m. Mountain Time)
Submit Bid to: www.munis.ipreo.com

Information related to this auction can be obtained from Ipreo's BiDCOMP/Parity Auction Support at BIDCOMP/PARITY, 1359 Broadway, 2nd Floor, New York, New York 10018, i-Deal Prospectus: (212) 849-5024 or (212) 849-5025; BidComp/Parity: (212) 849-5021.

To bid, bidders must have both (1) completed the registration form on the Ipreo BiDCOMP/Parity electronic bidding website and (2) requested and received admission to the City's auction, as described under "TERMS OF SALE - Submission of Bids" below. The use of Ipreo BiDCOMP/Parity electronic bidding platform shall be at the bidder's risk and expense, and the City shall have no liability with respect thereto.

Neither the City, Ipreo BiDCOMP/Parity , the Municipal Advisor, nor Bond Counsel shall be responsible for, and each bidder expressly assumes the risk of, any incomplete, inaccurate, or untimely bid submitted by Internet transmission by such bidder, including, without limitation, by reason of garbled transmissions, mechanical failure, engaged telephone or telecommunications lines, or any other cause arising from delivery by Internet transmission. Additionally, the Ipreo BiDCOMP/Parity time stamp will govern the receipt of all bids. The official bid clock does not automatically refresh. Bidders must refresh the auction page periodically to monitor the progression of the bid clock and to ensure that their

bid will be submitted prior to the termination of the auction. All bids will be deemed to incorporate the provisions of this Official Notice of Bond Sale.

This Official Notice of Bond Sale, and the information set forth herein, are not to be treated as a complete disclosure of all relevant information with respect to the 2024 Bonds. The information set forth herein is subject, in all respects, to a more complete description of the 2024 Bonds and the security therefore set forth in the Preliminary Official Statement dated March 7, 2024 (the "Preliminary Official Statement").

BOND DETAILS

The 2024 Bonds will be issued in the aggregate principal amount of $6,000,000, exclusive of premium, if any. The 2024 Bonds and the interest thereon are general obligations of the City. The City has prepared the Preliminary Official Statement, relating to the 2024 Bonds which is deemed by the City to be final as of its date for purposes of allowing bidders to comply with Rule 15c2-12 of the Securities Exchange Commission ("the Rule"), except for the omission of certain information as permitted by the Rule. Details of the 2024 Bonds, including maturities, redemption provisions, payment dates and security for payment are contained in the Preliminary Official Statement. The Preliminary Official Statement is subject to revision, amendment and completion in a Final Official Statement.

The 2024 Bonds will be issued in the aggregate principal amount of $6,000,000, will be dated the date of delivery, will be issued as fully registered bonds and will mature on August 1 of each year as follows:

Years Maturing*	Amounts Maturing*
2024	$1,850,000
2025	1,400,000
2026	275,000
2027	275,000
2028	275,000
2029	275,000
2030	275,000
2031	275,000
2032	275,000
2033	275,000
2034	275,000
2035	275,000

*Subject to Change

The Bonds will be fully registered bonds in the denomination of $5,000 each, or any integral multiple thereof. Interest will be payable on August 1, 2024 and semiannually thereafter on February 1 and August 1 of each year.

Optional Redemption: The Bonds maturing on and after August 1, 2033 may be redeemed prior to their scheduled maturities on August 1, 2032, or on any date thereafter, in whole or in part, at the option of the City at par plus accrued interest to the date of redemption, if any.

Official Statement. The Preliminary Official Statement may be viewed and downloaded from in electronic format at www.fmhub.com (MuniHub) and at www.i-dealprospectus.com or a physical copy may be obtained by contacting the City or the Municipal Advisor, see "Information" below.

The City will make available to the winning bidder, within seven business days after the award of the sale of the 2024 Bonds, the Final Official Statement which is to be downloaded from www.fmhub.com (MuniHub). One printed copy of the Final Official Statement also will be provided to the winning bidder upon request; provided, however, the winning bidder must cooperate in providing the information required to complete the Final Official Statement. Additional copies of the Final Official Statement may be provided at the expense of the winning bidder.

The winning bidder shall comply with the requirements of Rule 15c2-12 and the rules of the Municipal Securities Rulemaking Board.

TERMS OF SALE

Submission of Bids. All bids must be submitted only by electronic bidding through the facilities of Ipreo BiDCOMP/Parity. No other provider of bidding services and no other means of delivery (i.e. telephone, telefax or physical delivery) will be accepted. Bidding for the 2024 Bonds will begin at 10:30 a.m., Eastern Time (8:30 a.m. Mountain Time), as indicated above. The receipt of bids will end promptly at 11:00 a.m., Eastern Time (9:00 a.m. Mountain Time).

To bid, bidders must first visit the Ipreo BiDCOMP/Parity website where, if they have never registered with Ipreo BiDCOMP/Parity , they can register and then request admission to bid on the 2024 Bonds. Subscription to i-Deal's BIDCOMP PARITY Competitive Bidding System is required in order to submit an electronic bid. The City will neither confirm any subscription nor be responsible for the failure of any prospective bidder to subscribe. Only NASD registered broker-dealers and dealer banks with DTC clearing arrangements will be eligible to bid. Bidders who have previously registered with Ipreo BiDCOMP/PARITY may call **(212) 849-5021**, for support with accessing the site.

An electronic bid made through the facilities of PARITY shall be deemed an irrevocable offer to purchase the Bonds on the terms provided in this Official Notice of Bond Sale ("Notice"), and shall be binding upon the bidder. The City and the City's financial and bond advisors shall not be responsible for any malfunction or mistake made by or as a result of the use of the facilities of PARITY, the use of such facilities being the sole risk of the prospective bidder.

If any provisions of this Notice conflict with information provided by PARITY, as the approved provider of electronic bidding services, this Notice shall control. Further information about PARITY, including any fee charged, may be obtained from BIDCOMP/PARITY, 1359

Broadway, 2nd Floor, New York, New York 10018, i-Deal Prospectus: (212) 849-5024 or (212) 849-5025; BidComp/Parity: (212) 849-5021.

For information purposes only, bidders are requested to state in their electronic bids the true interest cost to the Board, as described under "BASIS OF AWARD" below. All electronic bids shall be deemed to incorporate the provisions of this Notice and the Official Bid Form.

For purposes of bids received through the electronic bidding process, the time as maintained by PARITY shall constitute the official time.

Bidding Parameters. Bidders are required to submit unconditional all-or-none bids specifying the rate of interest at which the bidder will purchase all of the 2024 Bonds. Interest shall be bid in multiples of $1/20^{th}$ or $1/8^{th}$ percentum and only one interest rate may be bid for each maturity of the 2024 Bonds. The maximum interest rate may not exceed 6% for any maturity and the maximum interest rate specified for any maturity of the 2024 Bonds may not exceed the minimum interest rate specified for any maturity of the 2024 Bonds by more than three percent (3%). The maximum net effective interest rate of the 2024 Bonds shall not exceed ten percent (10%) per annum. The 2024 Bonds will not be sold for less than par. The Underwriter's Discount on the 2024 Bonds shall not exceed 4% of the par amount of the 2024 Bonds.

The Bonds will not be sold for less than 100% of par.

Bidders are required to submit a bid specifying the lowest rate or rates of interest and premium, if any, at which such bidder will purchase the Bonds. For informational purposes only, each bidder is requested to specify: (a) the method of payment of the good faith deposit, (b) the True Interest Cost on the Bonds stated as a nominal annual percentage rate (see "BASIS OF AWARD" below), (c) gross interest cost, (d) premium, if any, and (e) net interest cost. Only unconditional bids shall be considered. Bids should be submitted as an electronic bid using the facilities of PARITY. No other method of submitting bids will be accepted (see "FURTHER INFORMATION" below).

Term Bonds. A bidder may elect to have all or a portion of the 2024 Bonds scheduled to mature in consecutive years issued as one or more term bonds (the "Term Bonds") scheduled to mature in the latest of the consecutive years and subject to mandatory redemption requirements consistent with the schedule of serial maturities set forth in the Preliminary Official Statement, however, not less than all Bonds of the same serial maturity shall be converted to Term Bonds with mandatory redemption requirements.

Adjustment of principal amounts, modification or clarification prior to examination of bids. The City Financial Services Director, in consultation with the City's financial and bond advisors, in the City Financial Services Director's sole discretion and prior to the examination of bids, may (i) adjust the aggregate principal amount set forth herein or may adjust the principal amount of each series without increasing the aggregate principal amount of Bonds; (ii) adjust individual maturities, and/or (iii) modify or clarify any other term hereof, including the date on which bids for the 2024 Bonds will be received, by issuing a notification of the adjusted series,

amounts, modification or clarification via Thomson Municipal News ("TM3") and/or Bloomberg Financial Services no later than 8:00 a.m., Mountain Time, on the Bid Date.

Adjustments to principal amounts after determination of best bid. The aggregate principal amount of the 2024 Bonds is subject to increase or reduction, and each scheduled maturity thereof is subject to increase or reduction, by the City Financial Services Director after the determination of the Best Bid (defined below). Such adjustments will be made within no more than two (2) hours after the end of the time of bid examination and will be in the sole discretion of the City. To cooperate with any adjustment in the principal amounts, the Purchaser is required to indicate by e-mail to Leeann DeMouche at ldeMouche@lascruces.gov or such other address as may be indicated by the City Financial Services Director within one-half (1/2) hour after the end of the time of bid examination, the amount of any original issue discount or premium on any maturity of the 2024 Bonds, the initial offering price of each maturity, the cost of bond insurance, if any, and the amount received from the sale of the 2024 Bonds to the public that will be retained by the Purchaser as its compensation.

The City Financial Services Director in consultation with the City's financial and bond advisors, may change the dollar amount bid by the Purchaser if the aggregate principal amount of the 2024 Bonds is adjusted as described below, but the interest rates specified by the Purchaser for all maturities will not change. The City Manager in consultation with the City's financial and bond advisors, will make every effort to ensure that the percentage net compensation to the Purchaser (i.e., the percentage resulting from dividing (i) the aggregate difference between the offering price of the 2024 Bonds to the public and the price to be paid to the City, less any bond insurance premium to be paid by the bidder, by (ii) the principal amount of the 2024 Bonds) does not increase or decrease from what it would have been if no adjustment was made to principal amounts shown in the maturity schedule. The City will notify the Purchaser of the final principal amounts and the resulting adjusted prices no later than 12:00 p.m. Mountain Time on the day of the sale and award of the 2024 Bonds. THE PURCHASER MAY NOT WITHDRAW OR MODIFY ITS BID ONCE SUBMITTED TO THE CITY FOR ANY REASON, INCLUDING, WITHOUT LIMITATION, AS A RESULT OF ANY INCREASE OR DECREASE IN THE FINAL PRINCIPAL AMOUNTS AND THE AGGREGATE PURCHASE PRICE OF THE 2024 Bonds.

Information Regarding Bids. Bidders may change and submit bids as many times as they wish during the bidding period.

Bids Constitute an Irrevocable Offer. Each bid submitted through Ipreo BiDCOMP/PARITY electronic bidding system shall be deemed an irrevocable offer to purchase the 2024 Bonds on the terms provided in this Official Notice of Bond Sale and shall be binding upon the bidder.

Basis of Award. The 2024 Bonds will be sold to the bidder or bidders offering to purchase the same at the lowest true interest cost. The actuarial yield on the 2024 Bonds using the true interest cost method will be computed at that yield which, if used to compute the present value of all payments of principal and interest on the 2024 Bonds as of April 11, 2024, produces an amount equal to the aggregate bid price. Such calculation will be made based upon a 360-day year and a

semiannual interval for compounding. "True Interest Cost" of the Bonds, as used herein, means that yield, which if used to compute the present worth, as of the date of the Bonds, of all payments of principal and interest to be made on the Bonds, from their date to their respective maturity dates, as specified in the maturity schedule and without regard to the possible optional prior redemption with respect to the Bonds, using the interest rates specified in the bid, produces an amount equal to the principal amount of the Bonds plus any premium bid. No adjustment shall be made in such calculation for accrued interest on the Bonds from their date to the date of delivery thereof. Such calculation shall be based on a 360-day year consisting of twelve thirty day months and a semiannual compounding interval. The purchaser must pay accrued interest from the date of the Bonds to the date of delivery. **The Bonds will not be sold for less than par plus accrued interest.** The City reserves the right to waive any irregularity or informality in any bid, except time of filing.

The winning bid or bids will be indicated on Ipreo BiDCOMP/PARITY and the auction results, as posted on such website, will be subject to verification by the City. The City will verify the auction results immediately following the close of the bidding period and notice of confirmation by the City of the winning bidder or bidders will be made by a posting on Ipreo BiDCOMP/PARITY stating "Auction Results Verified and Confirmed".

An award may be made by the City to any bidder in a principal amount less than the principal amount of the 2024 Bonds for which the bid is submitted. Further, in the event of an award by the City for a principal amount less than the principal amount the bidder submitted, any premium bid shall be ratably reduced. If two or more bids have the same true interest cost, the first bid submitted, as determined by reference to the time stamp displayed on Ipreo BiDCOMP/PARITY, shall be deemed to be the leading bid.

Sale Reservations. The City reserves the right (a) to reject any and all bids for any Bonds, (b) to reoffer any Bonds for public sale, and (c) to waive any irregularity or informality in any bid.

Good Faith Deposit Not Required to Bid. A good faith deposit will not be required in connection with the submission of any bid for the 2024 Bonds. The winning bidder will be required to submit a Bid Award Deposit (see "Bid Award Deposit" below).

Bid Award Deposit. Not later than 2:00 p.m., Mountain Time on March 14, 2024, the winning bidder is required to submit a Bid Award Deposit of $120,000.00. All Bid Award Deposits must be made in good funds by wire transfer of the required amount to an account specified by the City Manager and provided to the winning bidder after the sale of the 2024 Bonds.

No interest will be paid by the City on the amount of the Bid Award Deposit. The proceeds of the Bid Award Deposit of the winning bidder will be applied to the purchase price of the 2024 Bonds, or in the event of the failure of a winning bidder to take up and pay for the 2024 Bonds in compliance with the terms of the bid, at the option of the City, its Bid Award Deposit may be retained as liquidated damages, as partial payment of actual damages or as security for any other remedy available to the City.

Time of Award and Delivery. The City Manager or City Financial Services Director will take action awarding the Bonds or rejecting all bids not later than 24 hours after the expiration of the time herein prescribed for the receipt of the bids. Delivery of the Bonds will be made to the successful bidder through the facilities of The Depository Trust Company, New York, New York, within 60 days of the acceptance of the bid. If for any reason delivery can0not be made within 60 days, the successful bidder shall have the right to purchase the Bonds during the succeeding 30 days upon the same terms, or at the request of the successful bidder, during said succeeding 30 days, the good faith deposit will be returned, and such bidder shall be relieved of any further obligation. It is anticipated that the delivery of the Bonds will be on or about April 11, 2024.

Manner and Time of Delivery. The 2024 Bonds will be delivered to DTC for the account of the winning bidder or bidders at the expense of the City on April 11, 2024, or such later date as the City and the winning bidder may agree. Payment of the purchase price due at delivery must be made in Federal Reserve funds for immediate and unconditional credit to the City.

Continuing Disclosure Undertaking. The City has covenanted to provide, in a timely manner, on the Electronic Municipal Market Access (EMMA) Website maintained by the Municipal Securities Rulemaking Board notice of the occurrence of specified, material events. The City has not failed to comply with any of its previous undertakings under Rule 15c2-12, except as may be disclosed in the Preliminary Official Statement.

State Securities Laws. The City has taken no action to qualify the offer or sale of the 2024 Bonds under the securities laws of any state. Should any such qualification be necessary, the City agrees to cooperate with the winning bidder in such matters, provided that the City reserves the right not to consent to service of process outside its boundaries and expenses related to any such qualification shall be the responsibility of the winning bidder. By submitting a bid, the initial purchaser represents that the sale of the Bonds in states other than New Mexico will be made only under exemptions from registration, or, wherever necessary, the initial purchaser will register the Bonds in accordance with the securities laws of the state in which the Bonds are offered or sold.

CUSIP Numbers. CUSIP numbers will be issued and printed on the 2024 Bonds at the expense of the City. The City's Municipal Advisor will apply for CUSIP numbers prior to the sale date of the 2024 Bonds. Any error or omission in printing such numbers on the 2024 Bonds will not constitute cause for any winning bidder to refuse delivery of any Bond.

Legal Opinion, Certificates and Transcript. The validity and enforceability of the 2024 Bonds will be approved by the City's Bond Counsel. A copy of the form of the opinion of Bond Counsel is attached as an exhibit to the Preliminary Official Statement.

The purchaser of the 2024 Bonds will receive a certified transcript of legal proceedings which will include, among other items:

(a) a certificate of the City to the effect that, as of its date, the Preliminary Official Statement was deemed final within the meaning of Rule 15c2-12, except for the omissions permitted under Rule 15c2-12;

(b) a certificate of the City to the effect that there is no litigation pending or, to its knowledge, threatened affecting the validity of the 2024 Bonds as of the date of their delivery; and

(c) a certificate of the City to the effect that, as of the date of the Official Statement and at all times to and including the date of delivery of the 2024 Bonds, the Official Statement did not contain any untrue statement of a material fact or omit any statement of a material fact necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading.

Postponement of Sale. The City reserves the right to postpone the date and time established for the receipt of bids. Any such postponement will be announced by posting on Ipreo BiDCOMP/PARITY prior to commencement of the bidding. If any date and time fixed for the receipt of bids and the sale of the 2024 Bonds is postponed, an alternative sale date and time will be announced at least one business day prior to such alternative sale date. On any such alternative sale date and time, any bidder may submit bids electronically as described above for the purchase of the 2024 Bonds in conformity in all respects with the provision of this Official Notice of Bond Sale, except for the date and time of sale and except for any changes announced by posting on Ipreo BiDCOMP/PARITY at the time the sale date and time are announced.

Ratings. A rating of "___" has been received by Moody's Investors Service.

Information. Copies (in reasonable quantities) of this Official Notice of Bond Sale, the Preliminary Official Statement, and other information concerning the City and the 2024 Bonds may be obtained from:

The date of this Official Notice of Bond Sale is March 7, 2024.

CITY OF LAS CRUCES, NEW MEXICO

EXHIBIT "B"

To: Members of the City Council of the City of Las Cruces

From: Ifo Pili, City Manager

Date: February 20, 2024

Re: $6,000,000* City of Las Cruces, New Mexico
Taxable General Obligation Improvement Bonds, Series 2024

*Preliminary and subject to change.

The attached Preliminary Official Statement (the "POS") has been prepared in connection with the offering and sale of the $6,000,000* City of Las Cruces Taxable General Obligation Improvement Bonds, Series 2024 (the "Bonds"). The Bonds are being issues to place the proceeds in the City's Affordable Housing Trust Fund to fund affordable housing projects. The POS makes various disclosures about the City, the Bond Ordinance and the Bonds. The POS will be reviewed by bidders for the Bonds and a final Official Statement will be provided to investors after the best bid is accepted by the City.

The attached POS is similar to the one used in connection with the City's issuance of its $17,000,000 General Obligation Improvement Bonds, Series 2023, and includes information specifically related to the City's *ad valorem* property tax base and the property taxes imposed by the City, Doña Ana County, Las Cruces Schools and the State on the taxpayers of the City. The information has been updated by City staff. Katherine McKinney of the Modrall Sperling Law Firm, the City's Bond and Disclosure Counsel, and Erik Harrigan, Kaeley Weimerskirch, and Michael Jesse of RBC Capital Markets, the City's Financial Advisor, assisted in the disclosure process by assembling the information, attending disclosure conferences and reviewing the financial and economic data in the POS. In connection with the preparation of the POS, we have participated in due diligence meetings and conference calls. During those meetings and calls we discussed, confirmed and updated information contained in the POS, examined information for materiality, and identified additional information for inclusion. If you have any questions relating to the disclosure process and preparation of the POS, please contact me.

Under regulations imposed by the U.S. Securities and Exchange Commission (the "SEC"), the Preliminary Official Statement must not contain any untrue statement of a material fact, or omit to state a material fact. A material fact is one that could influence an investor in making a decision to purchase the Bonds. The SEC recently increased emphasis on the quality of disclosures made in municipal bond offerings. The SEC has stated that responsibility for disclosures lies with the members of the governing body approving the issuance of municipal bonds, following this guiding principal:

> "Public entities that issue securities are primarily liable for the content of their disclosure documents.... In addition to the government entity issuing municipal securities, public officials of the issuer who have ultimate authority to approve the issuance of securities and related disclosure documents have responsibilities under the federal securities laws as well. In authorizing the issuance of the securities and related disclosure documents, a public official may not authorize disclosure that the official knows to be false; nor may the public official authorize disclosure while recklessly disregarding facts that indicate that there is a risk that the disclosure may be misleading."

Although City staff and the finance team collaborated in preparing the POS, each Councilor should review it carefully. The POS is a City Council document, and the City and its Council are responsible for its accuracy. Please use extra care in reviewing the sections labeled "INTRODUCTION AND SUMMARY", "SECURITY AND REMEDIES", "FINANCES OF THE CITY", "THE CITY" and

Appendix A to the POS. In conducting your review, focus on whether the POS contains misleading statements of material facts or omits to state material facts. A material fact is one that could influence an investor in making a decision to purchase the Bonds.

After reviewing the POS, please contact me if you have any reason to believe that the POS contains any inaccurate information or if you know of anything that might make any of the statements made in the POS incomplete or misleading. Thank you for your attention to this important matter.

ATTACHMENT "A"

COUNCIL BILL NO. 24-020

ORDINANCE NO. 3062

AN ORDINANCE AUTHORIZING THE ISSUANCE AND SALE OF CITY OF LAS CRUCES, NEW MEXICO, TAXABLE GENERAL OBLIGATION IMPROVEMENT BONDS, SERIES 2024, IN THE PRINCIPAL AMOUNT OF $6,000,000, PAYABLE FROM AD VALOREM TAXES LEVIED ON ALL TAXABLE PROPERTY WITHIN THE CITY, LEVIED WITHOUT LIMIT AS TO RATE OR AMOUNT; PROVIDING FOR THE FORM, CERTAIN TERMS AND CONDITIONS OF THE BONDS, THE MANNER OF THEIR EXECUTION, AND THE METHOD OF AND SECURITY FOR PAYMENT THEREOF; PROVIDING FOR THE METHOD OF SALE OF THE BONDS PURSUANT TO A PUBLIC COMPETITIVE SALE; PROVIDING FOR THE MATURITY DATES AND AMOUNTS, INTEREST RATES, PRICES, REDEMPTION FEATURES AND OTHER FINAL TERMS OF THE BONDS TO BE ESTABLISHED IN AN AWARD CERTIFICATE; DELEGATING AUTHORITY TO THE CITY MANAGER AND CITY FINANCIAL SERVICES DIRECTOR TO AWARD THE BONDS TO THE PURCHASER; AND PROVIDING FOR OTHER DETAILS CONCERNING THE BONDS.

The City Council is informed that:

WHEREAS, at the general obligation bond election held for the City of Las Cruces (the "City"), State of New Mexico, on the 8th day of November, 2022, the electors of the City authorized the City Council, the governing body of the City (the "Governing Body") to contract bonded indebtedness on behalf of the City and upon the credit thereof by issuing its City of Las Cruces, New Mexico Taxable General Obligation Improvement Bonds, Series 2024 (the "Bonds") to secure funds for the following purposes in the following amounts:

Purpose	Amount Authorized By Election	Amount Previously Issued	Amount to Be Issued
Shall the City of Las Cruces issue general obligation bonds, payable from property taxes, in an amount up to $6,000,000 and placed into the Affordable Housing Trust Fund, to provide resources to plan, design, construct, acquire, and preserve housing affordable for low to moderate income households, including acquisition of necessary land?	$6,000,000	$0	$6,000,000

WHEREAS, the Governing Body has determined, and does hereby determine, that it is necessary and in the best interest of the City and the inhabitants thereof that the $6,000,000 of the general obligation bonds authorized at the election (the "Bonds"), be authorized for issuance at this time; provided, however, that a satisfactory price for the Bonds be obtained in a public sale; and

WHEREAS, the Governing Body expects to sell the Bonds in a public competitive sale to the best bidder, as determined pursuant to the Award Certificate (as defined herein) supplementing this Bond Ordinance; and

WHEREAS, the Governing Body desires to delegate authority to the City Manager or City Financial Services Director (collectively, the "Delegate") (1) to determine the specific principal amounts, interest rates, maturity dates, prices, redemption features, and other final terms and features of the Bonds, including, without limitation, provisions concerning a Bond Insurance Policy (if any), (2) to execute and deliver an award certificate establishing the final terms of the Bonds (the "Award Certificate") as authorized by Section 6-14-10.2 NMSA 1978, and (3) to award the Bonds to the best bidder for the Bonds (the "Purchaser") provided that the final terms of the Bonds set forth in the Award Certificate be within the parameters set forth in this Ordinance; and

WHEREAS, the Governing Body intends that the specific details of and requirements for bidding for the Bonds shall be provided in an official notice of sale (the "Notice of Sale") to be approved on behalf of the City by the City Financial Services Director or Treasurer or her designee; and

NOW, THEREFORE, Be it Ordained by the Governing Body of the City of Las Cruces:

(I)

Section 1. Ratification. All actions heretofore taken by the Governing Body and the officers and employees of the City directed toward the issuance and sale of the Bonds to secure funds for the Improvement Project (as defined herein) be, and the same hereby are, ratified, approved and confirmed.

Section 2. Improvement Project Authorization. Proceeds of the Bonds are hereby authorized to be ~~applied to be~~ placed into the Affordable Housing Trust Fund~~,~~ to provide resources to plan, design, construct, acquire, and preserve housing affordable for low to moderate income households, including acquisition of necessary land and to pay the costs of issuance of the Bonds (collectively, the "Improvement Project").

Section 3. Findings.

A. The issuance of the Bonds under the home rule powers of the City granted by the City Charter, this Bond Ordinance, Sections 6-14-8 through 6-14-11 NMSA 1978, and Sections 6-15-1 through 6-15-22 NMSA 1978, for the purpose of providing funds to finance the costs of the Improvement Project, is necessary and in the interest of the public health, safety, morals and welfare of the residents of the City.

B. The Bonds shall be authorized by an affirmative vote of a majority of all the members of the Council.

C. The City will finance the costs of the Improvement Project, in whole or in part, with the proceeds of the Bonds.

D. The Net Effective Interest Rate on the Bonds shall not exceed the statutory maximum of 10% per annum.

Section 4. Bonds are General Obligations. The Bonds shall constitute the general obligation debt of the City, payable from general ad valorem taxes which shall be levied without limitation as to the rate or amount. The full faith and credit of the City shall be, and hereby is, irrevocably pledged to the payment of the principal of and interest on the Bonds.

Section 5. Authorization, Parameters and Detail.

A. Authorization. This Bond Ordinance has been adopted by the affirmative vote of a majority of all of the members of the Council. For the purpose of protecting the public health, conserving the property, and protecting the general welfare and prosperity of the citizens of the City, it is hereby declared necessary that the City, pursuant to the Act, issue its negotiable, fully registered, general obligation bonds in one or more series in the total aggregate principal amount not to exceed $6,000,000 to be designated in the Award Certificate as the "City of Las Cruces, New Mexico Taxable General Obligation Improvement Bonds, Series 2024," and the issuance, sale and delivery of the Bonds is hereby authorized.

The forms of the Continuing Disclosure Undertaking and Preliminary Official Statement as presented to the Governing Body, with the adoption of this Ordinance, and the sale of the Bonds to the Purchaser within the parameters set forth in this Ordinance are hereby approved by the Governing Body with the approval of the final terms of the Bonds to be accepted in the Award Certificate, and approval of the final forms of the Preliminary Official Statement and Continuing Disclosure Undertaking delegated to the Delegate or designee as permitted by Section 6-14-10.2 NMSA 1978. The use and distribution of the Preliminary Official Statement and Official Statement by the Purchaser in connection with the sale of the bonds to the public are hereby ratified, authorized, approved and acknowledged.

B. Parameters Authorized. The Bonds shall be issued subject to the following parameters:

(1) The Bonds shall be issued in an aggregate principal amount not to exceed $6,000,000 for the Improvement Project.

(2) The net effective interest rate on the Bonds shall not exceed 10% per annum.

(3) The final maturity of the Bonds shall not be later than August 1, 2043.

(4) The Bonds shall be sold pursuant to a public competitive sale.

(5) The Purchaser's discount shall not exceed 4% of the par amount of the Bonds.

(6) The Bonds shall be in substantially the form set forth in this Ordinance.

(7) The Bonds shall not be sold for less than the par amount of Bonds plus accrued interest from the date of the Bonds to the date of delivery of the Bonds to the Purchaser.

(8) The Bonds shall be dated as of their date of issuance and delivery.

(9) The Bonds shall be issued as federally taxable under the Internal Revenue Code of 1986.

The Delegate is hereby authorized pursuant to this Ordinance to award the Bonds to the Purchaser, to approve the final terms of the Bonds as permitted by Section 6-14-10.2 NMSA 1978, and to execute and deliver the Award Certificate consistent with the parameters set forth in this Ordinance.

C. Details of Bonds.

(1) The forms, terms, and provisions of the Bonds in the form set forth in Section 11 are hereby approved with only such changes therein as are not inconsistent with this Bond Ordinance and as shall be approved in the Award Certificate.

(2) The Bonds shall be negotiable instruments but shall be issued only as fully registered bonds, in such numbers and denominations as may be requested by the Purchaser, but exchangeable for other fully registered Bonds of any denominations which are multiples of $5,000. The Bonds shall be numbered separately and consecutively, shall be dated the date of their delivery to the Purchaser, shall mature on August 1 of each year and shall bear interest from the most recent date to which interest has been paid or provided for or, if no interest has been paid or provided for, from their date, payable semi-annually on February 1 and August 1 in each year commencing on August 1, 2024, or such other date specified in the Award Certificate,

until their respective maturities. The Bonds shall bear the rates of interest, maturities and provisions for redemption prior to maturity as shall be established in the Award Certificate.

D. Notice of Sale. The Official Notice of Sale appended to the form of preliminary official statement presented to the Governing Body in connection with this Ordinance (the "Preliminary Official Statement") is hereby approved, with such changes as are approved by the City Financial Services Director consistent with this Ordinance. The City Financial Services Director is hereby authorized and directed to have published once, at least one week prior to the date of sale, a summary of the notice of sale of the Bonds in a newspaper of general circulation in the City, and the City Financial Services Director is hereby authorized and directed to give such other notice of the bond sale as she shall determine, including the publication of the notice in financial papers and periodicals and the distribution among investment bankers and others of the Preliminary Official Statement.

E. Final Terms; Award of Bonds. The exact principal amounts, maturity dates, interest rates, prices, redemption features and other final terms of the Bonds shall be as set forth in the Award Certificate. The Bonds shall be awarded to the Purchaser as provided in the Award Certificate.

F. Series Date; Numbering; Interest Payment Dates. The Bonds shall be dated the date of delivery (herein the "Series Date"), will be issued in one or more series and shall consist of bonds numbered consecutively from R-1 upward, issuable in the denomination of $5,000 each or integral multiples thereof (provided that no individual bond will be issued for more than one maturity); shall bear interest from the Series Date to maturity at the rates set forth in the Award Certificate, payable to the registered owner thereof, or registered assigns, on August 1, 2024, (or such other date as set forth in the Award Certificate) and semiannually thereafter on ~~August 1 and~~ February 1 and August 1 in each year in which the Bonds are outstanding and shall mature on August 1 of each year as set forth in the Award Certificate.

Section 6. Redemption of Bonds Prior to Maturity.

A. Optional Redemption, and Mandatory Sinking Fund Redemption. Redemption of the Bonds prior to maturity at the option of the City shall be as provided in the Award Certificate. The Bonds may be subject to mandatory sinking fund redemption as set forth in the Award Certificate.

B. Notice of Redemption. Notice of redemption shall be given by the Registrar/Paying Agent by sending a copy of such notice by first-class, postage prepaid mail at least thirty (30) days prior to the redemption date to the registered owner of each Bond, or portion thereof, to be redeemed at the address shown as of the close of business of the Registrar/Paying Agent on the fifth day prior to the mailing of notice on the registration books kept by the Registrar/Paying Agent. The City shall give notice of redemption of the Bonds to the Registrar/Paying Agent at least forty-five (45) days prior to the redemption date. The Registrar/Paying Agent's failure to give such notice to the

registered owner of any Bond, or any defect therein, shall not affect the validity of the proceedings for the redemption of any Bonds for which proper notice was given. Notices of redemption shall specify the maturity dates and the number or numbers of the Bonds to be redeemed (if less than all are to be redeemed) and if less than the full amount of any Bond is to be redeemed, the amount of such Bond to be redeemed, the date fixed for redemption, and that on such redemption date there will become and be due and payable upon each Bond to be redeemed at the office of the Registrar/Paying Agent the principal amount to be redeemed plus accrued interest to the redemption date and that from and after such date interest will cease to accrue on such amount. Such notice may be a conditional notice of redemption – the money required to pay the principal of and interest on the Bonds to be called for redemption need not be on deposit with the Registrar/Paying Agent at the time of mailing the conditional notice of redemption. Notice having been given in the manner hereinbefore provided, the Bond or Bonds so called for redemption shall become due and payable on the redemption date so designated and if an amount of money sufficient to redeem all Bonds called for redemption shall on the redemption date be on deposit with the Registrar/Paying Agent, the Bonds to be redeemed shall be deemed not outstanding and shall cease to bear interest from and after such redemption date. Upon presentation of the Bonds to be redeemed at the office of the Registrar/Paying Agent, the Registrar/Paying Agent will pay the Bond or Bonds so called for redemption with funds deposited with the Registrar/Paying Agent by the City.

Section 7. Execution of Bonds.

A. The Bonds shall bear the facsimile or manual signature of the Mayor of the City and shall be attested by the facsimile or manual signature of the City Clerk and shall bear the facsimile or original seal of the City. The Bonds shall be authenticated by the manual signature of an authorized officer of the Registrar/Paying Agent. The Bonds bearing the signatures or facsimile signatures of the officers in office at the time of the signing thereof shall be the valid and binding obligations of the City, notwithstanding that before the delivery of the Bonds and payment therefor, or before the issuance thereof upon transfer or exchange, any or all of the persons whose signatures appear on the Bonds shall have ceased to fill their respective offices. The Mayor and City Clerk may, by the execution of a signature certificate pertaining to the Bonds, adopt as and for their respective signatures the facsimiles thereof appearing on the Bonds; and, at the time of the execution of the signature certificate, the Mayor and City Clerk may each adopt as and for his or her facsimile signature the facsimile signature of his or her predecessor in office in the event that such facsimile signature appears upon any of the Bonds. If facsimile signatures are to appear on the Bonds, the Mayor and City Clerk, pursuant to Sections 6-9-1 through 6-9-6, inclusive, NMSA 1978, shall each forthwith file his or her manual signature, certified by him or her under oath, with the Secretary of State of New Mexico, provided that such filing shall not be necessary for any officer where any previous filing shall have application to the Bonds.

B. No Bond shall be valid or obligatory for any purpose unless the certificate of authentication, substantially in the form hereinafter provided, has been duly executed by the Registrar/Paying Agent. The Registrar/Paying Agent's certificate of authentication shall be deemed to have been duly executed by it if manually signed by

an authorized officer of the Registrar/Paying Agent, but it shall not be necessary that the same officer sign the certificate of authentication on all of the Bonds issued hereunder.

Section 8. Registration of Bonds.

A. Books for the registration and transfer of the Bonds shall be kept by the City Treasurer, as Registrar/Paying Agent, who is hereby appointed by the City as registrar and as paying agent for the Bonds. Upon the surrender for transfer of any Bond at the principal office of the Registrar/Paying Agent, duly endorsed for transfer or accompanied by an assignment duly executed by the registered owner or his attorney duly authorized in writing, the Registrar/Paying Agent shall authenticate and deliver not more than three business days after receipt of the Bond to be transferred in the name of the transferee or transferees a new Bond or Bonds in fully registered form of the same aggregate principal amount of authorized denominations, and of the same maturity, interest rate and series, bearing a number or numbers not contemporaneously outstanding. Bonds may be exchanged at the principal office of the Registrar/Paying Agent for an equal aggregate principal amount of Bonds of other authorized denominations, and of the same maturity, series and interest rate. The Registrar/Paying Agent shall authenticate and deliver not more than three business days after receipt of the Bond to be exchanged a Bond or Bonds which the registered owner making the exchange is entitled to receive, bearing a number or numbers not contemporaneously outstanding. Exchanges and transfers of Bonds as herein provided shall be without charge to the owner or any transferee, but the Registrar/Paying Agent may require the payment or reimbursement by the owner of any Bond requesting exchange or transfer of any transfer fee, tax or other governmental charge required to be paid with respect to such exchange or transfer. The Registrar/Paying Agent shall close the registration books fifteen days prior to each interest payment date for change of name or address of the registered owners. Transfers shall be permitted within fifteen days prior to each interest payment date but such transfer will not include transfer of interest payable on such interest payment date.

B. The person in whose name any Bond shall be registered on the registration books kept by the Registrar/Paying Agent, shall be deemed and regarded as the absolute owner thereof for the purpose of making payment thereof and for all other purposes except as may otherwise be provided in this ordinance with respect to payment of interest; and payment of or on account of either principal or interest on any Bond shall be made only to or upon the written order of the registered owner thereof or his legal representative, but such registration may be changed upon transfer of such Bond in the manner and subject to the conditions and limitations provided herein. All such payments shall be valid and effectual to discharge the liability upon such Bond to the extent of the sum or sums so paid.

C. If any Bond shall be lost, stolen, destroyed or mutilated, the Registrar/Paying Agent shall, upon receipt of the mutilated Bond and such evidence, information or indemnity relating thereto as it may reasonably require and as may be required by law, authenticate and deliver a replacement Bond or Bonds of a like aggregate principal amount of authorized denominations, and of the same maturity, interest rate and

series, bearing a number or numbers not contemporaneously outstanding. If such lost, stolen, destroyed or mutilated Bond shall have matured, the Registrar/Paying Agent may pay such Bond in lieu of replacement.

D. Bonds which are reissued upon transfer, exchange or other replacement shall bear interest from the most recent interest payment date to which interest has been fully paid or provided for in full or, if no interest has been paid, from the Series Date.

E. The officers of the City are authorized to deliver to the Registrar/Paying Agent fully executed but unauthenticated Bonds in such quantities as may be convenient to be held in custody by the Registrar/Paying Agent pending use as herein provided.

F. Whenever any Bond shall be surrendered to the Registrar/Paying Agent upon payment thereof, or to the Registrar/Paying Agent for transfer, exchange or replacement as provided herein, such Bond shall be promptly canceled by the Registrar/Paying Agent, and counterparts of a certificate of such cancellation shall be furnished by the Registrar/Paying Agent to the City.

G. The Bonds may be issued or registered, in whole or in part, in book-entry form from time to time with no physical distribution of bond certificates made to the public, with a depository acting as securities depository for the Bonds. A single certificate for each maturity date of the Bonds issued in book-entry form will be delivered to the depository and immobilized in its custody. The book-entry system will evidence ownership of the Bonds in authorized denominations, with transfer of ownership effected on the books of the depository and its participants ("Participants"). As a condition to delivery of the Bonds in book-entry form, the purchaser will, immediately after acceptance of delivery thereof, deposit, or cause to be deposited, the Bond certificates with the depository, registered in the name of the depository or its nominee. Principal, premium, if any, and interest will be paid to the depository or its nominee as the registered owner of the Bonds. The transfer of principal, premium, if any, and interest payments to Participants will be the responsibility of the depository; the transfer of principal, premium, if any, and interest payments to the beneficial owners of the Bonds (the "Beneficial Owners") will be the responsibility of Participants and other nominees of Beneficial Owners maintaining a relationship with Participants (the "Indirect Participants"). The City will not be responsible or liable for maintaining, supervising or reviewing the records maintained by the depository, Participants or Indirect Participants.

(1) If (i) the Bonds are not eligible for the services of the depository, (ii) the depository determines to discontinue providing its services with respect to the Bonds or (iii) the City determines that a continuation of the system of book-entry transfers through the depository ceases to be beneficial to the City or the Beneficial Owners, the City will either identify another depository or certificates for the Bonds will be delivered to the Beneficial Owners or their nominees, and the Beneficial Owners or their nominees, upon authentication of Bonds and registration of those Bonds in the Beneficial Owners' or nominees' names, will become the owners of the Bonds for all purposes. In

that event, the City shall mail an appropriate notice to the depository for notification to Participants, Indirect Participants and Beneficial Owners of the substitute depository or the issuance of bond certificates to Beneficial Owners or their nominees, as applicable.

(2) Authorized Officers of the City are authorized to sign agreements with the depository relating to the matters set forth in this Section.

(3) Notwithstanding any other provision of this ordinance, so long as all of the Bonds are registered in the name of the depository or its nominee, all payments of principal, premium, if any, and interest on the Bonds, and all notices with respect to the Bonds, shall be made and given by the Registrar/Paying Agent or the City to the depository as provided in this ordinance and by the depository to its Participants or Indirect Participants and to the Beneficial Owners of the Bonds.

Section 9. Successor Registrar/Paying Agent. If the Registrar/Paying Agent initially appointed hereunder shall resign, or if the City shall reasonably determine that such Registrar/Paying Agent has become incapable of fulfilling its duties hereunder, the City may, upon notice mailed to each registered owner of Bonds at the address last shown on the registration books, appoint a successor registrar/paying agent. Every such successor registrar/paying agent shall be a bank or trust company located in and in good standing in the United States and having shareholders' equity (e.g., capital stock, surplus and undivided profits), however denominated, of not less than $10,000,000.

Section 10. Bonds Negotiable. Subject to the registration provisions hereof, the Bonds hereby authorized shall be fully negotiable and shall have all the qualities of negotiable paper, and the registered owner or owners thereof shall possess all rights enjoyed by the holders of negotiable instruments under the provisions of the Uniform Commercial Code.

Section 11. Form of Bonds. The Bonds shall be in substantially the following form:

[Form of Bond]

REGISTERED REGISTERED

NO. R-____ $

UNITED STATES OF AMERICA
STATE OF NEW MEXICO
CITY OF LAS CRUCES
DOÑA ANA COUNTY, NEW MEXICO
TAXABLE GENERAL OBLIGATION IMPROVEMENT BONDS
SERIES 2024

Registered Owner:

Principal Amount: _____DOLLARS

Interest Rate	Maturity Date	Series Date
____% per annum	August 1, _____	_____, 2024

The City Council of the City of Las Cruces (the "Governing Body "), on the faith, credit and behalf of the City of Las Cruces, Doña Ana County, New Mexico (the "City"), for value received, hereby promises to pay to the registered owner named above, or registered assigns, the principal amount hereof on the Maturity Date and to pay interest on the principal amount at the Interest Rate on August 1, 2024, and thereafter on February 1 and August 1 of each year (the "Interest Payment Date") from the Series Date to its maturity. The principal of the bonds of the series of which this is one (the "Bonds") and interest due at maturity shall be payable to the registered owner thereof as shown on the registration books kept by the City Treasurer, as "registrar/paying agent" (such registrar/paying agent and any successor thereto, the "Registrar/Paying Agent") for the Bonds, upon maturity and upon presentation and surrender thereof at the principal office of the Registrar/Paying Agent. If any Bond shall not be paid upon such presentation and surrender at or after maturity, it shall continue to draw interest at the rate borne by said Bond until the principal thereof is paid in full. Payment of interest on the Bonds (other than at maturity) shall be made by check or draft mailed by the Registrar/Paying Agent (or by such other arrangement as may be mutually agreed to by the Registrar/Paying Agent and such registered owner), on or before each Interest Payment Date (or, if such Interest Payment Date is not a business day, on or before the next succeeding business day), to the registered owner thereof as of the close of business on the Record Date (defined below) at his address as it appears on the registration books kept by the Registrar/Paying Agent. All such payments shall be made in lawful money of the United States of America. The term "Record Date" as used herein with respect to any Interest Payment Date shall mean the 15th day of the month preceding the Interest Payment Date. The person in whose name any Bond is registered at the close of business on any Record Date with respect to any Interest Payment Date shall be entitled to receive the interest payable thereon on such Interest Payment Date notwithstanding any transfer or exchange thereof subsequent to such Record Date and prior to such Interest Payment Date; but interest on any Bond which is not timely paid or duly provided for shall cease to be payable as provided above and shall be payable to the person in whose name such Bond is registered at the close of business on a special record date (the "Special Record Date") fixed by the Registrar/Paying Agent for the payment of any such overdue interest. The Special Record Date shall be fixed by the Registrar/Paying Agent whenever moneys become available for payment of overdue interest, and notice of any such Special Record Date shall be given not less than ten days prior thereto, by first-class mail, to the registered owners of the Bonds as of the fifth day preceding the mailing of such notice by the Registrar/Paying Agent, stating the Special Record Date and the date fixed for the payment of overdue interest.

The Bonds are fully registered and are issuable in denominations of $5,000 and any integral multiple thereof (provided that no individual bond may be issued for more than one maturity).

The series of Bonds of which this bond is one is limited to the total principal amount of $6,000,000 of like tenor except as to number, denomination, maturity date, and interest rate, issued by the City of Las Cruces, Doña Ana County, New Mexico, for the purposes of providing funds to ~~place~~be placed into the Affordable Housing Trust Fund, to provide resources to plan, design, construct, acquire, and preserve housing affordable for low to moderate income households, including acquisition of necessary land and to pay the costs of issuance of the Bonds.

The Bonds are issued under the authority of and in full conformity with the charter of the City, the Constitution and laws of the State of New Mexico (particularly Sections 3-30-1 through 3-30-9 NMSA 1978, the provisions of Sections 6-14-8 through 6-14-11 NMSA 1978, Sections 6-15-1 through 6-15-22 NMSA 1978, and acts amendatory and supplemental thereto), and pursuant to Ordinance No. ~~_____~~3062 of the Governing Body duly adopted on March 4, 2024 and made a law of the City prior to the issuance of this bond (the "Bond Ordinance").

The Bonds maturing on or after August 1, 20__, are subject to prior redemption at the City's option on and after August 1, 20___, in whole or in part at any time, in one or more units of principal of $5,000 in such order of maturities as the City may determine (and by lot if less than all of the Bonds of any maturity are called, such selection by lot to be made by the Registrar/Paying Agent in such manner as it shall consider appropriate and fair) The purchase price for Bonds selected for redemption will be equal to the principal amount of each bond (or portion thereof) so redeemed, plus accrued interest thereon to the redemption date.

The Registrar/Paying Agent will maintain the books of the City for the registration of ownership of the Bonds. Upon the surrender for transfer of any Bond at the principal office of the Registrar/Paying Agent, duly endorsed for transfer or accompanied by an assignment duly executed by the registered owner or his attorney duly authorized in writing, the Registrar/Paying Agent shall authenticate and deliver not more than three business days after receipt of the Bond to be transferred in the name of the transferee or transferees a new Bond or Bonds in fully registered form of the same aggregate principal amount of authorized denominations, and of the same maturity, interest rate and series, bearing a number or numbers not contemporaneously outstanding. Bonds may be exchanged at the principal office of the Registrar/Paying Agent for an equal aggregate principal amount of Bonds of other authorized denominations, and of the same maturity, series and interest rate. The Registrar/Paying Agent shall authenticate and deliver not more than three business days after receipt of the Bond to be exchanged a Bond or Bonds which the registered owner making the exchange is entitled to receive, bearing a number or numbers not contemporaneously outstanding. Exchanges and transfers of Bonds as herein provided shall be without charge to the owner or any transferee, but the Registrar/Paying Agent may require the payment or reimbursement by the owner of any Bond requesting exchange or transfer of any transfer fee, tax or other governmental charge required to be paid with respect to such exchange or transfer. The Registrar/Paying Agent shall close the registration books fifteen days prior to each Interest Payment Date for change of name or address of the registered owners. Transfers

shall be permitted within fifteen days prior to each Interest Payment Date but such transfer will not include transfer of interest payable on such Interest Payment Date.

The person in whose name any Bond shall be registered on the registration books kept by the Registrar/Paying Agent, shall be deemed and regarded as the absolute owner thereof for the purpose of making payment thereof and for all other purposes except as may otherwise be provided with respect to payment of interest; and payment of or on account of either principal or interest on any Bond shall be made only to or upon the written order of the registered owner thereof or his legal representative, but such registration may be changed upon transfer of such Bond in the manner and subject to the conditions and limitations provided herein. All such payments shall be valid and effectual to discharge the liability upon such Bond to the extent of the sum or sums so paid.

If any Bond shall be lost, stolen, destroyed or mutilated, the Registrar/Paying Agent shall, upon receipt of the mutilated Bond and such evidence, information or indemnity relating thereto as it may reasonably require and as may be required by law, authenticate and deliver a replacement Bond or Bonds of a like aggregate principal amount of authorized denominations, and of the same maturity, interest rate and series, bearing a number or numbers not contemporaneously outstanding. If such lost, stolen, destroyed or mutilated Bond shall have matured, the Registrar/Paying Agent may pay such Bond in lieu of replacement.

For the punctual payment of the principal of and interest on this bond as aforesaid and for the levy and collection of taxes in accordance with the statutes authorizing the issuance of this bond, the full faith and credit of the City is hereby irrevocably pledged. The Governing Body has, by the Bond Ordinance, ordered the creation of an interest and sinking fund for the payment of the Bonds. Such fund is to be held in trust for the benefit of the owner or owners of the Bonds.

It is hereby certified, recited and warranted that all the requirements of law have been complied with by the proper officials of the City in the issuance of this bond; that the total indebtedness of the City, including that of this bond, does not exceed any limit of indebtedness prescribed by the Constitution or laws of the State of New Mexico; that provision has been made for the levy and collection of annual taxes sufficient to pay the principal of and the interest on this bond when the same become due. This bond shall not be valid or obligatory for any purpose until the Registrar/Paying Agent shall have manually signed the certificate of authentication hereon.

IN TESTIMONY WHEREOF, the Governing Body of the City of Las Cruces, in Doña Ana County, New Mexico, constituting the governing board of the City, has caused the seal of the City to be hereto affixed and this bond to be signed and executed with the facsimile or manual signature of the Mayor of the City and subscribed and attested with the facsimile or manual signature of the City Clerk, all as of the Series Date.

Section 12. Delivery of Bonds. When the Bonds have been duly executed and authenticated, they shall be delivered to the Purchaser named in the Award Certificate. The funds realized from the sale of the Bonds shall be applied solely to the specified purposes for which the Bonds were issued, but the Purchaser of the Bonds shall in no manner be responsible for the application of or disposal by the City, or any of its officers, of any of the funds derived from the sale thereof.

Section 13. Levy of Taxes. In order to pay the principal of and interest on the Bonds as they become due and, at the option of the City, to reimburse the general fund or other funds for the payment of principal of or interest on the Bonds for which property taxes were not available, there shall be an annual assessment and levy upon all of the taxable property of the City subject to taxation which provides an amount sufficient to pay the principal of and the interest on the Bonds as they become due and payable. However, the City may, at its option, apply any other funds lawfully available for the purpose to the payment of principal or interest on the Bonds as they become due, and the levies required by this Section may be reduced to the extent other revenues are or will be available and used for payment of the Bonds. To the extent property taxes are not available for that purpose, the principal of and interest accruing on the Bonds shall be paid from the City's general fund or from any other fund lawfully available for that purpose. The taxes shall be assessed, levied and collected annually at the time and in the manner as other City taxes are assessed, levied and collected. Annually, the Governing Body shall take all reasonable action to insure the levy and collection of taxes by the governmental authority charged with legal responsibility to levy and collect taxes in amounts sufficient at the time to pay the principal of and interest on the Bonds. The money produced by the levy of taxes provided in this Section to pay the principal of and interest on the Bonds is appropriated for that purpose and that amount shall be included in the annual budget adopted and passed by the Governing Body each year. The taxes collected shall be maintained in an interest and sinking fund, which is hereby created, and kept for and applied only to the payment of the principal of and interest on the Bonds when due and as otherwise required or permitted by law.

Section 14. Additional Action of Authorized Officers; Delegation of Authority to Determine Final Terms of the Bonds and Award Bonds to the Purchaser.

A. The Mayor, City Clerk and other officers of the City be and they hereby are authorized and directed to take all action necessary or appropriate to effectuate the provisions of this ordinance, including without limiting the generality of the foregoing, the deposit of $6,000,000 of the proceeds of the Bonds, plus an allocable share of net premium, if any, into an acquisition fund for payment of the costs of the Improvement Project and the costs of issuance allocable to the Improvement Project,

the execution and delivery of a continuing disclosure undertaking to enable the Purchaser of the Bonds to comply with Securities and Exchange Commission Rule 15c2-12(b)(5), the printing of the Bonds, and the execution of such certificates as may be required by the Purchaser relating to the signing of the Bonds, the tenure and identity of City officials, and the receipt of the purchase price of the Bonds from the Purchaser and the absence of litigation, pending or threatened, if in accordance with the facts, affecting the validity of the Bonds.

B. Pursuant to Section 6-14-10.2, NMSA 1978, the City Manager or City Financial Services Director, each as Delegate, are hereby delegated authority to execute an Award Certificate, and to determine any or all of the final terms of the Bonds, including, without limitation, the exact principal amounts, maturity dates, interest rates, prices, redemption features, municipal bond insurance, and other final terms of the Bonds subject to the parameters and conditions contained in this Bond Ordinance. The Delegate shall present the Award Certificate to the Governing Body in a timely manner, before or after delivery of the Bonds, at a regularly scheduled public meeting of the Governing Body.

Section 15. Defeasance.

A. Any Bond and the interest thereon shall be deemed to be paid, retired, and no longer outstanding (a "Defeased Bond") hereunder when payment of the principal of such Bond, plus interest thereon to the due date (whether such due date be by reason of maturity, upon redemption, or other) either (i) shall have been made or caused to be made in accordance with the terms thereof (including the giving of any required notice of redemption), or (ii) shall have been provided for on or before such due date by irrevocably depositing with or making available to a qualified depository for such payment (1) lawful money of the United States of America sufficient to make such payment or (2) Government Obligations which mature as to principal and interest in such amounts and at such times as will ensure the availability, without reinvestment, of sufficient money to provide for such payment (as verified by a certified or registered public accountant), and when proper arrangements have been made by the City with a qualified depository for the payment of its services until all Defeased Bonds shall have become due and payable. At such time as a Bond shall be deemed to be a Defeased Bond hereunder, such Bond and the interest thereon shall no longer be secured by, payable from, or entitled to the benefits of the ad valorem taxes herein levied and pledged as provided in this ordinance, and such principal and interest shall be payable solely from such money or Government Obligations.

B. Any moneys so deposited with the qualified depository may, at the written direction of the City, also be invested in Government Obligations, maturing in the amounts and times required to make payments when due on the Defeased Bonds, and all income from such Government Obligations received by the qualified depository which is not required for the payment of the Defeased Bonds and interest thereon, with respect to which such money has been so deposited, shall be turned over to the City for deposit in the interest and sinking fund for payment of principal and interest on the Bonds. The term "Government Obligations" means direct obligations of the United States of America,

including obligations the principal of and interest on which are unconditionally guaranteed by the United States of America which may be United States Treasury Obligations such as its State and Local Government Series, which may be in book-entry form.

Section 16. Investment of Bond Proceeds. Moneys in any fund not immediately needed may be invested as provided by state law and applicable federal statutes and regulations.

Section 17. Ordinance Irrepealable. After any of the Bonds have been issued, this ordinance shall constitute a contract between the City and the holder or holders of the Bonds and shall be and remain irrepealable and unalterable until the Bonds and the interest thereon shall have been fully paid, satisfied and discharged, defeased or until such payment has been duly provided for.

Section 18. Severability. If any section, paragraph, clause or provision of this ordinance shall for any reason be held to be invalid or unenforceable, the invalidity or unenforceability of such section, paragraph, clause or provision shall not affect any of the remaining provisions of this ordinance.

Section 19. Form of Notice of Adoption. The following notice shall be published one time in a newspaper having general circulation in the City as soon as is practicable following the adoption hereof and this ordinance shall be effective five days after such publication as provided by law.

[Form of Notice]

LEGAL NOTICE

City of Las Cruces, New Mexico
Notice of Adoption of Ordinance

NOTICE IS HEREBY GIVEN that the Governing Body of the City of Las Cruces, Doña Ana County, New Mexico did, on the 4th day of March, 2024, adopt an ordinance entitled:

AN ORDINANCE AUTHORIZING THE ISSUANCE AND SALE OF CITY OF LAS CRUCES, NEW MEXICO, TAXABLE GENERAL OBLIGATION IMPROVEMENT BONDS, SERIES 2024, IN THE PRINCIPAL AMOUNT OF $6,000,000, PAYABLE FROM AD VALOREM TAXES LEVIED ON ALL TAXABLE PROPERTY WITHIN THE CITY, LEVIED WITHOUT LIMIT AS TO RATE OR AMOUNT; PROVIDING FOR THE FORM, CERTAIN TERMS AND CONDITIONS OF THE BONDS, THE MANNER OF THEIR EXECUTION, AND THE METHOD OF AND SECURITY FOR PAYMENT THEREOF; PROVIDING FOR THE METHOD OF SALE OF THE BONDS PURSUANT TO A PUBLIC COMPETITIVE SALE; PROVIDING FOR THE MATURITY DATES AND AMOUNTS, INTEREST RATES, PRICES, REDEMPTION FEATURES AND OTHER FINAL TERMS OF THE BONDS TO BE ESTABLISHED IN AN AWARD CERTIFICATE; DELEGATING

AUTHORITY TO THE CITY MANAGER AND CITY FINANCIAL SERVICES DIRECTOR TO AWARD THE BONDS TO THE PURCHASER; AND PROVIDING FOR OTHER DETAILS CONCERNING THE BONDS.

The Ordinance directs and authorizes the issuance of City of Las Cruces, Taxable General Obligation Bonds in the aggregate principal amount of $6,000,000 for the purpose of placing the proceeds into the Affordable Housing Trust Fund to provide resources to plan, design, construct, acquire, and preserve housing affordable for low to moderate income households, including acquisition of necessary land and to pay the costs of issuance of the Bonds; provides parameters for the Bonds; provides the form of the Bonds; delegates authority to the City Manager and City Financial Services Director to determine exact principal amounts, maturity dates, interest rates, prices, redemption features and other final terms of the Bonds within the parameters established in this Ordinance, to award the Bonds to the Purchaser pursuant to an Award Certificate; provides for the delivery of the Bonds; provides for levy of taxes to pay the principal of and interest on the bonds; makes certain covenants for the benefit of the owners of the Bonds; and provides other details concerning the bonds.

Complete copies of the Ordinance are available for public inspection during the normal and regular business hours of the City Clerk, Las Cruces City Hall, 700 North Main Street Las Cruces, New Mexico. This notice constitutes compliance with Section 6-14-6 NMSA 1978.

DATED this 4th day of March, 2024.

NOTICE

$6,000,000*
CITY OF LAS CRUCES, NEW MEXICO
TAXABLE GENERAL OBLIGATION IMPROVEMENT BONDS,
SERIES 2024

Preliminary Official Statement, subject to completion,
dated March 7, 2024

The Preliminary Official Statement, dated March 7, 2024 (the "Preliminary Official Statement"), relating to the above-described bonds (the "Bonds") of the City of Las Cruces, New Mexico (the "City"), has been posted on the internet as a matter of convenience. The posted version of the Preliminary Official Statement has been formatted in Adobe Portable Document Format (Adobe Acrobat XI). Although this format should replicate the Preliminary Official Statement available from the City, appearance may vary for a number of reasons, including electronic communication difficulties or particular user software or hardware. Using software other than Adobe Acrobat XI or later may cause the Preliminary Official Statement that you view or print to differ in appearance from the Preliminary Official Statement. Paper copies of the Official Statement are available from the Issuer by contacting the municipal advisor, RBC Capital Markets, LLC, Erik Harrigan, at (505) 872-5999.

The Preliminary Official Statement and the information contained therein are subject to completion or amendment or other change without notice. Under no circumstances shall the Preliminary Official Statement constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of the Bonds in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction.

For purposes of Rule 15c2-12 promulgated by the Securities and Exchange Commission, the Preliminary Official Statement alone, and no other document or information on the internet, constitutes the "Official Statement" that the City has deemed "final" as of its date in respect of the Bonds, except for certain information permitted to be omitted therefrom.

No person has been authorized to give any information or to make any representations other than those contained in the Preliminary Official Statement in connection with the offer and sale of the Bonds and, if given or made, such information or representations must not be relied upon as having been authorized. The information and expressions of opinion in the Preliminary Official Statement are subject to change without notice and neither the delivery of the Official Statement nor any sale made thereunder shall, under any circumstances, create any implication that there has been no change in the affairs of the City since the date of the Preliminary Official Statement.

By choosing to proceed and view the electronic version of the Preliminary Official Statement, you acknowledge that you have read and understood this Notice.

Preliminary Official Statement dated March 7, 2024.

* Preliminary; subject to change.

This Preliminary Official Statement and the information contained herein are subject to completion and amendment. Under no circumstances shall the Preliminary Official Statement constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of such jurisdiction.

PRELIMINARY OFFICIAL STATEMENT DATED MARCH 7, 2024

NEW ISSUE RATING: Moody's: ___

In the opinion of Modrall, Sperling, Roehl, Harris & Sisk, P.A., Bond Counsel based on existing laws of the State of New Mexico as enacted and construed, interest on the Bonds is exempt from all taxation by the State of New Mexico or any political subdivision thereof. The Bonds are being issued as taxable under the Internal Revenue Code of 1986, as amended. For a more complete description of such opinion of Bond Counsel and a description of certain provisions tax treatment of interest on the Bonds for certain owners of such bonds, see "TAX STATUS" herein.

$6,000,000*
CITY OF LAS CRUCES, NEW MEXICO
TAXABLE GENERAL OBLIGATION IMPROVEMENT BONDS
SERIES 2024

Dated: Date of Delivery **Due: August 1, as shown below**
Book-Entry Only

The City of Las Cruces, New Mexico Taxable General Obligation Improvement Bonds, Series 2024 (the "Bonds") are issuable as fully registered bonds and when initially purchased will be registered in the name of Cede & Co., as nominee of The Depository Trust Company, New York ("DTC"). Purchases of the Bonds will be made in book-entry form only, in the principal amount of $5,000 or any integral multiple thereof, through brokers and dealers who are, or who act through, DTC Participants. Beneficial owners of the Bonds will not be entitled to receive physical delivery of bond certificates so long as DTC or a successor securities depository acts as the securities depository with respect to the Bonds. Interest on the Bonds is payable on each February 1 and August 1, commencing August 1, 2024. As long as DTC or its nominee is the registered owner of the Bonds, reference in this Official Statement to the registered owner will mean Cede & Co., and payments of principal or interest on the Bonds will be made directly to DTC by the Paying Agent. Disbursement of such payments to DTC Participants is the responsibility of DTC. See "The Bonds – Book-Entry Only System" herein. The City Treasurer is the Registrar and Paying Agent for the Bonds.

The Bonds are issuable only as fully registered bonds in denominations of $5,000 each or any integral multiple thereof. The Bonds will bear interest from the delivery date.

The Bonds are subject to optional redemption prior to their stated maturity as described herein.

The Bonds are general obligations of the City of Las Cruces, New Mexico (the "City"), payable from general (*ad valorem*) taxes which shall be levied against all taxable property in the City without limitation as to rate or amount.

The City has undertaken, for the benefit of the owners of the Bonds, to provide certain annual and periodic disclosures described under the caption "CONTINUING DISCLOSURE INFORMATION" herein.

The Bonds are being issued pursuant to the powers of the City Council under Sections 3-30-1 through 3-30-9 and Sections 6-15-1 through 6-15-22 NMSA 1978, as amended and supplemented, the Constitution and other laws of the State, including the City's home rule powers, for the purpose of placing the proceeds into the City's Affordable Housing Trust Fund, to provide resources to plan, design, construct, acquire, and preserve housing affordable for low to moderate income households, including acquisition of necessary land and paying the costs of issuance of the Bonds (collectively, the "Improvement Project"). The Bonds are offered when, as and if issued by the City, subject to the approval of Modrall, Sperling, Roehl, Harris & Sisk, P.A., as Bond Counsel and certain other conditions. It is expected that the Bonds will be available for delivery on or about April 11, 2024 through the facilities of the Depository Trust Company, New York, New York.

Electronic bids will be opened at 8:30 a.m, prevailing Mountain Time, March 14, 2024.

Dated: March 7, 2024

* Preliminary, subject to change.

USE OF INFORMATION IN THIS OFFICIAL STATEMENT

No dealer, salesman or other person has been authorized by the City of Las Cruces, New Mexico (the "City") to give any information or to make any statements or representations, other than those contained in this Official Statement, and, if given or made, such other information, statements or representations must not be relied upon as having been authorized. This Official Statement does not constitute an offer to sell or solicitation of an offer to buy any of the Bonds in any jurisdiction in which such offer or solicitation is not authorized, or in which any person making such offer or solicitation is not qualified to do so, or to any person to whom it is unlawful to make such offer or solicitation in such jurisdiction. The information set forth or included in this Official Statement has been provided by the City and from other sources believed by the City to be reliable. The information and expressions of opinion herein are subject to change without notice, and neither the delivery of this Official Statement nor any sale hereunder shall create any implication that there has been no change in the financial condition or operations of the City described herein since the date hereof. This Official Statement contains, in part, estimates and matters of opinion that are not intended as statements of fact, and no representation or warranty is made as to the correctness of such estimates and opinions or that they will be realized.

The Bonds have not been registered under the Securities Act of 1933, in reliance upon exemptions contained in such Act. The registration and qualification of the Bonds in accordance with applicable provisions of the securities law of the states in which the Bonds have registered or qualified and the exemption from registration or qualification in other states cannot be regarded as a recommendation thereof. Neither the Securities and Exchange Commission nor any other federal, state, municipal or other governmental entity, nor any agency or department thereof, has passed upon the merits of the Bonds or the accuracy or completeness of this Official Statement. Any representation to the contrary may be a criminal offense.

This Official Statement is "deemed final" by the City for purposes of Rule 15c2-12 of the Municipal Securities Rulemaking Board. The City has covenanted to provide such annual financial statements and other information in the manner as may be required by regulations of the Securities and Exchange Commission or other regulatory body.

IN MAKING AN INVESTMENT DECISION INVESTORS MUST RELY ON THEIR OWN EXAMINATION OF THE CITY AND THE TERMS OF THE OFFERING, INCLUDING THE MERITS AND RISKS INVOLVED. THESE SECURITIES HAVE NOT BEEN RECOMMENDED BY ANY FEDERAL OR STATE SECURITIES COMMISSION OR REGULATORY AUTHORITY. FURTHERMORE, THE FOREGOING AUTHORITIES HAVE NOT CONFIRMED THE ACCURACY OR DETERMINED THE ADEQUACY OF THIS DOCUMENT. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

This Official Statement contains statements that are "forward-looking statements" as defined in the Private Securities Litigation Reform Act of 1995. When used in this Official Statement, the words "estimate," "project," "intend," "expect," and similar expressions are intended to identify forward-looking statements. Such statements are subject to risks and uncertainties that could cause actual results to differ materially from those contemplated in such forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof.

OFFICIAL STATEMENT

$6,000,000*
CITY OF LAS CRUCES, NEW MEXICO
TAXABLE GENERAL OBLIGATION IMPROVEMENT BONDS
SERIES 2024

INTRODUCTION AND SUMMARY

This Official Statement is furnished to prospective purchasers of the City of Las Cruces, New Mexico, Taxable General Obligation Improvement Bonds, Series 2024 (the "Bonds"), issued in the aggregate principal amount of $6,000,000* by the City of Las Cruces, New Mexico (the "City"). The offering of the Bonds is made only by way of this Official Statement and the Official Notice of Bond Sale, authorized by Ordinance No. 3062 adopted by the City Council on March 4, 2024, as supplemented by the Award Certificate executed on March __, 2024 (collectively, the "Bond Ordinance"). Additional information concerning the City, the Bonds and other aspects of this offering may be obtained either from the City or from RBC Capital Markets, LLC (the "Municipal Advisor") at the addresses set forth in the section entitled "ADDITIONAL INFORMATION."

The following material is qualified in its entirety by the more complete information contained throughout this Official Statement, and detachment or other use of this "INTRODUCTION AND SUMMARY" without the entire Official Statement, including the cover page and the appendices, is unauthorized.

All terms used in this Official Statement that are not defined herein shall have the meanings given such terms in the Bond Ordinance.

The Issuer

The City is a political subdivision of the State of New Mexico (the "State"), organized and existing under the Constitution, and general laws of the State. The City was incorporated in 1907 and is located in southern New Mexico. It is New Mexico's second largest city. It operates under a Council-Manager form of government with the Mayor elected at large. The City's Fiscal Year ends June 30 and is referred to in this Official Statement as the "Fiscal Year."

Authority for Issuance and Purpose

The Bonds are issued in accordance with the Constitution and laws of the State of New Mexico, in particular, Sections 3-30-1 through 3-30-9 and Sections 6-15-1 through 6-15-22 NMSA 1978, as amended and supplemented. $6,000,000* in principal amount of the Bonds represents the second and final series of general obligation bonds approved in aggregate amount of $23,000,000 by the qualified electors of the City at an election held on November 8, 2022. The Bonds are being issued for the purpose of placing the proceeds into the City's Affordable Housing Trust Fund, to provide resources to plan, design, construct, acquire, and preserve housing affordable for low to moderate income households, including acquisition of necessary land and paying the costs of issuance of the Bonds (collectively, the "Improvement Project").

The Bonds

The Bonds will be registered as to principal and interest, issued in denominations of $5,000 each, or integral multiples thereof, in conformance with the Constitution and laws of the State and pursuant to

* Preliminary, subject to change.

the Bond Ordinance. The Bonds shall mature in the principal amounts and on the dates shown on the cover page hereof. Interest shall be payable February 1 and August 1 of each year commencing August 1, 2024 to registered owners shown on the books of the Registrar on the 15th day of the month preceding each regularly scheduled interest payment date thereafter ("Record Date"). The Bonds will be issued only in fully registered form and will be initially registered and delivered to Cede & Co., the nominee of The Depository Trust Company pursuant to the book-entry only system described herein.

Security

The Bonds are secured by the City's full faith and credit and are general obligations of the City payable from *ad valorem* taxes to be levied, without limitation as to rate or amount, against all taxable property within the City. See "SECURITY AND REMEDIES"

Financial Statements

The City's audited financial statements as of and for the year ended June 30, 2023 including the opinions rendered thereon of certified public accountants, are attached as Appendix B.

Selected Debt Ratios

The following table sets forth details relating to the ratio of general debt and overlapping debt to population and assessed valuation:

2023 Assessed Valuation	$ 3,008,373,421
2023 Estimated Actual Valuation(1)	$9,909,936,090
City Debt as a % of	
Assessed Valuation	1.23%
Estimated Actual Valuation	0.37%
Direct and Overlapping Debt as a % of	
Assessed Valuation(2)(3)	5.01%
Estimated Actual Valuation(2)(3)	1.52%
City General Obligation Debt Outstanding(3)(4)	$37,010,000
City General Obligation Debt(2)(3)	$37,010,000
Estimated Direct & Overlapping G/O Debt(2)(3)	$150,774,905
~~2023~~2022 Estimated Population~~(5)~~	~~114,450~~111,385
City Net Debt Per Capita(2)(4)	~~$278.84~~286.52
Direct and Overlapping Debt Per Capita(3)	$1,~~317.39~~353.64

(1) Actual valuation is computed by adding 2023 exemptions to the 2023 assessed valuation and multiplying by three.

(2) Figure includes proposed 2024 Bonds.

(3) Figure is not net of accumulated Debt Service Fund amounts.

(4) Figure is net of accumulated debt service fund amounts attributable to the upcoming principal payment. The net cash balance in the debt service fund as of February 7, 2024 was $6,722,665 of which 75.81% was properly attributable to principal reduction.

~~(5) Based on 2020 population from US Census and the estimated growth rate of .9%.~~

See "DEBT AND OTHER FINANCIAL OBLIGATIONS – General Obligation Debt" herein.

Tax Matters

In the opinion of Modrall, Sperling, Roehl, Harris & Sisk, P.A. ("Bond Counsel"), based on existing laws of the State of New Mexico as enacted and construed, the Bonds and income from the Bonds are exempt from all taxation by the State of New Mexico or any political subdivision thereof. The Bonds are being issued as federally taxable under the Internal Revenue Code of 1986, as amended.

Agents and Advisors

At the time of the issuance and sale of the Bonds, Modrall, Sperling, Roehl, Harris & Sisk, P.A., as Bond Counsel, will deliver the bond opinion included in Appendix A hereto. See "LEGAL MATTERS" herein. Certain legal matters relating to the Bonds will be passed on for the City by Modrall, Sperling, Roehl, Harris & Sisk, P.A., as Disclosure Counsel.

RBC Capital Markets, LLC ("RBC") is employed as Municipal Advisor to the City in connection with the issuance of the Bonds. The Municipal Advisor's fee for services rendered with respect to the sale of the Bonds is contingent upon the issuance and delivery of the Bonds. RBC, in its capacity as Municipal Advisor, has not verified and does not assume any responsibility for the possible impact of any present, pending or future actions taken by any legislative or judicial bodies. The Municipal Advisor is not obligated to undertake, and has not undertaken to make, an independent verification of, or assume responsibility for, the accuracy, completeness, or fairness of the information in this Official Statement.

Additional Information

This Official Statement is accurate only as of its date, and no representation is made that the information contained herein has not changed since that date. This Official Statement is intended to be made available to investors through the Municipal Advisor.

The quotations from, and summaries and explanations of, the statutes, regulations and documents contained herein do not purport to be complete, and reference is made to those statutes, regulations and documents for full and complete statements of their provisions. Copies, in a reasonable quantity, of those statutes, regulations and documents may be obtained upon request directed to the City, and upon payment to the City of a charge for copying, mailing and handling, at the City of Las Cruces, 700 North Main, Las Cruces, NM 88001, telephone number (575) 541-2000, Attention: City Manager.

Any statements in this Official Statement involving matters of opinion, whether or not expressly so stated, are intended as such and not as representations of fact. This Official Statement is not to be construed as a contract between the City and the purchasers or holders of any of the Bonds.

THE BONDS

Description

The Bonds are general obligation bonds to be issued by the City in the total principal amount of $6,000,000* and will be dated the Date of Delivery, which is expected to be on or about April 11, 2024. The Bonds will be issued as fully registered bonds in denominations of $5,000 or integral multiples thereof, bearing interest from their date to maturity at the rates specified on the cover page of this Official Statement payable semiannually on February 1 and August 1 each year, commencing on August 1, 2024, and maturing as set forth on the cover page of this Official Statement.

The Bonds will be issued only in fully registered form and will be initially registered and delivered only to Cede & Co., the nominee of The Depository Trust Company ("DTC"), pursuant to the book-entry only system described herein. No physical delivery of the Bonds will be made to the owners hereof.

Principal of, premium, if any, and interest on the Bonds will be payable by the Paying Agent/Registrar to Cede & Co., which will make distribution of the amounts so paid to the beneficial owners of the Bonds. See "THE BONDS – Book-Entry Only System" herein.

Authorization

The Bonds are being issued pursuant to the City Council's powers under Article IX, Section 10 of the Constitution of the State of New Mexico, and Sections 3-30-1 through 3-30-9 and 6-15-1 through 6-15-22 NMSA 1978, as amended and supplemented, the Bond Ordinance of the City Council delegating authority to the City Manager or delegate awarding the Bonds to the successful bidder for the Bonds in the public sale to be held on March 14, 2024. A copy of the Official Notice of Bond Sale is attached to this Official Statement as Appendix D.

Bond Registrar and Paying Agent

The City Treasurer will serve as the Bond Registrar (the "Registrar") and Paying Agent (the "Paying Agent") for the Bonds.

Payment of Principal and Interest; Record Date

The principal of the Bonds is payable to the registered owners of the Bonds at the principal office of the Paying Agent. Interest on the Bonds is payable by check or draft of the Paying Agent mailed on or before each interest payment date to the registered owners of the Bonds as of the close of business on the 15th day of the calendar month preceding the interest payment date (the "Regular Record Date") at the addresses appearing in the registration books maintained by the Registrar; but any such interest not so timely paid or duly provided for shall cease to be payable to the person who is the registered owner thereof at the close of business on the Regular Record Date and shall be payable to the person who is the registered owner thereof at the close of business on the date to be fixed by the Registrar whenever moneys become available for the payment of defaulted interest (the "Special Record Date").

Optional Redemption of Bonds

The Bonds maturing on and after August 1, 2033, may be redeemed prior to their scheduled maturity on August 1, 2032, or on any date thereafter, in whole or in part, at the option of the City Council at par plus accrued interest to the date of redemption, if any.

Exchange or Transfer of Bonds

The Registrar/Paying Agent will maintain the books of the City for the registration of ownership of the Bonds. Upon the surrender for transfer of any Bond at the principal office of the Registrar/Paying Agent, duly endorsed for transfer or accompanied by an assignment duly executed by the registered owner or his attorney duly authorized in writing, the Registrar/Paying Agent shall authenticate and deliver not more than three business days after receipt of the Bond to be transferred in the name of the transferee or transferees a new Bond or Bonds in fully registered form of the same aggregate principal amount of authorized denominations, and of the same maturity, interest rate and series, bearing a number or numbers not contemporaneously outstanding. Bonds may be exchanged at the principal office of the Registrar/Paying Agent for an equal aggregate principal amount of Bonds of other authorized denominations, and of the same maturity, series and interest rate. The Registrar/Paying Agent shall authenticate and deliver not more than three business days after receipt of the Bond to be exchanged a Bond or Bonds which the registered owner making the exchange is entitled to receive, bearing a number or numbers not contemporaneously outstanding. Exchanges and transfers of Bonds as herein provided shall be without charge to the owner or any transferee, but the Registrar/Paying Agent may require the payment by the owner of any Bond requesting exchange or transfer of any tax or other governmental charge required

to be paid with respect to such exchange or transfer. See "THE BONDS – Book-Entry Only System" herein for a description of the system to be utilized initially in regard to ownership and transferability of the Bonds.

Book-Entry Only System

The information in this section concerning DTC and DTC's book-entry system has been obtained from sources that the City believes to be reliable, but neither the City, Municipal Advisor nor Bond Counsel take responsibility for the accuracy thereof.

The Depository Trust Company ("DTC"), New York, New York, will act as securities depository for the Bonds. The Bonds will be issued as fully-registered securities registered in the name of Cede & Co. (DTC's partnership nominee) or such other name as may be requested by an authorized representative of DTC. One fully-registered Bond will be issued for each maturity of the Bonds, each in the aggregate principal amount of Bonds of such maturity, and will be deposited with DTC.

DTC, the world's largest securities depository, is a limited-purpose trust company organized under the New York Banking Law, a "banking organization" within the meaning of the New York Banking Law, a member of the Federal Reserve System, a "clearing corporation" within the meaning of the New York Uniform Commercial Code, and a "clearing agency" registered pursuant to the provisions of Section 17A of the Securities Exchange Act of 1934. DTC holds and provides asset servicing for over 3.5 million issues of U.S. and non-U.S. equity issues, corporate and municipal debt issues, and money market instruments (from over 100 countries) that DTC's participants ("Direct Participants") deposit with DTC. DTC also facilitates the post-trade settlement among Direct Participants of sales and other securities transactions in deposited securities, through electronic computerized book-entry transfers and pledges between Direct Participants' accounts. This eliminates the need for physical movement of securities certificates. Direct Participants include both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, clearing corporations, and certain other organizations. DTC is a wholly-owned subsidiary of The Depository Trust & Clearing Corporation ("DTCC"). DTCC is the holding company for DTC, National Securities Clearing Corporation and Fixed Income Clearing Corporation, all of which are registered clearing agencies. DTCC is owned by the users of its regulated subsidiaries. Access to the DTC system is also available to others such as both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, and clearing corporations that clear through or maintain a custodial relationship with a Direct Participant, either directly or indirectly ("Indirect Participants"). DTC has Standard & Poor's rating of AA+. The DTC Rules applicable to Direct Participants are on file with the Securities and Exchange Commission. More information about DTC can be found at www.dtcc.com and www.dtc.org. The City undertakes no responsibility for and makes no representations as to the accuracy or the completeness of the content of such material contained on that website as described in the preceding sentence including, but not limited to, updates of such information or links to other Internet sites accessed through the aforementioned website.

Purchases of the Bonds under the DTC system must be made by or through Direct or Indirect Participants, which will receive a credit for the Bonds on DTC's records. The ownership interest of each actual purchaser of each Bond ("Beneficial Owner") is in turn to be recorded on the Direct and Indirect Participants' records. Beneficial Owners will not receive written confirmation from DTC of their purchase. Beneficial Owners are, however, expected to receive written confirmations providing details of the transaction, as well as periodic statements of their holdings, from the Direct or Indirect Participant through which the Beneficial Owner entered into the transaction. Transfers of ownership interests in the Bonds are to be accomplished by entries made on the books of Direct and Indirect Participants acting on behalf of Beneficial Owners. Beneficial Owners will not receive certificates representing their ownership interests in the Bonds, except in the event that use of the book-entry system for the Bonds is discontinued.

To facilitate subsequent transfers, all Bonds deposited by Direct Participants with DTC are registered in the name of DTC's partnership nominee, Cede & Co. or such other name as may be requested

by an authorized representative of DTC. The deposit of Bonds with DTC and their registration in the name of Cede & Co. or such other DTC nominee do not affect any change in beneficial ownership. DTC has no knowledge of the actual Beneficial Owners of the Bonds; DTC's records reflect only the identity of the Direct Participants to whose accounts such Bonds are credited, which may or may not be the Beneficial Owners. The Direct and Indirect Participants will remain responsible for keeping account of their holdings on behalf of their customers.

Conveyance of notices and other communications by DTC to Direct Participants, by Direct Participants to Indirect Participants, and by Direct Participants and Indirect Participants to Beneficial Owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time.

While the Bonds are in the book-entry only system, redemption notices will be sent to DTC. If less than all of the Bonds are being redeemed, DTC's practice is to determine by lot the amount of the interest of each Direct Participant in such issue to be redeemed.

Neither DTC nor Cede & Co. (nor any other DTC nominee) will consent or vote with respect to the Bonds unless authorized by a Direct Participant in accordance with DTC's MMI Procedures. Under its usual procedures, DTC mails an Omnibus Proxy to the City as soon as possible after the record date. The Omnibus Proxy assigns Cede & Co.'s consenting or voting rights to those Direct Participants to whose accounts the Bonds are credited on the record date (identified in a listing attached to the Omnibus Proxy).

Redemption proceeds, distributions, and dividend payments on the Bonds will be made to Cede & Co., or such other nominee as may be requested by an authorized representative of DTC. DTC's practice is to credit Direct Participants' accounts, upon DTC's receipt of funds and corresponding detail information from the City or agent on payable date in accordance with their respective holdings shown on DTC's records. Payments by Participants to Beneficial Owners will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers in bearer form or registered in "street name," and will be the responsibility of such Participant and not of DTC, agent, or the City, subject to any statutory or regulatory requirements as may be in effect from time to time. Payment of redemption proceeds, distributions, and dividend payments to Cede & Co. (or such other nominee as may be requested by an authorized representative of DTC) is the responsibility of the City or agent, disbursement of such payments to Direct Participants will be the responsibility of DTC, and disbursement of such payments to the Beneficial Owners will be the responsibility of Direct and Indirect Participants.

DTC may discontinue providing its services as depository with respect to the Bonds at any time by giving reasonable notice to the City. Under such circumstances, in the event that a successor depository is not obtained, certificates representing the Bonds are required to be printed and delivered.

The City may decide to discontinue use of the system of book-entry transfers through DTC (or a successor securities depository). In that event, certificates representing the Bonds will be printed and delivered to DTC.

SECURITY AND REMEDIES

General

The Bonds are general obligations of the City payable from *ad valorem* taxes, which may be levied against all taxable property within the City without limitation as to rate or amount. The Bonds are secured by the obligation of the City to levy and collect upon all taxable property within the City a tax rate levy sufficient, together with other legally available revenues, to pay the debt service on the Bonds. Such annual levy for debt service creates a statutory tax lien that can be enforced personally against the owner of the

property or enforced by sale of the property. Neither the State nor any other political subdivision has any responsibility to pay the debt service on the Bonds.

Legal Matters

Various State laws and constitutional provisions apply to the assessment and collection of *ad valorem* property taxes. There is no assurance that there will not be any amendment, change in the interpretation of, or addition to the applicable laws, provisions and regulations that would have a material effect, directly or indirectly, on the affairs of the City.

Limitations on Remedies Available to Owners of Bonds

There is no provision for acceleration of maturity of the principal of the Bonds in the event of a default in the payment of principal of or interest on the Bonds. Consequently, remedies available to the owners of the Bonds may have to be enforced from year to year.

The enforceability of the rights and remedies of the owners of the Bonds, and the obligations incurred by the City in issuing the Bonds, are subject to the following: the Federal Bankruptcy Code and applicable bankruptcy, insolvency, reorganization, moratorium, or similar laws relating to or affecting the enforcement of creditor's rights generally, now or hereafter in effect; usual equity principles, which may limit the specific enforcement under State law of certain remedies; the exercise by the United States of America of the powers delegated to it by the federal Constitution; and the reasonable and necessary exercise, in certain exceptional situations, of the police power inherent in the sovereignty of the State and its governmental bodies in the interest of serving a significant and legitimate public purpose. Bankruptcy proceedings, or the exercise of powers by the federal or State government, if initiated, could subject the owners of the Bonds to judicial discretion and interpretation of their rights in bankruptcy or otherwise, and consequently may entail risks of delay, limitation, or modification of their rights.

SPECIAL FACTORS AFFECTING THE PAYMENT OF DEBT SERVICE ON THE BONDS AND AVAILABLE REMEDIES

Cybersecurity

The City operates a large and complex information technology infrastructure to support internal and external operations. As is the case with any such environment, the threat of cybersecurity incidents is constant. Such incidents may arise from multiple sources, including unintentional events or actions, intentional insider threat, and deliberate malicious attacks from outside entities. The effect of such threats may include unauthorized access to City systems, data or resources, inappropriate exposure or use of City information, disruption of City services, and damage to City systems.

The City maintains a cybersecurity program that uses a multilayer, multi-vendor approach. Staffing for the program consists of a cybersecurity administrator who is CASP+ certified and an information security specialist. The City has an IT Governance program which provides a technology review, including the review of security standards, for new technology purchases. The City has a Protected Information Management Committee which sets standards for the use and security of protected information within the City. The City has cyber security insurance policy with coverage comparable to coverage carried by other U.S. municipalities of a similar size.

Security technology used by the City includes a unified threat management security system, end point security software on all computers, internal and external network traffic inspection, centralized event log correlation and alerting, and honey pot technologies. All computer operating system environments are updated with security updates as they are released. All updates are centrally managed. All City staff are

required to attend a cybersecurity awareness training annually. Security penetration testing is performed bi-annually using a third-party auditor.

Climate Change and Natural Disasters

The City could experience, and is susceptible to additional, weather events and natural disasters that could be deemed extreme including, without limitation, periods of heat, droughts, floods, mud slides, tornadoes and other wind conditions and wildfires, which could result in negative economic impacts on the City. Such effects may be exacerbated by a longer term shift in the climate over several decades, commonly referred to as climate change. Numerous scientific studies on climate change show that, among other effects on the global ecosystem, extreme temperatures may become more common, and extreme weather events may become more frequent as a result of increasing global temperatures attributable to atmospheric pollution. As a result, the City could lose tax revenues and many residents, businesses, and governmental operations could be displaced. Additionally, climate change concerns have led, and may continue to lead, to new laws and regulations at the federal and state levels (including but not limited to air, water, hazardous substances and waste regulations) that could have a material adverse effect on the operations and/or financial condition of the City. The City cannot predict the occurrence or extent of any future extreme weather events or natural disasters or the economic impacts that the occurrence of any such events may have on the City.

PURPOSE AND PLAN OF FINANCING

The Bonds will be issued in a principal amount of $6,000,000*, which represents the second and final series of general obligation bonds approved by the qualified electors of the City at an election held on November 8, 2022 in a maximum aggregate amount of $23,000,000. The Bonds will be issued for the purpose of placing the proceeds into the City's Affordable Housing Trust Fund, to provide resources to plan, design, construct, acquire, and preserve housing affordable for low to moderate income households, including acquisition of necessary land and paying the costs of issuance of the Bonds (collectively, the "Improvement Project").

From the deposit of the Bond proceeds in the City's Affordable Housing Trust Fund, the City expects to fund projects to support affordable housing in the City~~. The projects include~~, including, but ~~are~~ not limited to, portions of the projects listed below. ~~Other projects may be funded in combination with other funding sources.~~ Each of the proposed projects listed has numerous sources of funding that, when combined with the proposed City contribution from the Affordable Housing Trust Fund, fully fund the projects:

1. The Three Sisters Apartments – 70 units housing families at or below 60% of the Area Median Income (AMI)
2. Pedrena Apartments – 80 units housing senior citizens ages 55 and older with income at or below 60% of the AMI
3. Peachtree Canyon Apartments Phase I – 144 units for households at or below 60% of the AMI

* Preliminary, subject to change.

4. Arcadia 4 Subdivision Land Acquisition – 52 lots for single-family homes for families with up to 120% of the AMI
5. Amador Crossing – 50 units of permanent supportive housing for people experiencing homelessness with income levels of 0-30% of AMI

SOURCES AND USES OF FUNDS

The sources and uses of funds relating to the Bonds, other than accrued interest, are set forth in the following table.

SOURCES OF FUNDS	
Bond proceeds	$
[Net] Premium	
TOTAL SOURCES OF FUNDS	$
USES OF FUNDS	
Deposit to Acquisition Fund	$
Underwriter's Discount	
Costs of Issuance[1]	
TOTAL USES OF FUNDS	$

(1) Includes Municipal Advisor fees, rating agency fees, legal fees, fees of the paying agent/registrar, and other miscellaneous costs and expenses related to the issuance of the Bonds.

DEBT AND OTHER FINANCIAL OBLIGATIONS

General Obligation Debt

Article IX, Section 13, of the New Mexico Constitution prohibits municipalities, including the City, from incurring general obligation debt in an aggregate amount, including existing indebtedness, exceeding four percent of the value of the taxable property within such municipality, as shown by the last preceding general assessment. A test for maximum general obligation bonds outstanding of the City follows:

2023 Assessed Valuation[1]	$3,008,373,421
2023 Estimated Actual Valuation	$9,909,936,090
City Bonded Debt Outstanding[2]	$37,010,000
Minus Debt Service Fund Balance Attributable to Principal	(5,096,341)
NET DEBT	$31,913,659
Ratio of City Outstanding Debt to 2023 Assessed Valuation[2]	1.23%
Ratio of City Outstanding Debt to 2023 Estimated Actual Valuation[2]	0.37%
Per ~~Capita~~Capital Bonded Debt [2]	$~~323.37~~332.27
~~2023~~2022 Estimated Population~~[3]~~	~~114,450~~111,385

(1) New Mexico Assessed Values represent 33-1/3% (the maximum assessment ratio permitted by the New Mexico Constitution) of the actual property value after deduction of certain exemptions. Property tax levies are based upon the certified assessed valuation.

(2) Includes proposed Series 2024 Bonds not net of debt service fund balance attributable to principal..

~~(3) Based on 2020 population from US Census and the estimated growth rate of .9%.~~

As of the date of this Official Statement, the City has outstanding general obligation indebtedness consisting of principal of $6,895,000 of its Series 2019 Bonds, principal of $9,305,000 of its Series 2020 Bonds, and principal of $14,810,000 of its 2023 Bonds. The combined debt service requirements of the Series 2019 Bonds, Series 2020 Bonds, Series 2023 Bonds and the anticipated debt service requirements of the Series 2024 Bonds are shown in the following table.

	Current Requirements			Series 2024 ~~Bonds~~*			Total Requirements*		
Year	Principal	Interest	Total	Principal	Interest	Total	Principal	Interest	Total
2024	$3,790,000	$1,304,200	$5,094,200	$1,~~850~~650,000	~~$91,667~~ 150,000	$1,~~941,667~~ 800,000	$5,~~640~~440,000	$1,~~395,867~~ 454,200	~~$7,035,867~~ 6,894,200

*Preliminary, subject to change. Interest on Series 2024 Bonds computed at 5.00% per annum for illustration purposes only.

Statement of Estimated Direct and Overlapping Debt

The following calculation analyzes the debt load and per capita debt of the City payable from property taxes. In addition to outstanding debt of the City, the calculation takes into account debt attributable to taxing entities that is the responsibility of taxpayers within the boundaries of the City.

Taxing Entity	2023 Assessed Valuation	General Obligation Debt Outstanding	Percentage Applicable	Amount
State of New Mexico	$110,879,706,059	$541,270,000	2.71%	$14,685,666
Doña Ana County	5,607,428,928	4,110,000	53.65%	2,205,006
Doña Ana Com. Col.	5,691,157,467	18,750,000	52.86%	9,911,341
City of Las Cruces	3,008,373,421	37,010,000[(1)(2)]	100.00%	37,010,000[(1)(2)]
Las Cruces Schools	4,358,294,851	125,985,000	69.03%	86,962,892
Total Direct and Overlapping Debt				$150,774,905

Ratio of Estimated Direct & Overlapping Debt to 2023 Assessed Valuation:	5.01%
Ratio of Estimated Direct & Overlapping Debt to 2023 Estimated Actual Valuation:	1.52%
Per Capita Direct & Overlapping Debt:	$1,353.64

(2) Figure is not net of Debt Service Fund Balance.

Analysis of Assessed Valuation

Assessed Valuation of property within the City is calculated as follows: Of the total assessed valuation of all taxable property in the City, 33 1/3% is legally subject to *ad valorem* taxes. After deduction of certain personal exemptions, the 2023 Assessed Valuation is $3,008,373,421. The actual value of personal property within the City (see "Assessments" below) is determined by the Doña Ana County Assessor. The actual value of certain corporate property within the City (see "Centrally Assessed" below) is determined by the State of New Mexico, Taxation and Revenue Department, Property Tax Division.

The analysis of Assessed Valuation in the City of Las Cruces is as follows:

	2023	2022	2021	2020	2019
Assessments					
Value of Land	$669,137,957	$ 657,946,481	$ 643,226,071	$ 628,874,074	$ 617,132,989
Improvements	2,473,701,170	2,261,910,366	2,098,853	2,028,024,992	1,929,579,112

History of Assessed Valuation

The following is a history of assessed valuation for the City and Doña Ana County.

Tax Year	City of Las Cruces	Doña Ana County
2023	$3,008,373,421	$5,607,428,928
2022	2,810,356,108	5,223,570,138
2021	2,629,782,733	4,935,560,916
2020	2,552,890,119	4,783,117,888
2019	2,452,517,126	4,602,866,403

Source: Dona Ana County Assessor's Office

Article VIII, Section 2, of the New Mexico Constitution limits the total *ad valorem* taxes for operational purposes levied by all overlapping governmental units within the City to $20.00 per $1,000 of assessed value. This limitation does not apply to levies for public debt and levies for additional taxes if authorized at an election by a majority of the qualified voters of the City voting on the question. The following table summarizes the tax rates on residential property located within the City for 2022-2023 Fiscal Year and the previous four fiscal years. The City expects no change in the level of its taxes in the foreseeable future but is unable to predict what overlapping entities might do. A high level of taxation may adversely impact the City's ability to repay bonds.

RESIDENTIAL TAX RATES - Per $1,000 Assessed Valuation

Within 20 Mill Limit for General Purposes

Yield Control Limitation

State law limits property tax increases from the prior property tax year. Specifically, no taxing entity may set a rate or impose a tax (excluding oil and gas production *ad valorem* and oil and gas production equipment *ad valorem* taxes) or assessment that will produce revenues that taxes exceed the prior year's tax revenues from residential and non-residential property multiplied by a "growth control factor." The growth control factor is the percentage equal to the sum of (a) "percent change I" plus (b) the prior property tax year's total taxable property value plus "net new value," as defined by statute, divided by such prior property tax year's total taxable property value; however, if that percentage is less than 100 percent, then the growth control factor is (a) "percent change I" plus (b) 100%. "Percent change I" is based upon the annual implicit price deflator index for state and local government purchases of goods and services (as published in the United States Department of Commerce monthly publication entitled "Survey of Current Business," or any successor publication) and is a percent (not to exceed 5%) that is derived by dividing the increase in the prior calendar year's index over the index for the calendar year next preceding the prior calendar year (unless there was a decrease, in which case zero if used) by the index for such calendar year next preceding the prior calendar year. *The growth control factor applies to authorized operating levies and to any capital improvements levies, but does not apply to levies for paying principal and interest on public general obligation debt.*

Limitations on Residential Property Tax Increases

In an effort to limit large annual increases in residential property taxes in some areas of the State (particularly the Santa Fe and Taos areas which have experienced large increases in residential property values in recent years), an amendment to the uniformity clause (Article VIII, Section 1) of the New Mexico Constitution was approved by a wide margin by New Mexico voters on November 3, 1998.

The amendment directs the Legislature to provide for valuation of residential property in a manner that limits annual increases in valuation. The limitation may be applied to classes of residential property

taxpayers based on occupancy, age or income. The limitations may be authorized statewide or at the option of a local jurisdiction and may include conditions for applying the limitations.

Section 7-36-21.2 NMSA 1978 establishes a statewide limitation on residential property valuation increases beginning in tax year 2001. Annual valuation increases will be limited to the greater of 3% over the prior year's valuation or 6.1% over the valuation from two years prior. These limitations do not apply under the following exceptions:

1. When residential property is being valued for the first time;
2. When physical improvements (except for solar energy system installations) are made to the property or are omitted in a prior tax year;
3. When the property is transferred to a person other than a spouse, or a child who occupies the property as his principal residence and who qualifies for the head of household exemption on the property under the Property Tax Code;
4. When a change in zoning or use of property occurs; and
5. To property that is subject to the valuation limitations under Section 7-36-21.3 NMSA 1978.

Section 7-36-21.3 NMSA 1978 places a limitation on the increase in value for property taxation purpose for single-family dwellings occupied by low-income owners who are 65 years of age or older or who are disabled and whose modified gross income for the prior taxable year did not exceed the income thresholds provided by statute. The statute fixes the valuation of the property to the valuation in the year that (a) for a person 65 or older, in the tax year in which the owner qualifies and files an application, or (b) for a person who is disabled, in the tax year in which the owner qualified and files an application the owner turned 65 or became disabled. The Section 7-36-21.3 limitation does not apply:

1. To property that is being valued for the first time;
2. To a change in valuation resulting from physical improvements made to the property in the preceding year; and
3. To a change in valuation resulting from a change in the zoning or permitted use of the property in the preceding year.

Amendments to State laws affecting residential property taxes are proposed from time to time and may be proposed in the future by the Legislature. Such amendments, if enacted, could result in an increase to the tax rate imposed on residential property tax within the City in order to pay the principal of and interest on general obligation bonds issued by the City, including the Bonds.

The constitutionality of the property tax limitation has been challenged in a number of venues. On March 28, 2012, the New Mexico Court of Appeals upheld the statutory valuation cap and its application under Section 7-36-21.2 NMSA 1978, which ruling was affirmed by the New Mexico Supreme Court in June, 2014.

Tax Collections on Locally Assessed and Centrally Assessed Property

General (*ad valorem*) taxes (other than taxes on certain property and business that are centrally assessed) for all units of government are collected by the Doña Ana County Treasurer and distributed monthly to the various political subdivisions to which they are due. Property taxes are due in two installments. The first half installment is due on November 10 and becomes delinquent on December 10. The second half installment is due on April 10 and becomes delinquent on May 10. In 2019, the legislature enacted temporary provisions for tax years 2019 and 2021 which extended the due date from November

10th to December 6th in 2019 and 2021 respectively, and the date of delinquency for the first installment from December 10th to January 9th in 2020 and 2022, respectively. Those temporary provisions have expired.

Collection statistics for Doña Ana County are presented here:

Tax Year	Fiscal Year	Net Taxes Charged to Treasurer	Current Tax Collections[1]	Current Collections as of % of Net Levied	Current/ Delinquent Tax Collection[2]	Current/ Delinquent Collections as a % of Net Levied
2022	22/23	$ 161,814,809	$ 155,206,412	95.92%	$ 156,980,629	97.01%
2021	21/22	151,178,013	146,033,493	96.60%	146,033,493	96.58%
2020	20/21	147,144,085	141,840,720	96.40%	145,124,398	98.61%
2019	19/20	142,232,178	135,927,911	95.57%	141,367,968	99.39%
2018	18/19	136,523,134	129,331,545	94.73%	135,834,583	99.49%

(1) Current collections through June 30 of each year.

(2) As of June 30th of each year.

Source: Dona Ana County Treasurer's Office

For tax year 2023 (fiscal year 2023-2024), net taxes charged to the Treasurer were $171,829,149.

Interest on Delinquent Taxes

Pursuant to Section 7-38-49, NMSA 1978, if property taxes are not paid for any reason within thirty (30) days after the date they are due, interest on the unpaid taxes shall accrue from the thirtieth (30th) day after they are due until the date they are paid. Interest accrues at the rate of 1% per month or any fraction of a month. However, in the case of a timely protest, interest payable shall be computed on a principal amount equal to the unpaid taxes finally determined to be due upon resolution of the protest.

Penalty for Delinquent Taxes

Pursuant to Section 7-38-50 NMSA 1978, if property taxes become delinquent, a penalty of one percent of the delinquent tax for each month, or any portion of a month, they remain unpaid shall be imposed, but the total penalty shall not exceed five percent (5%) of the delinquent taxes. The minimum penalty imposed is $5.00. A county can suspend application of the minimum penalty requirement for any tax year.

If property taxes become delinquent because of intent to defraud by the property owner, 50% of the property taxes due or $50.00, whichever is greater, shall be added as a penalty.

Remedies Available for Non-Payment of Taxes

Pursuant to Section 7-38-47 NMSA 1978, property taxes are the personal obligation of the person owning the property on the date on which the property was subject to valuation for property taxation

purposes. A personal judgment may be rendered against the taxpayer for payment of taxes that are delinquent, together with any penalty and interest on the delinquent taxes. The sale or transfer of property after its valuation date does not relieve the former owner of personal liability for the property taxes imposed for that tax year.

Taxes on real property are a lien against the real property. A lien runs in favor of the State and secures the payment of property taxes and any penalty and interest until such payments are made. Such lien is a first lien and paramount to any other interest in the property, perfected or unperfected. Pursuant to Section 7-38-65 NMSA 1978, delinquent taxes on real property may be collected by selling the real property on which taxes are delinquent at any time after the expiration of three years from the first date shown on the tax delinquency list on which the taxes became delinquent.

Pursuant to Section 7-38-53 NMSA 1978, delinquent property taxes on personal property may be collected by asserting a claim against the owner(s) of the personal property for which taxes are delinquent.

Protest

Pursuant to Section 7-38-39 NMSA 1978, after receiving his or her property tax bill and after making payment prior to the delinquency date of all property taxes due in accordance with the bill, a property owner may protest the value or classification determined for his or her property for property taxation purposes, the allocation of value of his or her property to a particular governmental unit, the application to his or her property of an administrative fee adopted pursuant to Section 7-38-36.1 NMSA 1978 or a denial of a claim for an exemption by filing a claim for refund in the district court. Pursuant to Section 7-38-41 NMSA 1978, the portion of any property taxes paid to the County Treasurer that is not admitted to be due and is the subject of a claim for refund will be deposited in a "property tax suspense fund." Moneys in the property tax suspense fund may not be used for the payment of debt service on the Bonds.

FINANCES OF THE CITY

Budget Process

Pursuant to the City Charter (the "Charter"), the City adheres to the following procedure in establishing its annual budget: At least sixty (60) days prior to the start of the fiscal year (July 1), the City Manager shall submit a budget and budget message to the council for the ensuing fiscal year. The City Manager's message shall explain the budget both in fiscal terms and in terms of work programs. It shall outline the proposed financial policies of the City for the ensuing fiscal year and describe the important features of the budget. It shall indicate any major changes from the current year in financial policies, expenditures, and revenues together with the reasons for such changes. The budget message shall summarize the City's debt position and include any other material the City Manager deems desirable.

The budget itself shall provide a complete financial plan of all City funds and activities for the ensuing year. The budget shall show in detail all estimated income, indicating the estimated property tax levy, estimated tax revenues, and all proposed expenditures, and shall be arranged to show comparative figures for actual and estimated income and expenditures of the current fiscal year. It shall also show actual income and expenditures of the preceding fiscal year to date and estimated income and expenditures for the remaining months of the fiscal year. The budget shall include the following: (1) proposed expenditures for current operations during the ensuing fiscal year; (2) proposed capital expenditures during the ensuing fiscal year, detailed by offices, departments and agencies when practicable, and the proposed method of financing each capital expenditure; and (3) anticipated reserves for the ensuing fiscal year of each enterprise owned by the City and the proposed method of the disposition of those reserves. Subsidiary budgets for each

enterprise giving detailed income and expenditure information shall be attached as appendices to the budget. The total of proposed expenditures for a year shall not exceed the total of estimated resources for that year.

Following a public hearing on the proposed budget, the City Council may adopt the budget, with or without amendment. The City Council may add or increase programs or amounts and may delete or decrease any programs or amounts, except for expenditures required by law, for debt service or for estimated cash deficit. No amendment to the budget or capital improvements program shall increase the authorized expenditures to an amount greater than the total of estimated resources available during the fiscal year. The City Council shall adopt the budget no later than thirty (30) days before the beginning of the fiscal year. If it fails to adopt the budget by the beginning of the fiscal year, the amounts appropriated for current operation for the current fiscal year are deemed adopted for the ensuing fiscal year on a month-to-month basis, with all items in it prorated accordingly, until the City Council adopts a budget. Nothing in the Charter shall preclude the City from meeting its debt service when due. Adoption of the budget shall constitute appropriations of the amounts specified therein as expenditures from the funds indicated in the budget.

If during the fiscal year the City Manager certifies that resources are available for appropriation in excess of those estimated in the budget, the City Council may make supplemental appropriations for the year up to the amount of the excess. If at any time during the fiscal year, the City Manager believes that the resources available may be insufficient to meet the amount appropriated, the City Manager shall so report to the City Council, indicating the estimated amount of the deficit, any remedial action taken or to be taken by the City Manager, and recommendations as to any other steps to be taken. The City Council shall then take any action deemed necessary to prevent any deficit, and for that purpose it may reduce any appropriation. No appropriation for debt service may be reduced or transferred. No appropriation may be reduced below any amount required by law to be appropriated or by more than the amount of the unencumbered balance thereof.

As a management control device, the City employs formal budgetary integration at the line item level. Deficit financing is not permitted under New Mexico law.

The Government Finance Officers Association ("GFOA") awarded to the City the Distinguished Budget Presentation Award in 2022, which is the 16th consecutive year the City has achieved this designation. The City also received the Certificate of Achievement of Excellence in Financial Reporting, for the 19th consecutive year for the City's 2022 Annual Certified Financial Report.

Financial Statements

The following General Fund Balance Sheet and Statement of Revenues, Expenditures and Changes in Fund Balances have been included herein for informational purposes only. Figures were taken from the audit reports prepared by the City. Audited figures are excerpts of the audit reports and do not purport to be complete. Reference is made to the complete audit reports which are available upon request.

THE CITY

General

The Las Cruces/Doña Ana County area borders Texas and Mexico and has a rich and colorful history, ranging from 16th century Spanish explorations to the landing of the space shuttle. Las Cruces is the second largest city in the State and is the commercial service and cultural center of southern New Mexico. The City of Las Cruces is located approximately 45 miles north of El Paso, Texas and Cuidad Juárez, Mexico and 225 miles south of Albuquerque, New Mexico.

The economy of the Las Cruces MSA (Metropolitan Statistical Area) is diversified with the major employers being government which accounted for approximately 21,500 jobs as of November 2023. The remaining non-agricultural jobs are in private education and health services (18,400), trade/ transportation/ utilities (11,400), leisure and hospitality (9,200), professional and business services (7,200), mining and construction (3,900), manufacturing (3,500), financial activities (2,400), information (600), and all other services (1,600) (as reported in the New Mexico Department of Workforce Solutions Labor Market Review, November 2023).

Growth in the economy is demonstrated in the growth of gross receipts from retail trade, assessed valuation, building permits, housing prices, and median household income.

Government

The City was founded in 1849 and incorporated in 1907 and operates under a home rule charter with a Council-Manager form of government. Nonpartisan elections are held for members of the City Council of the City (the "Council") for the election of councilors from six single-member districts and for a Mayor to be nominated and elected at large by the resident and qualified voters of the City.

Councilors and the Mayor are elected for staggered four year terms. The Mayor and the Council and the date of expiration of their current terms are as follows:

Name	Office	Current Term Expires
Eric Enriquez	Mayor	December 31, 2027
Cassie McClure	Councilor – District 1	December 31, 2027
Bill Mattiace	Councilor – District 2	December 31, 2027
Becki Graham	Councilor – District 3	December 31, 2025
Johana Bencomo	Councilor – District 4	December 31, 2027
Becky Corran	Councilor – District 5	December 31, 2025
Yvonne M. Flores	Councilor – District 6	December 31, 2025

Administrative Officers

City Manager Ifo Pili began his duties as Las Cruces City Manager in September 2020. Before coming to Las Cruces, Mr. Pili was the city administrator in Eagle Mountain City, Utah since 2012. He also served as Eagle Mountain City's assistant city administrator and economic development coordinator for six years before becoming city administrator. He also was the district administrator for the Unified Fire Service Area, which served 11 Utah municipalities and unincorporated Salt Lake County. Mr. Pili was also an adjunct professor in the Master of Public Administration program at Brigham Young University, teaching local government management. He earned a Bachelor of Science degree in political science and a Master of Public Administration degree from BYU.

Finance Director of Financial Services Leeann DeMouche joined the City of Las Cruces in 2011 with an extensive analytical background in economics and project management. Ms. DeMouche spent ten years with New Mexico State University as the Water Resource Specialist. In 2011, she began her career with the City as the Water Conservation Coordinator. In 2013 she was promoted as the Rate and Economic Analyst Manager, 2015 Fleet Administrator, 2018 Chief Budget Officer, and 2021 Finance Director. Ms. DeMouche is a graduate of New Mexico State University with a BA and MA in Economics.

City Treasurer Erika Jaquez, MBA, as the Treasurer for the City of Las Cruces, has responsibility for management and direction of treasury operations including short-term investment portfolio management, long and short term debt issuance, operational budgeting, bank relationship management and credit card processing. She started with the City in October 2011 and has held various positions in finance, public works, and internal audit. Ms. Jaquez earned her Master of Business Administration and Master of Accountancy from New Mexico State University.

City Clerk Christine Rivera has been with the City of Las Cruces since 2012, was appointed interim city clerk in October of 2019, and became city clerk in August 2020. She received her Certified Municipal Clerk designation in 2016. She earned her Bachelors in Psychology from Louisiana College in 2001 and her Masters in Psychology from Capella University in 2016.

City Attorney Linda A. Samples became the Las Cruces City Attorney on July 31, 2023. Immediately prior to becoming City Attorney, Ms. Samples served as Associate General Counsel for the Texas Tech University System. Previously, Ms. Samples served as Senior Assistant City Attorney for the City of El Paso from August 2013 to August 2017, in which she advised all department and the Public Services Board on personnel matters. Additionally, Ms. Samples' professional experience includes serving as El Paso Independent School District's first In-House Counsel and an Associate with the El Paso Baskind and Hosford Law Firm. Ms. Samples currently serves on the State Bar of Texas Grievance Committee, is the Chair of the State Bar of Texas' Women in the Profession Committee and serves as Treasurer of the Texas Government Law Council. Ms. Samples earned her Juris Doctorate degree from the University of Michigan where she served as Managing Editor of the "Michigan Journal of Race and Law" and earned her Bachelor of Arts degree in psychology with honors and cum laude from the University of Texas at El Paso, where she was named a Top Ten Senior.

Other Employees

As of June 30, 2023, the City had approximately 1861 full time equivalent employees, approximately 419 of which are represented by labor unions. The City believes that relations with its employees are good.

Retirement Plan

The City participates in a pension plan organized on a statewide basis and operated by the State of New Mexico. The Public Employees' Retirement Association of New Mexico (the Plan"), established by Chapter 167, Laws of 1947, New Mexico Statutes Annotated, 1978 Compilation, as amended, requires contributions, computed as a percentage of salary, from both employee and employer for all full-time employees. The majority of State and municipal employees in New Mexico participate in the Plan. The Plan requires contributions by the City and by employees at rates established by statute.

In addition to retirement benefits, the Plan provides disability benefits, surviving spouse and children's benefits, deferred benefits option and cost of living adjustments for all eligible participants. Employer contributions to the pension plan amounted to $10,795,053 for the fiscal year ended June 30, 2023. The City's liability under the Plan is limited to the periodic employer contributions, that it is required to make for its participating employees. Future deficits of the Plan are expected to be financed by the State.

On June 25, 2012, the Governmental Accounting Standards Board approved Statement No. 68 which requires governments providing defined benefit pensions to recognize their long-term obligation for pension benefits as a liability for the first time, and to more comprehensively and comparably measure the annual costs of pension benefits. Statement No. 68 requires cost-sharing employers, such as the City, to record a liability and expense equal to their proportionate share of the collective net pension liability and expense for the cost-sharing plan. Statement No. 68 was effective for fiscal years beginning after June 15, 2014.

The City offers other post-employment benefits through the Retiree Health Care Fund, a cost-sharing multiple employer defined benefit plan administered by the New Mexico Retiree Healthcare Authority. This plan is used to provide post-employment health insurance benefits for eligible employees and their dependents. The contribution requirements are established by and may be amended by the statute. The City's contribution to the fund for Fiscal Year 2023 was $1,800,812. For additional information regarding the post-employment benefit plan, please refer to Note 11 to the City's audited financial statements.

City Budgets

The City adheres to the following procedure in establishing its annual budget: the City Staff prepares a budget which is forwarded to the City Council prior to May 1 for the fiscal year commencing the following July 1; public input is sought by the City Council during the month of May through public hearings; the budget is approved by the City Council and forwarded for approval to the State of New Mexico, Local Government Division of the Department of Finance and Administration; the final budget is returned to the City with recommended changes and modifications; and the final budget is acknowledged by the City Council.

The operating budget includes proposed expenditures and the means of financing them.

The City Manager is authorized to transfer budgeted amounts that are within a designated organizational unit, are within the same fund and do not increase spending for any fund. The City Manager must obtain approval of the City Council and the State prior to making revisions that alter the total expenditures of any fund. As a management control device, the City employs formal budgetary integration at the line item level.

Deficit financing is not permitted under New Mexico law. The level of classification detail at which expenditure may not legally exceed appropriation for each budget item is the fund level (i.e., General, Water, Sewer, etc.).

City Strategic Plan

The City Council adopted a new strategic plan for 2021 through 2026. The strategic plan is a mid-term planning tool used by the City Council, City Management, and Staff to identify community priorities and budget accordingly.

The strategic plan is organized into six themes and related objectives:

- Community Prosperity
  - Expanded housing options for all income levels
  - Enhanced economic diversity and business strength
- Education and community services
  - Enhanced physical and mental resources
  - Improved access to healthy food options

- Environmental sustainability
    - Achieve the goals included in the climate action plan adopted in 2020
    - Promote balanced growth
- Capital improvements and infrastructure
    - Quality infrastructure that meets the community's needs
    - Expanded transit access and options, including pedestrian and bicycle improved road and pavement conditions
- Communication, involvement, and follow-up
    - Robust communication channels with residents between City departments
    - Timely and consistent follow-up by City staff to residents and the public
- Public safety
    - A more humane criminal justice system
    - A safe and secure community

Each theme in the strategic plan contains several goals for a total of 55 goals. The majority of these goals were developed during the two-year planning for Elevate Las Cruces, the City's comprehensive plan. In addition to these, the City Council identified nine council goals, also to be prioritized in the short-to-mid-term planning horizon. Performance measures were developed by staff during the update of department strategic business plans.

Industry

A combination of a well-educated labor force, favorable tax rates and a high quality of living has attracted industry to Las Cruces. The blend of industries contributing to the diversification of the City's economy include: TMC Design (DOD contractor); Pony Carburetor (manufacturer); White Sands Missile Range and Test Facility (U.S. Army, private industry testing facility), Mountain View Medical Center (hospital), NASA LBJ Test Facility (rocket testing), Sapphire Energy (alternative energy production); Wal-Mart (retail); Tresco, Inc. (sheltered employment); VMC (technical support/communication); Saputo Inc. (cheese manufacturer); and NMSU Physical Science Laboratory.

Education

The Las Cruces School District No. 2 (the "District") is the second largest in the State, with an enrollment of approximately 24,999 students. The district has 40 schools: 24 elementary schools (grades pre-K-5), one combined elementary and middle school (K-8), 8 middle schools (grades 6-8), 7 high schools (grades 9-12). Two of the seven high schools are early college high schools and are located on the campus of New Mexico State University. The District also has a virtual learning academy serving elementary through high school students.

New Mexico State University

New Mexico State University (the "University"), was originally founded in 1888, and in 1889 was established as a land grant college. The University consists of its main campus in the City, with branch campuses located in Alamogordo, Grants, Doña Ana and a satellite learning center in Albuquerque. As of September 1, 2023, the University had enrollment of approximately 21,797 students across all campuses, and its Las Cruces Campus had a Fall 2023 enrollment of approximately 14,779 undergraduate and graduate students. The University has 29 doctoral programs, 68 master's degree programs, and 97 undergraduate degree programs, 24 graduate certificate programs, and one education specialist program are available in the University's 6 colleges (Agriculture, Consumer and Environmental Sciences; Arts and Sciences;

Business; Engineering; Health, Education and Social Transformation; and Honors) and the Graduate School.

The University's main campus encompasses approximately 900 acres and consists of more than 211 academic, research, and auxiliary buildings, and over 400 housing buildings. As or September 15, 2023 the University employed 1604 faculty members (of which 1090 are located on the Las Cruces campus) and 2,783 staff (of which 2,394 are located on campus in Las Cruces). The University's largest single research operation is the Physical Science Laboratory. Research for engineering, space technology, and farm production and related industries are also conducted by various University departments. The University is classified as an R2 Doctoral/Research institution as rated by the Carnegie Foundation. The University anchors the southern end of New Mexico's Rio Grande Research Corridor. The statewide Water Resources Research Institute is situated at the University and studies the State's water supply and demands, conservation and use, as well as ecological and other aspects thereof.

The Doña Ana Community College, affiliated with the University and the area's occupational training school, offers approximately 6,849 students a variety of programs designed to train students for meaningful employment. The program is designed to be flexible and can be programmed to meet the specific training needs of employers.

Agriculture

Many private and commercial farms are located in Doña Ana County. Principal crops include cotton, pecans, alfalfa, onions, lettuce, chile, barley, nursery stock, and feed grains. Water for the various agricultural operations is provided by surface water diverted from the Rio Grande River and approximately 900 irrigation wells. The area's growing season averages about 200 days each year. The livestock, dairy cattle, Stahmann Pecan Farms (3,200 acres), and the poultry industry also provide a significant portion of agricultural income. Several chile processing plants are located in the area with seasonal employment growing to nearly 1,000.

Transportation

Historically a crossroads of the Southwest, Las Cruces is serviced by Interstate Highways I-10 (east-west) and I-25 (north-south). In addition, the City is served by five major U.S. highways and seven State highways. More than 20 interstate, regional, and local motor carriers serve Las Cruces; four of them operate terminals in the area.

Commuter air service and corporate and general aviation service is available at the City's international airport. Major scheduled airline service is provided by El Paso International Airport, approximately 50 miles from Las Cruces.

Daily rail service, with piggyback and container service, is provided by the Santa Fe and Southern Pacific railroads.

Labor Force and Percent Unemployed

The following table, derived from information supplied by the New Mexico Department of Workforce Solutions, presents information on employment within the Las Cruces MSA (Doña Ana County), the State and the United States, for the periods indicated. Unless otherwise noted, the annual unemployment figures indicate average rates for the entire year and do not reflect monthly or seasonal trends.

Employment Information

Year[1]	Las Cruces MSA (Doña Ana County) Labor Force	Las Cruces MSA (Doña Ana County) Percent Unemployed	State of New Mexico Labor Force	State of New Mexico Percent Unemployed	United States Percent Unemployed
2023[2]	102,529	4.10%	979,478	3.70%	3.70%
2022	99,532	4.40%	947,025	4.00%	3.61%
2021	98,170	6.60%	943,356	6.80%	5.40%
2020	97,153	8.30%	927,685	9.00%	8.90%
2019	99,907	5.20%	968,393	4.50%	4.10%
2018	96,769	5.70%	957,396	4.60%	3.50%
2017	94,943	6.20%	929,567	6.20%	4.40%
2016	95,001	7.20%	927,355	6.70%	4.90%
2015	93,179	7.40%	919,889	6.60%	5.30%

Effective Buying Income

The following table reflects the percentage of households by Effective Buying Income ("EBI") and a five-year comparison of the estimated median household income. EBI is personal income less personal tax and non-tax payments. Personal income includes wages and salaries, other labor income, proprietors' income, rental income, dividends, personal interest income, and transfer payments. Deductions are made for federal, state, and local taxes, non-tax payments such as fines and penalties, and personal contributions for social security insurance. The following chart depicts the median household EBI level for the Las Cruces MSA, the State of New Mexico and the United States.

Effective Buying Income Group	Las Cruces MSA	New Mexico	United States
Under $25,000	23.56%	21.01%	15.66%
$25,000 – 34,999	9.44%	8.87%	7.25%
$35,000 – 49,999	13.21%	12.16%	10.82%
$50,000 and over	18.40%	17.08%	15.83%
$75,000 and over	35.39%	40.88%	50.44%
2024 Est. Median Household Income	$54,591	$60,814	$75,781
2023 Est. Median Household Income	$46,147	$57,526	$73,336
2022 Est. Median Household Income	$45,534	$55,028	$72,191
2021 Est. Median Household Income	$38,109	$49,658	$67,086
2020 Est. Median Household Income	$39,705	$49,384	$65,228

TAX STATUS

General

In the opinion of Modrall, Sperling, Roehl, Harris & Sisk, P.A., Bond Counsel, to be delivered at the time of original issuance of the Series 2024 Bonds, based on existing laws of the State of New Mexico as enacted and construed, interest on the Bonds is excludable from net income for present State of New Mexico income tax purposes.

The Bonds are being issued as federally taxable under the Internal Revenue Code of 1986, as amended (the "Code").

CONTINUING DISCLOSURE INFORMATION

The City will enter into an undertaking (the "Undertaking"), in the form attached as Appendix D, for the benefit of the holders of the Bonds to provide (i) certain financial information by no later than March 31st of each year, beginning March 31, 2025 until the Bonds are no longer outstanding, and (ii) operating data, and to provide notice of certain events, pursuant to the requirements of section (b)(5)(i) of Rule 15c2-12 of the Securities and Exchange Commission (17 C.F.R. § 240.15c2-12). A failure by the City to provide any information required thereunder shall not constitute an Event of Default under the Master Ordinance. The City has previously entered into continuing disclosure undertakings (each a "Prior Undertaking" and collectively, the "Prior Undertakings") with respect to certain other obligations of the City in accordance with Section Rule 15c2-12 and, during the last five years, the City has complied in all material respects with those Prior Undertakings.

Compliance with Continuing Disclosure Undertakings in Future Years

The City intends to maintain compliance with its continuing disclosure undertakings in future years through the collective oversight and effort of current City finance staff and private consultants, all of whom have experience and knowledge related to the City's continuing disclosure obligations. Additionally, the City has Continuing Disclosure Procedures on file with the current City finance staff and the City's private consultants, which were adopted by the City Council on July 7, 2014.

LITIGATION

At the time of the original delivery of the Bonds, the City will deliver a no-litigation certificate to the effect that no litigation or administrative action or proceeding is pending or, to the knowledge of the appropriate City officials, threatened, restraining or enjoining, or seeking to restrain or enjoin, the issuance and delivery of the Bonds, effectiveness of the Bond Ordinance, or contesting or questioning the proceedings and authority under which the Bonds have been authorized and are to be issued, sold, executed or delivered, or the validity of the Bonds.

The City of Las Cruces is party to various legal proceedings seeking damages or injunctive relief and generally incidental to the operations of the City. In addition, the City is a defendant in several cases involving City Police Department action which, if determined unfavorably to the City, may involve significant damages or settlement. The litigation to which the City is a party is unrelated to and does not question the validity of the Bonds, the proceedings under which the Bonds are issued, nor the City's ability to levy and collect property taxes to pay the debt service on the Bonds. The City is self-insured with respect to all but one of the cases for which there is private insurance. Payment of any settlement or judgement may require the City to access funds in its unrestricted reserves. The ultimate disposition of such proceedings is not presently determinable. Given the current status of the cases, the nature of the claims in the cases, the uncertainty of monetary damages, if any, the amount of any loss through jury verdict or settlement is not reasonably subject to estimation at this time. The City continues to defend itself vigorously against the allegations.

RATINGS

Moody's Investors Service ("Moody's") has assigned a ____ rating to the Bonds. An explanation of the significance of the ratings given by Moody's may be obtained from Moody's at 7 World Trade Center at 250 Greenwich Street, New York, NY 10007 or https://www.moodys.com.

Such rating reflects only the view of Moody's, and there is no assurance that such ratings will continue for any given period of time after obtained or that such ratings will not be revised downward or withdrawn entirely by the rating agencies if, in their judgment, circumstances so warrant. Any such downward revision or withdrawal of such ratings may have an adverse effect on the market price of the Bonds. Neither the City nor the initial purchasers of the Bonds have undertaken any responsibility to bring to the attention of the owners of the Bonds any proposed change in or withdrawal of such ratings once received or to oppose any such proposed revision.

MUNICIPAL ADVISOR

RBC Capital Markets, LLC is employed as Municipal Advisor to the City in connection with the issuance of the Bonds. The Municipal Advisor's fee for services rendered with respect to the sale of the Bonds is contingent upon the issuance and delivery of the Bonds. RBC Capital Markets, LLC, in its capacity as Municipal Advisor, has relied on the opinion of Bond Counsel and does not assume any responsibility for the information, covenants and representations contained in any of the legal documents with respect to the federal income tax status of the Bonds, or the possible impact of any present, pending or future actions taken by any legislative or judicial bodies.

The Municipal Advisor to the City has provided the following sentence for inclusion in this Official Statement. The Municipal Advisor has reviewed the information in this Official Statement in accordance with, and as part of, its responsibilities to the City and, as applicable, to investors under the federal securities laws as applied to the facts and circumstances of this transaction, but the Municipal Advisor does not guarantee the accuracy or completeness of such information.

LEGAL MATTERS

The legality of the Bonds will be approved by Modrall, Sperling, Roehl, Harris & Sisk, P.A., Albuquerque, New Mexico, Bond Counsel, whose unqualified opinion approving the legality of the Bonds will be furnished at the closing.

TRANSCRIPT AND CLOSING DOCUMENTS

A complete transcript of proceedings and a no-litigation certificate (described above under "LITIGATION") will be delivered by the City when the Bonds are delivered. The City will at that time also provide a certificate relating to the accuracy and completeness of this Official Statement.

ADDITIONAL INFORMATION

All summaries of the statutes, resolutions, opinions, contracts, agreements, financial and statistical data and other related reports described in this Official Statement are subject to the actual provisions of such documents. The summaries do not purport to be complete statements of such provisions and reference is made to such documents, copies of which are either publicly available or available for inspection during normal business hours at the offices of the City located at 700 North Main, Las Cruces, New Mexico 88001 or at the offices of RBC Capital Markets, LLC, 6301 Uptown Boulevard, N.E., Suite 100, Albuquerque, New Mexico 87110.

OFFICIAL STATEMENT CERTIFICATION

As of the date hereof, this Official Statement is true to the best of my knowledge, complete and correct in all material respects, and does not include any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made herein, in light of the circumstances under which they are made, not misleading.

The preparation of this Official Statement and its distribution have been authorized by the City Council. The Official Statement is hereby duly approved by the City Council as of the date on the cover page hereof.

CITY OF LAS CRUCES, NEW MEXICO

By: _____
ERIC ENRIQUEZ, MAYOR

APPENDIX A

OPINION OF BOND COUNSEL

April __, 2024

City of Las Cruces
Las Cruces, New Mexico

$6,000,000
City of Las Cruces, New Mexico
Taxable General Obligation Improvement Bonds
Series 2024

Ladies and Gentlemen:

We have acted as bond counsel to the City of Las Cruces (the "City"), Dona Ana County, State of New Mexico (the "State"), in connection with the issuance and sale of its $6,000,000 Taxable General Obligation Improvement Bonds, Series 2024 (the "Bonds"), dated April __, 2024, with interest payable on August 1, 2024 and semi-annually thereafter on February 1 and August 1 in each year in which the Bonds are outstanding, being issued in registered form and maturing serially on August 1 in the years 2024 through 20__, inclusive. The Bonds are being issued pursuant to Ordinance No. 3062 by the City Council on March 4, 2024 as supplemented by the Award Certificate executed on March __, 2024 .

We have examined the transcript of proceedings (the "Transcript") relating to the issuance of the Bonds and the law under authority of which the Bonds are issued. Based on our examination, we are of the opinion that, under the law existing on the date of this opinion, subject to the provisions of federal bankruptcy law and other laws affecting creditors' rights and further subject to the exercise of judicial discretion in accordance with general principles of equity:

1. The Bonds constitute legal, valid and binding general obligation debt of the City and the principal of and interest on the Bonds, unless paid from other sources, are to be paid from the proceeds of the levy of ad valorem taxes on all property within the City subject to *ad valorem* taxes levied by the City, which taxes are unlimited as to rate or amount.

2. The Bonds and the income from the Bonds are exempt from all taxation by the State or any political subdivision of the State.

The opinions expressed herein are based upon existing laws as of the date of issuance and delivery of the Bonds. We express no opinion as of any date subsequent hereto, and our engagement with respect to the Bonds has concluded with their issuance. We disclaim any obligation to update this opinion.

The obligations of the City related to the Bonds are subject to the reasonable exercise in the future by the State and its governmental bodies of the police power inherent in the sovereignty of the State and to the exercise by the United States of the powers (including bankruptcy powers) delegated to it by the United States Constitution. The obligations of the City and the security provided therefor, as contained in the Bond Ordinance, may be subject to general principles of equity which permit the exercise of judicial discretion and are subject to the provisions of applicable bankruptcy, insolvency, reorganization, moratorium or similar laws relating to or affecting the enforcement of creditors' rights generally, now or hereafter in effect.

The foregoing opinions represent our legal judgment based upon a review of existing legal authorities that we deem relevant to render such opinions and are not a guarantee of result. We express no opinion with respect to any pending legislation.

We are passing upon only those matters set forth in this opinion and are not passing upon the accuracy or completeness of any statement made in connection with any sale of the Bonds or upon any tax consequences arising from the receipt or accrual or interest on, or the ownership of, the Bonds except those specifically addressed in paragraphs 2 above.

Respectfully submitted,

APPENDIX B

AUDITED FINANCIAL STATEMENTS – JUNE 30, 2023

The City has not requested the consent of Patillo, Brown & Hill, LLP, which performed the audit of the City's Financial Statements, to the inclusion of the audit report and excerpts thereof in this Official Statement, and the auditor has not conducted a post-audit review of those Financial Statements.

APPENDIX C

FORM OF CONTINUING DISCLOSURE UNDERTAKING

CONTINUING DISCLOSURE UNDERTAKING

Section 1. Recitals. This Continuing Disclosure Undertaking (the "Undertaking") is executed and delivered by the City of Las Cruces, New Mexico (the "City"), in connection with the issuance of the City of Las Cruces, New Mexico Taxable General Obligation Improvement Bonds, Series 2024 (the "Bonds"). The Bonds are being issued pursuant to Ordinance No. 3062 adopted by the City Council on March 4, 2024, as supplemented by the Award Certificate executed on March __, 2024 (collectively, the "Bond Ordinance"). Pursuant to the Bond Ordinance, to allow the owners of the Bonds to comply with the Rule (defined below), the City is required to make certain continuing disclosure undertakings for the benefit of owners (including beneficial owners) of the Bonds (the "Owners"). This Undertaking is intended to satisfy the requirements of the Rule.

Section 2. Definitions.

(a) "Annual Financial Information" means the financial information (which will be based on financial statements prepared in accordance with generally accepted accounting principles, as in effect from time to time ("GAAP"), for governmental units as prescribed by the Governmental Accounting Standards Board ("GASB")) and operating data with respect to the City, delivered at least annually pursuant to Sections 3(a) and 3(b) of this Undertaking, consisting of information of the type set forth under the captions "DEBT AND OTHER FINANCIAL OBLIGATIONS" and "FINANCES OF THE CITY" in the Official Statement.

(b) "Audited Financial Statements" means the City's annual financial statements which financial statements have been audited as may then be required or permitted by the laws of the State.

(c) "EMMA" means the MSRB's Electronic Municipal Market Access system located on its website at emma.msrb.org.

(d) "Event Information" means the information delivered pursuant to Section 3(d) of this Undertaking.

(e) "Financial Obligation" shall mean a (i) debt obligation; (ii) derivative instrument entered into in connection with, or pledged as security or a source of payment for, an existing or planned debt obligation, or (iii) guarantee of (i) or (ii). The term Financial Obligation shall not include municipal securities as to which a final official statement has been provided to the Municipal Securities Rulemaking Board in compliance with the Rule.

(f) "MSRB" means the Municipal Securities Rulemaking Board. The current address of the MSRB is 1900 Duke Street, Suite 600, Alexandria, Virginia 22314, telephone (703) 797-6600, fax (703) 797-6708.

(g) "Official Statement" means the Official Statement dated March __, 2024, delivered in connection with the original issue and sale of the Bonds.

(h) "Report Date" means March 31 of each year, beginning in 2025.

(i) "Rule" means Rule 15c2-12 promulgated by the SEC under the Securities Exchange Act of 1934, as amended (17 C.F.R. Part 240, Section 240.15c2-12), as the same may be amended from time to time.

(j) "SEC" means the Securities and Exchange Commission.

(k) "State" means the State of New Mexico.

Section 3. Provision of Annual Financial Information and Reporting of Event Information.

(a) The City, or its designated agent, will provide the Annual Financial Information for the preceding fiscal year to EMMA on or before each Report Date while the Bonds are outstanding.

(b) If Audited Financial Statements are not provided as a part of the Annual Financial Information, the City will provide Audited Financial Statements to EMMA when and if available.

(c) The City, or its designated agent, may provide Annual Financial Information by specific reference to other documents, including information reports and official statements relating to other debt issues of the City, which have been submitted to EMMA or filed with the SEC; provided, however, that if the document so referenced is a "final official statement" within the meaning of the Rule, such final official statement must also be available from the MSRB.

(d) At any time the Bonds are outstanding and the City obtains knowledge of the occurrence of any of the following events with respect to the Bonds, the City shall file, in a timely manner not in excess of ten (10) business days after the occurrence of the event, a notice of such occurrence with EMMA:

(i) principal and interest payment delinquencies;

(ii) non-payment related defaults, if material;

(iii) unscheduled draws on debt service reserves reflecting financial difficulties;

(iv) unscheduled draws on credit enhancements reflecting financial difficulties;

(v) substitution of credit or liquidity providers, or their failure to perform;

(vi) adverse tax opinions, the issuance by the Internal Revenue Service of proposed or final determinations of taxability, Notices of Proposed Issue (IRS Form 5701-TEB) or other material notices or determinations with respect to the tax status of the security, or other material events affecting the tax status of the security;

(vii) modifications to rights of Bondholders, if material;

(viii) bond calls, if material, or tender offers;

(ix) defeasances;

(x) release, substitution or sale of property securing repayment of the Bond, if material;

(xi) rating changes;

(xii) bankruptcy, insolvency, receivership or a similar event with respect to the City or an obligated person;

(xiii) the consummation of a merger, consolidation, or acquisition involving an obligated person or the sale of all or substantially all of the assets of the obligated person, other than in the ordinary course of business, the entry into a definitive agreement to undertake such an action or the termination of a definitive agreement relating to any such actions, other than pursuant to its terms, if material;

(xiv) appointment of a successor or additional trustee, or a change of name of a trustee, if material;

(xv) the incurrence of a financial obligation of the obligated person, if material, or agreement to covenants, events of default, remedies, priority rights, or other similar terms of a financial obligation of the obligated person, any of which affect security holders, if material; and

(xvi) a default, event of acceleration, termination event, modification of terms, or other similar events under the terms of a financial obligation of the obligated person, any of which reflect financial difficulties.

(e) The City or its designated agent, will provide, in a timely manner not in excess of ten (10) business days after the occurrence of the event, to EMMA, notice of any: (i) failure of the City to timely provide the Annual Financial Information and Audited Financial Statements as specified in Sections 3(a) and 3(b); (ii) changes in its fiscal year-end; and (iii) amendment of this Undertaking.

Section 4. Method of Transmission. Unless otherwise required by law and subject to technical and economic feasibility, the City, or its designated agent, will employ such methods of electronic or physical information transmission as is requested or recommended from time to time by EMMA, the MSRB and the SEC.

Section 5. Enforcement. The obligations of the City under this Undertaking are for the benefit of the Owners. Each Owner is authorized to take action to seek specific performance by court order to compel the City to comply with its obligations under this Undertaking, which action will be the exclusive remedy available to it or any other Owner. The City's breach of its obligations under this Undertaking will not constitute an event of default under the Bond Ordinance and none of the rights and remedies provided by the Bond Ordinance will be available to the Owners with respect to such a breach.

Section 6. Term. The City's obligations under this Undertaking will be in effect from and after the issuance and delivery of the Bonds and will extend to the earliest of (i) the date all principal and interest on the Bonds has been paid or legally defeased pursuant to the terms of the Ordinance; (ii) the date on which the City is no longer an "obligated person" with respect to the Bonds within the meaning of the Rule; or (iii) the date on which those portions of the Rule which require this Undertaking are determined to be invalid or unenforceable by a court of competent jurisdiction in a non-appealable action, have been repealed retroactively or otherwise do not apply to the Bonds. The City shall file a notice of any such termination with EMMA.

Section 7. Amendments. The City may amend this Undertaking from time to time, without the consent of any Owner, upon the City's receipt of an opinion of independent counsel experienced in federal securities laws to the effect that such amendment:

(a) is made in connection with a change in circumstances that arises from a change in legal requirements, a change in law, a change in the identity, nature or status of the City or a change in the availability or character of financial information for the City;

(b) this Undertaking, as amended, would have complied with the Rule at the time of the initial issue and sale of the Bonds, after taking into account any amendments or interpretations of the Rule, as well as any changes in circumstances; and

(c) the amendment does not materially impair the interests of the Owners.

Any Annual Financial Information containing amended operating data or financial information will explain, in narrative form, the reasons for the amendment and the impact of the change in the type of operating data or financial information being provided. If an amendment changes the accounting principles to be followed in preparing financial statements, the Annual Financial Information and Audited Financial Statements for the year in which the change is made will present a comparison between the financial statements or information prepared on the basis of the new accounting principles and those prepared on the basis of the former accounting principles.

Section 8. Beneficiaries. This Undertaking binds and inures to the sole benefit of the City and the Owners and creates no rights in any other person or entity.

Section 9. Limited Obligation. This Undertaking is subject to the availability of necessary funds appropriated by the City.

Section 10. Governing Law. This Undertaking is governed by and is to be construed in accordance with the law of the State.

Date: April __, 2024.

APPENDIX D

OFFICIAL NOTICE OF BOND SALE

$6,000,000
City of Las Cruces, New Mexico
Taxable General Obligation Improvement Bonds
Series 2024

PUBLIC NOTICE IS HEREBY GIVEN that electronic bids will be received by the City Council (the "Council") of the City of Las Cruces, New Mexico (the "City"), for the purchase of all of the City's Taxable General Obligation Bonds, Series 2024 (the "2024 Bonds"), more particularly described below. The 2024 Bonds will be awarded to the winning bidder for the 2024 Bonds by 5:00 p.m., prevailing Mountain Time, March 14, 2024. The City Manager or City Financial Services Director will take action to award the Bonds and certify in writing that the final terms comply with the parameters and conditions established in the Bond Ordinance adopted by the City Council on March 4, 2024.

Bids for the purchase of the 2024 Bonds will be accepted through the Ipreo BiDCOMP/Parity electronic bidding web site. No other method of submitting bids will be accepted. The date and time for submitting bids will be as follows:

Bid Date: March 14, 2024
Bid Time: Between 10:30 a.m. and 11:00 a.m. Eastern Time
(Between 8:30 a.m. and 9:00 a.m. Mountain Time)
Submit Bid to: www.munis.ipreo.com

Information related to this auction can be obtained from Ipreo's BiDCOMP/Parity Auction Support at BIDCOMP/PARITY, 1359 Broadway, 2nd Floor, New York, New York 10018, i-Deal Prospectus: (212) 849-5024 or (212) 849-5025; BidComp/Parity: (212) 849-5021.

To bid, bidders must have both (1) completed the registration form on the Ipreo BiDCOMP/Parity electronic bidding website and (2) requested and received admission to the City's auction, as described under "TERMS OF SALE - Submission of Bids" below. The use of Ipreo BiDCOMP/Parity electronic bidding platform shall be at the bidder's risk and expense, and the City shall have no liability with respect thereto.

Neither the City, Ipreo BiDCOMP/Parity , the Municipal Advisor, nor Bond Counsel shall be responsible for, and each bidder expressly assumes the risk of, any incomplete, inaccurate, or untimely bid submitted by Internet transmission by such bidder, including, without limitation, by reason of garbled transmissions, mechanical failure, engaged telephone or telecommunications lines, or any other cause arising from delivery by Internet transmission. Additionally, the Ipreo BiDCOMP/Parity time stamp will govern the receipt of all bids. The official bid clock does not automatically refresh. Bidders must refresh the auction page periodically to monitor the progression of the bid clock and to ensure that their

bid will be submitted prior to the termination of the auction. All bids will be deemed to incorporate the provisions of this Official Notice of Bond Sale.

This Official Notice of Bond Sale, and the information set forth herein, are not to be treated as a complete disclosure of all relevant information with respect to the 2024 Bonds. The information set forth herein is subject, in all respects, to a more complete description of the 2024 Bonds and the security therefore set forth in the Preliminary Official Statement dated March 7, 2024 (the "Preliminary Official Statement").

BOND DETAILS

The 2024 Bonds will be issued in the aggregate principal amount of $6,000,000, exclusive of premium, if any. The 2024 Bonds and the interest thereon are general obligations of the City. The City has prepared the Preliminary Official Statement, relating to the 2024 Bonds which is deemed by the City to be final as of its date for purposes of allowing bidders to comply with Rule 15c2-12 of the Securities Exchange Commission ("the Rule"), except for the omission of certain information as permitted by the Rule. Details of the 2024 Bonds, including maturities, redemption provisions, payment dates and security for payment are contained in the Preliminary Official Statement. The Preliminary Official Statement is subject to revision, amendment and completion in a Final Official Statement.

The 2024 Bonds will be issued in the aggregate principal amount of $6,000,000, will be dated the date of delivery, will be issued as fully registered bonds and will mature on August 1 of each year as follows:

Years Maturing*	Amounts Maturing*
2024	$1,~~850~~650,000
2025	-1,400,000
2026	~~275~~300,000
2027	~~275~~300,000
2028	~~275~~300,000
2029	~~275~~300,000
2030	~~275~~300,000
2031	~~275~~300,000
2032	~~275~~300,000
2033	~~275~~300,000
2034	~~275~~300,000
2035	~~275~~250,000

*Subject to Change

The Bonds will be fully registered bonds in the denomination of $5,000 each, or any integral multiple thereof. Interest will be payable on August 1, 2024 and semiannually thereafter on February 1 and August 1 of each year.

Optional Redemption: The Bonds maturing on and after August 1, 2033 may be redeemed prior to their scheduled maturities on August 1, 2032, or on any date thereafter, in whole or in part, at the option of the City at par plus accrued interest to the date of redemption, if any.

Official Statement. The Preliminary Official Statement may be viewed and downloaded from in electronic format at www.fmhub.com (MuniHub) and at www.i-dealprospectus.com or a physical copy may be obtained by contacting the City or the Municipal Advisor, see "Information" below.

The City will make available to the winning bidder, within seven business days after the award of the sale of the 2024 Bonds, the Final Official Statement which is to be downloaded from www.fmhub.com (MuniHub). One printed copy of the Final Official Statement also will be provided to the winning bidder upon request; provided, however, the winning bidder must cooperate in providing the information required to complete the Final Official Statement. Additional copies of the Final Official Statement may be provided at the expense of the winning bidder.

The winning bidder shall comply with the requirements of Rule 15c2-12 and the rules of the Municipal Securities Rulemaking Board.

TERMS OF SALE

Submission of Bids. All bids must be submitted only by electronic bidding through the facilities of Ipreo BiDCOMP/Parity. No other provider of bidding services and no other means of delivery (i.e. telephone, telefax or physical delivery) will be accepted. Bidding for the 2024 Bonds will begin at 10:30 a.m., Eastern Time (8:30 a.m. Mountain Time), as indicated above. The receipt of bids will end promptly at 11:00 a.m., Eastern Time (9:00 a.m. Mountain Time).

To bid, bidders must first visit the Ipreo BiDCOMP/Parity website where, if they have never registered with Ipreo BiDCOMP/Parity , they can register and then request admission to bid on the 2024 Bonds. Subscription to i-Deal's BIDCOMP PARITY Competitive Bidding System is required in order to submit an electronic bid. The City will neither confirm any subscription nor be responsible for the failure of any prospective bidder to subscribe. Only NASD registered broker-dealers and dealer banks with DTC clearing arrangements will be eligible to bid. Bidders who have previously registered with Ipreo BiDCOMP/PARITY may call **(212) 849-5021**, for support with accessing the site.

An electronic bid made through the facilities of PARITY shall be deemed an irrevocable offer to purchase the Bonds on the terms provided in this Official Notice of Bond Sale ("Notice"), and shall be binding upon the bidder. The City and the City's financial and bond advisors shall not be responsible for any malfunction or mistake made by or as a result of the use of the facilities of PARITY, the use of such facilities being the sole risk of the prospective bidder.

If any provisions of this Notice conflict with information provided by PARITY, as the approved provider of electronic bidding services, this Notice shall control. Further information about PARITY, including any fee charged, may be obtained from BIDCOMP/PARITY, 1359

Broadway, 2nd Floor, New York, New York 10018, i-Deal Prospectus: (212) 849-5024 or (212) 849-5025; BidComp/Parity: (212) 849-5021.

For information purposes only, bidders are requested to state in their electronic bids the true interest cost to the Board, as described under "BASIS OF AWARD" below. All electronic bids shall be deemed to incorporate the provisions of this Notice and the Official Bid Form.

For purposes of bids received through the electronic bidding process, the time as maintained by PARITY shall constitute the official time.

Bidding Parameters. Bidders are required to submit unconditional all-or-none bids specifying the rate of interest at which the bidder will purchase all of the 2024 Bonds. Interest shall be bid in multiples of $1/20^{th}$ or $1/8^{th}$ percentum and only one interest rate may be bid for each maturity of the 2024 Bonds. The maximum interest rate may not exceed 6% for any maturity and the maximum interest rate specified for any maturity of the 2024 Bonds may not exceed the minimum interest rate specified for any maturity of the 2024 Bonds by more than three percent (3%). The maximum net effective interest rate of the 2024 Bonds shall not exceed ten percent (10%) per annum. The 2024 Bonds will not be sold for less than par. The Underwriter's Discount on the 2024 Bonds shall not exceed 4% of the par amount of the 2024 Bonds.

The Bonds will not be sold for less than 100% of par.

Bidders are required to submit a bid specifying the lowest rate or rates of interest and premium, if any, at which such bidder will purchase the Bonds. For informational purposes only, each bidder is requested to specify: (a) the method of payment of the good faith deposit, (b) the True Interest Cost on the Bonds stated as a nominal annual percentage rate (see "BASIS OF AWARD" below), (c) gross interest cost, (d) premium, if any, and (e) net interest cost. Only unconditional bids shall be considered. Bids should be submitted as an electronic bid using the facilities of PARITY. No other method of submitting bids will be accepted (see "FURTHER INFORMATION" below).

Term Bonds. A bidder may elect to have all or a portion of the 2024 Bonds scheduled to mature in consecutive years issued as one or more term bonds (the "Term Bonds") scheduled to mature in the latest of the consecutive years and subject to mandatory redemption requirements consistent with the schedule of serial maturities set forth in the Preliminary Official Statement, however, not less than all Bonds of the same serial maturity shall be converted to Term Bonds with mandatory redemption requirements.

Adjustment of principal amounts, modification or clarification prior to examination of bids. The City Financial Services Director, in consultation with the City's financial and bond advisors, in the City Financial Services Director's sole discretion and prior to the examination of bids, may (i) adjust the aggregate principal amount set forth herein or may adjust the principal amount of each series without increasing the aggregate principal amount of Bonds; (ii) adjust individual maturities, and/or (iii) modify or clarify any other term hereof, including the date on which bids for the 2024 Bonds will be received, by issuing a notification of the adjusted series,

amounts, modification or clarification via Thomson Municipal News ("TM3") and/or Bloomberg Financial Services no later than 8:00 a.m., Mountain Time, on the Bid Date.

Adjustments to principal amounts after determination of best bid. The aggregate principal amount of the 2024 Bonds is subject to increase or reduction, and each scheduled maturity thereof is subject to increase or reduction, by the City Financial Services Director after the determination of the Best Bid (defined below). Such adjustments will be made within no more than two (2) hours after the end of the time of bid examination and will be in the sole discretion of the City. To cooperate with any adjustment in the principal amounts, the Purchaser is required to indicate by e-mail to Leeann DeMouche at ldeMouche@lascruces.gov or such other address as may be indicated by the City Financial Services Director within one-half (1/2) hour after the end of the time of bid examination, the amount of any original issue discount or premium on any maturity of the 2024 Bonds, the initial offering price of each maturity, the cost of bond insurance, if any, and the amount received from the sale of the 2024 Bonds to the public that will be retained by the Purchaser as its compensation.

The City Financial Services Director in consultation with the City's financial and bond advisors, may change the dollar amount bid by the Purchaser if the aggregate principal amount of the 2024 Bonds is adjusted as described below, but the interest rates specified by the Purchaser for all maturities will not change. The City Manager in consultation with the City's financial and bond advisors, will make every effort to ensure that the percentage net compensation to the Purchaser (i.e., the percentage resulting from dividing (i) the aggregate difference between the offering price of the 2024 Bonds to the public and the price to be paid to the City, less any bond insurance premium to be paid by the bidder, by (ii) the principal amount of the 2024 Bonds) does not increase or decrease from what it would have been if no adjustment was made to principal amounts shown in the maturity schedule. The City will notify the Purchaser of the final principal amounts and the resulting adjusted prices no later than 12:00 p.m. Mountain Time on the day of the sale and award of the 2024 Bonds. THE PURCHASER MAY NOT WITHDRAW OR MODIFY ITS BID ONCE SUBMITTED TO THE CITY FOR ANY REASON, INCLUDING, WITHOUT LIMITATION, AS A RESULT OF ANY INCREASE OR DECREASE IN THE FINAL PRINCIPAL AMOUNTS AND THE AGGREGATE PURCHASE PRICE OF THE 2024 Bonds.

Information Regarding Bids. Bidders may change and submit bids as many times as they wish during the bidding ~~period.~~, provided, however, that each bid submitted subsequent to a bidder's initial bid must result in a lower true interest cost ("TIC") with respect to a bid when compared to the immediately preceding bid of such bidder. During the bidding, no bidder will see any other bidder's bid, but each bidder will be able to see its own ranking (*i.e.*, "Leader," "Cover," "3rd," etc.).

Bids Constitute an Irrevocable Offer. Each bid submitted through Ipreo BiDCOMP/PARITY electronic bidding system shall be deemed an irrevocable offer to purchase the 2024 Bonds on the terms provided in this Official Notice of Bond Sale and shall be binding upon the bidder.

Basis of Award. The 2024 Bonds will be sold to the bidder or bidders offering to purchase the same at the lowest true interest cost. The actuarial yield on the 2024 Bonds using the true interest cost method will be computed at that yield which, if used to compute the present value of all payments of principal and interest on the 2024 Bonds as of April 11, 2024, produces an amount equal to the aggregate bid price. Such calculation will be made based upon a 360-day year and a semiannual interval for compounding. "True Interest Cost" of the Bonds, as used herein, means that yield, which if used to compute the present worth, as of the date of the Bonds, of all payments of principal and interest to be made on the Bonds, from their date to their respective maturity dates, as specified in the maturity schedule and without regard to the possible optional prior redemption with respect to the Bonds, using the interest rates specified in the bid, produces an amount equal to the principal amount of the Bonds plus any premium bid. No adjustment shall be made in such calculation for accrued interest on the Bonds from their date to the date of delivery thereof. Such calculation shall be based on a 360-day year consisting of twelve thirty day months and a semiannual compounding interval. The purchaser must pay accrued interest from the date of the Bonds to the date of delivery. **The Bonds will not be sold for less than par plus accrued interest.** The City reserves the right to waive any irregularity or informality in any bid, except time of filing.

The winning bid or bids will be indicated on Ipreo BiDCOMP/PARITY and the auction results, as posted on such website, will be subject to verification by the City. The City will verify the auction results immediately following the close of the bidding period and notice of confirmation by the City of the winning bidder or bidders will be made by a posting on Ipreo BiDCOMP/PARITY stating "Auction Results Verified and Confirmed".

An award may be made by the City to any bidder in a principal amount less than the principal amount of the 2024 Bonds for which the bid is submitted. Further, in the event of an award by the City for a principal amount less than the principal amount the bidder submitted, any premium bid shall be ratably reduced. If two or more bids have the same true interest cost, the first bid submitted, as determined by reference to the time stamp displayed on Ipreo BiDCOMP/PARITY, shall be deemed to be the leading bid.

Sale Reservations. The City reserves the right (a) to reject any and all bids for any Bonds, (b) to reoffer any Bonds for public sale, and (c) to waive any irregularity or informality in any bid.

Good Faith Deposit Not Required to Bid. A good faith deposit will not be required in connection with the submission of any bid for the 2024 Bonds. The winning bidder will be required to submit a Bid Award Deposit (see "Bid Award Deposit" below).

Bid Award Deposit. Not later than 2:00 p.m., Mountain Time on March 14, 2024, the winning bidder is required to submit a Bid Award Deposit of $120,000.00. All Bid Award Deposits must be made in good funds by wire transfer of the required amount to an account specified by the City Manager and provided to the winning bidder after the sale of the 2024 Bonds.

No interest will be paid by the City on the amount of the Bid Award Deposit. The proceeds of the Bid Award Deposit of the winning bidder will be applied to the purchase price of the 2024 Bonds, or in the event of the failure of a winning bidder to take up and pay for the 2024 Bonds in

compliance with the terms of the bid, at the option of the City, its Bid Award Deposit may be retained as liquidated damages, as partial payment of actual damages or as security for any other remedy available to the City.

Time of Award and Delivery. The City Manager or City Financial Services Director will take action awarding the Bonds or rejecting all bids not later than 24 hours after the expiration of the time herein prescribed for the receipt of the bids. Delivery of the Bonds will be made to the successful bidder through the facilities of The Depository Trust Company, New York, New York, within 60 days of the acceptance of the bid. If for any reason delivery can0not be made within 60 days, the successful bidder shall have the right to purchase the Bonds during the succeeding 30 days upon the same terms, or at the request of the successful bidder, during said succeeding 30 days, the good faith deposit will be returned, and such bidder shall be relieved of any further obligation. It is anticipated that the delivery of the Bonds will be on or about April 11, 2024.

Manner and Time of Delivery. The 2024 Bonds will be delivered to DTC for the account of the winning bidder or bidders at the expense of the City on April 11, 2024, or such later date as the City and the winning bidder may agree. Payment of the purchase price due at delivery must be made in Federal Reserve funds for immediate and unconditional credit to the City.

Continuing Disclosure Undertaking. The City has covenanted to provide, in a timely manner, on the Electronic Municipal Market Access (EMMA) Website maintained by the Municipal Securities Rulemaking Board notice of the occurrence of specified, material events. The City has not failed to comply with any of its previous undertakings under Rule 15c2-12, except as may be disclosed in the Preliminary Official Statement.

State Securities Laws. The City has taken no action to qualify the offer or sale of the 2024 Bonds under the securities laws of any state. Should any such qualification be necessary, the City agrees to cooperate with the winning bidder in such matters, provided that the City reserves the right not to consent to service of process outside its boundaries and expenses related to any such qualification shall be the responsibility of the winning bidder. By submitting a bid, the initial purchaser represents that the sale of the Bonds in states other than New Mexico will be made only under exemptions from registration, or, wherever necessary, the initial purchaser will register the Bonds in accordance with the securities laws of the state in which the Bonds are offered or sold.

CUSIP Numbers. CUSIP numbers will be issued and printed on the 2024 Bonds at the expense of the City. The City's Municipal Advisor will apply for CUSIP numbers prior to the sale date of the 2024 Bonds. Any error or omission in printing such numbers on the 2024 Bonds will not constitute cause for any winning bidder to refuse delivery of any Bond.

Legal Opinion, Certificates and Transcript. The validity and enforceability of the 2024 Bonds will be approved by the City's Bond Counsel. A copy of the form of the opinion of Bond Counsel is attached as an exhibit to the Preliminary Official Statement.

The purchaser of the 2024 Bonds will receive a certified transcript of legal proceedings which will include, among other items:

(a) a certificate of the City to the effect that, as of its date, the Preliminary Official Statement was deemed final within the meaning of Rule 15c2-12, except for the omissions permitted under Rule 15c2-12;

(b) a certificate of the City to the effect that there is no litigation pending or, to its knowledge, threatened affecting the validity of the 2024 Bonds as of the date of their delivery; and

(c) a certificate of the City to the effect that, as of the date of the Official Statement and at all times to and including the date of delivery of the 2024 Bonds, the Official Statement did not contain any untrue statement of a material fact or omit any statement of a material fact necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading.

Postponement of Sale. The City reserves the right to postpone the date and time established for the receipt of bids. Any such postponement will be announced by posting on Ipreo BiDCOMP/PARITY prior to commencement of the bidding. If any date and time fixed for the receipt of bids and the sale of the 2024 Bonds is postponed, an alternative sale date and time will be announced at least one business day prior to such alternative sale date. On any such alternative sale date and time, any bidder may submit bids electronically as described above for the purchase of the 2024 Bonds in conformity in all respects with the provision of this Official Notice of Bond Sale, except for the date and time of sale and except for any changes announced by posting on Ipreo BiDCOMP/PARITY at the time the sale date and time are announced.

Ratings. A rating of "___" has been received by Moody's Investors Service.

Information. Copies (in reasonable quantities) of this Official Notice of Bond Sale, the Preliminary Official Statement, and other information concerning the City and the 2024 Bonds may be obtained from:

Title: **A RESOLUTION AUTHORIZING A CONTRACT FOR ONLINE MARKETPLACE PURCHASES WITH AMAZON.COM SERVICES, LLC OF SEATTLE, WASHINGTON, VIA OMNIA PARTNERS / PRINCE WILLIAM COUNTY PUBLIC SCHOOLS CONTRACT NO. R-TC-17006, FOR A TERM THROUGH JANUARY 18, 2028, IN AN AMOUNT NOT TO EXCEED $500,000.00 ANNUALLY, SUBJECT TO APPROVED BUDGET APPROPRIATIONS (PROCUREMENT NO. 23-24-091).**

TYPE OF ACTION: ☒ **Administrative** ☐ **Legislative** ☐ **Quasi-Judicial**

PURPOSE(S) OF ACTION:
To authorize a contract purchase agreement.

BACKGROUND / KEY ISSUES / CONTRIBUTING FACTORS:
The City of Las Cruces (City) procures office supplies for its staff across all departments to support the City's daily operations. Each department allocates a budget for its office supply requirements as part of the annual budgeting process. The total amounts are combined to determine the contract amount needed for the year.

Amazon offers Business Prime, an exclusive Amazon Business membership program designed specifically for businesses. It provides a range of unique features and benefits tailored to work-related needs. Additionally, eligible items qualify for fast and free business shipping, saving the City an average of $9,000.00 annually on shipping costs.

The Purchasing program is requesting authorization to contract with Amazon.com Services, LLC, of Seattle, Washington via Omnia Partners / Prince William County Public Schools No. R-TC-17006 for a term through January 8, 2028, in an amount not to exceed $500,000.00 annually, subject to approved budget appropriations.

BUDGET / FISCAL IMPACT:

BUDGETED AMOUNT: **AVAILABLE AMOUNT:** **EXPENDITURE AMOUNT:**

Funding Source(s):
Various

Overall Budget Impact:
Individual department purchase order requests will be dependent upon available budgeted amounts and funds approved through the annual budget process.

Does this action amend the Capital Improvement Plan (CIP)?

☐ Yes

☒ No

Does this action align with Elevate Las Cruces?

☐ Yes

☒ No

OPTIONS / ALTERNATIVES:

1. Vote "Yes"; this will approve the Resolution authorizing a contract for online marketplace purchases with Amazon.com Services, LLC of Seattle, Washington in an annual amount not to exceed $500,000.00, subject to approved budget appropriations.
2. Vote "No"; this will not approve the Resolution, and City Council will need to provide staff with alternative direction.
3. Vote to "Amend"; this could modify the Resolution based on direction from City Council to staff.
4. Vote to "Table"; this could delay the agreement for online marketplace purchases, which could negatively affect City operations.

RESOLUTION 24-119

A RESOLUTION AUTHORIZING A CONTRACT FOR ONLINE MARKETPLACE PURCHASES WITH AMAZON.COM SERVICES, LLC OF SEATTLE, WASHINGTON, VIA OMNIA PARTNERS / PRINCE WILLIAM COUNTY PUBLIC SCHOOLS CONTRACT NO. R-TC-17006, FOR A TERM THROUGH JANUARY 18, 2028, IN AN AMOUNT NOT TO EXCEED $500,000.00 ANNUALLY, SUBJECT TO APPROVED BUDGET APPROPRIATIONS (PROCUREMENT NO. 23-24-091).

The City Council is informed that:

WHEREAS, the City of Las Cruces (City) procures office supplies for its staff across all departments to support the City's daily operations, and each department allocates a budget for its office supply requirements as part of the annual budgeting process; and

WHEREAS, Amazon.com Services, LLC, of Seattle, Washington, offers Business Prime, a membership program providing fast and free shipping on eligible items, saving the City an average of $9,000 annually on shipping costs; and

WHEREAS, Amazon Business Prime purchases are available through the Omnia Partners / Prince William County Public Schools contract no. R-TC-17006 for a potential term through January 8, 2028; and

WHEREAS, the Purchasing program is requesting authorization to contract with Amazon.com Services, LLC via the Omnia Partners contract.

NOW, THEREFORE, Be it Resolved by the Governing Body of the City of Las Cruces:

(I)

THAT the Resolution authorizes the City to contract with Amazon.com Services, LLC, of Seattle, Washington for online marketplace purchases in an amount not to exceed $500,000.00 annually, subject to approved budget appropriations, via Omnia Partners / Prince William County Public Schools contract no. R-TC-17006, as outlined in Exhibit "A" attached hereto and made part of this Resolution, is hereby approved.

(II)

THAT City staff is hereby authorized to do all deeds as necessary in the accomplishment of the herein above.

DONE AND APPROVED this day of

CONTRACT MODIFICATION

MODIFICATION #5 **ISSUE DATE: October 19, 2018**

REFERENCE: Title: On-Line Marketplace for the Purchase of Goods and Services
Contractor: Amazon Services LLC
Period of Contract: January 18, 2017 through January 18, 2022

Modify the above referenced contract as follows:

1. Special Provision 10.7, which was added to the parties' contract via Contract Modification # 1, dated November 17, 2017, is hereby deleted and replaced with the following:

10.7. ADDITION OF BUSINESS PRIME. Contractor's Business Prime Program (currently described here) is hereby added to the Contract. PWCS' access and use of the Business Prime Program will be pursuant to the Business Prime Program's terms and conditions (currently available here). If PWCS chooses not to move forward with a paid Business Prime program, PWCS will be eligible to receive free standard shipping on eligible orders to the extent made available to Amazon Business customers (currently available for eligible purchases over $25 as described here).

Except for the changes provided herein, all other terms and conditions of this contract remain unchanged and in full force and effect.

CONTRACT MODIFICATION

MODIFICATION #3 **ISSUE DATE: March 7, 2018**

REFERENCE:

Title:	On-Line Marketplace for the Purchase of Goods and Services
Contractor:	Amazon Services LLC
Period of Contract:	January 18, 2017 through January 18, 2022

Modify the above referenced contract as follows:

1. Add the following to the General Terms and Conditions under 3. Debarment Status:

3.1. Debarment and Suspension (Executive Orders 12549 and 12689)—A contract award (see 2 CFR 180.220) must not be made to parties listed on the governmentwide Excluded Parties List System in the System for Award Management (SAM), in accordance with the OMB guidelines at 2 CFR 180 that implement Executive Orders 12549 (3 CFR Part 1986 Comp., p. 189) and 12689 (3 CFR Part 1989 Comp., p. 235), ‘‘Debarment and Suspension.’’ The Excluded Parties List System in SAM contains the names of parties debarred, suspended, or otherwise excluded by agencies, as well as parties declared ineligible under statutory or regulatory authority other than Executive Order 12549.

Except for the changes provided herein, all other terms and conditions of this contract remain unchanged and in full force and effect.

Amazon Business Accounts Terms & Conditions

Last updated November 15, 2017

These terms and conditions ("**Terms**") govern your access to and use of a set of features, services, and functionality on Amazon.com for registered business customers to purchase products and use services for business purposes ("**Amazon Business**"). These Terms constitute an agreement between Amazon Services LLC and/or its affiliates ("**Amazon**," "**we**," "**us**," or "**our**") and the entity you represent ("**you**"). Please note that your use of Amazon Business is also governed by Amazon's Conditions of Use and the Amazon.com Privacy Notice, as well as all other applicable terms, conditions, policies, limitations, and requirements on the Amazon.com website, all of which (as changed over time) are incorporated into these Terms. Capitalized terms have the meanings given to them in these Terms or the Conditions of Use.

1. REGISTRATION

An organization has a Business Account with Amazon once an individual associated with the organization registers the business and creates the first business user account associated with that organization. That individual can invite others to be part of the organization's Business Account. Each additional user that purchases or otherwise acts on behalf of the business and joins the organization's Business Account must create a new business user account that is part of and associated with the organization's Business Account. Business Accounts and business user accounts are intended for businesses and business-related organizations and may be used solely for business purposes. To create a business user account, users must use a valid email address. Unless explicitly permitted, a user may only create one account per email address. If a user creates a business user account using the email address and password connected to an existing Amazon customer account, the user must either (a) change the email address and password associated with the existing account, or (b) if the user wishes to have only one account, convert the existing account into a business user account (which may make business user account information visible to others as described in Section 2). Once you complete the Business Account registration and verification process, your organization will be registered with Amazon.

2. ACCOUNT MANAGEMENT

You are responsible for all activities that occur under your organization's Business Account and any associated business user accounts, regardless of whether the activities are undertaken by you, your employees or a third party (including your contractors or agents). Except to the extent caused by our breach of these Terms, we and our affiliates are not responsible for unauthorized access to your Business Account or business user accounts. You are solely responsible for maintaining the security of your password. You may not disclose your password to any third party (other than third parties authorized by you to use your Business Account or associated business user accounts in accordance with these Terms) and are solely responsible for any use or action taken under your password. You will contact us immediately if you believe an unauthorized third party may be using your Business Account or associated business user accounts or if your Business Account or any business user

account information is lost or stolen. You are responsible for ensuring that all users affiliated with your organization's Business Account are aware of and comply with these Terms.

We may give users the ability to invite other individuals affiliated with your organization to create business user accounts that are associated with the organization's Business Account and purchase, approve or act as an administrator on behalf of your organization. Administrators have the ability to invite other users to join the Business Account and to administer, manage, or close business user accounts. You will be responsible for all actions taken by Business Account users. You acknowledge that users may have access to information from your Business Account and associated business user accounts, such as shipping addresses, payment methods, and order history. Administrators are responsible for inviting only people affiliated with, and authorized to act on behalf of, your organization to create a business user account that is associated with your organization's Business Account. Any user designated as an administrator will have similar capabilities to manage Business Account features and invite new users to purchase, approve or act as an administrator on behalf of your organization. You agree that Amazon is not responsible for, and will have no liability arising from, the disclosure of the information of your organization or any associated business user accounts to any user associated with your organization.

If any user with a business user account that is associated with your Business Account leaves your organization or is no longer authorized to purchase, approve or otherwise act on behalf of your organization, you are solely responsible for contacting Amazon through tools we designate to have that user's business user account closed, disabled or removed from the organization's Business Account. Amazon disclaims all liability for, and you are solely responsible for, any actions taken or purchases made prior to closing, disabling or removing the user's business user account from the organization's Business Account. Please review our Amazon Business Help carefully for more information on the effects of disabling or removing a business user account from your organization's Business Account. Please note that a business user account that is removed is converted back into a personal account, with the individual able to access order history for purchases made using an individual payment method while associated with the organization's Business Account.

If you, as an individual user, create a business user account that is associated with an organization's Business Account, you acknowledge and consent that your organization and designated individuals acting as administrators have full access to and authority over (a) your business user account (with the ability to close or disable your business user account or remove it from the business and convert it into a personal account), and (b) details from your business user account, such as, and not limited to: order history, addresses, payment details, and other personal information associated with your business user account. By creating a business user account that is associated with an organization's Business Account, you, as an individual user, consent to sharing this information with your organization and its designated representatives and agree to release Amazon for any and all liability for any of your business user account information provided to or used by your organization, the administrator(s) of your organization, and any other users associated with your organization. If you order a product using an individual payment method (e.g., personal credit card) and you or your administrator requests, and Amazon provides, a replacement of this item, you consent that we may charge any eligible payment method we have on record for your business user account for any replacement product sent to your business if the original product is not returned within 30 days of you or your administrator's request for replacement.

3. BUSINESS AND ORDER VERIFICATION

We may use the business name, address, taxpayer ID# and any other information you provide about your organization or users or that we may request or determine is necessary to verify accuracy and eligibility for Amazon Business. We may make, directly or through third parties, inquiries to validate information that you provide to us. We may accept or refuse use of Amazon Business at our discretion and may modify purchasing rights or privileges at any time. We may share any information or documents you provide with third-party sellers that offer certain Amazon Business features for verification purposes.

Certain products require licensing, certification or other credentials to purchase them. To purchase such products, you must provide us with a valid license, certification or other credentials (collectively, the "**Credentials**"), as determined in our sole discretion. We may use information you provide, as well as information relating to your account such as your business name and address, to verify the Credentials, and we may request additional information from you to assist in that verification. We may, in our sole discretion and at any time, suspend or terminate your ability to purchase such products.

4. THIRD-PARTY SERVICE PROVIDERS

Amazon Business may enable third party service providers ("providers") to integrate with Amazon Business. If you choose to use such a provider in connection with your Business Account, you authorize Amazon to disclose to the provider account information, including, without limitation, information regarding you, your Users, your employees or agents, and your and your User's orders. You acknowledge this information will be governed by the provider's privacy, data and security policies. You and your Users consent to Amazon's sharing this information with the provider and agree that Amazon is not responsible for and will have no liability arising from Amazon's disclosure of, or any provider's use of, this information.

Amazon is not responsible for any services provided by the provider. You are responsible for the approvals of Amazon orders, verification of shipping addresses and any disputes regarding orders, and you agree that Amazon will have no liability arising in any way from your use of the provider, including, but not limited to, any unauthorized charges you or your employees or agents incur.

5. REPRESENTATIONS, WARRANTIES AND COVENANTS

You represent, warrant and covenant that:

(a) you are using Amazon Business for business purposes and you agree that you will not purchase any products from Amazon.com for individual, personal, family or household use;

(b) your organization is duly organized, validly existing and in good standing in the jurisdiction in which your organization is registered;

(c) the individual entering into these Terms on behalf of your organization has all necessary legal authority to bind you to these Terms;

(d) you have all requisite right, power, and authority to enter into these Terms, perform your obligations, and grant the rights and authorizations in these Terms;

(e) any information provided or made available by you to Amazon or its affiliates is at all times accurate and complete;

(f) you and all your subcontractors and agents will comply with all applicable laws, rules, regulations, codes, orders and other requirements of governmental agencies ("**Laws**") in your performance of your obligations and exercise of your rights under these Terms and with your purchase and use of any products from Amazon.com;

(g) all users who use business features or purchase on behalf of your organization are authorized to do so and all purchases made by these users are authorized purchases of your organization;

(h) any Credentials, and all documentation or other information you provide to us to validate such Credential, are accurate, complete and reflect your Credential status, and that you will provide updates, additional Credentials or supporting information as required to ensure all such documentation or information remains up-to-date at all times;

(i) the provision to Amazon of any Credentials and related information, any delegation of purchasing authority under any Credentials and all purchases made using the Credentials are with the authority of the Credential holder;

(j) you will only purchase products requiring Credentials as permitted under any Laws and within the scope of any Credential you provide;

(k) if your Business Account has a tax exemption certificate associated with it, any tax exempt purchase made from business user accounts are paid for with the organization's funds;

(l) unless authorized by Amazon, you will not use any product purchased from Amazon.com in connection with, or to fulfill, a federal, state, or local government contract or subcontract, if doing so could subject Amazon to any term, condition, obligation or other provision different from or in addition to the provisions of these Terms;

(m) you will use any products purchased from Amazon.com as intended by the manufacturer and in compliance with all product information provided by the manufacturer;

(n) your purchase of products from us will not, either by your export of those products, your sale or use of those products, your legal status or otherwise, cause us to violate any Law;

(o) you are not an agent of Amazon and agree to comply with the applicable provisions of the Foreign Corrupt Practices Act. You are not on, or associated with, any person or entity on any of the blocked, denied or debarred persons and entities lists maintained by the U.S. Department of Commerce's Bureau of Industry and Security, the U.S. Department of the Treasury's Office of Foreign Assets Control or the U.S. Department of State's Directorate of Defense Trade Controls (collectively, "**Denied Persons Lists**"); or subject to a denial order issued by the U.S. Department of Commerce. You agree (i) not to export any product to any entity or person within any country subject to United States economic sanctions or embargoes without obtaining prior authorization from the United States government, (ii) not to export or provide items to persons that are ineligible under United States Law to receive those items, including but not limited to persons on any Denied Persons List, and (iii) that any products purchased by you will not be used, or made available to a third party for use, in any activities directly or indirectly related to Weapons of Mass Destruction (WMD) proliferation activities; and

(p) you agree to comply with the Healthcare Disclosure Policies if you purchase products that are reimbursable under Medicare, Medicaid, or other federal or state healthcare programs.

6. LICENSE

Subject to your compliance with these Terms and your payment of any applicable fees, Amazon or its content providers grant you a limited, non-exclusive, non-transferable, non-sublicensable license to access and use Amazon Business solely in accordance with these Terms. This license does not include the right to resell any Amazon Business feature; any collection and use of any product listings, descriptions, or prices; any derivative use of Amazon Business; any downloading or copying of Amazon Business information for the benefit of another merchant; or any use of data mining, robots, or similar data gathering and extraction tools. All rights not expressly granted to you in these Terms are reserved and retained by Amazon or its licensors, suppliers, publishers, rightsholders, or other content providers. No feature or part of Amazon Business may be reproduced, duplicated, copied, sold, resold, or otherwise exploited for any commercial purpose without express written consent of Amazon. You may not frame or utilize framing techniques to enclose any trademark, logo, or other proprietary information (including images, text, page layout, or form) of Amazon without express written consent. You may not use any meta tags or any other "hidden text" utilizing Amazon's name or trademarks without the express written consent of Amazon. You may not misuse Amazon Business. You may use Amazon Business only as permitted by law. The licenses granted by Amazon terminate if you do not comply with these Terms.

7. INDEMNIFICATION

You agree to indemnify, defend and hold harmless us and our affiliates, and our and their respective officers, directors, employees, representatives and agents against any loss, claim, damage, settlement, cost, expense, tax or other liability (including, without limitation, reasonable attorneys' fees) (each a "**Claim**") arising from or related to (a) any breach of the Terms, (b) any unlawful or improper use by anyone of any product ordered by you, or (c) your negligence or willful misconduct. You will use counsel reasonably satisfactory to us to defend each indemnified Claim. If at any time we reasonably determine that any indemnified Claim might adversely affect us, we may take control of the defense at our expense. You may not consent to the entry of any judgment or enter into any settlement of a Claim without our prior written consent, which may not be unreasonably withheld.

8. PRODUCT INFORMATION; PRODUCT COMPLIANCE AND SUITABILITY

We recommend that you do not rely solely on the information presented on our website. Please always read labels, warnings and directions provided with the product before use. Amazon does not guarantee compliance or suitability of products with any Laws, nor does Amazon accept responsibility for installation and/or use of a product. It is your responsibility to review the product application and all applicable Laws for each relevant jurisdiction to be sure that the installation and/or use involving the products comply with applicable Laws.

9. AMAZON.COM SITE AND FEATURES

9.1 SELLER CREDENTIALS. Any diversity, industry and other certifications made available to you are provided by third-party sellers on Amazon.com and have not been independently verified by Amazon. You should carefully review and validate any certifications and supporting information that you use to make your purchasing decisions. We take no responsibility and assume no liability for any certifications or supporting information provided by third-party sellers.

9.2 BUSINESS PRICING. We may provide you access to discounts for business customers. In these instances, the available price on the detail page will reflect this discount. You agree that any business

pricing or discounts that Amazon provides to you are the confidential and proprietary information of Amazon. You agree not to manually copy or use any data mining, scraping or similar data gathering and extraction tools with respect to such pricing or discounts. If you have negotiated pricing with a supplier and choose to have pricing that is specific to you available on Amazon Business, you acknowledge and agree that we may share sales information regarding products purchased by you at these prices with the applicable supplier (including any business or shipping addresses). You acknowledge that we may share contact information for your organization's administrator or other applicable employees with the supplier in connection with this pricing.

9.3 LIVE EXPERT. Our LiveExpert service connects you directly with manufacturers' agents so you can ask technical and product related questions via chat, email, or phone. Product support agents are employed by the manufacturer and not Amazon. We record your communications with manufacturers' agents to monitor the quality of these communications. Any questions you ask or suggestions you provide may be used by Amazon for any purpose. We recommend that you not share any customer identifying information with manufacturers' agents to protect the privacy of your information. You acknowledge that all information and answers are provided by the applicable manufacturer, and that Amazon is not responsible for, and disclaims any liability related to, any content provided by any manufacturer.

9.4 GIFT CARDS. All purchases and redemptions of Amazon.com Gift Cards ("**Gift Cards**") are subject to the terms and conditions at http://www.amazon.com/gc-legal ("**Gift Card Terms**"). You may only distribute Gift Cards purchased through a Business Account or associated business user accounts as part of your employee or customer incentive, loyalty, rewards, recognition, or gifting program in the United States (each a "**Loyalty Program**"). You may not imply that Amazon is associated with any Loyalty Program or use Gift Cards in any unsolicited communications. You may not use or distribute any intellectual property of Amazon in connection with any Loyalty Program. You may not resell or transfer Gift Cards for value or permit fees to be charged for a Gift Card. You may not permit Gift Cards to be used for internal use. You may not purchase or redeem, or suggest or direct that recipients use or redeem Gift Cards through the Amazon Associates Program. You may not purchase more than $10,000 in Gift Cards per day through your Business Account (including all associated business user accounts). You must ensure that your Loyalty Program complies with these restrictions and the Gift Card Terms. Amazon reserves the right, in its sole discretion, to reject orders or prohibit advertisement, offer, or distribution of Gift Cards in any location, in any manner, and by any individual or entity.

9.5 KINDLE CONTENT PURCHASES FOR OTHERS. We may enable you to purchase digitized content from the Kindle Store for others through your Amazon Business account. All redemptions of digitized content purchased from the Kindle Store, such as books ("Kindle Content"), are subject to the Kindle Store Terms of Use. Each copy of Kindle Content you purchase may only be redeemed by a single Amazon.com user account and cannot be revoked or transferred by you after redemption. You may not resell the Kindle Content redemption links or any other entitlement to the Kindle Content. If we terminate your access to Amazon Business or you otherwise violate these Terms, we may disable any unredeemed Kindle Content that you have purchased.

10. DISCLAIMER

AMAZON MAKES NO WARRANTY OR REPRESENTATION CONCERNING THE ACCURACY OF PRODUCT INFORMATION PROVIDED AND OUR SOLE LIABILITY FOR ANY LOSSES OR DAMAGES BY YOU ARISING FROM ANY INACCURACY IN THE PRODUCT INFORMATION WILL BE LIMITED TO REIMBURSEMENT OF THE PRICE PAID

FOR THAT PRODUCT. AMAZON DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE OR NONINFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS TO THE FULLEST EXTENT PERMISSIBLE BY APPLICABLE LAW. AMAZON ALSO DISCLAIMS ANY LIABILITY FOR CLAIMS ARISING OUT OF MISUSE, IMPROPER SELECTION, IMPROPER INSTALLATION, MODIFICATION, MISREPAIR OR MISAPPLICATION OF THE PRODUCT.

11. LIMITATIONS OF LIABILITY

UNDER NO CIRCUMSTANCES WILL AMAZON BE LIABLE FOR ANY CONSEQUENTIAL, INCIDENTAL, SPECIAL, EXEMPLARY OR PUNITIVE DAMAGES, INCLUDING BUT NOT LIMITED TO ANY LOST PROFITS THAT RESULT FROM YOUR PURCHASE OF ANY PRODUCTS OR USE OF ANY AMAZON SERVICES ON AMAZON.COM, EVEN IF AMAZON HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. AMAZON'S LIABILITY IN ALL EVENTS IS LIMITED TO THE PURCHASE PRICE PAID FOR THE PRODUCT OR SERVICE THAT GIVES RISE TO ANY LIABILITY.

12. ENTIRE AGREEMENT

The terms and conditions in these Terms, the Amazon.com Conditions of Use, the Amazon.com Privacy Notice, and any applicable terms, conditions, policies, requirements or limitations contained on the Amazon.com website constitute the exclusive and complete agreement between Amazon and you. Amazon will not be bound by, and specifically rejects, any term, condition, obligation, or other provision which is different from or in addition to the provisions of these Terms or which may be in any order, receipt, acceptance, confirmation, correspondence or other document.

Any purchase order (PO) number or other internal information particular to your organization that is provided by a user during the purchasing process is provided only for your internal purchase tracking. Amazon doesn't agree to terms, conditions, obligations, or provisions that are different from or added to these Terms and the policies and information on the Amazon.com website.

13. AGREEMENT CHANGES

We may in our discretion change these Terms, Amazon.com's Conditions of Use and Privacy Notice, or any aspect of Amazon Business, without notice to you. From time to time, Amazon may choose in its sole discretion to add or remove benefits or features of Amazon Business. If any change to these Terms is found invalid, void, or for any reason unenforceable, that change is severable and does not affect the validity and enforceability of any remaining changes or conditions. YOUR CONTINUED USE OF AMAZON BUSINESS AFTER WE CHANGE THESE TERMS CONSTITUTES YOUR ACCEPTANCE OF THE CHANGES. IF YOU DO NOT AGREE TO ANY CHANGES, YOU MUST CANCEL YOUR BUSINESS ACCOUNT AND BUSINESS USER ACCOUNT.

14. TERM; TERMINATION BY US

The term of these Terms will begin on the date you click to accept it and will continue until you or we terminate it. We may terminate these Terms and access to your Business Account, business user account or use of any business features at our discretion with or without notice. You are entitled to terminate these Terms by giving us notice and closing your account. Upon termination, all rights and obligations under these Terms will automatically terminate except for any right of action occurring

prior to termination, payment obligations, and obligations that are intended to survive termination, including, without limitation, Sections 4 –18 of these Terms.

15. FORCE MAJEURE

We will not be liable for any delays in delivery or failure to perform any of our obligations under these Terms by reasons, events or other matters beyond our reasonable control.

16. CONFIDENTIALITY; PUBLICITY

You will (a) protect and not disclose information made available by us that is identified as confidential or that reasonably should be considered confidential; (b) use this information only for internal purposes and in connection with your use of Business Accounts; and (c) destroy or return all such information to us promptly when the Terms terminate (and, upon request, confirm such destruction in writing). This section covers all confidential information regardless of when you receive it. Unless you have received our express written permission, you will not otherwise use any trademark, service mark, commercial symbol or other proprietary right of ours, issue press releases or other publicity relating to us or these Terms, or refer to us in promotional materials. If authorized, you may only use Amazon trademarks in accordance with the Trademark Guidelines.

17. SUGGESTIONS

If you elect to provide or make available suggestions, comments, ideas, improvements, or other feedback or materials to us in connection with or related to Business Accounts (including any related technology), we will be free to use, disclose, reproduce, modify, license, transfer and otherwise distribute, and exploit any of the foregoing information or materials in any manner.

18. MISCELLANEOUS

Your use of Business Accounts is subject to the disputes and applicable law provisions of the Conditions of Use, which are incorporated by reference.

The parties to these terms are independent contractors. These Terms do not create any third party beneficiary rights in any individual or entity that is not a party to these Terms. You may not assign these Terms, by operation of law or otherwise, without our prior written consent. Subject to that restriction, these Terms will be binding on, inure to, and be enforceable against the parties and their respective successors and permitted assigns. We may perform any of our obligations or exercise any of our rights under these Terms through one or more of our affiliates. Our failure to enforce your strict performance of any provisions of these Terms will not constitute a waiver of our right to enforce such provisions or any other provision of these Terms subsequently. If any provision of these Terms is deemed unlawful, void, or for any reason unenforceable, then that provision will be deemed severable from these Terms and will not affect the validity and enforceability of any remaining provisions. In the event of any conflict between these Terms and the Conditions of Use, these Terms will prevail.

Prince William County
PUBLIC SCHOOLS
Providing A World-Class Education

CONTRACT NUMBER: R-TC-17006

This Contract entered into this 19th day of January 2017 by, ***Amazon Services, LLC, Amazon Business, 325 9th Avenue N., Seattle, WA 98109,*** *hereinafter referred to as the "Contractor" and* ***Prince William County School Board, P.O. Box 389, Manassas, VA 20108****, hereinafter referred to as the "Prince William County Public Schools", "Purchasing Agency" or "PWCS".*

WITNESSETH *that the Contractor and PWCS, in consideration of the mutual covenants, promises and agreements herein contained, agree as follows:*

1. **SCOPE OF CONTRACT**: Contractor shall provide an On-Line Marketplace for the Purchase of Products and Services in accordance with the Statement of Needs, General Terms and Conditions and Special Terms and Conditions stated herein.

2. **CONTRACT DOCUMENTS**: The contract documents shall consist of the following:

   2.1. This signed Contract document;

   2.2. Memorandum of Negotiations dated January 19, 2017.

3. **CONTRACT TERM AND RENEWAL:**

   3.1. The initial term of this contract shall be from the date of award, January 19, 2017 to January 18, 2022, with the option to renew for three (3) additional two (2)-one-year periods, upon mutual written consent of the parties to the contract. Proposed prices shall remain firm for the initial term of the contract.

4. **CONTRACT ADMINISTRATOR/PROJECT MANAGER**: The following PWCS employees are identified to use all powers under the contract to enforce its faithful performance:

   4.1. CONTRACT ADMINISTRATOR: As the Contract Administrator, the following individual, or his/her designee, shall serve as the interpreter of the conditions of the contract and shall use all powers under the contract to enforce its faithful performance.

LEGAL

4.2. PROJECT MANAGER: The following individuals shall work directly with the Contractor in scheduling and coordinating work, answering questions in connection with the scope of work, and providing general direction under the resulting contract:

5. **TIME OF PERFORMANCE**: In accordance with Contractor's proposal, Section 4.2.2. and 5.3.2.

6. **PRICING:** In accordance with Contractor's proposal, Section 4.2.1.

7. **PAYMENT TERMS**: In accordance with Contractor's proposal, Section 5.3.6.

Prince William County does not discriminate against faith-based organizations in accordance with the *Code of Virginia*, §2.2-4343.1 or against a bidder or offeror because of race, religion, color, sex, national origin, age, disability, or any other basis prohibited by state law relating to discrimination in employment.

This contract shall constitute the whole agreement between the parties. There are no promises, terms and conditions, or obligations other than those contained herein, and this contract shall supersede all previous communications, representations, or agreements, written or verbal, between the parties hereto related to the provision of goods (including leases thereof), services and/or insurances described herein.

IN WITNESS THEREOF, the parties have caused this Contract to be executed by the following duly authorized officials:

MEMORANDUM OF NEGOTIATIONS
R-TC-17006
Dated: January 19, 2017

Prince William County Schools (hereinafter called PWCS) and Amazon Services, LLC (hereinafter called the Contractor) hereby agree to the following in the execution of Contract R-TC-17006 for On-Line Marketplace for the Purchases of Products and Services. The final Contract contains the following documents listed in the order of precedence:

a. Contractor's proposal dated October 14, 2016;
b. Contractor's response to Clarification Questions dated October 31, 2016, attached;
c. PWCS's Request for Proposal, R-TC-17006 and all Addendum #1;
d. Contractor's Business Accounts Terms and Conditions (currently available at https://www.amazon.com/gp/help/customer/display.html?nodeId=201613180), attached;
e. PWCS's General Terms and Conditions, Section 11 (RFP – Revised 12/16/16), attached;
f. This Memorandum of Negotiations;
g. Any subsequent modifications to the Contract.

1. The contract term shall remain as originally issued in the RFP, as follows:

   9.1. The initial term of this contract shall be five years (5) from **the date of award to December 30, 2021**, with the option to renew for three-two (2) year periods, upon mutual written consent of the parties to the contract.

2. Amazon Whispercast is not being offered upon award but will remain in scope for future offerings by the Contractor. In addition, all new Amazon business opportunities may be modified to the Contract by mutual agreement between the Contractor and PWCS.

LEGAL

3. The following provision is added to PWCS Special Terms and Conditions:

10.7 NOTICE OF DEFERRAL UNDER FEDERAL GRANT UNIFORM GUIDANCE: As permitted under the rule published at 80 FR 54407, Prince William County Schools is electing to defer until July 1, 2017, the implementation of the procurement provisions of the Uniform Guidance, as detailed in 2 CFR 200 subsections .317 through .326. During this period, we will continue to operate under the guidance of 44 C.F.R. § 13.36(a)-(i) (States, Local and Tribal governments) and 2 C.F.R. 215.40-48 (Institutions of Higher Education, Hospitals, and Private Non-Profits). This provision shall constitute the documentation of this decision as required, and shall be deemed incorporated into our internal procurement policies.

4. Contractor's response to Clarification Questions dated October 31, 2016, Question #1: The State of Iowa is hereby removed as an excluded state and allowed use of the Master Agreement award.

Title: **A RESOLUTION TO AWARD PROFESSIONAL SERVICE CONTRACTS FOR UTILITIES ENGINEERING SERVICES ON AN AS-NEEDED BASIS TO A&E ENGINEERING, LLC; BOHANNAN HUSTON, INC.; COBB, FENDLEY & ASSOCIATES, INC.; DANIEL B. STEPHENS & ASSOCIATES, INC.; HDR ENGINEERING, INC.; JACOBS ENGINEERING GROUP, INC.; JOHNSON, MIRMIRAN & THOMPSON, INC.; KIMLEY-HORN AND ASSOCIATES, INC.; MAGNOLIA RIVER SERVICES, INC.; MOLZEN CORBIN AND ASSOCIATES; MILLER ENGINEERS, INC. DBA SOUDER, MILLER & ASSOCIATES; STANTEC CONSULTING SERVICES, INC.; WATER WORKS ENGINEERS, LLC; AND WILSON & COMPANY, INC., ENGINEERS & ARCHITECTS, IN AN ANNUAL NOT-TO-EXCEED AMOUNT OF $2,000,000 EACH FOR A PERIOD OF FIVE (5) YEARS, SUBJECT TO APPROVED BUDGET APPROPRIATIONS (PROCUREMENT NO. 23-24-052).**

TYPE OF ACTION: **☒ Administrative** **☐ Legislative** **☐ Quasi-Judicial**

PURPOSE(S) OF ACTION:

To award contracts for Utilities Engineering Services.

BACKGROUND / KEY ISSUES / CONTRIBUTING FACTORS:

The City of Las Cruces (City) required proposals for utilities engineering services. These services are required to perform engineering services that may include, but not be limited to computer network analyses for water, wastewater, and gas systems; design of water, wastewater, and gas utility systems; well house design; Supervisory Control and Data Acquisition; water treatment process; master planning; feasibility and solid waste studies; land use permitting; subsurface utility exploration; boundary/easement survey; and National Pollutant Discharge Elimination System & Stormwater Pollution Prevention Plan compliance; electrical design; computer network analysis for Gas, Water, and Wastewater; solid waste studies, and landfill system design and analysis; environmental surveys, assessments monitoring and management, such as indoor air quality, asbestos, mold, and other related services; geotechnical assessments, such as soil and groundwater testing for contamination and remediation, and other related services; expert witness in a judicial and/or quasi-judicial setting; project management; construction inspection.

On February 2, 2024, the City advertised Request for Proposals for Procurement No. 23-24-051, for the purpose of pre-qualifying firms that can provide these specialized engineering services, and entering into agreements with recommended firms. These proposed agreements will be used on an as-needed basis for a period of five (5) years, subject to approved budget appropriations.

The Purchasing program received fourteen (14) proposals that were evaluated and scored by the Selection Advisory Committee (SAC) on April 10, 2024. The SAC is recommending award to all fourteen (14) rated firms as follows:

1. A&E Engineering, LLC - Las Cruces, New Mexico
2. Bohannan Huston, Inc. - Las Cruces, New Mexico
3. Cobb, Fendley & Associates, Inc. - Albuquerque, New Mexico
4. Daniel B. Stephens & Associates, Inc. - Albuquerque, New Mexico
5. HDR Engineering, Inc. - Omaha, Nebraska
6. Jacobs Engineering Group, Inc. - Albuquerque, New Mexico
7. Johnson, Mirmiran, & Thompson, Inc. - Hunt Valley, Maryland
8. Kimley-Horn and Associates, Inc. - Mesa, Arizona
9. Magnolia River Services, Inc. - Hartselle Alabama
10. Molzen Corbin and Associates - Las Cruces, New Mexico
11. Miller Engineers, Inc. dba Souder, Miller & Associates - Las Cruces, New Mexico
12. Stantec Consulting Services, Inc. - Las Cruces, New Mexico
13. Water Works Engineers, LLC - Las Cruces, New Mexico
14. Wilson & Company, Inc., Engineers & Architects - Las Cruces, New Mexico

It is advantageous for the City to have a pre-qualified list of engineers from which to select, to get budgeted projects completed. All City departments will be able to enter into individual Project Assignment Agreements with these engineering firms on an as-needed basis. The Public Works Department has numerous projects budgeted throughout upcoming fiscal years. There are also times when special funding (e.g. Legislative appropriations, New Mexico Department of Transportation, etc.) is made available to the City for specific projects. The funding sources often give strict timeframes within which improvements must be designed and constructed to secure the funding. By having a pre-qualified list of engineers, it will not be necessary to go through individual Request for Proposals to contract the necessary work for each individual project. These agreements will allow Public Works, and any other department needing these services, to contract with any one of the fourteen (14) pre-qualified firms. As a result, valuable time is saved in the design of each project and staff time can be used on other projects and in other capacities.

☒ No

Does this action amend the Capital Improvement Plan (CIP)?

☐ Yes
☒ No

Does this action align with Elevate Las Cruces?

☐ Yes
☒ No

OPTIONS / ALTERNATIVES:

1. Vote "Yes"; this will approve the Resolution and award contracts to the fourteen (14) selected pre-qualified firms, to provide utilities engineering services for the City on an as-needed basis, to each firm for a term of five (5) years, subject to approved budget appropriations.
2. Vote "No"; this will not approve the Resolution, and City Council will need to provide staff with alternate direction.
3. Vote to "Amend"; this could modify the Resolution based on City Council direction to staff.
4. Vote to "Table"; this could delay awarding contracts for utilities engineering services and prevent completion of budgeted projects.

RESOLUTION 24-120

A RESOLUTION TO AWARD PROFESSIONAL SERVICE CONTRACTS FOR UTILITIES ENGINEERING SERVICES ON AN AS-NEEDED BASIS TO A&E ENGINEERING, LLC; BOHANNAN HUSTON, INC.; COBB, FENDLEY & ASSOCIATES, INC.; DANIEL B. STEPHENS & ASSOCIATES, INC.; HDR ENGINEERING, INC.; JACOBS ENGINEERING GROUP, INC.; JOHNSON, MIRMIRAN & THOMPSON, INC.; KIMLEY-HORN AND ASSOCIATES, INC.; MAGNOLIA RIVER SERVICES, INC.; MOLZEN CORBIN AND ASSOCIATES; MILLER ENGINEERS, INC. DBA SOUDER, MILLER & ASSOCIATES; STANTEC CONSULTING SERVICES, INC.; WATER WORKS ENGINEERS, LLC; AND WILSON & COMPANY, INC., ENGINEERS & ARCHITECTS, IN AN ANNUAL NOT-TO-EXCEED AMOUNT OF $2,000,000 EACH FOR A PERIOD OF FIVE (5) YEARS, SUBJECT TO APPROVED BUDGET APPROPRIATIONS (PROCUREMENT NO. 23-24-052).

The City Council is informed that:

WHEREAS, the City of Las Cruces requested proposals for utilities engineering services; and

WHEREAS, these services are required to perform engineering services that may include, but not be limited to computer network analyses for water, wastewater, and gas systems; design of water, wastewater, and gas utility systems; well house design; Supervisory Control and Data Acquisition; water treatment process; master planning; feasibility and solid waste studies; land use permitting; subsurface utility exploration; boundary/easement survey; and National Pollutant Discharge Elimination System & Stormwater Pollution Prevention Plan compliance; electrical design; computer network analysis for Gas, Water, and Wastewater; solid waste studies, and landfill system design and analysis; environmental surveys, assessments monitoring and management, such as indoor air quality, asbestos, mold, and other related services; geotechnical assessments, such as soil and groundwater testing for contamination and remediation, and other related services; expert witness in a judicial and/or quasi-judicial setting; project management; construction inspection; and

WHEREAS, the purpose is to establish a list of pre-qualifying firms that can provide these specialized engineering services; and

WHEREAS, these agreements will be used for five (5) years on an as-needed basis, subject to approved budget appropriations; and

WHEREAS, the Purchasing program received fourteen (14) proposals that were evaluated and scored by the Selection Advisory Committee (SAC) on April 10, 2024; and

WHEREAS, the SAC is recommending award to all fourteen (14) firms as follows: A&E Engineering, LLC; Bohannan Huston, Inc.; Cobb, Fendley & Associates, Inc.; Daniel B. Stephens & Associates, Inc.; HDR Engineering, Inc.; Jacobs Engineering Group, Inc.; Johnson, Mirmiran, & Thompson, Inc.; Kimley-Horn and Associates, Inc.; Magnolia River Services, Inc.; Molzen Corbin and Associates; Miller Engineers, Inc. dba Souder, Miller & Associates; Stantec Consulting Service, Inc.; Water Works Engineers, LLC; and Wilson & Company, Inc., Engineers & Architects.

NOW, THEREFORE, Be it Resolved by the Governing Body of the City of Las Cruces:

(I)

THAT the Professional Service Agreements for utilities engineering services are hereby awarded to A&E Engineering, LLC; Bohannan Huston, Inc.; Cobb, Fendley & Associates, Inc.; Daniel B. Stephens & Associates, Inc.; HDR Engineering, Inc.; Jacobs Engineering Group, Inc.; Johnson, Mirmiran, & Thompson,

Inc.; Kimley-Horn and Associates, Inc.; Magnolia River Services, Inc.; Molzen Corbin and Associates; Miller Engineers, Inc. dba Souder, Miller & Associates; Stantec Consulting Service, Inc.; Water Works Engineers, LLC; and Wilson & Company, Inc., Engineers & Architects, as shown in Exhibit "A" through "N", respectively, attached hereto and made part of this Resolution.

(II)

THATCity staff is hereby authorized to do all deeds as necessary in the accomplishment of the herein above.

EXHIBIT "A"

CITY OF LAS CRUCES

PROFESSIONAL SERVICES AGREEMENT

THIS AGREEMENT, made and entered into on this _____ day of _____, 2024 by and between the City of Las Cruces, New Mexico, hereinafter called “CITY” and A&E Engineering, LLC, of 1880 E. Lohman, Las Cruces, NM, 88001, hereinafter called “CONTRACTOR”.

1. PROJECT DESCRIPTION
Utilities Engineering Services on an as needed basis via Project Assignment Agreements (Attachment “A”) during the term of this AGREEMENT.

2. SCOPE OF SERVICES
In a satisfactory and proper manner, the CONTRACTOR shall perform SERVICES, as proposed in response to the CITY’S RFP No. 23-24-052, as set forth in Exhibit A, attached hereto and made a part of this Agreement.

The CONTRACTOR is authorized to extend the same terms and conditions of this Agreement to other governmental entities conditioned upon the procurement laws and regulations of those entities. The CITY shall not be a party nor have any liability relating to such extensions.

3. APPROPRIATIONS
The terms of this Agreement are contingent on sufficient appropriations and authorization being made by the City Council for the performance of this Agreement. If sufficient appropriations and authorizations are not made by the City Council, this Agreement shall terminate upon written notice given by the CITY to CONTRACTOR. The CITY’S decision as to whether sufficient appropriations and authorizations exist shall be accepted by CONTRACTOR and shall be final.

4. COMPENSATION
The CITY shall compensate CONTRACTOR for the performance of SERVICES under this Agreement an amount agreed to for each assigned project, plus applicable taxes. CONTRACTOR shall perform the SERVICES upon receipt of a purchase order or written Notice to Proceed for each assigned project from the CITY. The CITY cannot authorize costs to be incurred prior to such written Notice to Proceed. CONTRACTOR shall submit invoices upon completion of the project. CITY shall pay invoices Net 30 days upon receipt of undisputed invoice.

CONTRACTOR is responsible for payment of State of New Mexico Gross Receipts Tax levied on the amounts payable under this Agreement. CONTRACTOR agrees to comply with all federal and state tax payments and report all items of gross receipts as income from the operations of its business.

5. DEVOTION OF ADEQUATE TIME
CONTRACTOR will devote the necessary hours each week to the performance of projects that are required by the CITY and it will serve the CITY diligently and faithfully,

and according to its best ability in all respects and will promote the best interests of the CITY.

6. TERM AND SCHEDULE
This Agreement shall become effective on June 1, 2024 for a term of 5 years through May 31, 2029.

CONTRACTOR shall perform the SERVICES in accordance with the time set forth as agreed upon by the CITY and CONTRACTOR and as agreed to for each project assigned under the terms of this Agreement.

7. EXTENSIONS, CHANGES, AND AMENDMENTS
This Agreement shall not be extended, changed, or amended except by instrument in writing executed by the parties. The CITY shall not be liable for payment of any extra services nor shall CONTRACTOR be obligated to perform any extra services except upon such written agreement. Such written approval shall indicate the date said extension, change, or amendment is effective and shall be signed by the parties to this Agreement. In the event that the parties cannot reach agreement as to a particular change, the issue shall be resolved pursuant to Article 21.

8. CHANGES AND EXTRA SERVICES BY THE CITY
The CITY may make changes within the general scope of the SERVICES plus may also request CONTRACTOR to perform other extra services not incorporated within the Services set forth in this Agreement. If the CONTRACTOR is of the opinion that such change causes an increase or decrease in the cost and/or the time required for performing the changes or other services required by the City, CONTRACTOR shall so notify the CITY of that fact within five (5) business work days from the date of receipt of change by the CITY. The CITY shall provide written response to the CONTRACTOR within five (5) business work days from the date of receipt of CONTRACTOR'S written notification.

9. CHANGES AND EXTRA SERVICES BY THE CONTRACTOR
In the event a condition is identified by the CONTRACTOR which, in the opinion of the CONTRACTOR, changes the services, costs, and/or time required for performance under this Agreement, the CONTRACTOR shall provide written notification to the CITY within five (5) business work days of such identification. The CITY shall respond in writing to such notification within five (5) business work days from the date of receipt of CONTRACTOR'S notification.

10. DELAYS
In the event that performance of SERVICES is delayed by causes beyond reasonable control of CONTRACTOR, and without the fault or negligence of CONTRACTOR, the time and total compensation for the performance of the SERVICES may be equitably adjusted by written agreement to reflect the extent of such delay. CONTRACTOR shall provide the CITY with written notice of delay pursuant to Article 9 including therein a description of the delay and the steps contemplated or actually taken by

CONTRACTOR to mitigate the effect of such delay. The CITY will make the final determination as to reasonableness of delays.

11. TERMINATION
This Agreement may be terminated by either party hereto upon fifteen (15) calendar days written notice in the event of substantial failure by the other party to perform in accordance with the terms of this Agreement through no fault of the terminating party. This Agreement may also be terminated by the CITY for its convenience or because the PROJECT has been permanently abandoned, but only upon fifteen (15) calendar days written notice to CONTRACTOR.

In the event of termination, CONTRACTOR shall be compensated for all services performed and costs incurred up to the effective date of termination for which CONTRACTOR has not been previously compensated.

Upon receipt of notice of termination from the CITY, CONTRACTOR shall discontinue the SERVICES unless otherwise directed and upon final payment from the CITY deliver to the CITY the required number of copies of all data, drawings, reports, estimates, summaries, and such other information and materials as may have been accumulated by CONTRACTOR in the performance of this Agreement, whether completed or in process.

12. RECORDS AND AUDITS
CONTRACTOR will maintain records indicating dates, length of time, and services rendered. The CITY has the right to audit billings both before and after payment, and contest any billing or portion thereof. Payment under this Agreement does not foreclose the CITY'S right to recover excessive or illegal payments. CONTRACTOR will retain records for five (5) years after the completion of the project.

13. DISCLOSURE AND OWNERSHIP OF DOCUMENTS, PRODUCTS, DESIGN, ELECTRONIC FILES
All technical data, electronic files, and other written and oral information not in the public domain or not previously known, and all information, electronic files, and data obtained, developed, or supplied by the CITY will be kept confidential and CONTRACTOR will not disclose to any other party, directly or indirectly, without the CITY'S prior written consent unless required by lawful order.

All technical data, electronic files, products developed, operational parameters, blueprints, and other information and work of the CONTRACTOR shall be the sole property of the CITY and shall be delivered to the CITY when requested and at the end of the Agreement.

14. INDEPENDENT CONTRACTOR
CONTRACTOR represents that it has, or will secure, at its own expense, all personnel required in performing the SERVICES under this Agreement. Such personnel shall not be employees of, nor have any contractual relationship with the CITY. CONTRACTOR,

consistent with its status as an independent contractor, further agrees that its personnel will not hold themselves out as, nor claim to be officers or employees of the CITY by reason of this Agreement.

To the extent that CONTRACTOR employs any employees, CONTRACTOR shall be solely responsible for providing its own form of insurance for its employees and in no event shall CONTRACTOR's employees be covered under any policy of the CITY.

CONTRACTOR'S retention hereunder is not exclusive. Subject to the terms and provisions of this Agreement: (i) CONTRACTOR is able, during the Term hereof, to perform services for other parties; and (ii) CONTRACTOR may perform for its own account other professional services outside the scope of this Agreement.

CONTRACTOR is and shall be an Independent Contractor and shall be responsible for the management of its business affairs. In the performance of the work under this Agreement, CONTRACTOR will at all times be acting and performing as an Independent Contractor, as that term is understood for federal and state law purposes, and not as an employee of the CITY. Without limitation upon the foregoing, CONTRACTOR shall not accrue sick leave, jury duty pay, retirement, insurance, bonding, welfare benefits, or any other benefits, which may or may not be afforded employees of the CITY. CONTRACTOR will not be treated as an employee for purposes of: Workers' Compensation benefits; the Federal Unemployment Tax Act; Social Security; other payroll taxes, federal or any state income tax withholding; or the employee benefit provisions described in the Internal Revenue Code of 1986, as amended. Neither the CITY, nor its agents or representatives, shall have the right to control or direct the manner, details or means by which CONTRACTOR accomplishes and performs its services. Nevertheless, CONTRACTOR shall be bound to fulfill the duties and responsibilities contained in the Agreement.

15. NO JOINT VENTURE OR PARTNERSHIP

Nothing contained in this Agreement shall create any partnership, association, joint venture, fiduciary or agency relationship between CONTRACTOR and CITY. Except as otherwise specifically set forth herein, neither CONTRACTOR nor CITY shall be authorized or empowered to make any representation or commitment or to perform any act which shall be binding on the other unless expressly authorized or empowered in writing.

16. ASSIGNMENT

CONTRACTOR shall perform all the services under this Agreement and shall not assign any interest in this Agreement or transfer any interest in same or assign any claims for money due or to become due under this Agreement without the prior written consent of the CITY.

17. INSURANCE
CONTRACTOR shall obtain and maintain insurance at its own cost and expense during the life of this Agreement, and shall require Subcontractors, if any, to maintain during the life of his subcontract:

1. Commercial General Liability Insurance
   a. $1,000,000 per occurrence / $2,000,000 aggregate
   b. Coverage must include premises and operations, products and completed operations, and personal and advertising injury.
   c. The City of Las Cruces must be named as an Additional Insured for all coverages listed above on endorsements acceptable to the City.
   d. Coverage must be primary and non-contributory.
   e. Coverage must be per project or per location.
   f. Coverage must be on an occurrence form.
   g. Subrogation must be waived.
2. Commercial Auto Liability
   a. $1,000,000 per occurrence
   b. Coverage must be for “owned, leased, hired, and non-owned autos” or “any autos.”
3. Workers’ Compensation and Employers Liability
   a. Statutory Limits
   b. Employer liability – $1,000,000 each accident, $1,000,000 each employee by disease, $1,000,000 policy limit
   c. Subrogation must be waived.
4. Professional Liability: $1,000,000 per claim

Endorsements for additional insured coverage and waivers of subrogation must be provided as a condition of this Agreement and shall be noted on the certificate.

CONTRACTOR shall furnish the CITY with a certificate(s) of insurance showing CONTRACTOR and Subcontractors, if any, have complied with this Article. The CONTRACTOR shall provide insurance certificates before work is to start on the project and shall provide the CITY thirty (30) days written notification of cancellation of such policies.

18. INDEMNITY AND LIMITATION
CONTRACTOR shall indemnify, defend, and hold harmless the CITY from and against any and all claims, suits, actions, judgments, demands, losses, costs, expenses, damages, and liability caused in whole or in part by, resulting in whole or in part from, or arising in whole or in part out of the negligent acts, errors, or omissions of CONTRACTOR, its officers, employees, agents, or representatives in the performance of SERVICES under this agreement.

19. APPLICABLE LAW
This Agreement and the rights and obligations of the parties shall be governed by and construed by the laws of the State of New Mexico applicable to Agreements between

New Mexico parties made and performed in that state, without regard to conflicts of law principles. Venue shall be in the Third Judicial District, State of New Mexico.

CONTRACTOR shall abide and be governed by all applicable state law, CITY ordinances, and laws regarding the CONTRACTOR'S services or any work done pursuant to this Agreement, including anti-discrimination.

20. BREACH
In the event CONTRACTOR breaches any obligation contained in this Agreement, prior to instituting any action or dispute resolution procedure, the CITY shall give CONTRACTOR written notice of such breach. In the event CONTRACTOR fails to remedy the breach within five (5) working days of receiving such written notice, the CITY, at its sole discretion, without any obligation to do so and in addition to other remedies available under applicable law, may remedy CONTRACTOR'S breach and recover any and all costs and expenses in so doing from CONTRACTOR.

21. DISPUTE RESOLUTION
In the event that a dispute arises between CITY and CONTRACTOR under this Agreement or as a result of breach of this Agreement, the parties agree to act in good faith to attempt to resolve the dispute.

22. NOTIFICATION
All notices required or permitted under this Agreement shall be in writing and shall be deemed sufficiently served if served by Registered Mail addressed as follows:

TO CITY:	City of Las Cruces PO Box 20000 Las Cruces, NM 88004 ATTENTION: Tony Trevino
With Copies to:	City Attorney Purchasing Manager
TO CONTRACTOR:	A&E Engineering, LLC 1880 E. Lohman Las Cruces, NM 88001 ATTENTION: Adrian Renteria

23. SCOPE OF AGREEMENT
This Agreement incorporates all of the agreements, covenants, and understandings between the parties hereto concerning the subject matter hereof and that all such covenants, agreements, and understandings have been merged into this written agreement. No prior agreement or understanding verbal or otherwise of the parties or their agents shall be valid or enforceable unless embodied in this agreement.

24. SEVERABILITY
The parties agree that each provision of this Agreement is severable and the invalidity or unenforceability of any one or more of the provisions of this Agreement shall not affect the validity or enforceability of any other provision of this Agreement, and this Agreement shall be construed in all respects as if such invalid or unenforceable provisions were omitted.

25. CONFLICT OF INTEREST
CONTRACTOR represents and warrants that CONTRACTOR has no business, professional, personal, or other interest, including, but not limited to, the representation of other clients, that would conflict in any manner or degree with the performance of its obligations under this Agreement. If any such actual or potential conflict of interest arises under this Agreement, CONTRACTOR shall immediately inform the CITY in writing of such conflict. If, in the reasonable judgement of the CITY, such conflict poses a conflict to and with the performance of CONTRACTOR'S obligations under this Agreement, or is otherwise a violation of the CITY'S current policy or ordinances, then the CITY may terminate the Agreement immediately upon written notice to CONTRACTOR; such termination of the Agreement shall be effective upon the receipt of such notice by CONTRACTOR.

EXHIBIT A
SERVICES

A. Project Assignments
A Project assignment is initiated by the City providing the selected Engineer a detailed project description, including scope of work and any other special instructions needed by the Engineer to prepare items such as preliminary and final cost estimates, complete project plans and specifications, project reports, and other related engineering services. The awarded Engineers shall provide engineering services that may include but not be limited to, the following:
1. Computer network analyses for water, wastewater, and gas systems; design of water, wastewater, and gas utility systems; well house design; Supervisory Control and Data Acquisition (SCADA); water treatment process; master planning; feasibility studies; solid waste studies; land use permitting; subsurface utility exploration; boundary/easement survey; and National Pollutant Discharge Elimination System (NPDES) & Stormwater Pollution Prevention Plan (SWPPP) compliance.
2. Electrical design (wells, booster stations, lift stations, odor control stations, building electrical system design)
3. Computer network analysis for Gas (GasWork), Water (InfoWater), and Wastewater (InfoSewer). The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility
4. Solid waste studies, landfill system design and analysis
5. Environmental surveys, assessments monitoring and management, such as indoor air quality, asbestos, mold, and other related services for the City
6. Geotechnical Assessments, such as soil and groundwater testing for contamination and remediation, and other related services for the City
7. Expert witness in a judicial and/or quasi-judicial setting.
8. Project Management
9. Construction Inspection.

B. Project Assignment Agreements
A Project Assignment Agreement (a template of which is incorporated herein as ATTACHMENT “A”) will be negotiated and executed on a case-by-case basis for each specific project, and will include a cost proposal from the Engineering firm(s) proposing to do the work. The cost proposal may utilize one of the following pricing formats:
1. Lump Sum
2. Unit pricing to include:
    a. Hourly rate for various types of services requested by the City
    b. Charges for miscellaneous items such as blueprints, data, discs, rental of special equipment, etc.
    c. A statement of the billing procedures including minimum billing units, if any.
    d. Cost of sub-consultants (if any)
3. An alternative unit cost breakdown

C. Deliverables
Each project contract will require a list of deliverables, schedule/timeline and cost. The

Engineer may be required to supply to the City an of the following items, when specified and as requested on the Scope of Work for each individual project.

1. Preliminary report containing schedule of work and cost estimate.
2. Construction drawings and documents. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility. Provide hard copies and PDF format of the construction plans for Purchasing Section use.
   a. As-built drawings on electronic media and reproducible prints. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. All horizontal and vertical location datum information shall be coordinated with the City Surveyor. The utility location information shall be tied to project control monuments and referenced to project construction stationing. The project control survey shall be certified by a New Mexico Registered Land Surveyor. Metadata or “data about the data” shall be submitted with each as-built electronic file, preferably as a separate text file on the electronic submittal media, and shall include:
      - Name, address and phone number of the responsible land surveyor.
      - Date of completion of survey.
      - Equipment used to conduct the survey.
      - Horizontal and vertical control marks used to tie the survey to the City approved control.
      - Transformation factors needed to reduce Ground (local coordinate system) to Grid and combined scale factor used.
   b. “RECORD DRAWINGS” shall be clearly labeled on each sheet.
3. Computer network analysis for gas, water, and wastewater shall be provided to the City in appropriate electronic format. It shall include the entire model, including changes and a text summary (report) of the network analysis that includes assumptions, procedures, and results, and any graphics that clarify the analysis. The Engineering firm(s) shall verify the report format with the City. The computer network analysis shall be provided using the software listed below. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility.
   a. Computer network analysis for Gas: GasWork
   b. Computer network analysis for Water: InfoWater
   c. Computer network analysis for wastewater: InfoSewer
   d. Other design computer programs as approved by the City
4. Project reports.
5. Any other item specified in the contract for that project
6. Easement map and recording information

D. The selection of an Engineer for a specific project shall be based on experience with similar projects, references, performance in similar projects, and availability. This will include the ability to meet schedules, cost control, and responsiveness to client.

E. The Engineer shall have an engineering staff on-site everyday who is responsible, on behalf of the Engineer, for providing timely completion and response for performance of the terms of each Project Assignment Agreement during the progress of each individual project. Any deviation from this requirement is at the discretion of the City and must be approved in writing by the City prior to the start of any individual project.

Table of Contents

1. Technical Approach (45 pts) 1
2. Qualification/Competence (40 pts) 4
3. Past Record of Performance (15 pts) 5
New Water Supply Project – Llano Quemado MDWCA, Taos County, NM 5
Spaceport Reverse Osmosis Project – Spaceport America, Sierra County, NM 6
Waterline Extension Project – Spaceport America, Sierra County, NM 6

1. Technical Approach (45 pts)

At A&E Engineering LLC, we recognize the importance of the services you provide to the community, and we are committed to helping you achieve your mission to provide that great service. With the community's growth the City of Las Cruces municipality sees and ever increase demand for Civil Engineering services. The services being requested to support this project include:

- Computer Network analyses for water, wastewater and gas systems
- Design of water, wastewater and gas utility systems
- Well House Design
- Supervisory Control and Data Acquisition (SCADA)
- Water Treatment Process
- Master Planning
- Feasibility Studies
- Solid Waste Studies
- Land Use Permitting
- Subsurface Utility Exploration
- Boundary/easement survey
- National Pollutant Discharge Elimination System (NPDES)
- Stormwater Pollution Prevention Plan (SWPPP)

With over eighteen years of experience, A&E Engineering LLC is well positioned to assist you with this important project. We have assisted small and rural water utility providers upgrade their infrastructure and private development firms, by providing technical assistance including planning, Treatment Plant Designs, Water and Sewer line Designs, Well Designs, Wastewater Treatment Plant Designs bid assistance, construction administration, construction observation, and start-up.

Your engineer of record, Adrian Renteria, P.E., is a graduate of NMSU.

A&E Engineering LLC is based in Las Cruces, NM. We have worked with communities throughout the region and through our work, have extensive experience coordinating with state and federal regulatory and funding agencies, including the NMED Constructions Programs Bureau and NMED Drinking Water Bureau. Many projects we engineered were funded by NMFA and required that we coordinate with Bureau and prepare document for their review to make sure our designs conform with local, state, and federal requirements.

Our experience working in Doña Ana County has given the experience coordinating with local regulatory and permitting agencies. Through our land development projects, designing residential subdivisions, commercial developments and associated utility services, we have extensive knowledge and are highly competent to effectively engineer your improvements project.

Outlined below are the main steps to successfully completing your project.

1. The first step in our approach that will be taken to complete this project is to determine the major design elements and identify in conjunction with the owner/operators the specifics on the scope of work and obtain a firm understanding of the owner's end goal at project completion phase.
2. The next step will be developing a set of bidding documents for owner's review. At this point the bidding documents will be considered approximately 60% complete. Coordination with equipment/material vendor representatives will be made to discuss availability and lead times of items being scoped for the project and identify potential setbacks for the project. Communication with the owner will be made based upon findings from vendor representative feedback. Ensure that the owner is satisfied with the design elements outlined in the 60% progress design.
3. We follow that with making needed revisions to the bidding documents based on owner feedback. The bidding documents will then be packaged and sent to the needed review agencies for review and approval. Coordinate closely with review agencies and owner to minimize review duration and provide timely revisions if needed.

Critical issues to keep in mind are the schedule and budget which go hand in hand. In today's state of the market with material and labor costs increasing daily, planning for the extended material lead times will be critical to meeting the project schedule. The project team will identify potential pitfalls and develop a plan and alternatives to present to the owner to maintain the project's schedule and budget within reason.

One might consider our small project team to be a weakness because it does not have the backing that larger firms offer. We consider our size an advantage in that you will be interacting with the decision makers of the company, meaning that you will receive expedited feedback on critical issues that should result in quick response times to potential critical issues and challenges.

2. Qualification/Competence (40 pts)

Adrian Renteria, P.E.

(Principal Member responsible for administration of the contract)

B.S. – Civil Engineering

A.A.S. – Civil/Survey Drafting

Professional Engineer – New Mexico (#21978), Arizona (#66182) and Texas (#129069); NCEES National Record (#59836)

Mr. Renteria's experience with both construction and consulting firms has taught him the importance of putting together detailed construction plans and using value engineering. Mr. Renteria has developed budgets, managed projects, and designed a variety of water improvement projects throughout southern New Mexico. He was the engineer of record on Projects for Llano Quemado Water Source Improvement Project and the Spaceport America Reverse Osmosis Improvements Project.

Mr. Renteria's prior employment as a project manager with construction firms allows him to pull from that experience where his responsibilities included estimating, project scheduling and interpretation of plans and technical specifications. He designs subdivisions and commercial development projects providing site, grading, waterline, gas line and sewer line layout engineering, including one of the City of Las Cruces' main trunk line extension used to collect sewage from the East Mesa service area.

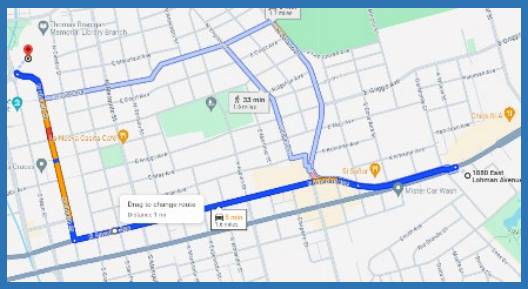
Carlos Gonzalez

A.A.S. – Civil/Survey Drafting

ACNM Traffic Control Technician and Supervisor

Mr. Gonzalez's design experience with a range of engineering projects with an emphasis in site development and water/wastewater systems. Mr. Gonzalez also provides a strong background in Construction Observation in water and wastewater projects within New Mexico that range in waterline installation, sewer line installation and water meter replacement.

Office Location
1880 E. Lohman
Las Cruces, NM 88001
575-649-0254



We can be at the city offices in 5 minutes.

Your benefit from interacting directly with the owner includes responsiveness, prompt decisions, and direct accountability for project performance.

Our proximity to the city allows us to respond quickly in-person when needed and you will be in contact with Adrian Renteria, P.E., the owner of A&E Engineering LLC.

3. Past Record of Performance (15 pts)

Presented below are three recent projects which A&E Engineering completed.

New Water Supply Project – Llano Quemado MDWCA, Taos County, NM

- New well project consisted of a new 320-feet deep well with new CMU building well house, chlorination system and 2-inch fill line extension. The project was funded by NMFA through the CPB RIP program. We worked closely with Andrea Telmo with the Construction Programs Bureau and Patrick Castillo with Drinking Water Bureau review agencies.

EXHIBIT "B"

CITY OF LAS CRUCES

PROFESSIONAL SERVICES AGREEMENT

THIS AGREEMENT, made and entered into on this _____ day of _____, 2024 by and between the City of Las Cruces, New Mexico, hereinafter called "CITY" and Bohannan Huston, Inc., of 7500 Jefferson St. NE, Albuquerque, NM, 87109, hereinafter called "CONTRACTOR".

1. PROJECT DESCRIPTION
Utilities Engineering Services on an as needed basis via Project Assignment Agreements (Attachment "A") during the term of this AGREEMENT.

2. SCOPE OF SERVICES
In a satisfactory and proper manner, the CONTRACTOR shall perform SERVICES, as proposed in response to the CITY'S RFP No. 23-24-052, as set forth in Exhibit A, attached hereto and made a part of this Agreement.

The CONTRACTOR is authorized to extend the same terms and conditions of this Agreement to other governmental entities conditioned upon the procurement laws and regulations of those entities. The CITY shall not be a party nor have any liability relating to such extensions.

3. APPROPRIATIONS
The terms of this Agreement are contingent on sufficient appropriations and authorization being made by the City Council for the performance of this Agreement. If sufficient appropriations and authorizations are not made by the City Council, this Agreement shall terminate upon written notice given by the CITY to CONTRACTOR. The CITY'S decision as to whether sufficient appropriations and authorizations exist shall be accepted by CONTRACTOR and shall be final.

4. COMPENSATION
The CITY shall compensate CONTRACTOR for the performance of SERVICES under this Agreement an amount agreed to for each assigned project, plus applicable taxes. CONTRACTOR shall perform the SERVICES upon receipt of a purchase order or written Notice to Proceed for each assigned project from the CITY. The CITY cannot authorize costs to be incurred prior to such written Notice to Proceed. CONTRACTOR shall submit invoices upon completion of the project. CITY shall pay invoices Net 30 days upon receipt of undisputed invoice.

CONTRACTOR is responsible for payment of State of New Mexico Gross Receipts Tax levied on the amounts payable under this Agreement. CONTRACTOR agrees to comply with all federal and state tax payments and report all items of gross receipts as income from the operations of its business.

5. DEVOTION OF ADEQUATE TIME
CONTRACTOR will devote the necessary hours each week to the performance of projects that are required by the CITY and it will serve the CITY diligently and faithfully,

and according to its best ability in all respects and will promote the best interests of the CITY.

6. TERM AND SCHEDULE
This Agreement shall become effective on June 1, 2024 for a term of 5 years through May 31, 2029.

CONTRACTOR shall perform the SERVICES in accordance with the time set forth as agreed upon by the CITY and CONTRACTOR and as agreed to for each project assigned under the terms of this Agreement.

7. EXTENSIONS, CHANGES, AND AMENDMENTS
This Agreement shall not be extended, changed, or amended except by instrument in writing executed by the parties. The CITY shall not be liable for payment of any extra services nor shall CONTRACTOR be obligated to perform any extra services except upon such written agreement. Such written approval shall indicate the date said extension, change, or amendment is effective and shall be signed by the parties to this Agreement. In the event that the parties cannot reach agreement as to a particular change, the issue shall be resolved pursuant to Article 21.

8. CHANGES AND EXTRA SERVICES BY THE CITY
The CITY may make changes within the general scope of the SERVICES plus may also request CONTRACTOR to perform other extra services not incorporated within the Services set forth in this Agreement. If the CONTRACTOR is of the opinion that such change causes an increase or decrease in the cost and/or the time required for performing the changes or other services required by the City, CONTRACTOR shall so notify the CITY of that fact within five (5) business work days from the date of receipt of change by the CITY. The CITY shall provide written response to the CONTRACTOR within five (5) business work days from the date of receipt of CONTRACTOR'S written notification.

9. CHANGES AND EXTRA SERVICES BY THE CONTRACTOR
In the event a condition is identified by the CONTRACTOR which, in the opinion of the CONTRACTOR, changes the services, costs, and/or time required for performance under this Agreement, the CONTRACTOR shall provide written notification to the CITY within five (5) business work days of such identification. The CITY shall respond in writing to such notification within five (5) business work days from the date of receipt of CONTRACTOR'S notification.

10. DELAYS
In the event that performance of SERVICES is delayed by causes beyond reasonable control of CONTRACTOR, and without the fault or negligence of CONTRACTOR, the time and total compensation for the performance of the SERVICES may be equitably adjusted by written agreement to reflect the extent of such delay. CONTRACTOR shall provide the CITY with written notice of delay pursuant to Article 9 including therein a description of the delay and the steps contemplated or actually taken by

CONTRACTOR to mitigate the effect of such delay. The CITY will make the final determination as to reasonableness of delays.

11. TERMINATION
This Agreement may be terminated by either party hereto upon fifteen (15) calendar days written notice in the event of substantial failure by the other party to perform in accordance with the terms of this Agreement through no fault of the terminating party. This Agreement may also be terminated by the CITY for its convenience or because the PROJECT has been permanently abandoned, but only upon fifteen (15) calendar days written notice to CONTRACTOR.

In the event of termination, CONTRACTOR shall be compensated for all services performed and costs incurred up to the effective date of termination for which CONTRACTOR has not been previously compensated.

Upon receipt of notice of termination from the CITY, CONTRACTOR shall discontinue the SERVICES unless otherwise directed and upon final payment from the CITY deliver to the CITY the required number of copies of all data, drawings, reports, estimates, summaries, and such other information and materials as may have been accumulated by CONTRACTOR in the performance of this Agreement, whether completed or in process.

12. RECORDS AND AUDITS
CONTRACTOR will maintain records indicating dates, length of time, and services rendered. The CITY has the right to audit billings both before and after payment, and contest any billing or portion thereof. Payment under this Agreement does not foreclose the CITY'S right to recover excessive or illegal payments. CONTRACTOR will retain records for five (5) years after the completion of the project.

13. DISCLOSURE AND OWNERSHIP OF DOCUMENTS, PRODUCTS, DESIGN, ELECTRONIC FILES
All technical data, electronic files, and other written and oral information not in the public domain or not previously known, and all information, electronic files, and data obtained, developed, or supplied by the CITY will be kept confidential and CONTRACTOR will not disclose to any other party, directly or indirectly, without the CITY'S prior written consent unless required by lawful order.

All technical data, electronic files, products developed, operational parameters, blueprints, and other information and work of the CONTRACTOR shall be the sole property of the CITY and shall be delivered to the CITY when requested and at the end of the Agreement.

14. INDEPENDENT CONTRACTOR
CONTRACTOR represents that it has, or will secure, at its own expense, all personnel required in performing the SERVICES under this Agreement. Such personnel shall not be employees of, nor have any contractual relationship with the CITY. CONTRACTOR,

consistent with its status as an independent contractor, further agrees that its personnel will not hold themselves out as, nor claim to be officers or employees of the CITY by reason of this Agreement.

To the extent that CONTRACTOR employs any employees, CONTRACTOR shall be solely responsible for providing its own form of insurance for its employees and in no event shall CONTRACTOR's employees be covered under any policy of the CITY.

CONTRACTOR'S retention hereunder is not exclusive. Subject to the terms and provisions of this Agreement: (i) CONTRACTOR is able, during the Term hereof, to perform services for other parties; and (ii) CONTRACTOR may perform for its own account other professional services outside the scope of this Agreement.

CONTRACTOR is and shall be an Independent Contractor and shall be responsible for the management of its business affairs. In the performance of the work under this Agreement, CONTRACTOR will at all times be acting and performing as an Independent Contractor, as that term is understood for federal and state law purposes, and not as an employee of the CITY. Without limitation upon the foregoing, CONTRACTOR shall not accrue sick leave, jury duty pay, retirement, insurance, bonding, welfare benefits, or any other benefits, which may or may not be afforded employees of the CITY. CONTRACTOR will not be treated as an employee for purposes of: Workers' Compensation benefits; the Federal Unemployment Tax Act; Social Security; other payroll taxes, federal or any state income tax withholding; or the employee benefit provisions described in the Internal Revenue Code of 1986, as amended. Neither the CITY, nor its agents or representatives, shall have the right to control or direct the manner, details or means by which CONTRACTOR accomplishes and performs its services. Nevertheless, CONTRACTOR shall be bound to fulfill the duties and responsibilities contained in the Agreement.

15. NO JOINT VENTURE OR PARTNERSHIP

Nothing contained in this Agreement shall create any partnership, association, joint venture, fiduciary or agency relationship between CONTRACTOR and CITY. Except as otherwise specifically set forth herein, neither CONTRACTOR nor CITY shall be authorized or empowered to make any representation or commitment or to perform any act which shall be binding on the other unless expressly authorized or empowered in writing.

16. ASSIGNMENT

CONTRACTOR shall perform all the services under this Agreement and shall not assign any interest in this Agreement or transfer any interest in same or assign any claims for money due or to become due under this Agreement without the prior written consent of the CITY.

17. INSURANCE
CONTRACTOR shall obtain and maintain insurance at its own cost and expense during the life of this Agreement, and shall require Subcontractors, if any, to maintain during the life of his subcontract:

1. Commercial General Liability Insurance
   a. $1,000,000 per occurrence / $2,000,000 aggregate
   b. Coverage must include premises and operations, products and completed operations, and personal and advertising injury.
   c. The City of Las Cruces must be named as an Additional Insured for all coverages listed above on endorsements acceptable to the City.
   d. Coverage must be primary and non-contributory.
   e. Coverage must be per project or per location.
   f. Coverage must be on an occurrence form.
   g. Subrogation must be waived.
2. Commercial Auto Liability
   a. $1,000,000 per occurrence
   b. Coverage must be for “owned, leased, hired, and non-owned autos” or “any autos.”
3. Workers’ Compensation and Employers Liability
   a. Statutory Limits
   b. Employer liability – $1,000,000 each accident, $1,000,000 each employee by disease, $1,000,000 policy limit
   c. Subrogation must be waived.
4. Professional Liability: $1,000,000 per claim

Endorsements for additional insured coverage and waivers of subrogation must be provided as a condition of this Agreement and shall be noted on the certificate.

CONTRACTOR shall furnish the CITY with a certificate(s) of insurance showing CONTRACTOR and Subcontractors, if any, have complied with this Article. The CONTRACTOR shall provide insurance certificates before work is to start on the project and shall provide the CITY thirty (30) days written notification of cancellation of such policies.

18. INDEMNITY AND LIMITATION
CONTRACTOR shall indemnify, defend, and hold harmless the CITY from and against any and all claims, suits, actions, judgments, demands, losses, costs, expenses, damages, and liability caused in whole or in part by, resulting in whole or in part from, or arising in whole or in part out of the negligent acts, errors, or omissions of CONTRACTOR, its officers, employees, agents, or representatives in the performance of SERVICES under this agreement.

19. APPLICABLE LAW
This Agreement and the rights and obligations of the parties shall be governed by and construed by the laws of the State of New Mexico applicable to Agreements between

New Mexico parties made and performed in that state, without regard to conflicts of law principles. Venue shall be in the Third Judicial District, State of New Mexico.

CONTRACTOR shall abide and be governed by all applicable state law, CITY ordinances, and laws regarding the CONTRACTOR'S services or any work done pursuant to this Agreement, including anti-discrimination.

20. BREACH
In the event CONTRACTOR breaches any obligation contained in this Agreement, prior to instituting any action or dispute resolution procedure, the CITY shall give CONTRACTOR written notice of such breach. In the event CONTRACTOR fails to remedy the breach within five (5) working days of receiving such written notice, the CITY, at its sole discretion, without any obligation to do so and in addition to other remedies available under applicable law, may remedy CONTRACTOR'S breach and recover any and all costs and expenses in so doing from CONTRACTOR.

21. DISPUTE RESOLUTION
In the event that a dispute arises between CITY and CONTRACTOR under this Agreement or as a result of breach of this Agreement, the parties agree to act in good faith to attempt to resolve the dispute.

22. NOTIFICATION
All notices required or permitted under this Agreement shall be in writing and shall be deemed sufficiently served if served by Registered Mail addressed as follows:

TO CITY:	City of Las Cruces PO Box 20000 Las Cruces, NM 88004 ATTENTION: Tony Trevino
With Copies to:	City Attorney Purchasing Manager
TO CONTRACTOR:	Bohannan Huston, Inc. 7500 Jefferson St. NE Albuquerque, NM 87109 ATTENTION: Matthew Thompson

23. SCOPE OF AGREEMENT
This Agreement incorporates all of the agreements, covenants, and understandings between the parties hereto concerning the subject matter hereof and that all such covenants, agreements, and understandings have been merged into this written agreement. No prior agreement or understanding verbal or otherwise of the parties or their agents shall be valid or enforceable unless embodied in this agreement.

24. SEVERABILITY
The parties agree that each provision of this Agreement is severable and the invalidity or unenforceability of any one or more of the provisions of this Agreement shall not affect the validity or enforceability of any other provision of this Agreement, and this Agreement shall be construed in all respects as if such invalid or unenforceable provisions were omitted.

25. CONFLICT OF INTEREST
CONTRACTOR represents and warrants that CONTRACTOR has no business, professional, personal, or other interest, including, but not limited to, the representation of other clients, that would conflict in any manner or degree with the performance of its obligations under this Agreement. If any such actual or potential conflict of interest arises under this Agreement, CONTRACTOR shall immediately inform the CITY in writing of such conflict. If, in the reasonable judgement of the CITY, such conflict poses a conflict to and with the performance of CONTRACTOR'S obligations under this Agreement, or is otherwise a violation of the CITY'S current policy or ordinances, then the CITY may terminate the Agreement immediately upon written notice to CONTRACTOR; such termination of the Agreement shall be effective upon the receipt of such notice by CONTRACTOR.

EXHIBIT A
SERVICES

A. Project Assignments
A Project assignment is initiated by the City providing the selected Engineer a detailed project description, including scope of work and any other special instructions needed by the Engineer to prepare items such as preliminary and final cost estimates, complete project plans and specifications, project reports, and other related engineering services. The awarded Engineers shall provide engineering services that may include but not be limited to, the following:
1. Computer network analyses for water, wastewater, and gas systems; design of water, wastewater, and gas utility systems; well house design; Supervisory Control and Data Acquisition (SCADA); water treatment process; master planning; feasibility studies; solid waste studies; land use permitting; subsurface utility exploration; boundary/easement survey; and National Pollutant Discharge Elimination System (NPDES) & Stormwater Pollution Prevention Plan (SWPPP) compliance.
2. Electrical design (wells, booster stations, lift stations, odor control stations, building electrical system design)
3. Computer network analysis for Gas (GasWork), Water (InfoWater), and Wastewater (InfoSewer). The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility
4. Solid waste studies, landfill system design and analysis
5. Environmental surveys, assessments monitoring and management, such as indoor air quality, asbestos, mold, and other related services for the City
6. Geotechnical Assessments, such as soil and groundwater testing for contamination and remediation, and other related services for the City
7. Expert witness in a judicial and/or quasi-judicial setting.
8. Project Management
9. Construction Inspection.

B. Project Assignment Agreements
A Project Assignment Agreement (a template of which is incorporated herein as ATTACHMENT “A”) will be negotiated and executed on a case-by-case basis for each specific project, and will include a cost proposal from the Engineering firm(s) proposing to do the work. The cost proposal may utilize one of the following pricing formats:
1. Lump Sum
2. Unit pricing to include:
    a. Hourly rate for various types of services requested by the City
    b. Charges for miscellaneous items such as blueprints, data, discs, rental of special equipment, etc.
    c. A statement of the billing procedures including minimum billing units, if any.
    d. Cost of sub-consultants (if any)
3. An alternative unit cost breakdown

C. Deliverables
Each project contract will require a list of deliverables, schedule/timeline and cost. The

Engineer may be required to supply to the City an of the following items, when specified and as requested on the Scope of Work for each individual project.

1. Preliminary report containing schedule of work and cost estimate.
2. Construction drawings and documents. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility. Provide hard copies and PDF format of the construction plans for Purchasing Section use.
   a. As-built drawings on electronic media and reproducible prints. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. All horizontal and vertical location datum information shall be coordinated with the City Surveyor. The utility location information shall be tied to project control monuments and referenced to project construction stationing. The project control survey shall be certified by a New Mexico Registered Land Surveyor. Metadata or “data about the data” shall be submitted with each as-built electronic file, preferably as a separate text file on the electronic submittal media, and shall include:
      - Name, address and phone number of the responsible land surveyor.
      - Date of completion of survey.
      - Equipment used to conduct the survey.
      - Horizontal and vertical control marks used to tie the survey to the City approved control.
      - Transformation factors needed to reduce Ground (local coordinate system) to Grid and combined scale factor used.
   b. “RECORD DRAWINGS” shall be clearly labeled on each sheet.
3. Computer network analysis for gas, water, and wastewater shall be provided to the City in appropriate electronic format. It shall include the entire model, including changes and a text summary (report) of the network analysis that includes assumptions, procedures, and results, and any graphics that clarify the analysis. The Engineering firm(s) shall verify the report format with the City. The computer network analysis shall be provided using the software listed below. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility.
   a. Computer network analysis for Gas: GasWork
   b. Computer network analysis for Water: InfoWater
   c. Computer network analysis for wastewater: InfoSewer
   d. Other design computer programs as approved by the City
4. Project reports.
5. Any other item specified in the contract for that project
6. Easement map and recording information

D. The selection of an Engineer for a specific project shall be based on experience with similar projects, references, performance in similar projects, and availability. This will include the ability to meet schedules, cost control, and responsiveness to client.

E. The Engineer shall have an engineering staff on-site everyday who is responsible, on behalf of the Engineer, for providing timely completion and response for performance of the terms of each Project Assignment Agreement during the progress of each individual project. Any deviation from this requirement is at the discretion of the City and must be approved in writing by the City prior to the start of any individual project.

ATTACHMENT C – COST PROPOSAL FORM RFP 23-24-052 – Utilities Engineering Services
(NOTE: This form shall not to be modified in any way)

Consulting Firm Bohannan Huston

ITEM	DIRECT LABOR / CLASSIFICATION	HOURLY RATE*
1	Principal Engineer	$ 260 (E7)
2	Project Engineer/Project Manager	$ 205 (E5)
3	Senior Engineer	$ 180 (E4)
4	Design Engineer	$ 160 (E3)
5	Engineer Intern	$ 135 (E2)
6	Engineering Technician	$ 150 (ET7)
7	Drafting Technician	$ 110 (ET4)
8	Survey Crew**	$ 280+
9	Construction Inspector/Observer	$ 140 (CO6)
10	Administrative/Clerical	$ 100 (AP4)
11	Field Testing and Investigations	$ case-by-case basis
		PERCENT MARKUP
12	Subcontractor Cost Markup	(%) 5%
ITEM	**MATERIALS / REIMBURSABLE EXPENSES**	**RATE**
	Travel	
13	Per Diem (per day) – Pre-Approval Required	City of Las Cruces Rate
14	Vehicle Mileage Rate (per mile)	Current IRS Rate
	Reproduction Services	
15	Black and White Copies (per copy)	$ invoiced at cost
16	Color Copies (per copy)	$ invoiced at cost
17	Prints 24x36 (per sheet)	$ invoiced at cost
18	Mylars 24x36 (per sheet)	$ invoiced at cost
19	Photo Quality Plots (per plot)	$ invoiced at cost
	Miscellaneous	
20	Any other costs incurred	Case by Case Basis

**Rates are to include all overhead costs and any and all assessment expenses*

***Survey Crew Rates are to include GPS and Total Station Equipment*

Notes: 1. Detailed man hour Estimates are required for T&M contracts and are to utilize corresponding rates

2. Rates in place at the time a project is contracted with the City will remain for the duration of the contract.

City Purchasing Bid Clerk
bidclerk@las-cruces.org

RE: City of Las Cruces Utilities Engineering Services | RFP 23-24-052

Dear Members of the Selection Committee:

We recognize the City of Las Cruces is in search of a qualified consultant to provide utilities engineering services on an as-needed basis for large, multifaceted projects from start to finish. Bohannan Huston, Inc., (BHI) offers the City of Las Cruces a highly qualified New Mexico-based team that has the expertise, availability, and resources all under one roof. We offer innovative approaches and relevant experience to provide the City of Las Cruces with local talent for your planning and design consulting services.

BHI is a staple in New Mexico's full-service engineering and surveying service industry and has been developing projects in Las Cruces from concept through construction. We understand the unique needs and culture of the community and can respond accordingly with support from our parent office as necessary.

Factors that position BHI as the right choice for this on-call contract for the City of Las Cruces include:

Continued Service: As a current on-call engineer for the City of Las Cruces, BHI has the capability to continue providing qualified staff for all phases of a project – from planning and design to construction management. We have worked previously on projects of all scales with several departments within the City, from Public Works, to Parks and Recreation and Utilities, and have a respected reputation with all of them.

Roots: BHI is an established member of the Las Cruces business community with a long-term commitment to the betterment of our City. Our Las Cruces office is staffed by employees who have deep roots in southern New Mexico, many who have studied in the area and now have made Las Cruces their home. When we work for the City, we are working for our home.

Trusted Team: The City of Las Cruces can continue to rely on BHI staff to ensure that your needs for engineering services are taken care of at any time. Leading our team will be Matthew Thompson, PE, as Principal-in-Charge, Tyler Hopkins, PE, as Project Manager, and Diana Gomez as Assistant Project Manager. They fully understand the challenges that many local governments in the area face, especially with budget or schedule constraints. As a team, we are prepared to come alongside the City of Las Cruces and help find effective solutions.

A Successful History of Performance: Our Las Cruces office has been serving the City for nearly 30 years. BHI is committed to providing extraordinary service that improves the quality of life for New Mexico and our clients. We have a large pool of resources – including our teaming partners Cobb, Fendley & Associates, Epsilon Systems Solutions, and COZ Engineering – with which to serve the City. This team of creative staff will be actively engaged in the pursuit of innovative, clear and concise, dependable solutions that meet your needs.

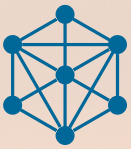
Thank you for the opportunity to submit this proposal for utilities engineering services. We are confident the City of Las Cruces will continue to find BHI has the right capabilities, people, experience, and approach to ensure that each project is a success.

Sincerely,

Matthew Thompson, PE
Senior Vice President

A. PROPOSED TECHNICAL APPROACH

Our multi-discipline structure allows BHI to provide end-to-end services, from planning and engineering studies to construction engineering on a variety of projects. Our approach ensures that we can assemble a highly qualified team – one that will leverage cutting-edge tools and techniques – to provide the right technological and cost-effective solution for each project. For any given task order, our general approach would be as follows:



RELY ON FIELD-SPECIFIC DATA We base our study and design efforts on actual field data. In almost all instances, actual conditions in the field predicate the design conditions and the implementation of the most feasible design solution. Our team members understand the value of field-specific data and will collect all relevant information, including surveying and sampling as necessary, for each project before analyses and solutions are developed.

INCORPORATE OPERATIONAL CONSIDERATIONS INTO THE DESIGN We value the operational and maintenance requirements of facilities and incorporate them into our designs. Designing facilities that are functional, effective, and operator-friendly is our goal.

APPLY QUALITY ASSURANCE/QUALITY CONTROL PRACTICES Quality of work is one of the core values at BHI. Fundamentally, the BHI team will refer to the BHI Quality Management System Policy Manual to govern the work being accomplished for City of Las Cruces projects. This manual provides the framework for the system of processes that govern our work. More specifically, BHI will use our tested and proven processes for design, project management, and construction management or administration to oversee the work performed under this contract. For each project, we develop a quality assurance/quality control (QA/QC) strategy that includes:

Staffing: Our QA begins with appropriate staffing, a strategy that ensures your project is performed by qualified personnel. Our team will begin with an internal review of the project scope, as defined during the kickoff meeting with your staff. The purpose of this review is to educate everyone involved on items such as project scope, deliverables, schedule, design criteria, team members and roles, and the project itself. Final plan documents are stamped, dated, and signed by the responsible New Mexico Registered Professional Engineer.

Schedule: The scheduling strategy includes milestones and scheduled inspections based on time frames established with the City. The team will hold weekly meetings to discuss project status and adjust staffing to meet your needs and schedules. Any changes that may impact the project will be communicated to you and will be documented to ensure that the schedule changes are agreed upon and known to all involved in the project.

Design Criteria: Our staff is trained in the latest design criteria. All current design criteria, manuals, standards, and directives are kept in a centralized library, located within the project team's work area.

Constructability Review: Team members will perform a constructability review to verify that the plans are "designed as it will be constructed" for a specific project. Traffic control during construction, construction phasing, work zone access, availability of materials, and the most applicable construction methods will be reviewed as part of this process.

Document/Plan Checking: Quality Control reviews will be conducted prior to submittals at key milestones. The reviews will evaluate design criteria for completeness and appropriateness and will ensure that documents are prepared according to your requirements and that they are well-organized, clear, concise, and technically and grammatically correct. The documents will also be reviewed to ensure compliance with generally accepted Professional Standards of Engineering Practices and applicable laws and regulations. Design deficiencies found during the process will be documented by marked-up drawings or reports and revised accordingly. The design file will include records of formal checks performed throughout the duration of the project.

COST CONTROL OF THE DESIGN PROCESS Our first rule of cost control during the design process is to establish with the City an accurately defined scope of work for the project. Second, experts in each discipline outline the activities and develop the work hours and expenditure budgets required to complete the necessary deliverables for the project. The project is monitored on a weekly basis to determine progress and confirm staffing

resources. BHI uses interactive accounting software that allows project managers to review project data and budgets at any time and holds meetings on a regular basis to keep our staff organized and productive.

COST CONTROL OF THE CONSTRUCTION PROCESS Internal communication of project scope is critical to successfully controlling the cost of construction. We invest a great deal of time to the design interface to ensure that estimates of probable construction costs meet both the project scope and the client's budget. These budgets include the necessary deliverables to design and construct the best project for your dollar. Construction cost estimates are prepared at key milestones during project development. A spreadsheet is used for compilation of project quantities and construction cost estimating. These estimates are compared to your budget to determine if it meets your expectations. If the cost estimates are above the budgeted amount and cannot be reduced through design efforts, we notify you immediately and either adjust the project scope to fit within the budget or assist you in seeking additional funding to build the project in its entirety.

COST ESTIMATING TECHNIQUE Our cost estimating approach begins with utilizing existing resources of available cost data from local municipalities (like the City), reviewing any available recently bid projects, NMDOT average unit prices, and an internal database BHI compiles with all projects we design and have bid data for. We also make an effort to have all of our engineers spend time in the field during construction of projects; this provides a solid understanding of construction methods and how they relate to costs. Our cost estimating methods are consistent with the bidding processes used by contractors and are representative of actual project values at the time of bidding. Estimating project construction costs is dependent on three main factors, as demonstrated to the right.

1. Accurate tabulation of all items to be included in the final product to be constructed.
2. Understanding of market conditions and materials based on construction in both public and private sectors.
3. Use of current bid prices from broad-based information sources.

As with all of our projects, we will use each of these bid pricing sources to provide the most representative cost estimate possible after adjusting for current market conditions. BHI also employs several construction engineering inspection staff, who are consulted if project bid items or conditions are unusual and may not fall within a typical unit price cost from a database.

B. & C. MAJOR TASKS TO BE ACCOMPLISHED AND SERVICES PROVIDED

COMPUTER NETWORK ANALYSES FOR WATER, WASTEWATER, AND GAS SYSTEMS

BHI uses the latest technologies for analyzing water supply and transmission systems; gravity sewer and pressure sewer systems; and high-, medium-, and low-pressure gas networks. We understand that “bad data in” results in “bad data out.” To ensure the accuracy of our models, we incorporate record drawings and operations and maintenance manuals, visit with operational personnel, conduct site visits, verify equipment models and data in the field, and perform calibration tests. BHI uses the modeling software that will best meet both the project’s and the client’s needs. Some of the computer network analysis programs we use include InfoWater, InfoSewer, InfoSWMM, H20NET, WaterCAD, GasWorks, SKM Power, GeoHMS, GeoRAS, HEC-HMS, HEC-RAS, HEC-FDA, and Civil3D Storm & Sanitary.

DESIGN OF WATER, WASTEWATER, AND GAS UTILITY SYSTEMS

Water: Our BHI staff has provided water infrastructure design services for southern New Mexico for over 20 years. Services include water treatment systems for iron and manganese, arsenic, and fluoride; elevated, ground, and subsurface storage tanks; domestic wells; booster pump stations; distribution mains and transmission lines; and chemical management

systems. BHI uses the InfoWater Suite, a GIS-based modeling software, to analyze water systems for hydraulic constraints and water quality achievement.

Wastewater: BHI is proud of the numerous wastewater infrastructure projects that we have been instrumental in bringing to fruition in New Mexico. BHI has provided services for various types of wastewater treatment systems, including conventional activated sludge with biological nutrient removal, clarification, sequencing batch reactors (SBRs), lagoon pond systems, recirculating sand filtration systems, and septic systems with leach fields. BHI also has extensive experience with design of gravity sewer collection systems, pressure sewer systems, lift stations, and force mains.

Natural Gas: BHI has extensive experience working with natural gas systems composed of low-, medium-, or high-pressure distribution pipe networks and related pressure regulation stations. BHI uses the latest GasWorks modeling software to analyze gas transmission, high-pressure, and low-pressure distribution systems. We have a current working model of the City's high-pressure system that is current and capable of being integrated into any low-pressure system analysis for use in future planning and development.

WELL HOUSE DESIGN

Our team has extensive experience with groundwater production wells. Throughout New Mexico, there are many design strategies for water well design. The City employs two types of groundwater pumping techniques, with larger wells using above-ground line shaft motors and smaller wells with in-ground submersible pumps and motors. These well pump house facilities have been standardized around a roller section allowing wellhead access for pump extraction attached to a permanent structure housing interior control valves, meters, and treatment systems. With highly trained staff, the City is able to continue to safely use chlorine gas as a primary disinfectant, as well as secondary chemical treatment using polyphosphate to inhibit corrosion, reduce calcium carbonate scaling, and sequester nuisance metals.

These well facilities exhibit multiple instruments and include various chemical disinfection system types possibly requiring control feedback. A priority is providing lightning protection at these facilities as they are notorious grounded facilities attracting strikes. Another priority energy management where specifying the most efficient motors possible is critical since these are large power use facilities. Recent integration into water wells has been the greater use of variable speed drives for motors to allow an operator to establish a specific flow setpoint. Although the energy efficiency drops due to heat loss in the electronics, at times it makes sense to utilize these devices to mitigate groundwater aquifer level drop to avoid exposing the top of the well screen which can cause sanding and premature well failure.

SCADA

(see Electrical Design entry below)

BIOLOGICAL TREATMENT PROCESS

Our wastewater team includes Dr. Ege Richardson, who brings extensive background in the application of biological processes for secondary treatment and anaerobic or aerobic solids digestion. With her expertise at hand, we are able to provide process diagnostics for optimization of existing aeration systems and identification of new processes, as well as evaluating specific manufacturer process team recommendations for soundness and applicability. At the core of the wastewater treatment process, the biological process engineering drives all other subprocesses whether it is defining the primary treatment goals, or outlining the tertiary treatment expectations, each process element is ultimately derived from the central biological treatment decisions. Our team will bring capability to bear for any particular situation that may require this expertise.

WASTEWATER PLANT PROCESS

As described above, the biological treatment process is the core or heart of the wastewater process. Beyond that expertise, our team will also bring experience regarding characterizing existing process elements that need to be renovated or replaced, or an entirely new aspect considered to expand capacity or achieve higher quality goals. Our team is familiar with the primary

treatment systems regarding influent pumping, odor control, screening, grit removal, and clarification. We are also very familiar with solids handling for digestion, dewatering, drying, and handling practices. Our tertiary process experience ranges from various disinfection practices of chlorination/dechlorination or ultraviolet light application, and various filtration applications for generating reclaimed water applications.

MASTER PLANNING

Our team's approach to high-level master planning is to view the potential growth patterns and strategically establish utility infrastructure to anticipate that expansion as well as optimizing the overall energy and labor expenditures to maintain the existing system. Our initial goals are to accurately establish the specific design criteria that will drive all other subsequent decisions. Once the establishment of past utility usage is defined, including conservation actions, then future actions are more clearly established when utility peak demands are well understood. Defining growth patterns and possible growth or population retraction zones is crucial to building a decision framework on where capital improvements are to be positioned and expanded upon. Coupling these decisions with a long-term financial plan and resulting fee and rate analysis is part of the services we provide to ensure the overall path of the utility is sound.

FEASIBILITY STUDIES

Drilling down from the overall master plan, our team can create specific feasibility studies involving alternative analysis and comparing materials in various scenarios to define the most appropriate selection. Life cycle analysis and public engagement also have bearings on the decision of infrastructure development and what the final product will need to be. Our team is fully qualified to provide each of those aspects to accomplish a specific feasibility study for water, sewer, or gas.

SOLID WASTE ROUTE STUDY

BHI employs a department in our parent office dedicated to planning and transportation planning. Their expertise would be used to work on solid waste route studies, and our team has worked on similar projects in the past. We are confident that our team can perform this part of the Utilities Engineering Contract with the City.

LAND USE PERMITTING

BHI has participated in numerous Land Use Planning and Urban Design projects that require coordination of existing and proposed land use as it relates to various infrastructure. The type of participation, level of effort, and product has varied, but the capabilities developed as a result of our depth of participation are extremely valuable. Our experience has been primarily with projects initiated by local municipalities, while in the process of making good decisions on future expenditures. The technical perspective BHI brings to the planning phase of a project supports a plan that is both feasible and implementable. BHI utilizes our expertise in comprehensive planning, transportation planning, water resources planning, engineering, and environmental planning to create successful planning documents as well as support the design of infrastructure development projects.

SUBSURFACE UTILITY EXPLORATION

The location of underground utilities is crucial to many engineering design and construction projects. The level of subsurface mapping is determined during the scoping phase of the project. The simplest approach for projects requires that the existing utility information obtained from the utility operators and facility owners be reconciled with surface evidence of utilities. Other projects require more in-depth utility data obtained through coordination with New Mexico One Call to have the utility lines marked by the utility operator, which is then surveyed and mapped. Additionally, BHI provides the ability to locate and map underground utilities in a non-disruptive manner using our underground utility locating equipment. We also have relationships with subconsultants that provide ground penetrating radar (GPR) and utility potholing. Our teaming partner, Cobb, Fendley &

Associates (Cobb Fendley), brings extensive experience in SUE services, and they are available to assist BHI with SUE needs for projects with the City.

BOUNDARY/EASEMENT SURVEY

BHI fully supports our engineering-based and independent clients with all types of boundary and property survey services. Plats of survey, subdivision plats, American Land Title Association (ALTA) surveys, and Public Land Survey System (PLSS) retracements can be utilized to support private- and public-based projects. From the creation and recording of easements and legal descriptions to definition of highway right-of-way limits, we are familiar with all types of boundary survey issues. Tasks included in the boundary survey category include:

Plats: BHI has created and recorded literally thousands of plats of survey or subdivision plats across Southern New Mexico. Our team members are familiar with state and local regulations for plat documents. BHI uses a combination of public and proprietary software to efficiently and quickly create plat documents for our clients.

Right-of-Way Maps: BHI has a long working relationship with both the City and the New Mexico Department of Transportation (NMDOT), as well as other agencies and municipalities throughout the state, and our survey team has developed substantial expertise in the definition of existing rights-of-way, right-of-way surveying and mapping, and right-of-way monumentation.

ALTA/ACSM Surveys: BHI regularly prepares survey documents that meet ALTA standards for a variety of public and private clients.

Legal Descriptions: BHI's experience in writing and filing legal descriptions, such as easements, rights-of-way, permitting, mortgage, and title applications, includes all types of applications for all types of clients.

PLSS Retracements: We excel in the retracement of sectionalized land and have experience with multiple types of major boundary surveys, including PLSS retracement; land grant boundaries; and municipal, county, and state, and international boundaries.

BHI has a long working relationship with the City, as well as many State of New Mexico departments, other municipalities, agencies, and utility companies throughout the state. We excel in the definition of existing rights-of-way, development of new right-of-way and easements, and monumentation of such encumbrances.

NPDES & SWPP COMPLIANCE

NPDES Compliance: NPDES Program Compliance – Clean Water Act Section 402, National Pollution Discharge Elimination System (NPDES) requires pollutant management for construction phase activities under the Construction General Permit. This program mandates the completion of a Storm Water Pollution Prevention Plan (SWPPP) and filing of a Notice of Intent (NOI). BHI engineers are very familiar with this program having written numerous SWPPPs for major development, transportation and institutional projects and filed the NOI on behalf of the project owner. In addition, we are well versed in the design of Best Management Practices (BMPs) required for sediment and pollution control on construction sites and development projects. We also pride ourselves on the design and development of innovative BMPs for post construction conditions that weave in Arid LID/GI elements that aid in managing storm water quality in the long term.

SWPP Compliance: BHI can assist in the preparation of SWPPPs. BHI's experience includes SWPPPs for clients such as Sandia National Labs, Intel Corporation, Bernalillo County, Ventana Ranch Development, Dominion Plaza, Monterrey Park, and Rancho Encantado.

In addition to plan preparation, BHI has sponsored training seminars for consultants, government agencies, contractors, and other clients. These training sessions included the instruction in compliance with SWPPP preparation, NOI and Notice of Termination (NOT) filing, and the additional New Mexico requirements for sedimentation load calculations using RUSLE (Revised Universal Soil Loss Equation).

ELECTRICAL DESIGN

Booster Stations: Our team has extensive experience in water utility infrastructure including booster stations. Current water booster station technology involves many complex systems to allow reliable continued service. Power systems must include an onsite power standby generator in case of power loss even though it may only last for short periods of time. Current water booster stations usually involve a higher level of controllability such as variable speed drive motors driving pumps to maintain pressure. This requires programmable logic controllers and other electronic features, including Supervisory Control and Data Acquisition (SCADA) links to central terminals.

Lift Stations: Similarly, our team also has extensive experience with sanitary sewer lift stations. Lift stations are nearly identical to booster stations from the reliability aspect and being crucial to provide the redundancy and robust equipment to handle all issues that may arise throughout the year. Lift stations bring many more issues to address such as the need for greater ease of maintenance, hazardous area classifications, and extensive corrosion protection evaluations. The complexity of the instrumentation and controls associated with these pump stations can be extensive but will allow careful monitoring and control of such critical facilities that cannot tolerate extended failures.

Odor Control Stations: Our team is very familiar with integrating odor control stations where necessary. These types of facilities usually are found at the main water reclamation facility entrance or at large central lift stations. Whether biomass pile or manufacturer canister-type odor control, these units require fan control, water moisture monitoring, and hydrogen sulfide gas monitoring to maintain proper ambient gas control to avoid local residence impact. Combining these into a local control panel with remote access can allow central monitoring to maintain a proper biomass level.

Building Electrical System Design: Onsite power generation equipment, using a natural gas or diesel fuel source, is typically relegated to critical facilities, such as booster stations or lift stations and treatment plants. Our team is experienced in understanding the utility power robustness and its limitations that feed into the need for building expensive onsite power generation facilities. Ensuring the facility is constructed with proper materials and arranging consistent annual maintenance of equipment is the key to ensuring long life and power when it is absolutely needed.

COMPUTER NETWORK ANALYSIS FOR GAS (GASWORK), WATER (INFOWATER), AND WASTEWATER (INFOSEWER).

See Computer Network Analyses for Water, Wastewater, and Gas Systems entry above.

SOLID WASTE STUDIES, LANDFILL SYSTEM DESIGN AND ANALYSIS

Planning and design experience for solid waste handling is unique, and few companies have staff with this knowledge in-house. For work on regional waste management systems, BHI has supported municipal clients with various aspects of solid management facilities that may need optimization such as improved stormwater management or roadway access. For an extensive new solid waste facility from the ground up, BHI would search out and team up with a partner consulting firm if this service was needed at a future date.

ENVIRONMENTAL SURVEYS, ASSESSMENTS MONITORING, AND MANAGEMENT

To provide environmental services under this contract, BHI has teamed with Epsilon Systems Solutions, Inc. Epsilon brings a broad experience background to the team and specializes in the preparation of environmental documents that comply with the National Environmental Policy Act (NEPA) as well as other local, state, and federal environmental laws and regulations. Epsilon's capabilities include environmental documents, biological evaluations, cultural resource surveys, archaeological excavations, noise and air quality studies, hazardous materials investigations, paleological, and other environmental studies. As a team member with BHI, they will work closely to determine the accurate level of effort for each project and produce the type of documentation required to complete the permitting process.

GEOTECHNICAL ASSESSMENTS

To provide geotechnical services under this contract, BHI will work closely with COZ, Engineering, Inc. (COZ) for any geotechnical services required by the City. Design and construction of functional and cost-effective structures require a thorough understanding of local soil, rock, and groundwater conditions. COZ provides a wide range of geotechnical assessment services to support all phases of a project, from preliminary design through completion of the building process.

EXPERT WITNESS

Senior BHI staff are able to provide expert witness testimonials in their respective fields, as may be required by the City.

PROJECT MANAGEMENT

BHI follows a customized in-house Project Management Methodology to facilitate the successful delivery of our projects. By using a standardized process with quality checks throughout the project, we are better able to manage staffing, budgets, and project schedules. We manage our projects in our in-house developed BHTracker which keeps our whole team apprised of all information made available and the deliverables created. That information is available at all times throughout the project and can incorporate the City's project management staff as well. For the City, the importance of this methodology is the improved quality and cost control it provides, helping us meet project schedules and budgets more effectively.

This BHI-tailored approach provides our project managers a proven tool that helps ensure that client project goals are accomplished, the schedule is met, and the project delivered is the project expected. While each project presents a unique scope, schedule, budget, and deliverable, having defined steps that move our projects from negotiation to closeout provides our clients the assurance that they can expect a focus on effective project management from our company that is consistent from project to project.

CONSTRUCTION INSPECTION

For us, projects are only complete after the planning and design elements have been transformed into the final constructed product. At BHI, our engineering team understands all of these steps and provides a wide range of services during construction. We know that maintaining strong communication links between the contractor and owner, establishing and meeting schedules, providing a watchful eye during the construction of key elements, and resolving problems in a professional and expeditious manner are critical for success.

Our construction management team can provide a wide range of services that "lift the load" for you during construction. One of the more critical services from this team, that has a high return value for the City, is maintaining a full-time construction observer to inspect the project progress for compliance with construction documents to ensure the infrastructure is delivered in the condition and quality expected. Having this oversight enables the confidence that underground systems were installed in a high-quality workmanship manner, similar to the expectations for above ground systems which are easily visible. Without this oversight assurance, it leaves the door open to possible contractor errors or poor workmanship that degrade the final product.

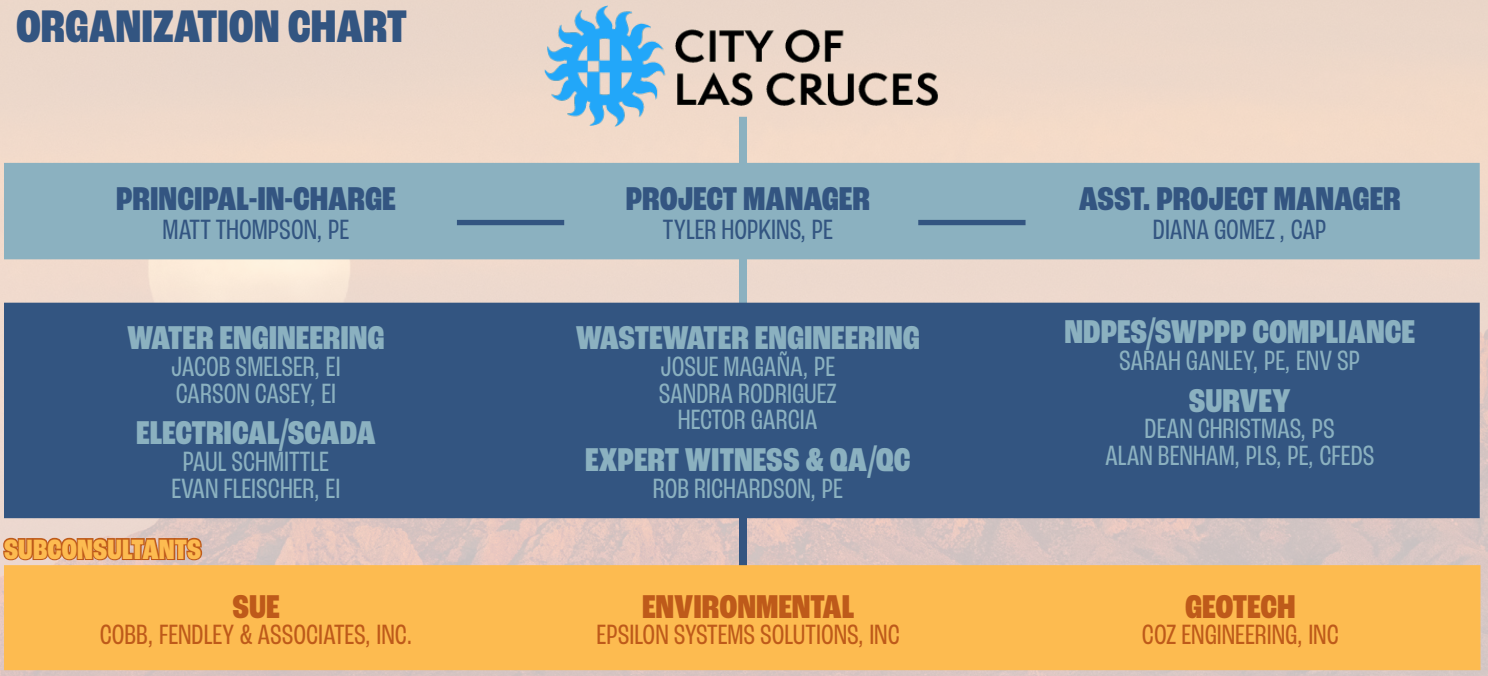
D. TYPICAL PROJECT SCHEDULE/TIMELINE

On-call task order schedules can vary greatly, depending on a number of factors such as the complexity of the scope, any permitting requirements, jurisdiction coordination, public involvement, etc. Upon receipt of a task order, Project Manager Tyler Hopkins and/or Assistant Project Manager Diana Gomez will prepare a scope and fee document to include a proposed schedule and manhour estimate for the City's ultimate approval. Any modifications to the schedule will be made with the City's approval.

2. PROJECT TEAM

Our depth of experience and breadth of capabilities — as witnessed by the completion of a significant number of diverse projects in a variety of locations — are continually expanding. Our proposed personnel for this contract are shown in our organization chart by competency, many of whom you are already familiar with as the same folks working with the City to complete task orders under our most recent on-call contract (further detailed in the next section). For this contract, we've added additional competency to the organization chart – Assistant Project Manager Diana Gomez – to ensure that our team continues to meet project design and delivery expectations.

ORGANIZATION CHART



PROJECT TEAM

Below, you will find qualifications of our team. Each staff member is qualified to do the work proposed under this on-call contract, and each has the capacity to take on new task orders. As each task order may vary in expertise required, the percent of time each team member has available for a project will vary. A manhour estimate will be provided for City review upon issuance of a task order.

Name | Location | Qualifications	Years' Exp.	Expertise | Competence
Matt Thompson, PE | Las Cruces | PE NM #13868 | BS Electrical Engineering, BS Mechanical Engineering	32	Project Development and Management | Contract Oversight | Electrical and Mechanical Engineering | Municipal Infrastructure Planning and Design
Tyler Hopkins, PE | Las Cruces | PE NM #20677 | BS Civil Engineering	17	Project Development and Management | City of Las Cruces Familiarity | Multi-Disciplined Expertise (incl. Utility Engineering) | Federal and State Regulatory Requirement Familiarity
Diana Gomez, CAP | Las Cruces | Certified Administrative Professional: NM #93941001, Certificate Project Management | BS Computer Science	20	Project Development and Management | City of Las Cruces Familiarity | Federal and State Regulatory Requirement Familiarity | Grant/ Funding Administration
Jacob Smelser, EI | Las Cruces | EI NM #7726 | BS Civil Engineering	3	Water Resources Experience | City of Las Cruces Familiarity

PRINCIPAL OFFICER RESPONSIBLE FOR CONTRACT ADMINISTRATION

Matthew Thompson, PE | Senior Vice President
425 S. Telshor Blvd., Suite C-103 | Las Cruces, NM 88011
575.532.8670 | mthompson@bhinc.com

SUBCONSULTANTS (AS-NEEDED)

BHI maintains relationships with providers of specialty services such as those listed below should any task order require them. We also understand the City currently holds on-call contracts with specialty service providers as well. We will obtain approval of the use of any subconsultant on any task order prior to commencing work, or will work with one of the City's current contracted provider, as the City prefers.

Subconsultant	Qualifications
ENVIRONMENTAL Epsilon Systems Solutions, Inc. 205 West Boutz Road Bldg. 4, Suite 3 Las Cruces, NM 88005	Epsilon specializes in providing high-quality environmental compliance services. The firm's professional archaeologists, historians, architectural historians, biologists, National Environmental Policy Act (NEPA) specialists, and GIS personnel have served federal, state, municipal, and private project proponents in the Southwest since 2006. Epsilon's team provides sensitive plant and wildlife surveys, biological baseline studies, mitigation planning and monitoring (selection and implementation of best management practices), Clean Water Act 404 and 401 evaluations, wetland identification, and the day-to-day activities involved with threatened and endangered species program management.
GEOTECHNICAL COZ Engineering, Inc. PO Box 13331 Las Cruces, NM 88013	COZ Engineering will provide geotechnical services. Their capabilities include subsurface exploration and testing; foundation analysis and design; in-situ testing and performance monitoring; earth structures, slopes, and retention systems; dynamic analysis and evaluation; soil stabilization and ground improvement; pavement evaluation; and subgrade and material evaluation.
SUE Cobb, Fendley & Associates, Inc. 11427 Rojas Dr. Ste B El Paso, TX 79936	Since 1997, CobbFendley has provided SUE services for leading private and public sector clients including Departments of Transportation (DOTs), toll road authorities, utility companies, and various municipalities. The firm has provided SUE services on thousands of projects, working with clients and design consultant teams to assess and implement SUE strategies that eliminate utility conflicts and reduce costly construction delays.

LOCATION(S) OF OFFICE(S) WHERE THE WORK WILL BE PERFORMED, AND PERCENT OF WORK TO BE PERFORMED AT EACH

Work under this contract will be based primarily in our Las Cruces office. When required, certain specialized design work will be performed in our Albuquerque office. All of our offices are also equipped with video-conferencing capabilities that can be especially useful during project planning and design. Meetings can be conducted with out-of-town suppliers or contractors, government agencies, or our Albuquerque office staff and provide the feel of a face-to-face discussion without incurring undue travel costs or losing time waiting for participants to arrive in town. We anticipate that 75% of the work under this contract will be performed by our Las Cruces staff.

NAME, ADDRESS, AND NEW MEXICO REGISTRATION OF THE PROFESSIONAL RESPONSIBLE FOR AND IN DIRECT CHARGE OF THE WORK

All contract work resulting from this award will be led by Matthew Thompson, Principal-in-Charge (NM PE #13868), with Tyler Hopkins (NM PE #20677) acting as Project Manager in direct charge of the work. Matt and Tyler are both based in our Las Cruces office, and both are readily available to handle any and all matters associated with this contract. BHI's Las Cruces office is located at 425 S. Telshor Boulevard, Suite C-103, Las Cruces, New Mexico 88011. Matt and Tyler can be reached at 575.532.8670 or at mthompson@bhinc.com and thopkins@bhinc.com.

3. PERFORMANCE OF THE FIRM

AGGIE UPTOWN LAS CRUCES MASTER PLAN | NEW MEXICO STATE UNIVERSITY

BHI completed preliminary and final design efforts with construction phase support for the first phase of a larger 128-acre development near the New Mexico State University's Golf Course initiated as part of a master planning effort to expand NMSU's commercialization of significant local land resources. BHI was responsible for sitework, roadway, water, wastewater, and natural gas utility design and construction support. A traffic analysis was also performed to evaluate the impact of the development on the surrounding City and NMDOT transportation network. Extensive coordination with the City of Las Cruces and NMDOT was required to establish a comprehensive strategy of the ultimate buildout. BHI also coordinated with utility owners including City of Las Cruces, El Paso Electric, Century Link, Comcast, etc. in support of easement locations, platting approvals, and general design coordination.

REFERENCE
Jose Lorea, Assistant Director
Project Development and Engineering
575.646.1234 | jlorea@nmsu.edu

MESQUITE-BRAZITO WASTEWATER COLLECTION SYSTEM, PH. 2 | LOWER RIO GRANDE PUBLIC WATER WORKS AUTHORITY

BHI provided several services to LRGPWWA for this project, including planning, design, and construction. When BHI got involved, the initial planning for the project, in the form of a PER, had already been completed by another consulting firm. The PER was used by LRGPWWA to acquire funding primarily from USDA for the entire project. However, the PER did not satisfy the vision of what LRGPWWA wanted in the expansion of their wastewater collection system. BHI became involved in and was responsible for amending the original PER and moving forward with a design that would maximize the use of gravity sewer collection pipelines and would minimize the use of individual residential grinder pump stations. As a result of the PER amendment, the funding that had been secured was not adequate to complete the entire project, and, as such, the project needed to be broken into two phases.

REFERENCE
Martin G. Lopez, General Manager
575.233.5742 ext. 1004
martin.lopez@lrgauthority.org

The first phase of design included 40,000 LF of gravity sewer main, 19,000 LF of sewer force mains, 4 lift stations, 160 epoxy coated manholes, SCADA integration into the existing and new wastewater facilities, provisions for dewatering, and property acquisition. Sewer service lines were designed from the main to the individual residential homes. As part of the individual sewer hookup, the process of decommissioning septic tanks was also included once the collection system became operational.

Throughout the design process, BHI was able to adapt to the changing needs of the client as additional areas to be served were added and designs had to be adjusted to meet requirements established by the permitting agencies. Communication and cooperation with the client and multiple government agencies, including USDA, NMDOT, NMED, EBID, and Doña Ana County, were critical in producing a successful project.

SOUTH CENTRAL WASTEWATER LIFT STATIONS REHABILITATION | DOÑA ANA COUNTY

The Doña Ana County South Central Wastewater Lift Stations Rehabilitation Project was to provide design and construction phase services to rehabilitate 18 of Doña Ana County's south central sanitary sewer lift stations. Most of the existing lift stations were constructed over 20 years ago and were in need of major repairs. The renovations would involve the removal and replacement of pump bases, corroded discharge pipes, and deteriorated plug valves and check valves. Other miscellaneous deteriorated equipment such as conduits, pipe support brackets, and coatings were also evaluated and replaced accordingly.

REFERENCE
Robert Herrera, Parks & Facilities Manager | 575.525.6182
roberthe@donaanacounty.org

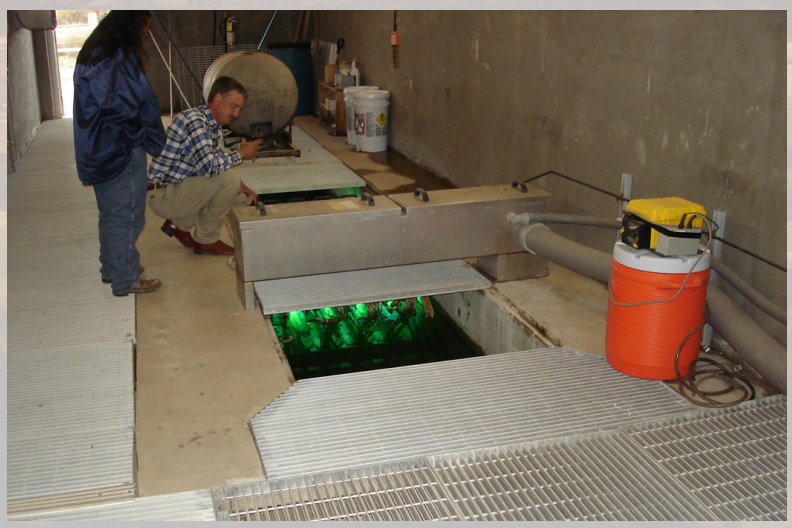
Due to the limited amount of funding acquired, the final overall number of lift stations that could be rehabilitated were limited. In order to establish a priority project list, BHI met with Doña Ana County staff to analyze each lift station condition, compare estimated scope of work, and produce an estimated cost for each. A priority list of lift stations with a high-low for base bid and bid alternate structure was created in order to bid and construct the most urgent lift station needs first.

This project has completed construction, and all lift stations have been re-commissioned. BHI was in constant communication with Doña Ana County staff and the contractor to make fast decisions on these additional components while lift station bypass pumping is in place. The intent of this project was to rehabilitate as many lift stations as possible, providing them with an additional 20-year lifespan. Although perhaps a more difficult engineering problem, restoration during full operation can be a critical cost savings versus full replacement, and in this example saved Doña Ana County significant funding expenditures.

SOUTH CENTRAL WWTP PLANT-WIDE IMPROVEMENTS | DOÑA ANA COUNTY

BHI provided planning and design services for various facility upgrades at the main South Central WWTP facility servicing most of the area south of Las Cruces. These services included replacing failed process elements, such as the plant entrance works screening and grit removal systems, septage handling station, sludge handling, and main aeration system renovation. The entrance works originally part of the upper concrete structure has greatly deteriorated due to hydrogen sulfide gas exposure, and this project relocated these elements to a separate ground-level structure to enable proper screening and grit removal allowing a more accessible structure. All plant flows were re-routed around the facility and connected directly to the aeration basins. Other improvements involved cleaning and renovating the original aeration systems and renovating the aeration blowers and control valves. The solids handling process now utilizes both concrete drying beds as well as a belt-press machine. This belt press operation will be further improved by weatherizing the building enclosure housing the belt-press to allow easier solids dewatering operations during winter conditions.

REFERENCE
Robert Herrera, Parks & Facilities Manager | 575.525.6182
roberthe@donaanacounty.org



A second phase was recently added and is nearing construction completion. It is intended to replace the ultraviolet light effluent disinfection systems and relocate them to a more accessible location on the plant exterior. A recent discharge permit modification required that effluent dissolved oxygen levels be increased upon discharge to the Rio Grande. This will be accomplished with a cascade aeration structure at the final outfall point.

A third phase underway will be a full renovation of the low-voltage electric and SCADA systems to be more robust to weather storm events and power outages the plant has experienced in the past. Redundant power system panelboards will be used to enable multiple source points and eliminate singe-point failure situations, while enhancing utility surge protection systems.

ADDITIONAL PROJECT EXPERIENCE WITH THE CITY OF LAS CRUCES

JACOB HANDS WWTP WEST AND EAST PRIMARY CLARIFIER RENOVATION | CITY OF LAS CRUCES

The existing Jacob Hands WWTP treats wastewater from the majority of the City of Las Cruces' collection system. The process train has two 8.5 MGD primary treatment clarifiers, known as the west and east clarifiers, which are 95-foot diameter concrete structures with a protective membrane surface liner which were constructed in 1983. Each clarifier has an internal clarifier solids rake system made from galvanized steel, which was beginning to exhibit significant corrosion. The drain pipe system valves were broken and would require a deep excavation next to the structure. None of the process pipe had been inspected since construction and, as such, was in an unknown condition. The main structure concrete surfaces had begun to exhibit deterioration after the membrane liner had failed many years before.

This project initially began with an assessment study of the existing west primary clarifier structure, along with its equipment. BHI conducted a review of the original record drawings for the clarifier and surrounding yard piping. The firm then completed a field assessment that included video footage of existing piping, structural assessment of the visible portions of the concrete structure, and existing galvanized steel clarifier equipment. BHI worked with the original equipment manufacturer to aid in the assessment of the existing equipment and to provide quotes for rehabilitation or full replacement of the clarifier equipment. Due to the difficulty of plant space, bypass issues, and costs, the decision was made to salvage and renovate the original structure in place.

To salvage the original concrete structure would require renovating the concrete surface and installing a new membrane liner with a more modern polyurethane lining system. All original underground ductile iron piping was cleaned and had new epoxy lining installed. These two aspects provided the entire structure with a resistance to the primary clarification process to help it last another 30 years. Several options for rehabilitation of the clarifier mechanical system were also explored, but the ultimate decision was made to install a new stainless steel rake structure to replace the older corroded system.

By providing a more robust and corrosion-resistant facility with lined concrete and stainless-steel metallic assemblies for the core of the clarifier, the older facility was fully restored, and the lifespan of the original west primary clarifier was doubled upon construction completion in 2018. An identical process was initiated for the east primary clarifier, and that rehabilitation construction was completed in 2022.

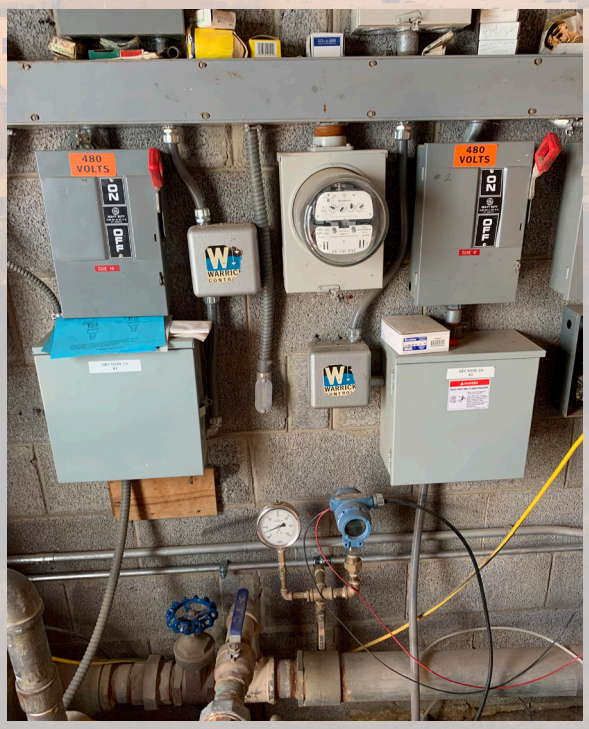
BRITTANY ESTATES AND ESTADOS SERENOS SEWER EXTENSION | CITY OF LAS CRUCES

This is an ongoing project currently in the final stages of design and consists of installing a gravity sewer collection system within the Brittany Estates and Estados Serenos Subdivisions. Wastewater effluent is currently handled with a homeowner's individual septic tank and leach field. The installation of a gravity sewer collection system into these two subdivisions will allow 126 residents connect to the City's sewer utility and abandon their septic systems. To provide sewer service to these areas, either a new gravity collection pipeline also needed to be extended from the nearby Dove Crossing Lift Station, or a new lift needed to be constructed within the subdivisions. BHI initially provided a design analysis report (DAR) to compare both options as to which one would be the most cost effective prior to starting the preliminary design. In consultation with City personnel, it was decided that the sewer pipeline extension was the best way forward. Along with the DAR, BHI has provided survey, right-of-way determination, preliminary design, and final design services to produce plan layouts, profiles, and sections in compliance with City of Las Cruces standards. BHI has also coordinated with and managed two subconsultants during this project. One was with an environmental engineering firm to complete the SWPPP that will be used during construction to control storm runoff and protect areas outside of the project limits. A second subconsultant was used to complete a geotechnical investigation to ensure that the roadway will be properly restored after the pipeline installations are complete. Along with the sewer extension, BHI was also tasked with incorporating the replacement of all of the existing asbestos concrete water pipelines into the overall design of the project. This work will also include the replacement of isolation valves, fire hydrants, and water service lines. The remaining tasks that BHI is contracted to do for this project includes public outreach meetings as well as bidding and construction administration support.

CALLE JITAS STREET NATURAL GAS HIGH- AND LOW-PRESSURE SYSTEM EXTENSIONS | CITY OF LAS CRUCES

This project consisted of design and construction phase support of new 6-inch high pressure distribution and 4-inch low-pressure distribution pipeline extensions from existing distribution pipelines in the Calle Jitas Street area. BHI completed the design of approximately 4,500 linear feet of 6-inch high-pressure gas pipeline and 620 linear feet of 4-inch low-pressure gas pipeline to Las Cruces Utilities standards. Our scope of work also included design survey, bid administration, and the preparation of one recorded easement document to facilitate the easement acquisition.

WATER BOOSTER STATION FACILITIES ELECTRICAL IMPROVEMENTS | CITY OF LAS CRUCES



The City of Las Cruces contracted BHI to provide engineering services for four water booster station facilities: Hacienda, Upper Mission Bell, Las Alturas, and Tellbrook. The design services provided were to incorporate improvements to the facilities' electrical services, feeders, branch circuits, and control circuits. In coordination with EPEC, the BHI team assessed all of the existing facilities to identify the necessary modifications to upgrade to appropriate amperage services to handle the expected new and existing motor loads being planned by Las Cruces Utilities staff. After reviewing the need for the expanded facility loads and services sizes with City staff, our team prepared full construction plans, including power one-line diagrams, to allow contractor bidding and selection. We supported this project through the bid phase as well as full construction administration support up through facility final commissioning.

PROJECT ASSIGNMENT AGREEMENT

23-24-052 UTILITIES ENGINEERING SERVICES

PROJECT NAME

Pursuant to terms and conditions of City of Las Cruces (CITY) Contract No. 23-24-052 dated June 1, 2024 between the CITY and Bohannan Huston, Inc. (ENGINEER), as amended and incorporated herein by reference, the City and Contractor hereby agree on this _____ day of _____, 20___, as follows:

1. In a satisfactory and proper manner, the ENGINEER shall perform SERVICES as proposed in response to the CITY's RFP No. 23-24-052 and ENGINEER's proposal as set forth in ATTACHMENT A attached hereto.

2. The estimated completion date is number days after a Notice to Proceed is issued by the CITY to the ENGINEER.

3. In consideration for the satisfactory completion of the work agreed to herein, compensation shall be made in the amount of $dollars.cents, plus NMGRT. Invoices issued by the ENGINEER shall be made monthly / upon completion of project with payment by the CITY being made within 30 days upon receipt of undisputed invoice.

CITY OF LAS CRUCES

PROFESSIONAL SERVICES AGREEMENT

THIS AGREEMENT, made and entered into on this _____ day of _____, 2024 by and between the City of Las Cruces, New Mexico, hereinafter called “CITY” and Cobb, Fendley & Associates,Inc., of 3820 Academy Parkway North NE, Houston, TX, 77040, hereinafter called “CONTRACTOR”.

1. PROJECT DESCRIPTION
Utilities Engineering Services on an as needed basis via Project Assignment Agreements (Attachment “A”) during the term of this AGREEMENT.

2. SCOPE OF SERVICES
In a satisfactory and proper manner, the CONTRACTOR shall perform SERVICES, as proposed in response to the CITY’S RFP No. 23-24-052, as set forth in Exhibit A, attached hereto and made a part of this Agreement.

The CONTRACTOR is authorized to extend the same terms and conditions of this Agreement to other governmental entities conditioned upon the procurement laws and regulations of those entities. The CITY shall not be a party nor have any liability relating to such extensions.

3. APPROPRIATIONS
The terms of this Agreement are contingent on sufficient appropriations and authorization being made by the City Council for the performance of this Agreement. If sufficient appropriations and authorizations are not made by the City Council, this Agreement shall terminate upon written notice given by the CITY to CONTRACTOR. The CITY’S decision as to whether sufficient appropriations and authorizations exist shall be accepted by CONTRACTOR and shall be final.

4. COMPENSATION
The CITY shall compensate CONTRACTOR for the performance of SERVICES under this Agreement an amount agreed to for each assigned project, plus applicable taxes. CONTRACTOR shall perform the SERVICES upon receipt of a purchase order or written Notice to Proceed for each assigned project from the CITY. The CITY cannot authorize costs to be incurred prior to such written Notice to Proceed. CONTRACTOR shall submit invoices upon completion of the project. CITY shall pay invoices Net 30 days upon receipt of undisputed invoice.

CONTRACTOR is responsible for payment of State of New Mexico Gross Receipts Tax levied on the amounts payable under this Agreement. CONTRACTOR agrees to comply with all federal and state tax payments and report all items of gross receipts as income from the operations of its business.

5. DEVOTION OF ADEQUATE TIME
CONTRACTOR will devote the necessary hours each week to the performance of projects that are required by the CITY and it will serve the CITY diligently and faithfully,

and according to its best ability in all respects and will promote the best interests of the CITY.

6. TERM AND SCHEDULE
This Agreement shall become effective on June 1, 2024 for a term of 5 years through May 31, 2029.

CONTRACTOR shall perform the SERVICES in accordance with the time set forth as agreed upon by the CITY and CONTRACTOR and as agreed to for each project assigned under the terms of this Agreement.

7. EXTENSIONS, CHANGES, AND AMENDMENTS
This Agreement shall not be extended, changed, or amended except by instrument in writing executed by the parties. The CITY shall not be liable for payment of any extra services nor shall CONTRACTOR be obligated to perform any extra services except upon such written agreement. Such written approval shall indicate the date said extension, change, or amendment is effective and shall be signed by the parties to this Agreement. In the event that the parties cannot reach agreement as to a particular change, the issue shall be resolved pursuant to Article 21.

8. CHANGES AND EXTRA SERVICES BY THE CITY
The CITY may make changes within the general scope of the SERVICES plus may also request CONTRACTOR to perform other extra services not incorporated within the Services set forth in this Agreement. If the CONTRACTOR is of the opinion that such change causes an increase or decrease in the cost and/or the time required for performing the changes or other services required by the City, CONTRACTOR shall so notify the CITY of that fact within five (5) business work days from the date of receipt of change by the CITY. The CITY shall provide written response to the CONTRACTOR within five (5) business work days from the date of receipt of CONTRACTOR’S written notification.

9. CHANGES AND EXTRA SERVICES BY THE CONTRACTOR
In the event a condition is identified by the CONTRACTOR which, in the opinion of the CONTRACTOR, changes the services, costs, and/or time required for performance under this Agreement, the CONTRACTOR shall provide written notification to the CITY within five (5) business work days of such identification. The CITY shall respond in writing to such notification within five (5) business work days from the date of receipt of CONTRACTOR’S notification.

10. DELAYS
In the event that performance of SERVICES is delayed by causes beyond reasonable control of CONTRACTOR, and without the fault or negligence of CONTRACTOR, the time and total compensation for the performance of the SERVICES may be equitably adjusted by written agreement to reflect the extent of such delay. CONTRACTOR shall provide the CITY with written notice of delay pursuant to Article 9 including therein a description of the delay and the steps contemplated or actually taken by

CONTRACTOR to mitigate the effect of such delay. The CITY will make the final determination as to reasonableness of delays.

11. TERMINATION
This Agreement may be terminated by either party hereto upon fifteen (15) calendar days written notice in the event of substantial failure by the other party to perform in accordance with the terms of this Agreement through no fault of the terminating party. This Agreement may also be terminated by the CITY for its convenience or because the PROJECT has been permanently abandoned, but only upon fifteen (15) calendar days written notice to CONTRACTOR.

In the event of termination, CONTRACTOR shall be compensated for all services performed and costs incurred up to the effective date of termination for which CONTRACTOR has not been previously compensated.

Upon receipt of notice of termination from the CITY, CONTRACTOR shall discontinue the SERVICES unless otherwise directed and upon final payment from the CITY deliver to the CITY the required number of copies of all data, drawings, reports, estimates, summaries, and such other information and materials as may have been accumulated by CONTRACTOR in the performance of this Agreement, whether completed or in process.

12. RECORDS AND AUDITS
CONTRACTOR will maintain records indicating dates, length of time, and services rendered. The CITY has the right to audit billings both before and after payment, and contest any billing or portion thereof. Payment under this Agreement does not foreclose the CITY'S right to recover excessive or illegal payments. CONTRACTOR will retain records for five (5) years after the completion of the project.

13. DISCLOSURE AND OWNERSHIP OF DOCUMENTS, PRODUCTS, DESIGN, ELECTRONIC FILES
All technical data, electronic files, and other written and oral information not in the public domain or not previously known, and all information, electronic files, and data obtained, developed, or supplied by the CITY will be kept confidential and CONTRACTOR will not disclose to any other party, directly or indirectly, without the CITY'S prior written consent unless required by lawful order.

All technical data, electronic files, products developed, operational parameters, blueprints, and other information and work of the CONTRACTOR shall be the sole property of the CITY and shall be delivered to the CITY when requested and at the end of the Agreement.

14. INDEPENDENT CONTRACTOR
CONTRACTOR represents that it has, or will secure, at its own expense, all personnel required in performing the SERVICES under this Agreement. Such personnel shall not be employees of, nor have any contractual relationship with the CITY. CONTRACTOR,

consistent with its status as an independent contractor, further agrees that its personnel will not hold themselves out as, nor claim to be officers or employees of the CITY by reason of this Agreement.

To the extent that CONTRACTOR employs any employees, CONTRACTOR shall be solely responsible for providing its own form of insurance for its employees and in no event shall CONTRACTOR's employees be covered under any policy of the CITY.

CONTRACTOR'S retention hereunder is not exclusive. Subject to the terms and provisions of this Agreement: (i) CONTRACTOR is able, during the Term hereof, to perform services for other parties; and (ii) CONTRACTOR may perform for its own account other professional services outside the scope of this Agreement.

CONTRACTOR is and shall be an Independent Contractor and shall be responsible for the management of its business affairs. In the performance of the work under this Agreement, CONTRACTOR will at all times be acting and performing as an Independent Contractor, as that term is understood for federal and state law purposes, and not as an employee of the CITY. Without limitation upon the foregoing, CONTRACTOR shall not accrue sick leave, jury duty pay, retirement, insurance, bonding, welfare benefits, or any other benefits, which may or may not be afforded employees of the CITY. CONTRACTOR will not be treated as an employee for purposes of: Workers' Compensation benefits; the Federal Unemployment Tax Act; Social Security; other payroll taxes, federal or any state income tax withholding; or the employee benefit provisions described in the Internal Revenue Code of 1986, as amended. Neither the CITY, nor its agents or representatives, shall have the right to control or direct the manner, details or means by which CONTRACTOR accomplishes and performs its services. Nevertheless, CONTRACTOR shall be bound to fulfill the duties and responsibilities contained in the Agreement.

15. NO JOINT VENTURE OR PARTNERSHIP

Nothing contained in this Agreement shall create any partnership, association, joint venture, fiduciary or agency relationship between CONTRACTOR and CITY. Except as otherwise specifically set forth herein, neither CONTRACTOR nor CITY shall be authorized or empowered to make any representation or commitment or to perform any act which shall be binding on the other unless expressly authorized or empowered in writing.

16. ASSIGNMENT

CONTRACTOR shall perform all the services under this Agreement and shall not assign any interest in this Agreement or transfer any interest in same or assign any claims for money due or to become due under this Agreement without the prior written consent of the CITY.

17. INSURANCE
CONTRACTOR shall obtain and maintain insurance at its own cost and expense during the life of this Agreement, and shall require Subcontractors, if any, to maintain during the life of his subcontract:

1. Commercial General Liability Insurance
   a. $1,000,000 per occurrence / $2,000,000 aggregate
   b. Coverage must include premises and operations, products and completed operations, and personal and advertising injury.
   c. The City of Las Cruces must be named as an Additional Insured for all coverages listed above on endorsements acceptable to the City.
   d. Coverage must be primary and non-contributory.
   e. Coverage must be per project or per location.
   f. Coverage must be on an occurrence form.
   g. Subrogation must be waived.
2. Commercial Auto Liability
   a. $1,000,000 per occurrence
   b. Coverage must be for “owned, leased, hired, and non-owned autos” or “any autos.”
3. Workers’ Compensation and Employers Liability
   a. Statutory Limits
   b. Employer liability – $1,000,000 each accident, $1,000,000 each employee by disease, $1,000,000 policy limit
   c. Subrogation must be waived.
4. Professional Liability: $1,000,000 per claim

Endorsements for additional insured coverage and waivers of subrogation must be provided as a condition of this Agreement and shall be noted on the certificate.

CONTRACTOR shall furnish the CITY with a certificate(s) of insurance showing CONTRACTOR and Subcontractors, if any, have complied with this Article. The CONTRACTOR shall provide insurance certificates before work is to start on the project and shall provide the CITY thirty (30) days written notification of cancellation of such policies.

18. INDEMNITY AND LIMITATION
CONTRACTOR shall indemnify, defend, and hold harmless the CITY from and against any and all claims, suits, actions, judgments, demands, losses, costs, expenses, damages, and liability caused in whole or in part by, resulting in whole or in part from, or arising in whole or in part out of the negligent acts, errors, or omissions of CONTRACTOR, its officers, employees, agents, or representatives in the performance of SERVICES under this agreement.

19. APPLICABLE LAW
This Agreement and the rights and obligations of the parties shall be governed by and construed by the laws of the State of New Mexico applicable to Agreements between

New Mexico parties made and performed in that state, without regard to conflicts of law principles. Venue shall be in the Third Judicial District, State of New Mexico.

CONTRACTOR shall abide and be governed by all applicable state law, CITY ordinances, and laws regarding the CONTRACTOR'S services or any work done pursuant to this Agreement, including anti-discrimination.

20. BREACH
In the event CONTRACTOR breaches any obligation contained in this Agreement, prior to instituting any action or dispute resolution procedure, the CITY shall give CONTRACTOR written notice of such breach. In the event CONTRACTOR fails to remedy the breach within five (5) working days of receiving such written notice, the CITY, at its sole discretion, without any obligation to do so and in addition to other remedies available under applicable law, may remedy CONTRACTOR'S breach and recover any and all costs and expenses in so doing from CONTRACTOR.

21. DISPUTE RESOLUTION
In the event that a dispute arises between CITY and CONTRACTOR under this Agreement or as a result of breach of this Agreement, the parties agree to act in good faith to attempt to resolve the dispute.

22. NOTIFICATION
All notices required or permitted under this Agreement shall be in writing and shall be deemed sufficiently served if served by Registered Mail addressed as follows:

TO CITY:	City of Las Cruces PO Box 20000 Las Cruces, NM 88004 ATTENTION: Tony Trevino
With Copies to:	City Attorney Purchasing Manager
TO CONTRACTOR:	Cobb, Fendley & Associates,Inc. 3820 Academy Parkway North NE Houston, TX 77040 ATTENTION: Sean Wolfe

23. SCOPE OF AGREEMENT
This Agreement incorporates all of the agreements, covenants, and understandings between the parties hereto concerning the subject matter hereof and that all such covenants, agreements, and understandings have been merged into this written agreement. No prior agreement or understanding verbal or otherwise of the parties or their agents shall be valid or enforceable unless embodied in this agreement.

24. SEVERABILITY
The parties agree that each provision of this Agreement is severable and the invalidity or unenforceability of any one or more of the provisions of this Agreement shall not affect the validity or enforceability of any other provision of this Agreement, and this Agreement shall be construed in all respects as if such invalid or unenforceable provisions were omitted.

25. CONFLICT OF INTEREST
CONTRACTOR represents and warrants that CONTRACTOR has no business, professional, personal, or other interest, including, but not limited to, the representation of other clients, that would conflict in any manner or degree with the performance of its obligations under this Agreement. If any such actual or potential conflict of interest arises under this Agreement, CONTRACTOR shall immediately inform the CITY in writing of such conflict. If, in the reasonable judgement of the CITY, such conflict poses a conflict to and with the performance of CONTRACTOR'S obligations under this Agreement, or is otherwise a violation of the CITY'S current policy or ordinances, then the CITY may terminate the Agreement immediately upon written notice to CONTRACTOR; such termination of the Agreement shall be effective upon the receipt of such notice by CONTRACTOR.

EXHIBIT A
SERVICES

A. Project Assignments
A Project assignment is initiated by the City providing the selected Engineer a detailed project description, including scope of work and any other special instructions needed by the Engineer to prepare items such as preliminary and final cost estimates, complete project plans and specifications, project reports, and other related engineering services. The awarded Engineers shall provide engineering services that may include but not be limited to, the following:
1. Computer network analyses for water, wastewater, and gas systems; design of water, wastewater, and gas utility systems; well house design; Supervisory Control and Data Acquisition (SCADA); water treatment process; master planning; feasibility studies; solid waste studies; land use permitting; subsurface utility exploration; boundary/easement survey; and National Pollutant Discharge Elimination System (NPDES) & Stormwater Pollution Prevention Plan (SWPPP) compliance.
2. Electrical design (wells, booster stations, lift stations, odor control stations, building electrical system design)
3. Computer network analysis for Gas (GasWork), Water (InfoWater), and Wastewater (InfoSewer). The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility
4. Solid waste studies, landfill system design and analysis
5. Environmental surveys, assessments monitoring and management, such as indoor air quality, asbestos, mold, and other related services for the City
6. Geotechnical Assessments, such as soil and groundwater testing for contamination and remediation, and other related services for the City
7. Expert witness in a judicial and/or quasi-judicial setting.
8. Project Management
9. Construction Inspection.

B. Project Assignment Agreements
A Project Assignment Agreement (a template of which is incorporated herein as ATTACHMENT “A”) will be negotiated and executed on a case-by-case basis for each specific project, and will include a cost proposal from the Engineering firm(s) proposing to do the work. The cost proposal may utilize one of the following pricing formats:
1. Lump Sum
2. Unit pricing to include:
    a. Hourly rate for various types of services requested by the City
    b. Charges for miscellaneous items such as blueprints, data, discs, rental of special equipment, etc.
    c. A statement of the billing procedures including minimum billing units, if any.
    d. Cost of sub-consultants (if any)
3. An alternative unit cost breakdown

C. Deliverables
Each project contract will require a list of deliverables, schedule/timeline and cost. The

Engineer may be required to supply to the City an of the following items, when specified and as requested on the Scope of Work for each individual project.

1. Preliminary report containing schedule of work and cost estimate.
2. Construction drawings and documents. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility. Provide hard copies and PDF format of the construction plans for Purchasing Section use.
   a. As-built drawings on electronic media and reproducible prints. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. All horizontal and vertical location datum information shall be coordinated with the City Surveyor. The utility location information shall be tied to project control monuments and referenced to project construction stationing. The project control survey shall be certified by a New Mexico Registered Land Surveyor. Metadata or “data about the data” shall be submitted with each as-built electronic file, preferably as a separate text file on the electronic submittal media, and shall include:
      - Name, address and phone number of the responsible land surveyor.
      - Date of completion of survey.
      - Equipment used to conduct the survey.
      - Horizontal and vertical control marks used to tie the survey to the City approved control.
      - Transformation factors needed to reduce Ground (local coordinate system) to Grid and combined scale factor used.
   b. “RECORD DRAWINGS” shall be clearly labeled on each sheet.
3. Computer network analysis for gas, water, and wastewater shall be provided to the City in appropriate electronic format. It shall include the entire model, including changes and a text summary (report) of the network analysis that includes assumptions, procedures, and results, and any graphics that clarify the analysis. The Engineering firm(s) shall verify the report format with the City. The computer network analysis shall be provided using the software listed below. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility.
   a. Computer network analysis for Gas: GasWork
   b. Computer network analysis for Water: InfoWater
   c. Computer network analysis for wastewater: InfoSewer
   d. Other design computer programs as approved by the City
4. Project reports.
5. Any other item specified in the contract for that project
6. Easement map and recording information

D. The selection of an Engineer for a specific project shall be based on experience with similar projects, references, performance in similar projects, and availability. This will include the ability to meet schedules, cost control, and responsiveness to client.

E. The Engineer shall have an engineering staff on-site everyday who is responsible, on behalf of the Engineer, for providing timely completion and response for performance of the terms of each Project Assignment Agreement during the progress of each individual project. Any deviation from this requirement is at the discretion of the City and must be approved in writing by the City prior to the start of any individual project.

City of Las Cruces
Bid Clerk

RE: RFP No. 23-24-052 | Utilities Engineering Services

Members of the Selection Committee:

To support the City of Las Cruces (the City) in your continuing improvement of infrastructure, Cobb, Fendley & Associates, Inc. (CobbFendley) has assembled an exemplary and comprehensive team of professionals who combine a diverse base of experience with the appropriate depth of expertise. With an experienced, proactive Project Manager, a strategic and dedicated project team, and a deep commitment to the communities we serve, we feel that we have prepared a proposal that will meet and exceed your needs.

PROJECT LEADERSHIP. Our Project Manager, Chris Almy, PE, is a dedicated, qualified engineer focused on managing your projects to successful completion. As a current resident of Las Cruces, he is immediately available to respond to the City's project needs. Mr. Almy has experience working on similar projects and will work with the City to meet expectations and goals to enable project success. He holds not only the technical knowledge to serve the City, but also the experience to understand the nontechnical, public challenges that potentially surround general engineering projects. Mr. Almy will be integrally involved in the design, development, bidding, and construction of projects.

PROJECT TEAM. The proposed team consists of specialized professionals in the field of utilities engineering. Our firm's experience with multiple disciplines provides a business model that is designed to provide comprehensive design services. Details of key staff are provided throughout our proposal. The CobbFendley team is supported by local design engineers from CobbFendley's Mountain Region offices to provide additional resources for larger or quick-turnaround projects or multiple work orders. Additionally, CobbFendley has included the following subconsultants as part of the team to add additional strength and experience in supporting disciplines.

- **GEOMAT, Inc. (GEOMAT)** – Geotechnical assessment services
- **Water Works Engineers (Water Works)** – Electrical design, computer network analysis for water (InfoWater) and wastewater (InfoSewer), well house design, and supervisory control and data acquisition (SCADA) services
- **Zia Engineering & Environmental Consultants, LLC (Zia)** – Solid waste studies, landfill system design and analysis and environmental services

COMMITMENT. The project team proposed in this proposal has exhibited a history of dedication and commitment to the communities where we work. Members of this team have lived and worked in and around New Mexico for the entirety of their careers and have come to appreciate and understand the character and the uniqueness of New Mexico.

VALUE ENGINEERING. The CobbFendley team sees every project as an opportunity to save the City money. Through our in-house utility coordination, subsurface utility exploration, surveying, and utility design teams, CobbFendley routinely looks for value-engineering solutions to reduce costs and maximize benefit to the community during design and construction. Our goal is to deliver comprehensive design plans with executable options and cost-saving recommendations that will benefit the City and your end users. We look forward to the opportunity to further discuss our process, planning methodology, and project approach with you and your staff.

As the Senior Vice President, Region Manager, and person authorized to contractually obligate the firm, I, Sean Wolfe, PG, acknowledge receipt of all Amendments associated with this solicitation. We appreciate your time and consideration of CobbFendley's proposal and look forward to working with the City of Las Cruces to provide Utilities Engineering Services.

Sincerely,

Cobb, Fendley & Associates, Inc.

From Concept to Completion

A. TECHNICAL APPROACH OF ALL PROFESSIONAL, TECHNICAL AND CUSTOMARY SERVICES

CobbFendley and our teaming partners are uniquely qualified to address any City engineering project tasked by the City. CobbFendley has successfully completed utilities engineering projects for over 43 years, including numerous projects for cities and similar municipalities charged with providing safe and reliable utility infrastructure. **CobbFendley also has the unique characteristic of providing in-house surveying, subsurface utility exploration, utility coordination (UC), and right-of-way (ROW) acquisition to complement our civil engineering design capabilities.**

Our Mountain Region offices enjoy access to the resources of the entire 630+ person firm so we can scale our operations to meet client needs. Our breadth of capabilities adds value to our ability to respond to the specific demands of each project and allows us to adjust the team as the project progresses, in consultation with the City.

CobbFendley has assembled a highly qualified and experienced team of professionals and technical support staff to serve the City's mission. Our team has extensive experience related to municipal infrastructure design with an emphasis on sustainable solutions applicable to the environment of southern New Mexico.

Beyond practical and environmentally conscious design approaches, we are also very familiar with regulatory requirements stipulated by the Multiple Separate Storm Sewer System (MS4) program, the National Environmental Policy Act (NEPA), and United States Army Corps of Engineers (USACE) Clean Water Act compliance requirements. By blending our technical competence and experience with a holistic approach to addressing southern New Mexico's unique arid hydrology and erosive soil conditions, CobbFendley can address and solve the City's infrastructure challenges.

PROJECT LEADERSHIP. As described in more detail in the subsequent section, **our team will be led by Project Manager, Mr. Chris Almy, PE**. He has a proven track record of coordinating with City personnel in the development of scope of work, budget, and schedule that meets project goals. His role on the City of Las Cruces' Professional Services contract will be to set deadlines, assign responsibilities and monitor/summarize progress of project. He will oversee project objectives and deliverables and will serve as liaison between the project team and the City staff.

CobbFendley's Project Principal / QA/QC Reviewer will be Mountain Region Municipal Department Manager Mr. Brad Sumrall, PE, who has designed, managed, and supervised New Mexico projects for over 31 years. As Project Principal, Mr. Sumrall will provide senior leadership and guidance to project teams overseeing contract compliance, delivery on scope, budget, and schedule, and allocation of resources to keep projects on track.

INTERFACE WITH THE CITY. The City of Las Cruces staff will be an integral part of our project team and will be included in all specific project assessments and key decisions. Mr. Almy is dedicated to accomplishing the City's objectives. He understands the importance of well-timed coordination with the appropriate City personnel and welcomes your valuable input. Mr. Almy is a Las Cruces resident and will be available for regular in-person or virtual progress and coordination meetings, as well as emergency meetings as required. It is our custom to have meetings when they are necessary to accomplish project objectives. We will provide meeting agendas and minutes. In addition to coordination meetings, CobbFendley will provide weekly or bi-weekly project progress updates to keep City staff informed on project progress, upcoming planned activities, needs from the City, and outstanding challenges.

COST-EFFECTIVE DESIGN AND CONSTRUCTION. We understand that our job as a consultant is to provide the City of Las Cruces with cost-effective solutions and designs to meet the City's needs. CobbFendley will define the approach to the plans and contract documents, as well as the specific techniques that could be implemented in construction. A few examples to be considered and studied during the design phase include:

- Alternate pipe material types
- Temporary and/or by-pass piping (to maintain service)
- Trenchless or open trench installation
- ROW or easement routes
- Storm sewer versus roadside ditches (in rural areas)

Although this list is not complete, each solution may impact projects differently with respect to public acceptance, construction schedule, and project costs. CobbFendley evaluates these to develop cost-effective, feasible options, while promoting the health, safety, and welfare of the public. We maintain an extensive library of record bids for a variety of projects and site conditions for use in developing unit prices.

Evaluation Criteria No. 1 (Technical Approach)

We also have professionals on staff with a construction background who maintain a network of resources to provide pricing based on current market costs. CobbFendley will coordinate with contractors and suppliers with experience on projects similar in size and scope to validate the estimate based on current construction rates and project challenges. Impacts to the market supply chain, such as weather, increasing costs of raw materials and local construction costs, or oil market shifts will be considered when developing construction cost estimates.

QA/QC PROGRAM. Last minute rework due to poor communication is one of the most common sources of errors. Communication will start with sharing the scope of work with all personnel directly involved in the design of the project. The Engineering and Production Teams will have the tools to do their best work if they understand the overall goal of the project and how their work affects other disciplines. The communication continues with informal checks and visits to the designers by the Team Lead and the Subcategory Leads. This gives the designer a chance to ask questions and an opportunity for the manager to see that the design is proceeding in the direction intended. In addition, prior to each submittal to the City, a formal internal review will be conducted by a senior engineer following CobbFendley's established QC protocol.

Our markup and review process includes the initial review, but also emphasizes the need to backcheck the comments and coordinate with the Engineering and Production Teams, then verify that comments were addressed before releasing the plans for City submittal. The time for this will be built into the project schedule. Comments will be addressed prior to the formal submittal to the City. As comments are received from the City and other reviewing agencies, if applicable, we will clarify conflicting or unclear comments and a backcheck of those comments will be incorporated into the next internal review.

QA / QC Procedure
Production Team ✓ Produces exceptional quality work following firm / client standards for quality and compliance
Team Task Leaders ✓ Produce exceptional work ✓ Verify compliance with firm / client standards ✓ Implement project Quality Control Plans
Project Manager ✓ Coordinates QA/QC activities, meetings, and schedule ✓ Overall project responsibility ✓ Provides high-level technical review
Technical Reviewer ✓ Provides detailed technical review ✓ Gives feedback to QA/QC Manager for follow-up
QA/QC Manager ✓ Directs QA/QC activities ✓ Review QA/QC Plans ✓ Back-checks calculations and standards compliance
Project Principal ✓ Provides final review of overall project ✓ Provides resources to implement QA/QC procedures

Constructability reviews will also be conducted at regular intervals during the design process. These will be conducted by subject matter experts and managed by Project Principal / QA/QC Reviewer Mr. Brad Sumrall, PE, who will not only look for issues with the construction phasing such as drainage, staging, adequate room for traffic, temporary shoring and the type of traffic control required; but will also look for ways to reduce the cost of the project, the methods of material measurement and payment, the types of pavement, and other options will be examined to determine if there are more efficient methods or less costly materials that will provide the same quality product.

SUBCONSULTANT ROLE IN MANAGEMENT STRUCTURE. Our team is comprised of CobbFendley staff and subconsultants to form a cohesive design team. We have strategically selected subconsultants that have worked previously with our staff; thus, the level of expectation is known and allows our team to work seamlessly and efficiently from day one. Assignments to subconsultants will involve the development of a detailed scope of work, budget, procedures, and design schedules that assimilate into the overall project scope.

B. MAJOR TASKS TO BE ACCOMPLISHED

CobbFendley's experience with multiple on-call contracts and a variety of City engineering services has resulted in the development of the tools and skills needed to develop an approach to managing the scope, schedule, and resource needs for specific projects. With each project assignment, Mr. Almy will provide a detailed scope of services tailored specifically to the subject project. As the work plans will differ for various types of projects in each category anticipated under this contract, we have developed a five-phase project work plan that can and will be easily adaptable for each project. Having this base work plan and templates established to develop person-hour estimates, along with Project Manager Mr. Almy's extensive experience with engineering design projects in the Dona Ana County and Las Cruces areas, provides our team a framework for quick understanding and

Evaluation Criteria No. 1 (Technical Approach)

turn-around of project scopes and estimates.

Our team will approach, develop, and manage assigned projects with the **five-phase work plan** *outlined below*, applying our experience and knowledge of various challenges for each type of project as outlined in the pages to follow.

FIVE-PHASE WORK PLAN

PHASE 1 - PROJECT SCOPING AND PLANNING

- Meet with the City staff to understand project intent, limitations, opportunities, staff requirements, design criteria, prioritization of project scope, stakeholders, and schedule
- Develop draft scope
- Present and negotiate scope with City staff
- Develop fee and schedule

PHASE 2 - PRELIMINARY ENGINEERING AND DESIGN

Preliminary Phase:

- Fact-Finding – conduct field investigations, perform existing utility research, identify environmental constraints, evaluate alternative materials and construction methods, and identify permitting requirements
- Conduct preliminary meetings with other permitting agencies and stakeholders
- Identify and analyze alternatives
- Develop preliminary construction cost estimates, sequencing, and schedule
- Identify preliminary ROW requirements
- Develop preliminary design layouts and calculations
- Present findings and recommendations to the City

Design Phase:

- Conduct surveying to determine existing field conditions and assess right-of-entry, as needed
- Conduct subsurface utility exploration investigations, as needed
- Perform geotechnical and/or environmental studies, as needed
- Develop 30% detail construction plans
- Coordinate with utility owners and other permitting agencies
- Prepare executive summaries addressing H&H studies, scour analysis, modeling, traffic studies, roadway design, site drainage and grading, water/wastewater routing, sizing, material types, pump/lift station/tank site location, sizing, etc., as applicable
- Develop 60% detail construction plans and prepare special specifications
- Prepare construction cost estimate, project sequencing, and schedule
- Develop 90% detail construction plans and prepare bid documents
- Prepare Contractor qualification requirements
- Prepare final permits for construction as needed (USACE, NMDOT, Railway, etc.)
- Develop 100% detail construction plans and prepare final project manual for bidding

PHASE 3 - BID PHASE

- Provide construction plans and project manual for distribution
- Conduct a pre-bid conference
- Respond to Contractors' pre-bid inquiries
- Issue addenda, as necessary
- Attend bid opening
- Analyze bid tabs
- Check Contractor references
- Provide recommendation of award
- Assist in execution of contracts

PHASE 4 - CONSTRUCTION ADMINISTRATION PHASE

- Issue conformed documents
- Conduct pre-construction conference
- Conduct periodic site visits to review progress and character of the work
- Review and make recommendations regarding Contractor pay estimates
- Review and make recommendations regarding Requests for Information (RFIs)
- Review and make recommendations regarding shop drawing submittals
- Review and make recommendations regarding Change Orders
- Interpret plans, specifications, and contract documents as required
- Conduct final walk through and punch list
- Prepare record drawings
- Prepare engineer's concurrence letter certifying that the project was constructed in accordance with approved plans and specifications
- Assist the City with contract close-out

PHASE 5 - WARRANTY PHASE

- Conduct 11-month walk through and punch list
- Coordinate with the City and the Contractor to correct project deficiencies, if encountered

Evaluation Criteria No. 1 (Technical Approach)

C. DETAILED STATEMENT OF SERVICES TO BE PROVIDED UNDER EACH TASK

CobbFendley has full, in-house design capabilities, from the planning phases through plan production to project construction. Our capabilities include all the core areas of utilities engineering, surveying, hydrologic analysis and hydraulic design, roadway design, and additional support services such as geographic information systems (GIS) and subsurface utility exploration, among others. As a full-service civil engineering firm with a complement of extremely qualified teaming partners, CobbFendley brings the technical skills, experience, relationships and problem-solving ability to address the City's needs. We firmly believe that the most effective solution is carefully thought out in cooperation with our client which avoids lost opportunities to capitalize on efficient, cost-effective, and sustainable solutions.

COMPUTER NETWORK ANALYSIS FOR GAS (GASWORK), WATER (INFOWATER), AND WASTEWATER (INFOSEWER). **Gas (GasWorkS).** CobbFendley has experience with Gas Distribution system modeling and extensive expertise in all engineering aspects of gas transmission pipeline and distribution engineering, including but not limited to design of transmission pipeline, distribution gas mains, Horizontal Direction Drills (HDDs), regulator stations, meter stations, mainline valves, odorizers, compressor stations, and other gas infrastructure. We also prepare highway and railroad permit packages, loading and stress calculations, hydrotest plans, and other support services. CobbFendley's personnel has the capabilities to handle all aspects of the project demands. We are familiar with the GasWorkS program and have recommended it in the past to clients. With our vast knowledge from working with large pipeline companies and smaller cities and distribution companies, CobbFendley is here to support the City on any project needs, no matter how large or small. **Water (InfoWater) and Wastewater (InfoSewer).** To verify continuity of project objectives, CobbFendley has included Water Works on our team to lead Computer Network Analysis for Water (InfoWater) and Wastewater (InfoSewer) services. Water Works' engineers have developed O&M and SOPs for existing facilities, to hydraulic and process modeling (Fathom, SewerCAD, BioWin, InfoWater, InfoSewer, InfoWorks ICM), GIS and mapping, condition assessment, rehabilitation/replacement, planning, funding and permitting, design and bid, and construction of water/wastewater treatment and infrastructure systems.

WATER, WASTEWATER AND NATURAL GAS UTILITY SYSTEM DESIGN AND ANALYSIS. CobbFendley has engineered numerous natural gas, water, and wastewater improvement projects for public and private clients. Our team has assisted many municipalities and utility districts with the design and construction of water system upgrades, including new and rehabilitation of water lines, ground and elevated water storage tanks, water plant design, rehabilitation, and expansion (potable and reclaimed), water supply wells, water distribution system design, water system modeling, water quality analysis, pump stations, elevated storage tank design and rehabilitations, and ground storage tank design. Our team also has extensive experience in wastewater infrastructure design and evaluation, including wastewater treatment plant design, rehabilitation, and expansion, gravity sewer collection system rehabilitation assessment and design, wastewater system analysis, force main design and rehabilitation, lift stations, wastewater pump stations, outfall permitting, and renewing and amending treatment plant permits. CobbFendley has extensive expertise in all engineering aspects of gas transmission pipeline and distribution engineering, including design of transmission pipeline, distribution gas mains, Horizontal Direction Drills (HDDs), regulator stations, meter stations, mainline valves, odorizers, compressor stations, and other gas infrastructure.

Our expertise also includes impact fee studies, CIP planning studies, feasibility studies, and forensic investigations. Our team is experienced in open-cut trenching, as well as various trenchless construction technologies, including conventional bore and jack, tunnel boring, horizontal direction drilling, sliplining, CIPP, and pipe bursting. We are familiar with the agency coordination (NMED, EPA), design requirements, and permitting required for gas, water, and wastewater projects. CobbFendley's expertise affirms that projects are in compliance with all local, state, and federal regulations.

MASTER PLANNING. CobbFendley strives to incorporate ideas and present options that help municipalities maximize budgets and save money. As consultants, it is our job to help our clients gather all the information needed to make the best decisions regarding infrastructure needs. We will work with you to conduct necessary studies, evaluate alternatives, make recommendations, and present reports to City staff and stakeholders. We make recommendations based on your priorities, spending limitations, funding, and current and future infrastructure needs and plans.

Evaluation Criteria No. 1 (Technical Approach)

SOLID WASTE STUDIES/LANDFILL SYSTEM DESIGN AND ANALYSIS. To verify continuity of project objectives, CobbFendley has included Zia on our team to lead Solid Waste Studies/Landfill System Design and Analysis services. Zia's engineers have an extensive background in solid waste management planning, design, closure, environmental site investigations, environmental site remediation, solid waste facilities permitting and recycling. The firm has worked closely in landfill permitting and closure efforts to pursue and manage grants and loan funds for solid waste projects, as well as the design and permitting of various MRFs, transfer and convenience centers.

LAND USE PERMITTING. Some projects may require permits for construction, such as NMDOT, USACE, railroads, etc. CobbFendley has extensive knowledge and experience concerning applicable regulations and permits within the public infrastructure arena. We regularly contact, coordinate, and obtain permits from a wide array of public and private agencies that have vested rights on properties impacted by infrastructure improvements.

These permits include some of the following:

- **City of Alamogordo.** Utility department shut off, utility locating, and utility coordination
- **NMDOT.** Driveway and access permits, easements and right-of-entry for data collection and investigations
- **El Paso Electric.** Easements and right-of-entry
- **Union Pacific Railroad.** Right-of-entry and utility crossing permits impacting railroad ROW
- **USACE.** Clean Water Act 401 / 404 permits due to impacts on jurisdictional waterways
- **New Mexico Gas Company (NMGC).** Access permits, creation of easements, and right-of-entry

BOUNDARY/EASEMENT SURVEY. CobbFendley's survey experience includes thousands of projects for clients throughout New Mexico. Our experience includes land title, boundary, topographic, tree, horizontal and vertical control networks, engineering design, American Land Title Association (ALTA), construction staking, and utility surveys. We use innovative techniques including aerial photogrammetry, ground-based laser scanning, rapid static and static GPS, and electronic field books to provide our clients with cost-effective solutions to their surveying requirements. Our team is experienced in using TMOSS and is also able to provide the City with specialized 3D mapping services, including terrestrial, aerial, and mobile LiDAR, photogrammetry, and drone-based aerial imagery.

Boundary Surveys. Boundary surveys begin with obtaining plats and deeds to current property owners of the parent tracts and adjoiners, additional deeds to resolve any discrepancies noted during the preparation of the working sketch, and copies of ROW maps affecting the area. A working sketch, compiling all deed information, is then prepared to aid both in the final boundary analysis and the field crew's search for property corners. Field crews will search for and tie property corners and ROW monumentation along the ROW along with any encroachments. An analysis will be performed and a determination made of the location of the existing boundary. Finally, a plat of survey will be produced along with metes and bounds description of property. ROW maps, parcel block sheets, and related legal descriptions will be prepared in accordance with the City's specifications and regulations.

Easement Surveys. ROW information is staked either from digital or hard copy formats. A digital alignment file of the ROW is created and uploaded into our survey field controllers for stakeout. This provides us with the ability to readily stake any station and offset that is required for the project and is the most efficient method of staking ROW. Stakes are provided with a station and offset, if needed, and staking material as specified by the client. Metes and bounds legal descriptions will be prepared based on surveyed boundaries for ROW acquisition or for general use. We typically provide a graphical exhibit of the described area that accompanies the legal description. Legal description writing software is utilized to assist us in writing legal descriptions more efficiently. The product is thoroughly reviewed, certified by a New Mexico Registered Professional Land Surveyor, and provided to the client. We provide either hard copy or digital formats as the final delivery for legal descriptions.

ELECTRICAL DESIGN (WELLS, BOOSTER STATIONS, LIFT STATIONS, ODOR CONTROL STATIONS, BUILDING ELECTRICAL SYSTEM DESIGN). To verify continuity of project objectives, CobbFendley has included Water Works on our team to lead Electrical Design services. WaterWorks has designed electrical systems for municipal facilities, commercial and office buildings, industrial facilities, and primary electric transmission and distribution lines. WaterWorks' team of electrical engineers have provided technical leadership, quality assurance, design, and analysis of electrical distribution and generation systems including multiple services and generators, using software tools such as SKM PowerTools. Designs have included SCADA, power distribution, standby power generation, lighting, fire alarm, communications, and other life safety and special systems.

Evaluation Criteria No. 1 (Technical Approach)

SOLID WASTE STUDIES/LANDFILL SYSTEM DESIGN AND ANALYSIS. To verify continuity of project objectives, CobbFendley has included Zia on our team to lead Solid Waste Studies/Landfill System Design and Analysis services. Zia's engineers have an extensive background in solid waste management planning, design, closure, environmental site investigations, environmental site remediation, solid waste facilities permitting and recycling. The firm has worked closely in landfill permitting and closure efforts to pursue and manage grants and loan funds for solid waste projects, as well as the design and permitting of various MRFs, transfer and convenience centers.

ENVIRONMENTAL SURVEYS, ASSESSMENTS MONITORING AND MANAGEMENT MONITORING AND MANAGEMENT. To verify continuity of project objectives, CobbFendley has included Zia on our team to lead environmental services. Zia has more than 12 years of experience in providing environmental engineering and environmental consulting services to the City of Las Cruces through on-call environmental engineering contracts on such projects as the design and permitting of the City's Recycling Center, air permitting of the City's electrical cogeneration facility at the wastewater treatment facility, annual development of the City's Water Consumer Confidence Report, civil design of the City's water and wastewater laboratory facility, response to City water and wastewater distribution issues, permitting support for renewal of the City's wastewater reuse facility and multiple environmental investigations (Phase I ESA's), NEPA studies and cultural and biological clearance surveys.

GEOTECHNICAL ASSESSMENTS. To verify continuity of project objectives, CobbFendley has included GEOMAT on our team to lead geotechnical services. GEOMAT's process evaluates every aspect of the project from the scope development to the field work, to laboratory testing, and final to the geotechnical recommendation portions of the project. This includes specialized, specific project managers and professional engineers for all project types, from bridges, pavements, retaining structures, and diversion structures.

EXPERT WITNESS. Professional Engineers of CobbFendley and our teaming partners have the technical expertise to provide expert witness testimony for the City. Senior personnel have provided expert witness support related to judicial actions and routinely provide public outreach support when required. In addition, Mr. Martinez of Zia has also provided expert witness testimony for projects related to groundwater and soils contamination and has supported several clients in depositions and expert witness roles related to environmental compliance and drainage issues.

PROJECT MANAGEMENT. Project Manager Mr. Chris Almy, PE, will develop a Project Management Plan (PMP) to provide all team members with a single document of relevant project information. The PMP includes the scope of work, team member roles (internal and subcontractors), budgets, design schedule, QA/QC Plan, Risk Management Matrix, Change Management Plan, Issue Log, guidelines for design file management, and invoicing requirements. Having these plans in place makes us better prepared to keep focused on the big picture goals and ready to handle unforeseen circumstances, which could surface during project development.

CONSTRUCTION INSPECTION. CobbFendley maintains a dedicated Construction Management Department with more than 100 years of combined construction observation and inspection experience. We have 19 construction inspectors highly experienced in managing various construction phase services, including pre-construction meetings, public meetings, Contractor RFIs, change orders, Contractor invoice approval, construction site visits, and preparation of record drawings once the project is complete. They are available to provide services on a wide variety of public works projects, including utility, roadway, and drainage. Our highly qualified inspectors have been well trained and are certified in a wide variety of categories. These categories include, but are not limited to, American Concrete Institute (ACI) and Associated Contractors of New Mexico Transportation Technician Training and Certification Program (TTCP).

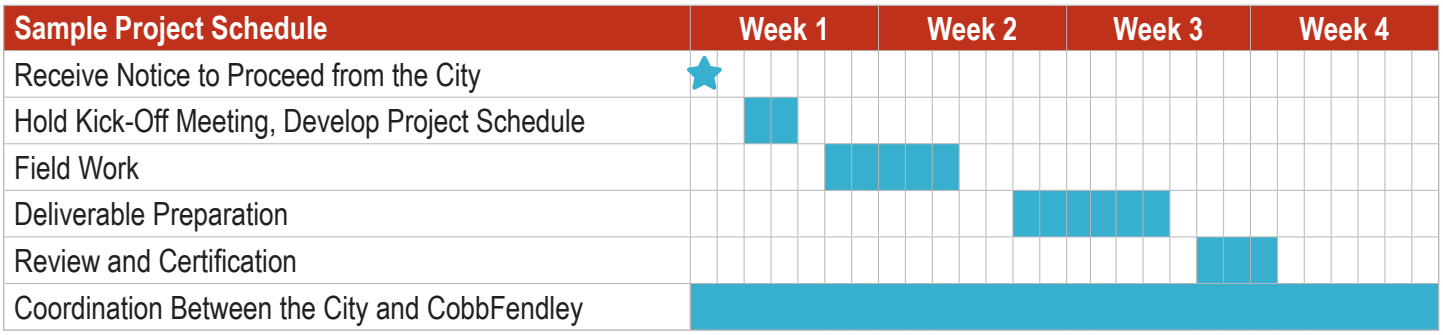
D. PROPOSED PROJECT SCHEDULE

The CobbFendley team believes the schedule is one of the most important factors in project success. The schedule will establish milestones for deliverables and allow the City to provide input on project timelines. Our history of completing deliverables on schedule is one of the many results of our project success over the years. CobbFendley commits to meeting the schedule deadlines that will be developed in the scoping phase and is dedicated to meeting the timelines contained in the contract documents and included as part of the initial project development with the City's Project Manager. Our Project Manager, Mr. Almy, will develop a detailed production and coordination schedule at the onset of the project, including bid and construction phase services. The schedule will include resource allocations to determine the required commitments of

Evaluation Criteria No. 1 (Technical Approach)

team members to meet the schedule. In the event of necessary schedule recovery (or should the City decide to expedite the design process), the CobbFendley team is nimble and responsive and has the ability to pull additional resources from the deep Company team to meet design schedules. Our Project Principal, Mr. Sumrall, is committed to the success of City of Las Cruces projects and will assign resources as required to meet project schedules.

The following project schedule represents sample activities proposed that will be accomplished by the CobbFendley Team. A schedule for individual task orders issued will be developed upon notice to proceed. Schedules can be expedited when needed due to CobbFendley's depth of staff and our ability to self-perform requested services. Our lean team structure equates to simplified management, coordination, and quality control.



Evaluation Criteria No. 2 (Qualifications/Competence)

ABOUT THE FIRM

CobbFendley was founded on April 1, 1980, and is an employee-owned consulting firm providing civil engineering and land surveying services for 43 years. Our staff of more than 630 employees brings an unmatched level of expertise and experience, and is committed to serving the communities where we live and work. CobbFendley's diverse team of professionals is comprised of engineers, designers, surveyors, ROW agents, utility specialists, technicians, and support personnel. Our in-house services include road design, sidewalk and ADA design, drainage design, structural/bridge design, hydrologic and hydraulic evaluation, flood disaster protection and recovery support, traffic engineering, site design, utility coordination and wet/dry utility design, SUE, surveying and mapping, and ROW acquisition, among others.

As a client-oriented firm, CobbFendley believes that the principal factor behind our nearly 43-years of success and growth is our dedication to producing quality, timely work. CobbFendley has established and will continue to maintain confidence with our clients by exhibiting sound management, offering unrivaled professional surveying experience and capabilities, producing quality products, and adhering to high standards of professional ethics using local staff committed to working in their own communities.

UNDERTAKING RESPONSIBILITIES ASSOCIATED WITH A POTENTIAL PROJECT

CobbFendley's project leadership will be supported by a qualified team of engineers and surveyors to bring a diverse array of technical expertise. The CobbFendley team will report to the Project Manager. While the Project Manager will coordinate personnel and resources needed for each assignment, the Project Principal will have the ultimate responsibility of dedicating appropriate staff to the project and coordinating their availability should additional resources be required.

PROVEN LEADERSHIP. Project Manager, Mr. Chris Almy, PE, has 17 years of civil engineering experience performing utility designs and coordinating with multiple reviewing, permitting, and funding agencies on projects throughout New Mexico. Mr. Almy is supported by engineers and experts in the fields of water supply and distribution, wastewater collection, hydraulic modeling, drainage, surveying, subsurface utility exploration, utility coordination, land acquisition, bid administration, construction management, and other technical services. Mr. Almy will provide senior leadership and guidance to project teams overseeing delivery on scope, budget, and schedule, and allocation of resources to keep projects on track.

CobbFendley's Project Principal / QA/QC Manager is Mr. Brad Sumrall, PE. Having designed infrastructure projects throughout New Mexico, Texas, California, and Utah since 1993, Mr. Sumrall has a keen understanding for the requirements to build a successful project and navigate the design, funding, and coordination processes. As Project Principal, Mr. Sumrall will provide senior leadership and

Evaluation Criteria No. 2 (Qualifications/Competence)

guidance to project teams overseeing contract compliance, delivery on scope, budget, and schedule, and allocation of resources to keep projects on track.

CAPACITY TO HANDLE MULTIPLE PROJECTS. CobbFendley facilitates clear communication and schedule requirements through a weekly meeting where all active projects are evaluated and discussed to verify that we are maintaining schedules, budgets and deliverables as described in our executed scope of work. We understand that in some cases, funding constraints and governing body expectations can sometimes require accelerated schedules and deliverables. Should such conditions arise, our project management team confers to address schedule conflicts to reallocate resources and leverage other expertise from within CobbFendley. We have successfully addressed these conditions recently due to client demands and changes in key personnel.

PROJECT BALANCING PROCESS. Our New Mexico-based engineering team successfully manages and delivers numerous projects continuously on a daily basis. Our experienced project managers work diligently to manage schedules, staff resources, and client expectations. Our project execution and design processes incorporate the following activities:

- Establish a clear definition of project objectives in collaboration with the City so that the appropriate data is collected to support a functional and sustainable design.
- Prepare a PMP to outline and define the project scope, schedule, and budget for clear enunciation of what, why, how, when, and who is involved with project execution.
- Collect required base data including topographic, ground features, existing utility information and reference reports which form the design foundation. Our thorough data collection efforts facilitate successful engineering projects by eliminating successive field visits to obtain additional data. We also strive to provide additional information to make the engineer's job easier with the objective of designing an innovative and cost-effective solution.
- Instill a "Plan the Work/Work the Plan" mindset and process. This serves to keep our team on track, the client well informed, and produces quality deliverables for the City's benefit.

Applying these practices consistently, along with clear and effective communication, allows us to balance and maintain efficient workflow and schedules while maintaining quality.

YOUR DEDICATED TEAM

A. NAMES OF KEY PERSONNEL ASSIGNED TO PROVIDE SERVICES

Team Member & % of Time Assigned	Areas of Competence	Description of Experience
 Brad Sumrall, PE Project Principal NM PE #14086 **Time Assigned: 25%**	• 31 years of civil engineering project management experience • Successfully delivered projects for numerous municipalities throughout the State of New Mexico	**Strengths and Qualifications:** Mr. Sumrall has 31 years of professional water resources, land reclamation, development and master planning experience. With a background in natural resource management and civil engineering, he strives to incorporate sustainable design practices into all his projects for the benefit of the environment and the end user. Specific areas of expertise include potable water and waste water conveyance and retrofit, reclamation and stabilization of disturbed land including mines, roadways and natural waterways, hydrology and hydraulics, MS4 compliance and storm water best management practice design and evaluation, and pedestrian trails. **Project Experience:** Dam Maintenance Plan, *City of Las Cruces, NM* • Master Drainage Plan, *City of Las Cruces, NM* • Calabacillas Arroyo HEC-HMS, *SSCAFCA, Rio Rancho, NM* • JP Shawver Park Handball Court, *City of El Paso, TX* • Striping Project, *City of Alamogordo, NM* • Eagle Nest Lake State Park Campground Improvements, *New Mexico Energy, Minerals, and Natural Resources Department (EMNRD) - State Parks Division, Colfax County, NM* • Persons Access Road, *PNM, Eddy County, NM* • Infrastructure Improvements, *Pueblo of Laguna, NM* • IDIQ Contract, *Indian Health Service, Albuquerque, NM* • Pedestrian Multi-Use Trails, *Pueblo of Laguna, NM* • On-Call Statewide Drainage Bureau, *NMDOT, Statewide, NM* • Sanitary Sewer Rehabilitation, *Pueblo of Laguna, NM* • Cabezon Multi-Family Development, *JLM Financial Partners, Rio Rancho, NM* • Loop 375 Waterline Relocation, *TxDOT, El Paso Water Utilities (EPWater), El Paso, TX* • Alameda Drain Trail Master Plan, *Bernalillo County Public Works, Albuquerque, NM*

Evaluation Criteria No. 2 (Qualifications/Competence)

Team Member & % of Time Assigned	Areas of Competence	Description of Experience
 Chris Almy, PE Project Manager / Professional Responsible for and in Direct Charge of the Work NM PE #19120 **Time Assigned: 75%** ***Las Cruces Resident***	• 17 years of civil engineering project management experience • Experience on projects located in and surrounding Doña Ana County	**Strengths and Qualifications:** Mr. Almy has 17 years of civil engineering experience in the field of water resources. He specializes in subsurface utility exploration, UC, water supply/distribution, wastewater collection, decentralized wastewater treatment, drainage engineering, temporary erosion control, and stormwater pollution Prevention Plans (SWPPP). He has performed numerous engineering studies and prepared plans, specifications and estimates for projects throughout New Mexico. As Project Manager, Mr. Almy brings extensive experience providing technical guidance to our design teams ensuring contract compliance, delivery of scope, budget, schedule, and appropriate resource allocation. He excels in technical writing, project and team management, and agency coordination. **Project Experience:** Drainage Detention Basin, *City of Alamogordo, NM* • South Fork Arroyo Improvements, *City of Las Cruces, Dona Ana County, NM* • Striping Project, *City of Alamogordo, NM* • Vista Real Wastewater System, *Vista Real Mobile Home Community, Las Cruces, NM* • Buckeye & Iron Street Drainage Improvements, *City of Deming, NM* • Emergency Water Line Connection, *Picacho MDWCA, Dona Ana County, NM* • Johnny's Septage Facility, *Johnny's Septic Tank Company, Mesquite, NM* • F&A Septic System Design, *F&A Dairy Products Inc, Las Cruces, NM* • Market Street Drainage Study, *Town of Silver City, NM* • Wastewater Collection System Improvements, Village of Loving, NM • Berino Pond Erosion Mitigation, *Flood Commission, Dona Ana County, NM* • Ruidoso Bridges Reconstruction, *Village of Ruidoso, NM* • Water Storage System Improvements, *City of Portales, NM* • Force Main and Rockwall, *Winterhaven MDWC and SWA, Dona Ana County, NM*
 Sean Wolfe, PG Officer of the Firm Responsible for Administration of the Contract *PG #10333* **Time Assigned: 20%**	• 24 years of SUE and survey experience • 15 years of project management experience, including 11 years of experience on projects located in Doña Ana County	**Strengths and Qualifications:** Mr. Wolfe provides high-level oversight of the delivery of all projects in CobbFendley's five-state Mountain Region. He brings 24 years of industry experience to the team, as well as a 14-year history of working with public and private entities in support of a variety of infrastructure improvement and public works projects. His primary responsibilities include allocating firm resources and staff as needed to ensure CobbFendley's services meet client expectations for quality, delivery schedule, and cost. **Project Experience:** South Valley Drive, *City of Las Cruces, NM* • Talavera 8-inch High Pressure Gas Pipeline, *City of Las Cruces, NM* • Downtown Redevelopment Project, *City of Las Cruces, NM* • Roadrunner Parkway Extension, *City of Las Cruces, NM* • Picacho Avenue and 17th Street Intersection, *NMDOT, Las Cruces, NM* • New Mexico 188 and New Mexico 28 Corridor Study, *NMDOT, Las Cruces, NM* • New Mexico 273 McNutt Roadway Improvements, *Smith Engineering, Sunland Park, NM* • IH 25/Missouri Avenue Bridge Rehabilitation, Las Cruces • IH 25/University Avenue Phase I Services, *NMDOT, Las Cruces, NM*

Evaluation Criteria No. 2 (Qualifications/Competence)

Team Member & % of Time Assigned	Areas of Competence	Description of Experience
 Edward Martinez, PE Solid Waste Studies, Landfill System Design and Analysis, and Environmental Lead *NM PE #13731* **Time Assigned: 20%** ***Las Cruces Resident***	• 40 years of experience in solid waste management planning, design, closure, environmental site investigations/ compliance/ remediation, solid waste facilities permitting, and recycling	**Strengths and Qualifications:** Mr. Martinez, PE, is the founder and President of Zia. He has an extensive background in solid waste management planning, design, closure, environmental site investigations, environmental site remediation, solid waste facilities permitting and recycling dating to the early 1980s. Mr. Martinez has also directed and/or managed investigation and/or closure of over 35 landfill facilities throughout the Southwest. He has worked closely in landfill permitting and closure efforts to pursue and manage grants and loan funds for solid waste projects. Mr. Martinez has conducted and supervised numerous investigations for environmental due diligence, air quality impacts, surface and groundwater hydrology, soil remediation, remedial systems design, and site characterizations. His expertise includes analysis of both air quality and surface / groundwater impacts associated with various projects. **Past Clients:** City of Las Cruces • Dona Ana County • New Mexico Environment Department • City of Albuquerque • Bernalillo County • US Department of Homeland Security • US Fish & Wildlife Service • NMDOT • US Department of Agriculture • Spaceport America • US Department of the Interior Bureau of Land Management
 Chris Basista, JD Land Use Permitting Lead **Time Assigned: 20%**	• 26 years of combined experience in the ROW, Wireless Telecom, and Real Estate industries	**Strengths and Qualifications:** Mr. Basista's background includes experience with permitting (including zoning/land use), acquisition, title research, due diligence, government stakeholder relations, conservation easements/group negotiations, and project management. He has worked with various agencies and entities on a municipal, county, state, and federal basis to acquire the proper permits and/or land rights to complete projects. **Project Experience:** Cornudas Pipeline, *EPWater, El Paso, TX* • Fort Bayard Medical Center Land Conveyance, *New Mexico Department of Health, Santa Clara, NM* • Loop Bypass Rd Phase II, *Eddy County, NM* • Taos Pueblo Water Rights Settlement Agreement, *Town of Taos, NM*
 Freddie Jaramillo Subsurface Utility Exploration Lead **Time Assigned: 30%**	• 11 years of experience locating utilities using a VAC truck; has worked on projects using as-builts, utility records, and visible features to designate utilities using various locate equipment.	**Strengths and Qualifications:** Mr. Jaramillo has 11 years of experience locating utilities using a VAC truck and radio equipment. He has worked on projects using as-builts, utility records, and visible features to designate utilities using various locate equipment such as an RD-8100, GPR, Metrotech 810, and a GEO mapper. His field experience includes creating field sketches with line types and features to hand off to Survey crews, working with pole cameras to video pipe conditions, and mapping communication manholes and sketched fiber runs for various Utility owners. Mr. Jaramillo has managed field crews to finish jobs before deadlines and under budget. **Project Experience:** Browns Farm, *City of Las Cruces, NM* • University Drive, *City of Las Cruces, NM* • Veterans Park, *City of Las Cruces, NM* • Cortez Drive, *City of Las Cruces, NM* • US 60 and 84 from 7th Street East Prince Street, *NMDOT, Clovis, NM* • On-Call Utility Locating, *University of New Mexico, Albuquerque, NM* • Re-Use Water Transmission Pipeline, *City of Rio Rancho, NM* • Boone Wastewater Interceptor Phase II, *EPWater, El Paso, TX* • US 285 Roadway Rehabilitation Phase I, *Eddy County, NM*

Evaluation Criteria No. 2 (Qualifications/Competence)

Team Member & % of Time Assigned	Areas of Competence	Description of Experience
 Darren Leveille, PLS Surveying Lead NM PLS #27277 **Time Assigned: 30%**	• 28 years of subsurface utility exploration and survey project management experience • Experience with high accuracy control networks, data management, data processing, boundary determination and control	**Strengths and Qualifications:** Mr. Leveille is a Senior Project Manager with 29 years of experience in working in all disciplines of the surveying and mapping industry. He has extensive experience in working with high accuracy control networks and technical aspects of data management, data processing, boundary determination, and boundary control. In his role as a Senior Project Manager, Mr. Leveille's function is to ensure that data being gathered by field staff is both accurate and within the specified project tolerances. This includes managing all field and CAD personnel associated with a project to maintain a high quality of deliverable and keeping projects within their specified budgets. **Project Experience:** 25th Street Investigation, *City of Aurora, CO* • Havana Street Improvements, *City of Aurora, CO* • Waterline Replacement, *City of Englewood, CO* • Hummingbird Circle and Ptarmigan Trail, *Tetra Tech, Town of Silverthorne, CO* • Straight Creek Drive, *Tetra Tech, Dillon Valley District, CO*
 Bobby Ortiz, CST III Survey Field Coordinator *NM CST III #1100-1289* **Time Assigned: 25%**	• 32 years of survey project management experience • Successfully delivered projects for federal and state agencies and many municipalities throughout New Mexico	**Strengths and Qualifications:** Mr. Ortiz has spent 32 years in the surveying industry acting as a Project Manager on hundreds of survey projects. He has been responsible for supervising and scheduling survey field crews in the production of all types of surveys, including second and third order geodetic surveys, second and third order leveling surveys, and a variety of photogrammetric control surveys throughout New Mexico and the Southwest. He has served as a Crew Chief and Project Manager on many projects to perform control work, boundary verification, topographic surveys, property surveys, right-of-way surveys, and construction staking and leveling. **Project Experience:** Chula/Morgan: LPGL, *AECOM, City of Las Cruces, NM* • Technical Services, *AECOM, City of Las Cruces, NM* • Cortez Drive, *HDR, City of Las Cruces, NM* • Well 64, *DBS&A, City of Las Cruces, NM* • Dripping Springs Road Utility Mapping, *BHI, City of Las Cruces, NM* • Roadrunner Parkway Extension, *Smith Engineering, City of Las Cruces, NM* • Downtown Redevelopment Project, *Parkhill, City of Las Cruces, NM*
 Brian Young, PE Electrical Design and Supervisory Control and Data Acquisition (SCADA) Lead *AZ PE #52847* **Time Assigned: 50%**	• 38 years of electrical design, instrumentation and controls, SCADA, electrical life and safety system design services	**Strengths and Qualifications:** Mr. Young has 38 years of experience in the design of electrical systems for municipal facilities, commercial and office buildings, industrial facilities, and primary electric transmission and distribution lines. As Electrical Engineer, he will provide electrical design and coordination, life safety system design, and instrumentation and controls. **Project Experience:** WRF Design Project, City of Provo, UT • Copper Basin Water Reclamation Facility, San Tan Valley, AZ • 157th Ave Water Reclamation Facility, Goodyear, AZ • Verrado Water Reclamation Facility Expansion, Buckeye, AZ • 91st Avenue Wastewater Treatment Plant, Phoenix, AZ

Evaluation Criteria No. 2 (Qualifications/Competence)

Team Member & % of Time Assigned	Areas of Competence	Description of Experience
 Jared Canuteson, PE Computer Network Analysis for Gas Lead *NM PE #22538* **Time Assigned: 30%**	• 21 years of progressive experience in energy, land development, and municipal project management	**Strengths and Qualifications:** Mr. Canuteson has overseen various civil and oil and gas projects that included grading, paving, erosion control, storm drainage, water and sanitary sewer, water system valuation, wastewater lift stations, stormwater pump stations, green building development, build-to-suit commercial development, natural gas upstream infrastructure, gas pipelines, and Risk Management Plan (RMP) updates for processing facilities. **Project Experience:** Southeast Connector Design-Build, *TxDOT, Tarrant County, TX* • Bell District Gas Relocation, *Atmos Energy, Cedar Park, TX* • Line D, Multiple Segments, *Atmos Energy, Dallas County, TX*
 Mohsen Karbakhsh, PhD, PE Computer Network Analysis for Water/ Wastewater, Well House Design, and Water Treatment Process Lead *NM PE #27062* **Time Assigned: 75%**	• 9 years of water and wastewater process treatment design and collection and distribution system modeling and design experience	**Strengths and Qualifications:** Mr. Karbakhsh is a lead project engineer and Albuquerque office manager with Water Works Engineers. He has over 9 years of experience, as well as 3 years of research experience at the New Mexico State University, where he worked on pilot scale algal bioreactors at the Jacob Hands WWTP. His experience ranges from developing O&M and SOPs for existing facilities, to hydraulic and process modeling (Fathom, SewerCAD, BioWin, InfoWater, InfoSewer, InfoWorks ICM), GIS and mapping, condition assessment, rehabilitation/replacement, planning, funding and permitting, design and bid, and construction of water/wastewater treatment and infrastructure systems. **Project Experience:** On-Call Engineering Services, *Albuquerque Bernalillo County Water Utility Authority (ABCWUA), Albuquerque, NM* • On-Call Services, *New Mexico Water Service Company, Rio Communities, NM* • • On-Call Services, *City of Deming, NM* • Various Wastewater Treatment Plants (Shiprock, Chinle, Kayenta, and Tuba City), *Navajo Tribal Utility Authority, Navajo Nation, NM* • RO Treatment and Distribution System, *Alamo Navajo School Board (ANSBI), Alamo, NM* • Surface Water Treatment Plant Preliminary Engineering Report (PER), Village of Chama, NM
 Matt Cramer, PE Geotechnical Lead *NM PE #18710* **Time Assigned: 10%**	• 15 years of experience as a geotechnical and structural engineer	**Strengths and Qualifications:** Mr. Cramer, PE has 15 years of engineering experience as project manager of geotechnical engineering services on structures, bridges, and roadway projects of all types and sizes. His experience includes working with a wide variety of clients including the public sector. **Project Experience:** O'Reilly West Side Exterior Concrete Pavement Evaluation, *Dona Ana County, NM* • Contract Drilling Services, *Las Cruces, NM* • Radio Tower Replacement, Las Cruces, NM

B. NAME, ADDRESS, TELEPHONE NUMBER OF THE PRINCIPAL MEMBER/OFFICER OF THE FIRM RESPONSIBLE FOR ADMINISTRATION OF THE CONTRACT

Sean Wolfe, PG | Senior Vice President | Mountain Region Manager

Address:
3820 Academy Parkway North NE
Albuquerque, New Mexico 87109

Phone: 505.508.0786

SUBCONSULTANT ADDRESSES, QUALIFICATIONS, AND AREAS OF RESPONSIBILITY

GEOMAT

Responsible Addresses:
Farmington: 915 Malta Avenue, Farmington, New Mexico 87401
Albuquerque: 7901 Lorraine Ct. NM, Albuquerque, New Mexico 87113

Phone: 505.327.7928
Fax: 505.326.5721
Email: matt.cramer@geomatengineering.com

Firm Qualifications: GEOMAT is an owner-operated firm and has been serving the State of New Mexico since 2004. GEOMAT provides geotechnical engineering, geotechnical drilling services, quality assurance testing, and special inspection.

Areas of Responsibility: Geotechnical Assessment services

Water Works

Address:
8650 Alameda Boulevard NE, Suite 103E
Albuquerque, NM 87122

Phone: 505.210.9546
Fax: N/A
Email: mohsenk@wwengineers.com

Firm Qualifications: Water Works is a focused water and wastewater consulting firm, with over 19 years of experience and ten offices throughout the western United States. Water Works has been serving the state of New Mexico since 2011, and after establishing their Albuquerque office in 2023, Water Works is ready to expand their high-quality organic work to clients like the City of Las Cruces.

Areas of Responsibility: Electrical design, computer network analysis for water (InfoWater) and wastewater (InfoSewer), well house design, water treatment process, and supervisory control and data acquisition (SCADA) services

Zia

Address:
755 S. Telshor Blvd., Suite Q-201
Las Cruces, NM 88011

Phone: 575.532.1526
Fax: 575.532.1587
Email: ehmartinez@ziaeec.com

Firm Qualifications: Zia is a professional engineering and environmental consulting firm, headquartered in Las Cruces since 2000. The firm has experience and expertise in civil and environmental engineering, drainage analysis and stormwater and erosion control, environmental investigations and permitting, air quality, water and wastewater systems analysis, NEPA environmental compliance, RCRA investigations and remediation, land use studies and feasibility analyses, cultural and natural resources studies, environmental Phase I and II investigations, and asbestos and lead investigations.

Areas of Responsibility: Solid waste studies, landfill system design and analysis, environmental surveys, assessments monitoring and management, such as indoor air quality, asbestos, mold, and other related services for the City

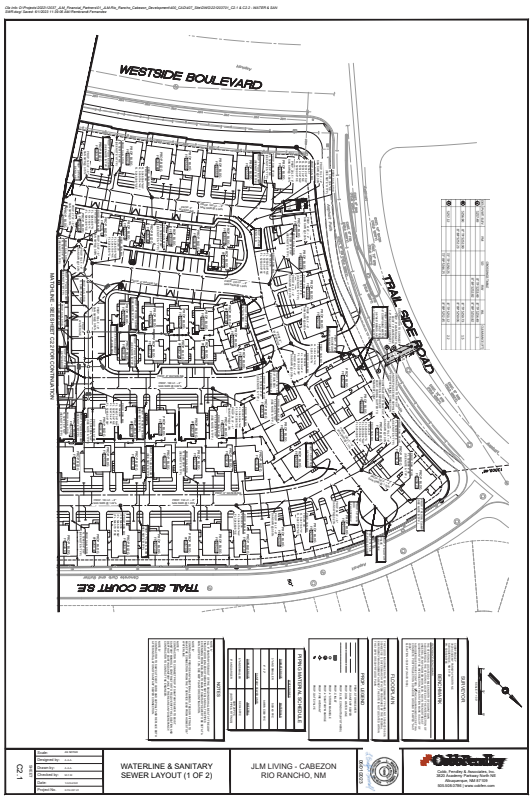
Evaluation Criteria No. 3 (Performance of the firm)



CABEZON SITE DEVELOPMENT

JLM FINANCIAL PARTNERS | RIO RANCHO, NEW MEXICO

Project Description: This multi-family residential project required complete site development including drainage, transportation access from a principal arterial, water, and sewer system design to support a 126-unit development. The surrounding properties are completely developed and integration into the existing utility and transportation network required careful evaluation of all existing utility infrastructure. The site requires two 8-inch water line extensions, connection of an 8-inch line into the existing sanitary sewer network, and avoidance of other utilities around the perimeter of the project site. Numerous water services are needed to connect the residential units, development clubhouse, and swimming pool facilities to the utility network. The design complied with all City of Rio Rancho utility system requirements including fire flow. Detailed coordination with Public Service Company of New Mexico was needed to extend electrical service to this currently unserved 10-acre property.

CR 245 AND RM 2338 FORTIFICATION

ATMOS ENERGY | GEORGETOWN AND WILLIAMSON COUNTY, TEXAS

Project Description: CobbFendley is currently contracted by Atmos Energy to provide engineering plans for the proposed 6-inch HDPE gas main running south along CR 245 from the north side of Ronald Reagan RM 2338, crossing RM 2338, and then north along the west side of RM 2338 to a proposed development. Services involve survey and subsurface utility exploration for the southern half of the project and also include the design of approximately 7,500 linear feet of 6-inch HDPE gas mains inside public ROW. The proposed alignment includes multiple bore crossings of pavement, including the HDD bore across Ronald Reagan Boulevard, the HDD bore across RM2338, and several other bores. All bores will be designed with a 10-inch casing. CobbFendley is also currently the Williamson County Review Engineer and is performing all utility coordination activities for the entire Ronald Reagan expansion and CR 245 improvements. The roadway project is a Williamson County project but will be deeded to the City of Georgetown, so both entities are involved in the review. The CR 245 Roadway Improvement project is currently under construction by the roadway contractor. The corridor also has limited space between the ROW and is congested with multiple utilities. Our services will be integral to the successful completion of the project.

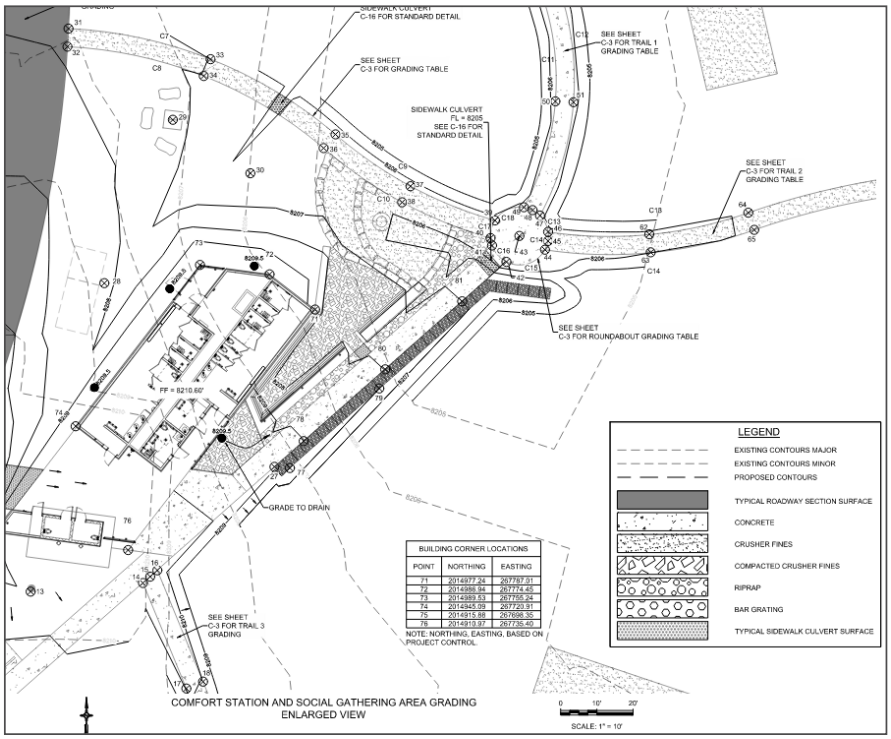
EAGLE NEST CAMPGROUND IMPROVEMENTS
EMNRD | COLFAX COUNTY, NEW MEXICO



REFERENCE

EMNRD
Emily Stout, Project Manager
1220 South Saint Francis Drive
Santa Fe, NM 875005 US
505.476.3408
emily.stout@emnrd.nm.gov

Project Description: Through an on-call/ master service agreement, CobbFendley engineers and surveyors are designing improvements for State Park facilities in rural Northern New Mexico. Due to increased user needs, CobbFendley completed design improvements to a 30-site RV campground at this rural state park in Eagle Nest, New Mexico. Improvements include extension of new electrical service, design of a comfort station containing restroom and shower facilities, and a wastewater collection, treatment, and disposal system for flows generated by the comfort station. Improvements to the existing well-fed water supply system were needed due to the increased system demand created by the comfort station. Improvements include design of a standpipe above ground storage facility, booster pumps to increase system pressure, and addition of a hypochlorite water disinfection system installed at the wellhead.

CobbFendley managed the entire project and coordinated numerous subconsultants including architecture, mechanical, electrical, and plumbing engineering, geotechnical engineering, along with landscape architecture to address the improvements at Eagle Nest Lake State Park. Permits for water and sewer system upgrades were obtained through NMED.

PROJECT ASSIGNMENT AGREEMENT

23-24-052 UTILITIES ENGINEERING SERVICES

PROJECT NAME

Pursuant to terms and conditions of City of Las Cruces (CITY) Contract No. 23-24-052 dated June 1, 2024 between the CITY and Cobb, Fendley & Associates,Inc. (ENGINEER), as amended and incorporated herein by reference, the City and Contractor hereby agree on this _____ day of _____, 20___, as follows:

1. In a satisfactory and proper manner, the ENGINEER shall perform SERVICES as proposed in response to the CITY's RFP No. 23-24-052 and ENGINEER's proposal as set forth in ATTACHMENT A attached hereto.

2. The estimated completion date is number days after a Notice to Proceed is issued by the CITY to the ENGINEER.

3. In consideration for the satisfactory completion of the work agreed to herein, compensation shall be made in the amount of $dollars.cents, plus NMGRT. Invoices issued by the ENGINEER shall be made monthly / upon completion of project with payment by the CITY being made within 30 days upon receipt of undisputed invoice.

CITY OF LAS CRUCES

PROFESSIONAL SERVICES AGREEMENT

THIS AGREEMENT, made and entered into on this _____ day of _____, 2024 by and between the City of Las Cruces, New Mexico, hereinafter called “CITY” and Daniel B. Stephens & Associates, Inc., of 6020 Academy NE, Ste 100, Albuquerque, NM, 87109, hereinafter called “CONTRACTOR”.

1. PROJECT DESCRIPTION
Utilities Engineering Services on an as needed basis via Project Assignment Agreements (Attachment “A”) during the term of this AGREEMENT.

2. SCOPE OF SERVICES
In a satisfactory and proper manner, the CONTRACTOR shall perform SERVICES, as proposed in response to the CITY’S RFP No. 23-24-052, as set forth in Exhibit A, attached hereto and made a part of this Agreement.

The CONTRACTOR is authorized to extend the same terms and conditions of this Agreement to other governmental entities conditioned upon the procurement laws and regulations of those entities. The CITY shall not be a party nor have any liability relating to such extensions.

3. APPROPRIATIONS
The terms of this Agreement are contingent on sufficient appropriations and authorization being made by the City Council for the performance of this Agreement. If sufficient appropriations and authorizations are not made by the City Council, this Agreement shall terminate upon written notice given by the CITY to CONTRACTOR. The CITY’S decision as to whether sufficient appropriations and authorizations exist shall be accepted by CONTRACTOR and shall be final.

4. COMPENSATION
The CITY shall compensate CONTRACTOR for the performance of SERVICES under this Agreement an amount agreed to for each assigned project, plus applicable taxes. CONTRACTOR shall perform the SERVICES upon receipt of a purchase order or written Notice to Proceed for each assigned project from the CITY. The CITY cannot authorize costs to be incurred prior to such written Notice to Proceed. CONTRACTOR shall submit invoices upon completion of the project. CITY shall pay invoices Net 30 days upon receipt of undisputed invoice.

CONTRACTOR is responsible for payment of State of New Mexico Gross Receipts Tax levied on the amounts payable under this Agreement. CONTRACTOR agrees to comply with all federal and state tax payments and report all items of gross receipts as income from the operations of its business.

5. DEVOTION OF ADEQUATE TIME
CONTRACTOR will devote the necessary hours each week to the performance of projects that are required by the CITY and it will serve the CITY diligently and faithfully,

and according to its best ability in all respects and will promote the best interests of the CITY.

6. TERM AND SCHEDULE
This Agreement shall become effective on June 1, 2024 for a term of 5 years through May 31, 2029.

CONTRACTOR shall perform the SERVICES in accordance with the time set forth as agreed upon by the CITY and CONTRACTOR and as agreed to for each project assigned under the terms of this Agreement.

7. EXTENSIONS, CHANGES, AND AMENDMENTS
This Agreement shall not be extended, changed, or amended except by instrument in writing executed by the parties. The CITY shall not be liable for payment of any extra services nor shall CONTRACTOR be obligated to perform any extra services except upon such written agreement. Such written approval shall indicate the date said extension, change, or amendment is effective and shall be signed by the parties to this Agreement. In the event that the parties cannot reach agreement as to a particular change, the issue shall be resolved pursuant to Article 21.

8. CHANGES AND EXTRA SERVICES BY THE CITY
The CITY may make changes within the general scope of the SERVICES plus may also request CONTRACTOR to perform other extra services not incorporated within the Services set forth in this Agreement. If the CONTRACTOR is of the opinion that such change causes an increase or decrease in the cost and/or the time required for performing the changes or other services required by the City, CONTRACTOR shall so notify the CITY of that fact within five (5) business work days from the date of receipt of change by the CITY. The CITY shall provide written response to the CONTRACTOR within five (5) business work days from the date of receipt of CONTRACTOR'S written notification.

9. CHANGES AND EXTRA SERVICES BY THE CONTRACTOR
In the event a condition is identified by the CONTRACTOR which, in the opinion of the CONTRACTOR, changes the services, costs, and/or time required for performance under this Agreement, the CONTRACTOR shall provide written notification to the CITY within five (5) business work days of such identification. The CITY shall respond in writing to such notification within five (5) business work days from the date of receipt of CONTRACTOR'S notification.

10. DELAYS
In the event that performance of SERVICES is delayed by causes beyond reasonable control of CONTRACTOR, and without the fault or negligence of CONTRACTOR, the time and total compensation for the performance of the SERVICES may be equitably adjusted by written agreement to reflect the extent of such delay. CONTRACTOR shall provide the CITY with written notice of delay pursuant to Article 9 including therein a description of the delay and the steps contemplated or actually taken by

CONTRACTOR to mitigate the effect of such delay. The CITY will make the final determination as to reasonableness of delays.

11. TERMINATION
This Agreement may be terminated by either party hereto upon fifteen (15) calendar days written notice in the event of substantial failure by the other party to perform in accordance with the terms of this Agreement through no fault of the terminating party. This Agreement may also be terminated by the CITY for its convenience or because the PROJECT has been permanently abandoned, but only upon fifteen (15) calendar days written notice to CONTRACTOR.

In the event of termination, CONTRACTOR shall be compensated for all services performed and costs incurred up to the effective date of termination for which CONTRACTOR has not been previously compensated.

Upon receipt of notice of termination from the CITY, CONTRACTOR shall discontinue the SERVICES unless otherwise directed and upon final payment from the CITY deliver to the CITY the required number of copies of all data, drawings, reports, estimates, summaries, and such other information and materials as may have been accumulated by CONTRACTOR in the performance of this Agreement, whether completed or in process.

12. RECORDS AND AUDITS
CONTRACTOR will maintain records indicating dates, length of time, and services rendered. The CITY has the right to audit billings both before and after payment, and contest any billing or portion thereof. Payment under this Agreement does not foreclose the CITY'S right to recover excessive or illegal payments. CONTRACTOR will retain records for five (5) years after the completion of the project.

13. DISCLOSURE AND OWNERSHIP OF DOCUMENTS, PRODUCTS, DESIGN, ELECTRONIC FILES
All technical data, electronic files, and other written and oral information not in the public domain or not previously known, and all information, electronic files, and data obtained, developed, or supplied by the CITY will be kept confidential and CONTRACTOR will not disclose to any other party, directly or indirectly, without the CITY'S prior written consent unless required by lawful order.

All technical data, electronic files, products developed, operational parameters, blueprints, and other information and work of the CONTRACTOR shall be the sole property of the CITY and shall be delivered to the CITY when requested and at the end of the Agreement.

14. INDEPENDENT CONTRACTOR
CONTRACTOR represents that it has, or will secure, at its own expense, all personnel required in performing the SERVICES under this Agreement. Such personnel shall not be employees of, nor have any contractual relationship with the CITY. CONTRACTOR,

consistent with its status as an independent contractor, further agrees that its personnel will not hold themselves out as, nor claim to be officers or employees of the CITY by reason of this Agreement.

To the extent that CONTRACTOR employs any employees, CONTRACTOR shall be solely responsible for providing its own form of insurance for its employees and in no event shall CONTRACTOR's employees be covered under any policy of the CITY.

CONTRACTOR'S retention hereunder is not exclusive. Subject to the terms and provisions of this Agreement: (i) CONTRACTOR is able, during the Term hereof, to perform services for other parties; and (ii) CONTRACTOR may perform for its own account other professional services outside the scope of this Agreement.

CONTRACTOR is and shall be an Independent Contractor and shall be responsible for the management of its business affairs. In the performance of the work under this Agreement, CONTRACTOR will at all times be acting and performing as an Independent Contractor, as that term is understood for federal and state law purposes, and not as an employee of the CITY. Without limitation upon the foregoing, CONTRACTOR shall not accrue sick leave, jury duty pay, retirement, insurance, bonding, welfare benefits, or any other benefits, which may or may not be afforded employees of the CITY. CONTRACTOR will not be treated as an employee for purposes of: Workers' Compensation benefits; the Federal Unemployment Tax Act; Social Security; other payroll taxes, federal or any state income tax withholding; or the employee benefit provisions described in the Internal Revenue Code of 1986, as amended. Neither the CITY, nor its agents or representatives, shall have the right to control or direct the manner, details or means by which CONTRACTOR accomplishes and performs its services. Nevertheless, CONTRACTOR shall be bound to fulfill the duties and responsibilities contained in the Agreement.

15. NO JOINT VENTURE OR PARTNERSHIP

Nothing contained in this Agreement shall create any partnership, association, joint venture, fiduciary or agency relationship between CONTRACTOR and CITY. Except as otherwise specifically set forth herein, neither CONTRACTOR nor CITY shall be authorized or empowered to make any representation or commitment or to perform any act which shall be binding on the other unless expressly authorized or empowered in writing.

16. ASSIGNMENT

CONTRACTOR shall perform all the services under this Agreement and shall not assign any interest in this Agreement or transfer any interest in same or assign any claims for money due or to become due under this Agreement without the prior written consent of the CITY.

17. INSURANCE
CONTRACTOR shall obtain and maintain insurance at its own cost and expense during the life of this Agreement, and shall require Subcontractors, if any, to maintain during the life of his subcontract:

1. Commercial General Liability Insurance
   a. $1,000,000 per occurrence / $2,000,000 aggregate
   b. Coverage must include premises and operations, products and completed operations, and personal and advertising injury.
   c. The City of Las Cruces must be named as an Additional Insured for all coverages listed above on endorsements acceptable to the City.
   d. Coverage must be primary and non-contributory.
   e. Coverage must be per project or per location.
   f. Coverage must be on an occurrence form.
   g. Subrogation must be waived.
2. Commercial Auto Liability
   a. $1,000,000 per occurrence
   b. Coverage must be for “owned, leased, hired, and non-owned autos” or “any autos.”
3. Workers’ Compensation and Employers Liability
   a. Statutory Limits
   b. Employer liability – $1,000,000 each accident, $1,000,000 each employee by disease, $1,000,000 policy limit
   c. Subrogation must be waived.
4. Professional Liability: $1,000,000 per claim

Endorsements for additional insured coverage and waivers of subrogation must be provided as a condition of this Agreement and shall be noted on the certificate.

CONTRACTOR shall furnish the CITY with a certificate(s) of insurance showing CONTRACTOR and Subcontractors, if any, have complied with this Article. The CONTRACTOR shall provide insurance certificates before work is to start on the project and shall provide the CITY thirty (30) days written notification of cancellation of such policies.

18. INDEMNITY AND LIMITATION
CONTRACTOR shall indemnify, defend, and hold harmless the CITY from and against any and all claims, suits, actions, judgments, demands, losses, costs, expenses, damages, and liability caused in whole or in part by, resulting in whole or in part from, or arising in whole or in part out of the negligent acts, errors, or omissions of CONTRACTOR, its officers, employees, agents, or representatives in the performance of SERVICES under this agreement.

19. APPLICABLE LAW
This Agreement and the rights and obligations of the parties shall be governed by and construed by the laws of the State of New Mexico applicable to Agreements between

New Mexico parties made and performed in that state, without regard to conflicts of law principles. Venue shall be in the Third Judicial District, State of New Mexico.

CONTRACTOR shall abide and be governed by all applicable state law, CITY ordinances, and laws regarding the CONTRACTOR'S services or any work done pursuant to this Agreement, including anti-discrimination.

20. BREACH
In the event CONTRACTOR breaches any obligation contained in this Agreement, prior to instituting any action or dispute resolution procedure, the CITY shall give CONTRACTOR written notice of such breach. In the event CONTRACTOR fails to remedy the breach within five (5) working days of receiving such written notice, the CITY, at its sole discretion, without any obligation to do so and in addition to other remedies available under applicable law, may remedy CONTRACTOR'S breach and recover any and all costs and expenses in so doing from CONTRACTOR.

21. DISPUTE RESOLUTION
In the event that a dispute arises between CITY and CONTRACTOR under this Agreement or as a result of breach of this Agreement, the parties agree to act in good faith to attempt to resolve the dispute.

22. NOTIFICATION
All notices required or permitted under this Agreement shall be in writing and shall be deemed sufficiently served if served by Registered Mail addressed as follows:

TO CITY:	City of Las Cruces PO Box 20000 Las Cruces, NM 88004 ATTENTION: Tony Trevino
With Copies to:	City Attorney Purchasing Manager
TO CONTRACTOR:	Daniel B. Stephens & Associates, Inc. 6020 Academy NE, Ste 100 Albuquerque, NM 87109 ATTENTION: Gundar Peterson

23. SCOPE OF AGREEMENT
This Agreement incorporates all of the agreements, covenants, and understandings between the parties hereto concerning the subject matter hereof and that all such covenants, agreements, and understandings have been merged into this written agreement. No prior agreement or understanding verbal or otherwise of the parties or their agents shall be valid or enforceable unless embodied in this agreement.

24. SEVERABILITY
The parties agree that each provision of this Agreement is severable and the invalidity or unenforceability of any one or more of the provisions of this Agreement shall not affect the validity or enforceability of any other provision of this Agreement, and this Agreement shall be construed in all respects as if such invalid or unenforceable provisions were omitted.

25. CONFLICT OF INTEREST
CONTRACTOR represents and warrants that CONTRACTOR has no business, professional, personal, or other interest, including, but not limited to, the representation of other clients, that would conflict in any manner or degree with the performance of its obligations under this Agreement. If any such actual or potential conflict of interest arises under this Agreement, CONTRACTOR shall immediately inform the CITY in writing of such conflict. If, in the reasonable judgement of the CITY, such conflict poses a conflict to and with the performance of CONTRACTOR'S obligations under this Agreement, or is otherwise a violation of the CITY'S current policy or ordinances, then the CITY may terminate the Agreement immediately upon written notice to CONTRACTOR; such termination of the Agreement shall be effective upon the receipt of such notice by CONTRACTOR.

EXHIBIT A
SERVICES

A. Project Assignments
A Project assignment is initiated by the City providing the selected Engineer a detailed project description, including scope of work and any other special instructions needed by the Engineer to prepare items such as preliminary and final cost estimates, complete project plans and specifications, project reports, and other related engineering services. The awarded Engineers shall provide engineering services that may include but not be limited to, the following:
1. Computer network analyses for water, wastewater, and gas systems; design of water, wastewater, and gas utility systems; well house design; Supervisory Control and Data Acquisition (SCADA); water treatment process; master planning; feasibility studies; solid waste studies; land use permitting; subsurface utility exploration; boundary/easement survey; and National Pollutant Discharge Elimination System (NPDES) & Stormwater Pollution Prevention Plan (SWPPP) compliance.
2. Electrical design (wells, booster stations, lift stations, odor control stations, building electrical system design)
3. Computer network analysis for Gas (GasWork), Water (InfoWater), and Wastewater (InfoSewer). The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility
4. Solid waste studies, landfill system design and analysis
5. Environmental surveys, assessments monitoring and management, such as indoor air quality, asbestos, mold, and other related services for the City
6. Geotechnical Assessments, such as soil and groundwater testing for contamination and remediation, and other related services for the City
7. Expert witness in a judicial and/or quasi-judicial setting.
8. Project Management
9. Construction Inspection.

B. Project Assignment Agreements
A Project Assignment Agreement (a template of which is incorporated herein as ATTACHMENT “A”) will be negotiated and executed on a case-by-case basis for each specific project, and will include a cost proposal from the Engineering firm(s) proposing to do the work. The cost proposal may utilize one of the following pricing formats:
1. Lump Sum
2. Unit pricing to include:
    a. Hourly rate for various types of services requested by the City
    b. Charges for miscellaneous items such as blueprints, data, discs, rental of special equipment, etc.
    c. A statement of the billing procedures including minimum billing units, if any.
    d. Cost of sub-consultants (if any)
3. An alternative unit cost breakdown

C. Deliverables
Each project contract will require a list of deliverables, schedule/timeline and cost. The

Engineer may be required to supply to the City an of the following items, when specified and as requested on the Scope of Work for each individual project.

1. Preliminary report containing schedule of work and cost estimate.
2. Construction drawings and documents. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility. Provide hard copies and PDF format of the construction plans for Purchasing Section use.
   a. As-built drawings on electronic media and reproducible prints. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. All horizontal and vertical location datum information shall be coordinated with the City Surveyor. The utility location information shall be tied to project control monuments and referenced to project construction stationing. The project control survey shall be certified by a New Mexico Registered Land Surveyor. Metadata or “data about the data” shall be submitted with each as-built electronic file, preferably as a separate text file on the electronic submittal media, and shall include:
      - Name, address and phone number of the responsible land surveyor.
      - Date of completion of survey.
      - Equipment used to conduct the survey.
      - Horizontal and vertical control marks used to tie the survey to the City approved control.
      - Transformation factors needed to reduce Ground (local coordinate system) to Grid and combined scale factor used.
   b. “RECORD DRAWINGS” shall be clearly labeled on each sheet.
3. Computer network analysis for gas, water, and wastewater shall be provided to the City in appropriate electronic format. It shall include the entire model, including changes and a text summary (report) of the network analysis that includes assumptions, procedures, and results, and any graphics that clarify the analysis. The Engineering firm(s) shall verify the report format with the City. The computer network analysis shall be provided using the software listed below. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility.
   a. Computer network analysis for Gas: GasWork
   b. Computer network analysis for Water: InfoWater
   c. Computer network analysis for wastewater: InfoSewer
   d. Other design computer programs as approved by the City
4. Project reports.
5. Any other item specified in the contract for that project
6. Easement map and recording information

D. The selection of an Engineer for a specific project shall be based on experience with similar projects, references, performance in similar projects, and availability. This will include the ability to meet schedules, cost control, and responsiveness to client.

E. The Engineer shall have an engineering staff on-site everyday who is responsible, on behalf of the Engineer, for providing timely completion and response for performance of the terms of each Project Assignment Agreement during the progress of each individual project. Any deviation from this requirement is at the discretion of the City and must be approved in writing by the City prior to the start of any individual project.

ATTACHMENT C – COST PROPOSAL FORM RFP 23-24-052 – Utilities Engineering Services
(NOTE: This form shall not to be modified in any way)

Consulting Firm Daniel B. Stephens & Associates, Inc.

ITEM	DIRECT LABOR / CLASSIFICATION	HOURLY RATE*
1	Principal Engineer	$ 275.00
2	Project Engineer/Project Manager	$ 175.00
3	Senior Engineer	$ 215.00
4	Design Engineer	$ 150.00
5	Engineer Intern	$ 130.00
6	Engineering Technician	$ 115.00
7	Drafting Technician	$ 115.00
8	Survey Crew**	$ 300.00
9	Construction Inspector/Observer	$ 115.00
10	Administrative/Clerical	$ 110.00
11	Field Testing and Investigations	$ 140.00
		PERCENT MARKUP
12	Subcontractor Cost Markup	(%) 10%
ITEM	**MATERIALS / REIMBURSABLE EXPENSES**	**RATE**
	Travel	
13	Per Diem (per day) – Pre-Approval Required	City of Las Cruces Rate
14	Vehicle Mileage Rate (per mile)	Current IRS Rate
	Reproduction Services	
15	Black and White Copies (per copy)	$ .35
16	Color Copies (per copy)	$ .95
17	Prints 24x36 (per sheet)	$ 8.00
18	Mylars 24x36 (per sheet)	$ 15.00
19	Photo Quality Plots (per plot)	$ 8.00
	Miscellaneous	
20	Any other costs incurred	Case by Case Basis

**Rates are to include all overhead costs and any and all assessment expenses*

***Survey Crew Rates are to include GPS and Total Station Equipment*

Notes: 1. Detailed man hour Estimates are required for T&M contracts and are to utilize corresponding rates

2. Rates in place at the time a project is contracted with the City will remain for the duration of the contract.

TECHNICAL PROPOSAL FOR

Utilities Engineering Services

RFP# 23-24-052 | Due: February 27, 2024

Prepared for

City of Las Cruces®

DBS&A
a Geo-Logic Company

6020 Academy Road NE, Suite 100, Albuquerque, New Mexico 87109

DBS&A
a Geo-Logic Company

February 27, 2024

City of Las Cruces
ATTN: Purchasing Department/Bid Clerk
700 N. Main Street, Room 3134
Las Cruces, New Mexico 88001

Re: RFP No. 23-24-052, Utilities Engineering Services

Dear Selection Committee Members:

The City of Las Cruces has requested on-call engineering services for utilities to support a wide range of potential projects. Daniel B. Stephens & Associates, Inc. (DBS&A) looks forward to continuing to serve the City and possibly expand the services we offer under our current Utility Engineering and Environmental Engineering On-Call Contracts.

DBS&A is prepared to address your need for engineering services related to water, wastewater and stormwater systems, and landfills, including planning, design, permitting, and model analysis. We also provide environmental and geotechnical assessments, groundwater monitoring, all types of regulatory documentation and reporting, expert services in judicial and quasi-judicial settings, project management, and construction services.

Las Cruces Utilities Department staff have worked with many DBS&A staff, mostly from our Albuquerque office, on projects including the Griggs-Walnut Superfund site, the Utilities Master Plan, and a number of water system improvements projects. If projects require full time resources, DBS&A can open a project office in Las Cruces.

Our proposal communicates our approach to perform the work, our experience with the services needed, the capabilities of our team, and our commitment to service and quality. Please contact us if you have any questions or require additional information.

Sincerely,

DANIEL B. STEPHENS & ASSOCIATES, INC.

Jennifer Hill, PE
Project Manager

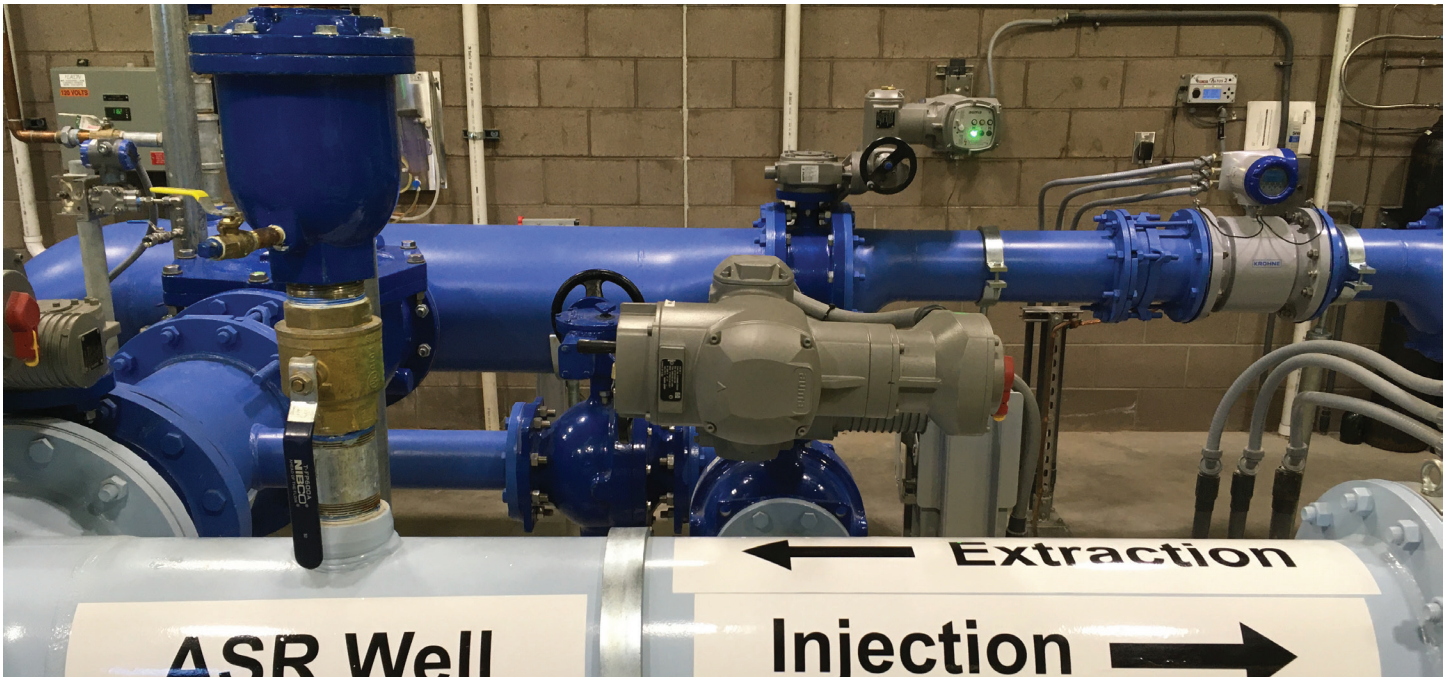
Appendix - Required Forms

RFP Compliance Declaration Form

New Mexico Resident Preference Certificate

The City of Las Cruces needs experienced engineers and other specialists to address a broad range of design and regulatory challenges. DBS&A has proven experience providing these and other services to the City. We are committed to serving the City with continuity of service, expertise in utilities engineering, and high-quality deliverables.



1. Technical Approach

Professional, Technical, and Customary Services Provided

Daniel B. Stephens & Associates, Inc. (DBS&A) understands that project assignments under this contract will be initiated by the City of Las Cruces (City) by providing a detailed project description, including scope of work and any other special instructions needed. DBS&A has the expertise to prepare preliminary and final cost estimates; Microsoft Project schedules; complete plans and specifications; and project reports. The scope of this contract includes a broad range of utility engineering services to enable the City to assign any type of engineering services on an as-needed basis. Therefore, the detailed scope of work will vary considerably between task orders.

DBS&A is accustomed to serving large multi-task programs and is frequently asked to execute projects under tight time limitations. On all projects, we prepare a detailed project management plan (PMP) that includes the project scope, budget, and schedule. The PMP is an internal management tool that can be referenced by the DBS&A team members.

Major Tasks

DBS&A understands that major tasks under this contract may include:

1. Computer network analyses and design services for water and wastewater systems
2. Electrical design
3. Computer network analyses for gas, water, and waste water using latest version of modeling software
4. Solid waste studies, landfill system design and analysis
5. Environmental surveys, assessments monitoring and management
6. Geotechnical assessments
7. Expert witness
8. Project Management
9. Construction Inspection

DBS&A regularly supports our clients through all stages of project development and execution. Our technical approach includes identifying the best qualified technical personnel from our company to execute the task at hand, implementing engineering best practices including the most appropriate technology tools, reviewing all work products by qualified reviewers, and effective communication both internally and externally. Our diverse staff includes not only engineers, but also computer-aided design (CAD) specialists, hydrogeologists and geologists, chemists, biologists, technical editors, and construction observers. We collaborate between disciplines to offer a well-rounded approach to engineering solutions.

Our general approach to engineering projects, which might include one or many of the detailed services described in more detail below, is as follows.

1. Conduct a thorough evaluation of options, or if the project concept is already in place, formalize the design criteria and basis of design.
2. Prepare the documents needed, which might include environmental documentation, calculations, engineering reports, engineered plans, technical specifications, contract documents, presentations for public meetings, etc. DBS&A specializes in providing custom, site-specific engineering design solutions that address the specified goals of our clients and project stakeholders.
3. Follow an established quality assurance/quality checking procedure. This includes identifying a qualified reviewer, keeping records of the review, and backchecking that comments are addressed, for each deliverable. We also employ a staff of professional technical editors.
4. Deploy our subconsultant resources as required. We have established relationships with subconsultants that we use on a regular basis, so that our team operates like a single company.
5. Communicate at critical project milestones with our client. These typically includes project initiation/scoping phase, kickoff meeting, milestone deliverable reviews, issuance of final documents for bidding, bid phase, pre-construction meeting, and regular progress meetings during construction.

Under our contract with the City for Utilities Engineering, DBS&A designed a booster station for the Spruce Tank.

Detailed Services Under Each Task

Our general approach and experience with the services required in the request for proposals (RFP) follows.

1. Computer Network Analyses and Design Services

DBS&A is very familiar with the City's computerized water model in Infowater, having updated the model in 2018 and 2023 with new pipes from the GIS database, and with new demands from billing data. Our capabilities also include stormwater and sewer modeling. We have used our modeling capabilities to support master plans for infrastructure including the City's recent utilities master plan update. Our capabilities also include design of infrastructure including pipelines and well houses; biological treatment; feasibility studies; subsurface utility exploration; construction support; and National Pollutant Discharge Elimination System (NPDES) and Stormwater Pollution Prevention Plans (SWPPP) compliance.

We understand the City operates water, wastewater and gas utilities and is responsible for stormwater compliance under the Municipal Separate Storm Sewer System (MS4) Permit. DBS&A has gained extensive experience with MS4 permitting in recent years working on behalf of the City of Albuquerque, the New Mexico Department of Transportation (NMDOT), Albuquerque Metropolitan Arroyo Flood Control Authority (AMAFCA), and the University of New Mexico to comply with the Middle Rio Grande's new watershed-based MS4 permit.

We have strong credibility with regulatory agencies governing New Mexico, including the New Mexico Environment Department (NMED), U.S. Environmental Protection Agency (EPA) Region 6, the Office of the State Engineer (OSE), and others, which makes us more effective in negotiating permit variances and other terms with these agencies on behalf of our clients.

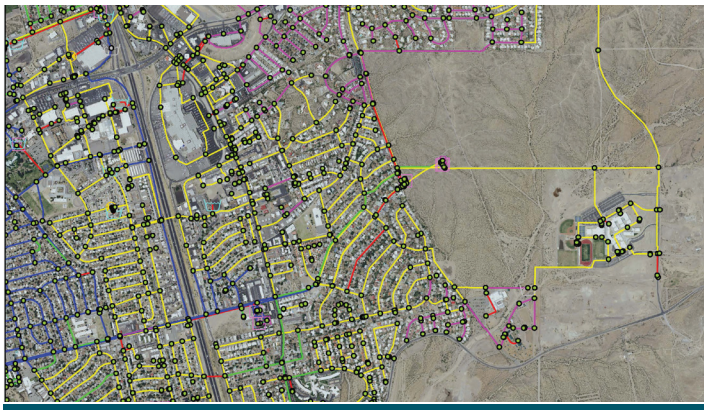
Water System Engineering

DBS&A has supported the City in many areas under our on-call contracts. This includes a Water Stagnation Study in 2017 which included water quality sampling and analysis in the distribution system, and water quality modeling to support recommendations for optimization of chemical dosing for red water control. We have updated the model and conducted field testing (pressure and hydrant flow tests) to validate the model. We have prepared several technical memoranda and fact sheets regarding fluoride in drinking water, desalination, lead, red water, and arsenic.

With our hydrogeologic services capabilities, we help utilities with well siting, well design, and construction oversight of well drilling. In addition, DBS&A is able to complete engineering design for supply wells, pumping stations, storage tanks, associated pipelines, and treatment.

DBS&A routinely prepares planning and analysis documents for water systems such as 40-year water plans, conservation plans, water audits, preliminary engineering reports, and basis of design studies.

We also prepare construction drawings, technical specifications, and bid documents and provide support during construction including on-site observations. Recent projects for which we have provided services from planning through design include the Water Authority Large Scale Recharge Project, which consists of a deep aquifer direct injection well and one shallower vadose zone well. For this project we provided planning, investigation, permitting, design, and construction oversight.



Water model update for the City of Las Cruces

Wastewater Engineering

DBS&A engineers have prepared sanitary sewer system evaluations, capacity studies, and engineering designs, including for gravity and pressurized collection systems and wastewater treatment plants.

For the City of Las Cruces, we previously performed a study to evaluate potential sources of copper, mercury, and cadmium in the influent to the Wastewater Treatment

Plant. The study evaluated sources of these metals on the collection system, recommended changes to the pretreatment program, and included a successful application for modifications to the draft NPDES permit limitations of copper.

Our wastewater analysis experience includes collection system inspections, evaluation, and wastewater sampling. For a proposed farmworker housing development in Ventura County, California, we compared a low pressure grinder pump system to a gravity system. For Pancho Villa State Park in southern New Mexico, we evaluated on-site wastewater disposal versus sewer collection system for continued wastewater service to the park including museum/visitor center, and RV park.

In the area of wastewater treatment, we have conducted treatment system evaluations to recommend improvements either to increase capacity or improve treatment for a number of utilities including Forest Highlands golf community in the vicinity of Flagstaff, Arizona; for the Village of Jemez Springs, New Mexico; and for Acoma Business Enterprises. We have also provided low cost nutrient removal training classes for wastewater operators around the state, under contract with NMED's Surface Water Bureau.

For the Forest Highlands golf community, DBS&A evaluated the wastewater treatment facility and recommended improvements.

Treated Effluent Reuse and Recharge

We have been involved with two flagship projects in New Mexico that involve reuse and recharge of treated wastewater effluent: the Clovis Reuse system for which we designed tertiary filtration, and provided permitting and funding assistance; and the Rio Rancho direct injection facility for which we conducted a siting study for the injection well, conducted pilot testing of advanced treatment and of the injection well, designed the full-scale Advanced Oxidation Process system, and continue to provide services for ongoing monitoring and reporting to NMED and the NM OSE.

Managed Aquifer Recharge

DBS&A has provided permitting services for all of the active recharge projects in the State. In particular, we assisted the Albuquerque Bernalillo County Water Utility Authority with permitting, design and construction of both the Bear Canyon Arroyo project which recharges bank filtered river water, and the Large Scale San Juan Chama Drinking Water Project injection and vadose zone wells which recharge treated water from the surface water treatment plant.

Supervisory Control and Data Acquisition

Many of the utility projects that we design have a supervisory control and data acquisition system (SCADA) component. DBS&A works regularly with The Response Group (TRG) as our electrical and instrumentation and control subconsultant on such projects. Three Las Cruces projects included SCADA integration: Well 64 equipping, the East Mesa Water Reclamation Facility Booster Pump Station, and the Spruce Tank booster pump station. During design of those projects, the City was working on standards for SCADA equipment; we met with the City's staff and received draft designs from the City's contractor for panel design to incorporate into our bid documents.

DBS&A and TRG have also worked together on projects requiring new SCADA systems, including Los Alamos National Laboratories (LANL) Chromium groundwater remediation project, which included a system of multiple extraction and injection wells, piping, and booster pump station. DBS&A also worked together on a regional water system on the Hopi reservation, which utilizes SCADA for monitoring and control of wells, tanks, and booster stations.

Water Treatment Process

DBS&A has designed potable water treatment for projects from simple disinfection systems to more complex systems to remove multiple contaminants, such as the Acoma Business Enterprises system which uses sand filtration followed by reverse osmosis to remove total dissolved solids, sulfate, iron, manganese and turbidity. We have designed systems to remove arsenic and nitrate from groundwater.

For the City's Griggs-Walnut Groundwater Plume Superfund site, DBS&A designed a water treatment system that is permitted to return treated water directly to the drinking water distribution system. At the Former Y site in Clovis, where hydrocarbons are a direct threat to the municipal water supply, DBS&A designed and oversaw construction of a remediation system for extracted groundwater that discharges treated water to the City of Clovis sanitary sewer.

Master Planning and Feasibility Studies

Master planning for utilities provides a road map for development of the system based on evaluation and identification of deficiencies with the current system, identification of needs under a projected growth scenario, and identification of infrastructure needed to both correct deficiencies and expand service. We recently participated as a subconsultant in the City's Utilities Master Plan update, with a focus on the water system. That master plan is based on the City's comprehensive plan, "Elevate Las Cruces." Master planning of utilities based on needs and projected growth, we have worked with other New Mexico communities, including the cities of Rio Rancho, Deming, and Portales.

We have performed many feasibility studies, in particular related to recharge, including for the City of Rio Rancho's Direct Injection Facility and for the North Utah County Aquifer Association Aquifer Storage and Recovery project.

Subsurface Utility Exploration

All pipeline designs require subsurface utility investigation, to varying levels of detail. We generally use our survey partner, Parametrix to investigate and map utilities for our use during design. On occasion, we contact the Statewide locator service to identify utilities in the project area and to contact those utilities directly for maps and conflict review.

Boundary/Easement Survey

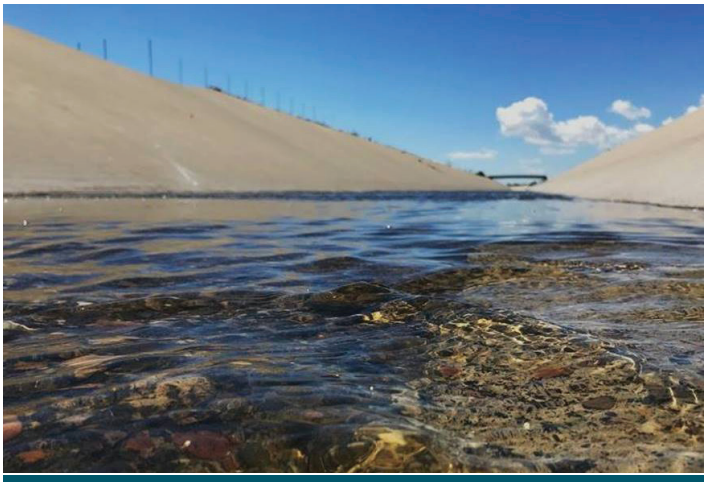
Our survey partner, Parametrix, performs many boundary and easement surveys as part of the work we do. Recently we worked with Lower Rio Grande Public Water Works Authority (LRGPWWA) on a water system improvements project that required acquisition of easements, and we prepared easement exhibits and contacted landowners to grant easements where needed.

Stormwater Engineering

DBS&A provides services for stormwater ranging from regulatory compliance, to drainage analysis, and drainage improvement design. DBS&A has played a pivotal role in assisting the co-permittees in the Middle Rio Grande watershed with MS4 compliance. We provide services to the MS4 Compliance Monitoring Cooperative (CMC), an 18-member group of agencies cooperating under the permit, the City of Albuquerque, AMAFCA, Southern Sandoval County Arroyo Flood Control Authority (SSCAFCA), and the University of New Mexico. Under the watershed-based permit, benefits to collaborating with co-permittees include extension of time to comply with permit requirements, and a reduction in water quality sampling requirements leading to lower costs. We provide water quality sampling, illicit discharge detection and elimination (IDDE) inspections, and microbial source tracking. We prepared plans for a number of permit requirements such as the IDDE program, and the water quality monitoring program.

For the NPDES program, we prepare SWPPPs and conduct inspections during construction.

Our stormwater engineering services include drainage analysis and drainage structure design. In particular, we have considerable experience at landfills around the state, with drainage analysis and drainage design, for clients such as Southwest Landfill.



DBS&A provides stormwater engineering and compliance services, including design of stormwater controls, water quality sampling, preparation of permitting plans, and drainage analysis and design.

A project for which we provided services from design analysis through construction was the design and construction of Stormwater Controls at LANL. For this project, we designed an aboveground high-density polyethylene pipeline, anchored with specially manufactured rock anchors, to convey clean stormwater around a contaminated site. This project represents a measure to comply with LANL's NPDES permit which addresses legacy Solid Waste Management Units in the area.

2. Electrical Design

For electrical design relating to wells, booster stations, lift stations, and associated buildings, our teaming partner, The Response Group, has worked with us on many utilities projects, including those for the City of Las Cruces. The electrical design generally includes instrumentation and control, equipment and instrument selection, power risers diagrams and schematics, coordinating with the utility provider, and if desired, incorporating clean energy options, such as solar.

3. Computer Network Analysis

Please refer to response in section **1. Computer Network Analyses and Design Services**. We will verify the latest software version and update to ensure compatibility with the City.

4. Solid Waste Studies and Landfill System Design and Analysis

DBS&A supports landfill operators and hazardous waste managers by providing regulatory, scientific, and engineering solutions at hazardous and municipal solid waste landfills. Our experience includes siting, permitting, design, construction oversight, quality assurance (QA), and monitoring for facility expansions, permit modifications, and closures. We have shepherded high-profile sites through all phases of state regulatory and EPA approval. We maintain a superior record of providing value when considering clients' expectations of cost, quality, and schedule. Our public and private sector clients include municipalities, counties, private operators, the Department of Energy, and the Department of Defense.

DBS&A routinely prepares construction drawings, technical specifications, and bid documents. Our landfill engineering designs have gained high marks with regulatory agencies and withstood the test of construction implementation with contractors. In many states where DBS&A operates, our landfill liner and cover designs include slope stability analysis to evaluate the seismic risks at a particular site location. We design stormwater control systems that provide for progressive buildout as cells are developed over the life of the landfill. Our engineers take care to meet all federal, state, and local design requirements.

DBS&A has significant experience writing compliance plans, implementing the plans, and performing compliance monitoring at landfills for groundwater quality, leachate, and landfill gas emissions. We understand the latest protocols for statistical analysis of environmental monitoring data and use these procedures to lower our clients' monitoring costs. All sampling and analysis methods follow U.S. Occupational Safety and Health Administration (OSHA) standards for health and safety and conform to accepted state, federal, and industry-standard quality assurance/quality control (QA/QC) procedures.

With regard to landfill planning and design, we develop effective facility plans that maximize capacity for the capital cost invested and provide for efficient day-to-day operations. DBS&A develops plans that describe build-out, including cell layout and timelines and perform all aspects of landfill permitting from the initial siting through operation and closure permitting, including Title V air emission inventories and reporting.

Liner installation at Southwest Landfill in Albuquerque.

5. Environmental Surveys, Assessments, Monitoring and Management

DBS&A's experience conducting Phase I and Phase II Environmental Site Assessments (ESAs), monitoring and management of indoor air quality and asbestos includes complex, multi-facility investigations, as well as local, single-site assessments for real estate transactions, and Brownfields redevelopment. We use methods including field screening of soil, soil gas, and water quality; field x-ray fluorescence; soil borings and monitoring wells; and geophysical surveys. Our staff is also well versed in vapor intrusion studies, including evaluating impacts from solvent and fuels-based contamination. DBS&A is currently conducting a vapor intrusion study in support of the Griggs and Walnut Ground Water Plume Superfund site in coordination with the City of Las Cruces, Doña Ana County, and EPA. All field work is carried out in accordance with site-specific health and safety plans, approved work plans, sampling and analysis plans, and/or standard operating procedures to ensure that data quality objectives are met.

6. Geotechnical Assessments

DBS&A has extensive experience performing multi-media ESAs and investigations, including delineation and quantification of soil and groundwater contamination. DBS&A uses a broad range of techniques to identify hazardous waste sources. Identification of potential contamination sources typically involves non-intrusive techniques, such as record searches, interviews, and site visits (Phase I ESAs). Identification of actual contaminant sources typically involves intrusive field investigation, such as drilling and sampling of soil, groundwater, surface water, and subsurface vapor intrusion.

With experience at hundreds of contaminated properties, DBS&A has established a reputation for providing innovative, cost-effective solutions to address our clients' environmental challenges. We apply our understanding of regulations, permitting requirements, compliance strategies, and broad experience base to implement the appropriate solution for each site.

If required, we also have geotechnical engineers on our team who have experience with landfill closure activities, including slope stability assessments, liner and cover design, compliance monitoring, waste settlement analyses, steady-state seepage analyses, and permitting.

7. Expert Witness

Working closely with clients to develop effective strategies to resolve water and wastewater concerns, DBS&A experts are able to quickly integrate complex technical and legal issues to provide efficient solutions. We have provided expert support related to landfill and water system design, water rights, and water quality issues. Our experts utilize technical tools, such as databases, GIS, environmental forensics, and modeling, to perform complex technical analyses that stand up to technical and legal scrutiny. DBS&A staff members have provided expert opinions and testimony in both state and federal court.

DBS&A experts have a reputation for possessing technical integrity and offering expert opinions based on sound science. Our staff includes specialists in civil and environmental engineering, hydrology, hydrogeology, geochemistry, and contaminant fate and transport, and has presented expert testimony and deposition in dozens of cases involving water and the environment.

Primary services include:

- Providing technical assistance during litigation, mediation, settlement negotiations, or alternative dispute resolution
- Developing expert opinion reports and declarations
- Providing expert testimony and depositions
- Providing confidential consulting during all phases of dispute resolution
- Developing and managing environmental databases, courtroom exhibits, and visualizations

DBS&A routinely provides expert testimony.

8. Project Management

Project management comprises a set of skills to balance the constraints of scope, schedule, and budget. For any task orders assigned under this contract, we will work with the City's project manager to define the scope of work, the goals and objectives, and the desired schedule for the project. Knowing the scope and schedule, DBS&A can properly allocate resources to meet goals. Once staff resources are identified, DBS&A can develop an accurate fee estimate.

DBS&A can assist the City not only in properly scoping a particular project but also in discussions and negotiations with regulatory agencies to define critical issues and drivers for project success. Additionally, for larger projects, DBS&A will develop a QA project plan, which will detail steps taken to ensure that field work, data collected, and deliverables produced meet necessary quality standards.

Managing Schedule and Budget

DBS&A uses several tools for effective project management. Microsoft Project allows us to manage the schedule for tasks and subtasks to keep the project on track. The Deltek Vision accounting system allows us to view project charges on a daily basis to monitor and keep project budgets on track. DBS&A provides regular training to all of our project managers on use of specialized project management tools and in-house project management processes.

During all phases of a project, we monitor our progress with the assistance of the Deltek project management system or other in-house project management software. Interactive scheduling software tools help us to avoid scheduling conflicts and to adjust schedules when needed, taking into account the impacts on other planned resources and subtasks. Identifying slippage in schedules early allows for incremental corrections to be made before issues become unmanageable.

Communication

The project manager is responsible for coordinating all design activities and ensuring constant and clear communications between staff engineers, subcontractors, and client contacts during all phases of work (i.e., from scope development through invoicing). We understand that utility project requirements can change based on agency priorities, public input, and other factors, requiring clear communications for successful completion. The proposed project manager, Jennifer Hill, has many years of experience managing large and diverse project teams for public sector clients, and will facilitate communication between all stakeholders as changes arise.

Quality Assurance

When we develop the Project Management Plan for a specific project, we identify the reviewer(s) for each discipline and assign a senior professional to do coordination review. Overall quality assurance for this contract will be the responsibility of the Principal-in-Charge.

DBS&A will prepare all technical documents with review and approval by appropriately licensed professionals, and engineering drawings and specifications will be sealed by a New Mexico registered professional engineer. As needed by a particular project, we can provide observation of construction contractors for activities at project sites. Full-time staff can be allocated to City projects, with both professional staff and technicians available on a day to day basis, at a project site for the duration of the project.

For the new Hopi Regional Water System, DBS&A provided planning and design services, bidding assistance, construction observation, and startup assistance.

9. Construction Inspection

DBS&A has substantial experience providing construction inspection and oversight services on behalf of our public-sector clients. Projects for which we have provided services from planning, through design, construction, and startup, include the Hopi Regional Water System Project, the Bureau of Indian Affairs Keams Canyon Water System Improvements, replacement Well E1 for LRGPWWA, and

supply wells for Slippery Rock Ranch and Hopi Hart Ranch. Other projects for which we provided on-site observation include the LANL Chromium Remediation Pipeline Project and the City of Rio Rancho Direct Injection Well. We also provided oversight services for the City of Las Cruces for construction of the Griggs-Walnut Superfund Site water treatment system.

Groundwater pump-and-treat system for the Griggs-Walnut Superfund Site

During these projects, DBS&A worked closely with the Owner's staff to provide cost-effective construction support; coordinated with staff to complete day-to-day inspections; reviewed pay applications, Requests for Information (RFIs), and contractor submittals; attended construction meetings; and provided Record Drawings.

In the last five years, DBS&A was the prime contractor for ten separate construction projects for NMED's Petroleum Storage Tank Bureau (PSTB). For these projects, we performed a variety of tasks in this role:

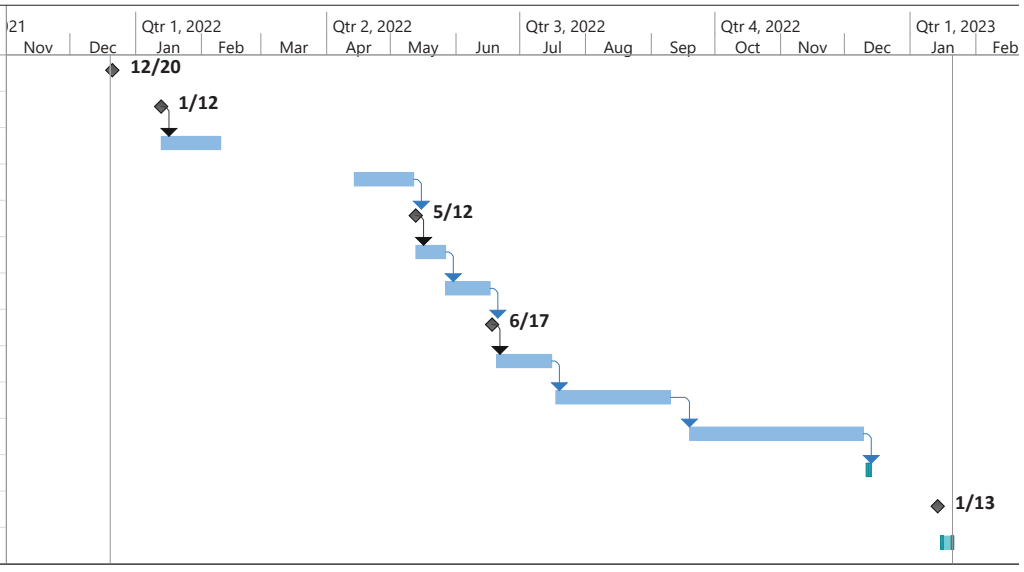
- Solicited bids from various contractors
- Evaluated bids and recommended contract awards
- Coordinated with subcontractors
- Reviewed pay applications
- Responded to contractor submittals and RFIs
- Ensured completed work complies with design documents
- Coordinated connection of utilities to new facilities
- Performed and reported results of compliance testing and sampling
- Managed startup/shakedown
- Operated and maintained remediation systems

We know that a solid design with the appropriate attention to detail results in the best bid prices—it is the uncertainties in design details that cause bidders to raise costs to cover unknowns. We also know, based on experience, that prompt, constant communication between Contractor, Owner, and Engineer is critical to keep projects on schedule and within budget and to minimize change orders.

Typical Project Schedule/Timeline

Shown below is a typical engineering project schedule completed by DBS&A.

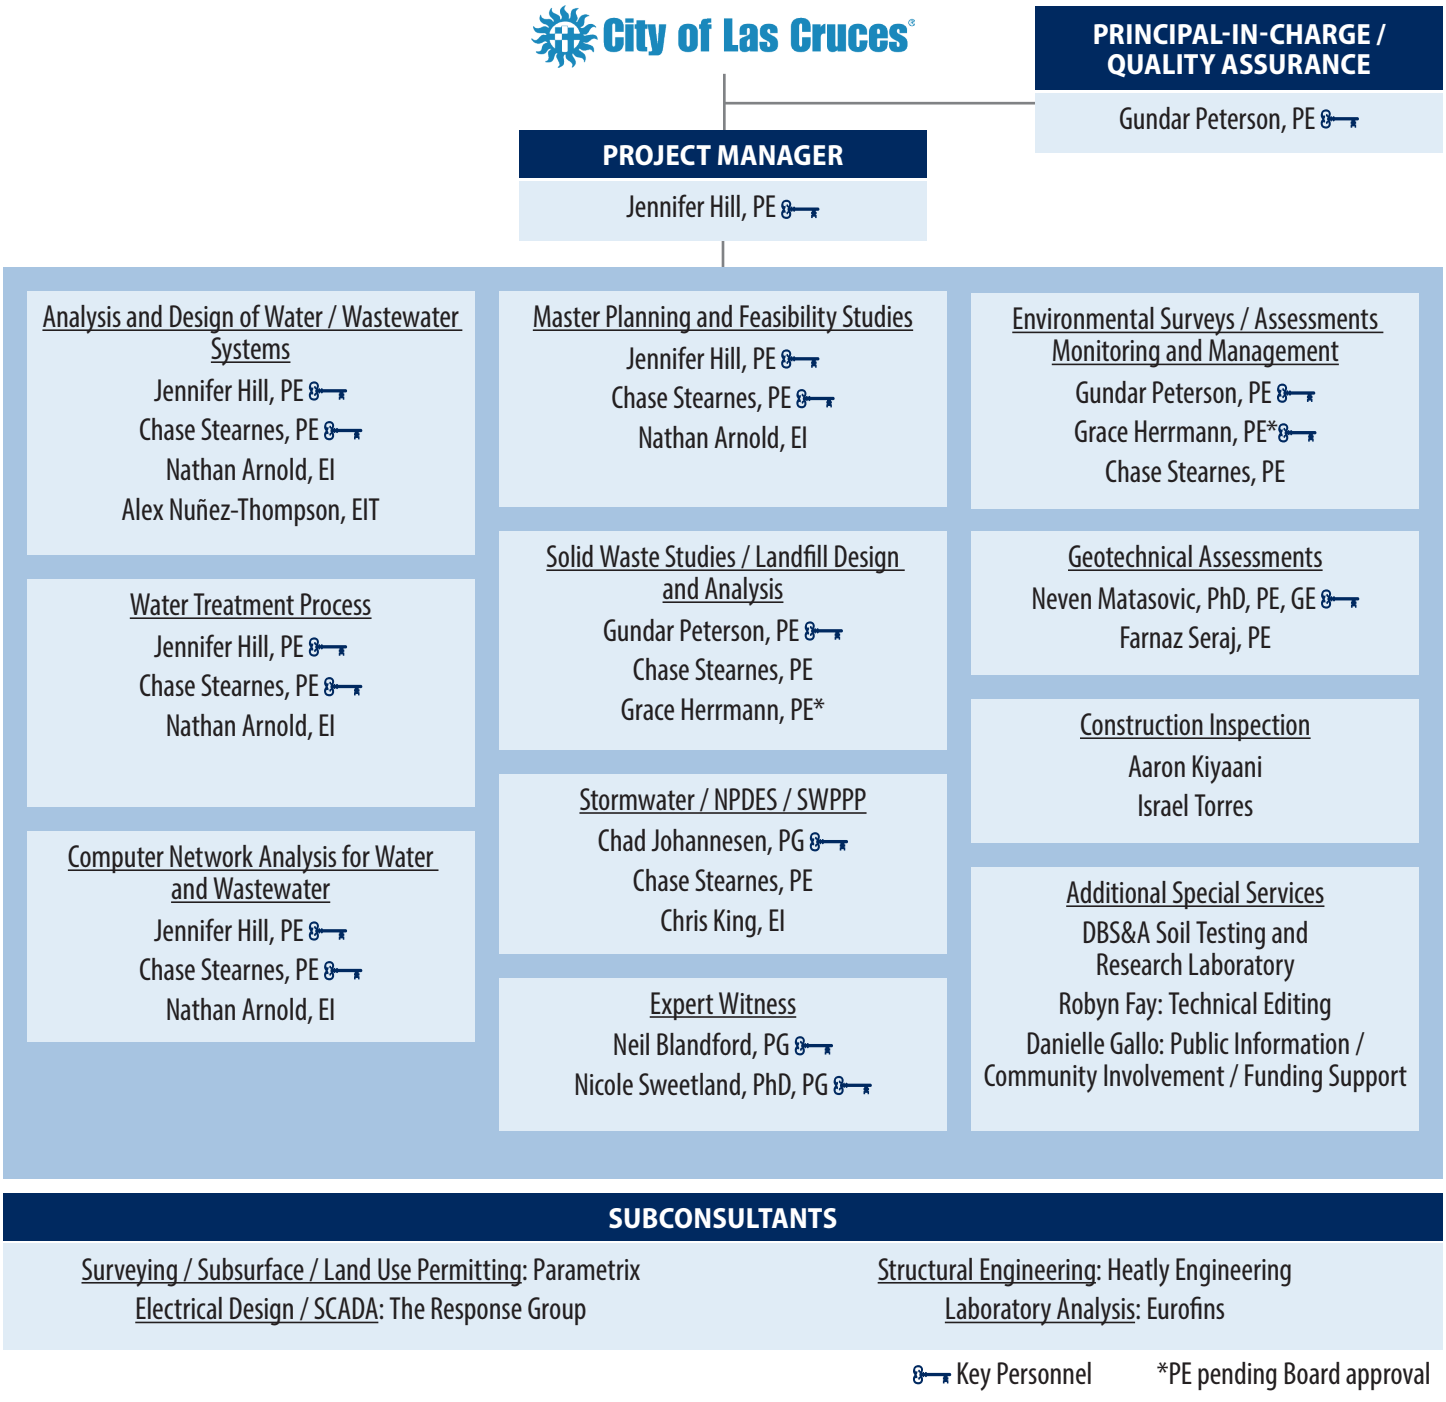
D	Task Name	Duration
1	Notice to Proceed	1 day
2	Site Visit	1 day
3	Technical Memorandum	4 wks
4	60% Design	4 wks
5	60% Submittal	1 day
6	Client/Agency Review	2 wks
7	Final Design	3 wks
8	Final Submittal	1 day
9	Contractor Quotes	1 mon
10	Procurement	2 mons
11	Construction	12 wks
12	Substantial Completion	1 day
13	Final Completion	1 day
14	Project Close-out	5 days



2. Qualifications/Competence

A. Key Personnel

As described in the RFP, the scope of services to be addressed under this contract includes a broad range of utility engineering services to enable the City to assign any type of engineering services on an as-needed basis. Our proposed project team includes resources in many different utility engineering disciplines. However, we expect the City may have needs that at times are best served by specialized resources that we will draw on as needed. In this case, DBS&A will look to our relationships in the professional community to bring in outside expertise.



Bios of Key Personnel

Following are biosketches of key personnel for this contract.

Gundar Peterson, PE
Principal-in-Charge

Mr. Peterson is a principal engineer and DBS&A's New Mexico Operations Manager. He will serve as Principal-in-Charge, and as such will ensure that sufficient and appropriate resources are allocated to the City's projects. Mr. Peterson holds a BS in civil engineering and is a professional engineer licensed in New Mexico, Texas, Arizona, and several other states in the western U.S. He has 28 years of professional experience in the environmental industry, specializing in environmental assessment, investigation, and remediation at hazardous waste sites, landfill permitting and design, surface water runoff, and erosion protection. He served as DBS&A's Project Manager for the remedial design and remedial action at the Griggs-Walnut Groundwater Plume Superfund Site in Las Cruces. Additionally, he has experience in remedial design and cost estimating for large-scale excavation and remediation projects and has served as a project manager on a variety of projects for federal, state, and commercial clients.
Percent Time Assigned to Contract: 2%

Jennifer Hill, PE
Project Manager

Ms. Hill is a senior engineer who specializes in water and wastewater utility projects from planning through design and construction. She holds a BS in civil engineering from Florida International University and has 32 years of experience, including extensive project management experience. Her utility experience includes modeling, audits, asset management plans, master planning, design and construction. She has supported City projects including the water component of the Utilities Master Plan and design of the Well 64 Equipping and Pipeline, East Mesa Water Reclamation Facility Booster Pump Station and Spruce Tank Booster Pump Station.
Percent Time Assigned to Contract: 20%

Nicole Sweetland, PhD, PG
Expert Services

Dr. Sweetland has 30 years of experience and specializes in hydrogeology, environmental forensics, and contaminant fate and transport. She provides expert and confidential consulting support on projects involving evaluation of soil and groundwater impacted by chlorinated solvents, petroleum hydrocarbons, and emerging contaminants. She worked on behalf of the City of Las Cruces during the Griggs and Walnut Ground Water Plume Superfund site feasibility study. She also supported the City in developing strategies to respond to the EPA's Unilateral Administrative Order.
Percent Time Assigned to Contract: 2%

Chad Johannesen, PG
Stormwater Regulatory Compliance

Mr. Johannesen has 19 years of experience in stormwater quality permit compliance; soil, surface water, and groundwater sampling; and operation and maintenance (O&M) of field instrumentation including physical measurements of precipitation, surface water, and groundwater. He has also performed well drilling and installation oversight; pump test analysis; soil, soil gas, surface water, and groundwater sampling; O&M of remedial pumping systems; and investigation-derived waste management.
Percent Time Assigned to Contract: 10%

T. Neil Blandford, PG
Expert Services

Mr. Blandford specializes in water supply investigations and water rights analysis, numerical modeling of groundwater flow and contaminant transport, groundwater planning, computation of the effects of groundwater pumping on surface water, hydrogeologic evaluations, wellhead protection area delineation and source water determination, well field design, and expert testimony in water rights cases.
Percent Time Assigned to Contract: 2%

Chase Stearnes, PE
Engineering

Mr. Stearnes is a registered PE whose experience includes regulatory compliance for public water systems and remediation sites, analysis and report writing, preparation of design plans and specifications, remediation system O&M, and water quality monitoring. He has assisted with annual reporting for the Griggs-Walnut Groundwater Plume Superfund Remediation project. He has supported water system improvements for the LRGPWWA and a preliminary engineering report for the City of Deming's water system. A Certified Water Supply Operator, Level 3, he coordinates drinking water operations and regulatory compliance for 12 public water systems in New Mexico and Arizona.
Percent Time Assigned to Contract: 30%

Nathan Arnold, EI
Engineering

Mr. Arnold is a registered engineering intern in civil engineering with a background in water resources, including water and wastewater system improvements, hydraulic modeling, and infrastructure design. He has experience in developing engineering estimates of probable construction costs, preliminary engineering reports, asset management plans, and construction documents. Mr. Arnold utilizes various programs for modeling and design, including Water CAD, InfoWater, InfoSewer, GIS technology, and AutoCAD Civil 3D.
Percent Time Assigned to Contract: 30%

Grace Herrmann, PE*
Engineering

Ms. Herrmann is an engineer who supports a wide variety of projects, including remediation, environmental compliance, safety engineering related to hazardous waste, water conservation, and solid waste. She currently co-manages and executes the annual reporting for the Griggs and Walnut Ground Water Plume Superfund site under the current On-Call Environmental Engineering Services contract.

*PE, pending Board approval

Ms. Herrmann's experience includes field coordination and monitoring of remedial systems, writing work plans for asbestos sampling and abatement projects, and assisting with design and permitting of municipal landfills. She also provides project management and construction observation services. Ms. Herrmann's background includes New York State Department of Health asbestos contractor/supervisor training and refreshers annually.
Percent Time Assigned to Contract: 10%

Christopher King, EI
Engineering

Mr. King is a registered engineering intern supporting a variety of projects, including municipal water and wastewater projects, landfill permitting and design, and stormwater management. His project experience ranges from design to construction observation and system operation. He specializes in engineering tools such as AutoCAD (including Civil 3D), EPANET, and HEC-RAS. He also has experience in the design and construction observation of stormwater infrastructure, having worked extensively on the Valencia Regional Landfill Stormwater Improvements Project.
Percent Time Assigned to Contract: 20%

Neven Matasovic, PhD, PE, GE
Geotechnical Engineering

Dr. Matasovic has over 35 years of experience with engineering design, analysis, permitting, and construction-related projects, including 30 years of experience with Brownfield investigations and landfills. His expertise includes direction of a wide range of site exploration and laboratory testing programs, interpretation of in-situ and laboratory testing results, waste settlement analyses, steady-state seepage analyses, and two- and three-dimensional slope stability assessments conducted in support of site closure and landfill liner and cover design in areas of high seismicity. He is a co-author of the EPA seismic design guidance for municipal solid waste landfills, the 11th Peck Lecture Paper: Pre-Design Geotechnical Investigation for the Operating Industries, Inc., Landfill Superfund site.
Percent Time Assigned to Contract: 2%

B. Principal Responsible for Administration

Gundar Peterson, PE
6020 Academy NE, Suite 100
Albuquerque, New Mexico 87109
(505) 263-2978
Registered PE No. 16038, New Mexico

List of Subcontractors

Parametrix

9600 San Mateo Boulevard NE
Albuquerque, New Mexico 87113
(505) 821-4700
Area of Responsibility: Surveying
Qualifications: Provides survey services throughout New Mexico.

Heatly Engineering

120 Vassar Dr SE, Suite 200
Albuquerque, NM 87106
(505) 705-1355
Area of Responsibility: Structural Engineering
Qualifications: Scott Heatly has over 30 years of experience in structural engineering and construction.

The Response Group

6705 Academy Road NE, Ste B
Albuquerque, NM 87109
(505) 323-7629
Area of Responsibility: Electrical Engineering
Qualifications: Provides electrical engineering and instrumentation and control design. DBS&A and TRG have worked together on many projects over the past 20 years.

Eurofins (formerly Hall Environmental Analysis Laboratory)

4901 Hawkins Street NE
Albuquerque, New Mexico 87109
(505) 345-3975
Area of Responsibility: Analytical/Laboratory
Qualifications: Certified by the National Environmental Laboratory Accreditation Program and the NMED. Has provided DBS&A with outstanding service and high-quality laboratory analysis for more than 10 years. Currently a subcontractor to the NMDOT providing laboratory services.

C. DBS&A Office Locations for this Contract

Albuquerque Office

6020 Academy Road NE, Suite 100,
Albuquerque, New Mexico 87109
Percentage of Work by this Office: >98%

Santa Barbara Office

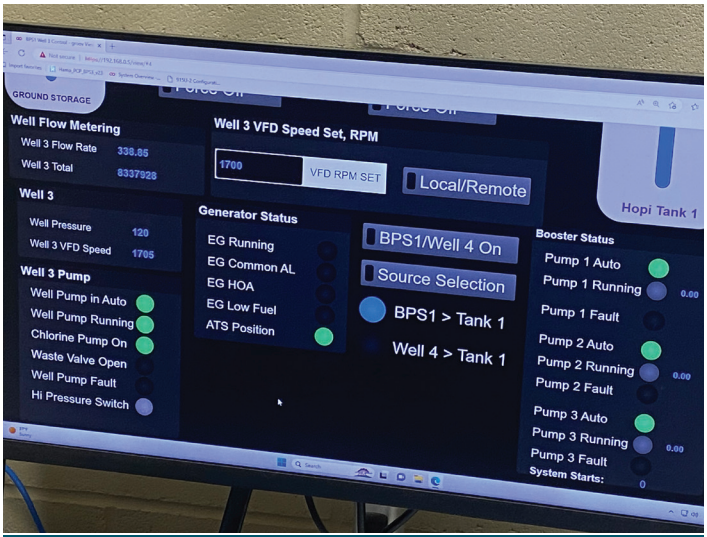
3916 State Street, Suite 1A
Santa Barbara, California 93105
Percentage of Work by this Office: <1%

Costa Mesa Office

3150 Bristol Street, Suite 210
Costa Mesa, California 92626
Percentage of Work by this Office: <1%

D. Professional Responsible for Work

Jennifer Hill, PE
6020 Academy NE, Suite 100
Albuquerque, New Mexico 87109
(505) 688-4201
Registered PE No. 19055, New Mexico



For the new Hopi Regional Water System, DBS&A worked with The Response Group who provided electrical and controls design, including SCADA.

3. Performance of the Firm

For nearly 40 years, DBS&A has performed engineering services for New Mexico communities to help them address water and wastewater supply development, treatment, and conveyance. DBS&A's Albuquerque headquarters is our largest office and includes a soils testing laboratory, which performs analyses of the hydraulic properties of soils in addition to standard geotechnical testing. Whether routine or complex, our solutions to engineering problems have consistently met or exceeded client goals and regulatory requirements. DBS&A has successfully completed multiple projects encompassing the wide range of services that may be needed by the City.

Similar Contracts

The following projects showcase our experience relevant to the scope of this RFP. All work was performed within budget, on schedule, and of quality to the satisfaction of the client. References are included with each project profile.

Albuquerque Bernalillo County Water Utility Authority On-Call

Albuquerque, New Mexico

DBS&A holds an on-call contract for Water and Wastewater Plant work for the Albuquerque Bernalillo County Water Utility Authority. Under this contract we updated record drawings for their Station 70 ferric chloride dosing station, which had been modified several times over the years without a comprehensive set of record drawings. We also provided construction services for the Large Scale Recharge project at the San Juan Chama Drinking Water Plant. Our portion of design of this project included one deep injection well and one shallower vadose zone well designed to recharge river water during low-demand times of the year for recovery in the future.

Contact: Diane Agnew, Water Rights Program Manager, ABCWUA; (505) 289-3008

On-Call Engineering Services for New Mexico State Parks

Statewide, New Mexico

The Energy, Minerals and Natural Resources Department (EMNRD), State Parks Division (Division) needed engineering assistance for evaluation and design of water and wastewater systems serving the 35 state parks, including campgrounds.

One task order was for a feasibility study on composting toilets (CT). The CT study included a review of the various types of composting toilets; a survey of usage in the parks of neighboring states; recommendations for site built or manufacturer-built units; design criteria, plans, and specifications; development of an O&M manual; comparison of O&M costs for existing vault toilets versus CT use; and recommendations for waste disposal.

At the Pine Campground at Navajo Lake State Park, DBS&A prepared plans and specifications for upgrades to two lift stations and associated piping. The project also included permitting applications and reports for approval by the NMED, engineer's opinion of probable construction costs, and estimation of costs for construction management.

At Pancho Villa State Park in the Village of Columbus, DBS&A evaluated alternatives to collapsed and leaking septic tanks. The existing deteriorated systems prompted closure of comfort stations and the dump station. DBS&A examined alternatives for improvements, comparing replacement of septic and holding tanks to connection to the Village sewer system, on-site wastewater disposal with constructed wetlands for wastewater polishing and recreational

opportunities, and a new comprehensive wastewater collection system with off-site conveyance of wastewater. DBS&A is now providing design of the centralized wastewater collection system, abandonment of on-site disposal systems, and a lift station to pump wastewater to the Village sewer system. We will provide construction phase, and post-construction services.

Pancho Villa State Park

At the Cottonwood Campground at Navajo Lake State Park, DBS&A performed a hydrogeologic study, a geotechnical investigation, and design for a new surface water treatment system. We are preparing bid documents including plans and specifications and will assist with bidding services, permitting assistance, and construction management.

Septic tank systems at Villanueva State Park, City of Rocks and Bottomless Lake State Park needed evaluation and probable replacement. At Villanueva State Park, the system had been affected by roots from nearby cottonwood trees. At Bottomless Lakes State Park, leaks resulted in unpleasant odors to nearby residents, and a disposal field was suspected as being inadequate. In addition, septic tanks at the City of Rocks Visitor Center showed signs of sulfide corrosion. DBS&A conducted site visits, prepared evaluation reports and will provide final design of replacement systems, including permit applications to NMED's Liquid Waste Bureau.

Contact: Randolph Bayliss, Project Manager, EMNRD State Parks Division; (505) 670-0544

Hazardous Material Investigation Services On-Call

Statewide, New Mexico

DBS&A has supported the NMDOT for more than a decade, including an on-call contract for Hazardous Materials Investigation services throughout New Mexico. Services include Initial Site Assessments (ISAs), Preliminary Site Investigations (PSIs) and Detailed Site Investigations (DSIs), leaded paint and asbestos-containing building material (LP/ACBM) surveys and other related work required by the contract. Many of these services include passive and active soil gas surveys for the presence of volatile organic compounds, X-ray fluorescence (XRF) to determine the concentration of various metals within soil matrix samples, geoprobes to delineate soil and groundwater contamination, and the use of larger drilling rigs for the advancement of soil borings and installation of groundwater monitor wells. During oversight of asbestos abatement, ambient air monitoring is performed in compliance with Asbestos Hazard Emergency Response Act (AHERA) 40 CFR 763.90, in adjacent areas to determine effectiveness of environmental controls.

Representative projects include:

- ISA for three roadway corridors (NM 460, NM 478, and Elm Street) in Anthony
- DSI for US 64/US 550 Reconstruction Project in Bloomfield
- ISA and PSI for the Coors Boulevard Corridor Project in Albuquerque
- ISA for Paseo de Oñate Corridor in Española
- ISA for NM 14 (Cerrillos Road) Corridor in Santa Fe
- PSI and DSI for NM 68 in Taos
- Preliminary Initial Site Assessment for the I-40/McCarty's Interchange in Cibola County
- ISA, and Phase I and II ESA for the I-40/Coors Road Interchange in Albuquerque
- PSI for NM Highway 63 in Pecos
- Phase I ESA at the intersection with US 70 and US 285 and Oscura Road in Roswell

Contact: Larry Kemp, Project Manager, NMDOT; (505) 222-9565

Cost Proposal

As requested, costs have been included in a separate file. For this contract, the markup on subcontractors and supplies is set at 10 percent. This markup covers the administrative costs and potential liability associated with subcontracting work.

Conclusion

DBS&A values our relationship with Las Cruces Utilities and looks forward to continuing to support the City on a variety of projects from planning and analysis, through design and construction. Our capabilities in science and engineering, with a firm base in hydrogeology and a proven reputation in regulatory compliance, provide a unique set of skills that will benefit the City.

Under contract with Lea County, DBS&A designed a 40,000-gallon storage tank to provide additional water storage for the Mescalero Ridge Water Cooperative which serves Maljamar, New Mexico.

CITY OF LAS CRUCES

PROFESSIONAL SERVICES AGREEMENT

THIS AGREEMENT, made and entered into on this _____ day of _____, 2024 by and between the City of Las Cruces, New Mexico, hereinafter called “CITY” and HDR Engineering, Inc., of 1917 S 67th St, Omaha, NE, 68106, hereinafter called “CONTRACTOR”.

1. PROJECT DESCRIPTION
Utilities Engineering Services on an as needed basis via Project Assignment Agreements (Attachment “A”) during the term of this AGREEMENT.

2. SCOPE OF SERVICES
In a satisfactory and proper manner, the CONTRACTOR shall perform SERVICES, as proposed in response to the CITY’S RFP No. 23-24-052, as set forth in Exhibit A, attached hereto and made a part of this Agreement.

The CONTRACTOR is authorized to extend the same terms and conditions of this Agreement to other governmental entities conditioned upon the procurement laws and regulations of those entities. The CITY shall not be a party nor have any liability relating to such extensions.

3. APPROPRIATIONS
The terms of this Agreement are contingent on sufficient appropriations and authorization being made by the City Council for the performance of this Agreement. If sufficient appropriations and authorizations are not made by the City Council, this Agreement shall terminate upon written notice given by the CITY to CONTRACTOR. The CITY’S decision as to whether sufficient appropriations and authorizations exist shall be accepted by CONTRACTOR and shall be final.

4. COMPENSATION
The CITY shall compensate CONTRACTOR for the performance of SERVICES under this Agreement an amount agreed to for each assigned project, plus applicable taxes. CONTRACTOR shall perform the SERVICES upon receipt of a purchase order or written Notice to Proceed for each assigned project from the CITY. The CITY cannot authorize costs to be incurred prior to such written Notice to Proceed. CONTRACTOR shall submit invoices upon completion of the project. CITY shall pay invoices Net 30 days upon receipt of undisputed invoice.

CONTRACTOR is responsible for payment of State of New Mexico Gross Receipts Tax levied on the amounts payable under this Agreement. CONTRACTOR agrees to comply with all federal and state tax payments and report all items of gross receipts as income from the operations of its business.

5. DEVOTION OF ADEQUATE TIME
CONTRACTOR will devote the necessary hours each week to the performance of projects that are required by the CITY and it will serve the CITY diligently and faithfully,

and according to its best ability in all respects and will promote the best interests of the CITY.

6. TERM AND SCHEDULE
This Agreement shall become effective on June 1, 2024 for a term of 5 years through May 31, 2029.

CONTRACTOR shall perform the SERVICES in accordance with the time set forth as agreed upon by the CITY and CONTRACTOR and as agreed to for each project assigned under the terms of this Agreement.

7. EXTENSIONS, CHANGES, AND AMENDMENTS
This Agreement shall not be extended, changed, or amended except by instrument in writing executed by the parties. The CITY shall not be liable for payment of any extra services nor shall CONTRACTOR be obligated to perform any extra services except upon such written agreement. Such written approval shall indicate the date said extension, change, or amendment is effective and shall be signed by the parties to this Agreement. In the event that the parties cannot reach agreement as to a particular change, the issue shall be resolved pursuant to Article 21.

8. CHANGES AND EXTRA SERVICES BY THE CITY
The CITY may make changes within the general scope of the SERVICES plus may also request CONTRACTOR to perform other extra services not incorporated within the Services set forth in this Agreement. If the CONTRACTOR is of the opinion that such change causes an increase or decrease in the cost and/or the time required for performing the changes or other services required by the City, CONTRACTOR shall so notify the CITY of that fact within five (5) business work days from the date of receipt of change by the CITY. The CITY shall provide written response to the CONTRACTOR within five (5) business work days from the date of receipt of CONTRACTOR’S written notification.

9. CHANGES AND EXTRA SERVICES BY THE CONTRACTOR
In the event a condition is identified by the CONTRACTOR which, in the opinion of the CONTRACTOR, changes the services, costs, and/or time required for performance under this Agreement, the CONTRACTOR shall provide written notification to the CITY within five (5) business work days of such identification. The CITY shall respond in writing to such notification within five (5) business work days from the date of receipt of CONTRACTOR’S notification.

10. DELAYS
In the event that performance of SERVICES is delayed by causes beyond reasonable control of CONTRACTOR, and without the fault or negligence of CONTRACTOR, the time and total compensation for the performance of the SERVICES may be equitably adjusted by written agreement to reflect the extent of such delay. CONTRACTOR shall provide the CITY with written notice of delay pursuant to Article 9 including therein a description of the delay and the steps contemplated or actually taken by

CONTRACTOR to mitigate the effect of such delay. The CITY will make the final determination as to reasonableness of delays.

11. TERMINATION
This Agreement may be terminated by either party hereto upon fifteen (15) calendar days written notice in the event of substantial failure by the other party to perform in accordance with the terms of this Agreement through no fault of the terminating party. This Agreement may also be terminated by the CITY for its convenience or because the PROJECT has been permanently abandoned, but only upon fifteen (15) calendar days written notice to CONTRACTOR.

In the event of termination, CONTRACTOR shall be compensated for all services performed and costs incurred up to the effective date of termination for which CONTRACTOR has not been previously compensated.

Upon receipt of notice of termination from the CITY, CONTRACTOR shall discontinue the SERVICES unless otherwise directed and upon final payment from the CITY deliver to the CITY the required number of copies of all data, drawings, reports, estimates, summaries, and such other information and materials as may have been accumulated by CONTRACTOR in the performance of this Agreement, whether completed or in process.

12. RECORDS AND AUDITS
CONTRACTOR will maintain records indicating dates, length of time, and services rendered. The CITY has the right to audit billings both before and after payment, and contest any billing or portion thereof. Payment under this Agreement does not foreclose the CITY'S right to recover excessive or illegal payments. CONTRACTOR will retain records for five (5) years after the completion of the project.

13. DISCLOSURE AND OWNERSHIP OF DOCUMENTS, PRODUCTS, DESIGN, ELECTRONIC FILES
All technical data, electronic files, and other written and oral information not in the public domain or not previously known, and all information, electronic files, and data obtained, developed, or supplied by the CITY will be kept confidential and CONTRACTOR will not disclose to any other party, directly or indirectly, without the CITY'S prior written consent unless required by lawful order.

All technical data, electronic files, products developed, operational parameters, blueprints, and other information and work of the CONTRACTOR shall be the sole property of the CITY and shall be delivered to the CITY when requested and at the end of the Agreement.

14. INDEPENDENT CONTRACTOR
CONTRACTOR represents that it has, or will secure, at its own expense, all personnel required in performing the SERVICES under this Agreement. Such personnel shall not be employees of, nor have any contractual relationship with the CITY. CONTRACTOR,

consistent with its status as an independent contractor, further agrees that its personnel will not hold themselves out as, nor claim to be officers or employees of the CITY by reason of this Agreement.

To the extent that CONTRACTOR employs any employees, CONTRACTOR shall be solely responsible for providing its own form of insurance for its employees and in no event shall CONTRACTOR's employees be covered under any policy of the CITY.

CONTRACTOR'S retention hereunder is not exclusive. Subject to the terms and provisions of this Agreement: (i) CONTRACTOR is able, during the Term hereof, to perform services for other parties; and (ii) CONTRACTOR may perform for its own account other professional services outside the scope of this Agreement.

CONTRACTOR is and shall be an Independent Contractor and shall be responsible for the management of its business affairs. In the performance of the work under this Agreement, CONTRACTOR will at all times be acting and performing as an Independent Contractor, as that term is understood for federal and state law purposes, and not as an employee of the CITY. Without limitation upon the foregoing, CONTRACTOR shall not accrue sick leave, jury duty pay, retirement, insurance, bonding, welfare benefits, or any other benefits, which may or may not be afforded employees of the CITY. CONTRACTOR will not be treated as an employee for purposes of: Workers' Compensation benefits; the Federal Unemployment Tax Act; Social Security; other payroll taxes, federal or any state income tax withholding; or the employee benefit provisions described in the Internal Revenue Code of 1986, as amended. Neither the CITY, nor its agents or representatives, shall have the right to control or direct the manner, details or means by which CONTRACTOR accomplishes and performs its services. Nevertheless, CONTRACTOR shall be bound to fulfill the duties and responsibilities contained in the Agreement.

15. NO JOINT VENTURE OR PARTNERSHIP

Nothing contained in this Agreement shall create any partnership, association, joint venture, fiduciary or agency relationship between CONTRACTOR and CITY. Except as otherwise specifically set forth herein, neither CONTRACTOR nor CITY shall be authorized or empowered to make any representation or commitment or to perform any act which shall be binding on the other unless expressly authorized or empowered in writing.

16. ASSIGNMENT

CONTRACTOR shall perform all the services under this Agreement and shall not assign any interest in this Agreement or transfer any interest in same or assign any claims for money due or to become due under this Agreement without the prior written consent of the CITY.

17. INSURANCE
CONTRACTOR shall obtain and maintain insurance at its own cost and expense during the life of this Agreement, and shall require Subcontractors, if any, to maintain during the life of his subcontract:

1. Commercial General Liability Insurance
   a. $1,000,000 per occurrence / $2,000,000 aggregate
   b. Coverage must include premises and operations, products and completed operations, and personal and advertising injury.
   c. The City of Las Cruces must be named as an Additional Insured for all coverages listed above on endorsements acceptable to the City.
   d. Coverage must be primary and non-contributory.
   e. Coverage must be per project or per location.
   f. Coverage must be on an occurrence form.
   g. Subrogation must be waived.
2. Commercial Auto Liability
   a. $1,000,000 per occurrence
   b. Coverage must be for “owned, leased, hired, and non-owned autos” or “any autos.”
3. Workers’ Compensation and Employers Liability
   a. Statutory Limits
   b. Employer liability – $1,000,000 each accident, $1,000,000 each employee by disease, $1,000,000 policy limit
   c. Subrogation must be waived.
4. Professional Liability: $1,000,000 per claim

Endorsements for additional insured coverage and waivers of subrogation must be provided as a condition of this Agreement and shall be noted on the certificate.

CONTRACTOR shall furnish the CITY with a certificate(s) of insurance showing CONTRACTOR and Subcontractors, if any, have complied with this Article. The CONTRACTOR shall provide insurance certificates before work is to start on the project and shall provide the CITY thirty (30) days written notification of cancellation of such policies.

18. INDEMNITY AND LIMITATION
CONTRACTOR shall indemnify, defend, and hold harmless the CITY from and against any and all claims, suits, actions, judgments, demands, losses, costs, expenses, damages, and liability caused in whole or in part by, resulting in whole or in part from, or arising in whole or in part out of the negligent acts, errors, or omissions of CONTRACTOR, its officers, employees, agents, or representatives in the performance of SERVICES under this agreement.

19. APPLICABLE LAW
This Agreement and the rights and obligations of the parties shall be governed by and construed by the laws of the State of New Mexico applicable to Agreements between

New Mexico parties made and performed in that state, without regard to conflicts of law principles. Venue shall be in the Third Judicial District, State of New Mexico.

CONTRACTOR shall abide and be governed by all applicable state law, CITY ordinances, and laws regarding the CONTRACTOR'S services or any work done pursuant to this Agreement, including anti-discrimination.

20. BREACH
In the event CONTRACTOR breaches any obligation contained in this Agreement, prior to instituting any action or dispute resolution procedure, the CITY shall give CONTRACTOR written notice of such breach. In the event CONTRACTOR fails to remedy the breach within five (5) working days of receiving such written notice, the CITY, at its sole discretion, without any obligation to do so and in addition to other remedies available under applicable law, may remedy CONTRACTOR'S breach and recover any and all costs and expenses in so doing from CONTRACTOR.

21. DISPUTE RESOLUTION
In the event that a dispute arises between CITY and CONTRACTOR under this Agreement or as a result of breach of this Agreement, the parties agree to act in good faith to attempt to resolve the dispute.

22. NOTIFICATION
All notices required or permitted under this Agreement shall be in writing and shall be deemed sufficiently served if served by Registered Mail addressed as follows:

TO CITY:	City of Las Cruces PO Box 20000 Las Cruces, NM 88004 ATTENTION: Tony Trevino
With Copies to:	City Attorney Purchasing Manager
TO CONTRACTOR:	HDR Engineering, Inc. 1917 S 67th St Omaha, NE 68106 ATTENTION: Peter Brakenhoff

23. SCOPE OF AGREEMENT
This Agreement incorporates all of the agreements, covenants, and understandings between the parties hereto concerning the subject matter hereof and that all such covenants, agreements, and understandings have been merged into this written agreement. No prior agreement or understanding verbal or otherwise of the parties or their agents shall be valid or enforceable unless embodied in this agreement.

24. SEVERABILITY
The parties agree that each provision of this Agreement is severable and the invalidity or unenforceability of any one or more of the provisions of this Agreement shall not affect the validity or enforceability of any other provision of this Agreement, and this Agreement shall be construed in all respects as if such invalid or unenforceable provisions were omitted.

25. CONFLICT OF INTEREST
CONTRACTOR represents and warrants that CONTRACTOR has no business, professional, personal, or other interest, including, but not limited to, the representation of other clients, that would conflict in any manner or degree with the performance of its obligations under this Agreement. If any such actual or potential conflict of interest arises under this Agreement, CONTRACTOR shall immediately inform the CITY in writing of such conflict. If, in the reasonable judgement of the CITY, such conflict poses a conflict to and with the performance of CONTRACTOR'S obligations under this Agreement, or is otherwise a violation of the CITY'S current policy or ordinances, then the CITY may terminate the Agreement immediately upon written notice to CONTRACTOR; such termination of the Agreement shall be effective upon the receipt of such notice by CONTRACTOR.

EXHIBIT A
SERVICES

A. Project Assignments
A Project assignment is initiated by the City providing the selected Engineer a detailed project description, including scope of work and any other special instructions needed by the Engineer to prepare items such as preliminary and final cost estimates, complete project plans and specifications, project reports, and other related engineering services. The awarded Engineers shall provide engineering services that may include but not be limited to, the following:
1. Computer network analyses for water, wastewater, and gas systems; design of water, wastewater, and gas utility systems; well house design; Supervisory Control and Data Acquisition (SCADA); water treatment process; master planning; feasibility studies; solid waste studies; land use permitting; subsurface utility exploration; boundary/easement survey; and National Pollutant Discharge Elimination System (NPDES) & Stormwater Pollution Prevention Plan (SWPPP) compliance.
2. Electrical design (wells, booster stations, lift stations, odor control stations, building electrical system design)
3. Computer network analysis for Gas (GasWork), Water (InfoWater), and Wastewater (InfoSewer). The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility
4. Solid waste studies, landfill system design and analysis
5. Environmental surveys, assessments monitoring and management, such as indoor air quality, asbestos, mold, and other related services for the City
6. Geotechnical Assessments, such as soil and groundwater testing for contamination and remediation, and other related services for the City
7. Expert witness in a judicial and/or quasi-judicial setting.
8. Project Management
9. Construction Inspection.

B. Project Assignment Agreements
A Project Assignment Agreement (a template of which is incorporated herein as ATTACHMENT “A”) will be negotiated and executed on a case-by-case basis for each specific project, and will include a cost proposal from the Engineering firm(s) proposing to do the work. The cost proposal may utilize one of the following pricing formats:
1. Lump Sum
2. Unit pricing to include:
    a. Hourly rate for various types of services requested by the City
    b. Charges for miscellaneous items such as blueprints, data, discs, rental of special equipment, etc.
    c. A statement of the billing procedures including minimum billing units, if any.
    d. Cost of sub-consultants (if any)
3. An alternative unit cost breakdown

C. Deliverables
Each project contract will require a list of deliverables, schedule/timeline and cost. The

Engineer may be required to supply to the City an of the following items, when specified and as requested on the Scope of Work for each individual project.

1. Preliminary report containing schedule of work and cost estimate.
2. Construction drawings and documents. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility. Provide hard copies and PDF format of the construction plans for Purchasing Section use.
   a. As-built drawings on electronic media and reproducible prints. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. All horizontal and vertical location datum information shall be coordinated with the City Surveyor. The utility location information shall be tied to project control monuments and referenced to project construction stationing. The project control survey shall be certified by a New Mexico Registered Land Surveyor. Metadata or “data about the data” shall be submitted with each as-built electronic file, preferably as a separate text file on the electronic submittal media, and shall include:
      - Name, address and phone number of the responsible land surveyor.
      - Date of completion of survey.
      - Equipment used to conduct the survey.
      - Horizontal and vertical control marks used to tie the survey to the City approved control.
      - Transformation factors needed to reduce Ground (local coordinate system) to Grid and combined scale factor used.
   b. “RECORD DRAWINGS” shall be clearly labeled on each sheet.
3. Computer network analysis for gas, water, and wastewater shall be provided to the City in appropriate electronic format. It shall include the entire model, including changes and a text summary (report) of the network analysis that includes assumptions, procedures, and results, and any graphics that clarify the analysis. The Engineering firm(s) shall verify the report format with the City. The computer network analysis shall be provided using the software listed below. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility.
   a. Computer network analysis for Gas: GasWork
   b. Computer network analysis for Water: InfoWater
   c. Computer network analysis for wastewater: InfoSewer
   d. Other design computer programs as approved by the City
4. Project reports.
5. Any other item specified in the contract for that project
6. Easement map and recording information

D. The selection of an Engineer for a specific project shall be based on experience with similar projects, references, performance in similar projects, and availability. This will include the ability to meet schedules, cost control, and responsiveness to client.

E. The Engineer shall have an engineering staff on-site everyday who is responsible, on behalf of the Engineer, for providing timely completion and response for performance of the terms of each Project Assignment Agreement during the progress of each individual project. Any deviation from this requirement is at the discretion of the City and must be approved in writing by the City prior to the start of any individual project.

Cost Proposal - Attachment C

ATTACHMENT C – COST PROPOSAL FORM RFP 23-24-052 – Utilities Engineering Services
(NOTE: This form shall not to be modified in any way)

Consulting Firm HDR Engineering, Inc.

ITEM	DIRECT LABOR / CLASSIFICATION	HOURLY RATE*
1	Principal Engineer	$ 325.00
2	Project Engineer/Project Manager	$ 305.00
3	Senior Engineer	$ 302.00
4	Design Engineer	$ 206.00
5	Engineer Intern	$ 140.00
6	Engineering Technician	$ 110.00
7	Drafting Technician	$ 121.00
8	Survey Crew**	$ Case by Case Basis
9	Construction Inspector/Observer	$ 223.00
10	Administrative/Clerical	$ 150.00
11	Field Testing and Investigations	$ Case by Case Basis
		PERCENT MARKUP
12	Subcontractor Cost Markup	(%) 10

ITEM	MATERIALS / REIMBURSABLE EXPENSES	RATE
	Travel	
13	Per Diem (per day) – Pre-Approval Required	City of Las Cruces Rate
14	Vehicle Mileage Rate (per mile)	Current IRS Rate
	Reproduction Services	
15	Black and White Copies (per copy)	$ 0.15
16	Color Copies (per copy)	$ 0.75
17	Prints 24x36 (per sheet)	$ 2.00
18	Mylars 24x36 (per sheet)	$ 12.00
19	Photo Quality Plots (per plot)	$ 2.00
	Miscellaneous	
20	Any other costs incurred	Case by Case Basis

**Rates are to include all overhead costs and any and all assessment expenses*

***Survey Crew Rates are to include GPS and Total Station Equipment*

Notes: 1. Detailed man hour Estimates are required for T&M contracts and are to utilize corresponding rates

2. Rates in place at the time a project is contracted with the City will remain for the duration of the contract.

Rate Schedule Assumptions & Clarifications

HDR provides the following assumptions and clarifications of our cost rate schedule:

1. Rates are subject to annual increase.
2. Rates do not include New Mexico Gross Receipts Tax.
3. Direct expenses to be invoiced at cost.
4. Sub-consultant fees to be determined on a task order basis and will be invoiced at cost plus 10% mark-up.

Utilities Engineering Services Technical Proposal

City of Las Cruces RFP No. 23-24-052

CITY OF LAS CRUCES

RFP COMPLIANCE DECLARATION

RFP TITLE: **Utilities Engineering Services**

RFP NO.: **23-24-052**

DUE DATE/TIME: **February 27, 2024 / 4:00 p.m.**

In compliance with the requirements of this RFP, I, the undersigned, offer and agree to furnish any or all materials and/or services to the City of Las Cruces within the time agreed.

I further certify that this company has not been debarred, suspended, or otherwise made ineligible for participation in Federal Assistance programs under Executive Order 12549 Debarment and Suspension as described in the Federal Rules and Regulations.

Receipt of Addenda Nos.: 1 & 2 is hereby acknowledged (where none received, place a zero in this space)

Company Name and Address:

THIS FORM MUST BE COMPLETED AND INCLUDED WITH PROPOSAL
FAILURE TO INCLUDE WILL SUBJECT RESPONSE TO REJECTION

Evaluation Criteria No. 1 - Technical Approach

Since 1917, HDR Engineering, Inc. (HDR) has been delivering professional engineering services to clients around the globe, adding value to local communities, pushing boundaries, and uncovering new possibilities. We bring to the City of Las Cruces (the City) a full service team to support your program. HDR's team brings proven task order management processes to support the City to keep your program on schedule and budget. Our team brings a deep bench of in-house experts who can deliver multiple tasks simultaneously and at every stage of the project life cycle. Additionally, as necessary/directed, HDR can support the City with additional services beyond those identified. It is our intent to support your task orders out of our Albuquerque office supplemented by professional resources in the region.

HDR fundamentally believes that quick response and task order turnaround are essential for on-call task orders. Our ability to swiftly execute these tasks is underpinned by:

- Extensive in-house engineering service capabilities, reducing negotiation, startup, and external coordination time.
- A history of successfully collaborating with clients and associated stakeholders for successful project delivery.
- Comprehensive knowledge of all local, state, and federal regulations and standards relevant to professional design and construction services.
- An experienced team prioritizing high-quality, on-call deliverables with quick turnaround times.
- Familiarity with Las Cruces, as our Task Order Manager and various Team Members are from the area and/or attended New Mexico State University.
- In-house constructibility review and construction inspection/administration services.

HDR has been serving the New Mexico area successfully since 1985 providing engineering services that include the experience and disciplines identified in the Scope of Services outlined in the Request for Proposal (RFP). HDR offers a wide range of engineering services for multifaceted projects, including public utilities, transportation facilities, storm drains, parks, athletic fields, and building structures.

FOUNDED in 1917, HDR has

Offices Globally

2023 ENR Top 500 Design Firms Rankings

No. 6 Top 20 in Design Firms
No. 5 Top 20 in Transportation
No. 5 Top 20 in Water
No. 6 Southwest Top Design Firms

Our in-house services, as requested in the RFP, include:

- Computer network analyses for water, wastewater, and gas systems; design of water, wastewater, and gas utility systems; well house design; Supervisory Control and Data Acquisition (SCADA); water treatment process; master planning; feasibility studies; solid waste studies; land use permitting; subsurface utility exploration; boundary/easement survey; and National Pollutant Discharge Elimination System (NPDES) & Stormwater Pollution Prevention Plan (SWPPP) compliance.
- Electrical design (wells, booster stations, lift stations, odor control stations, building electrical system design)
- Computer network analysis for Gas (GasWork), Water (InfoWater), and Wastewater (InfoSewer).
- Solid waste studies, landfill system design and analysis
- Environmental surveys, assessments monitoring and management, such as indoor air quality, asbestos, mold, and other related services for the City
- Geotechnical Assessments, such as soil and groundwater testing for contamination and remediation, and other related services for the City
- Project Management
- Construction Inspection

How HDR Will Perform the Services

HDR's team offers the City knowledge and experience to deliver high-quality services and deliverables through this on-call contract. Our technical team's practical expertise and competence will produce design solutions to meet the individual goals of each task order under this contract. Our experience on a variety of utilities and infrastructure projects allows us to develop a detailed approach to any given task. In addition, we use the following guidelines as a foundation when developing a task-specific approach:

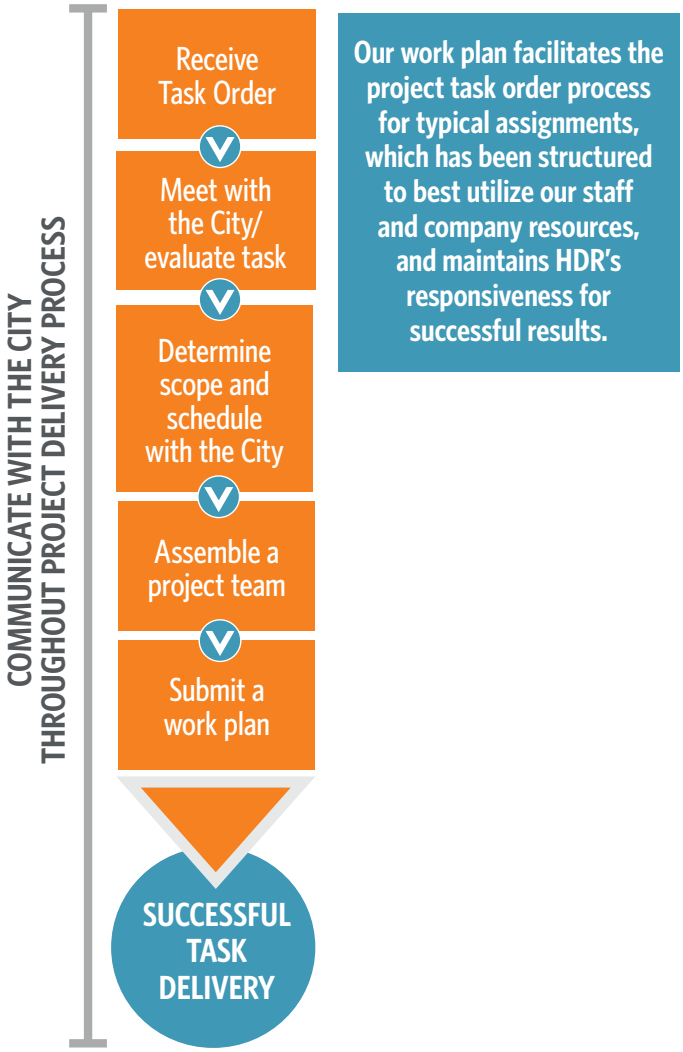
- Develop innovative and cost-effective solutions that enhance project benefits.
- Develop flexible and realistic solutions that can be phased to best utilize available funding resources.
- Provide a responsive, motivated, and experienced team of professionals that will perform individual tasks in a timely manner.

On-call tasks typically have condensed budgets and expedited schedules. We can accommodate these challenges because we have developed a work plan that is structured to utilize our staff and resources, both locally and nationally, to achieve a responsive and professional result for you.

Developing a proper work plan is critical to the success of your on-call engineering tasks. We are dedicated to meeting your expectations while maintaining the schedule and budget of your projects. Valuable knowledge has been gained through previous and current on-call tasks with state and local agencies that required

similar services. We have taken great care in developing an efficient management approach for this contract. Our approach provides:

- A primary point of contact, **Chris Rodriguez, PE** will be accountable and focused on technical competence, cost, and schedule control.
- Our **Task Order Manager, Gabe Alvarado, PE** will be responsible for managing all task orders and organizing the best team to meet the City's needs.
- Senior professionals independently responsible for quality control (immediately available to provide input and technical review for each required discipline).
- A flexible organizational work plan that can be refined and optimized based on actual contract requirements and task assignments.
- Constant and continuous communication, and collaboration with the City's staff.



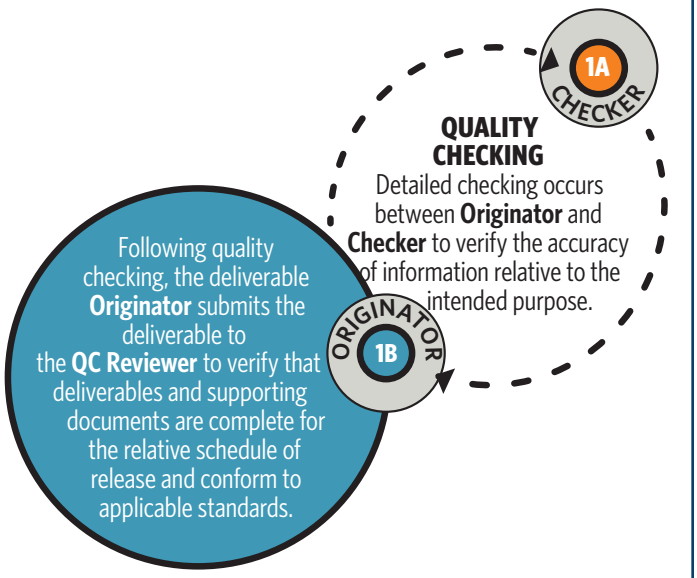
Our work plan facilitates the project task order process for typical assignments, which has been structured to best utilize our staff and company resources, and maintains HDR's responsiveness for successful results.

Integrated Quality Approach. Our goal is to set the industry benchmark for excellence by staying true to our purpose and exercising discipline in the services we provide to our clients. It is our policy to consistently provide professional services that satisfy statutory, regulatory, and technical requirements, and that meet or exceed your expectations. To achieve quality in our work, we have developed a QMS based on the fundamental principles and guidelines set forth by the ISO 9001:2015 series of international standards for quality management.

Integrated QMS Produces High-Level Results. Through an integrated QMS approach to quality, we focus on the stability and efficiency of feedback loops, and evaluate mechanisms to make sure our internal processes are meeting our business and client needs. **HDR has a strong history of providing quality services in the delivery of utility engineering contracts.** This is the result of understanding your standards and expectations, having consistent approaches and procedures on all of our projects, and taking pride in what we do. We recognize that adherence to schedule and budget for tasks is key to delivering this contract successfully. We have designated multiple key technical experts that will be called upon to provide extensive quality reviews, enabling us to consistently meet our schedules and budgets.

HDR team members will work closely with our **Task Order Manager Gabe Alvarado, PE,** to develop quality plans tailored to each separate task, facilitate proper coordination among team members, and oversee the accuracy and quality of deliverables. We will build our schedules with client expectations and quality in mind. Additionally, each quality lead will follow our internal QMS manual. They will be dedicated to checking for accuracy and verifying that deliverables meet your terms.

QC Review Process



Major Tasks to be Accomplished

For more than a century, HDR has partnered with clients to shape communities and push the boundaries of what is possible. Our engineering, architecture, environmental, and construction services bring an impressive breadth of knowledge to every project. Our optimistic approach to finding innovative solutions defined our past and drives our future.

HDR's Albuquerque office personnel have completed many utility infrastructure projects throughout the state of New Mexico. Our recent experience completing projects (see list below) for local communities, gives the HDR team a unique perspective for your utility engineering needs.

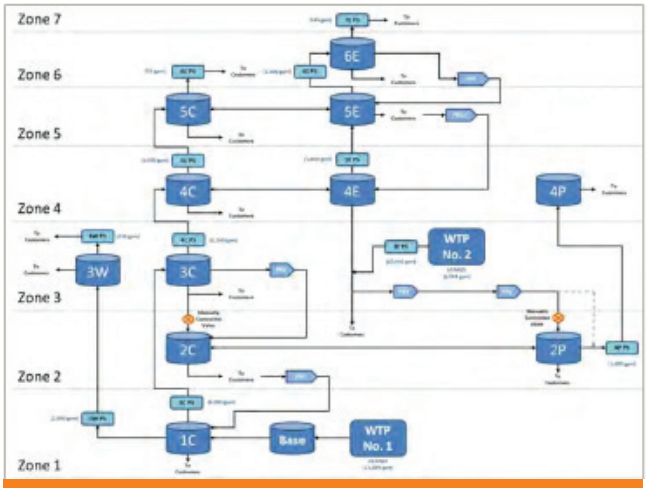
Detailed statement of services provided under each task

HDR is a full-service and multidisciplinary Architectural / Engineering firm with extensive in-house resources and capability to complete any type of utilities, transportation, drainage or facilities project. The City will benefit from HDR's proven track record of responding quickly and effectively with innovative and creative solutions to any type of engineering need while staying on schedule and within budget. We have organized a project team with unmatched expertise to provide the City with innovative, technically feasible, cost-effective, and practical solutions to all the professional services listed in the RFP. We will leverage our planning, design, and construction experience to work collaboratively with the City and deliver the projects with efficiency and consistency, ultimately resulting in time and cost savings.

Scope of Services:

Computer network analyses for water, wastewater, and gas systems; design of water, wastewater, and gas utility systems; well house design; Supervisory Control and Data Acquisition (SCADA); water treatment process; master planning; feasibility studies; solid waste studies; land use permitting; subsurface utility exploration; boundary/easement survey; and National Pollutant Discharge Elimination System (NPDES) & Stormwater Pollution Prevention Plan (SWPPP) compliance.

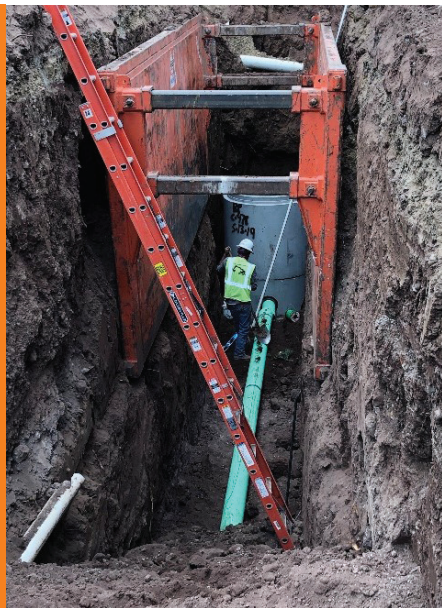
HDR maintains technical proficiency in virtually all widely used computer models for water and wastewater systems, including InfoWater, H2ONet, H2OMap, WaterCAD, WaterGEMS, SewerGEMS, HYDRA, InfoSWMM, InfoWorks, MikeUrban, XP-SWMM, and many others. As a policy, we do not have a proprietary interest in any model, preferring to use the tools that our clients prefer. HDR also uses state-of-the-art GIS tools and analysis to support hydraulic modeling and master planning efforts, verifying accurate results. Our approach allows us to provide comprehensive and unbiased modeling expertise to our clients, ensuring that we deliver the most effective solutions for their specific needs.



City of Farmington Water System Hydraulic Schematic

HDR's local Albuquerque office personnel have completed numerous successful water, wastewater, and reclaimed water infrastructure projects throughout the State of New Mexico with the same project elements as this on-call contract including water storage, water and wastewater conveyance, and water and wastewater treatment, and pumping. Our recent experience completing utilities and infrastructure master planning and design projects for numerous local communities gives the HDR team a unique perspective for the on-call contract.

HDR, in coordination with The Village of Angel Fire, provided drainage design and construction plans for over three miles of roadway in challenging terrain. HDR's team of experts was able to develop cross culverts, storm drain network and erosion projection elements that met the challenge of conveying storm water without adversely impacting local residents or businesses.



HDR has unmatched WTP plant engineering expertise which extends from completing paper studies and bench-scale research through coordinated pilot testing programs, full-scale facility evaluation, and final design. Our engineers have successfully designed greenfield plants and have completed rehabilitation and/or upgrades of existing WTP facilities to meet our clients' needs. HDR has completed numerous water treatment projects, including multiple projects in New Mexico and across the nation.

Our in-depth knowledge of wastewater systems includes all aspects of wastewater collection, conveyance, and treatment including experience with different types of wastewater collection systems such as conventional gravity sewers, low-pressure sewers, vacuum sewers and various types of sewage lift stations and force main systems. HDR's wastewater treatment experience includes completing evaluation and/or design for more than 20 wastewater treatment plants/facilities (WWTPs/WWTFs) in New Mexico. We have designed facilities ranging in size from 0.65 mgd to 75 mgd for clients such as Albuquerque Bernalillo County Water Utility Authority, City of Rio Rancho, City of Roswell, City of Farmington, and the City of Santa Fe. Our prior wastewater treatment projects have allowed our New Mexico clients to meet strict NPDES requirements and keep these facilities compliant for years to come.

Led by **Karthik Chandrasekaran, PE,** our team has experience in planning and designing modern SCADA and process control systems (PCS), leveraging current and emerging technology to optimize operations and promote secure data sharing and management. With a diverse background in SCADA, master planning, design, construction, and system integration, we bring a unique perspective to all project phases, enabling proactive recognition of challenges and solutions to mitigate risks. Advances in technology and evolving business needs necessitate continuous upgrades of control systems. HDR ensures detailed planning and seamless implementation to support your operational and maintenance needs, keeping your systems up-to-date and functioning optimally.

Central Wyoming Regional Water System
SCADA System Upgrade at Water Treatment Plant

Electrical design (wells, booster stations, lift stations, odor control stations, building electrical system design)

Led by **Oscar Junguitud, PE**, HDR's electrical engineering team has extensive experience in a wide range of water/wastewater utility and infrastructure projects, including groundwater wells, booster pump stations, lift stations, and treatment facilities. Our engineers add value to various building types, from academic campuses to mission-critical facilities, with their expertise in electrical system design. We provide reliable designs for power distribution, standby power, and Uninterruptible Power Supply (UPS) systems, and conduct short circuit analysis, coordination studies, and arc flash calculations using the latest software. HDR's electrical design staff also excel in sustainable design, incorporating emerging technologies like photovoltaics and LED lighting to exceed minimum energy codes.

Computer network analysis for Gas (GasWork), Water (InfoWater), and Wastewater (InfoSewer).

Comprehensive and Unbiased Modeling Expertise - HDR maintains technical proficiency in virtually all widely used computer models for water and wastewater systems and can verify that the City is using the latest software version.

Solid waste studies, landfill system design and analysis

At HDR, we recognize that waste management is not a one-size-fits-all industry and that textbook solutions don't always work. We listen first and partner with you to tailor our solutions and project teams to your specific needs. Led by **Andrea Ramirez, PE,** our team will work with you to manage waste as a resource, taking a fresh approach to achieve your goals, whether it's developing a zero waste strategy or implementing robust resource recovery processes. Our Integrated Waste Management Services include planning, waste transfer and processing facilities, energy from waste and conversion technologies, organics management, landfill services, permitting, environmental remediation, strategic consulting, and public involvement. With HDR, you can be confident that your waste management goals will be met with innovative and sustainable solutions.

Scottsdale Solid Waste Transfer Station

Environmental surveys, assessments monitoring and management, such as indoor air quality, asbestos, mold, and other related services for the City

HDR is well-versed in the environmental requirements, procedures, and documentation necessary for the City's federally funded projects, verifying compliance with NEPA regulations. Our expertise extends to permitting under Section 404 and 401 of the Clean Water Act, Endangered Species Act compliance, cultural resources documentation, and Section 4(f) of the Department of Transportation Act. **Audrey Unger, PMP,** with over 20 years of experience in NEPA, will lead HDR's Environmental Investigations and Documentation. Currently responsible for quality control of all environmental documents on HDR's New Mexico projects, Audrey has a strong understanding of the City's requirements, verifying that our environmental services are executed with precision and expertise.

The HDR team also includes **Acme Environmental** to provide staff for the completion of environmental surveys and assessments related to indoor air quality, asbestos, mold and other hazardous materials.

Geotechnical Assessments, such as soil and groundwater testing for contamination and remediation, and other related services for the City

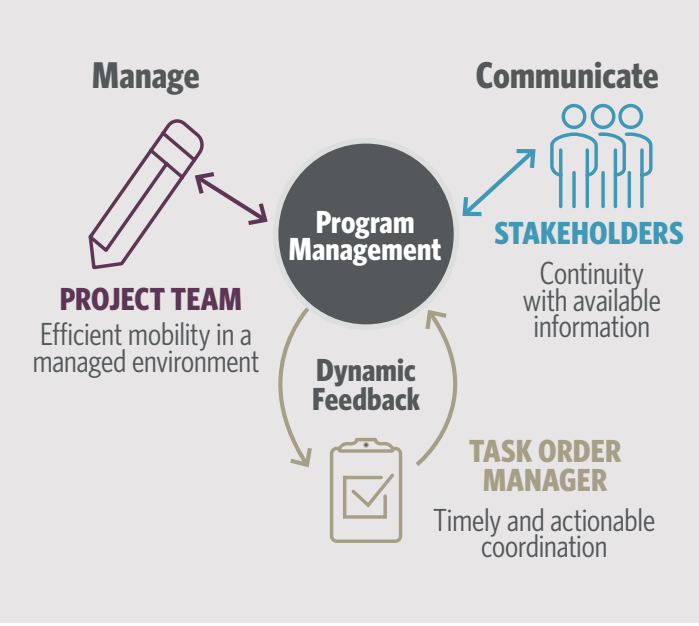
HDR will work with our sub-consultant, **Terracon Consultants, Inc. (Terracon),** to address the City's geotechnical assessment needs. Terracon's geotechnical engineers specialize in developing comprehensive assessment and evaluation programs that provide dependable design and construction recommendations.

HDR provides sound, innovative, and cost-effective groundwater supply solutions to a diverse array of water supply challenges across the nation for municipal and industrial clients. Our team members can perform comprehensive analyses to understand the subsurface environment and groundwater — surface water interaction as necessary for environmental protection.

Project Management

HDR's Project Management Plan (PMP) integrates all the components of a successful work plan to achieve consistency of deliverables that meet your schedule and budget. Our management team has the experience, tools, and techniques to not only monitor and control the work, but also clearly communicate status and progress to our clients.

Prior to beginning work on any task order, HDR's Task Order Manager will complete development of the PMP. The PMP is transmitted to all team members for an efficient start to the project and will provide team members with information related to the scope, budget and schedule for the task order to be completed.



Construction Inspection

Led by **Chris Sanchez,** HDR will provide comprehensive construction inspection services for the City, verifying that projects are built in accordance with design specifications, quality standards, and regulatory requirements. Our services include quality assurance and control, regular site inspections, testing and verification of materials, documentation and reporting, issue resolution, change order management, safety oversight, and final inspection and punch list development. With extensive experience in construction inspection, our team of certified inspectors and construction professionals is skilled in ensuring that projects are completed in compliance with all specifications and standards.

Additional Services:

Standard Drawings. This on-call contract may be utilized to prepare and update the City's standard drawings. These types of drawings standardize fabrication, installation, and construction methods for specific items of work, which also complement the contract documents and standard specifications. Our extensive knowledge allows us to perform modifications when necessary to bring the drawings up to current standards. HDR's thorough understanding enables us to provide services to develop standard drawings for every situation.

Develop and Review Specifications. HDR has a proven history of developing construction specifications for many clients. These construction specifications range from fairly simplistic to extremely advanced. HDR has the breadth and depth of expertise to assist the City with specifications that cover the disciplines of water, wastewater, natural gas, solid waste, and any other utility engineering services.

Public Involvement/Strategic Communications. We are prepared to provide professional community relations and public involvement services including preparing and implementing outreach and engagement strategies and plans, and developing publications (e.g., fact sheets and newsletters), websites, videos, graphics and presentation materials, online surveys or other interactive web-based tools, meeting notifications, presentations, social media, social media monitoring, and outreach documentation and summary reports.

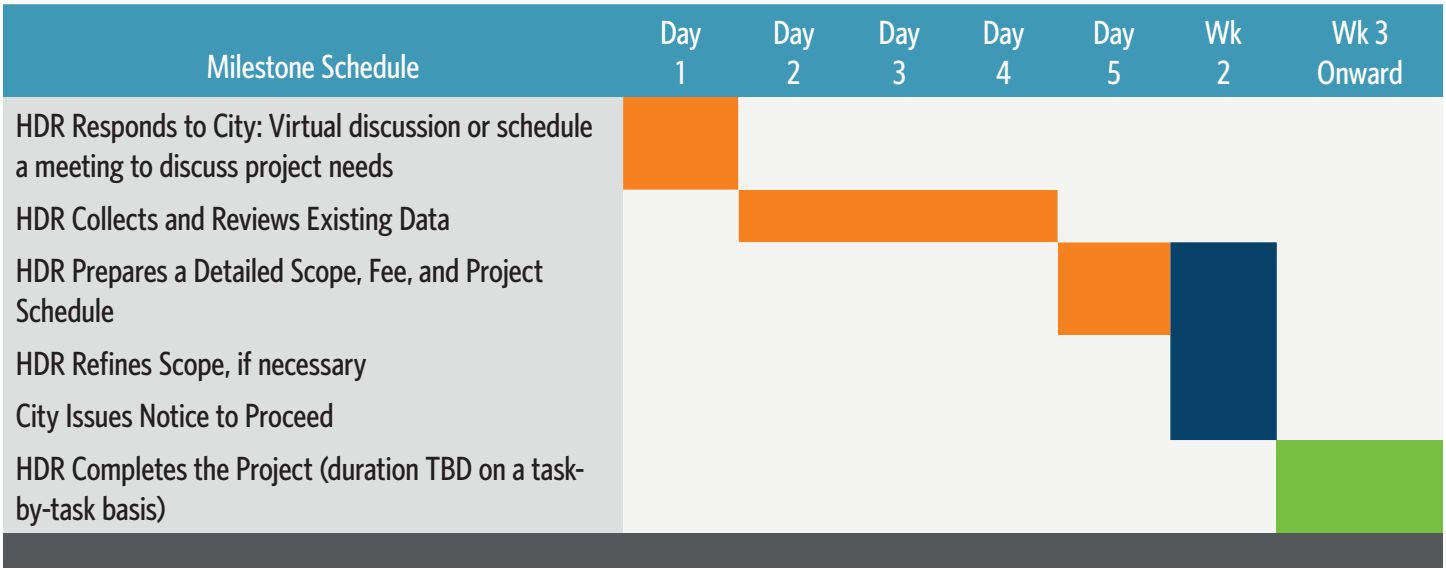
Typical Project Schedule/Timeline

Internally, our project managers and design teams utilize two valuable tools to meet project schedules:

Work Plan. A program used to schedule staff, as well as QA/QC reviews (as discussed on page 2) and client deliverables. This tool helps project managers identify which staff are available far in advance, so that staff can be adjusted as needed.

Engaged Management Team. Our most powerful project management tool is our vast pool of management staff available to assist project teams in identifying critical paths for successfully meeting project schedules. Technical leaders from across the country work with project managers to make sure they have adequate resources and reviewers to supply you with quality deliverables on time. HDR develops solutions that support the growing needs of the City and the market you serve.

When contacted by the City, our mission is to act immediately and mobilize quickly to produce products that efficiently, effectively, and appropriately meet the needs of the project. We will provide a detailed schedule for each task order that is assigned. The sample bar chart below illustrates our response time and scope of fee development.



We understand the importance of meeting project schedules.

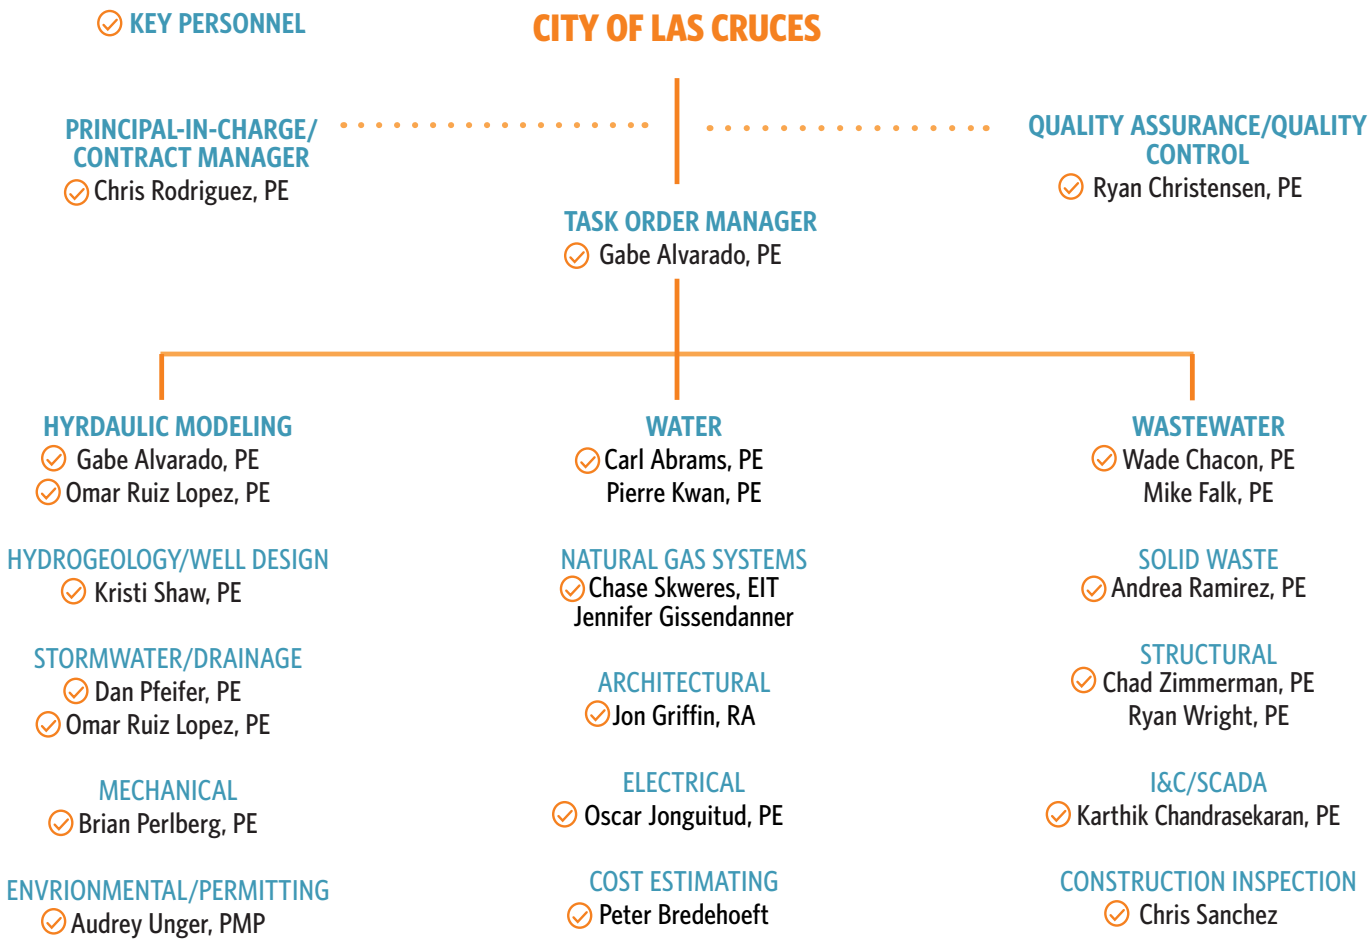
The capacity to accomplish work in a strict time frame requires strong and experienced leaders backed by skilled team members. Our personnel are dedicated to providing sufficient time and effort to produce a quality product. With this in mind, our team members were carefully selected not only for their expertise, but also for their availability to work on the project for its duration. We follow well established and time proven procedures to manage our project work and have assembled a strong team that is available to begin work upon Notice-to-Proceed. You can rely on us to successfully deliver the City's projects.

Evaluation Criteria No. 2 - Qualifications/Competence

We believe that making a difference begins with selecting the right people with proven expertise, who have a shared purpose and the enthusiasm to realize your vision. We offer an integrated team that consists of highly qualified professionals. Our collective history, expertise, and knowledge allows us to identify and mitigate risks; reduce the unknowns; develop cost-effective solutions; bring efficiency relative to schedule and budget; and, most importantly, meet and exceed the City's goals, creating the "best value" team.

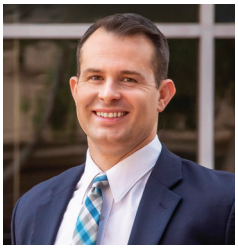
HDR's proposed **Project Principal, Chris Rodriguez, PE**, will lead the project team from our Albuquerque office. Chris is the managing principal in HDR's Albuquerque office, and has recently successfully managed similar contracts and projects. Our **Task Order Manager, Gabe Alvarado, PE** possesses effective project management and communication skills, and his hands-on design and construction experience will lead the HDR team in expediting task orders and producing accurate and quality deliverables.

HDR team members have been specifically selected to provide the City with a qualified and capable team that meets the specific challenges identified in the RFP. Team members and assigned roles are shown in the organizational chart below. The following pages include short bios and the percent of time our key staff will be assigned to each project.



Chris Rodriguez, PE, NM No. 16239
Project Principal/Contract Manager - 25%
Chris has 29 years of experience associated with water and wastewater systems, soil and groundwater remediation, landfill systems, site grading and surface hydrology, and regulatory compliance. He has served as HDR's project manager and project principal for many utility engineering projects across the state, including for City of Roswell, City of Rio Rancho, Santa Fe County and Village of Ruidoso.

Gabe Alvarado, PE, NM No. 17297
Task Order Manager/Hydraulic Modeling - 35%
Gabe Alvarado is the Utility Management System Business Class Manager for HDR's Albuquerque office. He has over 25 years of experience in the planning, analysis, and design of water distribution systems and wastewater collection systems including projects throughout New Mexico. Previous projects have included the completion of hydraulic modeling, technical reports, preliminary design reports, plan and profile drawings, mechanical drawings, specifications and contract documents, cost estimating, and project scheduling.



Ryan Christensen, PE, LEED AP, AZ No.41186
Quality Assurance/Quality Control - 5%
Ryan has 21 years of experience in project management, planning, design, and construction management of water, wastewater and reclaimed projects. His experience includes a variety of projects ranging from planning, engineering, and permitting of pump stations, wells, lift stations, force mains, water mains, sewer mains, water treatment plants, and reservoirs. He has a wealth of experience overseeing quality control, managing sub-consultants, and providing oversight and construction management on the client's behalf.

Carl Abrams, PE, NM No.13167
Water - 25%
Carl has 34 years of experience in the design and construction oversight of solid waste facilities, water and wastewater treatment and conveyance systems, assessment and remediation of water and soils, on-site septic systems, and site grading and development. He also has extensive experience with the preparation of contract documents, including plans, specifications, bid documents, and record drawings.

Wade Chacon, PE, NM No.17857
Wastewater - 25%
Wade has 26 years of experience completing evaluation and design of water and wastewater systems including: wastewater treatment facilities, gravity, low pressure and vacuum sewer collection systems, sanitary sewer lift stations, odor control stations, and water distribution, transmission and storage tanks. His design experience includes project management, preliminary engineering reports, mechanical process design, site civil design, project scheduling and cost estimating, and construction administration services.

Dan Pfeifer, PE, NM No.24053
Stormwater/Drainage - 20%
Dan has 15 years of experience in bridge hydraulics, scour analysis, stream restoration, floodplain modeling, and on-site/off-site civil design. He has proficient knowledge of New Mexico design standards and provides direction and leadership on complex hydrologic and hydraulic assessments throughout the state.

Omar Ruiz Lopez, PE, NM No. 26658
Hydraulic Modeling/Stormwater & Drainage - 35%
Omar has over 13 years of experience consisting of drainage disciplines including hydrologic analysis, 1-D/2-D hydraulic modeling, scour mitigation design, field surveying, and construction observation. Previous experience includes transportation drainage design and outlet protection design. He has become proficient in the following computer modeling programs to analyze hydrologic conditions and hydraulic structures; SRH2-D, AutoCAD, Civil3D, StormCAD, HY8, ArcGIS Pro/ArcGISMAP and other programs that help with modeling and design.

Kristi Shaw, PE, TX No. 93962
Hydrogeology/Well Design - 20%
Kristi has over 27 years of experience in water supply planning. Her experience is in strategic water supply development, with emphasis on regional water planning, conjunctive use management for supply sustainability and reliability, water conservation, aquifer storage and recovery, groundwater protection and modeling, and groundwater and surface water interaction. She has conducted numerous groundwater supply analyses in Texas as well as seven other states in the U.S. (California, Idaho, Nebraska, Nevada, New Jersey, New Mexico and Oklahoma).

Andrea Ramirez, PE, ENV SP, AZ No. 72222
Solid Waste - 20%
Andrea has 17 years of experience supporting clients on a variety of planning, design, and compliance projects for both waste disposal and waste diversion programs. She has performed feasibility studies, site evaluations, conceptual site designs, permitting, and master planning for an assortment of waste management and diversion facilities, including composting facilities, transfer stations, resource recovery parks, anaerobic digesters and other alternative energy facilities.

Jon Griffin, RA, AZ No. 36304
Architect - 20%
Jon has more than 32 years of experience providing services for project planning, programming, design, team coordination, consultant coordination, document production, specifications writing, and construction administration, and has extensive experience building client relationships and conducting presentations to government agencies. Experience covers the full spectrum of project tasks from design develop through construction administration.

Chad Zimmerman, PE, NM No. 23995
Structural - 20%
Chad has 19 years of experience that includes industrial type projects such as mechanical and equipment buildings, warehouses and water/wastewater plants. He has specific design experience in retaining wall design, water bearing structures, construction administration, inspecting placement of reinforcement for concrete structures, concrete building design for above and below-grade buildings, building design in high wind zone regions, building design in moderate seismic zones, steel and concrete moment frames and steel concentrically braced frames for new buildings, and finite element analysis modeling for concrete foundations and walls.

Oscar Jonguitud, PE, NM No. 25469
Electrical - 20%
Oscar has 12 years of experience in design and construction in the water, wastewater and power generation industry. His experience includes electrical design and construction of water and wastewater treatment facilities, solar farms, pump stations and water distribution networks. This includes medium and low voltage power distribution system design.

Karthik Chandrasekaran, PE, AZ No. 54857
I&C/SCADA - 20%
Karthik has 15 years of experience as an I&C engineer. His experience includes I&C system design, PLC/human machine interface (HMI) programming, startup, and commissioning for a variety of pump stations, de-watering systems, tailings delivery, crush, and convey systems. His responsibilities include development of P&IDs, loop diagrams, control loop description, specification of instrumentation, design of Control Panel, and Systems Integration. He has acquired a vital combination of hands-on field experience and detail oriented technical knowledge to deliver a robust control system efficiently.

Chase Skweres, EIT
Natural Gas Systems - 20%
Chase has five years of experience in the industry where he has provided engineering analysis, design, and coordination of oil and gas pipelines as well as mechanical and process engineering for gas compressor stations. His project experience includes the design of multiple natural gas engine and turbine driven compressor station projects, an offshore natural gas meter station, the recommissioning of a solution mining salt cavern system for natural gas storage, and multiple natural gas pipeline projects.

Audrey Unger, PMP, No. 1322755
Environmental/Permitting - 20%
Audrey has over 20 years of experience on National Environmental Policy Act (NEPA) projects throughout the Southwest. Audrey has prepared well over 100 categorical exclusions, several environmental assessments (EA), including EAs for DOTs on tribal lands, and a few environmental impact statements. In addition to NEPA, Audrey understands other federal, state, and local environmental policies, procedures, and regulations including Section 4(f) of the USDOT Act, Endangered Species Act, Clean Water Act; and Section 106 of the National Historic Preservation Act Consensus.

Brian Perlberg, PE, NM No. 23176
Mechanical - 20%
Brian is an accomplished project manager and lead mechanical engineer for projects ranging from $500,000 to $270 million in construction budget. He has 22 years of experience in a wide variety of building types including education, healthcare, government, higher education, mission critical, laboratory, correctional and commercial. Brian has experience in working under a variety of project delivery methods including accelerated delivery, design-build and multiple-package projects.

Peter Bredehoeft, CEP, AACE No. 4
Cost Estimating - 5%
Pete has completed more than 3,300 cost estimates on all levels, including program management, conceptual bonding type estimates, order of magnitude project estimates, design development estimates, construction document estimates, final design estimates, operations/maintenance estimates and change order-type definitive level estimates. Pete is a specialist in estimating location or area adjustment factors and in escalation development and commodity trends. He has extensive program management experience (5 to 15 major programs) on large capital improvement programs.

Chris Sanchez
Construction Inspection - 25%
Chris has 18 years in construction inspection, field office management, and construction surveying for roadway, water distribution, drainage, structures, and environmental projects. He performs and verifies field tests such as density testing and concrete testing, performs various lab tests and materials sampling, verifies traffic control placement, oversees placement and testing of intersection signalization (including all electrical), inspects seeding and fence placement.

PRINCIPAL OFFICER/OFFICE LOCATION

Depending on the specific task, we anticipate that the majority of the work performed under this contract will be conducted in the State of NM by HDR, a business licensed and operating in Albuquerque, NM, with support of professional technical expertise as needed from other HDR offices including our sub-consultants. Our **Principal Officer is Chris Rodriguez, PE NM No. 16239** will be responsible for administration of the contract. His contact information and office location are listed below:

2155 Louisiana Boulevard NE, Suite 3000
Albuquerque, NM 87110
505.830.5400

SUB-CONSULTANTS

We have augmented our team with key sub-consultants based on their technical skills, our prior experience working together as a team, and our history of successfully completing projects.

ACME Environmental

Indoor Air Quality/Asbestos/Mold
3816 Carlisle NE Albuquerque, NM 87107
505.433.4461

ACME Environmental, Inc. provides comprehensive environmental, safety and health consulting services. These services include industrial hygiene and safety consultation, asbestos, lead, and mold investigation, project design and contractor oversight. All of ACME's consulting activities are performed under the supervision of a Qualified Industrial Hygienist.

COBB, FENDLEY & ASSOCIATES (COBBFENDLEY)

Surveying & Mapping, Subsurface Utilities Engineering (SUE)
3820 Academy Pkwy. North NE Albuquerque, NM 87109 505.508.0786

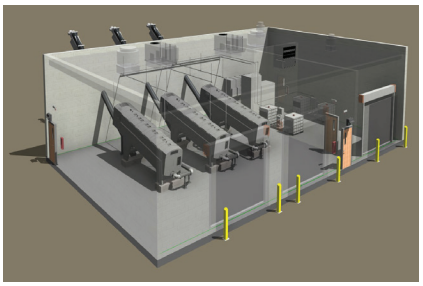
CobbFendley will be responsible for the survey, mapping, ROW, and property ownership research on this project. They are a multi-disciplined firm of over 600 professionals established in 1980 and located in Albuquerque, NM. In their 43-year history, the firm has successfully completed thousands of surveys for public and private sector clients, including boundary, topographic, engineering design, and utility surveys.

TERRACON CONSULTANTS, INC. (TERRACON)

Geotechnical Services
4450 Bataan Memorial East Las Cruces, NM 88011 575.527.1700

Terracon, an employee-owned company, provides geotechnical, environmental, facilities engineering, and construction materials testing services to public and private entities throughout the U.S. They place a strong emphasis on the development and application of new geotechnical technologies. Terracon has completed geotechnical work for HDR projects throughout the Southwest and has established an effective working relationship.

Evaluation Criteria No. 3 - Performance of the Firm



City of Roswell, Engineering/ Architectural On-Call Contract

Roswell, New Mexico

WWTP Solids Handling Facility (Photo)
HDR is completing engineering services for the proposed de-watering facility that includes two new screw presses, polymer feed systems, and other improvements. HDR completed development of drawings and technical specifications for civil, structural, architectural, process, HVAC, plumbing, electrical, and instrumentation and control.

Edgewood Waterline Replacement Phase 1 and 2
HDR completed final design for the replacement of approximately 14,000 LF of existing 4-inch, 6-inch, 8-inch, 10-inch, and 36-inch waterlines to improve the capacity of the water system along various streets near Edgewood Avenue in the City of Roswell.

Water System Master Plan
The water system master plan included an evaluation of the system to identify the improvements needed to support future growth and expansion of the City based on a 20-year planning horizon. The results of the evaluation completed were documented as a part of the water system master plan report.

CITY OF LAS CRUCES

PROFESSIONAL SERVICES AGREEMENT

THIS AGREEMENT, made and entered into on this _____ day of _____, 2024 by and between the City of Las Cruces, New Mexico, hereinafter called “CITY” and Jacobs Engineering Group, Inc., of 3721 Rutledge Rd NE, Ste B-1, Albuquerque, NM, 87109, hereinafter called “CONTRACTOR”.

1. PROJECT DESCRIPTION
Utilities Engineering Services on an as needed basis via Project Assignment Agreements (Attachment “A”) during the term of this AGREEMENT.

2. SCOPE OF SERVICES
In a satisfactory and proper manner, the CONTRACTOR shall perform SERVICES, as proposed in response to the CITY’S RFP No. 23-24-052, as set forth in Exhibit A, attached hereto and made a part of this Agreement.

The CONTRACTOR is authorized to extend the same terms and conditions of this Agreement to other governmental entities conditioned upon the procurement laws and regulations of those entities. The CITY shall not be a party nor have any liability relating to such extensions.

3. APPROPRIATIONS
The terms of this Agreement are contingent on sufficient appropriations and authorization being made by the City Council for the performance of this Agreement. If sufficient appropriations and authorizations are not made by the City Council, this Agreement shall terminate upon written notice given by the CITY to CONTRACTOR. The CITY’S decision as to whether sufficient appropriations and authorizations exist shall be accepted by CONTRACTOR and shall be final.

4. COMPENSATION
The CITY shall compensate CONTRACTOR for the performance of SERVICES under this Agreement an amount agreed to for each assigned project, plus applicable taxes. CONTRACTOR shall perform the SERVICES upon receipt of a purchase order or written Notice to Proceed for each assigned project from the CITY. The CITY cannot authorize costs to be incurred prior to such written Notice to Proceed. CONTRACTOR shall submit invoices upon completion of the project. CITY shall pay invoices Net 30 days upon receipt of undisputed invoice.

CONTRACTOR is responsible for payment of State of New Mexico Gross Receipts Tax levied on the amounts payable under this Agreement. CONTRACTOR agrees to comply with all federal and state tax payments and report all items of gross receipts as income from the operations of its business.

5. DEVOTION OF ADEQUATE TIME
CONTRACTOR will devote the necessary hours each week to the performance of projects that are required by the CITY and it will serve the CITY diligently and faithfully,

and according to its best ability in all respects and will promote the best interests of the CITY.

6. TERM AND SCHEDULE
This Agreement shall become effective on June 1, 2024 for a term of 5 years through May 31, 2029.

CONTRACTOR shall perform the SERVICES in accordance with the time set forth as agreed upon by the CITY and CONTRACTOR and as agreed to for each project assigned under the terms of this Agreement.

7. EXTENSIONS, CHANGES, AND AMENDMENTS
This Agreement shall not be extended, changed, or amended except by instrument in writing executed by the parties. The CITY shall not be liable for payment of any extra services nor shall CONTRACTOR be obligated to perform any extra services except upon such written agreement. Such written approval shall indicate the date said extension, change, or amendment is effective and shall be signed by the parties to this Agreement. In the event that the parties cannot reach agreement as to a particular change, the issue shall be resolved pursuant to Article 21.

8. CHANGES AND EXTRA SERVICES BY THE CITY
The CITY may make changes within the general scope of the SERVICES plus may also request CONTRACTOR to perform other extra services not incorporated within the Services set forth in this Agreement. If the CONTRACTOR is of the opinion that such change causes an increase or decrease in the cost and/or the time required for performing the changes or other services required by the City, CONTRACTOR shall so notify the CITY of that fact within five (5) business work days from the date of receipt of change by the CITY. The CITY shall provide written response to the CONTRACTOR within five (5) business work days from the date of receipt of CONTRACTOR'S written notification.

9. CHANGES AND EXTRA SERVICES BY THE CONTRACTOR
In the event a condition is identified by the CONTRACTOR which, in the opinion of the CONTRACTOR, changes the services, costs, and/or time required for performance under this Agreement, the CONTRACTOR shall provide written notification to the CITY within five (5) business work days of such identification. The CITY shall respond in writing to such notification within five (5) business work days from the date of receipt of CONTRACTOR'S notification.

10. DELAYS
In the event that performance of SERVICES is delayed by causes beyond reasonable control of CONTRACTOR, and without the fault or negligence of CONTRACTOR, the time and total compensation for the performance of the SERVICES may be equitably adjusted by written agreement to reflect the extent of such delay. CONTRACTOR shall provide the CITY with written notice of delay pursuant to Article 9 including therein a description of the delay and the steps contemplated or actually taken by

CONTRACTOR to mitigate the effect of such delay. The CITY will make the final determination as to reasonableness of delays.

11. TERMINATION
This Agreement may be terminated by either party hereto upon fifteen (15) calendar days written notice in the event of substantial failure by the other party to perform in accordance with the terms of this Agreement through no fault of the terminating party. This Agreement may also be terminated by the CITY for its convenience or because the PROJECT has been permanently abandoned, but only upon fifteen (15) calendar days written notice to CONTRACTOR.

In the event of termination, CONTRACTOR shall be compensated for all services performed and costs incurred up to the effective date of termination for which CONTRACTOR has not been previously compensated.

Upon receipt of notice of termination from the CITY, CONTRACTOR shall discontinue the SERVICES unless otherwise directed and upon final payment from the CITY deliver to the CITY the required number of copies of all data, drawings, reports, estimates, summaries, and such other information and materials as may have been accumulated by CONTRACTOR in the performance of this Agreement, whether completed or in process.

12. RECORDS AND AUDITS
CONTRACTOR will maintain records indicating dates, length of time, and services rendered. The CITY has the right to audit billings both before and after payment, and contest any billing or portion thereof. Payment under this Agreement does not foreclose the CITY'S right to recover excessive or illegal payments. CONTRACTOR will retain records for five (5) years after the completion of the project.

13. DISCLOSURE AND OWNERSHIP OF DOCUMENTS, PRODUCTS, DESIGN, ELECTRONIC FILES
All technical data, electronic files, and other written and oral information not in the public domain or not previously known, and all information, electronic files, and data obtained, developed, or supplied by the CITY will be kept confidential and CONTRACTOR will not disclose to any other party, directly or indirectly, without the CITY'S prior written consent unless required by lawful order.

All technical data, electronic files, products developed, operational parameters, blueprints, and other information and work of the CONTRACTOR shall be the sole property of the CITY and shall be delivered to the CITY when requested and at the end of the Agreement.

14. INDEPENDENT CONTRACTOR
CONTRACTOR represents that it has, or will secure, at its own expense, all personnel required in performing the SERVICES under this Agreement. Such personnel shall not be employees of, nor have any contractual relationship with the CITY. CONTRACTOR,

consistent with its status as an independent contractor, further agrees that its personnel will not hold themselves out as, nor claim to be officers or employees of the CITY by reason of this Agreement.

To the extent that CONTRACTOR employs any employees, CONTRACTOR shall be solely responsible for providing its own form of insurance for its employees and in no event shall CONTRACTOR's employees be covered under any policy of the CITY.

CONTRACTOR'S retention hereunder is not exclusive. Subject to the terms and provisions of this Agreement: (i) CONTRACTOR is able, during the Term hereof, to perform services for other parties; and (ii) CONTRACTOR may perform for its own account other professional services outside the scope of this Agreement.

CONTRACTOR is and shall be an Independent Contractor and shall be responsible for the management of its business affairs. In the performance of the work under this Agreement, CONTRACTOR will at all times be acting and performing as an Independent Contractor, as that term is understood for federal and state law purposes, and not as an employee of the CITY. Without limitation upon the foregoing, CONTRACTOR shall not accrue sick leave, jury duty pay, retirement, insurance, bonding, welfare benefits, or any other benefits, which may or may not be afforded employees of the CITY. CONTRACTOR will not be treated as an employee for purposes of: Workers' Compensation benefits; the Federal Unemployment Tax Act; Social Security; other payroll taxes, federal or any state income tax withholding; or the employee benefit provisions described in the Internal Revenue Code of 1986, as amended. Neither the CITY, nor its agents or representatives, shall have the right to control or direct the manner, details or means by which CONTRACTOR accomplishes and performs its services. Nevertheless, CONTRACTOR shall be bound to fulfill the duties and responsibilities contained in the Agreement.

15. NO JOINT VENTURE OR PARTNERSHIP

Nothing contained in this Agreement shall create any partnership, association, joint venture, fiduciary or agency relationship between CONTRACTOR and CITY. Except as otherwise specifically set forth herein, neither CONTRACTOR nor CITY shall be authorized or empowered to make any representation or commitment or to perform any act which shall be binding on the other unless expressly authorized or empowered in writing.

16. ASSIGNMENT

CONTRACTOR shall perform all the services under this Agreement and shall not assign any interest in this Agreement or transfer any interest in same or assign any claims for money due or to become due under this Agreement without the prior written consent of the CITY.

17. INSURANCE
CONTRACTOR shall obtain and maintain insurance at its own cost and expense during the life of this Agreement, and shall require Subcontractors, if any, to maintain during the life of his subcontract:

1. Commercial General Liability Insurance
   a. $1,000,000 per occurrence / $2,000,000 aggregate
   b. Coverage must include premises and operations, products and completed operations, and personal and advertising injury.
   c. The City of Las Cruces must be named as an Additional Insured for all coverages listed above on endorsements acceptable to the City.
   d. Coverage must be primary and non-contributory.
   e. Coverage must be per project or per location.
   f. Coverage must be on an occurrence form.
   g. Subrogation must be waived.
2. Commercial Auto Liability
   a. $1,000,000 per occurrence
   b. Coverage must be for “owned, leased, hired, and non-owned autos” or “any autos.”
3. Workers’ Compensation and Employers Liability
   a. Statutory Limits
   b. Employer liability – $1,000,000 each accident, $1,000,000 each employee by disease, $1,000,000 policy limit
   c. Subrogation must be waived.
4. Professional Liability: $1,000,000 per claim

Endorsements for additional insured coverage and waivers of subrogation must be provided as a condition of this Agreement and shall be noted on the certificate.

CONTRACTOR shall furnish the CITY with a certificate(s) of insurance showing CONTRACTOR and Subcontractors, if any, have complied with this Article. The CONTRACTOR shall provide insurance certificates before work is to start on the project and shall provide the CITY thirty (30) days written notification of cancellation of such policies.

18. INDEMNITY AND LIMITATION
CONTRACTOR shall indemnify, defend, and hold harmless the CITY from and against any and all claims, suits, actions, judgments, demands, losses, costs, expenses, damages, and liability caused in whole or in part by, resulting in whole or in part from, or arising in whole or in part out of the negligent acts, errors, or omissions of CONTRACTOR, its officers, employees, agents, or representatives in the performance of SERVICES under this agreement.

19. APPLICABLE LAW
This Agreement and the rights and obligations of the parties shall be governed by and construed by the laws of the State of New Mexico applicable to Agreements between

New Mexico parties made and performed in that state, without regard to conflicts of law principles. Venue shall be in the Third Judicial District, State of New Mexico.

CONTRACTOR shall abide and be governed by all applicable state law, CITY ordinances, and laws regarding the CONTRACTOR'S services or any work done pursuant to this Agreement, including anti-discrimination.

20. BREACH
In the event CONTRACTOR breaches any obligation contained in this Agreement, prior to instituting any action or dispute resolution procedure, the CITY shall give CONTRACTOR written notice of such breach. In the event CONTRACTOR fails to remedy the breach within five (5) working days of receiving such written notice, the CITY, at its sole discretion, without any obligation to do so and in addition to other remedies available under applicable law, may remedy CONTRACTOR'S breach and recover any and all costs and expenses in so doing from CONTRACTOR.

21. DISPUTE RESOLUTION
In the event that a dispute arises between CITY and CONTRACTOR under this Agreement or as a result of breach of this Agreement, the parties agree to act in good faith to attempt to resolve the dispute.

22. NOTIFICATION
All notices required or permitted under this Agreement shall be in writing and shall be deemed sufficiently served if served by Registered Mail addressed as follows:

TO CITY:	City of Las Cruces PO Box 20000 Las Cruces, NM 88004 ATTENTION: Tony Trevino
With Copies to:	City Attorney Purchasing Manager
TO CONTRACTOR:	Jacobs Engineering Group, Inc. 3721 Rutledge Rd NE, Ste B-1 Albuquerque, NM 87109 ATTENTION: Robert Fowlie

23. SCOPE OF AGREEMENT
This Agreement incorporates all of the agreements, covenants, and understandings between the parties hereto concerning the subject matter hereof and that all such covenants, agreements, and understandings have been merged into this written agreement. No prior agreement or understanding verbal or otherwise of the parties or their agents shall be valid or enforceable unless embodied in this agreement.

24. SEVERABILITY
The parties agree that each provision of this Agreement is severable and the invalidity or unenforceability of any one or more of the provisions of this Agreement shall not affect the validity or enforceability of any other provision of this Agreement, and this Agreement shall be construed in all respects as if such invalid or unenforceable provisions were omitted.

25. CONFLICT OF INTEREST
CONTRACTOR represents and warrants that CONTRACTOR has no business, professional, personal, or other interest, including, but not limited to, the representation of other clients, that would conflict in any manner or degree with the performance of its obligations under this Agreement. If any such actual or potential conflict of interest arises under this Agreement, CONTRACTOR shall immediately inform the CITY in writing of such conflict. If, in the reasonable judgement of the CITY, such conflict poses a conflict to and with the performance of CONTRACTOR'S obligations under this Agreement, or is otherwise a violation of the CITY'S current policy or ordinances, then the CITY may terminate the Agreement immediately upon written notice to CONTRACTOR; such termination of the Agreement shall be effective upon the receipt of such notice by CONTRACTOR.

EXHIBIT A
SERVICES

A. Project Assignments
A Project assignment is initiated by the City providing the selected Engineer a detailed project description, including scope of work and any other special instructions needed by the Engineer to prepare items such as preliminary and final cost estimates, complete project plans and specifications, project reports, and other related engineering services. The awarded Engineers shall provide engineering services that may include but not be limited to, the following:
1. Computer network analyses for water, wastewater, and gas systems; design of water, wastewater, and gas utility systems; well house design; Supervisory Control and Data Acquisition (SCADA); water treatment process; master planning; feasibility studies; solid waste studies; land use permitting; subsurface utility exploration; boundary/easement survey; and National Pollutant Discharge Elimination System (NPDES) & Stormwater Pollution Prevention Plan (SWPPP) compliance.
2. Electrical design (wells, booster stations, lift stations, odor control stations, building electrical system design)
3. Computer network analysis for Gas (GasWork), Water (InfoWater), and Wastewater (InfoSewer). The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility
4. Solid waste studies, landfill system design and analysis
5. Environmental surveys, assessments monitoring and management, such as indoor air quality, asbestos, mold, and other related services for the City
6. Geotechnical Assessments, such as soil and groundwater testing for contamination and remediation, and other related services for the City
7. Expert witness in a judicial and/or quasi-judicial setting.
8. Project Management
9. Construction Inspection.

B. Project Assignment Agreements
A Project Assignment Agreement (a template of which is incorporated herein as ATTACHMENT “A”) will be negotiated and executed on a case-by-case basis for each specific project, and will include a cost proposal from the Engineering firm(s) proposing to do the work. The cost proposal may utilize one of the following pricing formats:
1. Lump Sum
2. Unit pricing to include:
    a. Hourly rate for various types of services requested by the City
    b. Charges for miscellaneous items such as blueprints, data, discs, rental of special equipment, etc.
    c. A statement of the billing procedures including minimum billing units, if any.
    d. Cost of sub-consultants (if any)
3. An alternative unit cost breakdown

C. Deliverables
Each project contract will require a list of deliverables, schedule/timeline and cost. The

Engineer may be required to supply to the City an of the following items, when specified and as requested on the Scope of Work for each individual project.

1. Preliminary report containing schedule of work and cost estimate.
2. Construction drawings and documents. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility. Provide hard copies and PDF format of the construction plans for Purchasing Section use.
   a. As-built drawings on electronic media and reproducible prints. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. All horizontal and vertical location datum information shall be coordinated with the City Surveyor. The utility location information shall be tied to project control monuments and referenced to project construction stationing. The project control survey shall be certified by a New Mexico Registered Land Surveyor. Metadata or “data about the data” shall be submitted with each as-built electronic file, preferably as a separate text file on the electronic submittal media, and shall include:
      - Name, address and phone number of the responsible land surveyor.
      - Date of completion of survey.
      - Equipment used to conduct the survey.
      - Horizontal and vertical control marks used to tie the survey to the City approved control.
      - Transformation factors needed to reduce Ground (local coordinate system) to Grid and combined scale factor used.
   b. “RECORD DRAWINGS” shall be clearly labeled on each sheet.
3. Computer network analysis for gas, water, and wastewater shall be provided to the City in appropriate electronic format. It shall include the entire model, including changes and a text summary (report) of the network analysis that includes assumptions, procedures, and results, and any graphics that clarify the analysis. The Engineering firm(s) shall verify the report format with the City. The computer network analysis shall be provided using the software listed below. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility.
   a. Computer network analysis for Gas: GasWork
   b. Computer network analysis for Water: InfoWater
   c. Computer network analysis for wastewater: InfoSewer
   d. Other design computer programs as approved by the City
4. Project reports.
5. Any other item specified in the contract for that project
6. Easement map and recording information

D. The selection of an Engineer for a specific project shall be based on experience with similar projects, references, performance in similar projects, and availability. This will include the ability to meet schedules, cost control, and responsiveness to client.

E. The Engineer shall have an engineering staff on-site everyday who is responsible, on behalf of the Engineer, for providing timely completion and response for performance of the terms of each Project Assignment Agreement during the progress of each individual project. Any deviation from this requirement is at the discretion of the City and must be approved in writing by the City prior to the start of any individual project.

Submittal via Email to: bidclerk@las-cruces.org

Subject: RFP NO.: 23-24-052, Utilities Engineering Services

Dear Selection Committee Members:

The Utilities Engineering Services contract reflects the City of Las Cruces' commitment to proactively manage public utilities and maintain a high level of service to customers and residents. Jacobs has been providing high-quality utilities engineering services for the City for 19 years. We recently delivered the LCU 2023 Utilities Integrated Master Plan, and we have completed studies and designs for improvements at the Jacob A. Hands Wastewater Treatment Facility. We've demonstrated a proven track record of completing projects on schedule and on budget. Our team provides the following benefits:

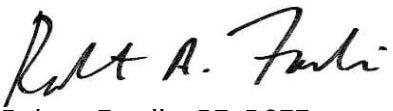
- An integrated team approach led by Robert Fowlie, PE, BCEE, Principal Engineer, who has successfully managed previous City projects since 2013.
- Local in-depth expertise and broad resources to meet anticipated requirements, as well as an efficient management approach that can meet quality, schedule, and budget requirements.
- Cost savings derived from Jacob's technical expertise, upfront and continuous coordination, and thorough knowledge of the water, wastewater, and gas systems.
- A proven approach to providing utility engineering services that Jacobs has used successfully on other projects.

The Jacobs team comprises experienced staff and expert resources located in New Mexico and El Paso to assist the City in providing utility engineering services in support of the City's needs. We have structured a team that reflects our breadth of experience on similar projects, our local knowledge, and our solid commitment to successful project delivery.

We look forward to the opportunity to continue our commitment to the City of Las Cruces. Jacobs and the City have successfully negotiated mutually beneficial Professional Services Agreements (PSA) in prior years and look forward to negotiating a successful PSA for the 2024 Utility Engineering Services on-call contract, including reasonable compensation, indemnity, insurance, and standard of care provisions. We would also like to mention there seem to be some inconsistencies in the insurance provisions between the RFP and sample Agreement and are going to assume the terms in the Agreement will prevail.

We acknowledge receipt of Addendum No. 1, dated February 20, 2024, and Addendum No. 2, dated February 23, 2024. If you have any questions or require additional information regarding our approach or qualifications, please call me at 505-548-0661 or via email at Robert.Fowlie@jacobs.com.

Sincerely,
Jacobs Engineering Group, Inc.



Robert Fowlie, PE, BCEE
Vice President/Principal Engineer

CITY OF LAS CRUCES

RFP COMPLIANCE DECLARATION

RFP TITLE: **Utilities Engineering Services**

RFP NO.: **23-24-052**

DUE DATE/TIME: **February 27, 2024 / 4:00 p.m.**

In compliance with the requirements of this RFP, I, the undersigned, offer and agree to furnish any or all materials and/or services to the City of Las Cruces within the time agreed.

I further certify that this company has not been debarred, suspended, or otherwise made ineligible for participation in Federal Assistance programs under Executive Order 12549 Debarment and Suspension as described in the Federal Rules and Regulations.

Receipt of Addenda Nos.: 1 and 2 is hereby acknowledged (where none received, place a zero in this space)

1. Technical Approach

A. Description of Proposed Technical Approach of Professional, Technical, and Customary Services

Jacobs Engineering Group (Jacobs) is a world leader in the field of water, wastewater, solid waste and environmental engineering, and construction services. Our depth of resources includes more than 60,000 staff in offices in nearly 80 countries worldwide. Our Albuquerque office has been providing utilities engineering services to New Mexico communities since 1988, and on-call utilities engineering services to the City for 19 years. Our Albuquerque and El Paso offices have a combined staff of 67 engineers and technicians that will provide the City with unmatched knowledge of the water, wastewater, and solid waste systems.

The City requires a wide range of engineering capabilities and a depth of available technical expertise to perform utilities engineering for the City. Jacobs is committed to continuing to provide responsive and high-quality engineering services to enable Las Cruces Utilities (LCU) achieve its mission to provide natural gas, water, wastewater, and solid waste services to customers, so they can enjoy a safe, healthy, productive, and sustainable environment.

Our key staff provide specialized experience and technical competence in an array of service areas. Our team is committed to the City and the local community to provide effective, efficient, and responsive services helping you deliver your projects. Recognizing this contract is for on-call services, with work under this contract being negotiated on a task order basis, the following demonstrates our day-to-day coordination activities, including task order negotiation, project management, and project controls—including cost and change—and approach to meeting project scheduling demands.

Operational/Management Approach

When the City selects us for a specific task order, our Principal Engineer, Robert Fowlie, PE, BCEE, will work directly with the City's designated project manager to develop a scope, schedule, and budget. Before work begins on a task order, a project execution plan (PEP) will be prepared appropriate for the size and complexity of the project. The PEP will contain the following major elements:

- Detailed description of the work, budget, and deliverables
- Schedule for accomplishing the task and each subtask involved
- City and Jacobs staff roles and responsibilities
- Communication and documentation plan
- Quality control procedures and design responsibilities
- Standards and submittal procedures

The PEP guides the project team in performing the work and provides the framework for scheduling staff resources and support services. It also provides the basis to monitor labor and cost expended on the task order and to determine anticipated workload.

Each task may consist of various planning, design, and construction elements. An orderly and logical approach that emphasizes the elements required for successful project completion is essential to execute the tasks. Our objective will be to plan and manage each project in accordance with the scope of work, budget, and schedule. We will facilitate communication between the City and team staff regarding the project's progress, decision making, and information requests.

Robert Fowlie will meet with City staff to make sure we are meeting our commitments, our project team has the resources needed to deliver projects, and there is consistency among task orders.

B. Major Tasks to Be Accomplished

Project Kickoff/Workshops

At the start of each Task, a kickoff meeting will be scheduled with the City to discuss the project scope, background, communication protocols, budget, and schedule, and for the team to understand the City's expectations. We will conduct workshops with City staff at decision milestones throughout each specific task.

Our experience shows that workshops help the team meet project objectives and keep the project on schedule. We won't hesitate to contact the City's project manager via phone, text, email and in person to keep the City informed.

Cost Control Techniques

Planning and Design

Our team, delivery model, internal cost control methods, and tools assure the project is completed on schedule and budget. Project labor and expenses are entered into Jacob's electronic project accounting system weekly. Each week the project manager receives a report of project costs to date and compares them to plan and estimated percentage complete.

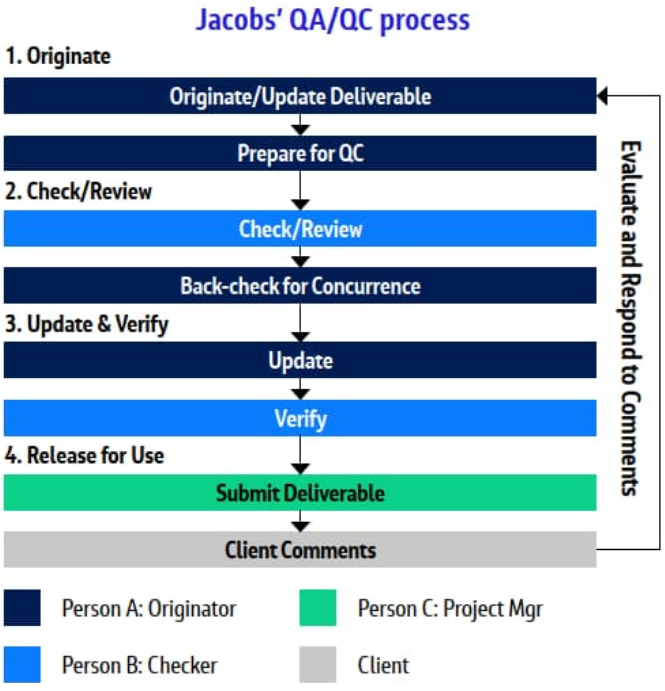
Construction

We use several industry leading tools and resources for estimating project costs, ranging from an extensive database of recent design and construction projects in New Mexico to Jacobs Conceptual and Parametric Engineering System (CPES) tool.

The CPES contains "mini-models" or cost estimates of facilities based on real projects and actual bid results. This tool increases the accuracy and efficiency of infrastructure cost estimating at the planning-level stage of a project, long before detailed drawings and specifications are developed to support classic quantity takeoff level estimating approaches. For the 60-percent, 90-percent, and final cost estimates, a material takeoff will be completed, and unit prices used. Unit prices will be generated using data from past New Mexico projects; actual material quotations; current local labor and equipment cost data; and, in some cases, published construction cost-estimating guides, such as *RS Means Construction Cost Data* and *Richardson Process Plant Construction Estimating Standards*.

Quality Assurance/Quality Control Program

Quality has always been at the heart of our team's culture and success. Delivering superior quality service is our key marketplace strategy and is reinforced in every aspect of our business. We view quality as a continuous process that must be built into the project from the onset and followed through to project closeout. At the core of our quality assurance/quality control (QA/QC) program is our technical knowledge and extensive experience on similar projects.



The QA/QC program will provide independent review of all deliverables and will make sure we are doing "the right thing, right the first time."

Health and Safety

Safety and protection of the environment is a top priority for our clients—and a top priority on every Jacobs project. Our focus on Health, Safety, and Environmental (HS&E) values is a major contributor to the firm's successful delivery of projects to our clients. Our clients come to us not only for the top-caliber work on which we have built our reputation, but also because they trust us to deliver their projects in a safe and environmentally conscious manner. Jacobs represents the industry's finest in total project delivery demonstrated by our company wide BeyondZero® safety program.

C. Detailed Statement of Services to Be Provided Under Each Task

Our team has experience working with the City and brings knowledge of the City's process, procedures, and operations. Our services for the City have included long-term master planning, design, and construction of improvements at the Jacob A. Hands WWTF (JHWWTF), odor control study and development of a utility emergency response plan. Exhibit 1 summarizes the work we have completed over the past 8 years. The list of services that we understand the City may desire is provided below. The paragraphs that follow highlight our qualifications in the areas requested in the RFP.

- Computer Network Analysis
- Water and Sanitary Conveyance Facilities
- Pump and Lift Stations
- Condition Assessment and Rehabilitation Services
- Non-Potable or Reuse Treatment Facility Unit Process
- Wastewater Treatment Facility Unit Process
- Water Treatment
- Natural Gas
- SCADA Control and Data Acquisition
- Master Planning and Feasibility Studies
- Solid Waste Studies/Landfill System Design and Analysis
- Land Use Planning
- Subsurface Utility Exploration/Boundary/Easements Surveying, Mapping and GIS
- NPDES/SWPPP/Environmental Services
- Electrical Design
- Geotechnical Assessments
- Expert Witness Testimony
- Project Management
- Construction Management and Inspection

Exhibit 1: Timeline of City Utilities projects completed by Jacobs (2015 to 2023).

Additional Services:

- Odor Control
- Emergency Response Planning and Training
- Operations Support
- Physical/Cyber Security
- Asset Management
- Architecture and Engineering Discipline Planning and Design

Computer Network Analysis

Jacobs has more than 300 computer programs for engineering and scientific analysis and design. These programs are available for use in groundwater, vadose zone, and air modeling; hydraulic and water resources modeling; wastewater process models; gas system modeling; and electrical, structural, mechanical, civil, and geotechnical evaluations. Our distribution system planning analytical tools include hydraulic and water quality and demand models, and process simulation. Management

and statistical applications include facilities information management, financial, and decision models. Our team has first-hand experience with the City's water and sewer hydraulic models, natural gas model, and wastewater treatment process models as part of the LCU 2023 Integrated Utilities Master Plan project.

Water and Sanitary Conveyance Facilities

Eastern New Mexico Rural Water System 33-inch-diameter FW2

Jacobs has decades of experience with conveyance system planning, design, and construction management on pipelines, pump stations, and related infrastructure facilities for municipalities throughout New Mexico and the surrounding states. We offer full-service pipeline capabilities (hydraulic and surge modeling, route evaluations, pipeline design, coordination of rights-of-way and easements, odor control/ corrosion engineering, construction impact analysis, and cost estimating) through a single entity. Our experience with pipeline materials includes steel, concrete, high density polyethylene, polyvinyl chloride, and ductile iron pipe.

Jacobs developed an expedited design of the Alburquerque Bernalillo County Water Utility Authority (ABCWUA) Raw Water Transmission Pipeline (7 miles of 16-inch and 20-inch ductile iron pipe). Two bid packages were accelerated to complete construction by May 2022 to comply with AMAFCA's moratorium requirements for when work could be completed in major drainage channels and to accommodate Albuquerque's Westside Widening Project. Jacobs is also currently managing the design and overseeing construction of the Eastern New Mexico Rural Water System. The project will provide up to 16,415 acre-feet per year to the cities of Clovis, Portales, Texico, the town of Elida, and Cannon Air Force Base. The project includes a raw water intake structure, three pump stations and about 130 miles of water conveyance pipelines. About 90 miles of the pipeline have been designed or are in design, 20 miles are under construction, and 20 miles have been constructed. The pump stations are currently being designed.

Pump and Lift Stations. We have designed pump and lift stations throughout the United States with capacities from 500 gpm to 600 mgd and 10 to 66,000 horsepower (hp). Most recently, we completed the design of the Cutter Lateral WTP Treated Water Pump Station (near Bloomfield, NM), rated at 810 gpm and 420 feet head (4 vertical turbine pumps). We offer expertise in the configuration of pumping systems, vacuum systems, and mechanical equipment selection. For the ABCWUA, Jacobs is completing the new Tijeras Reuse Reservoir and Pump Station that includes transmission piping, a new pumping facility, reuse water reservoirs, and a chlorination facility.

Condition Assessment and Rehabilitation Services (CARS). Jacobs' CARS team has completed more than 500 pipeline evaluation and rehabilitation programs throughout the world. We are experienced in advanced inspection, assessment, and rehabilitation services to address aging and damaged wastewater infrastructure by applying advanced technologies to accurately assess condition and determine cost-effective repair, rehabilitation, and replacement solutions. Jacobs recently conducted a stepwise Condition Assessment Study (CAS) of El Paso Water's parallel/dual force mains. The study evaluated the high consequences of failure for the total length of the wastewater force mains (3.6 miles of 30-, 36-, and 42-inch-diameter steel pipeline). Based on the CAS, El Paso Water decided to replace the entire force main.

Non-Potable or Reuse Treatment Facility Unit Process

We are a worldwide leader in the innovation and application of reuse technology and have a proven track record of creating water reuse projects that are implemented with full acceptance of stakeholders – public and regulatory. We have been pioneers in helping clients develop and implement reuse programs for over 50 years. We designed the North I-25 Reclamation/Reuse System Non-potable Surface Water Projects for the ABCWUA. Joel Rife, our lead for wastewater treatment, has worked on reuse projects throughout New Mexico including the Rio Rancho WWTP's #2, #5, and #6 non-potable systems; Las Cruces Eastside Water Reclamation Plant; and the Cities of Clovis, Hobbs, and Gallup non-potable water systems.

Agenda Item #7.2

Wastewater Treatment Facility Unit Process

We have planned, designed, and constructed 2,000 facilities worldwide using both conventional and innovative treatment processes, including projects for the Cities of Bloomfield, Las Campanas, Las Cruces, and Gallup; Cannon Air Force Base; and the Albuquerque Bernalillo County Water Authority. We have built our reputation by meeting client needs, working through complex issues, and exceeding client's expectations. The WWTPs that we plan, design, construct, and operate meet stringent performance standards for water reclamation, reuse, biosolids handling, and discharge.

Headworks Operations at the JHWWTF

ABCWUA UV Basin Construction

Our experience includes the whole range of engineering expertise needed to design and build wastewater treatment facilities, including conveyance, plant design, water resource recovery, nutrient removal, odor control, UV disinfection, digesters, dissolved air flotation, and SCADA. Joel Rife has more than 42 years of experience in water resource recovery treatment plant design and operation. Joel was key to evaluating the existing wastewater treatment facilities and developing projects for the LCU 2023 Utilities Master Plan. He has also provided treatment plant reviews and operator training to assist the operators of the facilities.

Locally Jacobs completed the JHWWTF Reinvestment Project – Phase 1 that included replacing the aeration basin gates. This project required taking the basins out of service while maintaining operations and meeting permit requirements. We also successfully implemented a magnesium hydroxide feed for odor control and process improvements in the City's wastewater collection system.

Water Treatment

In the past 15 years, we have completed feasibility studies and designs for thousands of drinking water production and treatment facilities. Locally, Jacobs has completed the final design of the Albuquerque San Juan Chama Drinking Water Plant as part of the Water Resources Program, the Buckman Direct Diversion Project, the Cutter Lateral Surface Water Treatment Plant, and Farmington Water Treatment Plants #1 and #2 Major Upgrades. In addition, Robert Fowlie has managed the design of numerous groundwater treatment facilities in New Mexico including five arsenic treatment facilities in Dona Ana County and six arsenic treatment facilities in the Albuquerque area; and managed the design and construction of New Mexico's first municipal brackish groundwater treatment plant in Alamogordo, NM.

Natural Gas

Jacobs provides full-service design capabilities for natural gas systems, including environmental, engineering, and design services on projects totaling more than 7,500 miles of new, existing, and proposed gas pipelines. We routinely design gas collection, processing, compression, and clean-up systems and gas distribution and network modelling. Jacobs recently worked with the City and Brad Bean of B3PE to assess and model the City's natural gas system as part of the LCU 2023 Utilities Master Plan.

SCADA Control and Data Acquisition

Jacobs provides a full spectrum of professional services, including leading comprehensive SCADA upgrades for critical water systems, treatment plants, and infrastructure. We have designed and delivered SCADA systems for over 70 years. We are currently the largest systems integrator in the United States focused on the water and wastewater market. Our controls systems staff have delivered a broad range of projects encompassing SCADA system design and application programming – in the last 10 years, we have completed more than 300 SCADA and telemetry projects. Jacobs completed an analysis of existing control systems at the City's JHWWTF comparing existing conditions with industry standards for communication protocols, cybersecurity, network architectures, controllers, and SCADA software, and prepared a preliminary design report.

Jacobs has also provided SCADA services since 2002 for the City of Rio Rancho. Recent work includes installation, integration, configuration, and testing of new Nutanix and DMZ hardware/software into the water/wastewater Industrial Control System (ICS). Jacobs also

completed the development, planning, and completion of numerous projects for the City of Farmington's water and wastewater facilities. Services included asset assessment, identification/prioritization of critical sites that needed upgrades or repairs, development of an implementation plan and design of the upgrades and repairs including site security, controls, and automation.

Master Planning and Feasibility Studies

Jacobs has extensive experience in master planning for utilities. We are in the final steps of completing a comprehensive utilities master plan document that evaluates the City's utilities and provides a "roadmap" for identifying, budgeting, and scheduling improvements for the City that aligns with the 2020 Elevate Las Cruces Plan. We have partnered with the City in the development of the City's Transite Pipeline Master Plan, the Surface Water Feasibility Study, and the LCU 2023 Utilities Master Plan. Our approach to master planning and feasibility studies includes working closely with you to distinguish the relationships and trade-offs between sophisticated operations and capital investments and the vital role that planning and analysis play in creating and maintaining a reliable and efficient system.

Solid Waste Studies

Our comprehensive, integrated approach to waste management enables us to create and deliver customized solutions to meet our clients' specific needs. We help clients and their communities operate more efficiently, achieve cost savings, better manage risk, improve quality of life, and improve their social, economic, and environmental position. Our services include solid waste planning, sustainability and climate change consulting, waste transfer and processing, conversion technologies, landfill development and closure, landfill gas, leachate, and operations analysis. Jacobs has provided services to the South Central Solid Waste Authority (SCSWA) since 2018 including design, construction, and operation/maintenance of the Corralito's Landfill Gas Collection and Control system, Title V permitting, and surface emission monitoring.

Land Use Planning

Jacobs provides land use planning services across the United States. We believe the planning process is as important as the final plan itself. A well-defined, open, and inclusive planning process naturally builds public support. Planning with the community takes time; however, investing in engagement builds community support and removes primary impediments to plan implementation. Our approach—coupled with creative thinking, thoughtful analyses, and a focus on the triple-bottom line—delivers a suite of actionable and measurable goals, enabling us to envision flexible solutions.

Subsurface Utility Exploration

Comprehensive SUE services are critical to reducing incidents of lost service and damage caused by cut cables or damaged pipelines during construction. Jacobs will sub these services to Cobb Fendley who has extensive experience in identifying utility locations, potential utility conflicts, field conditions, time constraints, and budget impacts.

Boundary/Easement Surveying, Mapping, and **Geographic Information System Services**

Surveying services include photocontrol; cadastral; geodetic; route; topographic; property or site surveys; right-of-way; construction; and natural or cultural resource location surveys. Our geospatial mapping services include flight planning, aerial photo acquisition, aerial triangulation, digital terrain modeling (LIDAR [laser radar] and photogrammetric), digital orthophoto production, remote sensing, and topographic and planimetric mapping. We have developed and implemented custom geographic information system operation and maintenance programs to efficiently inventory, map, model, and manage capital assets.

National Pollutant Discharge Elimination System (NPDES and **Stormwater Pollution Prevention** Plan (SWPPP) and Environmental Surveys and Assessments

An essential part of all projects is a review of potential regulatory issues affecting project implementation. We actively remain current on regulations, maintain extensive databases of regulations, and actively participate at the federal, state, and local levels in developing and improving existing regulatory frameworks. We assist our clients in meeting their regulatory mandates by preparing NPDES permit

applications, Groundwater Discharge permit applications, compliance with Stormwater Pollution Prevention Plans, local and state permits, land use permitting, and serving as the liaison to federal, state, and local agencies. We have a proven record of successfully negotiating favorable permit conditions with regulatory agencies. Our staff also perform rigorous reviews and analyses to demonstrate our clients' compliance with numerous diverse regulations. We provide in-house planning and regulatory compliance expertise for all levels of documentation that meet the criteria for categorical exclusions, environmental assessments, and environmental impact statements. We are an industry leader in environmental services ranging from initial investigations through cleanup and site closure. We have worked extensively with New Mexico and federal agencies to produce environmental documents.

Electrical Design

We are a full-service provider of electrical design for the support of facility and process designs. This experience includes the design of completely new power systems as well as the design of renovations to and additional components to be integrated into existing systems. For all our designs, we pay special attention to power distribution, electrical efficiency, and control strategies for fail-safe operation, ensuring that electrical systems are designed to the latest codes.

Computer Network Analysis

Please see page 3 for details on our capabilities.

Solid Waste Studies and Landfill System Design and Analysis

Please see page 6 for details on our capabilities.

Environmental Surveys and Assessments

Please see the "National Pollutant Discharge Elimination System" subsection above for details on our capabilities.

Geotechnical Assessments

We maintain a strong geotechnical discipline and have the capability to provide services in foundation, underground embankment, earth retention, and ground control engineering.

Expert Witness Testimony

From time-to-time Jacobs is asked to provide Expert Witness consulting services that may be used to support arguments in an adversarial process. Our business model is relationship focused and because of the wide and diverse nature of our business, we typically do not take on expert witness assignments, although there are exceptions depending on the topic and client.

Project Management

Our project and task management approach is based on lessons learned from decades of successful project delivery. Our project managers are trained in these core functions: planning, organizing, motivating, directing, and controlling, resulting in projects that are completed on time and within budget while meeting or exceeding the expectations of our clients and Jacobs. Our project and task managers will work closely with your staff, as appropriate, to define the scope and goals of the project and identify the right technical resources for the project. Our project managers will proactively control scope, schedule, cost, and quality.

Our staff understand the importance of consistent and open communication and managing expectations. One way to maintain communications during the project is to have regularly scheduled check-in calls between the City's project manager and our project manager. These check-ins highlight the status of current work in progress, along with schedule and budget status. Monthly reports accompanying invoices provide additional communication of the project status. Clear communication and responsive expertise supports informed and timely decision making. All project management work performed by Jacobs follows the guidance in Jacobs' Business Management System, which includes project execution plans, project controls, schedule development, quality control, and project closeout.

Construction at Roberto Bustamonte WWTP in El Paso, TX

Construction Management and Inspection

We have over 1500 construction managers, inspectors, estimators, schedulers, claims mitigation specialists, and certified value specialists. Our proven ability to effectively manage construction services and resources helps our clients complete their projects

faster, better, and more cost-effectively. Our construction management system has a proven history of delivering services to clients in New Mexico and El Paso.

Additional Support Services

As a global leader in full-service engineering, procurement, construction, and operations, we deliver innovative, practical, sustainable solutions to help our clients develop and manage facilities and infrastructure that enhance quality of life.

Odor Control: To address collection system odor problems, we are providing odor control master planning services for the ABCWUA and City of Rio Rancho. The ABCWUA master plan established acceptable odor and corrosion impacts, determined odor impacts and corrosion rates, evaluated control alternatives including a range of vapor and liquid phase technologies, and established design criteria for recommended alternatives. Using the Wastewater Aerobic/Anaerobic Transformation in Sewers to identify opportunities to improve current treatments and develop treatment alternatives, one project alone reduced odor chemical treatment costs by $300,000 per year.

Jacobs recently completed the Rio Rancho Odor Control Study, which focused on developing a holistic approach that links collection system and plant models to finding optimum solutions that address odor problems.

Emergency Response Planning and Training: We have an experienced staff needed to address the City's emergency preparedness. Recently, we updated the City's Water and Sewer Vulnerability Assessment and Emergency Response Plan (ERP) to meet current and emerging regulations and guidelines. We provided training to City staff on the newly developed ERP and how to implement them in the event of an emergency.

Operations Support: We provided operations support to the City including process optimization, review of O&M standards, development of performance metric tracking, cost optimization opportunities, and operator training. We are uniquely positioned to assist the City with operations support from our 200 O&M staff in New Mexico.

Physical and Cyber Security: Jacobs' approach to security is the same regardless of the market or business our clients operate. The cornerstone of our delivery is to use a "risk-based approach" when designing measures to protect our clients and their assets.

Asset Management (AM): Aging infrastructure, regulatory compliance, and natural disasters will continually present challenges to the City. Our team can meet these challenges by providing proactive planning and support as well as mitigation and restoration following the failure of key assets and infrastructure. Jacobs recently conducted workshops/interviews with City staff and developed a level of understanding of the AM capabilities and future goals for the City.

Architecture and Engineering Discipline Planning and Design: Our architects and structural engineers offer planning, design, and construction experience on a variety of projects, ranging from office buildings to industrial and utility buildings. We focus on concerns for cost, safety, aesthetics, dependability, and environmental sensitivity. Our architects and structural engineers use several programs for plants, buildings, or other types of design and analysis.

Our mechanical engineers routinely design plans and specifications for mechanical, heating, ventilation, and air-conditioning and fire protection systems. Our experience encompasses process systems, pumping and chemical feed systems, building services, natural gas system distribution systems, and support for all types of projects.

Our site, civil, and drainage engineers have completed studies and designs for a wide range of facilities, roads, and structures. This includes drainage studies to model and analyze major and minor storm drainage. Civil site studies and design services include site boundaries, site access, roadways, parking, stormwater management provisions, yard piping interconnection points, and layout of utilities (buried and overhead).

D. Typical Project Schedule /Timeline

We prepare two separate schedules using Microsoft Project or other scheduling tools: the target (or control) and the working schedule. The target schedule will be the baseline schedule established at the beginning of a task. A working schedule will also be maintained that documents performance to date and predicts future events. The schedule will be updated routinely and reviewed by the City's project manager to adjust for issues that impact the schedule.

2. Qualifications / Competence

Our team consists of many of the same staff who have worked effectively with you for years, including Robert Fowlie, Joel Rife, Allena Fernandez, Allie Arning, Jen Henke, Lela Perkins, and Fair Yeager. They also have extensive experience working together in the planning, design, and construction of utility infrastructure projects in New Mexico. This team has access to an additional depth of local, in-house multidisciplinary capabilities and specialty services that are available as needed to successfully deliver engineering services under this contract, including the following qualifications:

- A history of experience on similar assignments in New Mexico.
- A strong commitment to customer service, communication, and doing the job right.
- The right staff to meet your project needs.

A. Assigned Key Personnel

Jacobs has assembled a team of experts and specialists to provide the right combination of skills and experience to meet the City's on-call utilities engineering services project goals and objectives. Many members of our proposed project team are familiar to City staff, having worked on previous projects, including the recent LCU 2023 Utilities Master Plan. We know the City's needs, policies, and expectations when executing projects.

Key Staff Experience Summaries

Key staff experience summaries are provided on the following pages. The summaries demonstrate the level of experience and expertise on a variety of local, regional, and national utilities projects. The City will also have access to the expertise of additional engineers and technical specialists from our team's local and regional offices as needed to support the necessary and broad-reaching scope of projects and potential on-call tasks.

key team members

Robert Fowlie, PE, BCEE, will lead the team as Principal Engineer. He is in our Albuquerque office and offers more than 35 years of experience in the planning, design, and construction of water and wastewater systems including treatment plants, booster and lift stations, conveyance pipelines, wells, distribution and conveyance systems, master planning, and funding. Robert has served as the project manager/principal engineer for numerous municipalities in New Mexico, including projects for Las Cruces Utilities and on-call engineering contracts for the Albuquerque Bernalillo County Water Utility Authority; Cities of Alamogordo, Clovis, Portales, and Gallup; Los Alamos County; and the Camino Real Regional Utility Authority as well as El Paso Water, TX. Robert is a licensed professional engineer in New Mexico, Texas, and California. He is also a Board Certified Environmental Engineer in water supply and wastewater.

Joel Rife, PE | Wastewater Lead

Registration: Professional Engineer: NM (#12040), TX (#135692) | 35%; Education: MS, Environmental Health Engineering; BS, Civil Engineering; Years of Experience: 35; Location: Albuquerque

Areas of Competence and Experience:

- Led reuse projects throughout New Mexico including the Rio Rancho WWTP's #2, #5, and #6 non-potable systems; Las Cruces Eastside Water Reclamation Plant; and the Cities of Clovis, Hobbs, and Gallup's non-potable water systems. Broad-based knowledge of water resource recovery process engineering with an emphasis on plant capacity evaluations, biological and chemical nutrient removal, treatment plant modeling, industrial waste treatment, membrane bioreactors, headworks design, primary and secondary sludge processing, and water resource recovery.
- Provided design and construction services for the rehabilitation of the equalization basin influent gate, modifying disinfection controls and removal and replacement of all gates in the east and west aeration basins for the City's JHWWTF.

Allena Fernandez, PE | Wastewater Utilities

Registration: Professional Engineer: NM (#12040), TX (#135692) | 35%; Education: BS, Environmental Engineering; Years of Experience: 19; Location: Albuquerque

Areas of Competence and Experience:

- Leadership of several WWTP and conveyance projects, headworks, bioreactor, disinfection, odor control, and biosolids handling facilities throughout New Mexico and the Southwest, bringing industry best practices. Works with clients to solve collection system odor problems and identify improvements that address hydraulic constraints and water production, and replacement of obsolete treatment processes and upgrades to the existing plant equipment and infrastructure.
- Served as the lead wastewater engineer for the City's Integrated Utilities Master Plan to update the water, wastewater, and gas master plans into a comprehensive utilities master plan and identifies deficiencies, capital projects, and implementation schedules.

Allie Arning, PE | Water/Sewer Modeling

Registration: Professional Engineer: NM (#29097) | 40%; Education: BS/MS, Environmental Engineering; Years of Experience: 5; Location: Albuquerque

Areas of Competence and Experience

- Brings broad-ranging experience in modeling and treatment and conveyance design; field inspection services, scouting and sizing equipment to monitor solids flow; performing trace studies; and working in programs such as ESRI Insights.

Jen Henke, PE | Water/Sewer Modeling and Master Planning/Feasibility Studies

Registration: Professional Engineer: Texas (#92664) | 35%; Education: BS/MS, Civil Engineering; Years of Experience: 5 Location: Dallas, TX

Areas of Competence and Experience:

- Expertise in water distribution planning and hydraulic modeling, potable water treatment, and reliability and redundancy evaluations. Has provided hydraulic modelling and analysis for more than 60 water systems, proficient in numerous software packages.
- Experience leading multi-faceted evaluations of water distribution systems that start with the supply strategy coupled with the overall system operation and customer water delivery to meet operational goals for energy efficiency, system performance, reliability, and water quality.

Joel Ferguson, PE | Solid Waste

Registration: Professional Engineer: NM (#29064) | 40%; Education: BS, Engineering Technology; Years of Experience: 7 Location: Albuquerque

Areas of Competence and Experience:

- Works closely with the South Central Solid Waste Authority Corralito's Landfill operations team in operating and maintaining the gas collection and control system, made up of 25 gas extraction wells and a flare skid system.

Identified problems with the system and collaborated on solutions with the project team, resulting in the resolution of multiple issues that would have jeopardized the operation of the system.

- Has worked closely with the New Mexico Environment Department to understand the various standards and regulations regarding the system and assists team with regular compliance reporting.

Additional Technical Resources

Phil Andrew | Natural Gas Systems	36	BS, Civil Engineering
	Thirty-six years of utility industry program management, process improvement, pipeline design, maintenance, installation, and operation; all acquired while working in various positions and companies within the utility industry.	
Wendy Christofferson, PE | Water Systems	25	BS, Civil Engineer
	Leads multidisciplinary teams on a variety of projects, including pipeline and canal conveyance systems, hydraulic structures, water conservation plans, water and reuse master plans, and site civil design work throughout New Mexico. Professional Engineer: NM (#21975), CO (#38846)	
Ed McDaniel | SCADA	33	United States Navy Electrical and Electronics School and Construction Electrician School
	Involved with water and wastewater utility SCADA and process control for 25 years. Served as the lead Process Control Engineer during design, start-up, commissioning, and operation for the Cutter WTP, Bloomfield, NM.	
Lela Perkins, PE | Master Planning / Feasibility Studies	24	MS, Civil Engineering; BS, Engineering Science
	Specializes in all aspects of water and wastewater planning. Experience focuses on water resources and water and wastewater facility planning, as well as regulatory and permitting issues. Professional Engineer: CO (#36142)	
Fair Yeager, PE | Master Planning / Feasibility Studies	28	MSCE/BSE
	Specializes in management consulting, asset management, integrated water master planning, water resources planning, and hydraulic modeling. Well-versed in GIS and several commercially available hydraulic modeling tools including products from Innovyze, Bentley, and the EPA's EPANET. Professional Engineer: AZ (#35903)	
Robert Boehm, PLS | Surveying	31	BA, Geography
	Extensive surveying and geospatial experience supporting civil infrastructure projects. Solid background in fundamental land surveying tasks, including control, boundary, design, topographic, and photogrammetric surveys. Expertise in GNSS/GPS, terrestrial and mobile laser scanning, robotics, integrated surveys, network adjustments, and automated feature processing. Professional Surveyor: NM (#20063)	

Nancy Ballantyne | NPDES/SWPPP	36	BA, Geology
	Expertise in construction stormwater permitting. Responsible for obtaining the construction stormwater permit for the Cutter Lateral Reach 21 Water Treatment Plant project in San Juan County, NM. Responsible for developing the best management practices, writing the SWPPP, coordinating the Notice of Intent submittal, and providing training to site personnel performing inspections. Certified Inspector of Erosion and Sediment Control (#2505)	
Manica Gupta, PE| Electrical Design	33	BS, Electrical Engineering
	Experienced in electrical and I&C design for water, wastewater, and industrial projects in New Mexico. Electrical design services include medium-voltage power distribution, medium-voltage motor control, utility coordination, and auxiliary electrical systems. I&C design includes P&ID development, specifications, monitoring instruments lists, input/ output lists. Professional Engineer: NM (#24643)	
Nancy Shelton | Environmental Surveys	28	MEP, Natural Resource Management
	Extensive knowledge of NEPA processes, protocols, procedures, and guidelines. Experience preparing environmental clearances, and coordinating and facilitating the overall environmental process, including coordination with local, state, and federal regulatory agencies.	
Dave Curran, PE | Geotechnical Analysis	23	MS, Civil Engineering
	Leadership of geotechnical site investigations, engineering analysis and design, and specification development. Performs reviews for foundations, retaining walls, and subgrade stabilization for treatment and conveyance infrastructure. Professional Engineer: CO (#0041661)	
Miguel Lopez, EIT | Construction Management	5	BS, Civil Engineering; MBA
	Providing construction management services for the Bustamante WWTP Headworks Improvements project for El Paso Water. Working with the contractor to verify that construction is completed per Engineer of Record designs. Located in El Paso, TX. Engineer-in-Training: TX (#72981)	
Bill Peterson | RPR	32	Continuing education classes in construction management
	Providing construction management services for the Bustamante WWTP Headworks Improvements project for El Paso Water. Has led construction management for several large, complex water and wastewater infrastructure projects across the United States. Located in El Paso, TX.	

B. Principal Office/Officer and Subcontractors

The Jacobs Albuquerque office will serve as the principal office located at 3721 Rutledge Road NE, Suite B-1, Albuquerque, New Mexico 87109.

As the Principal Engineer, Robert Fowlie, is authorized to enter into agreements. His contact information is provided in Section A above.

Subcontractors

We have included the following subconsultant firms to provide additional expertise and capacity to our team:

- B3PE – Natural Gas system and modeling
- Cobb Fendley –Subsurface Utility Engineering

C. Location of Offices and Percent of Work to Be Performed at Each

With a staff of 67 employees in New Mexico and El Paso, TX, we provide consulting services from our Albuquerque and El Paso offices. This depth of specialized staff in all required technical disciplines enables us to provide ready access to resources, responsiveness, and avoid staffing conflicts. All planning, design, and construction services will be completed in the Albuquerque and El Paso offices.

We anticipate over 90% of the work performed for this on-call engineering services contract will be managed and completed by staff in our Albuquerque office. We will use technical specialists from El Paso or other Jacobs' offices outside of New Mexico on an as-needed basis.

D. Responsible Professional's Name, Address, NM Registration

Robert Fowlie has a direct line to management support for your project. He is responsible for project delivery and can respond to requests and provide quick access to specialists or resources to meet your on-call needs.

Principal Officer Contact Information:
Robert Fowlie, PE, BCEE, Principal Engineer, Jacobs Engineering Group Inc., 3721 Rutledge Road NE, Suite B-1, Albuquerque, New Mexico 87109, Phone: 505-548-0661, NM PE: #17668.

3. Performance of the Firm

Jacobs has a long history of providing utilities engineering services similar to those described in the RFP for agencies and municipalities throughout New Mexico and the Southwest. Jacobs' project success is based on our ability to respond quickly to project needs, work seamlessly as an extension of the client's team, and bring innovative solutions for projects both large and small.

Three past contracts where Jacobs has provided utilities engineering services similar to the scope described in the RFP are listed below.

South Central Solid Waste Authority (SCSWA) On-Call Services | Las Cruces, NM

Value of Service: Jacobs began working with SCSWA in 2020 (under the Las Cruces Utility On-Call contract) designing the Corralitos Landfill Gas Collection and Control System (GCCS). The GCCS includes 30 monitoring wells and a candlestick flare combustion system. Concurrent with this design, Jacobs supported Title V permitting efforts for the Corralitos Landfill. Following the GCCS design, Jacobs assisted with the subsequent bid administration and services during construction. Jacobs supported commissioning and operation of the GCCS in October 2021. Since that time, Jacobs has assisted SCSWA with the operation and maintenance of the Corralitos Landfill GCCS, performed quarterly surface emission monitoring required by the New Mexico Environment Department and U.S. EPA, and helped to gather various data elements used in supplementing compliance reporting required to operate the landfill. These efforts have helped Jacobs to build an extensive knowledge of the day-to-day operations of the landfill, it's GCCS and flare system, and the various state and federal requirements.

Staff Involved: Joel Ferguson (O&M, emissions monitoring, and compliance reporting)

Reference: Patrick L. Peck, Executive Director, SCSWA, 575-528-3583, ppeck@scswa.net

Engineering On-Call Services | City of Farmington, NM

Value of Service: Jacobs has been providing operating and maintenance services to the City for the past 20+ years including as well as water/wastewater engineering and consulting services. Recent on-call tasks are described below:

- SCADA Improvements at the Water Treatment Facilities: Completed an analysis of the existing control system at the Water Treatment Plants #1 and #2 facilities and implemented the upgrades.
- Water System Risk and Resilience Assessment (RRA) and Emergency Response Plan (ERP): Jacobs recently completed the RRA and subsequent ERP to comply with the America's Water Infrastructure Act of 2018 upgrades.
- Surface Water Resource Improvements: Worked with City staff to develop a plan to rehabilitate the Dam Pump Station. Performed a condition assessment on 10 miles of 30-inch ductile iron pipeline, 42-inch welded steel pipeline, and 30- and 36-inch bar wrapped concrete cylinder pipeline and developed a 5-year plan to complete ongoing improvements to the water supply pipeline.
- Farmington Lake Dam Raise: Completed a study to determine the feasibility of raising the Farmington Lake Dam to increase capacity.

Staff Involved: Allena Fernandez, Allie Arning, Wendy Christofferson, Manika Gupta, David Curran
Reference: Mark E. Hathcock, PE, Water/Wastewater CIP Administrator, Community Works Water/ Wastewater Division, City of Farmington, 505-599-1315 (ofc) 505-215-8553 (cell), mhathcock@fmtn.org

Engineering On-Call Services, Albuquerque Bernalillo County Water Utility Authority | NM

Value of Service: Jacobs has been providing engineering services to the ABCWUA (and its predecessor, the City of Albuquerque Water and Wastewater Divisions) since 1984. Jacobs has provided planning and environmental studies; master planning and computer modeling services; preliminary and final design of water and wastewater facilities; permitting; bid support; construction management; and start-up services. Our recent work includes the following projects:

- Old Coors Interceptor Rehabilitation Design: Jacobs completed design and construction phase services for rehabilitating the Westside Interceptor in Old Coors Road. The project consisted of rehabilitating 5,794 feet of Reinforced Concrete Pipe sanitary sewer ranging in diameter from 36 to 48 inches and 15 manholes. The Westside Interceptor conveys the City's wastewater from the west side of Albuquerque to the Southside Water Reclamation Plant. Flows in this segment of the Westside Interceptor are about 15 MGD. The interceptor was rehabilitated using a cured in place liner (Insitu-Form) and required development of an extensive bypass pumping plan and coordination with affected residences and businesses.
- Raw Water Pipeline to Industrial User: Jacobs completed design and construction phase services for about 5 miles of 20-inch transmission main and 1.3 miles of 16-inch transmission main to convey raw water from two of the ABCWUA's wells to an industrial user. The project also included ancillary facilities (control buildings, raw water storage, SCADA, and I&C) related to the operation of the pipeline. Jacobs divided the project into three bid packages to facilitate construction and completed the first phase in Westside Boulevard on an expedited schedule to take advantage of a 90-day period the City allowed for construction of the pipeline.
- Odor Control Master Plan for Wastewater Collection System and Treatment Plant: Jacobs completed an Odor Control Master Plan for the Wastewater Collection System and updated the odor control plan for the Southside Water Reclamation Plant (SWRP). The Odor Control Master Plan evaluated odor impacts and corrosion rates in the collection system, odor control alternatives

included a range of vapor and liquid phase technologies, and established design criteria for recommended alternatives. Jacobs also created a Wastewater Aerobic/Anaerobic Transformation in Sewers (WATS) model as the key analysis tool for the project. Jacobs also updated the Odor Control Plan for SWRP. The scope of this odor control plan update included evaluating liquid treatment costs at the headworks and using a more cost-effective technology (vapor phase technology) for odor control; evaluating air ducting and balancing; and updating the existing air dispersion model to include scenarios representing previous improvements and recommended improvements from the updated odor control plan. Jacobs is continuing to provide these services under our existing on-call engineering services contract with the ABCWUA.

- Integrated Infrastructure Plan (IIP): Jacobs has been working with the ABCWUA to develop an IIP for water, wastewater, and reclaimed water systems. The IIP proposes that the water, wastewater, and reuse systems be integrated in sizing and location of new infrastructure to meet the ABCWUA's needs efficiently and effectively.
- Water and Reuse System Models: Jacobs developed water and reuse system models that were used in conjunction with the ABCWUA's sewer model to evaluate and integrate the three systems to develop proposed improvements that the ABCWUA may consider in their future planning and design efforts. The drivers for proposed improvements include existing deficiencies and growth that triggers a capacity constraint in the system, affects the capacity of the system, or impacts water supply or treatment. Jacobs is continuing to provide water and reuse water model training and support to the ABCWUA's staff.
- Tijeras Reuse Reservoir and Pump Station: The ABCWUA is planning to deliver reuse water from the Southside Water Reclamation Plant Reuse Pump Station to the Mesa del Sol Development for irrigation and industrial use. The project includes transmission piping, a new pumping facility, reuse water reservoirs, and a chlorination facility. Services requested by the ABCWUA are for this project's design and bidding phase services.

Staff Involved: Robert Fowlie, Joel Rife, Allena Fernandez, Allie Arning, Jen Henke, Manika Gupta, Wendy Christofferson, David Curran, Robert Boehm

CITY OF LAS CRUCES

PROJECT ASSIGNMENT AGREEMENT

23-24-052 UTILITIES ENGINEERING SERVICES

PROJECT NAME

Pursuant to terms and conditions of City of Las Cruces (CITY) Contract No. 23-24-052 dated June 1, 2024 between the CITY and Jacobs Engineering Group, Inc. (ENGINEER), as amended and incorporated herein by reference, the City and Contractor hereby agree on this _____ day of _____, 20___, as follows:

1. In a satisfactory and proper manner, the ENGINEER shall perform SERVICES as proposed in response to the CITY's RFP No. 23-24-052 and ENGINEER's proposal as set forth in ATTACHMENT A attached hereto.

2. The estimated completion date is number days after a Notice to Proceed is issued by the CITY to the ENGINEER.

3. In consideration for the satisfactory completion of the work agreed to herein, compensation shall be made in the amount of $dollars.cents, plus NMGRT. Invoices issued by the ENGINEER shall be made monthly / upon completion of project with payment by the CITY being made within 30 days upon receipt of undisputed invoice.

EXHIBIT "G"

CITY OF LAS CRUCES

PROFESSIONAL SERVICES AGREEMENT

THIS AGREEMENT, made and entered into on this _____ day of _____, 2024 by and between the City of Las Cruces, New Mexico, hereinafter called “CITY” and Johnson, Mirmiran, & Thompson, Inc., of 40 Wight Ave, Hunt Valley, MD, 21030, hereinafter called “CONTRACTOR”.

1. PROJECT DESCRIPTION
Utilities Engineering Services on an as needed basis via Project Assignment Agreements (Attachment “A”) during the term of this AGREEMENT.

2. SCOPE OF SERVICES
In a satisfactory and proper manner, the CONTRACTOR shall perform SERVICES, as proposed in response to the CITY’S RFP No. 23-24-052, as set forth in Exhibit A, attached hereto and made a part of this Agreement.

The CONTRACTOR is authorized to extend the same terms and conditions of this Agreement to other governmental entities conditioned upon the procurement laws and regulations of those entities. The CITY shall not be a party nor have any liability relating to such extensions.

3. APPROPRIATIONS
The terms of this Agreement are contingent on sufficient appropriations and authorization being made by the City Council for the performance of this Agreement. If sufficient appropriations and authorizations are not made by the City Council, this Agreement shall terminate upon written notice given by the CITY to CONTRACTOR. The CITY’S decision as to whether sufficient appropriations and authorizations exist shall be accepted by CONTRACTOR and shall be final.

4. COMPENSATION
The CITY shall compensate CONTRACTOR for the performance of SERVICES under this Agreement an amount agreed to for each assigned project, plus applicable taxes. CONTRACTOR shall perform the SERVICES upon receipt of a purchase order or written Notice to Proceed for each assigned project from the CITY. The CITY cannot authorize costs to be incurred prior to such written Notice to Proceed. CONTRACTOR shall submit invoices upon completion of the project. CITY shall pay invoices Net 30 days upon receipt of undisputed invoice.

CONTRACTOR is responsible for payment of State of New Mexico Gross Receipts Tax levied on the amounts payable under this Agreement. CONTRACTOR agrees to comply with all federal and state tax payments and report all items of gross receipts as income from the operations of its business.

5. DEVOTION OF ADEQUATE TIME
CONTRACTOR will devote the necessary hours each week to the performance of projects that are required by the CITY and it will serve the CITY diligently and faithfully,

and according to its best ability in all respects and will promote the best interests of the CITY.

6. TERM AND SCHEDULE
This Agreement shall become effective on June 1, 2024 for a term of 5 years through May 31, 2029.

CONTRACTOR shall perform the SERVICES in accordance with the time set forth as agreed upon by the CITY and CONTRACTOR and as agreed to for each project assigned under the terms of this Agreement.

7. EXTENSIONS, CHANGES, AND AMENDMENTS
This Agreement shall not be extended, changed, or amended except by instrument in writing executed by the parties. The CITY shall not be liable for payment of any extra services nor shall CONTRACTOR be obligated to perform any extra services except upon such written agreement. Such written approval shall indicate the date said extension, change, or amendment is effective and shall be signed by the parties to this Agreement. In the event that the parties cannot reach agreement as to a particular change, the issue shall be resolved pursuant to Article 21.

8. CHANGES AND EXTRA SERVICES BY THE CITY
The CITY may make changes within the general scope of the SERVICES plus may also request CONTRACTOR to perform other extra services not incorporated within the Services set forth in this Agreement. If the CONTRACTOR is of the opinion that such change causes an increase or decrease in the cost and/or the time required for performing the changes or other services required by the City, CONTRACTOR shall so notify the CITY of that fact within five (5) business work days from the date of receipt of change by the CITY. The CITY shall provide written response to the CONTRACTOR within five (5) business work days from the date of receipt of CONTRACTOR'S written notification.

9. CHANGES AND EXTRA SERVICES BY THE CONTRACTOR
In the event a condition is identified by the CONTRACTOR which, in the opinion of the CONTRACTOR, changes the services, costs, and/or time required for performance under this Agreement, the CONTRACTOR shall provide written notification to the CITY within five (5) business work days of such identification. The CITY shall respond in writing to such notification within five (5) business work days from the date of receipt of CONTRACTOR'S notification.

10. DELAYS
In the event that performance of SERVICES is delayed by causes beyond reasonable control of CONTRACTOR, and without the fault or negligence of CONTRACTOR, the time and total compensation for the performance of the SERVICES may be equitably adjusted by written agreement to reflect the extent of such delay. CONTRACTOR shall provide the CITY with written notice of delay pursuant to Article 9 including therein a description of the delay and the steps contemplated or actually taken by

CONTRACTOR to mitigate the effect of such delay. The CITY will make the final determination as to reasonableness of delays.

11. TERMINATION
This Agreement may be terminated by either party hereto upon fifteen (15) calendar days written notice in the event of substantial failure by the other party to perform in accordance with the terms of this Agreement through no fault of the terminating party. This Agreement may also be terminated by the CITY for its convenience or because the PROJECT has been permanently abandoned, but only upon fifteen (15) calendar days written notice to CONTRACTOR.

In the event of termination, CONTRACTOR shall be compensated for all services performed and costs incurred up to the effective date of termination for which CONTRACTOR has not been previously compensated.

Upon receipt of notice of termination from the CITY, CONTRACTOR shall discontinue the SERVICES unless otherwise directed and upon final payment from the CITY deliver to the CITY the required number of copies of all data, drawings, reports, estimates, summaries, and such other information and materials as may have been accumulated by CONTRACTOR in the performance of this Agreement, whether completed or in process.

12. RECORDS AND AUDITS
CONTRACTOR will maintain records indicating dates, length of time, and services rendered. The CITY has the right to audit billings both before and after payment, and contest any billing or portion thereof. Payment under this Agreement does not foreclose the CITY'S right to recover excessive or illegal payments. CONTRACTOR will retain records for five (5) years after the completion of the project.

13. DISCLOSURE AND OWNERSHIP OF DOCUMENTS, PRODUCTS, DESIGN, ELECTRONIC FILES
All technical data, electronic files, and other written and oral information not in the public domain or not previously known, and all information, electronic files, and data obtained, developed, or supplied by the CITY will be kept confidential and CONTRACTOR will not disclose to any other party, directly or indirectly, without the CITY'S prior written consent unless required by lawful order.

All technical data, electronic files, products developed, operational parameters, blueprints, and other information and work of the CONTRACTOR shall be the sole property of the CITY and shall be delivered to the CITY when requested and at the end of the Agreement.

14. INDEPENDENT CONTRACTOR
CONTRACTOR represents that it has, or will secure, at its own expense, all personnel required in performing the SERVICES under this Agreement. Such personnel shall not be employees of, nor have any contractual relationship with the CITY. CONTRACTOR,

consistent with its status as an independent contractor, further agrees that its personnel will not hold themselves out as, nor claim to be officers or employees of the CITY by reason of this Agreement.

To the extent that CONTRACTOR employs any employees, CONTRACTOR shall be solely responsible for providing its own form of insurance for its employees and in no event shall CONTRACTOR's employees be covered under any policy of the CITY.

CONTRACTOR'S retention hereunder is not exclusive. Subject to the terms and provisions of this Agreement: (i) CONTRACTOR is able, during the Term hereof, to perform services for other parties; and (ii) CONTRACTOR may perform for its own account other professional services outside the scope of this Agreement.

CONTRACTOR is and shall be an Independent Contractor and shall be responsible for the management of its business affairs. In the performance of the work under this Agreement, CONTRACTOR will at all times be acting and performing as an Independent Contractor, as that term is understood for federal and state law purposes, and not as an employee of the CITY. Without limitation upon the foregoing, CONTRACTOR shall not accrue sick leave, jury duty pay, retirement, insurance, bonding, welfare benefits, or any other benefits, which may or may not be afforded employees of the CITY. CONTRACTOR will not be treated as an employee for purposes of: Workers' Compensation benefits; the Federal Unemployment Tax Act; Social Security; other payroll taxes, federal or any state income tax withholding; or the employee benefit provisions described in the Internal Revenue Code of 1986, as amended. Neither the CITY, nor its agents or representatives, shall have the right to control or direct the manner, details or means by which CONTRACTOR accomplishes and performs its services. Nevertheless, CONTRACTOR shall be bound to fulfill the duties and responsibilities contained in the Agreement.

15. NO JOINT VENTURE OR PARTNERSHIP

Nothing contained in this Agreement shall create any partnership, association, joint venture, fiduciary or agency relationship between CONTRACTOR and CITY. Except as otherwise specifically set forth herein, neither CONTRACTOR nor CITY shall be authorized or empowered to make any representation or commitment or to perform any act which shall be binding on the other unless expressly authorized or empowered in writing.

16. ASSIGNMENT

CONTRACTOR shall perform all the services under this Agreement and shall not assign any interest in this Agreement or transfer any interest in same or assign any claims for money due or to become due under this Agreement without the prior written consent of the CITY.

17. INSURANCE
CONTRACTOR shall obtain and maintain insurance at its own cost and expense during the life of this Agreement, and shall require Subcontractors, if any, to maintain during the life of his subcontract:

1. Commercial General Liability Insurance
   a. $1,000,000 per occurrence / $2,000,000 aggregate
   b. Coverage must include premises and operations, products and completed operations, and personal and advertising injury.
   c. The City of Las Cruces must be named as an Additional Insured for all coverages listed above on endorsements acceptable to the City.
   d. Coverage must be primary and non-contributory.
   e. Coverage must be per project or per location.
   f. Coverage must be on an occurrence form.
   g. Subrogation must be waived.
2. Commercial Auto Liability
   a. $1,000,000 per occurrence
   b. Coverage must be for “owned, leased, hired, and non-owned autos” or “any autos.”
3. Workers’ Compensation and Employers Liability
   a. Statutory Limits
   b. Employer liability – $1,000,000 each accident, $1,000,000 each employee by disease, $1,000,000 policy limit
   c. Subrogation must be waived.
4. Professional Liability: $1,000,000 per claim

Endorsements for additional insured coverage and waivers of subrogation must be provided as a condition of this Agreement and shall be noted on the certificate.

CONTRACTOR shall furnish the CITY with a certificate(s) of insurance showing CONTRACTOR and Subcontractors, if any, have complied with this Article. The CONTRACTOR shall provide insurance certificates before work is to start on the project and shall provide the CITY thirty (30) days written notification of cancellation of such policies.

18. INDEMNITY AND LIMITATION
CONTRACTOR shall indemnify, defend, and hold harmless the CITY from and against any and all claims, suits, actions, judgments, demands, losses, costs, expenses, damages, and liability caused in whole or in part by, resulting in whole or in part from, or arising in whole or in part out of the negligent acts, errors, or omissions of CONTRACTOR, its officers, employees, agents, or representatives in the performance of SERVICES under this agreement.

19. APPLICABLE LAW
This Agreement and the rights and obligations of the parties shall be governed by and construed by the laws of the State of New Mexico applicable to Agreements between

New Mexico parties made and performed in that state, without regard to conflicts of law principles. Venue shall be in the Third Judicial District, State of New Mexico.

CONTRACTOR shall abide and be governed by all applicable state law, CITY ordinances, and laws regarding the CONTRACTOR'S services or any work done pursuant to this Agreement, including anti-discrimination.

20. BREACH
In the event CONTRACTOR breaches any obligation contained in this Agreement, prior to instituting any action or dispute resolution procedure, the CITY shall give CONTRACTOR written notice of such breach. In the event CONTRACTOR fails to remedy the breach within five (5) working days of receiving such written notice, the CITY, at its sole discretion, without any obligation to do so and in addition to other remedies available under applicable law, may remedy CONTRACTOR'S breach and recover any and all costs and expenses in so doing from CONTRACTOR.

21. DISPUTE RESOLUTION
In the event that a dispute arises between CITY and CONTRACTOR under this Agreement or as a result of breach of this Agreement, the parties agree to act in good faith to attempt to resolve the dispute.

22. NOTIFICATION
All notices required or permitted under this Agreement shall be in writing and shall be deemed sufficiently served if served by Registered Mail addressed as follows:

TO CITY:	City of Las Cruces PO Box 20000 Las Cruces, NM 88004 ATTENTION: Tony Trevino
With Copies to:	City Attorney Purchasing Manager
TO CONTRACTOR:	Johnson, Mirmiran, & Thompson, Inc. 40 Wight Ave Hunt Valley, MD 21030 ATTENTION: Melchor Herrera

23. SCOPE OF AGREEMENT
This Agreement incorporates all of the agreements, covenants, and understandings between the parties hereto concerning the subject matter hereof and that all such covenants, agreements, and understandings have been merged into this written agreement. No prior agreement or understanding verbal or otherwise of the parties or their agents shall be valid or enforceable unless embodied in this agreement.

24. SEVERABILITY
The parties agree that each provision of this Agreement is severable and the invalidity or unenforceability of any one or more of the provisions of this Agreement shall not affect the validity or enforceability of any other provision of this Agreement, and this Agreement shall be construed in all respects as if such invalid or unenforceable provisions were omitted.

25. CONFLICT OF INTEREST
CONTRACTOR represents and warrants that CONTRACTOR has no business, professional, personal, or other interest, including, but not limited to, the representation of other clients, that would conflict in any manner or degree with the performance of its obligations under this Agreement. If any such actual or potential conflict of interest arises under this Agreement, CONTRACTOR shall immediately inform the CITY in writing of such conflict. If, in the reasonable judgement of the CITY, such conflict poses a conflict to and with the performance of CONTRACTOR'S obligations under this Agreement, or is otherwise a violation of the CITY'S current policy or ordinances, then the CITY may terminate the Agreement immediately upon written notice to CONTRACTOR; such termination of the Agreement shall be effective upon the receipt of such notice by CONTRACTOR.

EXHIBIT A
SERVICES

A. Project Assignments
A Project assignment is initiated by the City providing the selected Engineer a detailed project description, including scope of work and any other special instructions needed by the Engineer to prepare items such as preliminary and final cost estimates, complete project plans and specifications, project reports, and other related engineering services. The awarded Engineers shall provide engineering services that may include but not be limited to, the following:
1. Computer network analyses for water, wastewater, and gas systems; design of water, wastewater, and gas utility systems; well house design; Supervisory Control and Data Acquisition (SCADA); water treatment process; master planning; feasibility studies; solid waste studies; land use permitting; subsurface utility exploration; boundary/easement survey; and National Pollutant Discharge Elimination System (NPDES) & Stormwater Pollution Prevention Plan (SWPPP) compliance.
2. Electrical design (wells, booster stations, lift stations, odor control stations, building electrical system design)
3. Computer network analysis for Gas (GasWork), Water (InfoWater), and Wastewater (InfoSewer). The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility
4. Solid waste studies, landfill system design and analysis
5. Environmental surveys, assessments monitoring and management, such as indoor air quality, asbestos, mold, and other related services for the City
6. Geotechnical Assessments, such as soil and groundwater testing for contamination and remediation, and other related services for the City
7. Expert witness in a judicial and/or quasi-judicial setting.
8. Project Management
9. Construction Inspection.

B. Project Assignment Agreements
A Project Assignment Agreement (a template of which is incorporated herein as ATTACHMENT “A”) will be negotiated and executed on a case-by-case basis for each specific project, and will include a cost proposal from the Engineering firm(s) proposing to do the work. The cost proposal may utilize one of the following pricing formats:
1. Lump Sum
2. Unit pricing to include:
    a. Hourly rate for various types of services requested by the City
    b. Charges for miscellaneous items such as blueprints, data, discs, rental of special equipment, etc.
    c. A statement of the billing procedures including minimum billing units, if any.
    d. Cost of sub-consultants (if any)
3. An alternative unit cost breakdown

C. Deliverables
Each project contract will require a list of deliverables, schedule/timeline and cost. The

Engineer may be required to supply to the City an of the following items, when specified and as requested on the Scope of Work for each individual project.

1. Preliminary report containing schedule of work and cost estimate.
2. Construction drawings and documents. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility. Provide hard copies and PDF format of the construction plans for Purchasing Section use.
   a. As-built drawings on electronic media and reproducible prints. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. All horizontal and vertical location datum information shall be coordinated with the City Surveyor. The utility location information shall be tied to project control monuments and referenced to project construction stationing. The project control survey shall be certified by a New Mexico Registered Land Surveyor. Metadata or “data about the data” shall be submitted with each as-built electronic file, preferably as a separate text file on the electronic submittal media, and shall include:
      - Name, address and phone number of the responsible land surveyor.
      - Date of completion of survey.
      - Equipment used to conduct the survey.
      - Horizontal and vertical control marks used to tie the survey to the City approved control.
      - Transformation factors needed to reduce Ground (local coordinate system) to Grid and combined scale factor used.
   b. “RECORD DRAWINGS” shall be clearly labeled on each sheet.
3. Computer network analysis for gas, water, and wastewater shall be provided to the City in appropriate electronic format. It shall include the entire model, including changes and a text summary (report) of the network analysis that includes assumptions, procedures, and results, and any graphics that clarify the analysis. The Engineering firm(s) shall verify the report format with the City. The computer network analysis shall be provided using the software listed below. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility.
   a. Computer network analysis for Gas: GasWork
   b. Computer network analysis for Water: InfoWater
   c. Computer network analysis for wastewater: InfoSewer
   d. Other design computer programs as approved by the City
4. Project reports.
5. Any other item specified in the contract for that project
6. Easement map and recording information

D. The selection of an Engineer for a specific project shall be based on experience with similar projects, references, performance in similar projects, and availability. This will include the ability to meet schedules, cost control, and responsiveness to client.

E. The Engineer shall have an engineering staff on-site everyday who is responsible, on behalf of the Engineer, for providing timely completion and response for performance of the terms of each Project Assignment Agreement during the progress of each individual project. Any deviation from this requirement is at the discretion of the City and must be approved in writing by the City prior to the start of any individual project.

UTILITIES ENGINEERING SERVICES

TUESDAY, FEBRUARY 27, 2024 | 4:00 PM
RFP NO.: 23-24-052
SUBMITTED TO: CITY OF LAS CRUCES, NEW MEXICO

February 27, 2024

City of Las Cruces
ATTN: Purchasing Department / Bid Clerk
700 N. Main Street, Suite 3100
Las Cruces, NM 88001

RE: 23-24-052 Utilities Engineering Services

Dear Selection Committee,

Las Cruces Utilities Department has the challenging task of providing natural gas, water, wastewater, and solid waste services to ratepayers, while supporting the city's growth and maintaining residents' quality of life by building and maintaining reliable infrastructure that will meet the demands.

Johnson, Mirmiran, & Thomson, Inc. (JMT) helps utility owners across the U.S. find solutions to complex projects like yours. JMT, an employee-owned company, is a full-service, multi-discipline engineering firm, providing services for more than 50 years. Our firm is currently ranked #59 on the Engineering News-Record (ENR) list of the Top 500 Design Firms. **Our services include engineering, architecture, construction management, project management, environmental services, GIS, surveying, and technology services.** We bring engineering freshness to utility owners!

Our local engineering staff is known to the City of Las Cruces (City). JMT's team will be led by our Principal Engineer and Project Manager, Atzuko Reveles, PE from our El Paso office. Atzuko's past engineering experience with the City includes work for both the Utilities and Public Works Departments. He will be supported by an "outside the box thinking" engineering team. The following is highlighted for this RFP opportunity:

- **Technical Expertise.** Our team has a proven record of delivering high-quality on-call services for clients locally and across the county. Our experts cover the entire spectrum of engineering services including water/wastewater, civil, hydraulics, survey, GIS, subsurface utility engineering (SUE), geotechnical, mechanical, plumbing, electrical, I&C, structural, and construction phase services.

- **Las Cruces Experience.** We have been serving to the City for the past 6 years. Our firm is proud of its performance in the 2018 General Obligations Bond Projects for the Public Works Department as the Program Manager and Owner's Advisor. Our team provided key services that ensured the projects were completed within time and budget. The success of this project was possible thanks to the teamwork between City leadership and the local JMT team.

- **Availability and Responsiveness.** Our local office has a staff of 55 engineers, architects, construction managers, schedulers, estimators, and designers, including New Mexico registered engineers. Our proximity to the City and the experience of our staff gives us the ability to respond to the City's needs. Additional staff from other offices will be available to provide additional support and specialized services.

Thank you for the opportunity to present our qualifications. We are committed to providing the City with innovative professional services that align well with your mission and vision. We are looking forward to assisting you with your project needs. If you have any questions or need further information, please do not hesitate to contact me at areveles@jmt.com or 915-283-6771.

Sincerely,

Atzuko Reveles, PE

RFP COMPLIANCE DECLARATION

RFP TITLE: **Utilities Engineering Services**

RFP NO.: **23-24-052**

DUE DATE/TIME: **February 27, 2024 / 4:00 p.m.**

In compliance with the requirements of this RFP, I, the undersigned, offer and agree to furnish any or all materials and/or services to the City of Las Cruces within the time agreed.

I further certify that this company has not been debarred, suspended, or otherwise made ineligible for participation in Federal Assistance programs under Executive Order 12549 Debarment and Suspension as described in the Federal Rules and Regulations.

Receipt of Addenda Nos.: 2 is hereby acknowledged (where none received, place a zero in this space)

COMPANY OVERVIEW

Johnson, Mirmiran, and Thomson, Inc. (JMT) stands as a beacon of excellence in the engineering realm, offering comprehensive, multidisciplinary services. With a rich legacy spanning five decades, we have served both public and private entities across the nation with unwavering professionalism. Our team comprises over 2,200 dedicated individuals—engineers, designers, technicians, scientists, and support staff—operating from more than 50 offices. Notably, JMT holds the esteemed **#59 position on the Engineering News-Record's (ENR)** prestigious Top 500 Design Firms list. As a registered engineering, architectural, and project management firm, we pride ourselves on delivering end-to-end solutions, encompassing planning, assessments, engineering, modeling, inspection, project and construction management, architecture, environmental, GIS, and cutting-edge technology services. JMT's growth has been propelled by our focus on client service, strong technical skill sets, and JMT's corporate culture, which can be summarized by our core values of safety, quality, integrity, and relationships.

JMT is certified by the internationally recognized ISO 9001:2015 quality management standard, which embodies these core values and demonstrates to our clients, partners, and other stakeholders that our work consistently yields positive impacts and exceeds expectations. We provide a wide range of services, from small, fast-paced task order assignments on numerous on-call contracts, to significant roles on some of the most extensive infrastructure programs across the country.

More than 80% of JMT's consulting and design work comes from repeat clients. Our staff's ability to produce high-quality, innovative services on time and within budget has created a high level of client satisfaction. Additionally, many of our projects have earned awards and other honors for high performance and technical excellence standards.

Our local office in El Paso has a staff of 55 New Mexico registered engineers, architects, designers, construction managers, schedulers, program managers, and estimators. Our office has the capacity to complete projects in-house and the availability to meet you in-person. If necessary, JMT will make our full company resources available to assist with specific challenges with **asset management, water, wastewater, natural gas, pump and lift stations, wastewater treatment plants, water reservoirs, and natural resources.**

Our local team will be led by our Principal Engineer and Project Manager Atzuko Reveles, PE. He has over 18 years of experience in municipal and utility projects in our area. He has prior experience with the City of Las Cruces. For the Utility Department, he worked on design projects such as the South Jornada Water Improvements Project, Phases I and II. For Public Works, he worked on the multi-year Las Cruces 2018 General Obligations Projects.

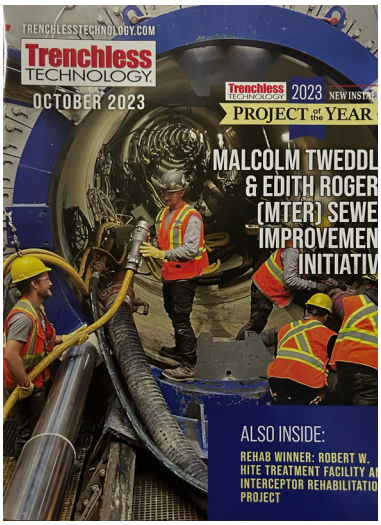
Evaluation Criteria No. 1

TECHNICAL APPROACH

JMT has provided water, wastewater, and natural gas engineering services for over 25 years. Our experience includes design, feasibility studies, and condition assessment of booster pump stations, lift stations, wastewater treatment plants, pressure pipes, gravity pipes, hydraulic modeling, electrical, mechanical, SCADA and instrumentation and control (I&C).

WATER AND WASTEWATER PIPELINE DESIGN.



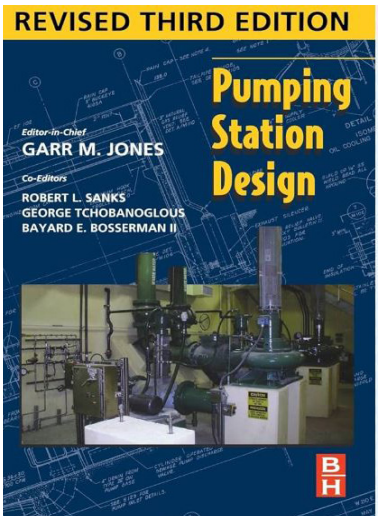
Our engineers have designed hundreds of miles of pipes of various diameters, materials, and depths. Our design approach is made such that pipes withstand the freezing conditions of the east coast, unique sandy conditions of our Chihuahuan Desert, high groundwater conditions, shallow and deep installations, trenchless technologies, and under trafficked downtown areas with conflicting existing utilities across the country. Prior to any design efforts, we will first establish a preliminary pipe route and have a review meeting with you for input. This initial route will tell us relevant information to verify right of way, land use, environmental, cultural, and potential areas of conflict, which often delay projects if not considered. Depending on the challenges in making a pipe route selection, our team will be ready to complete a route analysis to provide you with alternatives for the best route. For water pipe design, hydraulic analysis is recommended in conjunction with City staff. Our team can use existing hydraulic models as a base for transient model development and to determine hydraulic grade lines. Our resources for pipe design extend to subsurface utility engineering (SUE) expertise. This is particularly useful at congested areas where the risk of encountering existing utilities is high. Ultimately and as required, our team will evaluate the design of trenchless technologies for the right projects. The October 2023 edition of the **Trenchless Technology Magazine awarded the Project of the Year, with honorable mention, to our High Level Sewershed Collection System Project**, for the new installation category.

NATURAL GAS SYSTEM

JMT has successfully provided engineering services for **natural gas infrastructure**. For design, our engineers have completed pipe designs of various diameters and pressures. Recently, we completed the R-2588B Project for Dominion Energy North Carolina. It consisted of approximately 16,500 linear feet of 8-inch **high-pressure** steel pipe and 8,700 linear feet of 8-inch HDPE. For the same client, we also completed the Riverside Drive Gas Main Relocation Project. It included the design of approximately 790 liner feet of MDPE due to an emergency prompted by slope failure along the existing route. Our engineers have the capacity to complete design work on planned projects but in emergency situations as well.

For modeling, since 2022 JMT has been performing modeling for the Huntington complex in Newport News, Virginia. There are 27 separate utility systems serving the complex including several water and gas systems. JMT is preparing models for natural gas systems. The scope includes reviewing and testing different products to maintain a robust GIS system and to use as a basis for the modeling including, attribute data related to controls and operations.

WATER BOOSTER STATIONS AND WASTEWATER LIFT STATIONS.

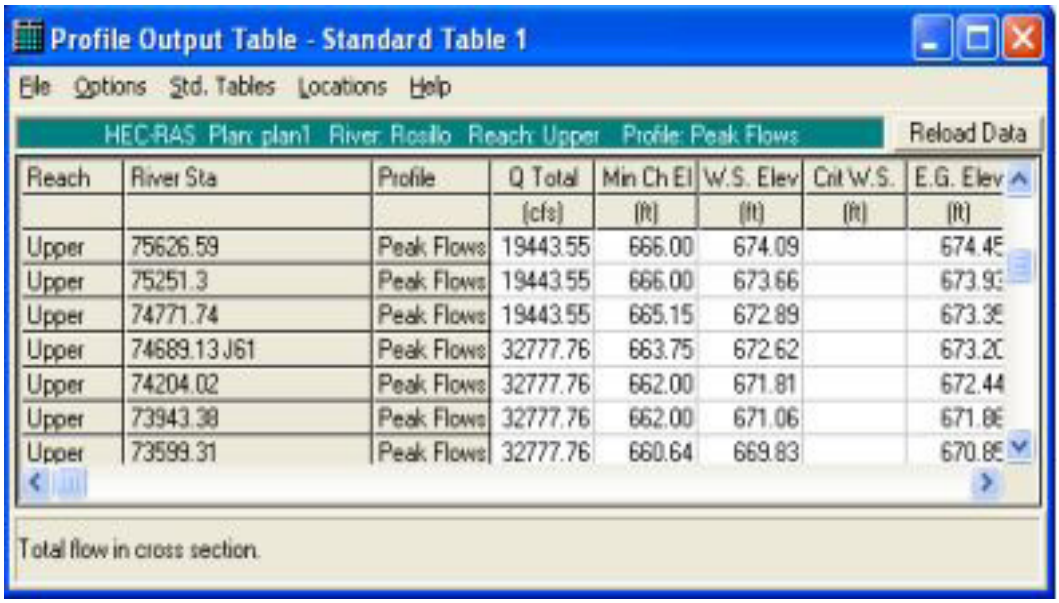


JMT has conducted analysis, rehabilitation, and design of water pump stations ranging from 45 GPM to stations over 330 MGD. Our cost-effective design processes incorporate alternative approaches with careful attention to life cycle costs, including labor and energy. We find that the best and most efficient solutions come from an integrated design team. Our project team includes structural, electrical, mechanical, and instrumentation and control professionals with our pump station designers during all phases of work – analysis, design, construction, and commissioning. Upon our first design assignment, JMT will first have a kickoff meeting with Utility staff including engineers and operators. It is our standard processes to engage operators from the beginning to obtain their input as the end-users to insure seamless transition from design through construction to ultimate operation of the facility. This is your system, and no one knows it better than you; it is why we value the input from utility

personnel. A typical next step is to complete site visits to have a full understanding of conditions and identify potential areas of adverse impact including environmental and land use. For the new booster station design, we will first evaluate the layout and review parameters such as flow distribution, uniform velocity, net positive suction head, total dynamic head, suction piping minimum submergence, and minimum spacing. This initial engineering assessment will allow us to move into detail design by first preparing our 30% submittal, which includes plans, specifications, and opinion of probable construction cost. Subsequently and after your review, we will advance design into 60%, 95% and 100% complete. Additional information on JMT's execution of design projects is provided in the following sections under Work Process for Design Work. Our approach follows the Hydraulic Institute practices.

WATER AND WASTEWATER HYDRAULIC MODELING.

JMT is experienced in developing, evaluating, and utilizing water and wastewater system models for utility owners. Our engineers are proficient in using multiple modeling software packages and have a firm understanding of their different capabilities and drawbacks for different applications. Our experience in developing Master Plans allow us to complete complex analyses of critical system users; growth planning; as well as the technical modeling of both constant speed and variable frequency drive pump stations, pressure reducing valves, and tank storage. Although most urban cities are fully developed, redevelopment could impact both water demands, and sanitary sewer flow increases that require hydraulic modeling. In these redevelopment districts, we run capacity studies that enable cities to move forward with pipe replacement to meet the future needs of the city's plan and reduce overall costs to your program by accurately sizing pipes. Upon selection of our firm and as the need arises, our engineers will be available to work with your staff to complete an initial system evaluation, especially in those problematic areas, to identify improvements for the current and future development. Our team will be available to help with tasks including flow monitoring and capacity evaluations for both dry and wet weather events and a variety of development scenarios.



Reach	River Sta	Profile	Q Total (cfs)	Min Ch El (ft)	W.S. Elev (ft)	Crit W.S. (ft)	E.G. Elev (ft)

For the Charles County Department of Planning and Growth Management, JMT developed the physical models of the water supply systems using County provided GIS data and as-built drawings to represent the existing system most accurately. Under the Water System Model Development Project, JMT loaded the water consumption information into the physical model by using water billing data, which allowed the model to simulate the actual demands experienced in these systems. To ensure model validity, JMT worked with County staff to conduct fire hydrant flow tests and collected field data used to calibrate the hydraulic model. JMT also performed well site visits to collect an inventory of the well location, configuration, and supply capacity in the Waldorf and Bryans Road systems. JMT used the model to develop the Charles County Water Master Plan which provided a system overview and identified delivery pressures and fire flow capacities under multiple present-day and future scenarios. The hydraulic model was used to determine the consequences of critical system infrastructure failure.

ODOR CONTROL FACILITIES.

We will keep our project approach simple, **even when things do not smell right!** Our team, however, has the capacity to complete feasibility studies, optimization, permitting, and design of chemical, biological, ozone, or carbon systems. We will review your odor issue and help you find the right and simple solution for your system.

ELECTRICAL, SCADA, AND I&C DESIGN.

JMT focuses on code compliance, integration with the utility provider, and limited risk during construction. Our electrical designs follow the latest NEMA standards. We provide analysis and design of medium and low voltage power distribution including switchgear, transformers, sectionalizing switches, underground manholes, duct banks, motor control centers, and emergency power. For your wells, booster stations, lift stations, and odor control stations, our engineers will develop lighting, power, grounding, instrumentation, and power protection one-line diagrams, utilizing the latest industry software. Our team will ensure that early grounding modeling studies are considered during predesign efforts. It is often not included in projects resulting in severe damage to expensive electrical equipment. As needed and to have an early understanding of your water and wastewater systems, our team will model low and medium voltage short-circuit, load flow, and arc-flash studies. Our instrumentation and control (I&C) designs provide new control strategies and process control narratives for any lift station and booster pump station that meet the Utilities Department current design and control philosophy. Updated controls can provide remove monitoring and control of the pump station previously not available. All necessary contacts and power connections for the proper operation of the SCADA system shall be provided with every task.

WATER AND WASTEWATER TREATMENT PROCESS.

JMT engineers have performed water treatment facility designs and rehabilitation projects for public utilities of varying sizes and technologies. From small pilot scale testing and design of a membrane facility to large scale rehabilitation of existing facilities, JMT will apply these experiences to benefit the City in new or renovation designs to sustain the existing plants such as your Jacob A. Hands Wastewater Treatment Plant. Beyond the actual process evaluations and rehabilitations, JMT experienced staff of facility engineers will provide the City with evaluations and rehabilitation designs to sustain the existing building structures and mechanical, electrical, and plumbing systems.

The JMT staff includes civil, environmental, mechanical, chemical, structural, and electrical engineers with experience in all facets of design related to various types of treatment facilities. Our experience includes plants ranging in size from 0.05 MGD to 300 MGD including the use of new technology such as ultrafiltration membranes to ion exchange to remove iron and manganese and arsenic to reverse osmosis. Our team is experienced in water and wastewater energy management study and optimization programs.

Our *Headworks Improvements and Wet Weather Flow Equalization Project* for the city of Baltimore, MD received the **2021 ENR Mid-Atlantic Best Project and 2021 ASCE Outstanding Civil Engineering Achievement Award.**

SUBSURFACE UTILITY ENGINEERING.

SUE is the art, science, and technology of obtaining reliable information about subsurface utilities and surface features through the process of geo-prospecting, data interpretation, documentation, and utility location. Our internal subsurface utility investigation and mapping team provides services to support a wide range of infrastructure projects, including construction, alignment constraints, permitting, public safety, and record documentation. Our staff of professionals are experienced with an array of technologies and their respective coordination and applications in various project environments to assure we exceed client expectations. JMT will evaluate the most cost-effective solution and assign this type of services to local subconsultants if needed.

NPDES AND SWPPP.

Our design will ensure that construction projects are permit compliant with the National Pollutant Discharge Elimination System (NPDES) for preventing contamination of the waters of the U.S. As required, our team will include stormwater pollution prevention plans (SWPPP) as part of the design documents.

ENVIRONMENTAL.

Our highly skilled environmental specialists are experienced in the completion of NEPA documentation, 4(f) compliance, environmental impact studies and assessments, wetland identification and delineation, watershed assessment and planning, natural resources and wildlife habitat identification, stream and streambank assessment, natural channel design, community impact assessments to support land use, open space, parks and recreation, BLM, and project development.

JMT understands that coordinating with Federal, State, and Local agencies to secure environmental and regulatory permits are critical drivers to ensure compliance with current regulations and to meet previous commitments outlined during project planning efforts and pre-application discussions with regulatory personnel. Depending on the project opportunity and as applicable, our environmental team will be engaged in the project as soon as we receive notice to proceed. They will help us determine critical project environmental requirements and keep us out of trouble in terms of required steps that will need to be completed initially. This team will complete necessary reports and field assessments required for processing applications, permits, and associated reports.

GEOTECHNICAL ASSESSMENTS.

JMT's professional geotechnical engineering team is experienced in developing design recommendations for an extensive variety of projects. In addition to our design recommendations experience, our geotechnical engineers are experienced in construction inspection and testing, which allows for the incorporation of recommendations and warnings of conditions into the design documents that should be expected during construction. Our geotechnical engineers will complete tasks such as technical support in soil testing borings, test pits, in-situ testing, geophysical studies, groundwater monitoring wells for contamination and remediation, shallow and deep foundations, and slope stability. JMT will evaluate the most cost-effective solution and assign this type of services to local subconsultants if needed.

MASTER PLANNING.

JMT's utility engineering practice offers extensive experience in planning, management, engineering, and construction related to water and wastewater infrastructure. The **Water System Master Planning & Capital Programming Project** for the City of Baltimore (MD) is one of our recent master plan engagements. We can apply our company expertise to help you determine the utility needs for the short and long-term. We can assist completing the full-blown master plan or complete individual tasks including capital planning and programming, alternatives analyses, asset planning and management, stakeholder meetings, hydraulic modeling, cost estimating, process optimization, or cost estimating.

PROJECT MANAGEMENT AND CONSTRUCTION INSPECTION.

JMT has over 4 decades of experience in providing project management services for federal, state, and local government agencies. We offer services including project and construction management, inspection, project scheduling and claims analysis. We are recognized for our ability to aggressively anticipate potential problems and recommend solutions before projects are adversely affected, enabling the city to maintain schedule, costs, and quality. Our experience includes both civil and facility types of projects. Under the City of Las Cruces 2018 General Obligation Bond Projects, JMT provided project management and inspection services. We are currently providing oversight and inspection for the Roadrunner Transit and Operations Center.

Our construction managers and inspectors will complete tasks such as utility coordination, cost estimating, daily observations and recording of construction activities, payment application review, change order analysis, earned value analysis, and weekly construction progress meeting and minutes.

CLAIM REVIEW.

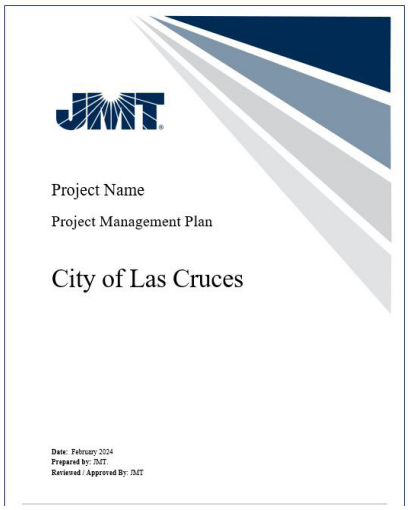
JMT understands that not all claims are valid, and we evaluate each claim for entitlement first before performing a detailed analysis of cost or time. We first identify the type of claim submitted by the contractor such as differing site condition, superior knowledge, disruption, loss of productivity, ambiguity of specifications, defective specifications, design error, loss of efficiency and other owner related causes, which will guide our approach to defense. Our next step is to determine whether the claim has merit (the contractor is entitled to compensation). Only after merit has been established, based on the specific situation and case law, will we proceed to determine the quantum (time and costs) of the claim. This prudent approach results in the most cost-effective claims analysis services by not expending time and money on a detailed review unnecessarily.

JMT acknowledges that an effective claims review must be performed in a professional and timely manner, which clearly identifies the construction, legal, and financial issues involved, and evaluates their impacts on each construction claim under review. We will provide objective and valid conclusions that the City of Las Cruces can use to successfully resolve the disputes represented by the claims.

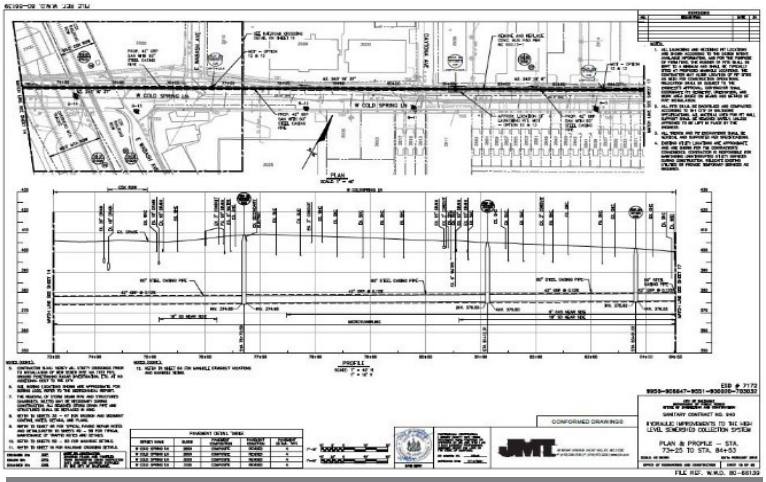
Our goal is to preempt or equitably resolve all issues as they arise. JMT will support the City of Las Cruces with claims that are not able to be resolved during the project. The **JMT Team employs licensed professionals that are industry experts and have testified as expert witnesses**.

THE FOLLOWING DESCRIBES OUR GENERAL WORK PROCESS FOR DESIGN PROJECTS.

PROJECT MANAGEMENT PLAN (PMP). JMT will prepare a PMP as soon as we receive notice to proceed. This document will contain important information including project team, scope of work, safety, lines of communication, budget, schedule, risk management, cost management, quality assurance/quality control, file storage, project closeout. We will share with you the project risks identified in this step. JMT's proven engineering services approach ensures our team meticulously follows critical project steps for a quality product. It is through an early development of a comprehensive project management plan (PMP) for each engineering engagement. Our PMP clearly identifies critical project components such as project team, scope of work, safety, lines of communication, budget, schedule, risk management, cost management, quality assurance/quality control, file storage, project closeout, and lessons learned. It is the basis of our approach and an important reason why our projects are successful. We will implement this same effective PMP tool in our engagements in your projects.



FEASIBILITY STUDY AND SCHEMATIC DESIGN. As the project requires, JMT will prepare feasibility studies to evaluate projects prior to design phase. Our deliverable to the City will include a report. For the Schematic Design phase and prior to commencing any work, JMT will schedule a kickoff meeting with the City and stakeholders, as directed by the City's Project Manager. The goal of this meeting will be to establish lines of communication for the project, discuss specific project objectives and set the schedule for the work. JMT intends to maximize the value of the meeting by discussing the information that is required to define the project path as early as possible. JMT anticipates that site visits will be completed as part of the kickoff meeting to facilitate discussion about specific field/site issues.



Sample 100% plan and profile for pipe design project

DESIGN DEVELOPMENT. Following the completion of the Feasibility Study and Schematic Design, JMT will complete design deliverables as per the contract documents, generally 30%, 60%, 95%, and 100%. The deliverables will include design drawings, specifications, and cost estimate. The plans will generally include proposed alignment, site restoration details, traffic control plans, sediment control plans, stormwater management plans. Review meetings will be held following submittals to address City comments.

QUALITY ASSURANCE AND QUALITY CONTROL. JMT has a well-established Quality Assurance (QA) and Quality Control (QC) **program that is ISO 9001:2015 certified**. We will rely on discipline specific engineers and senior technical reviewers with the skill sets and experience in our selected categories to ensure our work receives an appropriate level of review by a seasoned professional. Our internal QA/QC review process is often performed in Bluebeam Studio, to ensure all issues are resolved and a process of quality control checks are completed.

Our QA/QC program consists of several components. For example, during the early stages of the project, we will review initial plans and studies to identify and resolve potential constructability issues. By doing so, we can proceed with confidence with our design and avoid potential issues from occurring during construction which can then become more complicated and expensive to resolve. Often, we have found that these reviews may improve the overall design, provide cost-savings, and have a positive effect on the overall schedule.

JMT's QA/QC program also focuses on independent reviews of every deliverable at every milestone of the project. We use JMT's custom 5-Step Bluebeam Process which follows:

During our QA/QC program, we will also perform the following procedures:

- Our PM will identify hard internal draft submittal deadlines within our project schedule to ensure there is sufficient time for our QC reviews to occur, as well as the necessary time to address comments and backcheck before our submittal. Deliverables to the City will be posted to our ProjectWise system along with our internal QA/QC PDFs.
- To ensure the City's comments are fully addressed, we will schedule a comment resolution meeting with City reviewers to discuss all comments requiring clarification. After the meeting, actions for all comments will be identified and we will ensure each comment has been addressed to complete the verification process.

BID/AWARD PHASE. Bid documents will incorporate City's comments from review meetings. The 100% complete (signed and sealed) construction documents will be ready for bidding and approved through Public Works for construction. JMT will attend the pre-bid meeting to assist the City with technical questions and clarifications. JMT will produce addenda as needed.

CONSTRUCTION PHASE SERVICES. For office engineering, JMT will complete tasks including responding to RFI, change order review, clarifications, site visits, change order analysis and negotiation, and schedule analysis. For field work, we will represent the City with highly trained staff serving as construction managers, resident project representatives, and inspectors who provide full-time or part-time field observation and documentation of construction. We have used Procore software for documentation.

AS-BUILTS DRAWINGS. JMT will generate as-built drawings based on the contractor's red line submittals in AutoCAD format. Revisions to contract drawings will reflect field changes shown on the contractor's and field staff's record sets of plans, contractor's field survey data, change orders and field changes.

A typical project schedule/timeline

UTILITY PROJECT - SAMPLE SCHEDULE

ID	Task Name	Duration	Start	Finish
1	**Sample Utility Project**	**265 days**	**Mon 3/4/24**	**Fri 3/7/25**

Evaluation Criteria No. 2

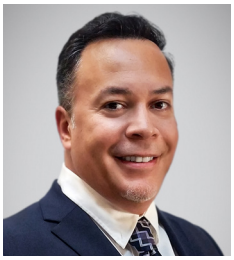
QUALIFICATIONS / COMPETENCE

Key Personnel

Atzuko Reveles, PE — Principal Engineer/Project Manager

Atzuko brings comprehensive knowledge and leadership in water and wastewater systems in the Las Cruces area. He is experienced in feasibility studies, design, project, program, and construction management across various sectors. Atzuko's prior design experience with the City of Las Cruces will be instrumental for project delivery. Some of the projects he completed include design of water pipes, water reservoirs, bridge design for Roadrunner Parkway, vulnerability study for water and wastewater systems, feasibility studies for implementation of gas/water automatic meter reader, and updates to the Utilities O&M.

Marco Trujillo, PMP — Water/Wastewater Lead



Marco is a civil engineer with more than 20 years of experience in water and wastewater systems design. His experience encompasses project construction management, modeling, assessment, treatment facilities, landfills, lift stations, water pump stations, and water, sewer, and stormwater pipelines. Past relations with the CLC: Marco worked closely with the City of Las Cruces, engineering, operations, and GIS departments during the transite pipe master plan. This master plan helped the city prioritize the replacement of their transite water lines in a period of 10 years and improved documentation regarding failure analysis and asset management.

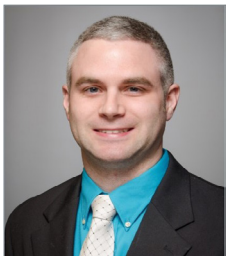
Ben Asavakarin, PE — Water Treatment Engineer Lead

With over 23 years of experience, Ben brings a wealth of expertise to the table, spanning wastewater process engineering, pumping stations, instrumentation and controls, hydraulic modeling, water distribution systems, and sewer collection system design. His portfolio encompasses a diverse array of tasks, from conducting feasibility studies and crafting alternative analysis reports to meticulously preparing contract documents, navigating permitting processes, and providing invaluable support throughout the construction phase.

Arturo Chavez Del Bosque — Designer Lead

With a bachelor's degree of science in civil engineering, Arturo brings 3 years of local design and management experience. He has completed various design projects in the New Mexico and Texas regions. Arturo's excels in design procedures and hydraulic and hydrology analyses, and roadway design improvements. His knowledge of the New Mexico communities has contributed to their existing improvements and future planning. Arturo will work closely with the project manager and team to complete the different project phases, including drawings and specifications related to specific designs.

Steven Pickel, PE — Natural Gas Lead



Steven is a seasoned leader with over 15 years experience in utility projects, known for his innovative approach and steadfast reliability in delivering timely and cost-effective results. His expertise has led to successful outcomes across diverse projects, including gas design and assessment, sewer replacement and rehabilitation, force main design, pumping stations, and water main replacements. Additionally, Steven excels in trenchless pipeline design methods and is trusted by major water utility clients to conduct detailed peer reviews of complex designs. Steve's team received the project of the year, new installation honorable mention by Trenchless Technology Magazine in 2023 for the Hydraulic Improvements to the High Level Sewershed Collection System project in Baltimore.

David Berry, PE — QA/QC Lead

David has 21 years of broad engineering experience in VA, MD, DC, NJ, and PA; including: flow metering, I/I analysis, utility design and rehabilitation. He has worked in the public and private sectors on numerous projects involving studies and the preparation of contract documents. These projects included both new construction and rehabilitation to existing systems. He has managed and completed numerous task orders under engineering services on-call contracts.

Evaluation Criteria No. 3

John T. Hickerson WRF Design Build Improvements
El Paso Water, El Paso, Texas

PROJECT DESCRIPTION

The John T. Hickerson Water Reclamation Facility has a total capacity of 17.5-million-gallons per day. Critical components of Treatment Train # 1 were due for rehabilitation for a total construction cost of nearly $30 million. The work included the replacement of key treatment infrastructure mechanisms for the headworks, clarifiers, aeration basins and pumping rooms.

The following project components tasks were performed while maintaining the plant fully operational:

- Large diameter sewer pipelines
- Natural Gas Pipes
- Master Planning
- Flow meters and vaults
- SUE
- Crane system design and construction
- Wastewater design

- Structural design
- Electrical, SCADA and I&C design
- NPDES and SWPPP
- Odor control system installation and start up
- HVAC and plumbing design
- Lift station design
- Standby power generators

JMT acted as the Owner advisor and was closely involved in this project from the planning phase, conducting tasks such as condition assessment of critical infrastructure prior to bid phase, performance specifications, construction cost estimates, and the preparation of bridging documents through the progressive design-build model, review of contractors' proposal, providing recommendations for the most qualified design-build contractor.

JMT also provided overall project management, management of subconsultants, review of technical specifications, conducted progress meetings, reviewed design, completed earned value analysis and negotiated guaranteed maximum price with the contractor.

2021 & 2022 Water Main Replacement Programs
City of Englewood, Colorado

PROJECT DESCRIPTION

The City of Englewood's water distribution system is aging and much of the piping is undersized. Historically, the City's approach to replacing their water mains was reactive – a new development or construction project which requires larger service may result in an upsized main. During the Water Master Plan development, the City identified the need to begin a formalized Water Main Replacement Program. JMT was selected to kick-off this effort with the 2021 Water Main Replacement Program.

JMT's scope included review of utility drawings, modeling coordination, field investigations of water meters and service lines, utility designation, topographic surveying, preparation of contract documents including requirements for traffic control, detailed specifications, and preparation of cost estimates. All contract documents were prepared in accordance with City of Englewood standards. Additionally, JMT was responsible for coordination with regulatory agencies and permitting (Grading, Sediment Control, and Stormwater Management Plan, CDOT Utility permit), as well as engaging affected customers throughout the design process. A robust QC and Project Management Plan was implemented to minimize issues during construction.

JMT's design addresses the City's concerns related to lead service lines. Review of service line records showed a lack of pipe material information. JMT leveraged our experience working with clients across the country to help the City develop a standardized process for addressing lead service line replacements and manage risks associated with change orders for unexpected replacements.

A key consideration during design was minimizing or eliminating the need for temporary service during construction. JMT evaluated each site to determine the feasibility of relocating the replacement mains and determined that sufficient room existed within the ROW to accommodate the new main while keeping the existing main in service. As a result, no temporary service was required for the over 50 residential and fire services replaced under this project.

Following completion of design, JMT provided assistance during bid phase, provided construction administration services, and construction inspection services. This contract was completed per the original schedule and budget.

- Natural gas pipes
- Master planning
- Water pipe design
- Bid phase services
- Topographic survey

- NPDES and SWPPP
- Permitting
- Traffic control
- Services during construction
- Modeling

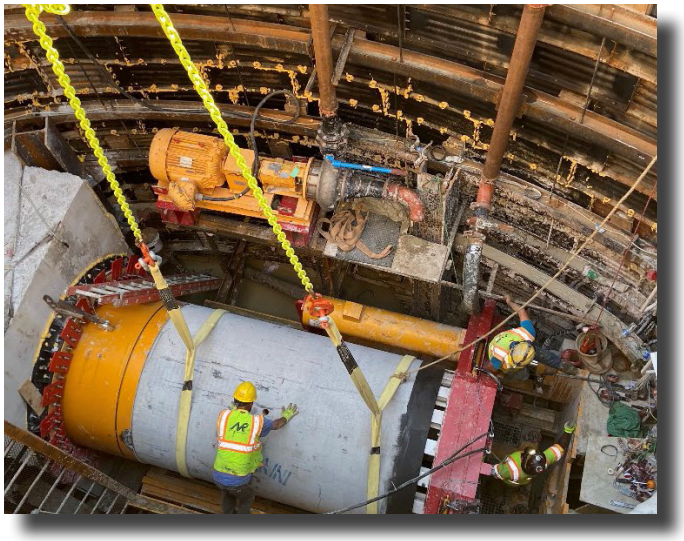
Hydraulic Improvements to the High Level Sewershed Collection System (SC 940) City of Baltimore, Department of Public Works

PROJECT DESCRIPTION



JMT designed trenchless improvements to eliminate sanitary sewer overflows and basement backups in the High Level Sewershed and improve water quality and sewer system efficiency for the people of Baltimore. The High Level Sewershed conveys sewage flow from the west side of Baltimore and part of the county to the Back River Wastewater Treatment Plant (WWTP), which serves 1.3 million customers. Although it covers only 10% of the city, it is a critical link in the city's sewer collection system.

A 2009 study conducted by JMT discovered multiple engineered sanitary sewer overflows (SSOs) in the Sewershed, all requiring elimination according to the City's Consent Decree. Currently, there are three overflows remaining at the north end of the Sewershed. The existing collection system in this area was constructed with minimal slopes, due to flat topography. This caused the undersized pipes to frequently surcharge and activate the SSOs. To eliminate two of the overflows, the City decided to build an underground storage tank near Towanda Park in Baltimore.

After the City chose to convey and store flows at the Back River WWTP, the underground storage tank was removed in favor of increased capacity to the collection system. JMT worked as a consultant for the City of Baltimore Department of Public Works, examining multiple rehabilitation and replacement scenarios such as a parallel relief sewer, a stacked pipe configuration with new pipe installed above existing pipe, pipe upsizing, and a new alignment. After reviewing the site constraints, which included a pipe depth exceeding 25 feet, busy neighborhood streets, a CSX railroad crossing, and other environmental impacts, JMT and the City determined the best option was to develop a new alignment installed by microtunneling.

JMT's final design included 8,000 linear feet of gravity sewer using a two-pass installation method. The casing pipe was designed with 60-inch steel. However, it was later changed to a 60-inch RCP casing during construction. The carrier pipe inside the casing is 42 inches and fiberglass. JMT also included a 96-inch diversion manhole with a fiberglass insert and stop gates to direct flow into the new sewer, while maintaining access to the existing sewer for flushing and maintenance. Additionally, JMT helped the City install 24 new manholes for access and replace 11,000 linear feet of sewer using large diameter pipe by open cut. Construction began in November of 2019 and was completed in July of 2022.

- Large diameter sewer pipelines
- Deep pipe design
- Master Planning
- Manholes
- SUE
- Hydraulic modeling
- Wastewater design

- Structural design
- Environmental impact studies
- NPDES and SWPPP
- Cost estimates
- Geotechnical assessments
- Railroad crossing

CITY OF LAS CRUCES

PROJECT ASSIGNMENT AGREEMENT

23-24-052 UTILITIES ENGINEERING SERVICES

PROJECT NAME

Pursuant to terms and conditions of City of Las Cruces (CITY) Contract No. 23-24-052 dated June 1, 2024 between the CITY and Johnson, Mirmiran, & Thompson, Inc. (ENGINEER), as amended and incorporated herein by reference, the City and Contractor hereby agree on this _____ day of _____, 20___, as follows:

1. In a satisfactory and proper manner, the ENGINEER shall perform SERVICES as proposed in response to the CITY's RFP No. 23-24-052 and ENGINEER's proposal as set forth in ATTACHMENT A attached hereto.

2. The estimated completion date is number days after a Notice to Proceed is issued by the CITY to the ENGINEER.

3. In consideration for the satisfactory completion of the work agreed to herein, compensation shall be made in the amount of $dollars.cents, plus NMGRT. Invoices issued by the ENGINEER shall be made monthly / upon completion of project with payment by the CITY being made within 30 days upon receipt of undisputed invoice.

EXHIBIT "H"

CITY OF LAS CRUCES

PROFESSIONAL SERVICES AGREEMENT

THIS AGREEMENT, made and entered into on this _____day of _____, 2024 by and between the City of Las Cruces, New Mexico, hereinafter called "CITY" and Kimley-Horn and Associates, Inc., of 1001 West Southern Ave, Ste 131, Mesa, AZ, 85210, hereinafter called "CONTRACTOR".

1. PROJECT DESCRIPTION
Utilities Engineering Services on an as needed basis via Project Assignment Agreements (Attachment "A") during the term of this AGREEMENT.

2. SCOPE OF SERVICES
In a satisfactory and proper manner, the CONTRACTOR shall perform SERVICES, as proposed in response to the CITY'S RFP No. 23-24-052, as set forth in Exhibit A, attached hereto and made a part of this Agreement.

The CONTRACTOR is authorized to extend the same terms and conditions of this Agreement to other governmental entities conditioned upon the procurement laws and regulations of those entities. The CITY shall not be a party nor have any liability relating to such extensions.

3. APPROPRIATIONS
The terms of this Agreement are contingent on sufficient appropriations and authorization being made by the City Council for the performance of this Agreement. If sufficient appropriations and authorizations are not made by the City Council, this Agreement shall terminate upon written notice given by the CITY to CONTRACTOR. The CITY'S decision as to whether sufficient appropriations and authorizations exist shall be accepted by CONTRACTOR and shall be final.

4. COMPENSATION
The CITY shall compensate CONTRACTOR for the performance of SERVICES under this Agreement an amount agreed to for each assigned project, plus applicable taxes. CONTRACTOR shall perform the SERVICES upon receipt of a purchase order or written Notice to Proceed for each assigned project from the CITY. The CITY cannot authorize costs to be incurred prior to such written Notice to Proceed. CONTRACTOR shall submit invoices upon completion of the project. CITY shall pay invoices Net 30 days upon receipt of undisputed invoice.

CONTRACTOR is responsible for payment of State of New Mexico Gross Receipts Tax levied on the amounts payable under this Agreement. CONTRACTOR agrees to comply with all federal and state tax payments and report all items of gross receipts as income from the operations of its business.

5. DEVOTION OF ADEQUATE TIME
CONTRACTOR will devote the necessary hours each week to the performance of projects that are required by the CITY and it will serve the CITY diligently and faithfully,

and according to its best ability in all respects and will promote the best interests of the CITY.

6. TERM AND SCHEDULE
This Agreement shall become effective on June 1, 2024 for a term of 5 years through May 31, 2029.

CONTRACTOR shall perform the SERVICES in accordance with the time set forth as agreed upon by the CITY and CONTRACTOR and as agreed to for each project assigned under the terms of this Agreement.

7. EXTENSIONS, CHANGES, AND AMENDMENTS
This Agreement shall not be extended, changed, or amended except by instrument in writing executed by the parties. The CITY shall not be liable for payment of any extra services nor shall CONTRACTOR be obligated to perform any extra services except upon such written agreement. Such written approval shall indicate the date said extension, change, or amendment is effective and shall be signed by the parties to this Agreement. In the event that the parties cannot reach agreement as to a particular change, the issue shall be resolved pursuant to Article 21.

8. CHANGES AND EXTRA SERVICES BY THE CITY
The CITY may make changes within the general scope of the SERVICES plus may also request CONTRACTOR to perform other extra services not incorporated within the Services set forth in this Agreement. If the CONTRACTOR is of the opinion that such change causes an increase or decrease in the cost and/or the time required for performing the changes or other services required by the City, CONTRACTOR shall so notify the CITY of that fact within five (5) business work days from the date of receipt of change by the CITY. The CITY shall provide written response to the CONTRACTOR within five (5) business work days from the date of receipt of CONTRACTOR'S written notification.

9. CHANGES AND EXTRA SERVICES BY THE CONTRACTOR
In the event a condition is identified by the CONTRACTOR which, in the opinion of the CONTRACTOR, changes the services, costs, and/or time required for performance under this Agreement, the CONTRACTOR shall provide written notification to the CITY within five (5) business work days of such identification. The CITY shall respond in writing to such notification within five (5) business work days from the date of receipt of CONTRACTOR'S notification.

10. DELAYS
In the event that performance of SERVICES is delayed by causes beyond reasonable control of CONTRACTOR, and without the fault or negligence of CONTRACTOR, the time and total compensation for the performance of the SERVICES may be equitably adjusted by written agreement to reflect the extent of such delay. CONTRACTOR shall provide the CITY with written notice of delay pursuant to Article 9 including therein a description of the delay and the steps contemplated or actually taken by

CONTRACTOR to mitigate the effect of such delay. The CITY will make the final determination as to reasonableness of delays.

11. TERMINATION
This Agreement may be terminated by either party hereto upon fifteen (15) calendar days written notice in the event of substantial failure by the other party to perform in accordance with the terms of this Agreement through no fault of the terminating party. This Agreement may also be terminated by the CITY for its convenience or because the PROJECT has been permanently abandoned, but only upon fifteen (15) calendar days written notice to CONTRACTOR.

In the event of termination, CONTRACTOR shall be compensated for all services performed and costs incurred up to the effective date of termination for which CONTRACTOR has not been previously compensated.

Upon receipt of notice of termination from the CITY, CONTRACTOR shall discontinue the SERVICES unless otherwise directed and upon final payment from the CITY deliver to the CITY the required number of copies of all data, drawings, reports, estimates, summaries, and such other information and materials as may have been accumulated by CONTRACTOR in the performance of this Agreement, whether completed or in process.

12. RECORDS AND AUDITS
CONTRACTOR will maintain records indicating dates, length of time, and services rendered. The CITY has the right to audit billings both before and after payment, and contest any billing or portion thereof. Payment under this Agreement does not foreclose the CITY'S right to recover excessive or illegal payments. CONTRACTOR will retain records for five (5) years after the completion of the project.

13. DISCLOSURE AND OWNERSHIP OF DOCUMENTS, PRODUCTS, DESIGN, ELECTRONIC FILES
All technical data, electronic files, and other written and oral information not in the public domain or not previously known, and all information, electronic files, and data obtained, developed, or supplied by the CITY will be kept confidential and CONTRACTOR will not disclose to any other party, directly or indirectly, without the CITY'S prior written consent unless required by lawful order.

All technical data, electronic files, products developed, operational parameters, blueprints, and other information and work of the CONTRACTOR shall be the sole property of the CITY and shall be delivered to the CITY when requested and at the end of the Agreement.

14. INDEPENDENT CONTRACTOR
CONTRACTOR represents that it has, or will secure, at its own expense, all personnel required in performing the SERVICES under this Agreement. Such personnel shall not be employees of, nor have any contractual relationship with the CITY. CONTRACTOR,

consistent with its status as an independent contractor, further agrees that its personnel will not hold themselves out as, nor claim to be officers or employees of the CITY by reason of this Agreement.

To the extent that CONTRACTOR employs any employees, CONTRACTOR shall be solely responsible for providing its own form of insurance for its employees and in no event shall CONTRACTOR's employees be covered under any policy of the CITY.

CONTRACTOR'S retention hereunder is not exclusive. Subject to the terms and provisions of this Agreement: (i) CONTRACTOR is able, during the Term hereof, to perform services for other parties; and (ii) CONTRACTOR may perform for its own account other professional services outside the scope of this Agreement.

CONTRACTOR is and shall be an Independent Contractor and shall be responsible for the management of its business affairs. In the performance of the work under this Agreement, CONTRACTOR will at all times be acting and performing as an Independent Contractor, as that term is understood for federal and state law purposes, and not as an employee of the CITY. Without limitation upon the foregoing, CONTRACTOR shall not accrue sick leave, jury duty pay, retirement, insurance, bonding, welfare benefits, or any other benefits, which may or may not be afforded employees of the CITY. CONTRACTOR will not be treated as an employee for purposes of: Workers' Compensation benefits; the Federal Unemployment Tax Act; Social Security; other payroll taxes, federal or any state income tax withholding; or the employee benefit provisions described in the Internal Revenue Code of 1986, as amended. Neither the CITY, nor its agents or representatives, shall have the right to control or direct the manner, details or means by which CONTRACTOR accomplishes and performs its services. Nevertheless, CONTRACTOR shall be bound to fulfill the duties and responsibilities contained in the Agreement.

15. NO JOINT VENTURE OR PARTNERSHIP

Nothing contained in this Agreement shall create any partnership, association, joint venture, fiduciary or agency relationship between CONTRACTOR and CITY. Except as otherwise specifically set forth herein, neither CONTRACTOR nor CITY shall be authorized or empowered to make any representation or commitment or to perform any act which shall be binding on the other unless expressly authorized or empowered in writing.

16. ASSIGNMENT

CONTRACTOR shall perform all the services under this Agreement and shall not assign any interest in this Agreement or transfer any interest in same or assign any claims for money due or to become due under this Agreement without the prior written consent of the CITY.

17. INSURANCE
CONTRACTOR shall obtain and maintain insurance at its own cost and expense during the life of this Agreement, and shall require Subcontractors, if any, to maintain during the life of his subcontract:

1. Commercial General Liability Insurance
   a. $1,000,000 per occurrence / $2,000,000 aggregate
   b. Coverage must include premises and operations, products and completed operations, and personal and advertising injury.
   c. The City of Las Cruces must be named as an Additional Insured for all coverages listed above on endorsements acceptable to the City.
   d. Coverage must be primary and non-contributory.
   e. Coverage must be per project or per location.
   f. Coverage must be on an occurrence form.
   g. Subrogation must be waived.
2. Commercial Auto Liability
   a. $1,000,000 per occurrence
   b. Coverage must be for “owned, leased, hired, and non-owned autos” or “any autos.”
3. Workers’ Compensation and Employers Liability
   a. Statutory Limits
   b. Employer liability – $1,000,000 each accident, $1,000,000 each employee by disease, $1,000,000 policy limit
   c. Subrogation must be waived.
4. Professional Liability: $1,000,000 per claim

Endorsements for additional insured coverage and waivers of subrogation must be provided as a condition of this Agreement and shall be noted on the certificate.

CONTRACTOR shall furnish the CITY with a certificate(s) of insurance showing CONTRACTOR and Subcontractors, if any, have complied with this Article. The CONTRACTOR shall provide insurance certificates before work is to start on the project and shall provide the CITY thirty (30) days written notification of cancellation of such policies.

18. INDEMNITY AND LIMITATION
CONTRACTOR shall indemnify, defend, and hold harmless the CITY from and against any and all claims, suits, actions, judgments, demands, losses, costs, expenses, damages, and liability caused in whole or in part by, resulting in whole or in part from, or arising in whole or in part out of the negligent acts, errors, or omissions of CONTRACTOR, its officers, employees, agents, or representatives in the performance of SERVICES under this agreement.

19. APPLICABLE LAW
This Agreement and the rights and obligations of the parties shall be governed by and construed by the laws of the State of New Mexico applicable to Agreements between

New Mexico parties made and performed in that state, without regard to conflicts of law principles. Venue shall be in the Third Judicial District, State of New Mexico.

CONTRACTOR shall abide and be governed by all applicable state law, CITY ordinances, and laws regarding the CONTRACTOR'S services or any work done pursuant to this Agreement, including anti-discrimination.

20. BREACH
In the event CONTRACTOR breaches any obligation contained in this Agreement, prior to instituting any action or dispute resolution procedure, the CITY shall give CONTRACTOR written notice of such breach. In the event CONTRACTOR fails to remedy the breach within five (5) working days of receiving such written notice, the CITY, at its sole discretion, without any obligation to do so and in addition to other remedies available under applicable law, may remedy CONTRACTOR'S breach and recover any and all costs and expenses in so doing from CONTRACTOR.

21. DISPUTE RESOLUTION
In the event that a dispute arises between CITY and CONTRACTOR under this Agreement or as a result of breach of this Agreement, the parties agree to act in good faith to attempt to resolve the dispute.

22. NOTIFICATION
All notices required or permitted under this Agreement shall be in writing and shall be deemed sufficiently served if served by Registered Mail addressed as follows:

TO CITY:	City of Las Cruces PO Box 20000 Las Cruces, NM 88004 ATTENTION: Tony Trevino
With Copies to:	City Attorney Purchasing Manager
TO CONTRACTOR:	Kimley-Horn and Associates, Inc. 1001 West Southern Ave, Ste 131 Mesa, AZ 85210 ATTENTION: John Kissinger

23. SCOPE OF AGREEMENT
This Agreement incorporates all of the agreements, covenants, and understandings between the parties hereto concerning the subject matter hereof and that all such covenants, agreements, and understandings have been merged into this written agreement. No prior agreement or understanding verbal or otherwise of the parties or their agents shall be valid or enforceable unless embodied in this agreement.

24. SEVERABILITY
The parties agree that each provision of this Agreement is severable and the invalidity or unenforceability of any one or more of the provisions of this Agreement shall not affect the validity or enforceability of any other provision of this Agreement, and this Agreement shall be construed in all respects as if such invalid or unenforceable provisions were omitted.

25. CONFLICT OF INTEREST
CONTRACTOR represents and warrants that CONTRACTOR has no business, professional, personal, or other interest, including, but not limited to, the representation of other clients, that would conflict in any manner or degree with the performance of its obligations under this Agreement. If any such actual or potential conflict of interest arises under this Agreement, CONTRACTOR shall immediately inform the CITY in writing of such conflict. If, in the reasonable judgement of the CITY, such conflict poses a conflict to and with the performance of CONTRACTOR'S obligations under this Agreement, or is otherwise a violation of the CITY'S current policy or ordinances, then the CITY may terminate the Agreement immediately upon written notice to CONTRACTOR; such termination of the Agreement shall be effective upon the receipt of such notice by CONTRACTOR.

EXHIBIT A
SERVICES

A. Project Assignments
A Project assignment is initiated by the City providing the selected Engineer a detailed project description, including scope of work and any other special instructions needed by the Engineer to prepare items such as preliminary and final cost estimates, complete project plans and specifications, project reports, and other related engineering services. The awarded Engineers shall provide engineering services that may include but not be limited to, the following:
1. Computer network analyses for water, wastewater, and gas systems; design of water, wastewater, and gas utility systems; well house design; Supervisory Control and Data Acquisition (SCADA); water treatment process; master planning; feasibility studies; solid waste studies; land use permitting; subsurface utility exploration; boundary/easement survey; and National Pollutant Discharge Elimination System (NPDES) & Stormwater Pollution Prevention Plan (SWPPP) compliance.
2. Electrical design (wells, booster stations, lift stations, odor control stations, building electrical system design)
3. Computer network analysis for Gas (GasWork), Water (InfoWater), and Wastewater (InfoSewer). The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility
4. Solid waste studies, landfill system design and analysis
5. Environmental surveys, assessments monitoring and management, such as indoor air quality, asbestos, mold, and other related services for the City
6. Geotechnical Assessments, such as soil and groundwater testing for contamination and remediation, and other related services for the City
7. Expert witness in a judicial and/or quasi-judicial setting.
8. Project Management
9. Construction Inspection.

B. Project Assignment Agreements
A Project Assignment Agreement (a template of which is incorporated herein as ATTACHMENT “A”) will be negotiated and executed on a case-by-case basis for each specific project, and will include a cost proposal from the Engineering firm(s) proposing to do the work. The cost proposal may utilize one of the following pricing formats:
1. Lump Sum
2. Unit pricing to include:
    a. Hourly rate for various types of services requested by the City
    b. Charges for miscellaneous items such as blueprints, data, discs, rental of special equipment, etc.
    c. A statement of the billing procedures including minimum billing units, if any.
    d. Cost of sub-consultants (if any)
3. An alternative unit cost breakdown

C. Deliverables
Each project contract will require a list of deliverables, schedule/timeline and cost. The

Engineer may be required to supply to the City an of the following items, when specified and as requested on the Scope of Work for each individual project.

1. Preliminary report containing schedule of work and cost estimate.
2. Construction drawings and documents. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility. Provide hard copies and PDF format of the construction plans for Purchasing Section use.
   a. As-built drawings on electronic media and reproducible prints. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. All horizontal and vertical location datum information shall be coordinated with the City Surveyor. The utility location information shall be tied to project control monuments and referenced to project construction stationing. The project control survey shall be certified by a New Mexico Registered Land Surveyor. Metadata or “data about the data” shall be submitted with each as-built electronic file, preferably as a separate text file on the electronic submittal media, and shall include:
      - Name, address and phone number of the responsible land surveyor.
      - Date of completion of survey.
      - Equipment used to conduct the survey.
      - Horizontal and vertical control marks used to tie the survey to the City approved control.
      - Transformation factors needed to reduce Ground (local coordinate system) to Grid and combined scale factor used.
   b. “RECORD DRAWINGS” shall be clearly labeled on each sheet.
3. Computer network analysis for gas, water, and wastewater shall be provided to the City in appropriate electronic format. It shall include the entire model, including changes and a text summary (report) of the network analysis that includes assumptions, procedures, and results, and any graphics that clarify the analysis. The Engineering firm(s) shall verify the report format with the City. The computer network analysis shall be provided using the software listed below. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility.
   a. Computer network analysis for Gas: GasWork
   b. Computer network analysis for Water: InfoWater
   c. Computer network analysis for wastewater: InfoSewer
   d. Other design computer programs as approved by the City
4. Project reports.
5. Any other item specified in the contract for that project
6. Easement map and recording information

D. The selection of an Engineer for a specific project shall be based on experience with similar projects, references, performance in similar projects, and availability. This will include the ability to meet schedules, cost control, and responsiveness to client.

E. The Engineer shall have an engineering staff on-site everyday who is responsible, on behalf of the Engineer, for providing timely completion and response for performance of the terms of each Project Assignment Agreement during the progress of each individual project. Any deviation from this requirement is at the discretion of the City and must be approved in writing by the City prior to the start of any individual project.

ATTACHMENT C – COST PROPOSAL FORM RFP 23-24-052 – Utilities Engineering Services
(NOTE: This form shall not to be modified in any way)

Consulting Firm Kimley-Horn and Associates, Inc.

ITEM	DIRECT LABOR / CLASSIFICATION	HOURLY RATE*
1	Principal Engineer	$ 330.00
2	Project Engineer/Project Manager	$ 295.00

Re: Proposal for Utilities Engineering Services, RFP No. 23-24-052

Dear Members of the Selection Committee,

The City of Las Cruces (City) is seeing a proven design consultant to support a variety of utility planning, design, and construction support services ranging from water and wastewater improvements to gas utility design and planning. Kimley-Horn is pleased to offer our multidisciplinary engineering and design services, which will enable the design of an array of multifaceted projects throughout the city. We have the relevant experience, quality team, and availability to provide the utilities engineering tasks associated with this on-call contract. We are pleased to offer the City the following benefits in partnering with Kimley-Horn:

Experienced Team with Passion: Project Manager Ray Montoya has 26 years of experience in the water/ wastewater industry. Since 1998, Ray has served as lead engineer, construction manager, and project manager for various project efforts across the western United States and has managed utility projects ranging from planning and assessments, full-scale design, and startup/construction phase services. With the full support of the regional Kimley-Horn Utility Team, Ray leads projects for municipalities across multiple states in the Southwest.

Deep Resources: Our key team members have a successful history of water and wastewater infrastructure planning, design, and construction phase services including treatment plants; water transmission and distribution systems; water pumping and storage; lift stations; groundwater wells; and hydraulic modeling as well as ancillary services such as electrical, instrumentation, and controls; building mechanical; site/civil; and site security. **Our entire Kimley-Horn team has worked together for many years and have a solid history of preparing preliminary design, final design, and construction phase services for over 50 water/wastewater projects in the Southwest.** Our team includes Project Manager Ray Montoya and other key team members, who offer a proven track record of successfully coordinating stakeholder efforts involving municipalities throughout New Mexico, Arizona, and other surrounding states.

National Experience with Local Knowledge: The Kimley-Horn team has successfully completed recent engineering services for the City by leveraging our nationwide experts to tackle challenging local problems. **Our Project Manager, Ray Montoya, along with lead Planning Engineer, Jeff Kellner, were both born and raised in Las Cruces. As natives and graduates of New Mexico State University, they remain committed to the community they still call home.** They know firsthand the impacts of needing to serve a fast-growing population, along with the immediate needs of maintaining older infrastructure within the city center. Both Ray and Jeff will make the City their priority, and utilize the strength of Kimley-Horn's award-winning national utility experts as needed.

Kimley-Horn appreciates the opportunity to submit our proposal and we look forward to continuing our partnership with the City. We are confident in our qualifications and our ability to successfully deliver on assignments from this on-call. **We acknowledge receipt of all addenda.** If you have any questions, please contact Ray Montoya at 602.678.3454 or ray.montoya@kimley-horn.com.

Sincerely,

KIMLEY-HORN

Ray Montoya, P.E.

THIS FORM MUST BE COMPLETED AND INCLUDED WITH PROPOSAL
FAILURE TO INCLUDE WILL SUBJECT RESPONSE TO REJECTION

Evaluation Criteria No. 1: Technical Approach

A. Technical Approach

Utility engineering has been a key discipline for Kimley-Horn's practice for the past 35 years. We have knowledgeable professionals to address every aspect of the needs of the City of Las Cruces (City) associated with utility engineering, and other related fields that rely on these utility-related topics such as water/wastewater treatment and funding assistance. Kimley-Horn's professionals have successfully completed a wide range of projects for state, regional, and local agencies. Our engineers will provide the City with various professional, technical, and customary services as they relate to the on-call tasks assigned by the City. We do not just work to find solutions to the task we are selected to complete, but provide additional value to the project by thinking ahead to anticipate how given solutions will affect other aspects of the project. We work to get these items incorporated into the task schedule as needed, and we make it a priority to keep up-to-date on innovative and emerging technologies and methods and think outside the box to find creative solutions to tasks.

B. Major Tasks to be Accomplished

Our team has served as on-call consultants for many municipalities over the years and we have developed an approach to making every task a successful one.

Our major tasks and goals for this contract include the following:

Being Flexible. We know that having a flexible approach is a critical need during on-call contracts. Our project team understands how to navigate changes to the project schedule, scope, budget, and other various unforeseen circumstances. Our team is knowledgeable and available to offer our consulting services if and when these changes arise.

Thinking and Acting as an Extension of the City's Staff. Our team will approach the City's projects as though we are part of your staff. We want to operate as one efficient unit, prioritizing your overall vision and goals. We anticipate acting in concert with the Las Cruces community and working to minimize constraints to the City's objectives.

Thinking Big Picture. We will look beyond the project, asking ourselves: What is the ultimate goal? We will help the City identify and procure outside funding whenever possible.

Being Creative. We will look for creative and innovative solutions and present them to the City throughout the projects that come out of this on-call contract. One example of this includes when Kimley-Horn was tasked by the City to complete a signal timing and phasing evaluation at the closely-spaced intersections of Spitz Street/Three Crosses Avenue and Main Street/Solano Drive. Our team found that without clustering the intersections together, the City could instead utilize fixed timing to accomplish the same result and be more flexible. This allowed the City to customize the signal splits while maintaining coordination between the two intersections. Kimley-Horn also provided additional recommendations at these locations to improve operations, including double-servicing a left turn and changing the phase order.

Providing Community and Council Support. Outreach to the community can be as important as the design of a project. We can prepare all exhibits and media, present information to the community or council, or simply provide support for the City. Our public involvement team is versed in community outreach and will work with the City to reach consensus among all stakeholders involved.

Approach to On-Calls to Accomplish Major Tasks

Our team is dedicated to responding to project requirements. On-call contracts require a different approach from project-specific contracts; therefore, each task assignment will need a tailored team and approach. For this contract, we have assembled a team of individuals that are responsible for ensuring high-end client service. **This includes John Kissinger P.E., PTOE will serve as your Principal-in-Charge, who will oversee the overall success of the contract and client satisfaction. Ray Montoya, P.E. will service as our Contract Manager and will oversee the various task order assignments and assign the appropriate team members to the project(s).** He will also be responsible for ensuring that the City's overall needs are met, that we produce high-quality designs, that we exceed expectations, and meet all contractual requirements.

Task Order Assignment Team, Scope, Budget, and Schedule

Once a project or task is assigned under the contact, Ray will work closely with the City to assign a project team based on team member availability and the project's technical components. As shown in the organizational chart on page 7, we have provided a deep bench of staff to

overcome any staff availability challenges. The project team will present a detailed scope of work, budget, and schedule to the City for approval. Once approved, the assigned project manager will create a detailed work plan and will distribute it to the project team.

Project Implementation

As noted in the timeline in Figure 1 on page 6, a kick-off meeting will be scheduled immediately following the notice to proceed where the work plan will be discussed in detail. During this meeting, the team will establish expectations and responsibilities, outline subtask responsibilities, identify project milestones, finalize schedules, and provide any clarity around project goals and objectives. On a monthly basis, a review of the original project schedule is completed. An estimate of progress (percent completion) is then determined. Each month this schedule is then updated, printed, and reviewed by our project team members. We also compile and send minutes of meetings that occurred that month and a monthly progress report, along with the monthly invoice. The work plan will be continually monitored and revised as the project proceeds to help ensure adherence to schedule and budget.

Additionally, the project manager will provide the City with a monthly progress report that tracks project status against items such as budget, schedule, and key deliverables.

Quality control reviews are built into the project schedule. We will schedule meetings with the Kimley-Horn design team to provide schedule compliance and quality production, as well as address any challenges that may arise as quickly as possible. We also will schedule meetings throughout the project with other relevant internal partners and advisors to provide extra layers of review.

Project Close-Out

Upon completing a project, Ray will check in with the City to get feedback on the project. We will also conduct an internal lessons learned workshop to improve performance on any current or future projects with the City.

C. Statement of Services

Kimley-Horn is a multidisciplinary engineering and design firm that has provided high-quality water/wastewater design, engineering, and consulting services for the past 35 years. **With over 390 staff and over 20 dedicated water/wastewater professionals in the Southwest region, we have the local resources necessary to serve the City for the entirety of the scope outlined in the Request for Proposal (RFP)**. Kimley-Horn's water/wastewater group has extensive experience in planning and designing a variety of water/wastewater projects, including planning and final design of transmission and distribution water pipelines, sewer collection pipelines, trenchless technology designs, utility coordination, studies, pipeline rehabilitation, and hydraulic modeling. Our team also offers water and sewer facility design services, including water pump stations, tanks, sewer lift stations and evaluations, water and wastewater treatment plants, site security, permitting, and construction administration.

Water/Wastewater (W/WW) Services

- Master Planning and Hydraulic Modeling
- Capital Improvement Planning/Project Prioritization
- Wastewater Treatment Evaluations
- Water Transmission Main/Distribution
- Water Treatment Facility Design
- Wastewater Treatment/Reclaimed Water Design
- Collection Systems Evaluation/Design
- Booster Pump Station Planning/Design
- Lift Station Planning/Design
- Water Storage Facilities
- Geographic Information System (GIS)
- Well Equipping Design
- Condition Assessments
- Pipeline Rehabilitation
- Trenchless Utility Design
- Storm Drainage System Design
- Rehabilitation/Replacement
- Cost Estimation
- Permitting
- Funding Assistance
- Construction Observation/Management
- Electrical, Instrumentation, and Controls
- Heating, Ventilation, and Air Conditioning (HVAC)/ Mechanical
- Structural Engineering and Forensics
- Per-and Polyfluoroalkyl Substances (PFAS) Investigation and Treatment

Water, Wastewater, and Gas Systems

Our team has been involved in several infrastructure replacement projects. Therefore, the team has the necessary knowledge to address the challenges anticipated with these types of projects. **Our team has a strong history of water, sewer, and gas main system planning and design.** This team has led the planning and design of hundreds of miles of various pipelines within right-of-ways (ROW). Additionally, we fully understand the importance of providing designs that maintain existing service for customers, water meter tie-ins/ replacements, protecting existing private utilities, and communicating with adjacent residents/businesses and utility owners.

Our proven approach to developing horizontal alignments of pipelines includes the use of field reviews to confirm utility locations, private property impacts, and anticipated pavement and sidewalk replacements. Our team will complete a site walk to not only field-verify the above-ground appurtenances (sewer manholes, water/gas valves, existing water/gas meters, and sewer cleanouts) associated with the existing water, gas, and sewer mains, but will also confirm anticipated impacts to existing private properties, such as privacy walls that extend into ROW. This detailed approach to understanding and documenting the existing utility and site conditions has been extremely valuable on past projects, allowing installation of water and gas main improvements to be constructed with little to no unforeseen conditions occurring during construction.

We bring a strong commitment to using the most cost-effective approach for replacement and rehabilitation including advanced technologies and techniques for our pipeline rehabilitation services. We employ trenchless construction methods, pipe bursting, slip lining, and cured-in-place pipe lining, to minimize disruption to the community.

Additionally, our **teams use closed-circuit television (CCTV) inspection systems to assess the condition of sewer systems and identify areas in need of rehabilitation.** We are committed to developing strategies that address the immediate needs of the sewer system but also consider the long-term impacts on the environment and public health.

Kimley-Horn's in-house expertise includes gas utility design. In general, proposed gas distribution systems are evaluated and assessed to provide recommended minimum pipe size for each segment based upon the established normal operating pressure of the system and utilities minimum allowable line pressure. Loads are evaluated in their maximum flowing conditions, representing worst case supply scenario for the system and recommendations, along with life-cycle costing and maintenance costs are included. The Kimley-Horn team supports national clients to help them establish system normal operating pressures, minimum allowable system pressures, and individual user or lot load calculations.

Computer Network Analysis

Our approach to modeling is to utilize the best available software that integrates with the client's current workflow, analysis needs, and continued usage. We are proficient in a variety of industry standard modeling software packages including **InfoWater, InfoSewer, InfoWorks ICM, InfoSWMM, WaterGEMS, SewerGEMS, WaterCAD, and SewerCAD.** We also utilize in-house pressure testing and pump efficiency testing to further calibrate our hydraulic models.

Well House Design

Our team has provided well site design for several Southwest agencies, including Avondale, Phoenix, Gilbert, Peoria, Fort Mojave, Cottonwood, and Arizona State Parks and Trails, to name a few. Our experience includes full design services for well sites, well equipping, water treatment, associated pipeline design, electrical design, instrumentation and controls, grading, structures, and site security.

Supervisory Control and Data Acquisition (SCADA)

Due to the complex and advances utility projects completed in the Southwest, the Kimley-Horn team has developed and robust and experienced SCADA and Instrumentation Design team. This group of in-house experts support many of the facility and infrastructure projects beginning with planning and assessments, leading into full-scale design and specification phase, and ultimately supporting clients through startup, testing, and commissioning phases. In addition, retrofitting or improving existing control systems across water, wastewater, and gas utility services has become standard in our practice over the years. Having these services in-house allows for seamless progression during design, and with close interaction with City staff, allows customized control at every installation.

Water Treatment Process

Kimley-Horn's W/WW team is committed to providing clients with cost-effective and state-of-the-art design solutions. Currently, the firm has nearly 450 employees who specialize in just W/WW engineering. They bring a complete understanding of water, wastewater, and reclaimed water systems, from the initial needs analysis and master planning to detailed design, construction phase services, and condition assessments.

Water Treatment Process

Kimley-Horn's water treatment capabilities encompass all planning, design, permitting, and construction phase services for surface and groundwater treatment facilities as well as design, implementation, and startup of water treatment processes of all types—from conventional aeration and chlorination systems to high-end treatment processes utilizing technologies such as microfiltration and ultrafiltration, reverse osmosis (RO) and membrane softening, ozone, granular activated carbon (GAC), and ion exchange.

Wastewater Process

Kimley-Horn's wastewater capabilities include design, implementation, and startup of wastewater treatment (WWTP) processes of all types—including screenings and grit removal headworks systems, influent pump stations, primary clarification, activated sludge systems, secondary sedimentation, chlorine and ultraviolet (UV) disinfection systems, effluent disposal, and solids handling including thickening, digestion (aerobic and anaerobic), sludge dewatering, and conveyance systems. Our experts are familiar with all steps of the process from pretreatment to effluent disposal and biosolids management.

Master Planning and Feasibility Studies

Our approach to master planning is to create a workflow which **encourages input from Client Staff at all stages (planning, design, operations and maintenance) which concludes with detailed and presentable recommendations. This is achieved by doing the following:**

- Hosting stakeholder meetings
- Defining service area goals
- Creating detailed but easy to read maps
- Prioritizing system needs
- Providing recommendations and cost estimating
- Presenting findings to client staff and the public

Subsurface Utility Exploration (SUE)

We understand that the proper identification and locating of underground utility infrastructure can be the difference between a successful project and lengthy schedule delays. **Our in-house subsurface utility exploration team has the capabilities to provide SUE Level B services, providing the accurate locations of all underground utility systems, both public and private.** This information enables our design teams to provide accurate utility conflict reviews and avoid surprise conflicts during construction.

In addition, our team provides expert utility coordination services, interfacing with private and public utility representatives to obtain mapping, locate existing facilities, identify conflict resolution/mitigation strategies, and coordinate private utility relocation, if necessary. Our prompt proactive utility coordination provides ease of mind to our clients and limits the potential for schedule and budget impacts.

Standard to many of our utility assignments is the understanding of soils and geotechnical conditions. Whether used to ensure the right bedding and cover is specified for utility pipeline design, or for proper tank or facility foundation design, having the site specific soils composition is critical. In areas of high groundwater, such as adjacent locations to water bodies and river beds, or areas with historic corrosive soils, the Kimley-Horn utility team will ensure proper geotechnical investigation is completed for the longevity of the final improvements.

Electrical Designs

Kimley-Horn offers electrical engineering experience in design, analysis, and construction management. This includes design and analysis of low- and medium-voltage power distribution systems; interior, exterior, and architectural lighting; building modification; engine generators; motor control centers; pump controls and SCADA systems; battery backup; voltage drop and short circuit calculations for power distribution; photometric design and calculations; fiber backbone design; and distributed antenna systems.

Environmental Surveys, Assessments Monitoring and Management

Our team, consisting of National Environmental Policy Act (NEPA) planners, biologists, environmental scientists, GIS specialists, and hazardous materials remediation specialists is structured to meet each task that could be involved in this contract. In addition, as a national firm, backed by

over 7,400 employees in more than 120 offices around the country, we have the ability to meet the personnel needs of this contract. Environmental services provided include:

- Section 404/401 Permitting
- Preliminary Jurisdictional Delineations (PJDs), Approved Jurisdictional Delineations (AJDs), as well as individual and general (regional and nationwide) permit applications
- Biological Evaluations
- Habitat analysis, threatened and endangered species evaluations, and designing and conducting species-specific surveys
- Hazardous Materials Assessments
- Preliminary Initial Site Assessments (PISAs) and Phase I/II Environmental Site Assessments (ESAs)
- Section 4(f)/6(f) resources, environmental justice/ Title VI, prime and unique farmland, visual resources, floodplains, and sole source aquifers analysis
- GIS analysis
- NEPA Documentation
- Categorical Exclusions (CEs), Environmental Assessments (EAs), and Environmental Impact Statements (EISs)

Any historical/archaeological/cultural resource assessments tasks will be completed by a qualified subconsultant.

Geotechnical Assessments

The geotechnical assessments done throughout the project areas will be completed by a subconsultant.

Solid Waste Studies, Landfill System Design and Analysis

All projects areas that require these services will be completed by a subconsultant throughout the project.

Expert Witness

Kimley-Horn's forensic engineers and specialists apply accepted scientific and engineering principles to collect evidence and conduct the analysis to understand your case. Our licensed professional engineers are experts in evaluating claims related to property, buildings and/or building systems, vehicle crashes, premise liability, workplace accidents, fire causation, product failure, construction defects, structural failures, storm damage, and more.

Our advantage is in our experts' experience and understanding of the best strategy for the use of expert testimony coupled with the state-of-the-art engineering analysis. All our experts have the ability to provide clear answers in an efficient, timely manner, and to provide expert testimony when necessary.

Insurance professionals and attorneys nationwide call on Kimley-Horn's experts with many years of practical experience, education, and specialized training. Kimley-Horn has more than 120 offices across the U.S. allowing our experts to draw on nationwide resources resulting in exceptional services. In addition, our experts are capable and experienced in providing vast technical data in a way that a jury can understand.

Project Management

Kimley-Horn's project management begins with a complete and thorough understanding of the project, including communication/coordination, assigned scope, schedule, budget, and quality control requirements. Effectively managing these functions throughout the development of projects is paramount and we consistently:

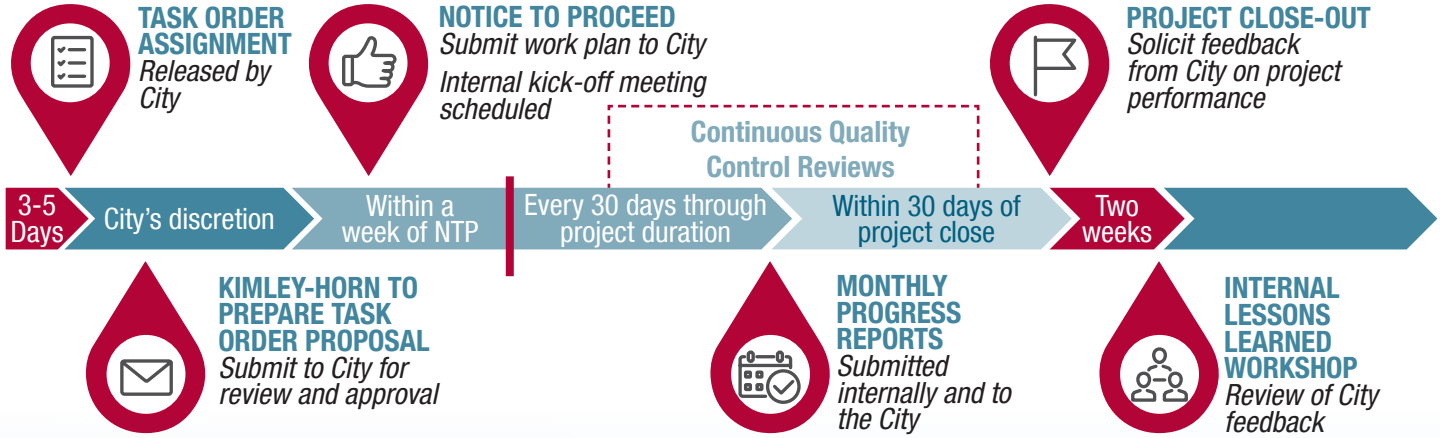
- Take ownership of task orders
- Conduct productive meetings
- Employ effective communication with project team and stakeholders
- Identify issues and resolutions early
- Provide alternatives/options and recommendations
- Determine action items and make decisions
- Monitor project budget and schedule
- Respond quickly to design and construction requests
- Build Quality Assurance/Quailty Control (QC) into every task

D. Project Schedule

Meeting project schedules is beneficial to both the City and critical stakeholders. Our team recognizes that control of the schedule is vital to the success of any project that may arise during the contract. Through communication with City staff, our team will work to create and define project requirements, recognize potential obstacles to success, identify possible opportunities to achieve additional value within the identified budget, and create a project work plan that allows us to accomplish the City's goals. We recognize that meeting schedule demands allows stakeholders to feel that their approval of the funding was a wise investment. Kimley-Horn has developed a process that ensures our team works in concert with the City to maintain a comprehensive schedule approach to on-call task orders. We include City staff in critical decision-making points so the project team and City staff can agree upon the best course of action to keep the project on track at all times.

Project Manager Ray Montoya has experience working with the City, which affords him the necessary background information to successfully provide project planning and design services. The graphic below details our typical approach to on-call task orders.

Figure 1: Schedule Timeline

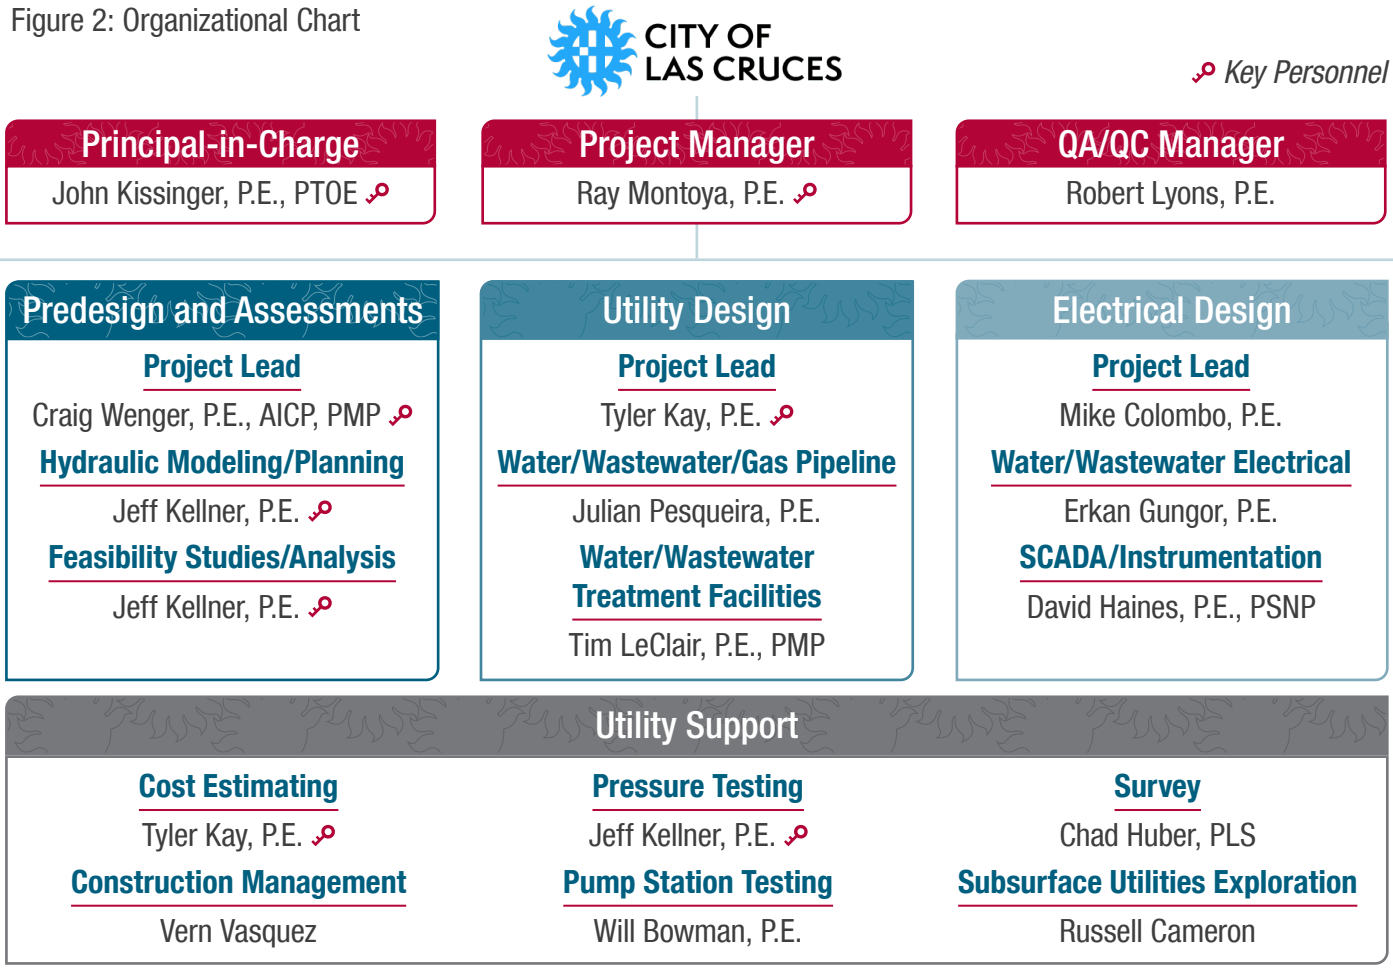


Evaluation Criteria No. 2: Qualifications and Competence

A. Key Personnel Qualifications

Our project team has been thoughtfully assembled by Ray Montoya, who will serve as the contract manager for this on-call contract. Below is our organizational chart, which details our project team and identifies key personnel and relationships among team members.

Figure 2: Organizational Chart



B. Contact Information and Roles for Firms Responsible for Contract Administration

Kimley-Horn's contact information and areas of responsibility is shown below. Hiring subconsultants on an as-needed basis is one of Kimley-Horn's strategic approaches. This flexible model allows us to bring in specialized professionals on a project-by-project basis, tailoring our team to meet specific client needs.

Firm Name and Principal Member	Areas of Responsibility	Address
Kimley-Horn **Contract Manager:** Ray Montoya, P.E. **Phone:** 602.944.5500	**Design for:** Computer Network Analyses and Design for W/WW and Gas Systems, Well House Design, SCADA, Water Treatment Process, Master Planning and Feasibility Studies, SUE, Electrical Designs, Evironmental Surveys, Assesments Monitoring and Management **Additional:** Expert Witness, Project Management	7740 N. 16th Street, Suite 300 Phoenix, AZ 85020

Key Personnel Bios

Several of our key personnel have long and highly respected records of serving municipalities on similar projects. We have noted below their years of experience, length of time with the firm, percentage of time assigned, and professional registrations.

Ray Montoya // Project Manager

26 Years of Experience | **8** Years with Kimley-Horn | **Time Assigned:** 70%
Professional Credentials: Professional Engineer in NM (#20889), AZ, HI, NV, and UT

Ray has 26 years of experience in the water/wastewater industry. He has prepared water and sanitary sewer improvement plans, water and sewer hydraulic computer models, master water and sewer studies, and water reuse system plans. His experience includes a wide range of projects in the water/wastewater industry including pipelines, pump stations, pressure-reducing stations, and various preliminary and detailed design reports. He has experience in pipeline and utility design utilizing alternative construction methods, including pipe bursting, slip lining, micro-tunneling, and directional drilling. **As your Project Manager, Ray will serve as the main point of contact for the City.**

Relevant Experience

- City of Tucson, On-Call Transmission Mains, Tucson, AZ
- City of Las Vegas, Wastewater Treatment On-Call Services, Las Vegas, NV
- State of Arizona, PFAS Decision Tree Development, Statewide, AZ
- City of Nogales, Nogales International WWTP Master Plan and Permit Modifications, Nogales, AZ

John Kissinger, P.E., PTOE // Principal-in-Charge

37 Years of Experience | **27** Years with Kimley-Horn | **Time Assigned:** 20%
Professional Credentials: Professional Engineer in NM (#25907), AZ, CA, ID, IL, IN, IA, KS, MN, MO, MT, NE, NV, OH, UT, WA, and WI; Professional Traffic Operations Engineer (PTOE)

John has 37 years of consulting experience designing roadway, traffic, and ITS projects. John's experience includes leading projects from the initial planning and feasibility study stages through final design and construction. He also is experienced in the public involvement process including city council and large group presentations, facilitation of open house meetings, and leading small group and one-on-one meetings. **As your Principal-in-Charge, John will provide general oversight of the project to see that your needs are being met and that you receive a high level of service.**

Relevant Experience

- City of Las Cruces, Signal Timing at North Main and Solano, Las Cruces, NM
- City of Las Cruces, Signal Timing at Missouri and Triviz, Las Cruces, NM

Craig Wenger, P.E., AICP, PMP // Predesign and Assessments Lead

15 Years of Experience | **1** Year with Kimley-Horn | **Time Assigned:** 45%
Professional Credentials: Professional Engineer in AZ (#77523) and DE

Craig has 15 years of experience in the water/wastewater industry. He has prepared water and sanitary sewer improvement plans, water and sewer hydraulic computer models, master water and sewer studies, and treatment system plans. Craig is the leader of grants services for Kimley-Horn in Arizona. His unique approach of looking at the Capital Improvement Plan (CIP) holistically to determine the best projects for grants has elevated his clients' positions for competitive funding. Additionally, Craig has helped his clients pursue new funding sources outside of the typical water and wastewater funding streams. Craig is also leading the efforts with the State of Arizona on PFAS treatment moving forward.

Relevant Experience

- City of Tucson, Silverbell Roadway Waterline Modifications, Tucson, AZ
- City of Nogales, Nogales International WWTP Master Plan and Permit Modifications, Nogales, AZ

Tyler Kay, P.E. // Utility Design Lead and Cost Estimating

14 Years of Experience | **14** Years with Kimley-Horn | **Time Assigned:** 45%
Professional Credentials: Professional Engineer in AZ (#72358) and TX

Tyler has 14 years of experience serving as project manager, project engineer, or discipline task lead on water and wastewater infrastructure projects. His experience includes water distribution and pumping system design, sanitary sewer collection, lift station, and force main design, site civil for water and sewer facilities, condition assessments for lift station and sanitary sewer lines with experience in odor and corrosion mitigation and trenchless rehabilitation design, routing and alignment studies, elevated and ground storage tank design and rehabilitation, and construction contract administration.

Relevant Experience

- City of Mesa, Hawes Road 6-inch Gas Line and 30-inch Waterline, Mesa, AZ
- City of Mesa, Gantzel Road Gas Line Alignment Study and Design, Mesa, AZ

Jeff Kellner, P.E. // Hydraulic Modeling/ Planning, Feasibility Studies/Analysis, and Pressure Testing

7 Years of Experience | **5** Years with Kimley-Horn | **Time Assigned:** 50%
Professional Credentials: Professional Engineer in AZ (#73567)

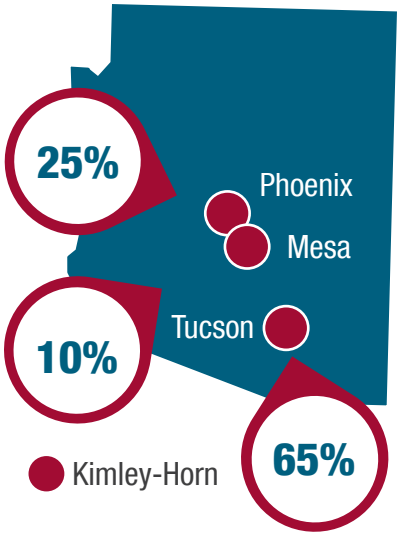
Jeff has seven years of experience with a focus on W/WW. His experience focuses on W/WW master planning and design, hydraulic modeling, and asset management. Jeff has a range of wastewater planning experience including CIP forecasting, population and flow projections, land use planning, inflow and infiltration assessments, and development reviews. He is adept in working in teams, and has cooperated with fellow engineers, planners, and GIS professionals to create detailed water and wastewater master plans. Jeff is proficient in a number of modeling software packages including InfoWater, InfoSewer, InfoWorks ICM, InfoSWMM, WaterGEMS, SewerGEMS, WaterCAD, and SewerCAD.

Relevant Experience

- City of Globe, WWTP Evaluation and Design, Globe, AZ
- City of Surprise, Special Planning Area 2 (SPA2) Wastewater Master Plan Update, Surprise, AZ

C. Location and Percentage of Work to Be Performed

To the right, we have included a graphic to represent the percentage of work to be performed at each office location, which is based off of where team members sit and operate.



D. New Mexico Registration

Ray Montoya, P.E. is a Professional Engineer in New Mexico (#220889). He will be responsible for and in direct charge of the work taking place for this on-call contract. Kimley-Horn is authorized to conduct business in New Mexico.

Agreements with the City

Kimley-Horn has previously executed multiple agreements with the City of Las Cruces. We are confident that we will be able to reach mutually agreeable terms and conditions. We kindly request the City consider the following minor modifications:

- RFP, Page 10, F. Insurance Requirements, 1. Professional Liability: Professional Liability insurance is per claim, not occurrence.
- RFP, Page 10, 7.: Kimley-Horn cannot name the City as additional insured on workers' compensation and professional liability insurance.
- Professional Services Agreement, page 5, 18. Indemnity and Limitation: Strike "in whole or in part" all three times it appears in lines 3-4 and replace with "solely" as we have done in previously executed contracts with the City.

Evaluation Criteria No. 3: Performance of the Firm

Similar Experience

Kimley-Horn has successfully delivered on hundreds of traffic engineering projects nationwide. Below, we have included some of our most relevant experience accompanied by the client contact person for each project.

WWTP Evaluation and Design // Globe, AZ

Kimley-Horn is leading an evaluation and design upgrades at the City's WWTP. Project included condition assessment and upgrade recommendations for this existing 2.0-MGD facility, currently producing Class B effluent. This includes **hydraulic and process modeling to evaluate current and future operations of the existing headworks, oxidation ditch, advanced aeration, secondary clarifiers, gaseous chlorine, and solids handling facilities.** Plant improvement recommendations were made to improve aged infrastructure and meet A+ reclaimed effluent requirements and provide the City with alternative options for effluent disposal while improving overall operability and efficiency. Improvements and conceptual design included improved headworks to provide increased grit removal and redundancy, flow and process equalization to all for improved operations during influent flow fluctuations, the addition of tertiary filtration and UV, and improved discharge and solids handling. Alternatives were provided based on estimated construction costs and long-term O&M costs, and all alternatives were developed in close coordination with the onsite operations staff.

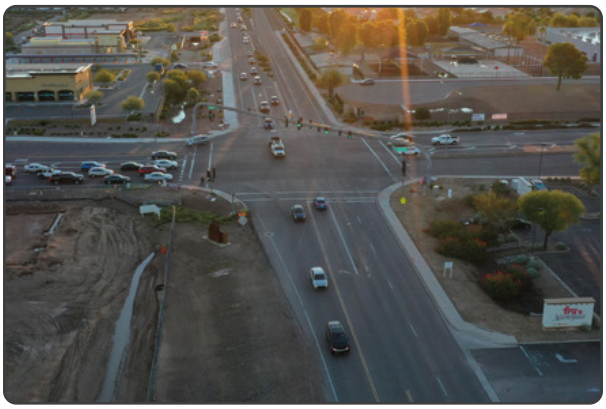
Dates: 1/2023 – Ongoing (substantially complete) **| Reference:** City of Globe, Paul Jepsen, 602.672.6024

Hawes Road Gas and Waterline // Mesa, AZ

This contract includes **design and coordination for approximately 0.5 miles of 6-inch gas line** along Hawes Road from Elliot Road to the south. Kimley-Horn designed the roadway improvements and recently completed the design for the gas line to be installed before the roadway improvements to prevent the City having to cut new pavement. The project also **involved the design of a 30-inch waterline next to the gas line.**

Dates: 1/2023 – 5/2023 **| Reference:** City of Mesa, Scot Sherwood, 480.644.2509

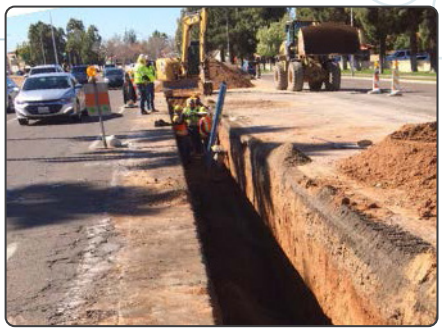
Gantzel Road Gas Line Alignment Study and Design // Mesa, AZ



Kimley-Horn completed an alignment study that included the evaluation of multiple **alignment alternatives for the City's proposed 12-inch high pressure (HP) natural gas line.** Utilizing both internal natural gas experience and guidance provided by the City, Kimley-Horn generated a weighted route determination matrix based on the following evaluation criteria: route cost, installation complexity, ongoing/future roadway improvements, anticipated permitting difficulty, and impacts to the public. The final submittal included Kimley-Horn's route recommendation and analysis, an in-depth cost approximation for the potential routes, and preliminary plans for installation along the recommended route. **Kimley-Horn was recently selected for full design and construction phase services.**

Dates: 1/2022 – 8/2022 (study), 8/2023 – Ongoing (design) **| Reference:** City of Mesa, Scot Sherwood, 480.644.2509

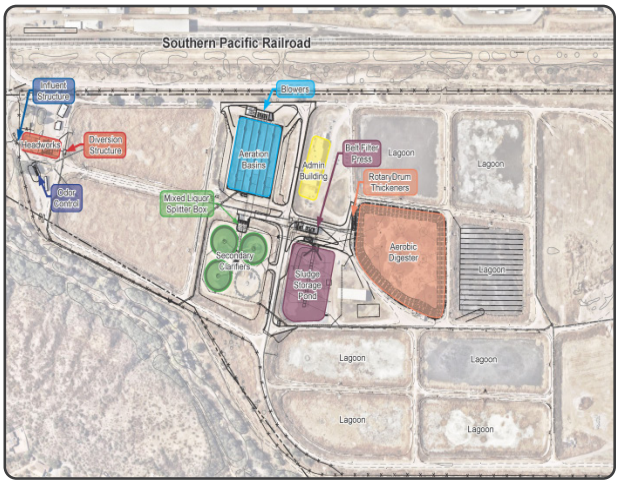
Gilbert Road Waterline // Gilbert, AZ



Kimley-Horn provided preliminary and final design for a **new 16-inch waterline replacement, including numerous laterals and over 20 service connections and stubs along a heavy traffic corridor.** Scope included alignment selection to minimize traffic disruption and Method of Planned Operations (MOPO) development. Kimley-Horn worked with the construction manager at risk (CMAR) to develop a phasing plan to maintain two traffic lanes during waterline installation.

Dates: 9/2017 – 1/2020 **| Reference:** Town of Gilbert, Ryan Blair, 480.503.6906

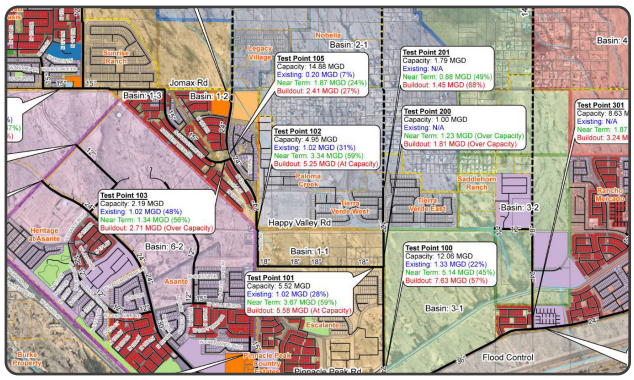
Border Water Infrastructure WWTP Master Plan and Design // Nogales, AZ



Kimley-Horn, as part of a design-build team, developed the overall wastewater treatment master plan for the improvement of the existing 15-MGD facility. This included the **evaluation of the treatment trains to determine remaining service life, including structural and Electrical, Instrumentation & Controls (EI&C); preparation of hydraulic and biological models; preparation of planning documents** for capacity upgrades to 20 MGD; coordination with Arizona Department of Environmental Quality (ADEQ) on future discharge permit modifications; evaluating potential reuse opportunities; and development of a capital improvement list/30% design set to achieve the expansion. We recommended design improvements and/or upgrades including headworks (screening and grit removal), clarifiers, aeration basins, filter replacements, UV disinfection, and solids handling (digesters, presses, and drying).

Dates: 4/2022 – Ongoing

Special Planning Area 2 (SPA2) Wastewater Master Plan Update // Surprise, AZ



Kimley-Horn provided **wastewater planning services** to the City of Surprise including system mapping, flow projections, hydraulic analysis, and CIP forecasting. Specifically, the project **updated previous planning efforts to reflect known development scenarios, current land use plans, and updated City of Surprise Wastewater Design Standards.** The results of the SPA2 Wastewater Master Plan Update are to assist in the City's development of future wastewater service in SPA2.

Dates: 10/2021 – 1/2022

CITY OF LAS CRUCES

PROJECT ASSIGNMENT AGREEMENT

23-24-052 UTILITIES ENGINEERING SERVICES

PROJECT NAME

Pursuant to terms and conditions of City of Las Cruces (CITY) Contract No. 23-24-052 dated June 1, 2024 between the CITY and Kimley-Horn and Associates, Inc. (ENGINEER), as amended and incorporated herein by reference, the City and Contractor hereby agree on this _____ day of _____, 20___, as follows:

1. In a satisfactory and proper manner, the ENGINEER shall perform SERVICES as proposed in response to the CITY's RFP No. 23-24-052 and ENGINEER's proposal as set forth in ATTACHMENT A attached hereto.

2. The estimated completion date is number days after a Notice to Proceed is issued by the CITY to the ENGINEER.

3. In consideration for the satisfactory completion of the work agreed to herein, compensation shall be made in the amount of $dollars.cents, plus NMGRT. Invoices issued by the ENGINEER shall be made monthly / upon completion of project with payment by the CITY being made within 30 days upon receipt of undisputed invoice.

EXHIBIT "I"

CITY OF LAS CRUCES

PROFESSIONAL SERVICES AGREEMENT

THIS AGREEMENT, made and entered into on this _____ day of _____, 2024 by and between the City of Las Cruces, New Mexico, hereinafter called "CITY" and Magnolia River Services, Inc., of 711 Nance Ford Rd SW, Ste E, Hartselle, AL, 35640, hereinafter called "CONTRACTOR".

1. PROJECT DESCRIPTION
Utilities Engineering Services on an as needed basis via Project Assignment Agreements (Attachment "A") during the term of this AGREEMENT.

2. SCOPE OF SERVICES
In a satisfactory and proper manner, the CONTRACTOR shall perform SERVICES, as proposed in response to the CITY'S RFP No. 23-24-052, as set forth in Exhibit A, attached hereto and made a part of this Agreement.

The CONTRACTOR is authorized to extend the same terms and conditions of this Agreement to other governmental entities conditioned upon the procurement laws and regulations of those entities. The CITY shall not be a party nor have any liability relating to such extensions.

3. APPROPRIATIONS
The terms of this Agreement are contingent on sufficient appropriations and authorization being made by the City Council for the performance of this Agreement. If sufficient appropriations and authorizations are not made by the City Council, this Agreement shall terminate upon written notice given by the CITY to CONTRACTOR. The CITY'S decision as to whether sufficient appropriations and authorizations exist shall be accepted by CONTRACTOR and shall be final.

4. COMPENSATION
The CITY shall compensate CONTRACTOR for the performance of SERVICES under this Agreement an amount agreed to for each assigned project, plus applicable taxes. CONTRACTOR shall perform the SERVICES upon receipt of a purchase order or written Notice to Proceed for each assigned project from the CITY. The CITY cannot authorize costs to be incurred prior to such written Notice to Proceed. CONTRACTOR shall submit invoices upon completion of the project. CITY shall pay invoices Net 30 days upon receipt of undisputed invoice.

CONTRACTOR is responsible for payment of State of New Mexico Gross Receipts Tax levied on the amounts payable under this Agreement. CONTRACTOR agrees to comply with all federal and state tax payments and report all items of gross receipts as income from the operations of its business.

5. DEVOTION OF ADEQUATE TIME
CONTRACTOR will devote the necessary hours each week to the performance of projects that are required by the CITY and it will serve the CITY diligently and faithfully,

and according to its best ability in all respects and will promote the best interests of the CITY.

6. TERM AND SCHEDULE
This Agreement shall become effective on June 1, 2024 for a term of 5 years through May 31, 2029.

CONTRACTOR shall perform the SERVICES in accordance with the time set forth as agreed upon by the CITY and CONTRACTOR and as agreed to for each project assigned under the terms of this Agreement.

7. EXTENSIONS, CHANGES, AND AMENDMENTS
This Agreement shall not be extended, changed, or amended except by instrument in writing executed by the parties. The CITY shall not be liable for payment of any extra services nor shall CONTRACTOR be obligated to perform any extra services except upon such written agreement. Such written approval shall indicate the date said extension, change, or amendment is effective and shall be signed by the parties to this Agreement. In the event that the parties cannot reach agreement as to a particular change, the issue shall be resolved pursuant to Article 21.

8. CHANGES AND EXTRA SERVICES BY THE CITY
The CITY may make changes within the general scope of the SERVICES plus may also request CONTRACTOR to perform other extra services not incorporated within the Services set forth in this Agreement. If the CONTRACTOR is of the opinion that such change causes an increase or decrease in the cost and/or the time required for performing the changes or other services required by the City, CONTRACTOR shall so notify the CITY of that fact within five (5) business work days from the date of receipt of change by the CITY. The CITY shall provide written response to the CONTRACTOR within five (5) business work days from the date of receipt of CONTRACTOR'S written notification.

9. CHANGES AND EXTRA SERVICES BY THE CONTRACTOR
In the event a condition is identified by the CONTRACTOR which, in the opinion of the CONTRACTOR, changes the services, costs, and/or time required for performance under this Agreement, the CONTRACTOR shall provide written notification to the CITY within five (5) business work days of such identification. The CITY shall respond in writing to such notification within five (5) business work days from the date of receipt of CONTRACTOR'S notification.

10. DELAYS
In the event that performance of SERVICES is delayed by causes beyond reasonable control of CONTRACTOR, and without the fault or negligence of CONTRACTOR, the time and total compensation for the performance of the SERVICES may be equitably adjusted by written agreement to reflect the extent of such delay. CONTRACTOR shall provide the CITY with written notice of delay pursuant to Article 9 including therein a description of the delay and the steps contemplated or actually taken by

CONTRACTOR to mitigate the effect of such delay. The CITY will make the final determination as to reasonableness of delays.

11. TERMINATION
This Agreement may be terminated by either party hereto upon fifteen (15) calendar days written notice in the event of substantial failure by the other party to perform in accordance with the terms of this Agreement through no fault of the terminating party. This Agreement may also be terminated by the CITY for its convenience or because the PROJECT has been permanently abandoned, but only upon fifteen (15) calendar days written notice to CONTRACTOR.

In the event of termination, CONTRACTOR shall be compensated for all services performed and costs incurred up to the effective date of termination for which CONTRACTOR has not been previously compensated.

Upon receipt of notice of termination from the CITY, CONTRACTOR shall discontinue the SERVICES unless otherwise directed and upon final payment from the CITY deliver to the CITY the required number of copies of all data, drawings, reports, estimates, summaries, and such other information and materials as may have been accumulated by CONTRACTOR in the performance of this Agreement, whether completed or in process.

12. RECORDS AND AUDITS
CONTRACTOR will maintain records indicating dates, length of time, and services rendered. The CITY has the right to audit billings both before and after payment, and contest any billing or portion thereof. Payment under this Agreement does not foreclose the CITY'S right to recover excessive or illegal payments. CONTRACTOR will retain records for five (5) years after the completion of the project.

13. DISCLOSURE AND OWNERSHIP OF DOCUMENTS, PRODUCTS, DESIGN, ELECTRONIC FILES
All technical data, electronic files, and other written and oral information not in the public domain or not previously known, and all information, electronic files, and data obtained, developed, or supplied by the CITY will be kept confidential and CONTRACTOR will not disclose to any other party, directly or indirectly, without the CITY'S prior written consent unless required by lawful order.

All technical data, electronic files, products developed, operational parameters, blueprints, and other information and work of the CONTRACTOR shall be the sole property of the CITY and shall be delivered to the CITY when requested and at the end of the Agreement.

14. INDEPENDENT CONTRACTOR
CONTRACTOR represents that it has, or will secure, at its own expense, all personnel required in performing the SERVICES under this Agreement. Such personnel shall not be employees of, nor have any contractual relationship with the CITY. CONTRACTOR,

consistent with its status as an independent contractor, further agrees that its personnel will not hold themselves out as, nor claim to be officers or employees of the CITY by reason of this Agreement.

To the extent that CONTRACTOR employs any employees, CONTRACTOR shall be solely responsible for providing its own form of insurance for its employees and in no event shall CONTRACTOR's employees be covered under any policy of the CITY.

CONTRACTOR'S retention hereunder is not exclusive. Subject to the terms and provisions of this Agreement: (i) CONTRACTOR is able, during the Term hereof, to perform services for other parties; and (ii) CONTRACTOR may perform for its own account other professional services outside the scope of this Agreement.

CONTRACTOR is and shall be an Independent Contractor and shall be responsible for the management of its business affairs. In the performance of the work under this Agreement, CONTRACTOR will at all times be acting and performing as an Independent Contractor, as that term is understood for federal and state law purposes, and not as an employee of the CITY. Without limitation upon the foregoing, CONTRACTOR shall not accrue sick leave, jury duty pay, retirement, insurance, bonding, welfare benefits, or any other benefits, which may or may not be afforded employees of the CITY. CONTRACTOR will not be treated as an employee for purposes of: Workers' Compensation benefits; the Federal Unemployment Tax Act; Social Security; other payroll taxes, federal or any state income tax withholding; or the employee benefit provisions described in the Internal Revenue Code of 1986, as amended. Neither the CITY, nor its agents or representatives, shall have the right to control or direct the manner, details or means by which CONTRACTOR accomplishes and performs its services. Nevertheless, CONTRACTOR shall be bound to fulfill the duties and responsibilities contained in the Agreement.

15. NO JOINT VENTURE OR PARTNERSHIP

Nothing contained in this Agreement shall create any partnership, association, joint venture, fiduciary or agency relationship between CONTRACTOR and CITY. Except as otherwise specifically set forth herein, neither CONTRACTOR nor CITY shall be authorized or empowered to make any representation or commitment or to perform any act which shall be binding on the other unless expressly authorized or empowered in writing.

16. ASSIGNMENT

CONTRACTOR shall perform all the services under this Agreement and shall not assign any interest in this Agreement or transfer any interest in same or assign any claims for money due or to become due under this Agreement without the prior written consent of the CITY.

17. INSURANCE
CONTRACTOR shall obtain and maintain insurance at its own cost and expense during the life of this Agreement, and shall require Subcontractors, if any, to maintain during the life of his subcontract:

1. Commercial General Liability Insurance
   a. $1,000,000 per occurrence / $2,000,000 aggregate
   b. Coverage must include premises and operations, products and completed operations, and personal and advertising injury.
   c. The City of Las Cruces must be named as an Additional Insured for all coverages listed above on endorsements acceptable to the City.
   d. Coverage must be primary and non-contributory.
   e. Coverage must be per project or per location.
   f. Coverage must be on an occurrence form.
   g. Subrogation must be waived.
2. Commercial Auto Liability
   a. $1,000,000 per occurrence
   b. Coverage must be for “owned, leased, hired, and non-owned autos” or “any autos.”
3. Workers’ Compensation and Employers Liability
   a. Statutory Limits
   b. Employer liability – $1,000,000 each accident, $1,000,000 each employee by disease, $1,000,000 policy limit
   c. Subrogation must be waived.
4. Professional Liability: $1,000,000 per claim

Endorsements for additional insured coverage and waivers of subrogation must be provided as a condition of this Agreement and shall be noted on the certificate.

CONTRACTOR shall furnish the CITY with a certificate(s) of insurance showing CONTRACTOR and Subcontractors, if any, have complied with this Article. The CONTRACTOR shall provide insurance certificates before work is to start on the project and shall provide the CITY thirty (30) days written notification of cancellation of such policies.

18. INDEMNITY AND LIMITATION
CONTRACTOR shall indemnify, defend, and hold harmless the CITY from and against any and all claims, suits, actions, judgments, demands, losses, costs, expenses, damages, and liability caused in whole or in part by, resulting in whole or in part from, or arising in whole or in part out of the negligent acts, errors, or omissions of CONTRACTOR, its officers, employees, agents, or representatives in the performance of SERVICES under this agreement.

19. APPLICABLE LAW
This Agreement and the rights and obligations of the parties shall be governed by and construed by the laws of the State of New Mexico applicable to Agreements between

New Mexico parties made and performed in that state, without regard to conflicts of law principles. Venue shall be in the Third Judicial District, State of New Mexico.

CONTRACTOR shall abide and be governed by all applicable state law, CITY ordinances, and laws regarding the CONTRACTOR'S services or any work done pursuant to this Agreement, including anti-discrimination.

20. BREACH
In the event CONTRACTOR breaches any obligation contained in this Agreement, prior to instituting any action or dispute resolution procedure, the CITY shall give CONTRACTOR written notice of such breach. In the event CONTRACTOR fails to remedy the breach within five (5) working days of receiving such written notice, the CITY, at its sole discretion, without any obligation to do so and in addition to other remedies available under applicable law, may remedy CONTRACTOR'S breach and recover any and all costs and expenses in so doing from CONTRACTOR.

21. DISPUTE RESOLUTION
In the event that a dispute arises between CITY and CONTRACTOR under this Agreement or as a result of breach of this Agreement, the parties agree to act in good faith to attempt to resolve the dispute.

22. NOTIFICATION
All notices required or permitted under this Agreement shall be in writing and shall be deemed sufficiently served if served by Registered Mail addressed as follows:

TO CITY:	City of Las Cruces PO Box 20000 Las Cruces, NM 88004 ATTENTION: Tony Trevino
With Copies to:	City Attorney Purchasing Manager
TO CONTRACTOR:	Magnolia River Services, Inc. 711 Nance Ford Rd SW, Ste E Hartselle, AL 35640 ATTENTION: J. Heath McCleskey

23. SCOPE OF AGREEMENT
This Agreement incorporates all of the agreements, covenants, and understandings between the parties hereto concerning the subject matter hereof and that all such covenants, agreements, and understandings have been merged into this written agreement. No prior agreement or understanding verbal or otherwise of the parties or their agents shall be valid or enforceable unless embodied in this agreement.

24. SEVERABILITY
The parties agree that each provision of this Agreement is severable and the invalidity or unenforceability of any one or more of the provisions of this Agreement shall not affect the validity or enforceability of any other provision of this Agreement, and this Agreement shall be construed in all respects as if such invalid or unenforceable provisions were omitted.

25. CONFLICT OF INTEREST
CONTRACTOR represents and warrants that CONTRACTOR has no business, professional, personal, or other interest, including, but not limited to, the representation of other clients, that would conflict in any manner or degree with the performance of its obligations under this Agreement. If any such actual or potential conflict of interest arises under this Agreement, CONTRACTOR shall immediately inform the CITY in writing of such conflict. If, in the reasonable judgement of the CITY, such conflict poses a conflict to and with the performance of CONTRACTOR'S obligations under this Agreement, or is otherwise a violation of the CITY'S current policy or ordinances, then the CITY may terminate the Agreement immediately upon written notice to CONTRACTOR; such termination of the Agreement shall be effective upon the receipt of such notice by CONTRACTOR.

EXHIBIT A
SERVICES

A. Project Assignments
A Project assignment is initiated by the City providing the selected Engineer a detailed project description, including scope of work and any other special instructions needed by the Engineer to prepare items such as preliminary and final cost estimates, complete project plans and specifications, project reports, and other related engineering services. The awarded Engineers shall provide engineering services that may include but not be limited to, the following:
1. Computer network analyses for water, wastewater, and gas systems; design of water, wastewater, and gas utility systems; well house design; Supervisory Control and Data Acquisition (SCADA); water treatment process; master planning; feasibility studies; solid waste studies; land use permitting; subsurface utility exploration; boundary/easement survey; and National Pollutant Discharge Elimination System (NPDES) & Stormwater Pollution Prevention Plan (SWPPP) compliance.
2. Electrical design (wells, booster stations, lift stations, odor control stations, building electrical system design)
3. Computer network analysis for Gas (GasWork), Water (InfoWater), and Wastewater (InfoSewer). The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility
4. Solid waste studies, landfill system design and analysis
5. Environmental surveys, assessments monitoring and management, such as indoor air quality, asbestos, mold, and other related services for the City
6. Geotechnical Assessments, such as soil and groundwater testing for contamination and remediation, and other related services for the City
7. Expert witness in a judicial and/or quasi-judicial setting.
8. Project Management
9. Construction Inspection.

B. Project Assignment Agreements
A Project Assignment Agreement (a template of which is incorporated herein as ATTACHMENT “A”) will be negotiated and executed on a case-by-case basis for each specific project, and will include a cost proposal from the Engineering firm(s) proposing to do the work. The cost proposal may utilize one of the following pricing formats:
1. Lump Sum
2. Unit pricing to include:
    a. Hourly rate for various types of services requested by the City
    b. Charges for miscellaneous items such as blueprints, data, discs, rental of special equipment, etc.
    c. A statement of the billing procedures including minimum billing units, if any.
    d. Cost of sub-consultants (if any)
3. An alternative unit cost breakdown

C. Deliverables
Each project contract will require a list of deliverables, schedule/timeline and cost. The

Engineer may be required to supply to the City an of the following items, when specified and as requested on the Scope of Work for each individual project.

1. Preliminary report containing schedule of work and cost estimate.
2. Construction drawings and documents. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility. Provide hard copies and PDF format of the construction plans for Purchasing Section use.
   a. As-built drawings on electronic media and reproducible prints. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. All horizontal and vertical location datum information shall be coordinated with the City Surveyor. The utility location information shall be tied to project control monuments and referenced to project construction stationing. The project control survey shall be certified by a New Mexico Registered Land Surveyor. Metadata or “data about the data” shall be submitted with each as-built electronic file, preferably as a separate text file on the electronic submittal media, and shall include:
      - Name, address and phone number of the responsible land surveyor.
      - Date of completion of survey.
      - Equipment used to conduct the survey.
      - Horizontal and vertical control marks used to tie the survey to the City approved control.
      - Transformation factors needed to reduce Ground (local coordinate system) to Grid and combined scale factor used.
   b. “RECORD DRAWINGS” shall be clearly labeled on each sheet.
3. Computer network analysis for gas, water, and wastewater shall be provided to the City in appropriate electronic format. It shall include the entire model, including changes and a text summary (report) of the network analysis that includes assumptions, procedures, and results, and any graphics that clarify the analysis. The Engineering firm(s) shall verify the report format with the City. The computer network analysis shall be provided using the software listed below. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility.
   a. Computer network analysis for Gas: GasWork
   b. Computer network analysis for Water: InfoWater
   c. Computer network analysis for wastewater: InfoSewer
   d. Other design computer programs as approved by the City
4. Project reports.
5. Any other item specified in the contract for that project
6. Easement map and recording information

D. The selection of an Engineer for a specific project shall be based on experience with similar projects, references, performance in similar projects, and availability. This will include the ability to meet schedules, cost control, and responsiveness to client.

E. The Engineer shall have an engineering staff on-site everyday who is responsible, on behalf of the Engineer, for providing timely completion and response for performance of the terms of each Project Assignment Agreement during the progress of each individual project. Any deviation from this requirement is at the discretion of the City and must be approved in writing by the City prior to the start of any individual project.

City of Las Cruces

680 N Motel Blvd.

Las Cruces, NM 88007

27 February 2024

Magnolia River Services, Inc. (Magnolia River) is pleased to provide the City of Las Cruces (the City) this Utilities Engineering Services (RFP No. 23-24-052) proposal.

Magnolia River was founded over 23 years ago as an engineering, GIS, and inspection services company supporting the natural gas industry. We have since grown to a full-service infrastructure and operations firm with professionals supporting programs and projects across the United States. Magnolia River currently has nearly 500 employees that specialize in utility infrastructure and serve transmission and distribution companies in more than 29 states, with clients in state and local governments, natural gas and water utilities, and fossil and renewable energy.

Our professionals deliver quality solutions and services and provide superior service while carefully considering the needs of our clients. Magnolia River prides itself in its business philosophy – dedicated to making a difference, one relationship at a time.

Magnolia River appreciates the opportunity to provide professional solutions and develop a strong working relationship, and we look forward to successfully assisting the City on this project. If there are any technical or project related questions pertaining to items in this response, please contact Jared Willingham at jared.willingham@magnolia-river.com.

COST CONTENT **1**

PROFESSIONAL SERVICES ASSUMPTIONS AND CLARIFICATIONS 1
FIELD SERVICES ASSUMPTIONS AND CLARIFICATIONS 2

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

COST CONTENT

Based on the information provided at the time of preparing this proposal, Magnolia River has included general assumptions and clarifications as found below. If awarded work and issued a project assignment by the City, Magnolia River will require a detailed project description, including a scope of work and any other special instructions, in order to prepare proposals, cost estimates, project plans and reports, and other related items.

Some services are provided through third party subcontractors. These services include:

- Environmental services and permitting
- Geotechnical
- Survey
- Cathodic Protection / AC Mitigation

Magnolia River has a list of trusted partners that we utilize to complete these portions of the project. However, Magnolia River will be happy to use subcontractors recommended by the City on these portions.

Professional Services Assumptions and Clarifications

- Hours in excess of forty (40) hours per week will be charged at one and a half (1.5) times the standard rate.
- Rates listed will increase each year by 3%, with the initial increase going into effect on 1/1/2025 and subsequent increases effective every year thereafter on 1/1, unless mutually agreed to otherwise in writing by Magnolia River and Client.
- Subsistence for lodging, meals, and incidentals as defined by the GSA is guaranteed and will be billed to the client for scheduled worked and travel days.
    - Mileage for mobilization and demobilization will be billed at the standard IRS rate to/from the Magnolia River employee home office/home site to the project site.
    - Travel time for mobilization and demobilization will be billed at the hourly rate which corresponds with the labor category. A maximum of eight (8) e per day will be charged for travel.
    - Per diem (lodging and meals) for mobilization and demobilization for the number of required travel days to/from the project location.
- Non-GSA travel costs (airfare, rental car, etc.) and Other Direct Costs (ODC) incurred by Magnolia River, such as equipment rental, software license fees/maintenance, shipping, etc., will be invoiced to Client separately at cost plus 15%.
- Included in these hourly rates, Magnolia River will obtain all software needed for it to perform its professional services. These rates do not include providing Client

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

with a license to view or use the deliverables. Client may need its own license(s) to the software(s) to view or use the deliverables.

- All sub-contractor invoicing shall be at cost plus 20% markup. (A copy of sub-contractor invoices shall be attached with the Magnolia River invoice at time of submission).

Field Services Assumptions and Clarifications

- The rates provided are standard rates for on-call services. These rates are subject to a volume discount to be negotiated based on work award amounts for programmatic work.
- Hours in excess of forty (40) hours per week will be charged at the overtime rate for non-exempt positions.
- Rates listed will increase each year by 3%, with the initial increase going into effect on 01/01/2025 and subsequent increases effective every year thereafter on 01/01, unless mutually agreed to otherwise in writing by Magnolia River and Client.
- The Client expressly understands and agrees that all Magnolia River inspection services contracted for herein shall be for the sole benefit of the Client. Magnolia River, as the contractor providing inspection services shall not be liable for any facet of the infrastructure installation performed by the Construction Contractor or its subcontractors. Magnolia River is responsible for observing and documenting the installation of the Client assets, providing mapping grade GPS data when contracted, observe the Construction Contractor is following manufacturer's procedures, federal, state and Client policies and procedures for the infrastructure installation. Magnolia River personnel shall not manage or direct the Construction Contractor in its duties. If Magnolia River inspection personnel observe any violations or deficiencies in the infrastructure installation process, the Client shall be notified by Magnolia River orally and followed up in writing. Once Magnolia River notifies the Client of any deficiencies or violations referenced above then its duties and obligations under this Contract shall be deemed to have been met. It is the Client or its agents, not Magnolia River, who must then address those deficiencies or violations with the Construction Contractor. The Client specifically releases Magnolia River from any claims, suits, demands or liability of any type arising from the installation process or from any other work associated with the project other than the specific inspection services offered and agreed upon to be performed herein by Magnolia River.
- Should Client or Construction Contractor discontinue the execution of work for any reason, Magnolia River will be provided at least thirty (30) full business days' advance notice of this intent. Without such notice, Client will be charged eight (8) hours for the day past the discontinuation of work at the above-stated rate for the personnel assigned to the project.

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

- In the event in which an inspector is designated and ready for work on the project, but the project is delayed for more than one (1) working day, the Client will be billed for eight (8) hours plus per diem for each day the inspector is on standby.
- In case of inclement weather or stoppage of work by Client or Construction Contractor, Client agrees to pay Magnolia River at the applicable hourly rate: two (2) hours minimum, up to two (2) hours worked. If the work commences more than two hours, but up to four (4) hours, Client will pay four (4) hours. If work is performed over four (4) hours but less than eight (8) hours, Client agrees to pay Magnolia River for eight (8) hours per person.
- Subsistence for lodging, meals, and incidentals as defined by the GSA is guaranteed and will be billed to the client for scheduled worked days plus one (1). Example: For a four (4) day work week five (5) days per diem will be charged. For a five (5) day work week six (6) days per diem will be charged etc. Per diem paid will be based on the current (GSA) schedule for the location of the project.
    - Mileage for mobilization and demobilization will be billed at the standard IRS rate to/from the Magnolia River employee home office/home site to the project site
    - Travel time for mobilization and demobilization will be billed at the hourly rate which corresponds with the labor category
    - Per diem (lodging and meals) for mobilization and demobilization for the number of required travel days to/from the project location
- Mileage for travel from Client's designated daily reporting office to first job site and to any additional sites where services will be rendered shall be billed separately from the hourly rate and at the standard IRS mileage rate
- Non-GSA travel costs (airfare, rental car, etc.) and Other Direct Costs (ODC) incurred by Magnolia River, such as equipment rental, software license fees/maintenance, shipping, etc., will be invoiced to Client separately at cost plus 15%. (Not applicable to positions in the INSP rate category above.)
- A maximum of eight (8) hours travel time per day will be charged for travel.
- The hourly rates are inclusive of a laptop, cell phone, wireless hotspot, and various inspection hand tools.
- All sub-contractor invoicing shall be at cost plus 20% markup. (A copy of sub-contractor invoices shall be attached with the Magnolia River invoice at time of submission).

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

RFP NO. 23-24-052 UTILITIES ENGINEERING SERVICES – TECHNICAL PROPOSAL

TECHNICAL PROPOSAL

Engineering Business Unit

Technical Approach

Execution Plan

Magnolia River's goal in any project is clearly defining to the client and stakeholders an execution plan and associated schedule that is based upon successful similar projects. Magnolia River's execution plan follows a proven process with previous utility client projects to achieve quality deliverables. With a full-time staff of direct-employed engineers in all necessary disciplines, our approach to design development and execution allows us to be flexible, responsive, and efficient. Magnolia River has the internal resources necessary to deliver a custom solution for the City's identified needs.

Leveraging our experience and in-house knowledge with natural gas rules and specifications, as well as the application of our design and inspection standards to those specifications, allows Magnolia River to provide a schedule that most closely aligns with our clients' needs.

Magnolia River's project team will provide weekly updates and hold regular coordination meetings with the City to review the content of the design itself, identifying any changes from the prior submittal, any interferences or areas of concern, any equipment or details that are pending, etc. Additionally, weekly project status meeting updates will be held to discuss the project schedule, outstanding action items, submittals, and documentation approval status, etc.

Magnolia River's execution plan assumes that all submitted documentation will be reviewed and returned within 10 working days and that any Requests for Information (RFIs) will be closed within five working days.

Project Management Plan

Magnolia River's execution plan is documented in our Project Management Plan (PMP). A PMP is the key document Magnolia River uses to communicate to project stakeholders precisely what work is to be done, how the work is to be done, by whom, and when the work should be completed. Immediately after the Notice to Proceed (NTP), a PMP will be created and specifically tailored to the specifics of the City's project. The PMP provides the outline for overall project controls through detailed descriptions, and addresses topics such as detailed scope and project approach, schedule of meetings, team personnel, communication protocols, document distribution requirements, and project deliverables.

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

Tasks to be Accomplished

The first step with any Magnolia River design is to seek to understand client issues and requirements and work to develop agreeable solutions. Magnolia River values the input from the client's field personnel on every design project. Many of Magnolia River's engineers have prior utility operational experience, which is valuable when addressing client challenges. We review the specifics of the issue, then find the best solution based on our previous design and operations experience.

Magnolia River will begin engineering and design after NTP is issued by the City. Our first task will be supporting the route selection/site layout/conceptual design in the designated project location. A review meeting will be established to gain agreement on the initial or preliminary design.

Upon receipt of the site-specific information, Magnolia River will start detailed engineering. The type of anticipated deliverables includes geotechnical analysis and reporting, P&IDs, single line diagrams, underground utility and pipe routing, piping design, foundations, and electrical and control schematics. Magnolia River's detailed engineering schedule is based on the timely receipt of detailed site-specific vendor information from the City. It is important that design freeze dates for key input deliverables are established to ensure efficient downstream design is completed to support the construction effort.

Task Breakdown

Natural Gas Network Analysis

a. A kick-off meeting will be held for scheduling and verifying needed data for the model creation.

b. Required data to be supplied by the City includes, but is not limited to:

- Piping for distribution system
- Customer demands and meter location data
- Regulator station locations, set points, and flow rates
- SCADA and total system demand data

c. Gas main data received from the City will be reviewed for GIS (pipe connectivity) errors and corrections made for importing into software.

d. Input from the City will be utilized to verify the pipe network in the model is as accurate as possible.

e. A change log will be created to track and verify updates to GIS data that are necessary for importing into the modeling software.

f. The City is to provide a resource to review and approve noted changes in a timely manner.

g. Current supply pressure and flow rates will be applied to the pipe network to verify that the connectivity of imported pipe is error free.

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

h. Any errors found will be corrected in the modeling software.
i. Customer load data will be imported into the model.
j. The model will be calibrated using the maximum town border station loads to replicate actual field conditions.
k. Once calibrated, "what-if" scenarios can be modeled to predict pressures in the distribution system based on future growth demands.

Natural Gas Distribution and Service Line Design

a. Review the client's provided main/service design standards
b. Review the client's provided GIS data for existing facilities for replacement projects and new growth areas
c. Determine for main projects; one-way or two-way feed
d. Prepare required permits
e. Prepare maintenance of traffic (MOT) plan, if necessary
f. Develop bill of materials (BOM)
g. Design main/service accounting for pipe sizing
h. Offset from back of ROW or edge of pavement; to be indicated at least on a block basis and more detailed at interconnects
i. Conflict resolution with other utilities/structures allowing for horizontal and vertical clearances
j. Adherence to DOT 192 and the client's design standards
k. Provide as-built drawings from field notes and data

Other Natural Gas Distribution Infrastructure Design

a. Review the client's provided main/service design standards
b. Review the client's provided GIS data and anticipated load data
c. Perform route analysis to determine an optimum route
d. Develop a P&ID for regulator stations/facilities accounting for loads, pressure requirements, velocities, SMYS calculations, regulator capacities, over pressure protection, SCADA requirements, etc.
e. Develop site layout for stations considering drainage, ingress/egress for vehicle traffic, safety considerations for personnel gates, fencing, grounding, electrical wiring, hazardous class determination, building requirements, pipe supports/thrust blocks, etc.
f. Perform hydraulic analysis of linear projects and facilities to determine optimum pipe sizing considering future system growth
g. Perform environmental/cultural assessments of pipeline routes and facility sites
h. Determine best means of construction; horizontal directional drills (HDDs) at water/wetland crossings; jack and bores (JABs) at road/railroad crossings
i. Perform soil investigative bores for needed HDD/JAB designs

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

j. Develop a soil erosion prevention plan
k. Prepare a cathodic protection plan
l. Determine need for AC mitigation
m. Develop BOM
n. Prepare required permits
o. Prepare MOT plan, if necessary
p. Assure all designs adhere to client's design standards and DOT 192
q. Provide as-built drawings from field notes and data

30% Design

The 30% design phase will include: a Preliminary Engineering Report (PER), surveying, identification of permit requirements, and engagement with key stakeholders.

60% Design

The 60% design phase will include: a geotechnical report, easement descriptions if required, permit coordination, finalization or horizontal and vertical utility locations, and a field walk through of the alignment with the City.

90% Design

The 90% design phase will include: filing for permits, finalization of horizontal and vertical utility location as required, construction sequencing review, and constructability review.

100% Design (IFC)

The 100% design phase will include: permit approvals, easement acquisition if necessary, and submittal of final documents.

Project Schedule Creation

We understand the criticality of effectively managing projects according to a project schedule. Our initial efforts to establish a project schedule occur in the planning stages of the project. Our project manager sources input from client requirements, discipline leads, and subcontract leads to understand their activities and deliverables for the project. Gathered input, along with an understanding of task dependencies, provide the means for developing the project schedule and encourages team ownership of the schedule.

A preliminary project schedule is developed (we utilize MS Project) prior to the project kick-off meeting and discussed during the meeting to make everyone familiar with the schedule expectations. Following the project kick-off meeting, the project schedule is finalized and shared amongst the internal team and all stakeholders. This detailed project schedule includes work packages, major tasks/phases, and progress milestones.

We utilize regularly scheduled meetings amongst our internal team and stakeholders to review progress, identify issues and risks, develop action items, assign responsibilities, set deadlines, and track the project to completion. If we anticipate or experience a deviation in

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

schedule, we discuss solutions and implement corrective action. Actions can include reinforcement of schedule expectations, resolving technical or software issues, adding resources where necessary (crashing), or working parallel work packages with some added risk for re-work (fast tracking). In short, we utilize a variety of methods to ensure the project schedule is maintained.

Inspection Business Unit

Management Oversight

Performing a crucial role in our success is the service and function of Magnolia River's Inspection Managers (IMs) and Senior Inspection Managers (SIMs). Magnolia River's group of IMs/SIMs are valuable resources for the client and are put in place to provide support and leadership. Every inspector at Magnolia River reports directly to an IM. In most scenarios, each IM is responsible for 10-20 inspectors. IMs are responsible for resourcing inspectors, meeting with clients, verifying all documentation is being properly collected, conducting frequent site visits and audits, approving time sheets and invoices, and other critical supporting functions.

The SIM assigned to the client has oversight of the entire Inspection Program for that specific client. Each IM reports directly to a SIM and SIMs will typically have 4-6 IM's reporting to them. SIMs act as the high-level, single point of contact for the client. SIMs are directly involved with aspects of the Inspection Program, including but not limited to quality management, staffing, planning, coordinating with our Training and Compliance department for continued education and additional training, and coordinating with the client to clear roadblocks and provide consultative support. Our team of IMs and SIMs are incentivized on safety, the quality of the Inspection product, and overall, client satisfaction.

Quality Management

Magnolia River inspectors utilize a robust, flexible, and scalable cloud-based enterprise software solution called FieldLogIQ to update projects in real-time. This proprietary application is designed to collect data, easily generate management reports for effective field operations and document regulatory compliance, tracking, and traceability. See Attachment B for more information on FieldLogIQ.

Magnolia River leverages a multi-layer Quality Management program to ensure the delivery of outstanding results to the client. Quality Management begins with the daily collection and documentation of high-quality data from the field inspector into Magnolia River's cloud-based software – FieldLogIQ. Magnolia River employs an in-house Quality Control Department (QCD). The QCD performs routine audits of FieldLogIQ to determine the quality of the collected data and documentation. QCD submits those audit scores and findings to the appropriate IM(s) for review. The audit results/scores are stored in a database so that trends can be identified and corrected.

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

Inspection Managers (IMs) review and audit each of their inspectors on a weekly basis. Audits are performed through frequent field visits and reviewing data remotely through FieldLogIQ. Field visits are conducted and led by a multi-point checklist which has been developed to continuously monitor and improve the inspection program and process. Inspection Managers develop corrective action plans, if needed, as well as conduct weekly calls with all team members to review lessons learned and share successes.

Senior Inspection Managers (SIMs), with oversight of the entire Inspection Program, perform the final review of audit scores and results. SIM's ensure follow-through of additional training needed (if any), provide support to IM's and inspectors through coaching and leadership, and communicate improvement opportunities to the client.

TEAM QUALIFICATIONS

Key Personnel

With our natural gas expertise, our team is well prepared to implement the City's scope of work (SOW) by utilizing personnel who are both experienced, and customer focused. We realize the importance of being responsive and executing project requirements to meet the City's project standards.

The selected project team below is not guaranteed and is subject to change based on availability, unforeseen circumstances, workload, and prior commitments.

Allen Hughes, PE – Senior Director of Engineering

Mr. Hughes has an extensive background in the gas, water, and wastewater industries with over 37 years of design and field experience. Mr. Hughes is a registered Professional Engineer and has been the engineer of record for various projects within the utility industry. As the former General Manager for a municipality, Mr. Hughes guided daily operations of electric, gas, water, and wastewater departments. At said municipality, Mr. Hughes initiated a Civil Engineering Department to provide engineering design and compliance support for the gas, water, and wastewater utilities. Mr. Hughes also developed fair rate structures for all rate classes to provide revenue for needed system improvements. Currently, at Magnolia River, Mr. Hughes manages all phases of each project life cycle and is responsible for day-to-day engineering services.

Jared Willingham – Project Manager

Mr. Willingham is an experienced professional with a decade of design and management experience within the natural gas industry. As a project manager, Mr. Willingham has consistently exhibited an exceptional ability to deliver high-quality projects to the diverse range of clients that Magnolia River serves. Mr. Willingham is dedicated to upholding established standards, technical directives, and client requirements, ensuring compliance throughout every step of the project. His expertise lies in applying specifications, standards, and quality assurance procedures ensuring the utmost quality and client satisfaction.

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

Austin Gay, PE – Technical Lead

Mr. Gay has ten years of experience as an engineer in the natural gas industry and is a licensed PE in multiple states. He is knowledgeable in developing gas network models using GIS data and GASWorkS software. Mr. Gay also has experience managing and designing both modeling and linear/facility projects. Mr. Gay's linear/facility experience includes regulator station and over pressure protection design, pipeline replacement design, transmission pipeline design, permitting, meter station design, client interaction, and drafting.

Jacob Howell, PE – Senior Design Engineer

With an impressive eight-year stint as an engineer in the natural gas industry, Mr. Howell holds multiple state licenses as a Professional Engineer (PE). His expertise spans gas system modeling, pipeline design, regulator station planning, and overpressure protection design. He's no stranger to navigating permits, excels in route selection, and has a commendable track record in project management. A skilled drafter, Mr. Howell strikes a balance between technical prowess and practical application in the dynamic field of natural gas engineering.

Rebecca Ibsen – Design Engineer

Ms. Ibsen has one year of experience in the natural gas industry and 1.5 years of experience in the water/wastewater industry. Ms. Ibsen has experience developing detailed designs, specifications, cost estimates, and reports for natural gas and water/wastewater facilities. In addition, she is knowledgeable in natural gas modeling and using GIS tools in the development process.

Dan Allen – Director of Inspection

Mr. Allen has over 22 years of experience in the public and private utility industry. These duties include project inspection, program management, and natural gas and water distribution construction and maintenance. Mr. Allen's gas industry experience includes numerous years of field experience in natural gas operations, as well as planning, design and construction of infrastructure. Mr. Allen has provided technical expertise, project and program management to territory that encompasses over 22 states.

Gary Nolen – Senior Inspection Manager

Mr. Nolen has over 29 years of experience in project inspection, program management, and natural gas distribution construction and maintenance. Mr. Nolen's gas industry experience includes the pipeline construction and inspection of gas distribution pipeline replacement. Mr. Nolen has provided technical expertise, project management, and inspection for projects throughout the South.

Principal Officer

Mr. Heath McCleskey, President, serves as the principal member/officer:

Office Locations

Magnolia River has identified the individuals selected for this project team above. Each of these individuals has been selected based on their extensive experience and qualifications. Each of these individuals is based out of our Decatur, AL office and will support the City's project from that location.

Work Responsibility

Austin Gay is Professional Engineer (#26218) in the state of New Mexico. He will be responsible for overseeing all engineering design activities and the engineering team involved with any projects arising from this RFP.

FIRM PERFORMANCE

Magnolia River specializes in natural gas distribution installation and replacement work. We are highly proficient in the design, operation, and maintenance aspects of natural gas systems, and utilize our expertise to design with construction, operational efficiency, and system maintainability at the forefront. As such, we employ highly experienced engineers and designers to accomplish this. In fact, three of our licensed Professional Engineers have combined experience of over 100 years as gas system operators. We also employ project managers and engineers to guide the clients through every step of the design process—from initial feasibility to project construction. Magnolia River currently serves over 110 active clients in 29 states. Of those active clients, 80 are municipalities.

At Magnolia River, we cover all aspects of distribution designs -- from network modeling to the sizing of individual meters and regulators. With our internal team of GIS specialists and inspectors utilizing our in-house project management software, we provide the services to ensure projects are installed according to design.

The following summary covers some of the projects successfully completed for clients:

- Magnolia River has been assisting clients with PHMSA grant applications since 2022. Magnolia River provides a turn-key solution for grant awardees, as we are experienced in environmental assessment, project planning, and project management. Our personnel assist clients with grant reimbursement processes, reporting, and project documentation.

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

- Magnolia River has designed more than 2,000 miles of distribution replacement projects in the states of Texas, Louisiana, Mississippi, and Alabama over the past 10 years.
- Magnolia River has performed over 60 network analysis models covering more than 10,000 miles of piping. Our modeling staff is proficient with both GASWorkS and Synergi software with more than 70 years of combined modeling experience.
- Magnolia River has reviewed more than 90,000 records to determine TVC compliance for clients on both transmission and distribution mains. Concerning MAOP verifications, Magnolia River has reviewed 232 miles of transmission mains and 242 miles of distribution mains for multiple clients. Recently, Magnolia River has reviewed Las Cruces' 20 miles of transmission and 92 miles of distribution.
- Magnolia River has provided full project management of distribution or transmission work with dedicated Project Managers overseeing the project from inception at the design stage (Engineering), through construction (Inspection and GIS), and completion with TVC as-builts (Engineering). Past projects had Magnolia River managing all invoices for contractors and subcontractors to assure the client's project stayed on budget.
- Magnolia River has completed transmission projects up to 36" in diameter including route selection, linear project design, meter and regulator station design, HDD design, launcher/receiver design, hydrotesting design, and main line valve installations.

A variety of past project examples with references can be found on the following pages:

Project Owner:	Magnolia River Services, Inc.
Client:	City of Fairhope, Alabama
Project Name:	Distribution Piping Replacement
Project Description:	Magnolia River analyzed the client's gas distribution system using modeling software and identified weak points in their gas system.
Scope Responsibility:	Magnolia River proposed cost-effective solutions, designed the overall cast iron and unprotected steel replacement to include pipe sizing and regulator placement, prepared construction drawings for multiple phases of pipe replacement, and prepared bid packages for each phase. In addition to the engineering work, Magnolia River performed leak survey, prepared @Risk analysis, assisted the client with updating their GIS, configured FlowGIS for several field activities, and inspected the construction of the pipe replacement work.

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

Project Owner:	Magnolia River Services, Inc.
Client:	City of Moulton, Alabama
Project Name:	Hillsboro Tap and Feed Design
Project Description:	This project called for the modeling of Moulton's distribution system and the engineering design of a five-mile pipeline.
Scope Responsibility:	Magnolia River developed a system model to determine the best location for a new tap and feed to reinforce City of Moulton's system. The model was developed from existing maps, limited GIS data, customer information, and intended pressures. Three different tap locations and various size pipelines were evaluated, and the model was used to select the best option along with cost analysis for construction. Once City Council approved a route and size, Magnolia River provided a full turnkey design, which included construction drawings, railroad permits, highway permits, environmental permits, project management, materials list creation, bid creation, bid advertisement, bid analysis, inspection, construction management and as-built creation.

Project Owner:	Magnolia River Services, Inc.
Client:	Confidential
Project Name:	Pre-1984 Pipeline Replacement
Project Description:	Magnolia River was selected to provide engineering designs for the replacement of pre-1984 plastic pipeline within the client's system in the coastal regions of Texas. Magnolia River has designed over 1,100 miles of replacement for this program.
Scope Responsibility:	Firstly, the client performed an internal at-risk assessment on their system to identify mains within the system that needed to be addressed. Criteria in the assessment included plastic pipe installed prior to 1984, leaks, etc. Magnolia River reviewed the identified main and proceeded to look for logical replacement areas adjacent to the identified main. Designs were generally one mile in total length and included services to be tied over or replaced. Magnolia River reviewed available on-line resources for other existing utility information to be included as part of the design. Magnolia River was also tasked to provide the completion of many internal forms and documentation that were part of the construction package issued to contractors for construction to include an environmental review, permitting

	through county and city agencies, and flood control districts. Magnolia River provided assistance to the surveyors staking the projects, as well as the construction contractors when issues arose in the field.

Project Owner:	Magnolia River Services, Inc.
Client:	Florida Public Utilities
Project Name:	Gas Reliability Infrastructure Program
Project Description:	Magnolia River has been contracted by Florida Public Utilities to design and permit the replacement of bare steel and cast iron across various regions in Florida. Permitting services include state and local governments, as well as railroad permits. This program includes over 350 miles of legacy pipe to be replaced with PE pipe and coated steel pipe.
Scope Responsibility:	Magnolia River identified the scope and priority of replacement projects through records review, field verification, and GIS information. Magnolia River performed field analyses of the proposed construction areas utilizing Magnolia River's internal expertise to identify the preferred alignment for new piping. Magnolia River then created design plans for the project areas, considering the locations of other existing utilities and features to avoid potential conflicts. Magnolia River acquired all permits for each project, including FDOT, Palm Beach County, and municipal ROW usage permits. Magnolia River's inspection staff assisted Florida Public Utilities with regulatory code compliance, jobsite safety, and QA/QC. The inspectors also collected field information, including GPS points for as-built information.

Project Owner:	Magnolia River Services, Inc.
Client:	Okaloosa Gas District, Florida
Project Name:	System Modeling
Project Description:	Magnolia River modeled Okaloosa Gas District's transmission system and Niceville's and Crestview's distribution systems in order to help create a tool for system planning and system expansion.

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

Scope Responsibility:	Magnolia River provided full professional modeling services, including GIS data cleanup, customer load data importation, the creation of a GASWorkS model with customer data, model calibration, and system optimization to mitigate low pressures.

Project Owner:	Magnolia River Services, Inc.
Client:	Atmos Energy Corporation, Various States
Project Name:	Inspection, GIS, and Project Support
Project Description:	Magnolia River provides inspection services for Atmos for their pipeline replacement program. Over the years, Magnolia River has inspected several projects to include station rebuilds, system upgrades, and system replacement.
Scope Responsibility:	Magnolia River inspectors collect Global Positioning System (GPS) data during the construction phase of each project. The data is processed into GIS shapefiles that are incorporated into Atmos' GIS mapping at the end of each project. Magnolia River inspectors are responsible for creating as-built drawings for main and service line installations, documenting materials used, recording all contractor OQ information, and collecting all valve information. Complete closing documents and drawings are submitted to the client in a project binder ready to file. All documents are uploaded into Magnolia River's proprietary software, FieldLogIQ, to include digital versions of the documents and drawings so they may be stored and viewed electronically. Magnolia River provides Inspection Management to oversee the program and interact with the client on a regular basis. The IM is tasked with managing the day-to-day inspection and personnel of all assigned projects. This includes keeping an up-to-date schedule for construction efforts, performing quality assurance (QA) measures on all completion documents, reviewing incoming contractor invoices, and reviewing internal time charged to the project. The inspection program in each area is tailored to the needs of the specific region and specific needs of the client.

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

Project Owner:	Magnolia River Services, Inc.
Client:	Spire, Inc., Alabama, Missouri, and Mississippi
Project Name:	Engineering Design, GIS, and Inspection
Project Description:	Magnolia River has been providing inspection services to Spire-AL for 20 years. Magnolia River has forged a deep relationship with Spire and has developed inspection standards to help Spire comply with state and federal regulatory agencies.
Scope Responsibility:	Over the past 20 years, Magnolia River has inspected a multitude of projects for Spire to include on-site project management and inspection for annual bare steel and cast-iron pipeline replacement efforts. Throughout our partnership with Spire, we helped develop a streamlined approach which has enabled them to exceed pipeline replacement goals year over year. System replacement projects have included the installation of both steel and polyethylene pipelines ranging in various sizes of service lines, from 2-inch to 16-inch diameter mainlines. Because of the professionalism and quality of services provided to all divisions in Alabama, Magnolia River was contracted and currently provides inspection services to other Spire Divisions to include Spire Missouri, Spire Gulf Coast, and Spire Mississippi.

RFP COMPLIANCE DECLARATION

RFP TITLE: Utilities Engineering Services

RFP NO.: 23-24-052

DUE DATE/TIME: February 27, 2024 / 4:00 p.m.

In compliance with the requirements of this RFP, I, the undersigned, offer and agree to furnish any or all materials and/or services to the City of Las Cruces within the time agreed.

I further certify that this company has not been debarred, suspended, or otherwise made ineligible for participation in Federal Assistance programs under Executive Order 12549 Debarment and Suspension as described in the Federal Rules and Regulations.

Receipt of Addenda Nos.: 2 is hereby acknowledged (where none received, place a zero in this space)

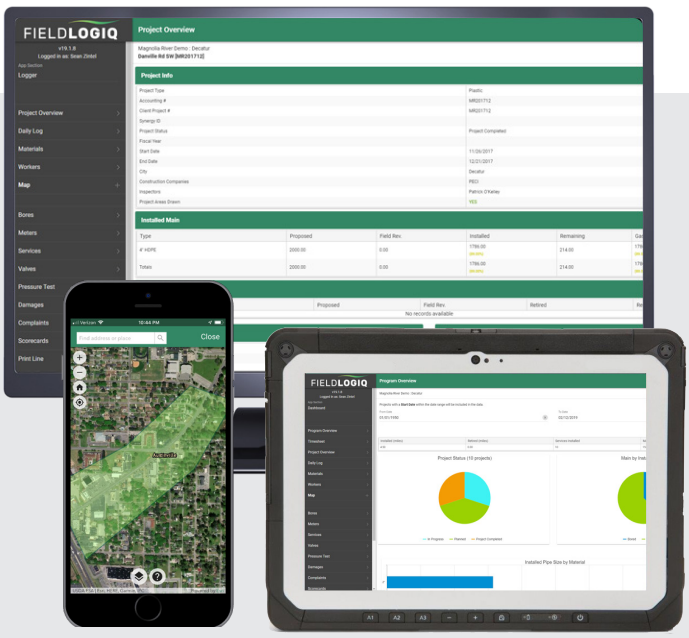
Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

FIELDLOGIQ

FieldLogIQ is GeoCurrent's robust, flexible and scalable cloud-based enterprise software solution providing construction site supervisors and inspectors the ability to enter project updates in real-time. In addition, supervisors can grant customers access to monitoring project status and provide all interested parties access to reports and project documentation.

Features

- **Web-based application with a complementary iOS/Android mobile app**
- **A centralized reporting and project documentation dashboard**
- **Sophisticated documentation tools for tracking essential pipeline construction tasks, such as pressure testing, asset tracking, inspection logging, etc.**
- **Project report generation and distribution**
- **Geospatial representation of project progress based on Esri technology**
- **User role-based access to information and role-based event notifications**



Benefits

- Receive an **unprecedented level** of **visibility** and **control** over field operations
- Track **vital asset information** throughout the life of the project
- **Preserve the integrity of data** and **information** collected during the complex pipeline construction process
- **Maintain regulatory compliance** and **increase communication** throughout the organization

PROJECT ASSIGNMENT AGREEMENT

23-24-052 UTILITIES ENGINEERING SERVICES

PROJECT NAME

Pursuant to terms and conditions of City of Las Cruces (CITY) Contract No. 23-24-052 dated June 1, 2024 between the CITY and Magnolia River Services, Inc. (ENGINEER), as amended and incorporated herein by reference, the City and Contractor hereby agree on this _____ day of _____, 20___, as follows:

1. In a satisfactory and proper manner, the ENGINEER shall perform SERVICES as proposed in response to the CITY's RFP No. 23-24-052 and ENGINEER's proposal as set forth in ATTACHMENT A attached hereto.

2. The estimated completion date is number days after a Notice to Proceed is issued by the CITY to the ENGINEER.

3. In consideration for the satisfactory completion of the work agreed to herein, compensation shall be made in the amount of $dollars.cents, plus NMGRT. Invoices issued by the ENGINEER shall be made monthly / upon completion of project with payment by the CITY being made within 30 days upon receipt of undisputed invoice.

CITY OF LAS CRUCES

PROFESSIONAL SERVICES AGREEMENT

THIS AGREEMENT, made and entered into on this _____ day of _____, 2024 by and between the City of Las Cruces, New Mexico, hereinafter called “CITY” and Molzen Corbin and Associates, of 1155 Commerce Dr, Ste F, Las Cruces, NM, 88011, hereinafter called “CONTRACTOR”.

1. PROJECT DESCRIPTION
Utilities Engineering Services on an as needed basis via Project Assignment Agreements (Attachment “A”) during the term of this AGREEMENT.

2. SCOPE OF SERVICES
In a satisfactory and proper manner, the CONTRACTOR shall perform SERVICES, as proposed in response to the CITY’S RFP No. 23-24-052, as set forth in Exhibit A, attached hereto and made a part of this Agreement.

The CONTRACTOR is authorized to extend the same terms and conditions of this Agreement to other governmental entities conditioned upon the procurement laws and regulations of those entities. The CITY shall not be a party nor have any liability relating to such extensions.

3. APPROPRIATIONS
The terms of this Agreement are contingent on sufficient appropriations and authorization being made by the City Council for the performance of this Agreement. If sufficient appropriations and authorizations are not made by the City Council, this Agreement shall terminate upon written notice given by the CITY to CONTRACTOR. The CITY’S decision as to whether sufficient appropriations and authorizations exist shall be accepted by CONTRACTOR and shall be final.

4. COMPENSATION
The CITY shall compensate CONTRACTOR for the performance of SERVICES under this Agreement an amount agreed to for each assigned project, plus applicable taxes. CONTRACTOR shall perform the SERVICES upon receipt of a purchase order or written Notice to Proceed for each assigned project from the CITY. The CITY cannot authorize costs to be incurred prior to such written Notice to Proceed. CONTRACTOR shall submit invoices upon completion of the project. CITY shall pay invoices Net 30 days upon receipt of undisputed invoice.

CONTRACTOR is responsible for payment of State of New Mexico Gross Receipts Tax levied on the amounts payable under this Agreement. CONTRACTOR agrees to comply with all federal and state tax payments and report all items of gross receipts as income from the operations of its business.

5. DEVOTION OF ADEQUATE TIME
CONTRACTOR will devote the necessary hours each week to the performance of projects that are required by the CITY and it will serve the CITY diligently and faithfully,

and according to its best ability in all respects and will promote the best interests of the CITY.

6. TERM AND SCHEDULE
This Agreement shall become effective on June 1, 2024 for a term of 5 years through May 31, 2029.

CONTRACTOR shall perform the SERVICES in accordance with the time set forth as agreed upon by the CITY and CONTRACTOR and as agreed to for each project assigned under the terms of this Agreement.

7. EXTENSIONS, CHANGES, AND AMENDMENTS
This Agreement shall not be extended, changed, or amended except by instrument in writing executed by the parties. The CITY shall not be liable for payment of any extra services nor shall CONTRACTOR be obligated to perform any extra services except upon such written agreement. Such written approval shall indicate the date said extension, change, or amendment is effective and shall be signed by the parties to this Agreement. In the event that the parties cannot reach agreement as to a particular change, the issue shall be resolved pursuant to Article 21.

8. CHANGES AND EXTRA SERVICES BY THE CITY
The CITY may make changes within the general scope of the SERVICES plus may also request CONTRACTOR to perform other extra services not incorporated within the Services set forth in this Agreement. If the CONTRACTOR is of the opinion that such change causes an increase or decrease in the cost and/or the time required for performing the changes or other services required by the City, CONTRACTOR shall so notify the CITY of that fact within five (5) business work days from the date of receipt of change by the CITY. The CITY shall provide written response to the CONTRACTOR within five (5) business work days from the date of receipt of CONTRACTOR'S written notification.

9. CHANGES AND EXTRA SERVICES BY THE CONTRACTOR
In the event a condition is identified by the CONTRACTOR which, in the opinion of the CONTRACTOR, changes the services, costs, and/or time required for performance under this Agreement, the CONTRACTOR shall provide written notification to the CITY within five (5) business work days of such identification. The CITY shall respond in writing to such notification within five (5) business work days from the date of receipt of CONTRACTOR'S notification.

10. DELAYS
In the event that performance of SERVICES is delayed by causes beyond reasonable control of CONTRACTOR, and without the fault or negligence of CONTRACTOR, the time and total compensation for the performance of the SERVICES may be equitably adjusted by written agreement to reflect the extent of such delay. CONTRACTOR shall provide the CITY with written notice of delay pursuant to Article 9 including therein a description of the delay and the steps contemplated or actually taken by

CONTRACTOR to mitigate the effect of such delay. The CITY will make the final determination as to reasonableness of delays.

11. TERMINATION
This Agreement may be terminated by either party hereto upon fifteen (15) calendar days written notice in the event of substantial failure by the other party to perform in accordance with the terms of this Agreement through no fault of the terminating party. This Agreement may also be terminated by the CITY for its convenience or because the PROJECT has been permanently abandoned, but only upon fifteen (15) calendar days written notice to CONTRACTOR.

In the event of termination, CONTRACTOR shall be compensated for all services performed and costs incurred up to the effective date of termination for which CONTRACTOR has not been previously compensated.

Upon receipt of notice of termination from the CITY, CONTRACTOR shall discontinue the SERVICES unless otherwise directed and upon final payment from the CITY deliver to the CITY the required number of copies of all data, drawings, reports, estimates, summaries, and such other information and materials as may have been accumulated by CONTRACTOR in the performance of this Agreement, whether completed or in process.

12. RECORDS AND AUDITS
CONTRACTOR will maintain records indicating dates, length of time, and services rendered. The CITY has the right to audit billings both before and after payment, and contest any billing or portion thereof. Payment under this Agreement does not foreclose the CITY'S right to recover excessive or illegal payments. CONTRACTOR will retain records for five (5) years after the completion of the project.

13. DISCLOSURE AND OWNERSHIP OF DOCUMENTS, PRODUCTS, DESIGN, ELECTRONIC FILES
All technical data, electronic files, and other written and oral information not in the public domain or not previously known, and all information, electronic files, and data obtained, developed, or supplied by the CITY will be kept confidential and CONTRACTOR will not disclose to any other party, directly or indirectly, without the CITY'S prior written consent unless required by lawful order.

All technical data, electronic files, products developed, operational parameters, blueprints, and other information and work of the CONTRACTOR shall be the sole property of the CITY and shall be delivered to the CITY when requested and at the end of the Agreement.

14. INDEPENDENT CONTRACTOR
CONTRACTOR represents that it has, or will secure, at its own expense, all personnel required in performing the SERVICES under this Agreement. Such personnel shall not be employees of, nor have any contractual relationship with the CITY. CONTRACTOR,

consistent with its status as an independent contractor, further agrees that its personnel will not hold themselves out as, nor claim to be officers or employees of the CITY by reason of this Agreement.

To the extent that CONTRACTOR employs any employees, CONTRACTOR shall be solely responsible for providing its own form of insurance for its employees and in no event shall CONTRACTOR's employees be covered under any policy of the CITY.

CONTRACTOR'S retention hereunder is not exclusive. Subject to the terms and provisions of this Agreement: (i) CONTRACTOR is able, during the Term hereof, to perform services for other parties; and (ii) CONTRACTOR may perform for its own account other professional services outside the scope of this Agreement.

CONTRACTOR is and shall be an Independent Contractor and shall be responsible for the management of its business affairs. In the performance of the work under this Agreement, CONTRACTOR will at all times be acting and performing as an Independent Contractor, as that term is understood for federal and state law purposes, and not as an employee of the CITY. Without limitation upon the foregoing, CONTRACTOR shall not accrue sick leave, jury duty pay, retirement, insurance, bonding, welfare benefits, or any other benefits, which may or may not be afforded employees of the CITY. CONTRACTOR will not be treated as an employee for purposes of: Workers' Compensation benefits; the Federal Unemployment Tax Act; Social Security; other payroll taxes, federal or any state income tax withholding; or the employee benefit provisions described in the Internal Revenue Code of 1986, as amended. Neither the CITY, nor its agents or representatives, shall have the right to control or direct the manner, details or means by which CONTRACTOR accomplishes and performs its services. Nevertheless, CONTRACTOR shall be bound to fulfill the duties and responsibilities contained in the Agreement.

15. NO JOINT VENTURE OR PARTNERSHIP

Nothing contained in this Agreement shall create any partnership, association, joint venture, fiduciary or agency relationship between CONTRACTOR and CITY. Except as otherwise specifically set forth herein, neither CONTRACTOR nor CITY shall be authorized or empowered to make any representation or commitment or to perform any act which shall be binding on the other unless expressly authorized or empowered in writing.

16. ASSIGNMENT

CONTRACTOR shall perform all the services under this Agreement and shall not assign any interest in this Agreement or transfer any interest in same or assign any claims for money due or to become due under this Agreement without the prior written consent of the CITY.

17. INSURANCE
CONTRACTOR shall obtain and maintain insurance at its own cost and expense during the life of this Agreement, and shall require Subcontractors, if any, to maintain during the life of his subcontract:

1. Commercial General Liability Insurance
   a. $1,000,000 per occurrence / $2,000,000 aggregate
   b. Coverage must include premises and operations, products and completed operations, and personal and advertising injury.
   c. The City of Las Cruces must be named as an Additional Insured for all coverages listed above on endorsements acceptable to the City.
   d. Coverage must be primary and non-contributory.
   e. Coverage must be per project or per location.
   f. Coverage must be on an occurrence form.
   g. Subrogation must be waived.
2. Commercial Auto Liability
   a. $1,000,000 per occurrence
   b. Coverage must be for “owned, leased, hired, and non-owned autos” or “any autos.”
3. Workers’ Compensation and Employers Liability
   a. Statutory Limits
   b. Employer liability – $1,000,000 each accident, $1,000,000 each employee by disease, $1,000,000 policy limit
   c. Subrogation must be waived.
4. Professional Liability: $1,000,000 per claim

Endorsements for additional insured coverage and waivers of subrogation must be provided as a condition of this Agreement and shall be noted on the certificate.

CONTRACTOR shall furnish the CITY with a certificate(s) of insurance showing CONTRACTOR and Subcontractors, if any, have complied with this Article. The CONTRACTOR shall provide insurance certificates before work is to start on the project and shall provide the CITY thirty (30) days written notification of cancellation of such policies.

18. INDEMNITY AND LIMITATION
CONTRACTOR shall indemnify, defend, and hold harmless the CITY from and against any and all claims, suits, actions, judgments, demands, losses, costs, expenses, damages, and liability caused in whole or in part by, resulting in whole or in part from, or arising in whole or in part out of the negligent acts, errors, or omissions of CONTRACTOR, its officers, employees, agents, or representatives in the performance of SERVICES under this agreement.

19. APPLICABLE LAW
This Agreement and the rights and obligations of the parties shall be governed by and construed by the laws of the State of New Mexico applicable to Agreements between

New Mexico parties made and performed in that state, without regard to conflicts of law principles. Venue shall be in the Third Judicial District, State of New Mexico.

CONTRACTOR shall abide and be governed by all applicable state law, CITY ordinances, and laws regarding the CONTRACTOR'S services or any work done pursuant to this Agreement, including anti-discrimination.

20. BREACH
In the event CONTRACTOR breaches any obligation contained in this Agreement, prior to instituting any action or dispute resolution procedure, the CITY shall give CONTRACTOR written notice of such breach. In the event CONTRACTOR fails to remedy the breach within five (5) working days of receiving such written notice, the CITY, at its sole discretion, without any obligation to do so and in addition to other remedies available under applicable law, may remedy CONTRACTOR'S breach and recover any and all costs and expenses in so doing from CONTRACTOR.

21. DISPUTE RESOLUTION
In the event that a dispute arises between CITY and CONTRACTOR under this Agreement or as a result of breach of this Agreement, the parties agree to act in good faith to attempt to resolve the dispute.

22. NOTIFICATION
All notices required or permitted under this Agreement shall be in writing and shall be deemed sufficiently served if served by Registered Mail addressed as follows:

TO CITY:	City of Las Cruces PO Box 20000 Las Cruces, NM 88004 ATTENTION: Tony Trevino
With Copies to:	City Attorney Purchasing Manager
TO CONTRACTOR:	Molzen Corbin and Associates 1155 Commerce Dr, Ste F Las Cruces, NM 88011 ATTENTION: Kevin W. Eades

23. SCOPE OF AGREEMENT
This Agreement incorporates all of the agreements, covenants, and understandings between the parties hereto concerning the subject matter hereof and that all such covenants, agreements, and understandings have been merged into this written agreement. No prior agreement or understanding verbal or otherwise of the parties or their agents shall be valid or enforceable unless embodied in this agreement.

24. SEVERABILITY
The parties agree that each provision of this Agreement is severable and the invalidity or unenforceability of any one or more of the provisions of this Agreement shall not affect the validity or enforceability of any other provision of this Agreement, and this Agreement shall be construed in all respects as if such invalid or unenforceable provisions were omitted.

25. CONFLICT OF INTEREST
CONTRACTOR represents and warrants that CONTRACTOR has no business, professional, personal, or other interest, including, but not limited to, the representation of other clients, that would conflict in any manner or degree with the performance of its obligations under this Agreement. If any such actual or potential conflict of interest arises under this Agreement, CONTRACTOR shall immediately inform the CITY in writing of such conflict. If, in the reasonable judgement of the CITY, such conflict poses a conflict to and with the performance of CONTRACTOR'S obligations under this Agreement, or is otherwise a violation of the CITY'S current policy or ordinances, then the CITY may terminate the Agreement immediately upon written notice to CONTRACTOR; such termination of the Agreement shall be effective upon the receipt of such notice by CONTRACTOR.

EXHIBIT A
SERVICES

A. Project Assignments
A Project assignment is initiated by the City providing the selected Engineer a detailed project description, including scope of work and any other special instructions needed by the Engineer to prepare items such as preliminary and final cost estimates, complete project plans and specifications, project reports, and other related engineering services. The awarded Engineers shall provide engineering services that may include but not be limited to, the following:
1. Computer network analyses for water, wastewater, and gas systems; design of water, wastewater, and gas utility systems; well house design; Supervisory Control and Data Acquisition (SCADA); water treatment process; master planning; feasibility studies; solid waste studies; land use permitting; subsurface utility exploration; boundary/easement survey; and National Pollutant Discharge Elimination System (NPDES) & Stormwater Pollution Prevention Plan (SWPPP) compliance.
2. Electrical design (wells, booster stations, lift stations, odor control stations, building electrical system design)
3. Computer network analysis for Gas (GasWork), Water (InfoWater), and Wastewater (InfoSewer). The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility
4. Solid waste studies, landfill system design and analysis
5. Environmental surveys, assessments monitoring and management, such as indoor air quality, asbestos, mold, and other related services for the City
6. Geotechnical Assessments, such as soil and groundwater testing for contamination and remediation, and other related services for the City
7. Expert witness in a judicial and/or quasi-judicial setting.
8. Project Management
9. Construction Inspection.

B. Project Assignment Agreements
A Project Assignment Agreement (a template of which is incorporated herein as ATTACHMENT “A”) will be negotiated and executed on a case-by-case basis for each specific project, and will include a cost proposal from the Engineering firm(s) proposing to do the work. The cost proposal may utilize one of the following pricing formats:
1. Lump Sum
2. Unit pricing to include:
    a. Hourly rate for various types of services requested by the City
    b. Charges for miscellaneous items such as blueprints, data, discs, rental of special equipment, etc.
    c. A statement of the billing procedures including minimum billing units, if any.
    d. Cost of sub-consultants (if any)
3. An alternative unit cost breakdown

C. Deliverables
Each project contract will require a list of deliverables, schedule/timeline and cost. The

Engineer may be required to supply to the City an of the following items, when specified and as requested on the Scope of Work for each individual project.

1. Preliminary report containing schedule of work and cost estimate.
2. Construction drawings and documents. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility. Provide hard copies and PDF format of the construction plans for Purchasing Section use.
   a. As-built drawings on electronic media and reproducible prints. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. All horizontal and vertical location datum information shall be coordinated with the City Surveyor. The utility location information shall be tied to project control monuments and referenced to project construction stationing. The project control survey shall be certified by a New Mexico Registered Land Surveyor. Metadata or “data about the data” shall be submitted with each as-built electronic file, preferably as a separate text file on the electronic submittal media, and shall include:
      - Name, address and phone number of the responsible land surveyor.
      - Date of completion of survey.
      - Equipment used to conduct the survey.
      - Horizontal and vertical control marks used to tie the survey to the City approved control.
      - Transformation factors needed to reduce Ground (local coordinate system) to Grid and combined scale factor used.
   b. “RECORD DRAWINGS” shall be clearly labeled on each sheet.
3. Computer network analysis for gas, water, and wastewater shall be provided to the City in appropriate electronic format. It shall include the entire model, including changes and a text summary (report) of the network analysis that includes assumptions, procedures, and results, and any graphics that clarify the analysis. The Engineering firm(s) shall verify the report format with the City. The computer network analysis shall be provided using the software listed below. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility.
   a. Computer network analysis for Gas: GasWork
   b. Computer network analysis for Water: InfoWater
   c. Computer network analysis for wastewater: InfoSewer
   d. Other design computer programs as approved by the City
4. Project reports.
5. Any other item specified in the contract for that project
6. Easement map and recording information

D. The selection of an Engineer for a specific project shall be based on experience with similar projects, references, performance in similar projects, and availability. This will include the ability to meet schedules, cost control, and responsiveness to client.

E. The Engineer shall have an engineering staff on-site everyday who is responsible, on behalf of the Engineer, for providing timely completion and response for performance of the terms of each Project Assignment Agreement during the progress of each individual project. Any deviation from this requirement is at the discretion of the City and must be approved in writing by the City prior to the start of any individual project.

RE: Utilities Engineering Services, RFP 23-24-052
(We are in receipt of Addendum 1, dated February 20, 2024, and Addendum 2, dated February 23, 2024.)

Dear Members of the Selection Advisory Committee:

Molzen Corbin is pleased to present this proposal to provide Utility Engineering Services to the City of Las Cruces. Our Las Cruces branch has served the City for 40 years, designing your roadway, water system, wastewater system, and drainage improvements. We have been honored to partner with the City of Las Cruces and hope to never take our relationship for granted. We work hard to be **your Go-To-Firm**, not simply because we are local, but because we provide the highest quality professional engineering services the City requires. Our ability to deliver is based on the following strengths:

- **Local Knowledge Base:** Molzen Corbin's engineers and architects are familiar with most of the City's infrastructure needs. Because of our diverse local experience in water, wastewater, gas, transportation, stormwater, and facilities, and our knowledge of your current infrastructure and future needs, we believe that Molzen Corbin is an ideal choice for this on-call contract.
- **Team Continuity:** Molzen Corbin has numerous senior engineers and architects that you are familiar with that have more than 40 years of continuous experience in the City of Las Cruces. You will not be dealing with new faces after the contract is signed. Our workforce is reliable, empowered, and motivated to once again serve the City of Las Cruces and we see our own success directly tied to Las Cruces' success.
- **Maximum Value for the Money:** We are more than a consultant—we become your partner in seeking opportunities to economically grow Las Cruces because of our vested interest. Molzen Corbin offers the City the best of both worlds: high-quality, high-value projects delivered from a local office. Our resources are used to ensure that every project, conversation, and task delivers value to the City of Las Cruces.

We trust that the following submittal underscores the unique knowledge and benefits of the Molzen Corbin Team. We look forward to continuing our successful relationship with the City of Las Cruces.

Sincerely,
MOLZEN CORBIN

Kevin W. Eades, PE
President and Chief Executive Officer

TECHNICAL PROPOSAL

1. Technical Approach to the Project 1

2. Qualifications and Competence of Team 9

3. Performance of the Firm with Previous Clients.....14

RFP Compliance Declaration
Resident Business Certificate
City of Las Cruces Business Registration Certificate

1. Technical Approach to the Project

About Molzen Corbin

Molzen Corbin is a nationally ranked firm with deep roots in this State. We have provided a diverse portfolio of engineering services to New Mexico's public entities since 1960. Molzen Corbin has a successful branch office in Las Cruces, and has served the City for over 40 years. Our strong track record for the delivery of high-quality projects on time and within budget is reflected in the fact that 90% of our business comes from repeat clientele. A majority of the clients we began with 64 years ago are still with us today on a retainer basis.

Technical Approach

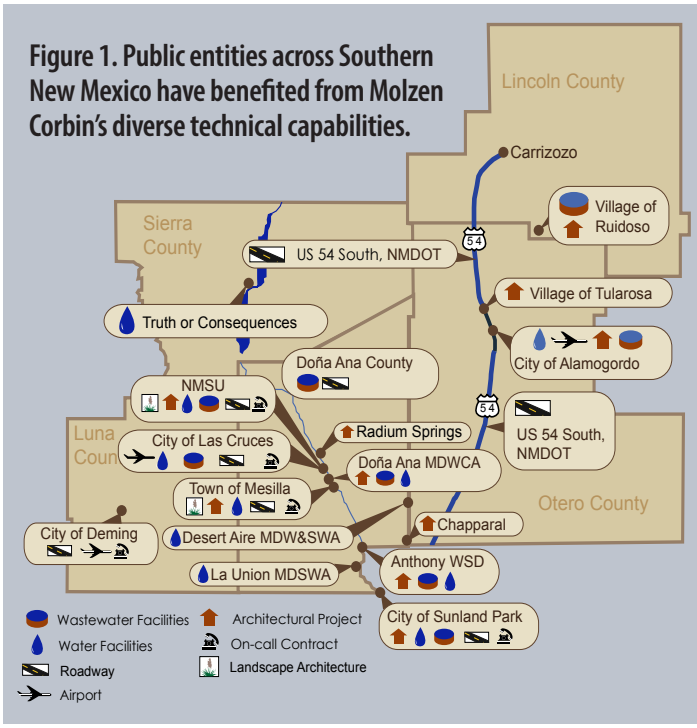
As we have in the past, Molzen Corbin will continue to provide planning, design, and construction phase services on a work-order basis. We will also provide day-to-day consultation services and attend conferences and meetings to remain informed about projects and issues. Molzen Corbin's general process and approach is as follows:

- **Project Scoping/Programming:** Work with the City to fully define the scope for each project. This step is arguably the most important step in any project. To fully understand your needs, we will continue to work closely with the City in an open exchange of ideas. Using your input, we will develop a project scope that is a full and accurate reflection of your needs and goals.
- **Studies:** Gather data including on-site measurement, drainage studies, master plans, utility rate studies, and other pertinent information.
- **Preliminary and Final Design:** Prepare complete working drawings, technical specifications, contract documents for bidding (e.g., bonds, insurance, etc.), quantity take-offs, and cost estimates.
- **Bidding:** Provide assistance in advertising for bids, distributing plans and documents for bidding, receiving and tabulating bids, award recommendations, checking bond and insurance forms and issuing notice to proceed for construction.
- **Construction:** Provide project/construction observers (full time if required), inspection services if desired.
- **Project Closeout:** Prepare drawings for permanent records, including changes; provide O&M manuals and operator training for treatment plants or electrical system projects.

Technical Capabilities

Molzen Corbin employs 90 in-house professionals in the fields of civil, water, wastewater, and airport engineering; architecture and landscape architecture; planning and grants administration. We offer the operational agility and depth of staff needed to provide highly responsive services to the City. The map below (Figure 1) illustrates the depth and breadth of Molzen Corbin's technical experience in Southern New Mexico. Following we describe our technical capabilities in water

Figure 1. Public entities across Southern New Mexico have benefited from Molzen Corbin's diverse technical capabilities.



resources engineering, electrical and mechanical engineering, utility system design, site work, and architecture.

Water Resources Engineering

Molzen Corbin's fully staffed Water Resources Division is comprised of engineers whose professional and educational backgrounds are focused on wastewater and water engineering. Our Water Resources Engineers are supported by civil, electrical, and mechanical engineers, as well as architects and landscape architects, so our clients benefit from the convenience and cost savings of meeting diverse project needs with a centralized in-house team. Additionally, our in-house architects, electrical engineers, and construction observers have extensive specialized experience with wastewater and water facility and system planning, design, and construction administration services. Since 1960, we have completed over 600 wastewater and water system improvement projects for municipalities, counties, pueblos, tribes, and water associations throughout New Mexico. A snapshot of some of the services we have provided to our clients, including the City of Las Cruces, is illustrated in Figure 2.

Water System Engineering

We have consistently pioneered innovative, cost-effective water system designs that mitigate the risk of drought, improve quality of life for citizens, and provide infrastructure to support economic development. Figure 3 (next page) illustrates our Statewide experience in the planning and designing of water systems.

Molzen Corbin's experience includes every facet of water system design from master planning and preliminary engineering reports (PERs) to supply, storage, transmission, and distribution system design. We have extensive statewide experience with the services required to support the City for successful completion of any project that may be tasked under this on-call contract, including studying, evaluating, planning, and designing system improvements. The City will have the benefit of up-to-the-minute technical expertise, customized for your project needs.

Figure 2. Molzen Corbin has designed more than 600 water and wastewater projects since 1960, including numerous projects for the City of Las Cruces.

Project Highlight: West Mesa Water System Improvements, City of Las Cruces

This was a four-phase project that included various water supply, transmission, and storage improvements:

- A high-capacity booster station consisting of three 1,000 gpm booster pumps
- Well No. 63 and Well No. 64 well house improvements, each with a capacity of 3,500 gallons per minute (gpm)
- Design of a 4.5-million-gallon reservoir, which involved unique foundation and site conditions to meet Bureau of Land Management (BLM) requirements
- Approximately 11,500 linear feet of 18" waterline that ties the booster station to the existing West Mesa Industrial Park
- Approximately 35,000 linear feet of 36" transmission line to connect the west side system to the City's east side Missouri system. This effort involved a crossing of the Rio Grande and numerous ditch, drain, and highway crossings.

Molzen Corbin took the lead in assisting the City with the Environmental Assessment; BLM permitting of easements for waterlines; International Boundary & Water Commission licensing of the river crossing; various other irrigation, highway, and county permits; and 12 private easements for the installation of various facilities. Our analysis also included preparing an alignment study of various route alternates for the water transmission line and an evaluation of various methods for crossing the Rio Grande.

Wastewater System Engineering

Molzen Corbin is one of the most experienced wastewater engineering firms in New Mexico. In many communities, we have not only designed the original wastewater treatment and collection system, but over the years have provided upgrades and improvements, expanded facilities, and addressed needs for new wastewater treatment facilities as permits became more stringent. Our treatment facilities have consistently met or exceeded Environmental Protection Agency (EPA) and New Mexico Environment Department (NMED) standards, and we have designed facilities that pioneer the use of innovative new technology here in New Mexico.

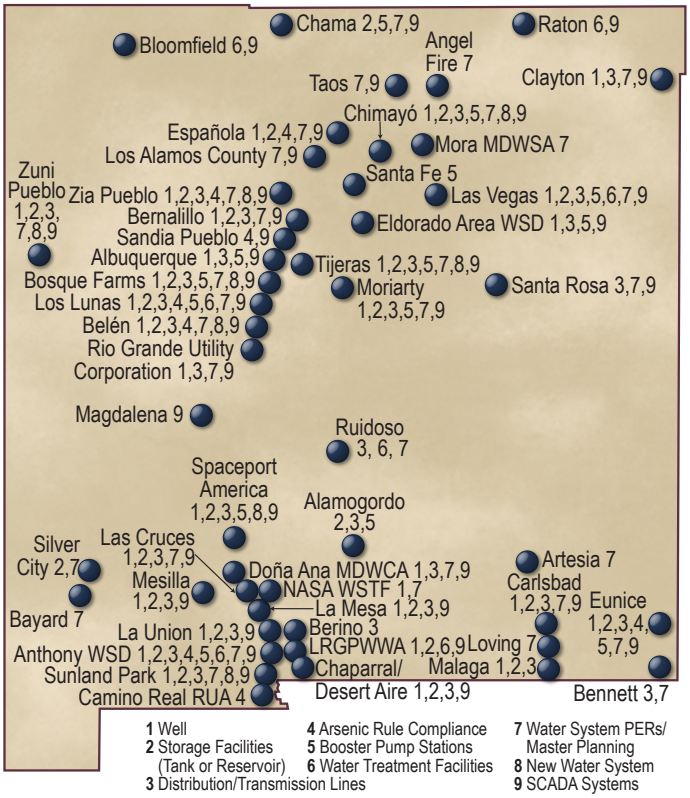

Figure 3. Molzen Corbin has planned and designed water projects across the State.

Molzen Corbin's experience in wastewater system design includes everything from PERs and master plans, to sewer lines and lift stations, to wastewater treatment plants.

Electrical/Mechanical Engineering

Molzen Corbin's in-house electrical and mechanical engineering division offers extensive experience in designing innovative, reliable, user-friendly systems for communities across New Mexico. Our experience includes electrical and mechanical system design and analysis for buildings, athletic fields, street lighting, solar (photovoltaic) systems, booster stations, lift stations, odor control stations, wells, and water and wastewater facilities.

- **Electrical Engineering:** Broad expertise in designing electrical instrumentation and control systems, as well as providing troubleshooting and analysis services. Experienced in designing power distribution systems with voltage below 25 kVA (25,000 volts) through individual electrical services via transformers properly sized and coordinated to meet the system or facility needs. Our engineers can provide load flow analysis for

all types of projects including evaluating voltage drop, harmonic distortion and power factors within the electrical system. Our team specializes in water and wastewater system support and Supervisory Control and Data Acquisition (SCADA) telemetry systems..

- **Mechanical Engineering:** Extensive experience in designing natural gas lines, heating, ventilating, and air conditioning (HVAC) systems, and plumbing systems for wastewater treatment plants, storm drain facilities, pump stations, educational buildings, office buildings, and medical buildings.

Utility System Design

Molzen Corbin has designed thousands of miles of water, wastewater, reclaimed water, storm-water, and gas pipelines throughout our 64 year history. Our experience has included evaluation of existing pipelines, design of new pipelines, rehabilitation of existing pipelines, in-situ rehabilitation, alignment/routing studies, trenchless installation, and cathodic protection. Figure 4 below provides a snapshot of our experience with designing utility lines.

Project Highlight: Wastewater Treatment Facility, City of Las Cruces

Molzen Corbin has a long-standing relationship with the city of Las Cruces that includes almost all work on the City's 13.9 mgd wastewater treatment plant. The plant was designed by Molzen Corbin in the 1980s, and numerous modifications have been made in the ensuing years. One of these improvements includes the facility's Headworks.

This project involved the planning, design and construction phase services for new Headworks at the Las Cruces Wastewater Treatment Plant. The improvements were necessary due to the fact that the old screening and grit removal facility had reached the end of its useful design life. The new Headworks included enclosed flex-rake coarse outdoor bar screens, screening conveyor, grit classifier, influent channels, Parshall flume, and outdoor covered course bubble aerated grit chambers. The facility was fully enclosed using internal structural elements, covered equipment, and an internal building to house the grit pump room.

Figure 4. Molzen Corbin has designed miles of utility and water transmission lines across the State.

Type	Project/Client	Pipeline
Water	Mountain Park Number 1 to Mountain Park Number 2 Water Line Extension, EPWater	2,600 Linear Feet (LF) of 24-inch transmission line; 1,440 LF of 12-inch service line; 2,410 LF PVC service line
	Double Eagle Water System Improvements, City of Carlsbad, NM	Phase I–II: 211,200 LF of 16-inch and 24-inch waterline Phase III: 21,160 LF of 24-inch waterline; 9,650 LF of 16-inch waterline; 630 LF of 12-inch waterline
	Water System, Spaceport America	63,360 LF of 24-inch and 16-inch waterline
Wastewater	Sonic Lift Station, AWSD, NM	3,500 LF of 21-inch sewer line; 6,500 LF of 12-inch forcemain
	Valley Drive, City of Las Cruces, NM	3,450 LF of 8- to 15-inch sewer line
	Sewer Interceptor, Village of Los Lunas, NM	Phase I: 9,000 LF of 8- to 30-inch sewer line Phase II: 25,000 LF of 8- to 24-inch sewer line
Storm	Valley Drive, City of Las Cruces, NM	7,800 LF of 18- to 72-inch storm drain line
	Harrelson Street, City of Las Cruces, NM	1,200 LF of 18- to 24-inch storm drain line
Gas	Gas System Improvements, Phase I, City of Deming	19.8 miles, 2-inch poly gas main and 8.4 miles, 4-inch poly gas main with services
	North Valley Drive, Las Cruces/NMDOT	1.49 miles MDPE gas line with services

Sitework

Molzen Corbin's Civil Engineering Division is experienced in site development plans for new or renovated buildings or structures. Our team prepares drainage and grading plans, utility layout plans, and stormwater pollution prevention plans for government and commercial facilities. These site plans are developed with sensitivity to the surrounding environment to match the character of the area in which they are located. Earthwork is minimized based on site conditions and balanced with the needs of the facility. Our site development plans have included sites as small as half-acre commercial lots to a 50-acre resort development.

Architecture/Landscape Architecture

Molzen Corbin's in-house architectural division specializes in user-friendly architectural design for public entities. Our team's range of experience includes the planning and design of diverse public works facilities and municipal buildings, from well houses and booster pump stations to Town Halls, public safety complexes and public parks.

Molzen Corbin has produced landscape designs and site plans for buildings, public spaces, roadways, parks and recreational areas, and other facilities. Our park designs have included gymnasiums; athletic fields; courts for pickleball, tennis, basketball, and volleyball; picnic areas and parking areas; trails; aquatic facilities; native, exotic, and specialized landscaping and irrigation; skate parks; and stormwater features (such as ponds, arroyos, and bridges).

Selected project examples further demonstrating the Molzen Corbin Team's experience and capabilities are provided in Section 3.

Molzen Corbin's Specialized Services

Molzen Corbin recognizes that project demands often go beyond technical tasks, and as such we offer a diverse portfolio of special services.

- **Master Planning:** Molzen Corbin has prepared numerous Master Plans for our municipal clients that included segments of the community that required special study or for improvements to the community as a whole. These Master Planning efforts have included Comprehensive Plans, Water Master Plans, Wastewater Master Plans, Stormwater Master Plans, and Transportation Plans.
- **Public Involvement:** Molzen Corbin typically schedules and conducts all of the public meetings to communicate project information, and attends City Council meetings.
- **Expert Witness Testimony:** Molzen Corbin has been a reliable expert witness for the City, and can continue that relationship in the future if called upon.
- **Bid Documents:** Molzen Corbin has designed public works projects for public entities, including plans and specifications developed in compliance with State and Federal regulations

Project Highlight: Jacob Hands WWTF Primary Feed Replacement Project, City of Las Cruces

Two El Paso Electric feeders serve the Las Cruces Jacob WWTF. The service entered the WWTF underground at 25 kV, and both feeders share below-grade manholes. The WWTF began to experience failures with the cable elbows in the manholes, and accessing the confined space was unsafe for operational staff and contractors. Molzen Corbin worked with the City to design a replacement feed for one of the feeder loops to separate the source..

The new 25 kV, concrete encased, duct bank had to maneuver a network of underground piping infrastructure through an operational treatment facility. Then new cables terminate in above grade cabinets and include test ports and fault indication, which is visible from the exterior of the enclosure. The cabinets sit on a vault equipped with a loop of extra cable and re-access panel, which allows access to the cable independent of the enclosure. The duct bank included a conduit for a future fiber cable for a SCADA system.

and procurement requirements, local procurement requirements, and industry standards.

- **Surveying:** Molzen Corbin's in-house surveying capabilities range from base mapping to detailed infrastructure surveys, performed by experienced surveyors using state-of-the-art Trimble R10 Integrated GNSS System. Our team has field experience with the finish techniques required by the City of Las Cruces.
- **Construction Observation:** Our in-house observers have been very effective in ensuring that our projects are constructed to the highest level of quality and conformance to the contract documents.

Management Structure and Approach

Molzen Corbin pioneered the use of on-call engineering and architectural agreements in the 1980s. Today, on-call clients remain at the heart of our business. We currently hold on-call contracts with 51 municipalities and counties, including with the City of Las Cruces. We are organized and staffed expressly to meet the day-to-day and long-term needs of public entities, providing rapid response and personalized service.

Day-to-Day Operation of the Contract

Molzen Corbin offers the operational agility and depth of staff needed to provide highly responsive services to the City of Las Cruces. Our proposed project manager, Mr. John Montoya, PE, PS, PTOE, is a Molzen Corbin Vice President with more than 30 years of project experience with the City. He is very knowledgeable with our on-call approach and procedures, as well as with City staff and processes. Following, we describe our management and operational approach.

- **Day-to-Day Technical Services and Small Task Order Work:** Mr. Montoya will serve as the City's primary point of contact. When the City needs day-to-day technical services or requests small task order work, you may call Mr. Montoya directly. He will either assist you himself or assign a lead engineer from the appropriate discipline to provide the needed service.
- **Large Projects:** For larger design projects Mr. Montoya will either serve as Project Manager or assign that role to an experienced engineer from the appropriate discipline. Once the project begins, the City may interface with either Mr. Montoya or the Project Manager. Project Managers will provide Mr. Montoya with regular updates on project schedules, budgets, status, and other issues.

Tasks to be Accomplished

Following are a few of the services we will provide to the City under this contract:

- Water, wastewater, and natural gas utility system design, analysis, and master planning (including water treatment process and wastewater plant process)
- Well house design
- SCADA System Design
- Feasibility study
- Solid Waste Studies and Landfill System Design and Analysis
- Land use permitting
- Subsurface utility exploration
- Boundary and Easement Surveys
- NPDES and SWPPP compliance
- Electrical design (e.g., wells, booster stations, lift stations, odor control stations, and buildings)
- Computer network analysis for GasWork, InfoWater, and InfoSewer
- Environmental surveys and assessment monitoring and management (e.g., indoor air quality, asbestos, mold, and other related services)
- Geotechnical assessments, such as soil and groundwater testing for contamination, remediation, and related services
- Expert witness in a judicial and/or quasi-judicial setting
- Project management
- Construction inspection

Services to be Provided Under Each Task

Scoping Meeting

When contacted by the City of Las Cruces, Molzen Corbin will form a scoping team consisting of staff from the City, Molzen Corbin, and subconsultants. The scoping meeting will provide all parties with the opportunity to discuss project parameters, ask questions, and work together to resolve challenges.

Molzen Corbin will carefully consider the input of the City's user group in identifying elements that will influence the scope, schedule, and budget of each project or task. To ensure that the City gets the most value for money spent, we will also address funding sources and look for opportunities to narrow the scope so that unnecessary tasks are eliminated. A project schedule with milestone dates will also be established at this meeting.

Such up-front project development will not only be used as the basis of the engineering agreement, it will serve as a guide in the execution of the task order.

Milestone Meetings

Mr. Montoya and key project team members will meet with the City at the conclusion of each task to update the City on project status, review technical information, answer questions, and solicit feedback from the City to ensure that the project is continuing on schedule and to the City's satisfaction. Examples of key milestone meetings for a roadway project are as follows:

- Drainage Plan Review
- Survey and Existing ROW Review
- Existing and Proposed Utility Review
- Roadway Alignments
- Roadway and Utility Profiles
- Lighting and Erosion Control
- Right-of-Way Acquisition (if needed)
- Technical Conflict Resolutions (utilities, ADA, drainage, driveways, etc.)
- Environmental Document Review

Final Design Review

Molzen Corbin will hold design review and final design review meetings with the City to coordinate the final plan set for bidding and complete minor changes. All design elements will have already been reviewed during the milestone meetings, which should be the basis of the final design drawings.

Quality Control

To ensure that the City receives the highest possible quality on each project, Molzen Corbin will implement a peer review quality control plan, with oversight provided by Mr. Jerry Paz PE.

Molzen Corbin and our subconsultants will each conduct a quality review of the other firm's work for each project or task. Each review will consider completeness, accuracy, and whether the work is meeting the project goals.

This peer review process is essential to the development of the project and will be integrated into scheduled project team meetings. Frequent, thorough quality checks will enable the project team to identify and correct potential problems during the project, when they can be addressed in a cost-efficient manner.

Project Schedule

Molzen Corbin has sustained an excellent performance record for timely delivery of projects and control of costs. Figure 5 below provides examples of Molzen Corbin's cost and schedule performance on similar relevant projects. Our approach to controlling costs and meeting schedules is summarized below.

Cost Control During Design

- **Planning for the Project:** Starting with a detailed planning effort helps to define the scope of work for any project. Detailed planning and the corresponding coordination effort helps to ensure that the client and engineer are working toward the same goals. It is also much easier to make changes during a planning phase than during design. Finally, a well-thought-out plan results in a shorter design schedule and a corresponding project cost savings.
- **Control of Work Hours:** Molzen Corbin uses project management and cost accounting

Project/Client	Estimate	Close Out	Owner's Deadline	Completion Date
I-25/University Interchange, NMDOT	$38,000,000	$35,327,282	October 2021	October 2021
Valley Drive (Phase II), NMDOT	$22,973,000	$25,598,110	March 2020	April 2020
Bowman Avenue, Mesilla	$443,860	$428,297	November 2019	November 2019
Harrelson Street, Las Cruces	$786,402	$824,739	November 2018	November 2018

Figure 5. History of Past Performance

software to develop a design fee cost estimate, or budget, for each task based on manhours and rates. Our cost accounting system generates cost reports automatically every week. We use these to compare each task's manhours used to the manhours remaining in the budget and the estimated percent complete. This proactive approach allows us to identify deviations from the project plan early on and make appropriate adjustments to mitigate any impacts on the design costs.

- **Review of Percent-Complete Report:** Each month the project manager submits a percent-complete report for review by the appropriate department head. If the percentage of budget expended is greater than the percentage of completion (*e.g.*, a project is only 20% complete but 50% of the budget is expended) and the project scope has not changed, then the department head assigns more resources (without cost to the owner) to enable the project to achieve completion.
- **Proactive Communication:** Communication between the client and engineer throughout design is essential to cost control. We establish a budget early on and use milestone meetings to communicate design progress and estimated costs.

Schedule Control

Molzen Corbin has a fully staffed office in Las Cruces to serve communities and municipalities in southern New Mexico. This local office makes Molzen Corbin especially suited to respond to the City's needs in this contract. Molzen Corbin's success in delivering projects on time is due primarily to three important factors:

- **Detailed Project Schedule:** A detailed project schedule is developed and includes critical milestones and activities required of all stakeholders including project production and review. The schedule is used as a tool to help manage project progress and regularly scheduled meetings are used to secure valuable input.
- **Local Project Control:** Because Molzen Corbin is a New Mexico company and is locally owned and operated, project control is established effectively and efficiently. The local control allows dedication of all resources needed to meet critical deadlines while providing the agility needed for unanticipated changes.
- **Team Experience:** Our team has been working together on similar projects for many years. This experience translates to effective and efficient production of design documents.

Sample Project Schedule

Figure 6 shows a sample work schedule with project milestones. Molzen Corbin utilizes Microsoft Project, Primavera, and SureTrack scheduling programs to manage the work flow and meet project deliverables.

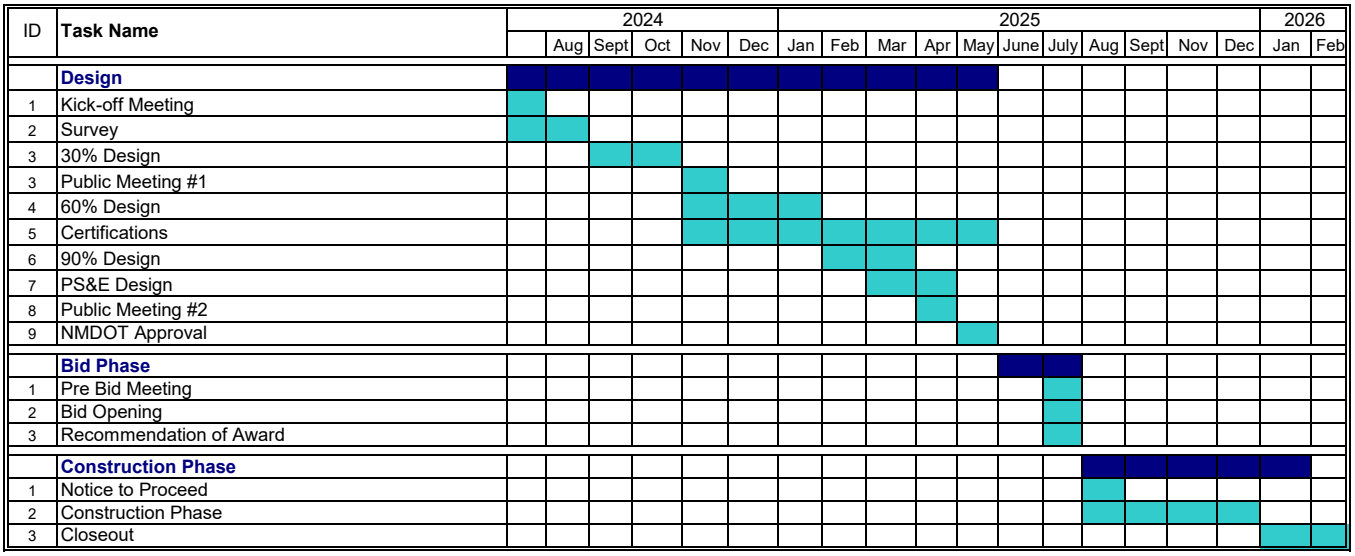

Figure 6. Molzen Corbin sample project schedule, including major phases and tasks.

2. Qualifications and Competence of Team

Molzen Corbin has a solid track record for meeting project schedules, including condensed schedules. Our project experience, depth of staff, and technical expertise enable us to quickly mobilize our resources to align them with concurrent activities on complex projects.

As a multi-disciplinary firm, Molzen Corbin has the technical expertise and in-house staff to successfully complete the diverse range of tasks and services anticipated under this contract. Based on our extensive engineering and analysis experience, along with our depth of our staff and our familiarity with the City of Las Cruces, we can unequivocally state that we will be able to accommodate the City's project needs, including any and all specialized services, to meet any necessary time limitations.

We have assembled a highly experienced project team to effectively execute this contract for the City of Las Cruces. An organizational chart illustrating our team members and their roles and responsibilities appears below (Figure 7). On the following pages, we provide résumés of our key project team members, including their experience, area of competence, and percent of time assigned to project.

Key Personnel

John Montoya, PE, PS, PTOE: Project Manager

NM PE #12423, NM PS #13057, PTOE #3426 | B.S. in Civil Engineering Technology, NMSU | Years of Experience: 39 | Time Assigned: 20%

Mr. Montoya is a Molzen Corbin Vice President whose 39 years of experience encompasses assignments as a design engineer, project manager, client manager, and company surveyor on public works projects across southern New Mexico. These projects have included traffic engineering, roadway design, major arterial design, multi-

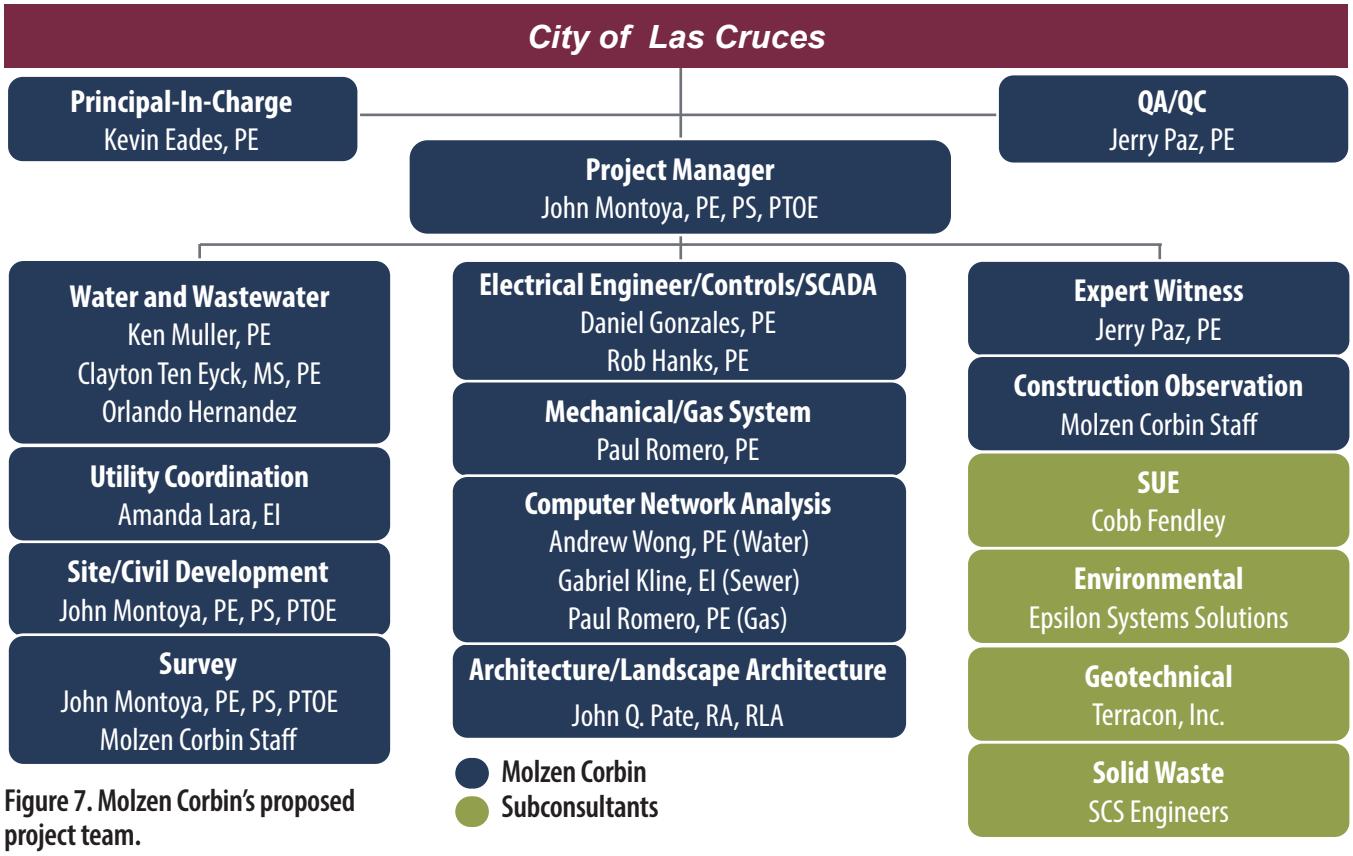

Figure 7. Molzen Corbin's proposed project team.

modal transportation planning and design, site development, water and wastewater system design, drainage and grading design, and stormwater detention basin design. Mr. Montoya also has considerable experience in the field of surveying and is a registered professional surveyor.

Mr. Montoya's project experience with the City of Las Cruces has spanned several decades, and he currently serves as the project manager for our engineering on-call contracts with the City of Las Cruces. His project experience with the City includes Harrelson Drive, Reynolds Drive, 14th and 17th Streets, the West Hadley Avenue Reconstruction, and roadway design for the CD-9 and CD-12 Street Improvements. He has also provided parking lot design, airport design, street lighting design, signal design, fencing design, and storm sewer and site development, including drainage and grading design. Mr. Montoya also has considerable experience providing transportation design and engineering service for numerous NMDOT projects in the region, including I-25/University Interchange Improvements (Las Cruces), Arrowhead Interchange Study, and West Mesa Corridor Phase A/B Study.

Areas of Competence: Project Management, Traffic Engineering, Roadway Planning and Design, Multi-Modal Design, Surveying, Site Development, Water and Wastewater Design, Computer Network Analysis, and Master Planning

Kevin Eades, PE: Principal-in-Charge

NM PE #14481 | B.S., Civil Engineering, NMSU | Years of Experience: 29 | Time Assigned: 2%

Mr. Eades is Molzen Corbin's President and Chief Executive Officer with 29 years of professional project management, master planning, and design experience. He has strong project management and client-relations experience and is especially talented in working with clients on a one-to-one basis to ensure that their needs are met. In addition to project coordination and development, he has designed and managed drainage, water, sewer, traffic, and roadway improvement projects across the state. He has served as the Technical Services Manager for numerous on-call contracts, including Belen (27 years), NMDOT (27 years), and Los Lunas (27 years), covering tasks across all engineering disciplines.

Areas of Competence: Project Management, Contract Management, and Traffic Engineering.

Jerry B. Paz, PE: QA/QC

NM PE #10521 | B.S., Civil Engineering, New Mexico State University (NMSU) | Years of Experience: 40 | Time Assigned: 4%

Mr. Paz is Molzen Corbin's Chief Operations Officer and leads our Water Resources Department. He has 40 years of experience in the design and management of water-related projects, including development of water master plans and design of numerous transmission, storage, and distribution improvements for communities across New Mexico. In addition, he has extensive experience as engineer-in-charge of large regional wastewater system design and improvements, and in performing quality control reviews of small to large regional wastewater and water resources system projects for planning, design, and construction of improvements. Most recently, he has been responsible for the planning and design of over $900 million in infrastructure improvements in New Mexico and Texas.

Areas of Competence: Quality Control and Document Review, Roadway Design, Water and Wastewater Design, and Expert Witness

Ken Muller, PE: Water Resources

NM PE #12548 | B.S., Civil Engineering, California Polytechnic Institute | Years of Experience: 53 | Time Assigned: 15%

Mr. Muller has 53 years of experience planning and designing water and wastewater facilities from small to large. His water projects include designing raw and finished water transmission lines, pressure-reducing stations, booster pump stations, storage, and systems to remove organics; and writing water system preliminary engineering reports (PERs). Mr. Muller also performs in-house quality control reviews of many Water Resources pre-final contract

documents, as well as maintains Molzen Corbin's standard Water Resources specifications.

Areas of Competence: Water Treatment, Wastewater Treatment, and Value Engineering

Clayton Ten Eyck, PE: Water Resources

NM PE #18866 | M.S., Environmental Engineering, Utah University, B.S., Civil Engineering, Northern Arizona University | Years of Experience: 19 | Time Assigned: 15%

Mr. Ten Eyck, MS, PE, has 18 years of experience in water and wastewater engineering, including designing wastewater treatment, collection, and effluent reuse improvements for several municipalities, tribes, utilities, and water and sanitation associations. At Molzen Corbin, Mr. Ten Eyck has managed several multi-discipline water and wastewater treatment plant projects.

Areas of Competence: Water Treatment, Wastewater Treatment, and Municipal Infrastructure

Orlando Hernandez: Water Resources

Education: B.S., Civil Engineering Technology, NMSU; A.A.S., Surveying Technology, Dona Ana Community College | Years of Experience: 5 | Time Assigned: 15%

Mr. Hernandez is an engineering graduate with more than five years of professional experience. With two years of experience at Molzen Corbin, he has assisted with the design of wastewater, water, roadway, and drainage projects for our municipal clients. In addition, Mr. Hernandez is an experienced Computer Aided Design Technician with a demonstrated history of working in the civil engineering industry. He is skilled in using AutoCAD and Arcgis Products.

Areas of Competence: Water/Wastewater Design

Amanda Lara, EI: Utility Coordination

B.S., Civil Engineering, NMSU | Years of Experience: 5 | Time Assigned: 20%

Ms. Lara is an engineering intern with 5 years of professional experience with Molzen Corbin. Since joining Molzen Corbin, she has assisted in the design of numerous roadway, water, and wastewater projects, including a major sewer interceptor repair and rehabilitation project in Ruidoso, NM. While pursuing her Civil Engineering degree at NMSU, she worked as an Engineering Coop for the City of Las Cruces Utilities Department. She assisted the Utilities Department with project management documentation, reports, and correspondence. She is proficient in AutoCAD and Civil 3D.

Areas of Competence: Construction Management, Utility Design and Coordination, and Computer Network Analysis

Daniel Gonzales, PE: Electrical Engineering/Controls

NM PE #25643 | B.S., Electrical Engineering, NMSU | Years of Experience: 19 | Time Assigned: 15%

Mr. Gonzales has 19 years of experience in the design of power, instrumentation and controls and SCADA systems. Related projects include low pressure sewer systems for Peralta, Tijeras, and Mesilla. Other recent projects include the SCADA Preliminary Design for the Eldorado Water & Sanitation District, the Village of Chama Water Treatment Facility, a well for the Greater Chimayó Mutual Domestic Water Consumers Association, the Buckman Water Treatment Facility for the City of Santa Fe, and wastewater treatment facilities for Ruidoso, Las Vegas, Sandia Pueblo, and Albuquerque. His work is critical to ensuring proper function of the plant's electrical equipment, communication, and controls.

Areas of Competence: Electrical Engineering, SCADA Design, and Instrumentation and Controls

Robert Hanks, PE: Electrical Engineering/SCADA

NM PE #23949 | B.S., Electrical Engineering, Louisiana Tech University | Years of Experience: 40+ | Time Assigned: 20%

Mr. Hanks has 40+ years of experience as an electrical engineer specializing in electrical and instrumentation and control (I&C) system design and implementation. Prior to joining

Molzen Corbin, Mr. Hanks was a Principal I&C Technologist at CH2M Hill. He was intimately involved in overseeing the layout, design, and specification of instrumentation and control equipment and power systems for large industrial projects, water and wastewater treatment facilities, booster pump stations, and sewage lift stations.

Areas of Competence: SCADA Design and Instrumentation and Controls

Paul Romero, PE: Mechanical/Gas/ Computer Network Analysis (Gas)

NM PE #14932 | B.S., Electrical Engineering, NMSU | Years of Experience: 29 | Time Assigned: 20%

Mr. Romero brings 29 years of experience to the Molzen Corbin team. He is a senior mechanical engineer skilled in leading efforts to sustain, optimize, and improve existing facilities while ensuring design and construction meet codes and client requirements. He has provided HVAC, plumbing, process piping, and fire protection design, and/or construction services for several New Mexico projects along with engineering analysis, project management, planning, and construction cost estimating services. Mr. Romero is also experienced in providing quality assurance technical reviews and facility maintenance engineering support on varying projects.

Areas of Competence: HVAC Design, Plumbing Design, and Gas System Design

Andrew Wong, PE: Computer Network Analysis (Water)

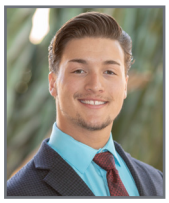
NM PE #25643 | B.S., Civil Engineering, NMSU | Years of Experience: 9 | Time Assigned: 20%

Mr. Wong is a professional engineer with 9 years of experience. He is a vital member of Molzen Corbin's Transportation Team supporting several key NMDOT projects from the Las Cruces Office, including the I-25/ University Interchange and US 285 projects. Mr. Wong also has direct experience in the areas of hydrologic analysis, hydraulic analysis, scour analysis, traffic capacity, traffic safety, water distribution systems, and wastewater collection systems. He most recently provided drainage design services for the NMDOT's I-25/Williamsburg Interchange Improvements Project.

Areas of Competence: Drainage, Roadway, and Utility Design

Gabriel Kline, EI: Computer Network Analysis (Sewer)

NM EI #7737 | B.S., Civil Engineering, NMSU | Years of Experience: 3 | Time Assigned: 20%



Mr. Kline has three years of civil engineering experience, including roadway design, traffic safety analysis, site design, drainage studies, water treatment studies, master planning, and municipal utility design. His experience includes working on the Sewer Collection System portion of the Las Cruces Utilities Master Plan. He has contributed to Phase A/B reports, design calculations, specifications, drafting, and scientific analysis.

Areas of Competence: Utility Design and Engineering Technical Support

John Pate, RA, RLA: Architecture/ Landscape Architecture

NM RA #1784, NM RLA #87 | B.S., Architecture, UNM | Years of Experience: 48 | Time Assigned: 10%

Mr. Pate has 48 years of experience in master planning and designing architectural and landscape projects. As a project manager, Mr. Pate's experience with diverse construction methods and materials enables him to provide meaningful direction to multi-disciplined teams. His approach to design balances function and aesthetics with a focus on cost savings, labor-saving building techniques, and the efficient use of materials. Due to his decades of experience working with municipal, State, and Federal clients, Mr. Pate has a strong sensitivity for producing projects within inflexible budget and time constraints. As

a landscape architect, Mr. Pate has worked extensively in all facets of site, neighborhood, and park development and landscape design.

Areas of Competence: Architecture and Landscape Architecture

Principal Officer

Mr. Kevin Eades, PE (NM PE #14481), President and Chief Executive Officer, is the principal member/officer of the firm who will be responsible for administration of this contract.

2701 Miles Road SE
Albuquerque, New Mexico 87106
(505) 242-5700/FAX (505) 242-0673
keades@molzencorbin.com

Subconsultants

Our full list of proposed subconsultants is provided in Figure 8 (below).

Work Performance Location

Molzen Corbin has maintained an office in Las Cruces for nearly 40 years. We offer full-service capabilities that have proven to be highly responsive to the City. At the same time, we are able to draw on our Albuquerque office for additional depth of staff when required.

Mr. Montoya, PE, will manage this project from Molzen Corbin's Las Cruces office at 1155 Commerce Drive, Suite F. Based on our past performance on similar projects, we estimate that 90% of the work for the City on this project will be completed in our Las Cruces office, with the remaining 10% completed in our Albuquerque office at 2701 Miles Road, SE.

Professional Responsible for Work

As Project Manager, Mr. John Montoya, PE (NM PE #12423), Vice President, is the principal member/officer of the firm who will also be in direct responsible charge of the work.

1155 Commerce Drive, Suite F
Las Cruces, New Mexico 88011
(575) 522-0049/FAX (575) 522-7884
jmontoya@molzencorbin.com

Figure 8. Molzen Corbin has cultivated decades long relationships with our trusted subconsultants.

Team/Responsibility	Experience & Areas of Competence
Cobb, Fendley & Associates: Subsurface Utility Engineering 5541 Midway Park Place NE, Albuquerque, NM 87109, (505) 508-0786 Contact: Sean Wolfe, PG Typical Percent of Time: 5%	CobbFendley is a multi-disciplined firm providing SUE, Utility Coordination and Design, Surveying and Mapping, Right-of-Way Acquisition, and Telecommunications Services. The firm has provided SUE services on more than 2,000 projects, working with clients and design consultant teams to assess and implement SUE strategies that eliminate utility conflicts and reduce costly construction delays.
Epsilon Systems: Environmental 205 W. Boutz Road, Bldg 4, Suite 3, Las Cruces, NM 88005, (575) 528-8197 Contact: Brad Beacham Typical Percent of Time: 5%	Epsilon Systems Solutions, Inc. (Epsilon Systems) is a certified resident New Mexico business. Epsilon Systems' professionals offer comprehensive regulatory support, guiding clients through environmental processes in both simple and complex situations. Epsilon Systems' strategic approach is based on a thorough understanding of environmental issues, the governing statutes, and the technical basis upon which the regulations were written.
Terracon: Geotechnical Services 4450 Bataan Memorial East, Las Cruces, NM 88011, (575) 527 1700 Contact: Ivan Avelar, PE Typical Percent of Time: 5%	Terracon is an employee-owned consulting engineering firm founded in 1965 that specializes in geotechnical, materials, environmental, and facilities. Terracon provides geotechnical field investigations, engineering analysis, report preparation, and laboratory and field testing services throughout New Mexico. Terracon has been part of the Molzen Corbin team on numerous projects in New Mexico for over 20 years.
SCS Engineers: Solid Waste 500 Marquette Avenue, NW, Suite 1200, Albuquerque, NM 87102, (505) 349-8060 Contact: Tom Parker, PE, BCEE Typical Percent of Time: 5%	SCS is one of the most widely respected solid waste consulting firms in the country, helping clients optimize solid waste operations and environmental controls. They serve public and private sector clients by providing comprehensive solid waste management services for landfills and solid waste facilities, including program design and implementation, master plans and studies, regulatory compliance, financial analysis, and public outreach.

3. Performance of the Firm with Previous Clients

Four Hills Booster Pump Station, ABCWUA

As part of an engineering on-call contract with the Albuquerque-Bernalillo County Water Utility Authority (ABCWUA), Molzen Corbin was contracted to complete a facilities improvement project at the Four Hills Pump Station. The project began with a site assessment to identify the facility's needs and recommended improvements. The facility is operational, so downtime had to be kept to a minimum. Special consideration was given to the layout of the new equipment and the construction sequencing to minimize the amount of downtime required.

Four Hills Booster Pump Station, ABCWUA

The improvements included the following:

- Reconfigured 4160V service equipment
- Starter technology change (changed from RVAT to across-the-line)
- Pump motor replacement (performed by Alpha Southwest as part of their on-call contract with the ABCWUA)
- Pump pit floor rehab
- Grated deck system improvements
- Replacement of corroded cast iron roof drains
- Process pipe improvements
- Control valve upgrades (some replacement and some rehabilitation)

The project scope expanded during construction and Molzen Corbin was able to quickly and efficiently respond to the additional request made by the Water Utility Authority.

Contact: Mr. Charles Lee, PE, Electrical Engineer, (505) 289-3455, (505) 280-8935 (Cell)

Valley Drive Utilities, NMDOT and City of Las Cruces

Molzen Corbin's redesign of Valley Drive in Las Cruces required significant coordination with the NMDOT, the City of Las Cruces, and local property and business owners. Constructed in the 1950s, the existing roadway was largely rural and dated, requiring capacity, access management, drainage, and utility improvements. Molzen Corbin designed the roadway and drainage improvements for the NMDOT, and through our on-call contract with the City of Las Cruces, we designed utility improvements to be built in conjunction with the highway.

Below the surface, a complete storm drain system was installed with capacity for future expansion, and the water, sanitary sewer, and gas systems

Valley Drive, Las Cruces

were all replaced. The storm drain system was designed to not only handle the roadway runoff but allow for the City to extend the storm drain to adjacent developments. To accommodate the large flows, multiple drainage systems were installed with storm drain ranging in size from 18- to 72-inches for a total of 7,800 LF of storm drain trunk line. Additional utility improvements included 930 LF of 6-inch waterline, 1,060 LF of 10-inch waterline, and 10,170 LF of 12-inch waterline; 2,730 LF of 8-inch sanitary sewer line, 380 LF of 10-inch sanitary sewer line, 140 LF of 12-inch sanitary sewer line, and 200 LF of 15-inch sanitary sewer line; and 1,900 LF of 2-inch and 8,800 LF of 4-inch natural gas line.

Contact: Mr. Arthur Romero, PE, Project Development Engineer, (575) 202-3340

Wastewater Treatment Plant, Anthony Water and Sanitation District (AWSD)

New 0.98 mgd WWTP (1995)

Molzen Corbin has been involved with AWSD since 1982. We designed the District's first wastewater treatment facility with aerated lagoons, which treated approximately 250,000 gallons per day. As the community grew and the demand increased, Molzen Corbin assisted AWSD in securing more than **$3 million in funding from NM State Special Appropriations, Rural Utility Service, and the US Economic Development Administration** to design and construct a new wastewater treatment facility. We also assisted in securing New Mexico's first Colonias grant for this project.

Molzen Corbin designed a new 0.98 mgd facility on the same site as the existing plant, while accommodating a tight timeframe and keeping the existing plant operational during construction. The new treatment facility was designed as an activated sludge system containing all process components that are contained within circular walls to reduce the facility's overall footprint (a concentric package plant). This included the aeration basins, clarifier, and sludge thickener with the ultra-violet light disinfection unit in close proximity. In anticipation of the EPA's stricter stance on nitrogen, we also designed the facility to be easily upgraded to accommodate future treatment requirements. The facility incorporated the use of the existing main plant lift station to reduce overall costs on the project.

WWTP Expansion (2023)

As a first step in the WWTP expansion project, Molzen Corbin completed a WWTP PER for AWSD, which included a comprehensive update to the WWTP and solids handling facilities. The PER was used to leverage the significant amount of funding needed for the WWTP expansion and renovations. The new design consists of a second concentric package plant to double the capacity of the existing facility. The new plant is being constructed adjacent to the existing plant as an identical, mirrored structure, so both facilities can share the treatment process and facilities (see diagram on bottom left), including the Entrance Works. Construction is currently underway with an anticipated completion date of late 2024.

Contact: Mr. Jose Terrones, Public Works Director, (575) 882-3922, (915) 630-5291 (Cell)

At AWSD's wastewater treatment plant, all process components are contained within the circular walls to reduce the facility's overall footprint.

CITY OF LAS CRUCES

PROJECT ASSIGNMENT AGREEMENT

23-24-052 UTILITIES ENGINEERING SERVICES

PROJECT NAME

Pursuant to terms and conditions of City of Las Cruces (CITY) Contract No. 23-24-052 dated June 1, 2024 between the CITY and Molzen Corbin and Associates (ENGINEER), as amended and incorporated herein by reference, the City and Contractor hereby agree on this _____ day of _____, 20___, as follows:

1. In a satisfactory and proper manner, the ENGINEER shall perform SERVICES as proposed in response to the CITY's RFP No. 23-24-052 and ENGINEER's proposal as set forth in ATTACHMENT A attached hereto.

2. The estimated completion date is number days after a Notice to Proceed is issued by the CITY to the ENGINEER.

3. In consideration for the satisfactory completion of the work agreed to herein, compensation shall be made in the amount of $dollars.cents, plus NMGRT. Invoices issued by the ENGINEER shall be made monthly / upon completion of project with payment by the CITY being made within 30 days upon receipt of undisputed invoice.

CITY OF LAS CRUCES

PROFESSIONAL SERVICES AGREEMENT

THIS AGREEMENT, made and entered into on this _____ day of _____, 2024 by and between the City of Las Cruces, New Mexico, hereinafter called "CITY" and Miller Engineers, Inc. dba Souder, Miller & Associates, of 3500 Sedona Hills Parkway, Las Cruces, NM, 88011, hereinafter called "CONTRACTOR".

1. PROJECT DESCRIPTION
Utilities Engineering Services on an as needed basis via Project Assignment Agreements (Attachment "A") during the term of this AGREEMENT.

2. SCOPE OF SERVICES
In a satisfactory and proper manner, the CONTRACTOR shall perform SERVICES, as proposed in response to the CITY'S RFP No. 23-24-052, as set forth in Exhibit A, attached hereto and made a part of this Agreement.

The CONTRACTOR is authorized to extend the same terms and conditions of this Agreement to other governmental entities conditioned upon the procurement laws and regulations of those entities. The CITY shall not be a party nor have any liability relating to such extensions.

3. APPROPRIATIONS
The terms of this Agreement are contingent on sufficient appropriations and authorization being made by the City Council for the performance of this Agreement. If sufficient appropriations and authorizations are not made by the City Council, this Agreement shall terminate upon written notice given by the CITY to CONTRACTOR. The CITY'S decision as to whether sufficient appropriations and authorizations exist shall be accepted by CONTRACTOR and shall be final.

4. COMPENSATION
The CITY shall compensate CONTRACTOR for the performance of SERVICES under this Agreement an amount agreed to for each assigned project, plus applicable taxes. CONTRACTOR shall perform the SERVICES upon receipt of a purchase order or written Notice to Proceed for each assigned project from the CITY. The CITY cannot authorize costs to be incurred prior to such written Notice to Proceed. CONTRACTOR shall submit invoices upon completion of the project. CITY shall pay invoices Net 30 days upon receipt of undisputed invoice.

CONTRACTOR is responsible for payment of State of New Mexico Gross Receipts Tax levied on the amounts payable under this Agreement. CONTRACTOR agrees to comply with all federal and state tax payments and report all items of gross receipts as income from the operations of its business.

5. DEVOTION OF ADEQUATE TIME
CONTRACTOR will devote the necessary hours each week to the performance of projects that are required by the CITY and it will serve the CITY diligently and faithfully,

and according to its best ability in all respects and will promote the best interests of the CITY.

6. TERM AND SCHEDULE
This Agreement shall become effective on June 1, 2024 for a term of 5 years through May 31, 2029.

CONTRACTOR shall perform the SERVICES in accordance with the time set forth as agreed upon by the CITY and CONTRACTOR and as agreed to for each project assigned under the terms of this Agreement.

7. EXTENSIONS, CHANGES, AND AMENDMENTS
This Agreement shall not be extended, changed, or amended except by instrument in writing executed by the parties. The CITY shall not be liable for payment of any extra services nor shall CONTRACTOR be obligated to perform any extra services except upon such written agreement. Such written approval shall indicate the date said extension, change, or amendment is effective and shall be signed by the parties to this Agreement. In the event that the parties cannot reach agreement as to a particular change, the issue shall be resolved pursuant to Article 21.

8. CHANGES AND EXTRA SERVICES BY THE CITY
The CITY may make changes within the general scope of the SERVICES plus may also request CONTRACTOR to perform other extra services not incorporated within the Services set forth in this Agreement. If the CONTRACTOR is of the opinion that such change causes an increase or decrease in the cost and/or the time required for performing the changes or other services required by the City, CONTRACTOR shall so notify the CITY of that fact within five (5) business work days from the date of receipt of change by the CITY. The CITY shall provide written response to the CONTRACTOR within five (5) business work days from the date of receipt of CONTRACTOR’S written notification.

9. CHANGES AND EXTRA SERVICES BY THE CONTRACTOR
In the event a condition is identified by the CONTRACTOR which, in the opinion of the CONTRACTOR, changes the services, costs, and/or time required for performance under this Agreement, the CONTRACTOR shall provide written notification to the CITY within five (5) business work days of such identification. The CITY shall respond in writing to such notification within five (5) business work days from the date of receipt of CONTRACTOR’S notification.

10. DELAYS
In the event that performance of SERVICES is delayed by causes beyond reasonable control of CONTRACTOR, and without the fault or negligence of CONTRACTOR, the time and total compensation for the performance of the SERVICES may be equitably adjusted by written agreement to reflect the extent of such delay. CONTRACTOR shall provide the CITY with written notice of delay pursuant to Article 9 including therein a description of the delay and the steps contemplated or actually taken by

CONTRACTOR to mitigate the effect of such delay. The CITY will make the final determination as to reasonableness of delays.

11. TERMINATION
This Agreement may be terminated by either party hereto upon fifteen (15) calendar days written notice in the event of substantial failure by the other party to perform in accordance with the terms of this Agreement through no fault of the terminating party. This Agreement may also be terminated by the CITY for its convenience or because the PROJECT has been permanently abandoned, but only upon fifteen (15) calendar days written notice to CONTRACTOR.

In the event of termination, CONTRACTOR shall be compensated for all services performed and costs incurred up to the effective date of termination for which CONTRACTOR has not been previously compensated.

Upon receipt of notice of termination from the CITY, CONTRACTOR shall discontinue the SERVICES unless otherwise directed and upon final payment from the CITY deliver to the CITY the required number of copies of all data, drawings, reports, estimates, summaries, and such other information and materials as may have been accumulated by CONTRACTOR in the performance of this Agreement, whether completed or in process.

12. RECORDS AND AUDITS
CONTRACTOR will maintain records indicating dates, length of time, and services rendered. The CITY has the right to audit billings both before and after payment, and contest any billing or portion thereof. Payment under this Agreement does not foreclose the CITY'S right to recover excessive or illegal payments. CONTRACTOR will retain records for five (5) years after the completion of the project.

13. DISCLOSURE AND OWNERSHIP OF DOCUMENTS, PRODUCTS, DESIGN, ELECTRONIC FILES
All technical data, electronic files, and other written and oral information not in the public domain or not previously known, and all information, electronic files, and data obtained, developed, or supplied by the CITY will be kept confidential and CONTRACTOR will not disclose to any other party, directly or indirectly, without the CITY'S prior written consent unless required by lawful order.

All technical data, electronic files, products developed, operational parameters, blueprints, and other information and work of the CONTRACTOR shall be the sole property of the CITY and shall be delivered to the CITY when requested and at the end of the Agreement.

14. INDEPENDENT CONTRACTOR
CONTRACTOR represents that it has, or will secure, at its own expense, all personnel required in performing the SERVICES under this Agreement. Such personnel shall not be employees of, nor have any contractual relationship with the CITY. CONTRACTOR,

consistent with its status as an independent contractor, further agrees that its personnel will not hold themselves out as, nor claim to be officers or employees of the CITY by reason of this Agreement.

To the extent that CONTRACTOR employs any employees, CONTRACTOR shall be solely responsible for providing its own form of insurance for its employees and in no event shall CONTRACTOR's employees be covered under any policy of the CITY.

CONTRACTOR'S retention hereunder is not exclusive. Subject to the terms and provisions of this Agreement: (i) CONTRACTOR is able, during the Term hereof, to perform services for other parties; and (ii) CONTRACTOR may perform for its own account other professional services outside the scope of this Agreement.

CONTRACTOR is and shall be an Independent Contractor and shall be responsible for the management of its business affairs. In the performance of the work under this Agreement, CONTRACTOR will at all times be acting and performing as an Independent Contractor, as that term is understood for federal and state law purposes, and not as an employee of the CITY. Without limitation upon the foregoing, CONTRACTOR shall not accrue sick leave, jury duty pay, retirement, insurance, bonding, welfare benefits, or any other benefits, which may or may not be afforded employees of the CITY. CONTRACTOR will not be treated as an employee for purposes of: Workers' Compensation benefits; the Federal Unemployment Tax Act; Social Security; other payroll taxes, federal or any state income tax withholding; or the employee benefit provisions described in the Internal Revenue Code of 1986, as amended. Neither the CITY, nor its agents or representatives, shall have the right to control or direct the manner, details or means by which CONTRACTOR accomplishes and performs its services. Nevertheless, CONTRACTOR shall be bound to fulfill the duties and responsibilities contained in the Agreement.

15. NO JOINT VENTURE OR PARTNERSHIP

Nothing contained in this Agreement shall create any partnership, association, joint venture, fiduciary or agency relationship between CONTRACTOR and CITY. Except as otherwise specifically set forth herein, neither CONTRACTOR nor CITY shall be authorized or empowered to make any representation or commitment or to perform any act which shall be binding on the other unless expressly authorized or empowered in writing.

16. ASSIGNMENT

CONTRACTOR shall perform all the services under this Agreement and shall not assign any interest in this Agreement or transfer any interest in same or assign any claims for money due or to become due under this Agreement without the prior written consent of the CITY.

17. INSURANCE
CONTRACTOR shall obtain and maintain insurance at its own cost and expense during the life of this Agreement, and shall require Subcontractors, if any, to maintain during the life of his subcontract:

1. Commercial General Liability Insurance
   a. $1,000,000 per occurrence / $2,000,000 aggregate
   b. Coverage must include premises and operations, products and completed operations, and personal and advertising injury.
   c. The City of Las Cruces must be named as an Additional Insured for all coverages listed above on endorsements acceptable to the City.
   d. Coverage must be primary and non-contributory.
   e. Coverage must be per project or per location.
   f. Coverage must be on an occurrence form.
   g. Subrogation must be waived.
2. Commercial Auto Liability
   a. $1,000,000 per occurrence
   b. Coverage must be for “owned, leased, hired, and non-owned autos” or “any autos.”
3. Workers’ Compensation and Employers Liability
   a. Statutory Limits
   b. Employer liability – $1,000,000 each accident, $1,000,000 each employee by disease, $1,000,000 policy limit
   c. Subrogation must be waived.
4. Professional Liability: $1,000,000 per claim

Endorsements for additional insured coverage and waivers of subrogation must be provided as a condition of this Agreement and shall be noted on the certificate.

CONTRACTOR shall furnish the CITY with a certificate(s) of insurance showing CONTRACTOR and Subcontractors, if any, have complied with this Article. The CONTRACTOR shall provide insurance certificates before work is to start on the project and shall provide the CITY thirty (30) days written notification of cancellation of such policies.

18. INDEMNITY AND LIMITATION
CONTRACTOR shall indemnify, defend, and hold harmless the CITY from and against any and all claims, suits, actions, judgments, demands, losses, costs, expenses, damages, and liability caused in whole or in part by, resulting in whole or in part from, or arising in whole or in part out of the negligent acts, errors, or omissions of CONTRACTOR, its officers, employees, agents, or representatives in the performance of SERVICES under this agreement.

19. APPLICABLE LAW
This Agreement and the rights and obligations of the parties shall be governed by and construed by the laws of the State of New Mexico applicable to Agreements between

New Mexico parties made and performed in that state, without regard to conflicts of law principles. Venue shall be in the Third Judicial District, State of New Mexico.

CONTRACTOR shall abide and be governed by all applicable state law, CITY ordinances, and laws regarding the CONTRACTOR'S services or any work done pursuant to this Agreement, including anti-discrimination.

20. BREACH
In the event CONTRACTOR breaches any obligation contained in this Agreement, prior to instituting any action or dispute resolution procedure, the CITY shall give CONTRACTOR written notice of such breach. In the event CONTRACTOR fails to remedy the breach within five (5) working days of receiving such written notice, the CITY, at its sole discretion, without any obligation to do so and in addition to other remedies available under applicable law, may remedy CONTRACTOR'S breach and recover any and all costs and expenses in so doing from CONTRACTOR.

21. DISPUTE RESOLUTION
In the event that a dispute arises between CITY and CONTRACTOR under this Agreement or as a result of breach of this Agreement, the parties agree to act in good faith to attempt to resolve the dispute.

22. NOTIFICATION
All notices required or permitted under this Agreement shall be in writing and shall be deemed sufficiently served if served by Registered Mail addressed as follows:

TO CITY:	City of Las Cruces PO Box 20000 Las Cruces, NM 88004 ATTENTION: Tony Trevino
With Copies to:	City Attorney Purchasing Manager
TO CONTRACTOR:	Miller Engineers, Inc. dba Souder, Miller & Associates 3500 Sedona Hills Parkway Las Cruces, NM 88011 ATTENTION: Paul J. Pompeo

23. SCOPE OF AGREEMENT
This Agreement incorporates all of the agreements, covenants, and understandings between the parties hereto concerning the subject matter hereof and that all such covenants, agreements, and understandings have been merged into this written agreement. No prior agreement or understanding verbal or otherwise of the parties or their agents shall be valid or enforceable unless embodied in this agreement.

24. SEVERABILITY
The parties agree that each provision of this Agreement is severable and the invalidity or unenforceability of any one or more of the provisions of this Agreement shall not affect the validity or enforceability of any other provision of this Agreement, and this Agreement shall be construed in all respects as if such invalid or unenforceable provisions were omitted.

25. CONFLICT OF INTEREST
CONTRACTOR represents and warrants that CONTRACTOR has no business, professional, personal, or other interest, including, but not limited to, the representation of other clients, that would conflict in any manner or degree with the performance of its obligations under this Agreement. If any such actual or potential conflict of interest arises under this Agreement, CONTRACTOR shall immediately inform the CITY in writing of such conflict. If, in the reasonable judgement of the CITY, such conflict poses a conflict to and with the performance of CONTRACTOR'S obligations under this Agreement, or is otherwise a violation of the CITY'S current policy or ordinances, then the CITY may terminate the Agreement immediately upon written notice to CONTRACTOR; such termination of the Agreement shall be effective upon the receipt of such notice by CONTRACTOR.

EXHIBIT A
SERVICES

A. Project Assignments
A Project assignment is initiated by the City providing the selected Engineer a detailed project description, including scope of work and any other special instructions needed by the Engineer to prepare items such as preliminary and final cost estimates, complete project plans and specifications, project reports, and other related engineering services. The awarded Engineers shall provide engineering services that may include but not be limited to, the following:
1. Computer network analyses for water, wastewater, and gas systems; design of water, wastewater, and gas utility systems; well house design; Supervisory Control and Data Acquisition (SCADA); water treatment process; master planning; feasibility studies; solid waste studies; land use permitting; subsurface utility exploration; boundary/easement survey; and National Pollutant Discharge Elimination System (NPDES) & Stormwater Pollution Prevention Plan (SWPPP) compliance.
2. Electrical design (wells, booster stations, lift stations, odor control stations, building electrical system design)
3. Computer network analysis for Gas (GasWork), Water (InfoWater), and Wastewater (InfoSewer). The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility
4. Solid waste studies, landfill system design and analysis
5. Environmental surveys, assessments monitoring and management, such as indoor air quality, asbestos, mold, and other related services for the City
6. Geotechnical Assessments, such as soil and groundwater testing for contamination and remediation, and other related services for the City
7. Expert witness in a judicial and/or quasi-judicial setting.
8. Project Management
9. Construction Inspection.

B. Project Assignment Agreements
A Project Assignment Agreement (a template of which is incorporated herein as ATTACHMENT “A”) will be negotiated and executed on a case-by-case basis for each specific project, and will include a cost proposal from the Engineering firm(s) proposing to do the work. The cost proposal may utilize one of the following pricing formats:
1. Lump Sum
2. Unit pricing to include:
    a. Hourly rate for various types of services requested by the City
    b. Charges for miscellaneous items such as blueprints, data, discs, rental of special equipment, etc.
    c. A statement of the billing procedures including minimum billing units, if any.
    d. Cost of sub-consultants (if any)
3. An alternative unit cost breakdown

C. Deliverables
Each project contract will require a list of deliverables, schedule/timeline and cost. The

Engineer may be required to supply to the City an of the following items, when specified and as requested on the Scope of Work for each individual project.

1. Preliminary report containing schedule of work and cost estimate.
2. Construction drawings and documents. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility. Provide hard copies and PDF format of the construction plans for Purchasing Section use.
   a. As-built drawings on electronic media and reproducible prints. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. All horizontal and vertical location datum information shall be coordinated with the City Surveyor. The utility location information shall be tied to project control monuments and referenced to project construction stationing. The project control survey shall be certified by a New Mexico Registered Land Surveyor. Metadata or “data about the data” shall be submitted with each as-built electronic file, preferably as a separate text file on the electronic submittal media, and shall include:
      - Name, address and phone number of the responsible land surveyor.
      - Date of completion of survey.
      - Equipment used to conduct the survey.
      - Horizontal and vertical control marks used to tie the survey to the City approved control.
      - Transformation factors needed to reduce Ground (local coordinate system) to Grid and combined scale factor used.
   b. “RECORD DRAWINGS” shall be clearly labeled on each sheet.
3. Computer network analysis for gas, water, and wastewater shall be provided to the City in appropriate electronic format. It shall include the entire model, including changes and a text summary (report) of the network analysis that includes assumptions, procedures, and results, and any graphics that clarify the analysis. The Engineering firm(s) shall verify the report format with the City. The computer network analysis shall be provided using the software listed below. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility.
   a. Computer network analysis for Gas: GasWork
   b. Computer network analysis for Water: InfoWater
   c. Computer network analysis for wastewater: InfoSewer
   d. Other design computer programs as approved by the City
4. Project reports.
5. Any other item specified in the contract for that project
6. Easement map and recording information

D. The selection of an Engineer for a specific project shall be based on experience with similar projects, references, performance in similar projects, and availability. This will include the ability to meet schedules, cost control, and responsiveness to client.

E. The Engineer shall have an engineering staff on-site everyday who is responsible, on behalf of the Engineer, for providing timely completion and response for performance of the terms of each Project Assignment Agreement during the progress of each individual project. Any deviation from this requirement is at the discretion of the City and must be approved in writing by the City prior to the start of any individual project.

RE: SUBMITTAL OF PROPOSAL FOR CITY OF LAS CRUCES, "UTILITIES ENGINEERING SERVICES", RFP NO. 23-24-052

Dear Members of the Selection Committee:

The following proposal is in response to the City of Las Cruces RFP No. 23-24-052 entitled "Utilities Engineering Services." Miller Engineers, Inc. d/b/a Souder, Miller & Associates (SMA) has prepared this response in strict accordance with the written RFP issued by the City. SMA has received Addenda Nos. 1 & 2.

SMA has reviewed the RFP and is familiar with the City's policies, procedures, and conditions, ***having provided consulting services on numerous projects for the City using local staff for more than 29 years. SMA has provided on-call and standalone consulting services directly to the City on current and past contracts, and as a subconsultant to other firms for City projects. These include recent and ongoing projects, such as the NASA Road High Pressure Gas Line Replacement Project, the Zone 1 Interconnect Phase B Project 2, the Telshor and Lohman Storm Drain Repair Project, and the RoadRUNNER Transit Operations & Maintenance Facility.***

SMA has over 175 employees ***(more than 45 based in Las Cruces)***, including more than 35 registered professional engineers ***(seven in Las Cruces)***, registered professional surveyors and geologists, construction observers, and certified water and wastewater system operators ***in-house*** and has completed hundreds of infrastructure improvements projects, many of these with time limited completion schedules to meet funding deadlines. ***Several of SMA's project team members have developed a close working relationship with City staff members, based on clear communication and attention to the City's needs and wishes.*** Our proposed project team is prepared to move forward immediately when given notice to proceed.

Our local Las Cruces office, where all project management and field work will be performed for the City's projects, has served southern New Mexico for nearly 30 years, providing a stable and dependable foundation on which our valued clients can rely. This stability and continuity have allowed SMA to provide the highest-quality services to successfully complete each project while meeting and exceeding our clients' expectations. Our data gathering and design process focuses on client involvement, allowing the attention to detail afforded by a small firm and the depth of experience and resources of a large firm. We also have very good channels of communication with the different agencies of the State of New Mexico and Doña Ana County, which will prove instrumental for timely completion of projects under this contract.

On behalf of the entire SMA project team, we look forward to continuing our valued relationship with the City of Las Cruces and appreciate your consideration of our proposal. If you have any questions about this proposal or would like to meet at your convenience to discuss this project, please feel free to contact the undersigned via the email or phone numbers provided below.

Sincerely,

Company Introduction

Miller Engineers, Inc. d/b/a Souder, Miller & Associates (SMA) appreciates this opportunity to propose to the City of Las Cruces (City) to provide Utilities Engineering Services as described in the City's RFP No. 23-24-052. ***The SMA project team is structured to provide the City with the highest quality services using experienced professionals all coordinated from SMA's nearby Las Cruces office with more than 45 local staff members.***

SMA is an incorporated, New Mexico-based, employee-owned engineering, environmental and surveying consulting firm serving clients throughout New Mexico and the entire Mountain West region. Our project team emphasizes close working relationships and frequent interaction, allowing us to provide the highest quality product tailored to our client's needs while closely managing project costs and timelines.

The SMA Las Cruces office was established in 1995 to serve southern New Mexico. Since then, this office has grown to more than 45 employees, making it one of the largest engineering/ environmental consulting offices in southern New Mexico.

SMA offers comprehensive professional services including planning facilitation, asset management, preliminary and final project design (including any necessary environmental support, surveying, and right-of-way acquisition), regulatory plan reviews, bid administration, permitting, construction administration, construction observation, and support services, including grant administration and funding applications.

SMA has successfully completed similar on-call and standalone civil engineering design work with numerous municipal clients on projects throughout the state, including the City of Las Cruces. Our project team members are well-versed in the requirements of various regulatory agencies anticipated to be involved, including the City of Las Cruces, Doña Ana County, and the different agencies of the State of New Mexico.

SMA will provide all project management; engineering planning, analysis, and design; environmental documentation; expert witness services; and construction observation services in-house. In order to provide the highest quality services and technical diversity to the City of Las Cruces, SMA has enhanced its project team with CobbFendley for Subsurface Utility Engineering (SUE) services, Bath Group, Inc. (Bath) for supplemental computer network analysis, Southwest Engineering, Inc. (SEI) for geotechnical assessments and soil & groundwater testing, DCE Environmental, Inc. (DCE) for supplemental environmental investigation services, and The Response Group (TRG) for Electrical Design and SCADA system design. SMA has regularly teamed with each of these firms on several projects over the past 25+ years to complement each firm's strengths.

Technical Approach for Work to be Performed

While there are no specific projects listed in the City of Las Cruces RFP, SMA understands the City's ongoing needs for infrastructure improvements within each of the listed services by virtue of prior City-assigned projects. SMA has reviewed the RFP, and our project team members have met with City staff to discuss the current and long-term needs of the community. The following information outlines SMA's approach to each project.

While SMA has a successful project completion track record, we strive for continuous improvement. As part of that effort, SMA's project manager prepares a Project Management Plan (PMP) to guide the project execution and control and to document the team's approach to communicating with the client and managing risk. To ensure a solid company performance on the project, weekly operations meetings provide project managers the opportunity to present information to senior staff regarding project performance; scope; client needs; and resource availability. In addition, project managers schedule periodic meetings with each of the task managers to verify that assignments are being completed on schedule. Ultimately, the project manager communicates the progress of the project to the client and stakeholders.

Project Kick-off Meeting
For each new task order, SMA conducts internal kick-off meetings to coordinate and begin work on project-specific processes. The purpose of the kick-off meeting is to define the following:

Project-specific goals	Schedule of client progress reports and design reviews	Major design milestones
Schedule of internal design reviews to meet milestones	Timelines and budgets	Critical path issues that will control the schedule

Coordination and Status Review Meetings
The SMA team believes that regular communication and feedback are critical for success. During the contract period, SMA conducts regular meetings with and provides written updates to the City regarding the progress of the project. Whether formal or informal, SMA reviews the work product, cost estimates and project schedule with the City to ensure that the project goals are being met. Finally, SMA keeps in regular contact with regulatory and funding agencies, as well as contractors and sub-contractors. Working closely with the City to incorporate feedback and ideas enhances the quality of work.

Quality Assurance/Quality Control (QA/QC)
SMA places a high value on producing quality products, which we accomplish by following our QA/QC program that focuses on staff training and management involvement to ensure that all technical, scheduling, and budgetary requirements are met. Each project is initiated with a startup meeting where responsibilities for all staff members involved are clearly defined. During the life of the project, regular progress review meetings are conducted between all project staff to maintain the designated schedule, highlight any changes in scope, and identify and correct any delays or problems. A key value provided by SMA is data and report validation, which we accomplish through independent review of final reports by senior and project level staff other than the author.

2. Qualifications/Competence

SMA has identified a specialized planning and design team that includes several local professional engineers to work with the City. While all of the company resources, including more than 35 New Mexico registered professional engineers statewide, are at the disposal of the City, the table on the following page outlines the primary responsibilities of key members, ***all of whom have provided similar services for municipalities throughout southern New Mexico, including current and past projects for the City of Las Cruces.*** Resumes for primary Senior team members in charge of direct project management follow the table.

Service		SMA Key Personnel or Subconsultant	Location
Computer Network Analysis	Water Wastewater Gas	Robert Storey, P.E. Robert Storey, P.E. Bath *(Subconsultant as needed)*	Las Cruces Las Cruces El Paso, TX

NPDES & SWPPP Compliance	Jay Vanlandingham, R.G.	Las Cruces
Electrical Design	TRG *(Subconsultant as needed)*	Albuquerque
Solid Waste Studies; Landfill System Design & Analysis	Scott McKitrick, P.G.	Albuquerque
Environmental Surveys, Assessments, Monitoring, and Management Indoor Air Quality, Asbestos, and Mold	Niki Harings, Ph.D. DCE *(Subconsultant as needed)*	Las Cruces Albuquerque
Geotechnical Assessments; Soil & Groundwater Testing	SEI *(Subconsultant as needed)*	Las Cruces
Expert Witness Services	All Task Leads as applicable	TBD
Project Management	All Task Leads as applicable	TBD
Construction Inspection	Richard Bustos	Las Cruces

Key Personnel - Experience and Expertise

The following bios outline the experience, professional designations, areas of special expertise and areas of competence for each of SMA's key team members. Our Project Manager and primary Task Leads are based in (and residents of) Las Cruces ***and collectively represent well over 100 years of specific engineering experience in Las Cruces.*** For space considerations, this listing only includes Senior level personnel in charge of management for the project services. Additional information on all listed staff, including full resumes, is available on request.

Percent of Time Assigned to the Project: Up to 15%

Marty Howell, P.E. | Senior Engineer / Task Lead – Utility Design

B.S. - Civil/Environmental Engineering
Professional Engineer - New Mexico (#22670), Arizona, Colorado, North Dakota, Texas

Areas of Expertise and Competence
Utility System Planning & Design, Expert Witness, Project Management

Responsibilities and Experience

Mr. Howell is a Senior Engineer at SMA with more than 30 years of experience in engineering planning and design. His project experience spans a broad range of technical disciplines, providing design and management on water, wastewater, landfill, and roadway projects. Before joining SMA, Mr. Howell was the Director of Economic Development and Sustainability for the City of El Paso, TX, and prior to that was the Water Resources Operations Manager for the City of Greeley, CO. His past project experience includes design and construction of water storage, distribution, and treatment improvements; wastewater collection, treatment, and reuse; utility master planning; feasibility studies and planning for new water and wastewater system projects. Mr. Howell has worked extensively with municipalities and utility systems throughout southern New Mexico, ***including recent infrastructure improvements for City of Las Cruces.***

Representative Past Projects

- City of Las Cruces Hacienda Acres Phases 1 & 2 Sewer System Improvements
- City of Las Cruces Mesa Development Water Improvements
- City of Las Cruces WWTF Reinvestment Project Construction Observation Services
- City of Las Cruces Zone 1 Interconnect Phase B Project 2
- City of Las Cruces Missouri Tank Rehabilitation
- City of Carlsbad Engineering On-Call
- Village of Ruidoso Multiple Water, Wastewater, and Roadway Improvements
- Lower Rio Grande PWWA On-Call Engineering and Multiple Water & Wastewater System Improvements
- Garfield MDWC & MSWA Multiple Water System Improvements
- Town of Mesilla McDowell Road Wastewater Collection Phases 1 & 2

Stronger Communities by Design®

Percent of Time Assigned to the Project: Up to 20%

Robert Storey, P.E. | Project Engineer / Task Lead – Computer Network Analysis

B.S. - Civil Engineering (Math Minor)
Professional Engineer - New Mexico (#26569)

Areas of Expertise and Competence
Computer Network Analysis, Project Management, Utility Design

Responsibilities and Experience
As a Project Engineer with SMA, Mr. Storey's duties include utility system modeling, utility network analysis, and the development and review of construction drawings, technical specifications, and Opinion of Probable Construction Cost (OPCC) documentation for site development, water, wastewater, and natural gas infrastructure projects. He also assists in permitting and bid phase services for these projects.

Mr. Storey has worked as a research assistant at New Mexico State University, researching various water treatment methods. ***He has worked as a co-op at the City of Las Cruces Water Resources Department working with the City's water model, developed reports on the well production, water quality, and various other aspects of the City's water operations.*** He has also provided design support for structural, water, wastewater, and gas systems throughout southern New Mexico. Mr. Storey currently or has recently provided planning and design services for numerous utility system improvements projects in southern New Mexico.

Representative Past Projects

- City of Las Cruces Hacienda Acres Phase 2 Sewer System Improvements
- City of Las Cruces Mesa Development Water Improvements
- City of Las Cruces WWTF Reinvestment Project Construction Observation Services
- Town of Mesilla McDowell Road Wastewater Collection Phases 1 & 2
- City of Las Cruces NASA Road High-Pressure Gas Line
- City of Carlsbad Engineering On-Call
- Lower Rio Grande PWWA On-Call Engineering and Multiple Water & Wastewater System Improvements
- Garfield MDWC & MSWA Multiple Water System Improvements

Percent of Time Assigned to the Project: Up to 20%

Paul J. Pompeo, P.E. | Principal-in-Charge / Task Lead - Master Planning

B.S. - Civil Engineering
Professional Engineer - New Mexico (#11490)

Areas of Expertise and Competence
Storm Drainage, Utilities, Site Development, Drainage Reports/FEMA Flood Studies, Expert Witness, Project Management

Responsibilities and Experience
Mr. Pompeo has more than 30 years of experience as a Professional Civil Engineer with an emphasis in public works, residential, commercial, and industrial project design and development. His project experience includes total project oversight from the conceptual phases through final construction inspection. Designs have included grading plans, roadway plan & profile design, drainage plans, utility plans, geotechnical investigations, pavement design and project specifications. Following the design phase, Mr. Pompeo oversees the submittal of project documents to jurisdictional governmental agencies and private utility companies for review, approval and permitting.

Representative Past Projects

- City of Las Cruces NASA Road High-Pressure Gas Line
- City of Las Cruces Telshor & Lohman Storm Drain
- City of Las Cruces Walking, Jogging, Biking, and Recreational Trails
- Sonoma Ranch Master Plan Communities
- City of Las Cruces Design-Build Parks and Sports Courts Rehabilitation
- City of Las Cruces Design-Build Recreational Trails
- Three Crosses Regional Hospital & MOB Development
- Sierra Norte Master Plan Community

Stronger Communities by Design®

Percent of Time Assigned to the Project: Up to 20%

Maggie Sims, P.E. | Senior Engineer / Task Lead – Water Treatment Process

M.S. – Civil Engineering; B.S. – Management
Professional Engineer – New Mexico (#25034), Colorado

Areas of Expertise and Competence
Water Treatment Process, Utility System Design, Project Management

Responsibilities and Experience
Ms. Sims is a Senior Engineer at SMA, focusing on water and wastewater projects for municipalities and rural utilities. She has 10 years of experience working on planning, design, and construction projects with experience in evaluating water infrastructure improvements; designing water system improvements including new municipal water supply wells, well transmission waterline, water distribution systems, and treatment systems for drinking water. Ms. Sims has recently provided water and wastewater system engineering planning, design, and construction administration for several New Mexico communities. Ms. Sims experience includes the preparation of PERs, EIDs, and technical memoranda for projects evaluating wastewater treatment plant improvements, effluent reuse, and biosolids disposal; NPDES and NMED GWDP permit renewals; and designing wastewater system improvements, including effluent reuse infrastructure and biosolids drying and disposal solutions.

Representative Past Projects

- Village of Cuba Multiple Water and Wastewater System Improvements
- Agua Sana WUA Arsenic Treatment Project
- Santa Ana Well No. 6 Well House and Arsenic Treatment System
- Cañon MDWCA Water System Improvements
- City of Española Multiple Water and Wastewater System Improvements
- City of Rio Rancho Sports Complex North Sewer Line Improvements
- Green Ridge MDWCA New Well and Reverse Osmosis Water Treatment System

Percent of Time Assigned to the Project: Up to 10%

Darryl Coster, P.S. | Principal Surveyor / Task Lead – Surveying

Professional Surveyor - New Mexico (#21204), Arizona, Colorado

Areas of Expertise and Competence
Boundary/Cadastral and Right-of-Way Surveys and Mapping, Subdivision Platting, American Land Title Association (ALTA) Surveys, Construction Staking, Expert Witness, Project Management

Responsibilities and Experience
Mr. Coster is SMA's Geomatics Technical Sector Director with over 35 years of surveying experience. He provides oversight for all of SMA's geomatics services, and relevant to the City's anticipated projects, he provides crew supervision and scheduling for SMA's southern New Mexico survey crews. Mr. Coster's other duties include performing calculations, plat preparation and surveying in the field on projects that include construction staking, control surveys, topographic surveys, right-of-way surveys, as-built surveys, boundary surveys, and aerial photogrammetric projects. Mr. Coster has provided Senior survey management for projects for a variety of clients throughout the state, including but not limited to ***City of Las Cruces***, Doña Ana County, Town of Mesilla, City of Alamogordo, Village of Ruidoso, Alto Lakes W&SD, Mescalero Apache Tribe, and Otero County.

Representative Past Projects

- City of Las Cruces Hacienda Acres Sewer Improvements Phases 1 & 2
- City of Las Cruces Zone 1 Interconnect Phase B Project 2
- City of Las Cruces Missouri Tank Rehabilitation
- City of Las Cruces NASA Road High-Pressure Gas Line
- Town of Mesilla McDowell Road Wastewater Collection Phases 1 & 2
- Lower Rio Grande PWWA Multiple Water & Wastewater System Improvements
- Garfield MDWC&MSWA Multiple Water System Improvements

Stronger Communities by Design®

Percent of Time Assigned to the Project: Up to 10%

Scott McKitrick, P.G. | Principal Geoscientist / Task Lead – Solid Waste Studies, Landfill System Design & Analysis

M.S. – Geology; B.S. – Geological Engineering
Professional Geologist – Utah

Areas of Expertise and Competence
Solid Waste Studies, Landfill System Design & Analysis, Expert Witness, Project Management

Responsibilities and Experience
Mr. McKitrick is the Environmental Technical Sector Director at SMA and is a highly experienced Professional Geologist with more than 33 years of experience in geology, hydrogeology, and environmental engineering. His responsibilities include oversight and quality assurance of a wide range of environmental and engineering support projects, as well as water supply and environmental projects throughout New Mexico. Projects have included landfill cell design and construction, cell closure design and construction, permitting of new solid waste facilities, renewal and modification of solid waste operating permits, general regulatory compliance at landfills, investigation and documentation of geology and hydrology at landfill facilities, completion of investigation and design for corrective actions (groundwater remediation) at landfills, financial assurance calculations for annual reports, leachate monitoring and reporting, and solid waste master plans. Mr. McKitrick is currently Senior Manager for the Taos Regional Landfill, City of Roswell Municipal Landfill, and closed Las Vegas Landfill. He provides senior project management, regulatory review and interpretation, permitting assistance, interaction with NMED-SWB staff, and quality assurance/quality control for a variety of solid waste projects.

Representative Past Projects

- Village of Ruidoso Solid Waste Master Plan
- Roswell Municipal Landfill Multiple Solid Waste Services
- Otero-Greentree Regional Landfill and Transfer Station Multiple Projects
- Taos Regional Landfill Multiple Solid Waste Services
- Catron County Multiple Landfill Monitoring and Closures
- City of Deming Multiple Landfill and Solid Waste Services
- City of Tucumcari Multiple Landfill Services
- City of Las Vegas Landfill Multiple Solid Waste Services

Percent of Time Assigned to the Project: Up to 15%

Jay Vanlandingham, R.G. | Senior Geoscientist / Task Lead – NPDES/SWPPP Compliance

M.S. – Geology; B.S. – Geology
Registered Professional Geologist – Arizona

Areas of Expertise and Competence
NPDES & SWPPP Compliance, Expert Witness, Project Management

Responsibilities and Experience
Mr. Vanlandingham is a Senior Manager and geoscientist with more than 30 years of experience managing and implementing a variety of environmental projects in New Mexico and surrounding states, ***including past projects for the City of Las Cruces.*** His experience includes but is not limited to developing Stormwater Pollution Prevention Plans (SWPPP), conducting Phase I ESAs on a variety of commercial and agricultural properties, (e.g. sub-acre industrialized lots to 170,000-acre rural parcels) to managing USEPA Superfund work assignments on behalf of the USEPA. Mr. Vanlandingham is conversant in the requirements of NPDES, FEMA, CWA, and USACE.

Representative Past Projects

- City of Las Cruces Multiple Phase I & II ESAs
- NMSU Spill Response and Soil Sampling for Multiple Sites
- Grant County North Hurley WWTP Discharge Permit Groundwater Sampling
- Doña Ana County Environmental On-Call Services
- EBID Three Saints Release Oversight
- Hidalgo County Landfill Monitoring
- El Paso Electric Dyer Substation Expansion ESA
- El Paso County Staff Environmental Spill Training

Stronger Communities by Design®

Percent of Time Assigned to the Project: Up to 20%

Niki Harings, Ph.D. | Senior Environmental Scientist / Task Lead – Environmental Investigation

Ph.D. – Biology; M.S. – Biology; B.S. – Biology

Areas of Expertise and Competence
Environmental Investigation, Expert Witness, Project Management

Responsibilities and Experience
Dr. Harings is a Senior Environmental Scientist with 21 years of experience - 13 directly with SMA producing NEPA documents for a variety of agencies, including Federal, State, local, and tribal clients. She has managed and or participated in NEPA projects including solar farms, institutional facilities, dams and other water retention structures, linear transmission facilities, roadways, and conveyance channel projects. Dr. Harings has completed CatExs and EAs for both new and old construction. Dr. Harings will use her extensive NEPA experience in the development of any environmental services that may be required for the City's projects, ensuring all data collected is complete, concise, and correct, meeting the objective of providing sufficient information for environmental assessments to meet regulatory compliance and funding requirements.

Representative Past Projects

- Doña Ana County Flood Commission La Union Cultural Resources Evaluation
- NM General Services Department Behavioral Health Institute Environmental Assessment
- NM General Services Department Small Homes Environmental Assessment
- Dove Creek Raw Water Reservoir Improvements Environmental Investigations
- Enchanted Forest MDWCA Water System Improvements Environmental Investigations
- Chippeway Park WA Water System Improvements Environmental Investigations
- Spaceport America Biological Report
- Mescalero Apache Tribe – Multiple Environmental Investigations

Percent of Time Assigned to the Project: Up to 15%

Richard Bustos | Senior Resident Project Representative / Task Lead – Construction Inspection

A.S. - Water Technology

Areas of Expertise and Competence
Construction Administration, Construction Inspection, Project Management

Responsibilities and Experience
Mr. Bustos brings 30 years of experience in stormwater, water, wastewater, and roadway infrastructure projects. He is experienced in utility, drainage, subdivision, roadway, construction administration, project management, and development review. Prior to joining SMA, ***Mr. Bustos was the Senior Inspector for the Public Works Department of the City of Las Cruces.*** His area of specialty is the inspection of utility construction projects, during which he monitors for potential installation deficiencies, makes recommendations for cost savings to projects, and ensures proper submission of pay applications to maintain progress on each project.

Representative Past Projects

- Mescalero Apache Tribe Gallerito Water System Construction
- Village of Ruidoso Multiple Water, Sewer, and Roadway Improvements
- Doña Ana County Dragonfly Diversion Channel
- Lower Rio Grande PWWA Multiple Water & Wastewater System Improvements
- Garfield MDWC & MSWA Multiple Water System Improvements

Stronger Communities by Design®

Percent of Time Assigned to the Project: Up to 10%

Mark Sawyer | Senior Manager / Task Lead – Land Use Permitting

B.A. – Geography, Planning, and Water Resources

Areas of Expertise and Competence
Land Use Permitting, Project Management

Responsibilities and Experience
Mr. Sawyer is a land use and environmental planner with more than 30 years working experience in environmental planning and permitting, entitlements, municipal government management, transportation, land use, economic development, and finance. He has led environmental and NEPA efforts, land use and transportation plans, public policy development, land use analysis, traffic forecasting and modeling, analysis of transportation systems, public involvement programs, agency coordination efforts, and written various technical environmental, regulatory, and planning documents. Mr. Sawyer's ability to bring together divergent views through creative facilitation techniques has earned him awards from the Environmental Protection Agency, Colorado Department of Health, and Denver Regional Council of Governments.

Representative Past Projects

- El Paso County, CO Land Development Code Updates
- El Paso County, CO Zoning and Subdivision Regulations Updates
- City of Loveland, CO On-Call Development Review Services
- Park County, WY Unified Development Code
- City of Laramie, WY Zoning Ordinance Updates
- Adams County, CO Development Code Updates
- Adams County, CO Engineering Standards and Construction Specifications Updates

3. Performance of the Firm

Similar Past Contracts

The nature of on-call contracts presents unique challenges due to the variability in type, schedule, and required effort of assigned tasks. To adequately meet the needs of the City of Las Cruces, a consultant must be responsive and have resources available at any time. Assigned tasks typically have short schedules, unique challenges, and tight fiscal budgets, requiring the most qualified personnel to meet these constraints. In order to successfully provide on-call services, the consultant must offer these key assets:

- Single point of contact for the client with a thorough understanding of task requirements
- Familiarity with the project area(s)
- Multi-discipline capabilities
- Qualified engineers and technicians
- Availability of staff
- In-place quality assurance/quality control measures programs
- In-place accounting systems to handle on-call tasks and accelerated schedules
- Experience with on-call service contracts

Specific project tasks associated with current on-call contracts with other municipalities, counties and state agencies include asset management plans, comprehensive plans, feasibility studies, roadway design, utility design & coordination, right-of-way maps, historical/cultural/biological reports, solid waste design and monitoring, sidewalk/bicycle path design, landscape design coordination, structural design, parking lot and driveway design and public information meetings, as well as surveying and stormwater drainage analysis and design.

The following is a small sampling of clients for whom SMA currently or has recently performed comparable on-call, multiple project engineering services:

- ***City of Las Cruces, NM***
- City of Deming
- Town of Mesilla
- Village of Corona
- City of Bloomfield
- City of Aztec,
- City of Farmington
- City of Artesia
- City of Sunland Park
- Grant County
- Doña Ana County
- Otero County
- San Juan County
- Sandoval County
- Pueblo of Isleta
- El Paso Electric Company
- New Mexico Department of Transportation

Stronger Communities by Design®

In addition to on-call engineering contracts, SMA has recently provided and/or is currently providing services similar to those described in the City's RFP through stand-alone contracts with a variety of New Mexico clients. Further projects are listed in Section 5 of this proposal.

Subcontractors

CobbFendley | Subsurface Utility Exploration

CobbFendley is a privately held consulting engineering firm providing civil engineering, SUE, and survey services since 1980. They currently operate a fully-staffed, local El Paso office established in 2015. CobbFendley's El Paso office has served a variety of local public clients, including but not limited to City of El Paso, El Paso County, El Paso Water, and El Paso Electric. CobbFendley will identify existing utility infrastructure by following the American Society of Civil Engineers (ASCE) standard 38-02 that associates certain Quality Levels to depicted utilities. Initially beginning with record collection activities and field reconnaissance to identify above ground utility features, CobbFendley will prepare a comprehensive utility map along any proposed project areas. Their team has completed numerous other projects in and around Las Cruces, which will prove instrumental in records research for the City's anticipated projects.

The Response Group (TRG) | Electrical Design and SCADA System Design

TRG was established in 1997 and has a long-established presence in New Mexico as an electrical and mechanical engineering company, having completed numerous similar infrastructure projects in the region. Their success with municipalities and rural utilities throughout the state has resulted in numerous repeat clients that depend upon TRG's responsiveness, cooperation, partnering, and customer satisfaction.

SMA has worked with TRG on numerous infrastructure projects similar to those anticipated for the City and have developed a synergistic relationship to successfully complete each project. Recent utility infrastructure project clients for whom SMA has teamed with TRG have included Village of Ruidoso, Hondo PSD, and City of Carlsbad.

Southwest Engineering, Inc. (SEI) | Geotechnical Assessments, Soil & Groundwater Testing

SMA has worked with SEI for over 25 years. During this time, SEI has provided SMA with construction materials testing, geotechnical drilling, and environmental drilling services. Started in 1972, SEI has 6 full time employees and operates out of an 8,000+ square foot, fully equipped engineering facility. Staff includes one registered New Mexico Professional Engineer, one senior National Institute for Certification in Engineering Technologies (NICET) technician, and two others in various levels of NICET/TCPP certifications are on staff, full-time. With more than 45 years of professional geotechnical experience SEI has the ability to meet project related needs in a timely, efficient, and professional manner.

All services to be performed as part of this proposal will be done so in accordance with the specifications and guidelines of the American Society for Testing Materials (ASTM), American Association of State Highway and Transportation Officials (AASHTO), and any other test methods directed by the City. More specifically, SEI will perform all testing as outlined by ASTM Specifications D-420 and D-3740.

Bath Group, Inc. (Bath) | Supplemental Computer Network Analysis

Bath is a professional engineering firm with offices in several states. It provides engineering, commissioning, and process safety management services through its three divisions, Bath Engineering Corporation, Bath Commissioning Corporation, and Bath PSM. The firm was founded in 1957 and has grown to more than 50 employees with over 1,000 years of combined construction experience. The staff is very stable, with many employees having served the firm throughout their careers.

Bath takes pride in its dedication to sustainable design, having worked on dozens of buildings registered for LEED certification. Bath provides services to a wide range of clients including state and federal government, military, healthcare, higher education, municipal, and private commercial and industrial clients.

D.C. Environmental, Inc. (DCE) | Environmental

DCE was founded by Karen Dremann and David Charlesworth, whose 28-year career in the Southwest has been based on the principles of sound industrial hygiene and adult education. DCE is founded on the belief of scientific practice to recognize, evaluate, and control environmental hazards.

Their project involvement regarding environmental surveys and assessment includes interactive inspections and investigations, quality control and input from laboratories or design professionals, and cost-effective approach to remediation strategies. Mr. Charlesworth has performed a major part of his career overseeing hazardous materials remediation activities, air quality assessments and asbestos abatement.

Locations Where Work Will be Performed

With no specific projects established, fully accurate percentages of work to be performed are difficult to assess. The following percentages indicate our estimate for the percentage of work to be performed by SMA and our subcontractors by location.

SMA
Las Cruces - 86%
Albuquerque - 2%
Denver - 2%

Bath
El Paso - 2%

CobbFendley
El Paso - 2%

SEI
Las Cruces - 2%

TRG
Albuquerque - 2%

DCE
Albuquerque - 2%

4. Management Structure and Approach to Project

Principal Officer Responsible for Administration of the Contract

Paul J. Pompeo, P.E. (NM PE #11490)
Vice President / General Civil Technical Sector Director / Principal Engineer
3500 Sedona Hills Parkway
Las Cruces, NM 88011
575.449.2836

Professional Engineer Responsible for and in Direct Charge of the Work

Marty Howell, P.E. (NM PE #22670)
Senior Engineer / Corporate Sustainability Advisor
3500 Sedona Hills Parkway
Las Cruces, NM 88011
575.449.3213

Management Structure

Of the staff presented in Section 3, seven of our 10 task leads are based in (and residents of) Las Cruces and ***collectively represent well over 200 years of specific engineering experience in Las Cruces.*** Likewise, seven of the task leads each have more than 30 years of professional experience, and all task leads have more than 10 years of experience as a project manager and team leader; this represents a level of both professional experience and management acumen that is well beyond that of any firm with an office in Las Cruces.

More specifically, ***Mr. Pompeo has provided the requested services on projects in Las Cruces for more than 30 years.*** He has led teams for a variety of projects throughout New Mexico and surrounding states with constructed values exceeding several million dollars. Mr. Pompeo, as the Principal-in-Charge and Project Manager to the City, has an unparalleled local knowledge for site development and was the principal engineer and owner of Las Cruces-based Southwest Engineering for over a decade. Mr. Howell, as a Task Lead, has provided water resource project management throughout Doña Ana County ***(including projects directy for the City)*** as well as New Mexico and surrounding states, using a diverse team of professionals that he has mentored throughout a career extending more than 30 years.

Project Time Schedule

As the City has not identified any specific projects at this time, SMA cannot establish definitive schedules and rather can only subjectively discuss scheduling practice. As each project is determined, SMA will work closely with City staff to determine a practicable schedule that allows adequate time for data collection, design development, reviews (typically 30%, 60% and 90%), and final production.

SMA also understands that the timeline frequently is also dependent on constraints such as fiscal year budgeting and funding sources. The diverse nature of services in this RFP scope means that the corresponding timeline for delivery is also highly varied; Phase I ESAs may take only 10-15 business days to complete, while more complex services such as drainage studies may take more than one year to complete. Ultimately, all assigned tasks are entered into SMA's financial management software, allowing for tracking of anticipate completion dates by subtask and presenting all project participants with visual indicators of progress versus budget. Although some projects are delayed by circumstances outside of the control of SMA (e.g. agency review, weather, utility locates), we strive to maintain initial project schedules, including work beyond regular hours.

Operational/Management Approach

SMA's approach to the management of each project was previously outlined in Section 1. SMA is presently organized into five business lines (or disciplines): General Engineering, Environmental, Surveying, Water Resources, and Transportation, which have several sub-disciplines, such as stormwater management, solid waste, intelligent transportation, planning, and sUAV surveys. Each subdiscipline includes one or more subject matter experts and a tailored QA/QC path based on overall objectives. All of the corporate support notwithstanding, SMA projects are all managed through local project managers who have direct contact with their clients. Each local project manager is typically backed by another project level employee, who is also local, providing secondary contact and flexibility in meeting with City staff.

Major Tasks to be Accomplished

SMA understands that this on-call contract will include projects of various sizes and types throughout the City. The first stage of any project is scoping, which may simply include information provided by the City in email or a more involved on-site pre-project meeting. The next stage will develop the workplan, which will include scope, fee, and timeline specifics for City-outlined tasks. Depending on the project scale, interim meetings may be held with City staff to discuss progress, changes in conditions, and any items that might alter the timeline for delivery.

As noted earlier, the size of the design project will dictate the number of review plans before the final plan set. These design packages may also include specification packages utilizing standard details provided by the City, or those developed by SMA in working with communities throughout the southwest. For planning phase projects, various staged deliverables may be submitted, while for investigative tasks typically only a final report is produced. Deliverables for resident project representative, by contrast, may range from daily written reports to summaries coordinated with contractor payment schedules.

During the course of all projects, billing is typically completed either on a monthly (for time and materials or percentage complete tasks) or a deliverable basis. Time and materials invoices will include a breakdown of all charges accumulated during the billing period. At the completion of each project, SMA will offer the opportunity for feedback from the City to identify areas of improvement, if any, for subsequent assignments.

Statement of Services

Services associated with projects under this on-call contract as outlined in the RFP may include, but are not limited to the following:

Water, Wastewater, and Natural Gas System Design and Analysis

SMA has been involved in pipeline-based infrastructure system improvements projects (including water, wastewater, and natural gas) for more than 30 years, and has performed work for municipalities, private clients and other public entities that covered a full range of services. SMA engineers have completed many NMED and United States Department of Agriculture (USDA) formatted preliminary PERs and associated EIDs, several of these with time limited completion schedules. Our staff will utilize GASWorkS, InfoWater, and InfoSewer software to complete each project for the City.

SMA assists many public and private entities in securing and maintaining reliable sources of high-quality drinking water and in the proper disposal of liquid wastes. Many of these projects need to be phased to reduce the financial burden associated with the improvements.

The initial phase includes a site investigation, resulting in a preliminary engineering report of the water or wastewater system. This report contains specific information regarding the age of the existing system, the adequacy of the equipment, the required system capacities, and any ancillary data such as possible inflow/infiltration sources (for wastewater projects) or wellhead protection programs (for water projects). An estimated project cost is then developed, and possible funding sources are identified.

Computer Network Analysis
SMA's project team, along with Bath, will provide computer network analysis for the City's infrastructure systems, including but not limited to water, wastewater, and gas. Our team has considerable experience with a variety of systems and components, including I&C and SCADA systems. All work will be completed using GASWorkS, InfoWater, and InfoSewer to adhere to the City's systems.

Master Planning
SMA has experience in providing master planning reports for infrastructure, transportation and traffic, community facilities, and present and future land use for a variety of municipal and utility clients. SMA develops many types of infrastructure master planning documents, including but not limited to:

- Comprehensive Plans
- Asset Management Plans
- Utility Master Plans
- Preliminary Engineering Reports
- Water Conservation Plans
- 40-Year Water Plans
- Feasibility Studies
- Drainage Master Plans
- Sustainability Plans
- Capital Improvement Plans

Master planning will begin by reviewing existing documents and typically includes identifying feasible areas for development, producing layouts of residential and non-residential tracts for future development, planned and necessary future infrastructure improvements, and the capacity and deficiencies of the existing infrastructure.

Our teaming partner, SSW, has extensive experience with master planning projects throughout the state and will provide additional planning assistance as necessary, should a project require further services. SMA has worked with SSW on numerous successful planning projects throughout the state over the past two decades.

Feasibility Studies
SMA has completed a wide variety of feasibility studies for clients that have analyzed a wide variety of topics. Specific examples include:

- Implementation of a solar photovoltaic power system to off-set wastewater treatment plant energy costs
- Fluoride groundwater treatment technology options
- Repurposing of existing irrigation wells for use for a new water system
- Expansion of an existing water system to an unserved area

Solid Waste Studies and Landfill System Design & Analysis
SMA assists with solid waste regulatory compliance issues, including site selection, fatal flaw analysis, and development of site closure and post-closure care plans for municipal and private landfills. SMA also provides design and permitting of new landfills and solid waste collection centers, remediation of contaminated sites, and design of recycling centers. Many of these activities require field investigations to characterize the hydrogeologic setting, including existing cover material, methane generation, and the potential for groundwater contamination. This information is then used to develop monitoring requirements, revegetation requirements, operational design, cell design, and storm water collection design.

Land Use Permitting
SMA collaborates with local community land use planning staff to acquire permits and develop land use plans which will guide the future actions of the community. When developing land use documentation for permitting to adhere to applicable regulatory requirements, our staff takes into account economic development, housing planning, facilities planning, utilities and infrastructure planning, land withdrawal, zoning, and eminent domain.

Surveying (Geomatics)
SMA has field crews and equipment resources to complete any surveying that may be required to complete the City's projects associated with this on-call contract. Surveying projects have included easement, boundary, and right-of-way surveys; annexation surveys; topographic mapping; ALTA surveys; photogrammetric mapping; route surveying for electrical lines; construction surveys; aerial drone and aerial control. We use advanced survey equipment and procedures, including both static and kinematic global positioning systems (GPS). Additionally, SMA utilizes multiple small unmanned aerial vehicles (sUAV aka "drone") with high-pixel cameras for site specific mapping applications.

National Pollutant Discharge Elimination System (NPDES) and Stormwater Pollution Prevention Plan (SWPPP) Compliance
SMA is well-versed in the development of NPDES-related documentation for discharge plan preparation and compliance, including construction documents, Temporary Erosion and Sediment Control Plans, and Sediment Management Plans. Our staff provides NPDES compliance and permitting for wastewater treatment plants, pretreatment facilities, and other sites as related to the U.S. Clean Water Act. Examples of waste discharges that require an NPDES permit include dredged soil, solid, and chemical wastes; incinerator residue, garbage, sewage, and sewage sludge; munitions, biological, and radioactive materials; heat; wrecked or discarded equipment; rock and sand; and industrial, municipal, and agricultural waste.

SMA provides SWPPP and compliance services, and state mandated Sediment Control Plans, including the development of best management practices. SMA's drainage analysis and design experience includes civil site design, watershed hydrology and yield studies, hydraulic analysis of natural and man-made water courses, GIS mapping and analysis, hydraulic structure design, and structural engineering. SMA has several staff with training and background in desert stormwater management and floodplain evaluation.

Geotechnical Assessments / Soil & Groundwater Testing
SMA provides both geotechnical and environmental soil and groundwater investigations. SMA can provide geotechnical and foundation analysis and design. SMA team members have completed numerous geotechnical investigations throughout the region over the past 29+ years, both as stand-alone projects and in conjunction with a variety of infrastructure improvements. Our teaming partner, SEI will provide any necessary drilling services and testing associated with geotechnical services for the City's projects.

Environmental Surveys, Assessments, Monitoring, and Management
SMA provides ASTM Standard Phase I ESAs and ASTM Standard Transaction Screens to help clients assess environmental liability associated with a property. Phase II investigations are also conducted as required. Under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, liability for site cleanup as a result of a release of hazardous substances into the environment is assigned to the responsible party or landowner. To reduce the risk of such liability, a landowner, a potential landowner, or a loaning agency may choose to complete an environmental assessment to determine if a property has been contaminated.

Monitoring and Managing Indoor Air Quality and Asbestos Investigations and Removal
SMA provides indoor air quality and asbestos monitoring and management services with the assistance of our subconsultant, DCE to provide comprehensive indoor air quality and industrial hygiene consulting services. SMA regularly samples indoor air quality and building materials that may affect indoor air quality (e.g. roofing, floor tile, acoustical tile, etc.) including asbestos lead and mold. SMA's hazardous materials management includes identifying and controlling on-site and on-the-job health hazards. We provide qualified personnel to test for the presence of such hazards, evaluate existing hazards, and design strategy by which these can be controlled or eliminated, implementing strategies to ensure OSHA compliance. DCE's Certified Industrial Hygienists (CIH) can provide human health risk assessments to include planning, hazard identification, dose-response, and exposure assessments, as well as risk characterization.

Subsurface Utility Exploration (SUE)
SMA's subconsultant, CobbFendley will provide any SUE services necessary to complete the City's projects to fulfill requirements of ASCE standards. These services may include simple data collection of visible features using GPS or similar authoritative data collection, additional electronic location techniques, or specialized equipment such as air knife physical excavation of discrete areas.

Expert Witness Services
SMA has experience providing professional witness and deposition services in judicial and quasi-judicial settings for clients throughout the region for projects such as water rights, stormwater management and environmental contamination. Depending on the specific discipline, SMA can provide several local resources for a variety of engineering and environmental project types. In cases requiring substantial resources, SMA can extend into the full depth of staff and provide multiple experts in most specific areas of support required by our clients.

Project Management
SMA staff includes several members that hold PMP certifications, an industry-recognized standard of education and testing for project management. Many additional staff have attended specific classes in project management with various professional organizations such as the PSMJ and the Zweig Group, and internal training on aspects of project management (record keeping, financial management, invoicing, etc.) approximately every other month.

Construction Inspection
SMA has over 30 years of experience in construction observation for infrastructure improvements in New Mexico. With multiple construction observers, our resources allow for thorough monitoring of any size project, including multiple sites concurrently. Depending on active workloads at the time a project commences, SMA's primary Resident Project Representative for the City's projects will be Mr. Richard Bustos, who has provided construction observation services for numerous projects throughout the City.

SMA provides support services from the pre-construction meeting through the final walk-through. As required for each project and the project funding agency, SMA's observation personnel are OSHA safety trained and PPE equipped. Our construction observation staff prepares detailed daily reports that are available to the project engineer and client. SMA's project engineer monitors progress pay applications, information requests and issues review and approval of all project submittals. Upon project completion, SMA provides funding agency closeout documents, operation and maintenance manuals (if required), reconciliation of funding and construction payments, and engineering completion certifications.

5. Performance with Previous Clients

The following project descriptions provide a sampling of SMA's recent project experience similar to the scope of work described in the City's RFP.

City of Carlsbad Multiple Water & Wastewater Improvements, Carlsbad, NM

Contact: Mr. Ivan M. Abell, Director of Utilities; 575.885.6313; imabell@cityofcarlsbadnm.com

SMA has worked with the City of Carlsbad on multiple infrastructure improvement projects since 2011. These projects have encompassed all of SMA's technical service areas, providing ongoing, collaborative project development to successfully complete our client's important community projects. These projects have included but are not limited to the following:

- Old Cavern Area Waterline and Sewer Line Improvements
- Orchard Lane Sewer Improvements
- Arrowstone Sanitary Sewer and Lift Station
- Cherry Lane Sewer Line Design
- City Water System Hydraulic Model Calibration and Update
- Capitan and Ogallala Water Blending Study
- East Greene Street Water Line
- Blodgett Street Water Line Canal Crossing
- Hidalgo Road Waterline Replacement
- Water Line Isolation Valves (Insert-a-Valves)

- Water System Risk & Resilience Assessment
- Wastewater Plant UV Treatment System
- Airport PRV
- Reservoir 2 Transmission Line
- Sheep Draw Well Field 5MG Reservoir #5
- Double Eagle Well Field Water Line
- West Rose Street Waterline Interconnect

Village of Ruidoso Multiple Water, Sewer, and Roadway Improvements, Ruidoso, NM

Contact: Mr. Randy Koehn, Water Production Manager; 575.257.5525; randykoehn@ruidoso-nm.gov

SMA has worked extensively with the Village over the past several years on a variety of infrastructure improvements projects. These projects have included:

- Town and Country Water, Sewer, and Roadway Improvements
- Pinecliff Water, Sewer, and Roadway Improvements
- High Loop Water System Improvements
- Tank Rehabilitation Projects
- Water System Master Plan
- Solid Waste Master Plan
- Combined Enterprise Utility Master Plan and Rate Analysis Coordination
- Raw Water Cost Analysis
- WWTP Solar Project
- WWTP Fine Screen Replacement
- Renewable Energy Feasibility Assessment
- Alto Waterline Geotechnical Investigation
- Alto Diversion Project
- Alto Reservoir Improvements
- Sudderth Retention Wall Structural Evaluation
- Roadway Certifications

SMA has provided comprehensive services on the projects noted above, including but not limited to planning, engineering design, funding assistance, surveying, environmental documentation, public involvement activities, bid phase services, and construction phase services.

Lower Rio Grande PWWA Multiple Water & Wastewater System Improvements, Doña Ana County, NM

Contact: Ms. Karen Nichols, Project Manager; 575.233.5742; karen.nichols@lrgauthority.org

SMA has worked with Lower Rio Grande Public Water Works Authority (PWWA) on projects since 2013, and we have successfully completed projects with its member systems as far back as 2003. The work has included funding acquisition assistance, planning, preliminary and final design, permitting, surveying, environmental documentation, bid phase services, and construction observation services. Recent projects include:

- Brazito Water System Improvements
- Vado Water System Improvements
- High Valley Water System Improvements
- Stern Drive Waterline Extension
- Valle Del Rio System, Multiple Projects
- New NM-478 Service Connections

Additional Relevant Projects

- City of Las Cruces Hacienda Acres/Homestead Acres Estates Sewer Improvements Phases I & II, Las Cruces, NM
- City of Las Cruces Missouri Water Storage Tank Rehabilitation, Las Cruces, NM
- Doña Ana County Wastewater System Rehabilitation, Doña Ana County, NM
- Town of Mesilla McDowell Road Wastewater Improvements Phases I & II, Mesilla, NM
- Cedar Creek MDWCA Water System Improvements Project, Ruidoso, NM
- Alto Lakes W&SD Water and Wastewater System Improvements, Alto, NM
- Garfield MDWC & MSWA Multiple Water System Improvements, Garfield, NM
- Chippeway Park WA Water System Improvements, Cloudcroft, NM
- Mescalero Apache Tribe Whitetail Waterline Replacement Project, Mescalero, NM
- Mescalero Apache Tribe Gallerito Water Project, Mescalero, NM
- La Luz MDWCA & MSWA Water System Improvements, La Luz, NM

CITY OF LAS CRUCES

PROFESSIONAL SERVICES AGREEMENT

THIS AGREEMENT, made and entered into on this_____day of _____ ,2024 by and between the City of Las Cruces, New Mexico, hereinafter called “CITY” and Stantec Consulting Services, Inc., of 370 Interlocken Blvd, Ste 100, Broomfield, CO, 80021, hereinafter called “CONTRACTOR”.

1. PROJECT DESCRIPTION
Utilities Engineering Services on an as needed basis via Project Assignment Agreements (Attachment “A”) during the term of this AGREEMENT.

2. SCOPE OF SERVICES
In a satisfactory and proper manner, the CONTRACTOR shall perform SERVICES, as proposed in response to the CITY’S RFP No. 23-24-052, as set forth in Exhibit A, attached hereto and made a part of this Agreement.

The CONTRACTOR is authorized to extend the same terms and conditions of this Agreement to other governmental entities conditioned upon the procurement laws and regulations of those entities. The CITY shall not be a party nor have any liability relating to such extensions.

3. APPROPRIATIONS
The terms of this Agreement are contingent on sufficient appropriations and authorization being made by the City Council for the performance of this Agreement. If sufficient appropriations and authorizations are not made by the City Council, this Agreement shall terminate upon written notice given by the CITY to CONTRACTOR. The CITY’S decision as to whether sufficient appropriations and authorizations exist shall be accepted by CONTRACTOR and shall be final.

4. COMPENSATION
The CITY shall compensate CONTRACTOR for the performance of SERVICES under this Agreement an amount agreed to for each assigned project, plus applicable taxes. CONTRACTOR shall perform the SERVICES upon receipt of a purchase order or written Notice to Proceed for each assigned project from the CITY. The CITY cannot authorize costs to be incurred prior to such written Notice to Proceed. CONTRACTOR shall submit invoices upon completion of the project. CITY shall pay invoices Net 30 days upon receipt of undisputed invoice.

CONTRACTOR is responsible for payment of State of New Mexico Gross Receipts Tax levied on the amounts payable under this Agreement. CONTRACTOR agrees to comply with all federal and state tax payments and report all items of gross receipts as income from the operations of its business.

5. DEVOTION OF ADEQUATE TIME
CONTRACTOR will devote the necessary hours each week to the performance of projects that are required by the CITY and it will serve the CITY diligently and faithfully,

and according to its best ability in all respects and will promote the best interests of the CITY.

6. TERM AND SCHEDULE
This Agreement shall become effective on June 1, 2024 for a term of 5 years through May 31, 2029.

CONTRACTOR shall perform the SERVICES in accordance with the time set forth as agreed upon by the CITY and CONTRACTOR and as agreed to for each project assigned under the terms of this Agreement.

7. EXTENSIONS, CHANGES, AND AMENDMENTS
This Agreement shall not be extended, changed, or amended except by instrument in writing executed by the parties. The CITY shall not be liable for payment of any extra services nor shall CONTRACTOR be obligated to perform any extra services except upon such written agreement. Such written approval shall indicate the date said extension, change, or amendment is effective and shall be signed by the parties to this Agreement. In the event that the parties cannot reach agreement as to a particular change, the issue shall be resolved pursuant to Article 21.

8. CHANGES AND EXTRA SERVICES BY THE CITY
The CITY may make changes within the general scope of the SERVICES plus may also request CONTRACTOR to perform other extra services not incorporated within the Services set forth in this Agreement. If the CONTRACTOR is of the opinion that such change causes an increase or decrease in the cost and/or the time required for performing the changes or other services required by the City, CONTRACTOR shall so notify the CITY of that fact within five (5) business work days from the date of receipt of change by the CITY. The CITY shall provide written response to the CONTRACTOR within five (5) business work days from the date of receipt of CONTRACTOR'S written notification.

9. CHANGES AND EXTRA SERVICES BY THE CONTRACTOR
In the event a condition is identified by the CONTRACTOR which, in the opinion of the CONTRACTOR, changes the services, costs, and/or time required for performance under this Agreement, the CONTRACTOR shall provide written notification to the CITY within five (5) business work days of such identification. The CITY shall respond in writing to such notification within five (5) business work days from the date of receipt of CONTRACTOR'S notification.

10. DELAYS
In the event that performance of SERVICES is delayed by causes beyond reasonable control of CONTRACTOR, and without the fault or negligence of CONTRACTOR, the time and total compensation for the performance of the SERVICES may be equitably adjusted by written agreement to reflect the extent of such delay. CONTRACTOR shall provide the CITY with written notice of delay pursuant to Article 9 including therein a description of the delay and the steps contemplated or actually taken by

CONTRACTOR to mitigate the effect of such delay. The CITY will make the final determination as to reasonableness of delays.

11. TERMINATION
This Agreement may be terminated by either party hereto upon fifteen (15) calendar days written notice in the event of substantial failure by the other party to perform in accordance with the terms of this Agreement through no fault of the terminating party. This Agreement may also be terminated by the CITY for its convenience or because the PROJECT has been permanently abandoned, but only upon fifteen (15) calendar days written notice to CONTRACTOR.

In the event of termination, CONTRACTOR shall be compensated for all services performed and costs incurred up to the effective date of termination for which CONTRACTOR has not been previously compensated.

Upon receipt of notice of termination from the CITY, CONTRACTOR shall discontinue the SERVICES unless otherwise directed and upon final payment from the CITY deliver to the CITY the required number of copies of all data, drawings, reports, estimates, summaries, and such other information and materials as may have been accumulated by CONTRACTOR in the performance of this Agreement, whether completed or in process.

12. RECORDS AND AUDITS
CONTRACTOR will maintain records indicating dates, length of time, and services rendered. The CITY has the right to audit billings both before and after payment, and contest any billing or portion thereof. Payment under this Agreement does not foreclose the CITY'S right to recover excessive or illegal payments. CONTRACTOR will retain records for five (5) years after the completion of the project.

13. DISCLOSURE AND OWNERSHIP OF DOCUMENTS, PRODUCTS, DESIGN, ELECTRONIC FILES
All technical data, electronic files, and other written and oral information not in the public domain or not previously known, and all information, electronic files, and data obtained, developed, or supplied by the CITY will be kept confidential and CONTRACTOR will not disclose to any other party, directly or indirectly, without the CITY'S prior written consent unless required by lawful order.

All technical data, electronic files, products developed, operational parameters, blueprints, and other information and work of the CONTRACTOR shall be the sole property of the CITY and shall be delivered to the CITY when requested and at the end of the Agreement.

14. INDEPENDENT CONTRACTOR
CONTRACTOR represents that it has, or will secure, at its own expense, all personnel required in performing the SERVICES under this Agreement. Such personnel shall not be employees of, nor have any contractual relationship with the CITY. CONTRACTOR,

consistent with its status as an independent contractor, further agrees that its personnel will not hold themselves out as, nor claim to be officers or employees of the CITY by reason of this Agreement.

To the extent that CONTRACTOR employs any employees, CONTRACTOR shall be solely responsible for providing its own form of insurance for its employees and in no event shall CONTRACTOR's employees be covered under any policy of the CITY.

CONTRACTOR'S retention hereunder is not exclusive. Subject to the terms and provisions of this Agreement: (i) CONTRACTOR is able, during the Term hereof, to perform services for other parties; and (ii) CONTRACTOR may perform for its own account other professional services outside the scope of this Agreement.

CONTRACTOR is and shall be an Independent Contractor and shall be responsible for the management of its business affairs. In the performance of the work under this Agreement, CONTRACTOR will at all times be acting and performing as an Independent Contractor, as that term is understood for federal and state law purposes, and not as an employee of the CITY. Without limitation upon the foregoing, CONTRACTOR shall not accrue sick leave, jury duty pay, retirement, insurance, bonding, welfare benefits, or any other benefits, which may or may not be afforded employees of the CITY. CONTRACTOR will not be treated as an employee for purposes of: Workers' Compensation benefits; the Federal Unemployment Tax Act; Social Security; other payroll taxes, federal or any state income tax withholding; or the employee benefit provisions described in the Internal Revenue Code of 1986, as amended. Neither the CITY, nor its agents or representatives, shall have the right to control or direct the manner, details or means by which CONTRACTOR accomplishes and performs its services. Nevertheless, CONTRACTOR shall be bound to fulfill the duties and responsibilities contained in the Agreement.

15. NO JOINT VENTURE OR PARTNERSHIP

Nothing contained in this Agreement shall create any partnership, association, joint venture, fiduciary or agency relationship between CONTRACTOR and CITY. Except as otherwise specifically set forth herein, neither CONTRACTOR nor CITY shall be authorized or empowered to make any representation or commitment or to perform any act which shall be binding on the other unless expressly authorized or empowered in writing.

16. ASSIGNMENT

CONTRACTOR shall perform all the services under this Agreement and shall not assign any interest in this Agreement or transfer any interest in same or assign any claims for money due or to become due under this Agreement without the prior written consent of the CITY.

17. INSURANCE
CONTRACTOR shall obtain and maintain insurance at its own cost and expense during the life of this Agreement, and shall require Subcontractors, if any, to maintain during the life of his subcontract:

1. Commercial General Liability Insurance
   a. $1,000,000 per occurrence / $2,000,000 aggregate
   b. Coverage must include premises and operations, products and completed operations, and personal and advertising injury.
   c. The City of Las Cruces must be named as an Additional Insured for all coverages listed above on endorsements acceptable to the City.
   d. Coverage must be primary and non-contributory.
   e. Coverage must be per project or per location.
   f. Coverage must be on an occurrence form.
   g. Subrogation must be waived.
2. Commercial Auto Liability
   a. $1,000,000 per occurrence
   b. Coverage must be for “owned, leased, hired, and non-owned autos” or “any autos.”
3. Workers’ Compensation and Employers Liability
   a. Statutory Limits
   b. Employer liability – $1,000,000 each accident, $1,000,000 each employee by disease, $1,000,000 policy limit
   c. Subrogation must be waived.
4. Professional Liability: $1,000,000 per claim

Endorsements for additional insured coverage and waivers of subrogation must be provided as a condition of this Agreement and shall be noted on the certificate.

CONTRACTOR shall furnish the CITY with a certificate(s) of insurance showing CONTRACTOR and Subcontractors, if any, have complied with this Article. The CONTRACTOR shall provide insurance certificates before work is to start on the project and shall provide the CITY thirty (30) days written notification of cancellation of such policies.

18. INDEMNITY AND LIMITATION
CONTRACTOR shall indemnify, defend, and hold harmless the CITY from and against any and all claims, suits, actions, judgments, demands, losses, costs, expenses, damages, and liability caused in whole or in part by, resulting in whole or in part from, or arising in whole or in part out of the negligent acts, errors, or omissions of CONTRACTOR, its officers, employees, agents, or representatives in the performance of SERVICES under this agreement.

19. APPLICABLE LAW
This Agreement and the rights and obligations of the parties shall be governed by and construed by the laws of the State of New Mexico applicable to Agreements between

New Mexico parties made and performed in that state, without regard to conflicts of law principles. Venue shall be in the Third Judicial District, State of New Mexico.

CONTRACTOR shall abide and be governed by all applicable state law, CITY ordinances, and laws regarding the CONTRACTOR'S services or any work done pursuant to this Agreement, including anti-discrimination.

20. BREACH
In the event CONTRACTOR breaches any obligation contained in this Agreement, prior to instituting any action or dispute resolution procedure, the CITY shall give CONTRACTOR written notice of such breach. In the event CONTRACTOR fails to remedy the breach within five (5) working days of receiving such written notice, the CITY, at its sole discretion, without any obligation to do so and in addition to other remedies available under applicable law, may remedy CONTRACTOR'S breach and recover any and all costs and expenses in so doing from CONTRACTOR.

21. DISPUTE RESOLUTION
In the event that a dispute arises between CITY and CONTRACTOR under this Agreement or as a result of breach of this Agreement, the parties agree to act in good faith to attempt to resolve the dispute.

22. NOTIFICATION
All notices required or permitted under this Agreement shall be in writing and shall be deemed sufficiently served if served by Registered Mail addressed as follows:

TO CITY:	City of Las Cruces PO Box 20000 Las Cruces, NM 88004 ATTENTION: Tony Trevino
With Copies to:	City Attorney Purchasing Manager
TO CONTRACTOR:	Stantec Consulting Services, Inc. 370 Interlocken Blvd, Ste 100 Broomfield, CO 80021 ATTENTION: Gabby Contreras Apodaca

23. SCOPE OF AGREEMENT
This Agreement incorporates all of the agreements, covenants, and understandings between the parties hereto concerning the subject matter hereof and that all such covenants, agreements, and understandings have been merged into this written agreement. No prior agreement or understanding verbal or otherwise of the parties or their agents shall be valid or enforceable unless embodied in this agreement.

24. SEVERABILITY
The parties agree that each provision of this Agreement is severable and the invalidity or unenforceability of any one or more of the provisions of this Agreement shall not affect the validity or enforceability of any other provision of this Agreement, and this Agreement shall be construed in all respects as if such invalid or unenforceable provisions were omitted.

25. CONFLICT OF INTEREST
CONTRACTOR represents and warrants that CONTRACTOR has no business, professional, personal, or other interest, including, but not limited to, the representation of other clients, that would conflict in any manner or degree with the performance of its obligations under this Agreement. If any such actual or potential conflict of interest arises under this Agreement, CONTRACTOR shall immediately inform the CITY in writing of such conflict. If, in the reasonable judgement of the CITY, such conflict poses a conflict to and with the performance of CONTRACTOR'S obligations under this Agreement, or is otherwise a violation of the CITY'S current policy or ordinances, then the CITY may terminate the Agreement immediately upon written notice to CONTRACTOR; such termination of the Agreement shall be effective upon the receipt of such notice by CONTRACTOR.

EXHIBIT A
SERVICES

A. Project Assignments
A Project assignment is initiated by the City providing the selected Engineer a detailed project description, including scope of work and any other special instructions needed by the Engineer to prepare items such as preliminary and final cost estimates, complete project plans and specifications, project reports, and other related engineering services. The awarded Engineers shall provide engineering services that may include but not be limited to, the following:
1. Computer network analyses for water, wastewater, and gas systems; design of water, wastewater, and gas utility systems; well house design; Supervisory Control and Data Acquisition (SCADA); water treatment process; master planning; feasibility studies; solid waste studies; land use permitting; subsurface utility exploration; boundary/easement survey; and National Pollutant Discharge Elimination System (NPDES) & Stormwater Pollution Prevention Plan (SWPPP) compliance.
2. Electrical design (wells, booster stations, lift stations, odor control stations, building electrical system design)
3. Computer network analysis for Gas (GasWork), Water (InfoWater), and Wastewater (InfoSewer). The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility
4. Solid waste studies, landfill system design and analysis
5. Environmental surveys, assessments monitoring and management, such as indoor air quality, asbestos, mold, and other related services for the City
6. Geotechnical Assessments, such as soil and groundwater testing for contamination and remediation, and other related services for the City
7. Expert witness in a judicial and/or quasi-judicial setting.
8. Project Management
9. Construction Inspection.

B. Project Assignment Agreements
A Project Assignment Agreement (a template of which is incorporated herein as ATTACHMENT “A”) will be negotiated and executed on a case-by-case basis for each specific project, and will include a cost proposal from the Engineering firm(s) proposing to do the work. The cost proposal may utilize one of the following pricing formats:
1. Lump Sum
2. Unit pricing to include:
    a. Hourly rate for various types of services requested by the City
    b. Charges for miscellaneous items such as blueprints, data, discs, rental of special equipment, etc.
    c. A statement of the billing procedures including minimum billing units, if any.
    d. Cost of sub-consultants (if any)
3. An alternative unit cost breakdown

C. Deliverables
Each project contract will require a list of deliverables, schedule/timeline and cost. The

Engineer may be required to supply to the City an of the following items, when specified and as requested on the Scope of Work for each individual project.

1. Preliminary report containing schedule of work and cost estimate.
2. Construction drawings and documents. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility. Provide hard copies and PDF format of the construction plans for Purchasing Section use.
   a. As-built drawings on electronic media and reproducible prints. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. All horizontal and vertical location datum information shall be coordinated with the City Surveyor. The utility location information shall be tied to project control monuments and referenced to project construction stationing. The project control survey shall be certified by a New Mexico Registered Land Surveyor. Metadata or “data about the data” shall be submitted with each as-built electronic file, preferably as a separate text file on the electronic submittal media, and shall include:
      - Name, address and phone number of the responsible land surveyor.
      - Date of completion of survey.
      - Equipment used to conduct the survey.
      - Horizontal and vertical control marks used to tie the survey to the City approved control.
      - Transformation factors needed to reduce Ground (local coordinate system) to Grid and combined scale factor used.
   b. “RECORD DRAWINGS” shall be clearly labeled on each sheet.
3. Computer network analysis for gas, water, and wastewater shall be provided to the City in appropriate electronic format. It shall include the entire model, including changes and a text summary (report) of the network analysis that includes assumptions, procedures, and results, and any graphics that clarify the analysis. The Engineering firm(s) shall verify the report format with the City. The computer network analysis shall be provided using the software listed below. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility.
   a. Computer network analysis for Gas: GasWork
   b. Computer network analysis for Water: InfoWater
   c. Computer network analysis for wastewater: InfoSewer
   d. Other design computer programs as approved by the City
4. Project reports.
5. Any other item specified in the contract for that project
6. Easement map and recording information

D. The selection of an Engineer for a specific project shall be based on experience with similar projects, references, performance in similar projects, and availability. This will include the ability to meet schedules, cost control, and responsiveness to client.

E. The Engineer shall have an engineering staff on-site everyday who is responsible, on behalf of the Engineer, for providing timely completion and response for performance of the terms of each Project Assignment Agreement during the progress of each individual project. Any deviation from this requirement is at the discretion of the City and must be approved in writing by the City prior to the start of any individual project.

ATTACHMENT C – COST PROPOSAL FORM RFP 23-24-052 – Utilities Engineering Services
(NOTE: This form shall not to be modified in any way)

Consulting Firm Stantec Consulting Services Inc.

ITEM	DIRECT LABOR / CLASSIFICATION	HOURLY RATE*
1	Principal Engineer	$ 282
2	Project Engineer/Project Manager	$ 248
3	Senior Engineer	$ 248
4	Design Engineer	$ 220
5	Engineer Intern	$ 175
6	Engineering Technician	$ 175
7	Drafting Technician	$ 163
8	Survey Crew**	$ 193 - 2-Man Field Party 252 - 3-Man Field Party 354 - 4-Man Field Party
9	Construction Inspector/Observer	$ 163
10	Administrative/Clerical	$ 157
11	Field Testing and Investigations	$ Case by Case Basis
		PERCENT MARKUP
12	Subcontractor Cost Markup	(%) 10

ITEM	MATERIALS / REIMBURSABLE EXPENSES	RATE
	Travel	
13	Per Diem (per day) – Pre-Approval Required	City of Las Cruces Rate
14	Vehicle Mileage Rate (per mile)	Current IRS Rate
	Reproduction Services	
15	Black and White Copies (per copy)	$ .06
16	Color Copies (per copy)	$ .19
17	Prints 24x36 (per sheet)	$ 2.43
18	Mylars 24x36 (per sheet)	$ 3.01
19	Photo Quality Plots (per plot)	$ 5.84
	Miscellaneous	
20	Any other costs incurred	Case by Case Basis

**Rates are to include all overhead costs and any and all assessment expenses*

***Survey Crew Rates are to include GPS and Total Station Equipment*

Notes: 1. Detailed man hour Estimates are required for T&M contracts and are to utilize corresponding rates

2. Rates in place at the time a project is contracted with the City will remain for the duration of the contract.

RFP COMPLIANCE DECLARATION

RFP TITLE: **Utilities Engineering Services**

RFP NO.: **23-24-052**

DUE DATE/TIME: **February 27, 2024 / 4:00 p.m.**

In compliance with the requirements of this RFP, I, the undersigned, offer and agree to furnish any or all materials and/or services to the City of Las Cruces within the time agreed.

I further certify that this company has not been debarred, suspended, or otherwise made ineligible for participation in Federal Assistance programs under Executive Order 12549 Debarment and Suspension as described in the Federal Rules and Regulations.

Receipt of Addenda Nos.: 1 and 2 is hereby acknowledged (where none received, place a zero in this space)

Engineering Services

City of Las Cruces
700 N. Main
Las Cruces, NM 88001

Stantec Consulting Services Inc.
3831 E Lohman Avenue, Suite 200
Las Cruces, NM 88011-8447

Stantec is appropriately licensed in accordance with the laws of the State of New Mexico through the New Mexico Regulation and Licensing Department to provide engineering services in New Mexico. The principal-in-charge will be Patricia Bolliger, NMPE #22758.

Dear Members of the Selection Committee,

Our local Las Cruces employees are pleased to provide this proposal to the City of Las Cruces (City) for on-call utilities engineering services. We have experienced the challenges that the City has experienced from rapid growth due to being an affordable retirement destination as well as a college town.

Local Experience. We are focused on the success of our City and truly hope we will become a trusted partner with you. We have been in New Mexico for more than 45 years and Las Cruces for 27 years. This is our city in which we live and have developed a strong team of that has collaborated and worked with federal, state, and local agencies. They've designed transportation facilities, storm drain systems, utility infrastructure, site development, and airport facilties; conducted subsurface utility exploration, civil engineering related investigations and studies, construction contract administration, land surveying; and prepare drainage reports. Additionally, we can provide expert witnesses, design and construction project managers, and construction inspectors.

The Stantec Difference. As a company of more than 28,000 employees, you will also have access to some of the best civil engineers, construction managers, grant writers, planners, utility coordinators, quality assurance, and constructability reviewers. We are defined by more than our services. We care about the City's current and future infrastructure needs because this is our City. Our experience, as well as our understanding of processes and requirements, emphasizes our innovative spirit and our dedicated pursuit of not only what is current, but also what is best. With long-term commitment to the people and places we serve, our local presences allows Stantec to connect on a personal level and advance the quality of life in Las Cruces.

If selected, we will use the Las Cruces Comprehensive Plan, "Elevate Las Cruces" as well as resolutions and staff input to help us support you.

Thank you for your consideration. Gene Paulk will be your primary contact and is available if you have questions or need more information.

Sincerely,

Stantec Consulting Services Inc.

Patricia Bolliger
Principal-in-Charge
575-587-3745
patricia.bolliger@stantec.com

EVALUATION CRITERIA NO. 1

Technical Approach

A. PROFESSIONAL, TECHNICAL, AND CUSTOMARY SERVICES

We will provide a client service manager, **Gene Paulk**, as the primary point of contact. He will be in frequent contact with you to make sure that our project teams are being responsive and providing services in a way that is meeting the City's needs and expectations.

Our principal-in-charge (PIC), **Patricia Bolliger**, will have the authority to make contractual and other decisions on behalf of Stantec. She will be involved upfront in the development and approval of task orders and will remain engaged in each project.

Depending on the type of project, a project manager and a project engineer will be assigned to each project. We believe that clear and effective communication with the City is critical for project success. We will conduct bi-weekly or monthly project meetings with the City, and others as needed, to discuss status, concerns, upcoming critical milestones, and other project issues.

Typical Project Delivery Approach

SCOPING AND SETUP PHASE

Request for Proposal: Based on the RFP, we understand that you will provide us with a detailed project assignment description, including the scope of work and any other special instructions needed. Such information will flow from the City to Gene, who will work with Patricia to assign a project manager based on the scope of work.

Proposal Preparation and Authorization: The project manager will develop a fee proposal with a breakdown of tasks, project team members, hours to complete each task at the applicable hourly rate, and a detailed project schedule for the City for consideration and negotiation.

Kickoff Meeting: Upon receipt of a notice to proceed from the City, we will schedule and conduct a kickoff meeting to be attended by the City, subconsultants, and Stantec team members to ensure the entire team starts with the same goals in mind. We will review the project scope and approach, available funds, schedule, expectations and requirements, roles and responsibilities, plan for deliverables, and documentation requirements. We often propose conducting the kickoff meeting at the project site or a site visit following the meeting.

PLANNING PHASE

Our creative and collaborative approach to planning heads off most problems from the start. It provides early warnings for course correction on the rest of the project. We frequently prepare Preliminary Engineering Reports (PERs) for communities as most funding agencies either require one or the PER gives clients a better chance of obtaining funding. We also prepare master plans, feasibility studies, asset management plans, comprehensive plans, 40-year water plans, conservation plans, and utility rate studies for our clients, depending on their needs.

We typically identify various alternatives during this stage, perform analyses using the appropriate computer modeling software, and work with the client to select one alternative based on monetary and non-monetary factors. We identify the project's geotechnical, surveying (boundary, topographic, horizontal utilities, sub-surface utilities), and permitting needs and plan for constructability, hydrology and hydraulics, utility conflict resolution, operations and maintenance, schedule, and cost. Planning workshops are often held to establish project requirements, build upon previous discussions, gather stakeholder input and City user preferences, discuss identified issues, fill data gaps, review concept models, and cost analyses.

DESIGN PHASE

The number of design milestones can differ depending on the project scope or the client's request. However, we typically anticipate the milestones following a 30%, 60%, 90%, and 100% approach. For larger or more complex projects, we often prepare a Basis of Design Report (BODR) describing the technical approach for the project. The BODR represents the City's vision for the

project and documents the major design criteria, assumptions, and the applicable design standards to adhere to. It is used as a reference for the design team, City, and stakeholders to evaluate the design quality and performance. The BODR will be updated to reflect changes in, or fine-tuning of, design and will be submitted to the City at each design milestone. Depending on the project, we may also submit to the City an updated construction cost estimate, schedule, risk management log, and decision log at each design milestone.

Preliminary (30%) Design: The first design milestone is typically Preliminary, corresponding to a 30% design completion. During this period, we often collect survey (boundary, topographic, horizontal utility) data and prepare environmental studies, 30% plans, and a list of technical specifications anticipated for the project. We will update the hydrologic and/or hydraulic analyses, construction cost estimate, permitting requirements, construction sequencing, schedule, and risk. A primary goal of the preliminary design is to determine the project layout or alignment to advance the design properly by starting with a conceptual layout or alignment and analyzing it for various parameters, such as topography, utilities, hydrology or hydraulics, and boundary and environmental limitations, among others.

We will conclude the preliminary design by submitting the plans, list of technical specifications, updated BODR, risk management log, and decision log to the City for review. We will request a meeting with the City to discuss their review comments and document them in a comment response log before proceeding with the following design milestone.

Final (60%, 90%, and 100%) Design: The next design milestone corresponds to a 60% design completion. During this period, since the project layout or alignment is essentially determined, we will collect the remaining survey (sub-surface utility engineering) and geotechnical data. We will address the City's comments from the Preliminary Design milestone, documenting how each comment is addressed in the comment response log, and advance the plans and specifications to 60% completion. We will finalize the hydrologic and/or hydraulic analyses and permitting requirements and update the construction cost estimate, construction sequencing, schedule, and risk. We will conclude the 60% design by submitting the plans, technical specifications, updated BODR, risk management log, decision log, and comment response log to the City for review. We will request a meeting with the City to discuss their review comments on the final design and document them in a comment response log before proceeding with the next design milestone.

The next design milestone corresponds to a 90% design completion. During this period, we will address the City's comments from the 60% milestone, documenting how each comment is addressed in the comment response log, and advance the plans, specifications, and contract book to 90% completion. We will finalize the construction cost estimate and construction sequencing and update the schedule and risk. We will conclude the 90% phase by submitting the plans, technical specifications, contract book, updated BODR, risk management log, decision log, and comment response log to the City and other agencies having jurisdictional authority for review. Should there be comments requiring resubmittal, we will request a meeting with the City and other agencies to discuss their review comments on the 90% submittal. We will then address the comments, documenting how each is addressed in the comment response log, and resubmit the 100% design deliverables for the City's and other agencies' approval.

BIDDING PHASE

It is incredible to see our friends in the construction industry thriving! However, as the demand for construction increases, the availability of construction companies, materials, and equipment decreases. Therefore, it is crucial to communicate with the construction community early and often regarding an upcoming advertisement for construction bids. We can assist the City with such communication to ensure the project is on the radar and we increase the likelihood of receiving several quality bids.

We often assist with the bid advertisement, attend the pre-bid meeting, prepare and distribute the addenda, attend the bid opening, tabulate and evaluate bids, and prepare the award recommendation.

CONSTRUCTION PHASE

We often complete executed construction contract documents, schedule and conduct the preconstruction conference, review and either approve or deny the contractor's submittals, maintain a log of submittals, visit the construction site at critical milestones, provide interpretations of the contract documents by responding to requests for information (RFIs), maintain a log of RFIs, prepare change orders, maintain a log of change orders, review and either approve or deny the contractor's pay applications, attend routine meetings with the City and the Contractor, and provide full- or part-time construction inspection.

B. MAJOR TASKS AND C. DETAILED STATEMENT OF SERVICES UNDER EACH TASK

Computer Network Analysis and Design of Utility Systems

Stantec has completed hundreds of New Mexico municipal water, wastewater, and storm systems analyses and designs and has significant experience in developing, calibrating, testing, and analyzing computer models that simulate the hydraulics of potable water, wastewater, and storm systems. Our analysis work has included the preparation of hydrologic and hydraulic modeling for various planning studies and activities, such as those discussed in our Planning Phase section, as well as for operational efficiency, capacity estimating, pipe condition assessments, leak detection, video capture, and transient analysis.

We have expanded upon our analyses during the design of wells and well houses, pumps and pump stations, transmission piping, booster stations, reservoirs and storage tanks, water treatment plants, distribution piping, collection piping, lift stations, force mains, vacuum and STEP systems, wastewater treatment plants, reclaimed water systems, and advanced water treatment facilities. We understand these systems and the permitting, environmental, public involvement, and operational requirements that go along with such systems.

Supervisory Control and Data Acquisition (SCADA)

SCADA systems are crucial in automating, monitoring, and controlling various processes. Stantec designs SCADA systems for water treatment plants, wastewater treatment plants, advanced water treatment facilities, water storage reservoirs, water storage tanks, and network distribution and collection systems. We always request to collaborate with the operators, IT professionals, and other City staff when designing SCADA systems. We are familiar with the relevant standards and codes, vendor equipment capability and availability, power requirements, and designing for safety, reliability, and compatibility with existing systems. Stantec's SCADA team provides design solutions that will integrate with any configuration. It recognizes that the system must be accurate, versatile, and expandable to meet your individual needs.

Water Treatment

Across New Mexico, Stantec has performed planning and design of municipal water treatment, municipal wastewater treatment, industrial water treatment, and advanced water treatment for potable reuse projects. Because of our experience working with Colorado and Arizona standards development, we have assisted the New Mexico Environment Department in developing standards for treating municipal and industrial water for potable reuse applications.

Our water treatment expertise covers many technologies, including membranes, high-rate filtration, advanced oxidation, biological filtration, ozone or UV disinfection. Our experts stay current on water treatment regulations at both the state and federal levels, and we assist our clients in implementing the most appropriate treatment technology for each situation. In addition, we understand the value of working closely with operations and maintenance staff, and we always consider operability, maintainability, and safety throughout the design process.

Master Planning and Feasibility Studies

Stantec has completed master plans and feasibility studies for water, wastewater, storm drainage, and industrial waste systems. As a leader in hydraulic modeling services, our firm emphasizes the importance of a strong understanding of real-world water and sewer system operations and focuses on identifying solutions to address clients' specific needs. This balance of theoretical and practical experience enables staff to make appropriate decisions during model development and application, leading to executable and cost-effective solutions. As part of Stantec's commitment to proactive management, we often apply principles of adaptive management to allow our master plans to be flexible to future financial, political, and regulatory changes.

Solid Waste Studies

Stantec's solid waste engineers, scientists, and regulatory specialists help clients with waste reduction, recycling, composting, waste-to-energy, and zero waste projects. Our team works on the conceptualization, planning, design, and construction of waste management facilities through to the processing and disposal of waste—including closure, reclamation, and post-closure monitoring. We provide strategies for proper waste management systems, examining alternate delivery options and analyzing economics and financing to develop creative and sustainable systems and contribute to engineering, permitting, and materials testing.

Land Use Permitting

Stantec recommends beginning every project with a permitting plan to provide a systematic outline that helps regulatory organizations plan their resources to ensure speedy passage through

the approval process. Stantec will assist with the preparation of applications, as well as obtaining development approvals and building permits. In addition to assisting clients with preparing applications and obtaining development approvals and building permits, Stantec offers a depth of knowledge in navigating the requirements of various regulatory agencies. Stantec is accustomed to working closely with local fire marshals to obtain approvals of the National Fire Protection Act (NFPA) and other widely accepted industry specific codes.

Subsurface Utility Exploration and Boundary/Easement Survey

On, above, and below the earth's surface—we provide surveying and mapping to define land boundaries, earth's physical features, and the built environment. Armed with tools like GPS, GIS, and aerial photogrammetry, we deliver innovative solutions for remote and challenging environments or complex urban settings. The art is interpreting this information for legal matters of land definition or to support mapping, design, or construction activities. Our experts offer services that include boundary surveys, topographic mapping, construction staking, residential builder layout, ALTA/ACSM surveys, 3D laser scanning, geodetic and control surveys, route surveys, as-built surveys, aerial photogrammetric mapping, water rights surveys, hydrographic/bathometric mapping, and subsurface utility engineering.

National Pollutant Discharge Elimination System (NPDES) & Stormwater Pollution Prevention Plan (SWPPP) compliance

Our team is well versed in assisting our clients with NPDES permitting and developing, and monitoring compliance with, a SWPPP during construction. We start by identifying potential sources of stormwater pollution, including erosion, sedimentation, chemical spills, the site's slope, receiving water bodies, and vegetation cover. We select appropriate best management practices to minimize pollution on the construction site, including silt fence or straw wattle, waste management, spill prevention, and inlet protection. Such best management practices are shown on a plan and included within the SWPPP, along with a description of how to control stormwater pollution on-site and inspection requirements. We typically assist our clients with submitting a Notice of Intent before construction and a Notice of Termination once construction is complete and the site is stabilized.

Electrical Design

We perform in-house electrical designs for all our water, wastewater, and other utility projects. Our electrical design services include distribution design, advanced automation, controls, system integration, and electrical servicing. We work with you to formulate strategies that conserve energy and reduce electrical costs—while creating safe and comfortable work environments.

When designing your electrical system and determining how power will be generated, we keep safety, efficiency, and dependability at the forefront, and we use all available and necessary technologies to do so. Program and system integration is designed to keep your operations running, including backup generation and uninterruptible power supplies (UPS). We conduct arc flash studies, provide hazardous classification reviews, and design remediation programs to ensure safety. Integrated technology makes facilities and communities smarter and more secure.

Computer network analysis for Gas (GasWork), Water (InfoWater), and Wastewater (InfoSewer)

We maintain active license agreements for various hydraulic modeling programs from numerous software providers to ensure we meet our client's needs. Finding the right solution starts with a good plan, which is why our team is built on experts in planning and modeling. We understand how to evaluate and optimize systems, assess risk, and plan capital improvements. We focus on delivering reliability for the present and capacity for the future for all your system's pipelines, pumping stations, open channels, and storage facilities.

Solid Waste Studies, Landfill System Design and Analysis

Stantec's solid waste engineers, scientists, and regulatory specialists help clients with waste reduction, recycling, composting, waste-to-energy, and zero-waste projects. Our team works on the conceptualization, planning, design, and construction of waste management facilities through the processing and disposal of waste—including closure, reclamation, and post-closure monitoring. We provide strategies for proper waste management systems, examine alternate delivery options, analyze economics and financing to develop creative and sustainable systems, and contribute to engineering, permitting, and materials testing.

Environmental Surveys

We provide permitting strategy, environmental assessment and application preparation, and technical support for projects requiring municipal, state, and federal environmental approvals. We have excellent working relationships with regulatory agencies, and these relationships help us create an

effective approach to securing regulatory approvals. Early identification of constraints, client goals, regulatory agency needs, and stakeholder issues allows us to address problems before they can knock a project off course.

Solid, defensible applications need data to back them up. We have the in-house expertise and experience in collecting and analyzing data on the atmospheric, aquatic, terrestrial, and socioeconomic environments for input to environmental assessments and regulatory applications. From there, we can design management and monitoring programs to suit the project goals.

Geotechnical Assessments

Stantec will subcontract a local geotechnical engineering firm when necessary for design. Stantec has great working relationships with several local geotechnical engineering firms, all of whom have provided quality assessments related to soil and groundwater. On the rare occasion we experience a unique geotechnical situation requiring additional expertise, we will utilize our internal team of geotechnical experts as a resource to provide additional guidance. We are happy to work with whichever geotechnical firm the City prefers.

Expert Witness in a Judicial and/or Quasi-Judicial Setting

We understand that there may come a time when you need specialized knowledge in specific engineering areas from neutral and impartial servants. Our team includes skilled experts in every field of engineering who can help others understand technical information, present substantiated, unbiased evidence, and provide credible conclusions.

Project Management

No matter the size of the job, we emphasize safety, quality control, innovation, cost control, schedule management, and client service on all our projects. We have set project control procedures designed to complete your projects on schedule and within budget.

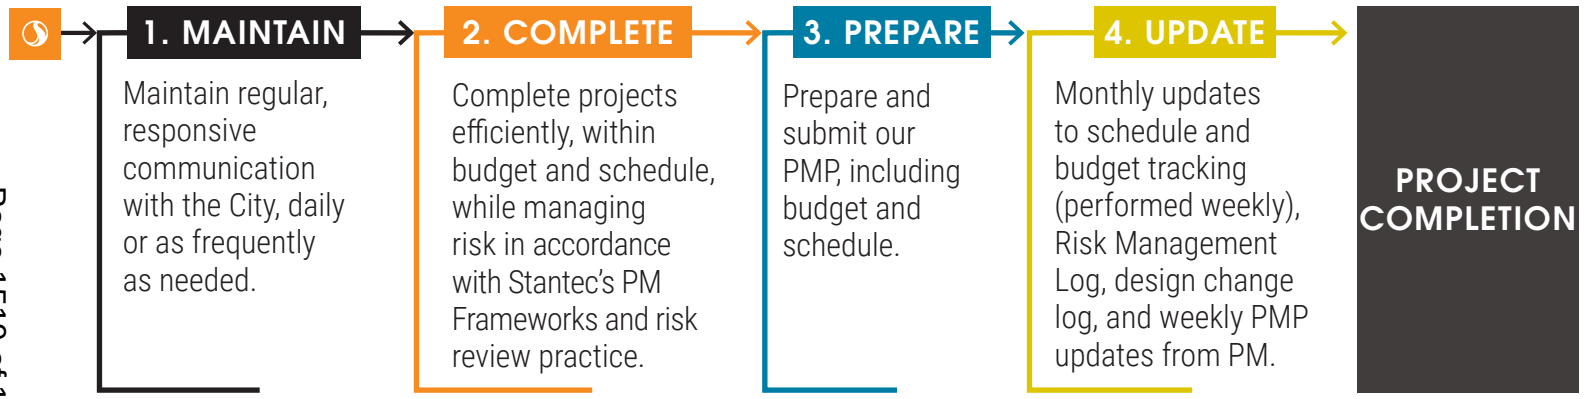
Stantec's project management approach includes:

- A scalable framework that represents Stantec's expectations of project managers and promotes a pragmatic and disciplined method to project delivery.
- A pre-qualification process that ensures each project is managed by a competent project manager with appropriate skills and experience.
- A learning strategy that supports project managers in developing the knowledge, skills, and competencies required to successfully manage increasingly larger, more complex, and higher-risk projects.
- An audit and compliance program that monitors and evaluates project performance and quality.
- A technology investment that provides integrated systems and digital tools for efficient and consistent project planning, monitoring, and control.
- A sustainability consideration that considers the environmental, social, and economic impacts of each project.

Construction Inspection

Stantec offers construction inspection and construction management services. Our team has decades of experience working with contractors, associations, utilities, homeowners, and funding agencies during construction.

We can provide construction management and inspection services from full- to part-time as needed by the City and tailor our services to fit the City's specific needs and budget. We have a trained staff of construction management professionals who review submittals, track pay applications,



respond to requests for information, analyze change orders, and work directly in the field with the client and contractors.

Our construction team lead will write a construction quality assurance plan (CQAP) that defines responsibilities for QC during construction, minimum testing requirements, monitoring requirements, and mandatory hold points at which approval of construction must be obtained before additional construction takes place. The CQAP is discussed at the pre-construction conference and guides and controls the construction process. The project site and adjacent structures can be videotaped before any construction to document actual conditions. This often prevents false claims by adjacent property owners concerning damage to their property by construction. Our team reviews the construction staking once complete and before construction begins to confirm the intent of the design fits the site. Adjustments can be made at this point to prevent re-work of the construction and conflict at a later point.

While construction is ongoing, plans for the upcoming work period and any issues of concern are discussed and resolved at periodic meetings. If problems do occur, we seek a timely resolution and involve the project manager and the client as soon as the problem is known.

After completing construction, Stantec will coordinate and conduct a final inspection, obtain contract close-out documents, coordinate record drawings, and assess the final funding balance.

We can tailor our services to provide what you need during the construction phase. If called upon, we have the capacity and capability to provide construction staking, materials testing, pay estimate processing, shop drawing reviews, and funding/review agency coordination.

D. TYPICAL PROJECT SCHEDULE/TIMELINE

A typical project timeline following the typical project delivery approach presented in Section A is shown in the below table. Although the project timeline is highly dependent on the scope of work, most of our projects are completed within two years from scoping and setup through construction.

PROJECT PHASE	TASKS	DURATION	DEPENDENCIES
Scoping and Setup	Define project scope and objectives; request for proposal Proposal preparation and authorization Kickoff Meeting	1-2 weeks 2-4 weeks 2-4 weeks	Identified and communicated scope Funding available to start the project Process to authorize engineer, which may be dependent on scope/size
Planning	Prepare feasibility study, including hydraulic modeling; alternatives evaluation and selection; identification of geotechnical, surveying, and permitting needs; estimate capital and O&M costs; and estimate schedule	3-6 months	Project authorization Site selection completed
Design	Collect and review geotechnical and survey data Coordinate with utility owners, stakeholders, City, and reviewing agencies Prepare BODR, hydraulic analysis, environmental study, plans, specifications, contract book, OPCC, schedule, risk management log, decision log, and comment response log	6-9 months	Planning phase complete and authorization to begin design phase
Bidding	Bid advertisement, attend the pre-bid meeting, prepare and distribute the addenda, attend the bid opening, tabulate and evaluate bids, and prepare the award recommendation	2-3 months	Design phase complete, authorization to begin bidding phase, and construction funding in place
Construction	Complete executed contract documents, preconstruction conference, review submittals, visit construction site, respond to RFIs, prepare change orders, review pay applications, routine meetings with City and Contractor, and construction inspection	6-9 months	Bidding phase complete, contractor awarded, and NTP provided to contractor

Schedule Control

Schedule control begins with developing the project plan, which includes the scope of work and fee proposal development. We prepare a detailed and realistic breakdown of all the tasks to be performed, reviews and approvals that must be obtained, and coordination that must occur. Identifying and using the critical path method, we determine when each task must be finished and consider the time it will take and when it must begin. If a project starts to fall behind schedule for a reason we have control over, we will add additional resources or put in the extra time needed to get the project back on track. We review the schedule during internal design team meetings and again with regularly scheduled status meetings with the owner.

Unanticipated project delays are often caused by one or more of the following:

- Reviews and approvals needed by applicable state and federal regulatory agencies
- Utility coordination, mainly if adjustments are necessary
- Acquisition of ROW, where required

Working closely with public and private entities early in the design stage is crucial to identifying constraints and refining the relative infrastructure locations to mitigate the issues that can lead to delays and cost overruns. We will take the following actions to manage the schedule for the life of the project effectively:

- We will provide an updated schedule during progress meetings with the City and at project milestones (i.e., planning, 30%, 60%, 90%, 100%, etc.).
- The project manager will efficiently execute, monitor, and update the schedule weekly to provide real-time evaluation and adjustments as required and verify project goals are being met.
- Engage with the City, adjacent property owners, utilities, and other entities to identify issues that could lead to design and construction delays and cost overruns.
- Document and track potential risks in a Risk Management Log, along with mitigation measures to avoid delays and overruns.
- Review the Risk Management Log with the City during monthly progress meetings so the City knows the project risks and agrees with any mitigation measures.

Quality Assurance and Quality Control (QA/QC)

Our project manager will be responsible for QA/QC of all deliverables on the project assignment. The project manager will develop and convey to the project team a Quality Control Plan to clearly define and convey to the project team the:

- Management and technical advisory roles and responsibilities;
- QA/QC review requirements, procedures, and schedule;
- Process to evaluate subconsultant deliverables;
- Process to document the addressing of internal and external review comments; and
- QA/QC Records management system.

At each delivery milestone, the project manager will self-review and schedule independent peer reviews of the plans, engineering estimates, design reports, specifications, and other deliverables. Maintaining QA/QC process adherence documentation will be a requisite element of each review submittal.

EVALUATION CRITERIA NO. 2

Qualifications/Competence

A. PROJECT TEAM

The organization chart shown on the right shows our proposed team for this contract.

Our team is truly local and are responsive. Many have grown up here and still continue to live here. They are responsive because projects under this contract effect the community they live in and care about.

The depth and expertise within our local, responsive team will allow them to help you plan for your future and community.

In addition, our team has access to global resources and subject matter experts within Stantec that they can pull in at any time depending on your needs.

PATRICIA BOLLIGER, PE

Role: Principal-in-Charge **Experience:** 18 years **Time Assigned:** 20%

Patricia supervises business development activities, business management, and project development in New Mexico. Her primary focus is on client satisfaction and with that comes ensuring projects are delivered on time, on budget, and with the high quality our clients expect and deserve. Patricia's engineering experience includes water resources, water and wastewater infrastructure treatment, conveyance, flood control, community development, and transportation in planning, design, bidding, and construction phases of projects. She employs practical and proven project management methodologies that optimize project resources to deliver high-quality deliverables on schedule and within budget. She excels at leading multi-discipline teams, developing comprehensive design criteria, evaluating site characteristics and value engineering opportunities, and preparing preliminary and final design documents that serve as the basis for construction.

GENE PAULK, PE (NM #15573)

Role: Client Services Manager **Experience:** 25 years **Time Assigned:** 10-20%

Gene, an NMSU graduate, brings experience in transportation engineering, including planning, budget allocation, and project and personnel management. Gene has extensive experience working with NMDOT and local government municipalities including City of Deming and City of Las Cruces. This experience has given Gene a deep understanding of the standard processes, challenges, and needs associated with municipal on-call contacts. As a lifelong resident of the New Mexico, he's worked throughout the southwest and is dedicated to the safety and development of transportation infrastructure within the state.

RUSS SNOW, PE, PMP

Role: QA/QC and Expert Witness **Experience:** 40 years **Time Assigned:** 10-20%

Russ' civil engineering experience focuses on design and construction of major water supply conveyance systems comprised of steel and PCCP with diameters up to 144 inches. He has served as quality control manager, technical advisor and project manager on major water supply projects and programs in excess of $5 billion, including the Colorado Springs Utilities Southern Delivery System, Southern Nevada Water Authority's Capital Improvements Program, Tarrant Regional Water District's Integrated Pipeline, and the City of Aurora's Prairie Waters Project—just to name a few. Russ has developed and implemented quality management and design review processes, as well as authored pipeline design standards that have been adopted on these and other water supply projects and programs.

RAY DE LA VEGA, PE

Role: Project Manager **Experience:** 18 years **Time Assigned:** 10%

Ray's proven track record of local project management and technical leadership. He will be your partner on projects from start to finish. Ray employs practical and proven project management methodologies that optimize project resources to deliver high-quality deliverables on schedule and within budget. He excels at leading multi-discipline teams, developing comprehensive design criteria, evaluating site characteristics and value engineering opportunities, and preparing planning and design documents that serve as the basis for construction. His strong relationships with many permitting agencies and his reputation as a proven project manager was built on his excellent organization and communication skills. Ray has led numerous projects, including sanitary sewer collection systems, lift station, wastewater treatment facilities, booster pump stations, waterline distributions, reuse systems, and pipeline rehabilitation.

ALICIA BRUNDAGE, PE

Role: Project Manager **Experience:** 35 years **Time Assigned:** 10%

Alicia has broad experience in civil engineering and all aspects of project management and implementation. She has managed water and wastewater projects in the Cities of Jal, Las Vegas, Lordsburg, Lake Arthur, and Tucumcari, managing a variety of projects, including a water tank, sewer disposal design, water pipeline improvements and, drainage. Her intelligence and ability to solve complex problems make her a valued team member. She has the technical expertise and a strong understanding of project management protocols to ensure projects are delivered on time and within budget. Her belief in her Stantec teams helps her get the best effort from everyone while maintaining accountability.

WAYLAND OLIVER, PE

Role: Water/Wastewater Systems Analysis & Design **Experience:** 28 years **Time Assigned:** 10-30%

Wayland brings an extensive history in planning and design for rural, municipal, and county clients. He brings broad knowledge and experience with municipal planning documents such as PERs, pavement management plans, asset management plans, leak detection reports, scoping reports, technical memos, and technical guidance for Comprehensive Plans and Infrastructure Master Plans. His water and sewer projects include a variety of sizes and scopes for projects such as a fast track water main extension for a new Pilot Truck Travel Center in Santa Rosa, New Mexico; a new well for the Village of San Juan on the Pecos River; and a sewage lift station for the Village of Fort Sumner. He has collaborated on the design of a new well and on well rehabilitation to include pump replacement, variable speed well control, and SCADA control of multiple wells supplying multiple pressure zones.

RICHARD MAYNES, PE

Role: Water/Wastewater Systems Analysis & Design **Experience:** 28 years **Time Assigned:** 10-30%

Richard has experience in operations, design, and construction of roadways, water, storm water, and wastewater systems. His responsibilities include civil, structural, and environmental scope and design projects for public and private clients. Richard works closely with clients on gaining an understanding of their needs, builds strong relationships, and maintains constant communication, which are essential to successful projects.

STEPHEN PARKER, PE

Role: Water/Wastewater Systems Analysis & Design **Experience:** 9 years **Time Assigned:** 10-30%

Stephen has experience in the development of water, wastewater, and street projects for small municipalities and private clients. Stephen has experience preparing both pavement management and asset management plans. He also has experience in modeling existing and proposed water distribution networks for standard and fire flow analysis in Bentley WaterCAD.

LISA CAMPBELL

Role: Funding **Experience:** 29 years **Time Assigned:** 5-10%

Bridging clients with urgently needed funding sources are a passion for Lisa—she is our dedicated grant specialist and serves rural New Mexico clients by administering grants from various programs such as the NMDOT, Small Cities Community Development Block Grant Program, Legislative Appropriation, programs through New Mexico Environment Department and USDA/ Rural Utilities Service. Lisa understands the grant process, available buckets of funding, and the best way to approach complicated application requirements. She has built professional relationships with state and federal funding agencies and staff, allowing her to serve as a voice for clients navigating the application process. Lisa's familiar with federal and state agency requirements for bidding, contract management, and construction of these programs. She provides operational tools to meet technical, budgetary, and scheduling requirements of projects.

GERARDO TORRES, PLS

Role: Surveying **Experience:** 17 years **Time Assigned:** 5-10%

Gerardo, an NMSU graduate, is a licensed professional land surveyor with experience in land surveying, ranging from field work to project management. He previously managed the surveying operations for the State of New Mexico for several years, leading survey projects for a wide variety of clients. Gerardo has a broad base of surveying work experience including large-scale right-of-way projects, topographic mapping, subdivision preparation, ALTA land title surveys, residential/condominium surveys, and construction surveys. He has worked with terrestrial scanners, robotics, GNSS, drone flights, and conventional total stations

BRAD REISINGER, PE

Role: Water/Wastewater Treatment Analysis & Design **Experience:** 15 years **Time Assigned:** 10-30%

Brad has extensive experience in the water and wastewater industry. Throughout his career he has supported many municipal drinking water, wastewater, and water reclamation projects. Brad's expertise is with membrane related processes such as hollow fiber nano/ microfiltration, flat plate and hollow MBR, reverse osmosis, and electrodialysis reversal. His work experience includes project management, process design, treatment plant hydraulics analysis, membrane system procurement, detailed design, bench and pilot testing, pilot system operations, process monitoring and optimization, construction administration, and operations and maintenance manuals.

BRUCE WONG, PE, PMP, ENV SP

Role: Electrical **Experience:** 17 years **Time Assigned:** 10%

Bruce brings experience in design of power and control systems for numerous process configurations, including water/wastewater treatment plants. His design expertise includes chemical delivery/containments systems, low-, medium-, and high-voltage power generation/ distribution, hydropower generation, high-voltage sub station design, and indoor/outdoor lighting design. Recently, Bruce assisted in the detailed design of two processes for a 16-MGD water recycling plant in the pacific northwest. In Southern California, Bruce has most recently worked with the City of South Pasadena and the Metropolitan Water District of Southern California.

BARABARA HERRERA, PE

Role: SCADA **Experience:** 19 years **Time Assigned:** 10%

Barbara has experience in private and public-sector utility infrastructure. Her experience includes designing both electrical and instrumentation and controls systems for water and wastewater facilities around the country. Barbara's experience includes electrical engineering for both lift stations and booster pump stations.

MIKE DUPONT, PE

Role: Water/Wastewater Systems Planning & Technical Advisory **Experience:** 25 years **Time Assigned:** 5-20%

Mike's knowledge of how a wastewater collection system functions is more than viewing it from a desk as a hydraulic model or a set of design plans. He has been a consultant and an O&M operator. He understands how collection systems operate, what conditions can impact system performance, and what challenges occur in wet weather. His technical specialties include design and construction, rehabilitation, hydraulic modeling, and master planning.

MIKE GEORGALAS, PE

Role: Water/Wastewater Systems Planning & Technical Advisory **Experience:** 25 years **Time Assigned:** 5-20%

Mike's responsibilities include preparation of contract drawings and specifications, as well as coordination with utilities, reviewing agencies, and outside consulting firms. Mike conducts water and wastewater conveyance system designs, hydrologic and hydraulic investigations and reports, and associated civil engineering designs (grading, paving, and utilities). Specific project experience includes water distribution and transmission main design, pump station design, hydraulic modeling, water system master plans, and specifications and bid document preparation.

SHANTI CEANE, PE

Role: Construction Inspection **Experience:** 21 years **Time Assigned:** 5-20%

Shanti serves as the construction manager on transportation, stormwater, and water/wastewater utility projects across New Mexico. She has served as a design technical lead before moving back into a construction management role. Shanti manages a large crew of construction observers and has completed construction management services on several local government and NMDOT projects across the state. She is included in this proposal because of her extensive experience with management of large construction projects.

LISA LAUVER, PE

Role: NPDES Permitting & SWPPP **Experience:** 22 years **Time Assigned:** 5%

Lisa focuses on water resources projects, with a heavy emphasis on hydrologic/hydraulic analysis and design. Her project experience includes the preparation of stormwater master plans for public and private clients, and the design of water quality facilities for removal of pollutants from stormwater runoff. She has prepared Storm Water Management Plans (SWMP) for more than 20 construction projects and permanent water quality structures. She has prepared FEMA flood mapping studies involving CLOMRs, LOMRs, and previously unmapped drainageways. Her design experience includes a wide range of drainage facilities, including detention/retention ponds, storm sewer systems, grade control structures, channel and bank stabilization, bridge hydraulics, roadway culverts, and outfall energy dissipators.

PAM MAPLES

Role: Environmental Surveys, Solid Waste, and Land-Use Permitting **Experience:** 20 years
Time Assigned: 5%

Pam is a tenacious, diligent and dedicated professional with excellent attention to detail. She has experience in regulatory and consulting roles, including experience in New Mexico, Arizona, and the Navajo Nation. She specializes in designing and conducting assessments and cleanups. She has successful written USEPA Environmental Justice grant applications, Targeted Brownfields Assistance requests, and successfully secured two Time Critical Removal actions for the Navajo Tribe.

B. PRINCIPAL OF FIRM AND SUBCONSULTANTS

EVALUATION CRITERIA NO. 3

Performance of Firm

INDIAN HILLS SUBDIVISION SEWER

TOWN OF SILVER CITY

This project involved replacing a community's existing septic tank systems with a new wastewater collection system, requiring extensive interaction with residents for work within their private properties to implement the changes. Our team worked with the Town of Silver CIty to provide survey, preliminary design, easement preparation, final design, bid administration, and construction phase services. This work included design of an eight-inch gravity sewer main with new manholes, four-inch service lines with double cleanouts, and a lift station with submersible pumps and backup generator.

Reference: Robert Esqueda, Town of Silver City, Public Works Director, 575-354-6355

JOHNSON HILL WEST TANK REHABILITATION

CITY OF PORTALES

Our team completed a PER for the City of Portales Water Storage Facilities, including the Johnson Hill (JH) West & East Tanks, Lime Street Tank, and Rotary Tank. The JH West Tank was determined to be the highest priority tank for refurbishment, followed by the JH East Tank as the second priority. The JH West Tank has three million gallons of storage capacity. The PER was utilized to obtain $2,231,785 for improvements to the JH West. Improvements include a new interior/exterior coating system, inlet/outlet and overflow piping, roof vent, OSHA-compliant exterior ladder; rehabbing the depth gauge; tank level sensor; SCADA; and cathodic protection. Coupons of the tank floor were obtained, and determined that the floor did not require replacement. However, during the inspection of the tank roof framing, it was determined that the roof framing necessitated replacement. The new roof framing included columns, beams, rafters, and sheeting. Chlorination system improvements included a new metal building with an overhead crane for one ton gas chlorine tanks; a new one ton tank scale; fiberglass building for four 150-pound gas chlorine cylinders, scales, chloride solution injection pump, and residual chlorine analyzer; and backup generator. Other improvements included the removal of a non-operating 24-inch check valve, capping redundant outlets on the West Tank, and a new 18-inch flow meter on the tank supply line.

Reference: Christopher Mendoza (recently previous Public Utilities Superintendent, John DeSha), City of Portales, Public Utilities Superintendent, 575-356-6662

CITY OF JAL WASTEWATER

The City of Jal's (City) vision for its wastewater treatment plant is to be a 100% reuse facility with discharge to the golf course, City-owned facilities, and the oil and gas industry. Allowing the oil and gas industry to use treated wastewater for hydraulic fracking will limit the industry's depletion of freshwater resources. Unfortunately, ongoing challenges meeting the groundwater discharge permit limitations due to significant increases in influent loads and aging infrastructure have kept the City from achieving this vision. The City intends to replace its existing WWTP with a new NMED-approved WWTP with the ability to serve the rapid oil and gas industry-driven population growth. Highlighted next are three projects we provided wastewater treatment and related services for the City.

PRELIMINARY ENGINEERING REPORT (PER)

Our PER provided recommendations for a new WWTP to bring the City into permit compliance. We analyzed several alternatives within the PER, including a new Four-Stage Bardenpho (conventional treatment), a new MBR facility, and rehabilitating the existing WWTP. The City chose the conventional treatment method alternative due to its ability to efficiently meet the discharge permit limitations and lower capital costs.

As a result, the NMED approved the PER. In our pursuit of United States Department of Agriculture Rural Utilities Service funding, we also prepared a sewer revenue sufficiency analysis to help the City understand how to pay for the operations and maintenance costs of the new facility with the sewer rate revenue. We designed the new facility so that the operations and maintenance costs would be less than those of the existing facility.

WASTEWATER DISPOSAL AREA

The NMED required the design and construction of a new wastewater disposal facility. This will be used when the WWTP's treated effluent exceeds the groundwater discharge permit limitations or cannot be pumped to the northern lagoons for irrigating the golf course. We designed a small system of approximate three-acre ponds with perforated pipe to spread the treated effluent. Each pond's slope allows the treated effluent to have the best chance of being evenly distributed over the pond's bottom. This met the NMED requirement of not exceeding 200 pounds per acre per year of nitrogen within these ponds.

The team prepared a funding application for the City, resulting in approximately $1.5 million in funding for the construction of this project.

WASTEWATER TREATMENT PLANT

We are preparing final design of the recommended alternative within the PER, a new 0.17 MGD Four-Stage Bardenpho WWTP. The design included preparing a basis of design report, plans, specifications, and an engineer's opinion of probable construction cost. The facilities included within the design are a new influent pump station, pre-equalization basin, headworks, secondary treatment, disinfection, solids handling, and effluent pump station and discharge. In addition, the team incorporated the design of four buildings, including a new administrative/laboratory building, and electrical and instrumentation and controls into the design. We are currently under contract to prepare the final design of the WWTP.

Led by Lisa, we prepared a funding application for the City, resulting in approximately $420,000 in funding the City used to pay for the 30% design package. We prepared an application that the State approved for approximately $900,000 in funding the City is using for final design services.

The team assisted the City with becoming designated as a Colonia, providing them with increased opportunities for funding. Through this process, we prepared an application requesting approximately $10 million in funding for the construction of the WWTP and the City was recently recommended for award. We were successful in obtaining the remaining $15 million in USDA funding that was needed for this project to move forward.

PROJECT ASSIGNMENT AGREEMENT

23-24-052 UTILITIES ENGINEERING SERVICES

PROJECT NAME

Pursuant to terms and conditions of City of Las Cruces (CITY) Contract No. 23-24-052 dated June 1, 2024 between the CITY and Stantec Consulting Service, Inc. (ENGINEER), as amended and incorporated herein by reference, the City and Contractor hereby agree on this _____ day of _____, 20___, as follows:

1. In a satisfactory and proper manner, the ENGINEER shall perform SERVICES as proposed in response to the CITY's RFP No. 23-24-052 and ENGINEER's proposal as set forth in ATTACHMENT A attached hereto.

2. The estimated completion date is number days after a Notice to Proceed is issued by the CITY to the ENGINEER.

3. In consideration for the satisfactory completion of the work agreed to herein, compensation shall be made in the amount of $dollars.cents, plus NMGRT. Invoices issued by the ENGINEER shall be made monthly / upon completion of project with payment by the CITY being made within 30 days upon receipt of undisputed invoice.

CITY OF LAS CRUCES

PROFESSIONAL SERVICES AGREEMENT

THIS AGREEMENT, made and entered into on this _____ day of _____, 2024 by and between the City of Las Cruces, New Mexico, hereinafter called "CITY" and Water Works Engineers, LLC, of 8650 Alameda Blvd NE, Ste 103E, Albuquerque, NM, 87122, hereinafter called "CONTRACTOR".

1. PROJECT DESCRIPTION
Utilities Engineering Services on an as needed basis via Project Assignment Agreements (Attachment "A") during the term of this AGREEMENT.

2. SCOPE OF SERVICES
In a satisfactory and proper manner, the CONTRACTOR shall perform SERVICES, as proposed in response to the CITY'S RFP No. 23-24-052, as set forth in Exhibit A, attached hereto and made a part of this Agreement.

The CONTRACTOR is authorized to extend the same terms and conditions of this Agreement to other governmental entities conditioned upon the procurement laws and regulations of those entities. The CITY shall not be a party nor have any liability relating to such extensions.

3. APPROPRIATIONS
The terms of this Agreement are contingent on sufficient appropriations and authorization being made by the City Council for the performance of this Agreement. If sufficient appropriations and authorizations are not made by the City Council, this Agreement shall terminate upon written notice given by the CITY to CONTRACTOR. The CITY'S decision as to whether sufficient appropriations and authorizations exist shall be accepted by CONTRACTOR and shall be final.

4. COMPENSATION
The CITY shall compensate CONTRACTOR for the performance of SERVICES under this Agreement an amount agreed to for each assigned project, plus applicable taxes. CONTRACTOR shall perform the SERVICES upon receipt of a purchase order or written Notice to Proceed for each assigned project from the CITY. The CITY cannot authorize costs to be incurred prior to such written Notice to Proceed. CONTRACTOR shall submit invoices upon completion of the project. CITY shall pay invoices Net 30 days upon receipt of undisputed invoice.

CONTRACTOR is responsible for payment of State of New Mexico Gross Receipts Tax levied on the amounts payable under this Agreement. CONTRACTOR agrees to comply with all federal and state tax payments and report all items of gross receipts as income from the operations of its business.

5. DEVOTION OF ADEQUATE TIME
CONTRACTOR will devote the necessary hours each week to the performance of projects that are required by the CITY and it will serve the CITY diligently and faithfully,

and according to its best ability in all respects and will promote the best interests of the CITY.

6. TERM AND SCHEDULE
This Agreement shall become effective on June 1, 2024 for a term of 5 years through May 31, 2029.

CONTRACTOR shall perform the SERVICES in accordance with the time set forth as agreed upon by the CITY and CONTRACTOR and as agreed to for each project assigned under the terms of this Agreement.

7. EXTENSIONS, CHANGES, AND AMENDMENTS
This Agreement shall not be extended, changed, or amended except by instrument in writing executed by the parties. The CITY shall not be liable for payment of any extra services nor shall CONTRACTOR be obligated to perform any extra services except upon such written agreement. Such written approval shall indicate the date said extension, change, or amendment is effective and shall be signed by the parties to this Agreement. In the event that the parties cannot reach agreement as to a particular change, the issue shall be resolved pursuant to Article 21.

8. CHANGES AND EXTRA SERVICES BY THE CITY
The CITY may make changes within the general scope of the SERVICES plus may also request CONTRACTOR to perform other extra services not incorporated within the Services set forth in this Agreement. If the CONTRACTOR is of the opinion that such change causes an increase or decrease in the cost and/or the time required for performing the changes or other services required by the City, CONTRACTOR shall so notify the CITY of that fact within five (5) business work days from the date of receipt of change by the CITY. The CITY shall provide written response to the CONTRACTOR within five (5) business work days from the date of receipt of CONTRACTOR'S written notification.

9. CHANGES AND EXTRA SERVICES BY THE CONTRACTOR
In the event a condition is identified by the CONTRACTOR which, in the opinion of the CONTRACTOR, changes the services, costs, and/or time required for performance under this Agreement, the CONTRACTOR shall provide written notification to the CITY within five (5) business work days of such identification. The CITY shall respond in writing to such notification within five (5) business work days from the date of receipt of CONTRACTOR'S notification.

10. DELAYS
In the event that performance of SERVICES is delayed by causes beyond reasonable control of CONTRACTOR, and without the fault or negligence of CONTRACTOR, the time and total compensation for the performance of the SERVICES may be equitably adjusted by written agreement to reflect the extent of such delay. CONTRACTOR shall provide the CITY with written notice of delay pursuant to Article 9 including therein a description of the delay and the steps contemplated or actually taken by

CONTRACTOR to mitigate the effect of such delay. The CITY will make the final determination as to reasonableness of delays.

11. TERMINATION
This Agreement may be terminated by either party hereto upon fifteen (15) calendar days written notice in the event of substantial failure by the other party to perform in accordance with the terms of this Agreement through no fault of the terminating party. This Agreement may also be terminated by the CITY for its convenience or because the PROJECT has been permanently abandoned, but only upon fifteen (15) calendar days written notice to CONTRACTOR.

In the event of termination, CONTRACTOR shall be compensated for all services performed and costs incurred up to the effective date of termination for which CONTRACTOR has not been previously compensated.

Upon receipt of notice of termination from the CITY, CONTRACTOR shall discontinue the SERVICES unless otherwise directed and upon final payment from the CITY deliver to the CITY the required number of copies of all data, drawings, reports, estimates, summaries, and such other information and materials as may have been accumulated by CONTRACTOR in the performance of this Agreement, whether completed or in process.

12. RECORDS AND AUDITS
CONTRACTOR will maintain records indicating dates, length of time, and services rendered. The CITY has the right to audit billings both before and after payment, and contest any billing or portion thereof. Payment under this Agreement does not foreclose the CITY'S right to recover excessive or illegal payments. CONTRACTOR will retain records for five (5) years after the completion of the project.

13. DISCLOSURE AND OWNERSHIP OF DOCUMENTS, PRODUCTS, DESIGN, ELECTRONIC FILES
All technical data, electronic files, and other written and oral information not in the public domain or not previously known, and all information, electronic files, and data obtained, developed, or supplied by the CITY will be kept confidential and CONTRACTOR will not disclose to any other party, directly or indirectly, without the CITY'S prior written consent unless required by lawful order.

All technical data, electronic files, products developed, operational parameters, blueprints, and other information and work of the CONTRACTOR shall be the sole property of the CITY and shall be delivered to the CITY when requested and at the end of the Agreement.

14. INDEPENDENT CONTRACTOR
CONTRACTOR represents that it has, or will secure, at its own expense, all personnel required in performing the SERVICES under this Agreement. Such personnel shall not be employees of, nor have any contractual relationship with the CITY. CONTRACTOR,

consistent with its status as an independent contractor, further agrees that its personnel will not hold themselves out as, nor claim to be officers or employees of the CITY by reason of this Agreement.

To the extent that CONTRACTOR employs any employees, CONTRACTOR shall be solely responsible for providing its own form of insurance for its employees and in no event shall CONTRACTOR's employees be covered under any policy of the CITY.

CONTRACTOR'S retention hereunder is not exclusive. Subject to the terms and provisions of this Agreement: (i) CONTRACTOR is able, during the Term hereof, to perform services for other parties; and (ii) CONTRACTOR may perform for its own account other professional services outside the scope of this Agreement.

CONTRACTOR is and shall be an Independent Contractor and shall be responsible for the management of its business affairs. In the performance of the work under this Agreement, CONTRACTOR will at all times be acting and performing as an Independent Contractor, as that term is understood for federal and state law purposes, and not as an employee of the CITY. Without limitation upon the foregoing, CONTRACTOR shall not accrue sick leave, jury duty pay, retirement, insurance, bonding, welfare benefits, or any other benefits, which may or may not be afforded employees of the CITY. CONTRACTOR will not be treated as an employee for purposes of: Workers' Compensation benefits; the Federal Unemployment Tax Act; Social Security; other payroll taxes, federal or any state income tax withholding; or the employee benefit provisions described in the Internal Revenue Code of 1986, as amended. Neither the CITY, nor its agents or representatives, shall have the right to control or direct the manner, details or means by which CONTRACTOR accomplishes and performs its services. Nevertheless, CONTRACTOR shall be bound to fulfill the duties and responsibilities contained in the Agreement.

15. NO JOINT VENTURE OR PARTNERSHIP

Nothing contained in this Agreement shall create any partnership, association, joint venture, fiduciary or agency relationship between CONTRACTOR and CITY. Except as otherwise specifically set forth herein, neither CONTRACTOR nor CITY shall be authorized or empowered to make any representation or commitment or to perform any act which shall be binding on the other unless expressly authorized or empowered in writing.

16. ASSIGNMENT

CONTRACTOR shall perform all the services under this Agreement and shall not assign any interest in this Agreement or transfer any interest in same or assign any claims for money due or to become due under this Agreement without the prior written consent of the CITY.

17. INSURANCE
CONTRACTOR shall obtain and maintain insurance at its own cost and expense during the life of this Agreement, and shall require Subcontractors, if any, to maintain during the life of his subcontract:

1. Commercial General Liability Insurance
   a. $1,000,000 per occurrence / $2,000,000 aggregate
   b. Coverage must include premises and operations, products and completed operations, and personal and advertising injury.
   c. The City of Las Cruces must be named as an Additional Insured for all coverages listed above on endorsements acceptable to the City.
   d. Coverage must be primary and non-contributory.
   e. Coverage must be per project or per location.
   f. Coverage must be on an occurrence form.
   g. Subrogation must be waived.
2. Commercial Auto Liability
   a. $1,000,000 per occurrence
   b. Coverage must be for “owned, leased, hired, and non-owned autos” or “any autos.”
3. Workers’ Compensation and Employers Liability
   a. Statutory Limits
   b. Employer liability – $1,000,000 each accident, $1,000,000 each employee by disease, $1,000,000 policy limit
   c. Subrogation must be waived.
4. Professional Liability: $1,000,000 per claim

Endorsements for additional insured coverage and waivers of subrogation must be provided as a condition of this Agreement and shall be noted on the certificate.

CONTRACTOR shall furnish the CITY with a certificate(s) of insurance showing CONTRACTOR and Subcontractors, if any, have complied with this Article. The CONTRACTOR shall provide insurance certificates before work is to start on the project and shall provide the CITY thirty (30) days written notification of cancellation of such policies.

18. INDEMNITY AND LIMITATION
CONTRACTOR shall indemnify, defend, and hold harmless the CITY from and against any and all claims, suits, actions, judgments, demands, losses, costs, expenses, damages, and liability caused in whole or in part by, resulting in whole or in part from, or arising in whole or in part out of the negligent acts, errors, or omissions of CONTRACTOR, its officers, employees, agents, or representatives in the performance of SERVICES under this agreement.

19. APPLICABLE LAW
This Agreement and the rights and obligations of the parties shall be governed by and construed by the laws of the State of New Mexico applicable to Agreements between

New Mexico parties made and performed in that state, without regard to conflicts of law principles. Venue shall be in the Third Judicial District, State of New Mexico.

CONTRACTOR shall abide and be governed by all applicable state law, CITY ordinances, and laws regarding the CONTRACTOR'S services or any work done pursuant to this Agreement, including anti-discrimination.

20. BREACH
In the event CONTRACTOR breaches any obligation contained in this Agreement, prior to instituting any action or dispute resolution procedure, the CITY shall give CONTRACTOR written notice of such breach. In the event CONTRACTOR fails to remedy the breach within five (5) working days of receiving such written notice, the CITY, at its sole discretion, without any obligation to do so and in addition to other remedies available under applicable law, may remedy CONTRACTOR'S breach and recover any and all costs and expenses in so doing from CONTRACTOR.

21. DISPUTE RESOLUTION
In the event that a dispute arises between CITY and CONTRACTOR under this Agreement or as a result of breach of this Agreement, the parties agree to act in good faith to attempt to resolve the dispute.

22. NOTIFICATION
All notices required or permitted under this Agreement shall be in writing and shall be deemed sufficiently served if served by Registered Mail addressed as follows:

TO CITY:	City of Las Cruces PO Box 20000 Las Cruces, NM 88004 ATTENTION: Tony Trevino
With Copies to:	City Attorney Purchasing Manager
TO CONTRACTOR:	Water Works Engineers, LLC 8650 Alameda Blvd NE, Ste 103E Albuquerque, NM 87122 ATTENTION: Michael Fisher

23. SCOPE OF AGREEMENT
This Agreement incorporates all of the agreements, covenants, and understandings between the parties hereto concerning the subject matter hereof and that all such covenants, agreements, and understandings have been merged into this written agreement. No prior agreement or understanding verbal or otherwise of the parties or their agents shall be valid or enforceable unless embodied in this agreement.

24. SEVERABILITY
The parties agree that each provision of this Agreement is severable and the invalidity or unenforceability of any one or more of the provisions of this Agreement shall not affect the validity or enforceability of any other provision of this Agreement, and this Agreement shall be construed in all respects as if such invalid or unenforceable provisions were omitted.

25. CONFLICT OF INTEREST
CONTRACTOR represents and warrants that CONTRACTOR has no business, professional, personal, or other interest, including, but not limited to, the representation of other clients, that would conflict in any manner or degree with the performance of its obligations under this Agreement. If any such actual or potential conflict of interest arises under this Agreement, CONTRACTOR shall immediately inform the CITY in writing of such conflict. If, in the reasonable judgement of the CITY, such conflict poses a conflict to and with the performance of CONTRACTOR'S obligations under this Agreement, or is otherwise a violation of the CITY'S current policy or ordinances, then the CITY may terminate the Agreement immediately upon written notice to CONTRACTOR; such termination of the Agreement shall be effective upon the receipt of such notice by CONTRACTOR.

City Attorney

EXHIBIT A
SERVICES

A. Project Assignments
A Project assignment is initiated by the City providing the selected Engineer a detailed project description, including scope of work and any other special instructions needed by the Engineer to prepare items such as preliminary and final cost estimates, complete project plans and specifications, project reports, and other related engineering services. The awarded Engineers shall provide engineering services that may include but not be limited to, the following:
1. Computer network analyses for water, wastewater, and gas systems; design of water, wastewater, and gas utility systems; well house design; Supervisory Control and Data Acquisition (SCADA); water treatment process; master planning; feasibility studies; solid waste studies; land use permitting; subsurface utility exploration; boundary/easement survey; and National Pollutant Discharge Elimination System (NPDES) & Stormwater Pollution Prevention Plan (SWPPP) compliance.
2. Electrical design (wells, booster stations, lift stations, odor control stations, building electrical system design)
3. Computer network analysis for Gas (GasWork), Water (InfoWater), and Wastewater (InfoSewer). The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility
4. Solid waste studies, landfill system design and analysis
5. Environmental surveys, assessments monitoring and management, such as indoor air quality, asbestos, mold, and other related services for the City
6. Geotechnical Assessments, such as soil and groundwater testing for contamination and remediation, and other related services for the City
7. Expert witness in a judicial and/or quasi-judicial setting.
8. Project Management
9. Construction Inspection.

B. Project Assignment Agreements
A Project Assignment Agreement (a template of which is incorporated herein as ATTACHMENT “A”) will be negotiated and executed on a case-by-case basis for each specific project, and will include a cost proposal from the Engineering firm(s) proposing to do the work. The cost proposal may utilize one of the following pricing formats:
1. Lump Sum
2. Unit pricing to include:
    a. Hourly rate for various types of services requested by the City
    b. Charges for miscellaneous items such as blueprints, data, discs, rental of special equipment, etc.
    c. A statement of the billing procedures including minimum billing units, if any.
    d. Cost of sub-consultants (if any)
3. An alternative unit cost breakdown

C. Deliverables
Each project contract will require a list of deliverables, schedule/timeline and cost. The

Engineer may be required to supply to the City an of the following items, when specified and as requested on the Scope of Work for each individual project.

1. Preliminary report containing schedule of work and cost estimate.
2. Construction drawings and documents. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility. Provide hard copies and PDF format of the construction plans for Purchasing Section use.
   a. As-built drawings on electronic media and reproducible prints. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. All horizontal and vertical location datum information shall be coordinated with the City Surveyor. The utility location information shall be tied to project control monuments and referenced to project construction stationing. The project control survey shall be certified by a New Mexico Registered Land Surveyor. Metadata or “data about the data” shall be submitted with each as-built electronic file, preferably as a separate text file on the electronic submittal media, and shall include:
      - Name, address and phone number of the responsible land surveyor.
      - Date of completion of survey.
      - Equipment used to conduct the survey.
      - Horizontal and vertical control marks used to tie the survey to the City approved control.
      - Transformation factors needed to reduce Ground (local coordinate system) to Grid and combined scale factor used.
   b. “RECORD DRAWINGS” shall be clearly labeled on each sheet.
3. Computer network analysis for gas, water, and wastewater shall be provided to the City in appropriate electronic format. It shall include the entire model, including changes and a text summary (report) of the network analysis that includes assumptions, procedures, and results, and any graphics that clarify the analysis. The Engineering firm(s) shall verify the report format with the City. The computer network analysis shall be provided using the software listed below. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility.
   a. Computer network analysis for Gas: GasWork
   b. Computer network analysis for Water: InfoWater
   c. Computer network analysis for wastewater: InfoSewer
   d. Other design computer programs as approved by the City
4. Project reports.
5. Any other item specified in the contract for that project
6. Easement map and recording information

D. The selection of an Engineer for a specific project shall be based on experience with similar projects, references, performance in similar projects, and availability. This will include the ability to meet schedules, cost control, and responsiveness to client.

E. The Engineer shall have an engineering staff on-site everyday who is responsible, on behalf of the Engineer, for providing timely completion and response for performance of the terms of each Project Assignment Agreement during the progress of each individual project. Any deviation from this requirement is at the discretion of the City and must be approved in writing by the City prior to the start of any individual project.

Transmittal Letter

February 27, 2024

RE: Proposal for the City of Las Cruces Utilities Engineering Services – RFP No: 23-24-052

Dear Members of the Selection Committee:

Water Works Engineers LLC (Water Works) is pleased to submit one (1) electronic version of our proposal for the City of Las Cruces (City) Utilities Engineering Services. At this time we would like to acknowledge receipt of Addendum One dated 2/20/24 and Addendum Two dated 2/23/24.

Over the past 19 years, Water Works has provided engineering design services for water, wastewater, and recycled water infrastructure for municipal utility districts and agencies across the western United States. We have built a reputation of providing high quality and cost-effective services in a timeline consistent with varying schedules associated with on-call engineering services. We recognize that maintaining an excellent level of service to repair, rehabilitate, and replace aging infrastructure **requires excellent planning, technical expertise, and execution.**

Water Works will provide the City the full depth and breadth of our western United States experience through our local team. Our Project Manager and Lead Project Engineer ***Mohsen Karbakhsh, PE***, will be managing the nuts and bolts of this project from our Albuquerque office. ***His hands-on approach to design, attention to details, construction experience, and exceptional communication skills are what make his projects successful***. At Water Works Engineers, we believe and insist that our Project Managers have an in-depth involvement in the technical execution of the projects they manage. This significantly differentiates us from other firms, who see Project Management as a strictly administrative function. When you work with Water Works Engineers, the Project Manager is a one-stop shop for resolution of all project issues, from start to finish. This means that Mohsen will be responsible for the technical execution of much of the work, while efficiently targeting the full range of Water Works technical expertise and resources.

We have the experience, judgement, and leadership skills to keep projects on track and delivered while balancing the expectations and goals of all project participants. Water Works Engineers is a firm that was built from the ground up around ***experienced staff whose focus is engineering and technical work*** —not marketing – thereby limiting overhead functions to provide our clients with cost effective services. This combination of experienced staff and competitive rates will allow us to offer exceptional value.

Water Works acknowledges and agrees to comply with the insurance requirements listed in the RFP. If you have any questions regarding this proposal, please contact Mohsen Karbakhsh at (505) 932-8480 or mohsenk@wwengineers.com.

Very Truly Yours

Mohsen Karbakhsh, PE
Project Manager/Lead Project Engineer
(PROPOSAL CONTACT)

Mike Fisher, PE
Sr. Technical Lead, Managing Member
(PRINCIPAL IN CHARGE)

Evaluation Criteria No. 1 – Technical Approach

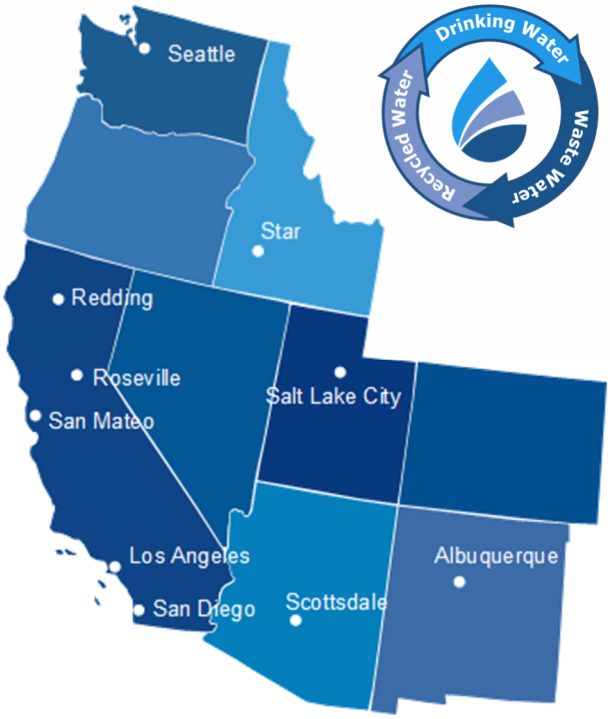
Specialized Design and Technical Competence

Water Works Engineers (Water Works) was formed in 2005 by engineers who believed that water and wastewater engineering and consulting could be done a better way by combining the best attributes of large and small firms: *the* ***technical expertise of a large firm and efficiency and personal attention of a small one***. Our vision was the formation and growth of a new kind of engineering firm, *a firm built on providing exceptional client service from highly experienced engineers in a "hands-on" highly interactive and enjoyable environment.*

To accomplish our vision, Water Works Engineers provides high-level staffing on every project with a *leaner overall firm structure* that is focused on delivering high quality work for client-specific needs. ***We focus solely on collection, conveyance, water/wastewater treatment, water, and recycled water systems infrastructure***. This focus makes us efficient, keeps us up to date, and allows us to provide the highest level of service. Our focus and work approach allow us to provide high quality planning and design products. ***We take great pride in the fact that we don't just create documents, we facilitate projects***.

This focus and approach have fueled a consistent increase in our clients and projects, with 10 offices and 105 employees with approximately $30M in yearly revenue. ***By focusing exclusively on water and wastewater engineering, Water Works provides focused expertise rather than the broad umbrella approach of many civil engineering firms***. It is with these core values in mind that we assembled our team for this project.

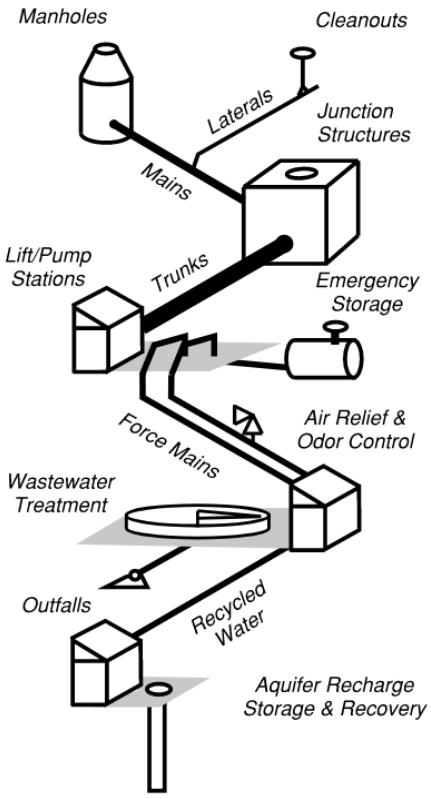
Based on our experiences, we strongly believe that people execute projects, not firms. For that reason, the Water Works team is committing high quality, senior staff with in-depth experience directly relevant to the City's Improvement Projects. The Project team are experienced professionals who have been directly involved in the design and successful implementation of collection, distribution, conveyance, and treatment system projects across Arizona, California, Utah, and New Mexico.



In addition to our civil and environmental capabilities with respect to water/wastewater treatment, infrastructure, and hydraulics, Water Works Engineers has in-house **structural**, **electrical and control, and mechanical** engineers and designers that will be involved with the City as needed.

Overall Qualifications

Water Works Engineers has extensive experience with every component of the municipal assets. From lining sewer laterals to new trunks, lift stations to treatment plants, we have designed and constructed all of it. Our staff specializes in water and wastewater infrastructure condition and capacity assessment; rehabilitation, and replacement recommendations; capital improvement project planning and prioritization; and the rate studies and financial planning to support these programs. Our team has significant experience performing condition assessments, interpreting the results, and designing rehabilitation/replacement plans to address identified system deficiencies before they become emergency projects.



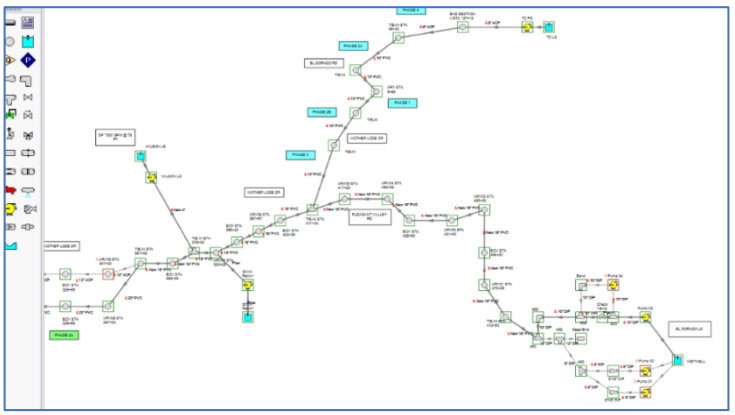
With our expertise and understanding of the entire system, we can anticipate the seemingly little details upstream or downstream of the "project limits" which can turn into vexing operational challenges or draw the public's attention. Take for example a severe H2S odor and backpressure issue that was impacting local homes and park users. One of our clients was close to installing a multi-million dollar forced air odor control facility, but we were able to eliminate the need for this facility by recommending lower wet-well set points in a downstream pump station to reduce surcharging that caused the poor ventilation and low scour velocities.

Our creativity and "big picture" vision, combined with our "hands on" construction phase experience, allows us to balance project budgets and schedule demands with the ever increasing environmental and political constraints.

Major Tasks to be Accomplished

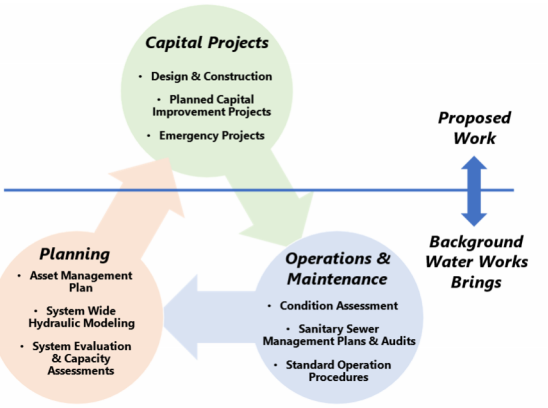
Collection and Distribution System Master Planning and Design

Water Works Engineers understands that the infrastructure outside the treatment plant (water distribution and wastewater collection systems) is often our communities' single largest investment. We pride ourselves on delivering innovative and quality work products in all phases of a project, on schedule and within budget. We have extensive experience in gravity and pressurized pipelines; booster pumps and lifts stations; steel and concrete storage tanks; metering and pressure reducing facilities; water quality monitoring stations; and manholes and junction structures. Our experience includes 90-inch transmission and interceptor pipeline design all the way down to small backyard residential lateral and mainline replacements. We have expertise with vertical turbine wet/dry well solids-handling self-cleaning sewage pumps stations, as well as smaller "duplex" and "air-pot" package stations. Water Works has experience in designing 15-MGD booster pumps stations with 5-MG pre-



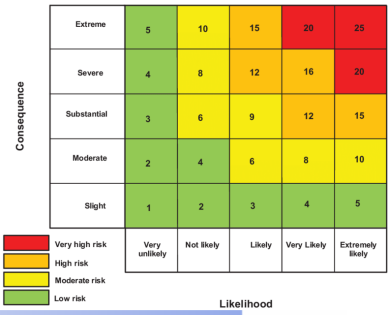
stressed concrete storage tanks and complex water age mitigation controls to replacing aging 40,000-gallon redwood water tanks serving 70 customers.

In addition, we have completed water distribution computer models for large cities and 50 connection developments. These models have supported regional water supply planning efforts and simple utility connections. Our engineers have utilized multiple water and wastewater hydraulic modeling platforms (Sewer/WaterCAD, Water/SewerGEMS, InfoWater/Sewer, H2ONet, InfoWorks ICM, AFT Fathom, etc.) to complete extended period simulation computer models to analyze and identify current and future pipeline capacity upgrades, as well as develop mitigation for water quality concerns. Our planning and design efforts often facilitated the extension of utility service to communities previously not served; extended the life of existing infrastructure through rehabilitation/repair; or provided new facilities to replace aging infrastructure.

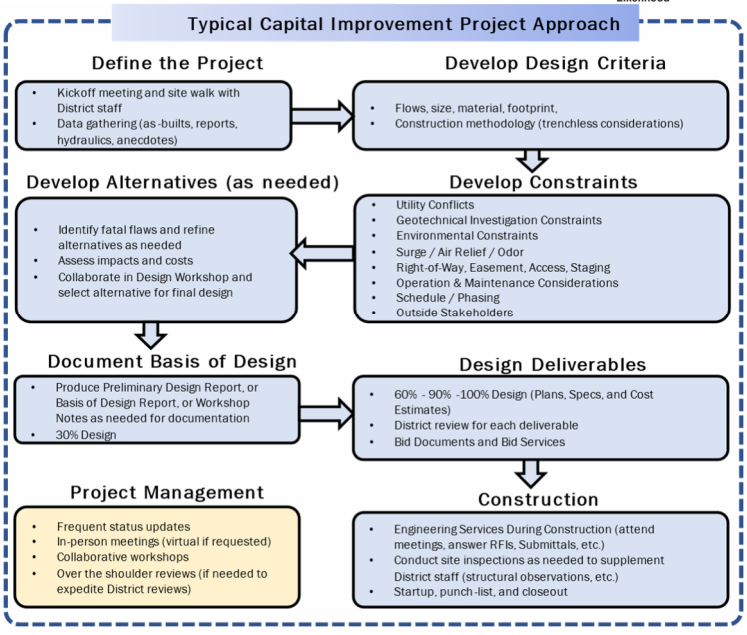


Project Planning and Capital Improvement Projects

Planning phase starts with understanding of the existing structure. Water Works will meet with the City staff to understand the ultimate goals for improving existing infrastructure. Water Works can efficiently create preliminary studies, maps, and calculations to support the City's upcoming needs. With our full depth and breath of understanding of water and wastewater subject matter we can address nay needs and goals the City may have.



Our successful implementation of Capital Improvement Projects (CIPs) is also informed by understanding the work that went into developing the projects. We have developed and updated master plans, ran condition assessments, reviewed CCTV, and developed asset management programs. We have also developed numerous collection system and distribution system hydraulic models and master plans.



Our understanding of the entire procurement process allows us to ensure that we properly understand how to optimize and apply each CIP with the right input from capital, planning, and Operations and Maintenance (O&M) staff. Our approach is always tailored to fit the nuances of the project but is centered upon active communication and collaboration with the City. We do not silo our engineering process, and it is important for us that the City is engaged as decision makers and the individuals who understand their system the

best. A typical Water Works approach to a Capital Improvement Project is displayed in the following figure.

Groundwater Treatment

Water Works Engineers' highly skilled and qualified professionals have been involved in over 200 groundwater contaminant treatment projects. Since the beginning of the firm, groundwater treatment has been one of our core competencies. Our staff have conceptualized, designed, and overseen construction, start-up, and operational optimization for dozens of cost-effective groundwater treatment facilities across the West. We understand the complexities of groundwater treatment for both organic and inorganic contaminants as well as the implications of various treatment approaches on waste disposal, general water quality, corrosion control, and disinfection byproduct formation in distribution systems. Our considerable knowledge and experience in the study and treatment of challenging groundwater supplies with complex water quality issues has allowed us to pride ourselves on our ability to design and implement cost effective treatment systems that treat/remove multiple co-occurring groundwater contaminants while minimizing maintenance costs and operational "headaches".

Surface Water Treatment

We have engineered water systems for surface water systems throughout the western United States, including New Mexico, Arizona, and California. We have a wide array of experience when it comes to the following challenges associated with surface water treatment:

- Department of Public Health permitting assistance
- Treatment of eutrophic sources with prolific algal blooms and associated challenges
- Treatment of high turbidity sources impacted by colloidal clays.
- Chemical pretreatment selection and optimization
- Filtration performance assessment and optimization
- Disinfection byproduct formation minimization
- Taste and Odor Control
- UV Disinfection
- Recycling of residuals dewatering water

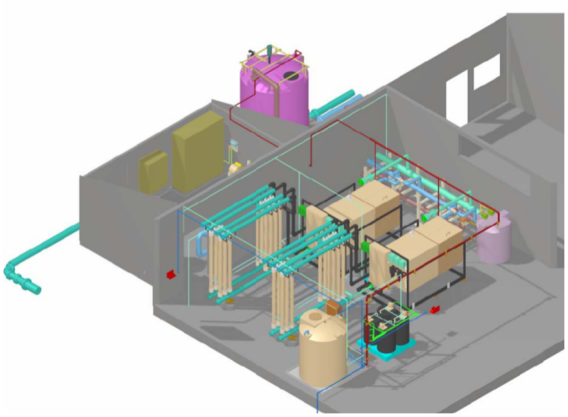
Our team pulls from experiences on these projects to develop the most effective treatment process for your systems.

Water and Wastewater Treatment Process Design

Water Works Engineers has designed several water and wastewater treatment plants that are successfully operating. We are experienced and adept in all facets of water and wastewater treatment process design, including:

- Identification of the most appropriate and cost-effective treatment process for the client's needs
- Selection of treatment processes, technologies, and equipment

- Process BioWin modeling and calibration
- Optimal sizing of the treatment system's components
- Specification, layout and optimization of the equipment, piping, valving, and instrumentation
- Coordination of mechanical design with process & instrumentation diagrams and electrical requirements
- Development of treatment process control narratives, control loop descriptions and operating guidelines



Water Works selects and designs treatment processes that reliably meet or exceed treatment goals and are easily operated by treatment plant staff while minimizing capital and O&M costs.

3-Dimensional CADD Modeling, Revit, and BIM 360

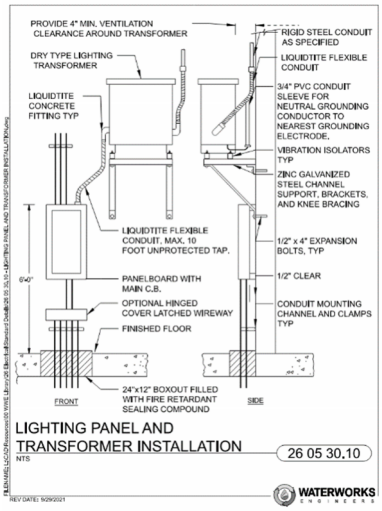
We have capabilities to perform detailed design using 3-dimensional CADD tool and combine those with Revit/BIM 4D building information modeling application capable with tools to plan and track various stages in the building's lifecycle, from concept to construction and later maintenance and/or demolition. This is our standard practice and leads to better coordination, integrated cross-checking, and clearer contract documents. The 3-dimensional CADD Model also functions as an invaluable communications tool, allowing better and more thorough visualization of the finished product at every stage of design, bidding, and construction. Production of 3-dimensional PDF files allow project team members anywhere in the world to view the CADD model and review a 3-dimensional image of the facility during any stage of the design process.

The 3-dimensional CADD models provide a clear understanding of facility geometry, access and clearance issues, and overall system functionality, help bidding contractors quickly understand the project, expedite the bidding process, and help on site construction and inspection personnel quickly familiarize themselves with the facility.

Structural, Mechanical, and Site Design

Whether we are designing a well booster station, sewer lift station, or a treatment plant component, our civil, mechanical, and structural designers and engineers work closely in developing the site layout and necessary components for robust O&M procedures. This includes buildings, drainage and grading, utilities, electrical, retaining walls, parking lot, access roads and bending radius of utility trucks, fences and gates, security measures, fuel and chemical storage, odor control, onsite generator, as well all other components required for robust O&M procedures.

Electrical, Control, and SCADA

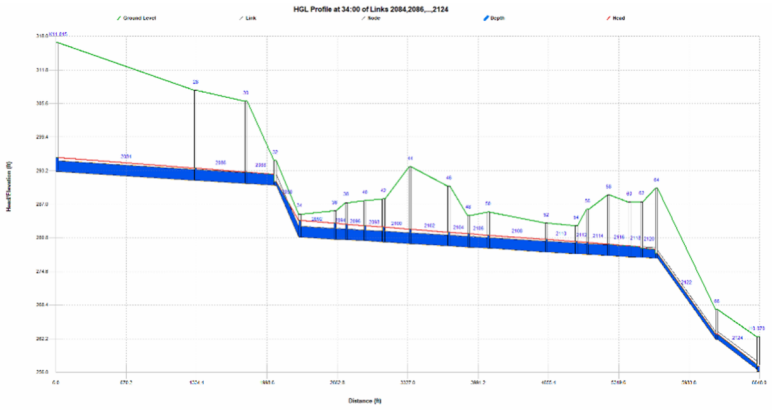


Water Works Engineers provides Electrical, Instrumentation & Control (I&C), as well as Supervisory Control and Data Acquisition (SCADA) services for all projects we are involved with. We have an extensive library of standard details and specifications that we can quickly use to supplement the City's standard in any project. In addition, we can team up with any trusted subconsultants, that may have better local knowledge, if recommended by the City.

Infrastructure Computer Network Analysis

Water Works has an extensive familiarity with the industry standard water and wastewater computer modeling software packages, including but not limited to InfoSewer, InfoWater, and InfoWorks ICM. For instance, the City's sewer hydraulic model in Innovyze InfoSewer has been discontinued by Innovyze and its parent company AutoDesk and every agency or consultant with an existing license is unable to renew whenever their individual licenses expire in 2024.

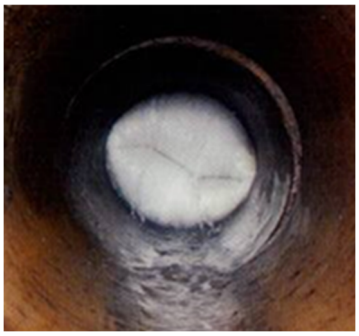
It is anticipated that Innovyze will push for the City to upgrade at significant subscription-based cost to the non-ArcGIS Innovyze InfoWorks ICM (assuming the City owns and operates its existing sewer hydraulic model). This is a very robust software with integrated storm 2D surface modeling features that is not needed by most users. InfoWorks ICM is a standalone program and does not have any connectivity to ArcGIS databases. It is our opinion that there is a significant benefit to maintaining a sewer hydraulic model within an ArcGIS environment and Water Works could do so with Aquanuity AquaTwin Sewer, which is a streamlined and lower cost alternative to InfoWorks ICM. Currently there is tremendous pressure on current InfoSewer license holders to the get their sewer models imported into a new software as soon as possible and there is very limited information and upgrades processes to do so. Water Works is assisting several clients with this exact transition and has developed an approach and procedures to import and validate existing sewer models, be it Innovyze InfoWorks ICM or Aquanuity AquaTwin Sewer. We look forward to discussing this with you and developing the right tactic for the City, whether the City is interested in purchasing the select software and maintaining the model in house, or tasking that to an experienced Consultant like Water Works.



Pipe Rehabilitation/Replacement and Trenchless Construction

Our team specializes in water and wastewater infrastructure condition and capacity assessment; rehabilitation and replacement recommendations; capital improvement project planning and prioritization; and the rate studies and financial planning to support these programs. Our assessment projects include CCTV, manhole and lift station inspections; energy audits; flow monitoring; smoke and dye testing; C-factor testing; hydrostatic and ultrasonic leak detection; fire hydrant flow testing; and water quality sampling and flushing.

Our use of performance-based specifications allows us to competitively bid traditional versus trenchless construction methods against one another, often resulting in cost savings to our clients. Water Works has worked with our geotechnical firms to develop an approach that ensures we have the subsurface information to select the appropriate construction method and specify mitigation measures to ensure success. Our trenchless project experience includes horizontal directional drilling, auger bore and jack, micro-tunneling, pipe-bursting, pipe-reaming and -ramming, Cured-in-Place Pipe (CIPP), Spiral Wound Pipe Liner (SWPL), sliplining, and spray applied coatings, as well as structural rehabilitation of wet wells, manholes, and other structures. We have valuable past project experience to draw on for any project assigned to us.



Collection System Management, Operations, and Maintenance Assistance

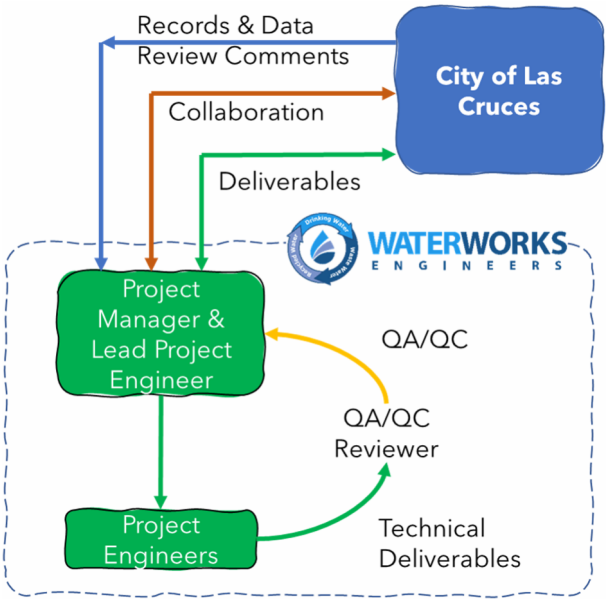
Water Works offers proven experience in asset management; operation and maintenance program development; water quality assessment, and regulatory compliance. Some of our expertise in this area includes:

- Facility Operation and Maintenance (O&M) Manuals
- Lift Station and Manhole Inspections
- Closed Circuit Television Inspection (CCTV)
- Standardized Defect Coding (PACP, MACP, LACP)
- Construction Methodology Analysis
- Life-Cycle Cost Analysis / Business Case Review
- Predictive Asset Failure Modeling
- Standardized Specifications
- Water and Sewer Ordinances
- System Mapping/GIS Data Integration
- Computerized Maintenance Management Systems (CMMS)
- Field Data Information Management
- Odor / Corrosion Control Programs
- Biosolids and power generation
- Sewer Hydraulics and Modeling
- Flow Monitoring
- Infiltration and Inflow Assessment
- Smoke and Dye Testing
- C-Factor Testing
- Hydrostatic / Ultrasonic Leak Detection
- Hydrant Flow Testing
- Water Quality / Flushing Programs
- Overflow & Emergency Response Plans
- Standardized O&M Procedures (SOPs)
- Fats, Oils & Grease Control Programs
- Public Outreach / Notification Programs

Regulatory, Permitting, and Funding Assistance

Water Works team has a wide range of experience working with state or federal agencies through the western United States. With respect to permitting, our team has a successful history and relationship with local, state, and federal agencies over the years. With our full depth and breadth understanding of the Western water needs, we can quickly establish connections to help fast track any regulatory, permitting, or funding assistance the City may need.

Project Management, QA/QC, and Schedule



At Water Works, we believe and insist that our Project Managers (PM) have an in-depth involvement and contribute towards the technical execution of projects they manage. They are not only aware and responsible for project management tasks and functions but *are involved and integrated into the design decision making process at all levels with all disciplines.* This significantly differentiates us from other firms. Quality, budget, and schedule performance are all optimized when technical issues are identified and resolved as early as possible in the project delivery process. A cornerstone of our Quality Control philosophy, and our work philosophy in general at Water Works is that senior staff are integrally involved with the development of all deliverables, and that junior level staff are not left to produce a majority of the work without hands-on involvement and mentoring from our highly experienced staff. Junior level staff perform tasks that are appropriate for their level of experience which helps improve the cost efficiency of our work, but are not thrown in "over their heads", which is a common root cause of projects that go "off the tracks".

All technical work products are reviewed with the Quality Assurance/Quality Control (QA/QC) Reviewer in an internal workshop setting prior to finalizing Project Deliverables. The QA/QC Reviewer for this project will be involved on a daily basis, to "check in" on the work and ensure that key client concerns and over-arching project requirements are addressed throughout the project execution. Our project managers will work with the City's project managers to develop specific project schedules. These projects will be created using the Critical Path Method (CPM) and will be frequently updated and submitted at each project milestone. In addition, we will include review periods, typically 2 weeks, at each deliverable, followed by a review workshop opportunity, where we sit down with the City's staff to hear your feedback.

ID	Task Mode	Task Name	Duration	Start	Finish
1		Task Order Submittal	0 days	Fri 2/9/24	Fri 2/9/24

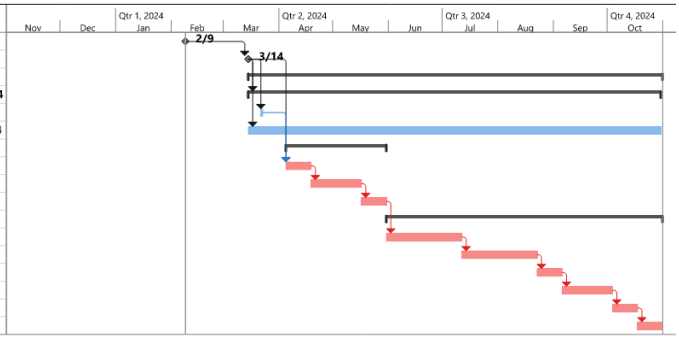
14		Review period	10 days	Fri 8/23/24	Thu 9/5/24
15		100% Deliverable	20 days	Fri 9/6/24	Thu 10/3/24
16		Review period	10 days	Fri 10/4/24	Thu 10/17/24
17		Construction documents	10 days	Fri 10/18/24	Thu 10/31/24



Construction Support and Startup

Water Works has extensive experience in construction inspection, contract administration, office services during construction (review of Contractor submittals, Requests for Information, Requests for Change, etc.), final inspection and punch-list, and record drawing production. We offer these services either in a traditional Design, Bid, Build environment, or in conjunction with alternative delivery methods. Also, we provide start-up planning, operator training, process start-up support,

loop-tuning support, regulatory compliance testing and reporting, and troubleshooting of existing processes. We get our hands dirty and work by your side to get new systems operating properly, or make existing systems work better, keep projects on-schedule, on-budget, and high quality. Our services range from pressure testing, disinfection, to startup and producing O&M manuals for large treatment facilities.

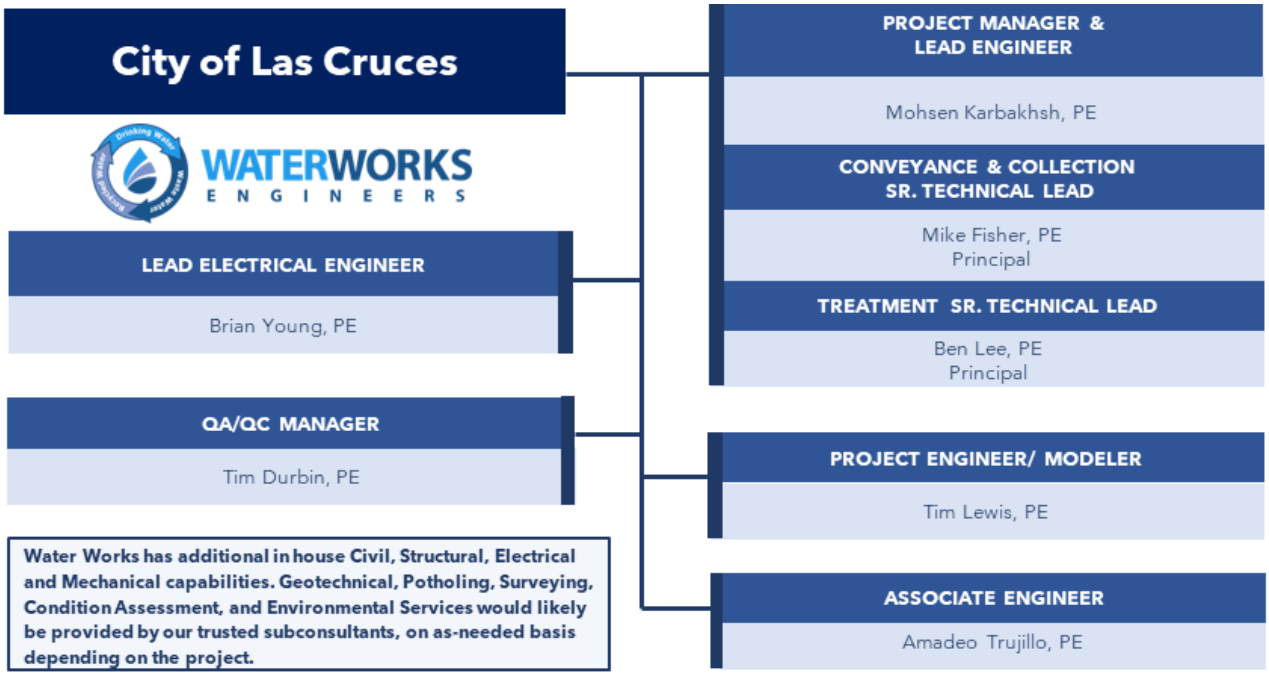
Other Tasks

Water Works will perform the majority of the required task by the City in house, however, there are a few tasks that are outside of our specialties, including but not limited to environmental studies, solids waste management, survey, as well as geotechnical assessments. In order for us to provide our established high-quality services, it is important for us to stay focused on our specialized technical services. This means we need to rely on subconsultants to provide us necessary support in other areas, upon approval of the City.

Evaluation Criteria No. 2 – Qualifications/Competence

Key Personnel

The core of the project team, and most critical to any project's success, is the Project Manager. In this instance, Mohsen Karbakhsh, P.E. will serve as Project Manager and Lead Project Engineer. Tim Lewis, P.E. will serve as Project Engineer and Amadeo Trujillo, P.E., as our Associate Engineer. Our team will be supported by Mike Fisher, P.E as Sr. Technical Lead for collection and conveyance systems (and Principal-in-Charge), as well as Ben Lee, P.E., as our Sr. Technical Lead in treatment systems, also as Principal-in-Charge. Brian Young, P.E., will be our Sr. Electrical and Control lead. Tim Durbin, P.E., will serve as our QA/QC manager as needed. The core design team at Water Works is shown in the organizational chart below.



Mohsen Karbakhsh, Ph.D., PE
Lead Project Engineer/Project Manager
NM PE – 27062 Civil
CA PE – 91008 Civil
PACP/MACP/LACP

Availability: 75%
Areas of Competence
Water and Wastewater Treatment
Distribution and Collection System Modeling
Groundwater treatment and distribution

Mohsen is a civil/environmental professional engineer who lives and works locally in our Albuquerque office. Mohsen has over 9 years of experience, as well as 3 years of research experience at the New Mexico State University, where he worked on pilot scale algal bioreactors at the Jacob Hands WWTP. Mohsen's experience ranges from developing O&M manuals for existing treatment facilities, to hydraulic and process modeling (Fathom, SewerCAD, BioWin, InfoWater, InfoSewer, InfoWorks ICM), GIS , condition assessment, funding, planning, design, bid, and construction of various water/wastewater treatment and infrastructure systems.

Mohsen will be the single point of contact for Water Works. The City of Las Cruces will see a familiar face who will carry the project and maintain continuous institutional knowledge. He will be committed from start to finish, working closely with City of Las Cruces, our New Mexico staff, subconsultants, and regulatory agencies, and will ensure all parties are updated accordingly. Not only will Mohsen be providing project leadership and direction, he also will be responsible for technical execution of much of the work. He will be assigning the right mix of individuals with specific experience for each type of project.

Senior Technical Lead in Distribution and Collection System

Mike is a managing partner of Water Works Engineers with 27 years' experience and leads our Linear Infrastructure Design Group. He is proficient in hydraulic modeling; GIS; existing infrastructure condition/capacity assessment; preparation of plans and specifications; cost estimation; right-of-way assessment; and permitting assistance. Mike's experience in hydraulic analysis ranges from small 10-mile gravity only systems, to over 5,000-mile pressure and gravity systems splitting flow between multiple treatment plants that are cross-connected for redundancy. His "hands-on" approach to design, attention to detail, and exceptional communication skills are what make his projects successful.

Ben Lee, P.E.

Areas of Competence
Senior Technical Lead in
Water and Wastewater Treatment

Ben has 20 years of experience in civil and environmental engineering projects that have focused on the planning, optimization and design of water treatment and pumping facilities. As a managing partner with Water Works for the last 16 years, Ben has led our Treatment and Water Quality Design Group and is an expert in treatment technologies and design for surface and groundwater as well as water reuse system design. His work includes providing technical assistance, assuring inspection data was correctly documented and confirming compliance to all specifications and procedures as a project manager and quality assurance/quality control manager. Ben specializes in process design with conventional sedimentation, ballasted sedimentation, dissolved air flotation, and membrane filtration.

Brian Young, P.E.
Lead Electrical Engineer
AZ PE – 52847
CA PE – E20743
UT PE – 8841511-2202

Areas of Competence
Quality Assurance/Quality Control

Tim is a civil/environmental engineer with 20 years of experience in the field of water and wastewater treatment and pumping systems. He started his career doing advanced research in wastewater chemistry, with a focus on strategies to minimize the formation of disinfection by-products. He has since applied his knowledge of chemistry and treatment processes to the design of water and wastewater treatment facilities. Mr. Durbin has worked on projects in California and other Western states related to treatment facility design, pumping of water and wastewater, chlorination, energy recovery, and chemical storage and feed system design. He currently serves as Quality Assurance Manager, where he oversees QA/QC procedures and technical reviews for projects across the firm.

Water Works Engineers has been providing on-call professional engineering services to New Mexico Water Service Company (NMW, or New Mexico Water) since 2014. New Mexico Water serves about 21,000 people through 10,500 water and wastewater service connections in its Rio Communities, Rio Del Oro, Meadow Lake, Indian Hills, Squaw Valley, Elephant Butte, Sandia Knolls, Juan Tomas, Cypress Gardens, and Morningstar systems.

Water Works has been involved with various past and ongoing water and wastewater on-call tasks for NMW, including the Rio Del Oro Wastewater Treatment Plant (WWTP) evaluations and upgrades. The WWTP is a Membrane Bioreactor (MBR) system with 300,000 gallons per day of Class 1A Reuse Water effluent that had high total nitrogen effluent events in the past. Water Works assisted NMW in providing engineering recommendations and modifications to achieve full nitrification at the plant. Currently, Water Works is assisting the NMW to address various upcoming collection systems and treatment tasks, including effluent monitoring well mapping, as well as collection system and WWTP master plan updates.

Additionally, Water Works is currently working with NMW on a few upcoming projects for improving the existing water distribution and storage system within the Rio Del Oro community.

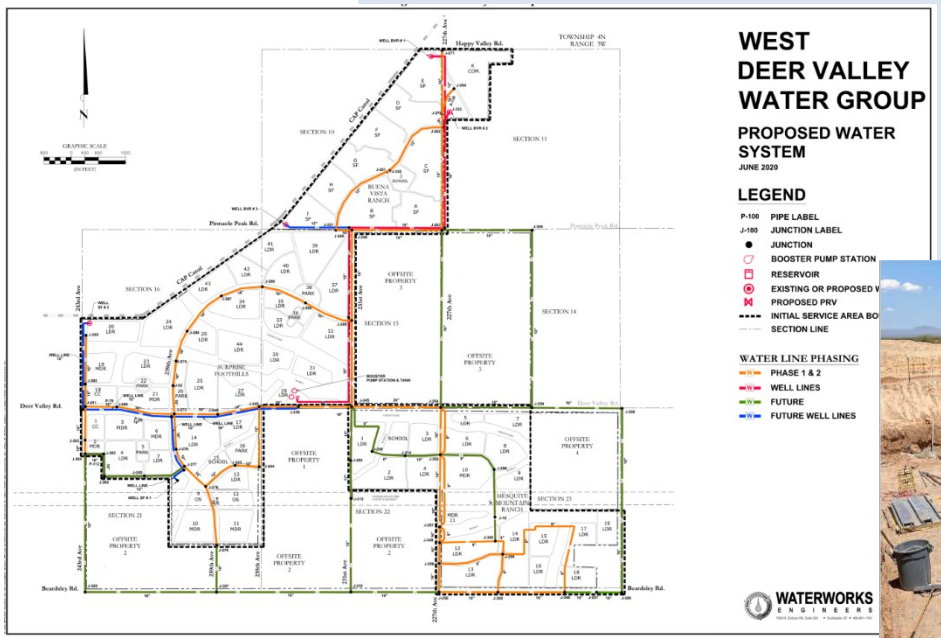
WaterWorks was hired in 2008 to conduct water system master planning and first phase design and construction administration services for a water facility and two remote well sites for three master planned communities in west Surprise, AZ. The total land area contained within this master plan was 3,800 acres. These developments comprised largely of residential, commercial, and light industrial land uses. Overall, more than 11,000 equivalent dwelling units were considered in the master planning of this area. After several revisions to the conceptual design, new City standards, changes in the development and a changing ownership group, construction of the facilities started in 2022 and reach substantial completion in July 2023.

The master plan addressed the pumping, treatment, storage and distribution of the potable water for this area. It also included extensive involvement in the development agreement process, City/Developer partnering and frequent updates as new developments are proposed in what was called “offsite” service areas. These areas were included in the planning of the service area but were undefined at the onset of the project. WaterWorks has also been retained to manage the cost allocation of the facilities and absorption as new/additional developments request water from this developer group.



Water Reclamation Facility Offsite Pipelines and Pump Station Project

Work Completed by WWE:

90%

Water Works provided design and engineering services during construction City of Morro Bay Water Reclamation Facility Offsite Pipelines and Pump Station Project and Recycled Facilities Project.

The project included over 15 miles of 12” and 16” forcemains, 16” to 20” outfall pipelines, 8” recycled water pipeline, 4” fiber optic conduit, and water pipeline relocations. The project also includes a 115-LF elevated pipe bridge over Morro Creek, a 60” bore and jack crossing under Willow Camp Creek, and a 60” casing microtunnel crossing of the City’s busiest traffic circle intersection. The selected alignment includes multiple parallel and transverse Caltrans encroachment permitting for Highway 1. Water Works provided assistance with all permitting and right-of-way, encroachment and easement procurement.

The project also included design of one 6 MGD / 50-ft TDH / 60HP and one 8 MGD / 280-ft TDH / 250-HP triplex wet pit submersible pump stations. Site improvements included 30’ deep wet wells with emergency overflow capacity; MCC, SCADA, and electrical building with restroom amenities; outdoor sound attenuated diesel driven emergency generator; odor control; and by-pass pumping connections. The work also includes the retrofit of two existing sewer lift stations and realigning the forcemains.

The work also includes the ongoing design of 4 injection wells, 2 new extraction wells, and the retrofit of 3 existing extraction wells for the City’s new recycled water facility program which will utilize the indirect potable reuse purified water from the WRF project.

This project was completed on schedule and within budget.

CITY OF LAS CRUCES

PROJECT ASSIGNMENT AGREEMENT

23-24-052 UTILITIES ENGINEERING SERVICES

PROJECT NAME

Pursuant to terms and conditions of City of Las Cruces (CITY) Contract No. 23-24-052 dated June 1, 2024 between the CITY and Water Works Engineers, LLC (ENGINEER), as amended and incorporated herein by reference, the City and Contractor hereby agree on this _____ day of _____, 20___, as follows:

1. In a satisfactory and proper manner, the ENGINEER shall perform SERVICES as proposed in response to the CITY's RFP No. 23-24-052 and ENGINEER's proposal as set forth in ATTACHMENT A attached hereto.

2. The estimated completion date is number days after a Notice to Proceed is issued by the CITY to the ENGINEER.

3. In consideration for the satisfactory completion of the work agreed to herein, compensation shall be made in the amount of $dollars.cents, plus NMGRT. Invoices issued by the ENGINEER shall be made monthly / upon completion of project with payment by the CITY being made within 30 days upon receipt of undisputed invoice.

EXHIBIT "N"

CITY OF LAS CRUCES

PROFESSIONAL SERVICES AGREEMENT

THIS AGREEMENT, made and entered into on this _____day of _____, 2024 by and between the City of Las Cruces, New Mexico, hereinafter called "CITY" and Wilson & Company, Inc., Engineers & Architects, of 414 N. Main St, Ste A, Las Cruces, NM, 88001, hereinafter called "CONTRACTOR".

1. PROJECT DESCRIPTION
Utilities Engineering Services on an as needed basis via Project Assignment Agreements (Attachment "A") during the term of this AGREEMENT.

2. SCOPE OF SERVICES
In a satisfactory and proper manner, the CONTRACTOR shall perform SERVICES, as proposed in response to the CITY'S RFP No. 23-24-052, as set forth in Exhibit A, attached hereto and made a part of this Agreement.

The CONTRACTOR is authorized to extend the same terms and conditions of this Agreement to other governmental entities conditioned upon the procurement laws and regulations of those entities. The CITY shall not be a party nor have any liability relating to such extensions.

3. APPROPRIATIONS
The terms of this Agreement are contingent on sufficient appropriations and authorization being made by the City Council for the performance of this Agreement. If sufficient appropriations and authorizations are not made by the City Council, this Agreement shall terminate upon written notice given by the CITY to CONTRACTOR. The CITY'S decision as to whether sufficient appropriations and authorizations exist shall be accepted by CONTRACTOR and shall be final.

4. COMPENSATION
The CITY shall compensate CONTRACTOR for the performance of SERVICES under this Agreement an amount agreed to for each assigned project, plus applicable taxes. CONTRACTOR shall perform the SERVICES upon receipt of a purchase order or written Notice to Proceed for each assigned project from the CITY. The CITY cannot authorize costs to be incurred prior to such written Notice to Proceed. CONTRACTOR shall submit invoices upon completion of the project. CITY shall pay invoices Net 30 days upon receipt of undisputed invoice.

CONTRACTOR is responsible for payment of State of New Mexico Gross Receipts Tax levied on the amounts payable under this Agreement. CONTRACTOR agrees to comply with all federal and state tax payments and report all items of gross receipts as income from the operations of its business.

5. DEVOTION OF ADEQUATE TIME
CONTRACTOR will devote the necessary hours each week to the performance of projects that are required by the CITY and it will serve the CITY diligently and faithfully,

and according to its best ability in all respects and will promote the best interests of the CITY.

6. TERM AND SCHEDULE
This Agreement shall become effective on June 1, 2024 for a term of 5 years through May 31, 2029.

CONTRACTOR shall perform the SERVICES in accordance with the time set forth as agreed upon by the CITY and CONTRACTOR and as agreed to for each project assigned under the terms of this Agreement.

7. EXTENSIONS, CHANGES, AND AMENDMENTS
This Agreement shall not be extended, changed, or amended except by instrument in writing executed by the parties. The CITY shall not be liable for payment of any extra services nor shall CONTRACTOR be obligated to perform any extra services except upon such written agreement. Such written approval shall indicate the date said extension, change, or amendment is effective and shall be signed by the parties to this Agreement. In the event that the parties cannot reach agreement as to a particular change, the issue shall be resolved pursuant to Article 21.

8. CHANGES AND EXTRA SERVICES BY THE CITY
The CITY may make changes within the general scope of the SERVICES plus may also request CONTRACTOR to perform other extra services not incorporated within the Services set forth in this Agreement. If the CONTRACTOR is of the opinion that such change causes an increase or decrease in the cost and/or the time required for performing the changes or other services required by the City, CONTRACTOR shall so notify the CITY of that fact within five (5) business work days from the date of receipt of change by the CITY. The CITY shall provide written response to the CONTRACTOR within five (5) business work days from the date of receipt of CONTRACTOR'S written notification.

9. CHANGES AND EXTRA SERVICES BY THE CONTRACTOR
In the event a condition is identified by the CONTRACTOR which, in the opinion of the CONTRACTOR, changes the services, costs, and/or time required for performance under this Agreement, the CONTRACTOR shall provide written notification to the CITY within five (5) business work days of such identification. The CITY shall respond in writing to such notification within five (5) business work days from the date of receipt of CONTRACTOR'S notification.

10. DELAYS
In the event that performance of SERVICES is delayed by causes beyond reasonable control of CONTRACTOR, and without the fault or negligence of CONTRACTOR, the time and total compensation for the performance of the SERVICES may be equitably adjusted by written agreement to reflect the extent of such delay. CONTRACTOR shall provide the CITY with written notice of delay pursuant to Article 9 including therein a description of the delay and the steps contemplated or actually taken by

CONTRACTOR to mitigate the effect of such delay. The CITY will make the final determination as to reasonableness of delays.

11. TERMINATION
This Agreement may be terminated by either party hereto upon fifteen (15) calendar days written notice in the event of substantial failure by the other party to perform in accordance with the terms of this Agreement through no fault of the terminating party. This Agreement may also be terminated by the CITY for its convenience or because the PROJECT has been permanently abandoned, but only upon fifteen (15) calendar days written notice to CONTRACTOR.

In the event of termination, CONTRACTOR shall be compensated for all services performed and costs incurred up to the effective date of termination for which CONTRACTOR has not been previously compensated.

Upon receipt of notice of termination from the CITY, CONTRACTOR shall discontinue the SERVICES unless otherwise directed and upon final payment from the CITY deliver to the CITY the required number of copies of all data, drawings, reports, estimates, summaries, and such other information and materials as may have been accumulated by CONTRACTOR in the performance of this Agreement, whether completed or in process.

12. RECORDS AND AUDITS
CONTRACTOR will maintain records indicating dates, length of time, and services rendered. The CITY has the right to audit billings both before and after payment, and contest any billing or portion thereof. Payment under this Agreement does not foreclose the CITY'S right to recover excessive or illegal payments. CONTRACTOR will retain records for five (5) years after the completion of the project.

13. DISCLOSURE AND OWNERSHIP OF DOCUMENTS, PRODUCTS, DESIGN, ELECTRONIC FILES
All technical data, electronic files, and other written and oral information not in the public domain or not previously known, and all information, electronic files, and data obtained, developed, or supplied by the CITY will be kept confidential and CONTRACTOR will not disclose to any other party, directly or indirectly, without the CITY'S prior written consent unless required by lawful order.

All technical data, electronic files, products developed, operational parameters, blueprints, and other information and work of the CONTRACTOR shall be the sole property of the CITY and shall be delivered to the CITY when requested and at the end of the Agreement.

14. INDEPENDENT CONTRACTOR
CONTRACTOR represents that it has, or will secure, at its own expense, all personnel required in performing the SERVICES under this Agreement. Such personnel shall not be employees of, nor have any contractual relationship with the CITY. CONTRACTOR,

consistent with its status as an independent contractor, further agrees that its personnel will not hold themselves out as, nor claim to be officers or employees of the CITY by reason of this Agreement.

To the extent that CONTRACTOR employs any employees, CONTRACTOR shall be solely responsible for providing its own form of insurance for its employees and in no event shall CONTRACTOR's employees be covered under any policy of the CITY.

CONTRACTOR'S retention hereunder is not exclusive. Subject to the terms and provisions of this Agreement: (i) CONTRACTOR is able, during the Term hereof, to perform services for other parties; and (ii) CONTRACTOR may perform for its own account other professional services outside the scope of this Agreement.

CONTRACTOR is and shall be an Independent Contractor and shall be responsible for the management of its business affairs. In the performance of the work under this Agreement, CONTRACTOR will at all times be acting and performing as an Independent Contractor, as that term is understood for federal and state law purposes, and not as an employee of the CITY. Without limitation upon the foregoing, CONTRACTOR shall not accrue sick leave, jury duty pay, retirement, insurance, bonding, welfare benefits, or any other benefits, which may or may not be afforded employees of the CITY. CONTRACTOR will not be treated as an employee for purposes of: Workers' Compensation benefits; the Federal Unemployment Tax Act; Social Security; other payroll taxes, federal or any state income tax withholding; or the employee benefit provisions described in the Internal Revenue Code of 1986, as amended. Neither the CITY, nor its agents or representatives, shall have the right to control or direct the manner, details or means by which CONTRACTOR accomplishes and performs its services. Nevertheless, CONTRACTOR shall be bound to fulfill the duties and responsibilities contained in the Agreement.

15. NO JOINT VENTURE OR PARTNERSHIP

Nothing contained in this Agreement shall create any partnership, association, joint venture, fiduciary or agency relationship between CONTRACTOR and CITY. Except as otherwise specifically set forth herein, neither CONTRACTOR nor CITY shall be authorized or empowered to make any representation or commitment or to perform any act which shall be binding on the other unless expressly authorized or empowered in writing.

16. ASSIGNMENT

CONTRACTOR shall perform all the services under this Agreement and shall not assign any interest in this Agreement or transfer any interest in same or assign any claims for money due or to become due under this Agreement without the prior written consent of the CITY.

17. INSURANCE
CONTRACTOR shall obtain and maintain insurance at its own cost and expense during the life of this Agreement, and shall require Subcontractors, if any, to maintain during the life of his subcontract:

1. Commercial General Liability Insurance
   a. $1,000,000 per occurrence / $2,000,000 aggregate
   b. Coverage must include premises and operations, products and completed operations, and personal and advertising injury.
   c. The City of Las Cruces must be named as an Additional Insured for all coverages listed above on endorsements acceptable to the City.
   d. Coverage must be primary and non-contributory.
   e. Coverage must be per project or per location.
   f. Coverage must be on an occurrence form.
   g. Subrogation must be waived.
2. Commercial Auto Liability
   a. $1,000,000 per occurrence
   b. Coverage must be for “owned, leased, hired, and non-owned autos” or “any autos.”
3. Workers’ Compensation and Employers Liability
   a. Statutory Limits
   b. Employer liability – $1,000,000 each accident, $1,000,000 each employee by disease, $1,000,000 policy limit
   c. Subrogation must be waived.
4. Professional Liability: $1,000,000 per claim

Endorsements for additional insured coverage and waivers of subrogation must be provided as a condition of this Agreement and shall be noted on the certificate.

CONTRACTOR shall furnish the CITY with a certificate(s) of insurance showing CONTRACTOR and Subcontractors, if any, have complied with this Article. The CONTRACTOR shall provide insurance certificates before work is to start on the project and shall provide the CITY thirty (30) days written notification of cancellation of such policies.

18. INDEMNITY AND LIMITATION
CONTRACTOR shall indemnify, defend, and hold harmless the CITY from and against any and all claims, suits, actions, judgments, demands, losses, costs, expenses, damages, and liability caused in whole or in part by, resulting in whole or in part from, or arising in whole or in part out of the negligent acts, errors, or omissions of CONTRACTOR, its officers, employees, agents, or representatives in the performance of SERVICES under this agreement.

19. APPLICABLE LAW
This Agreement and the rights and obligations of the parties shall be governed by and construed by the laws of the State of New Mexico applicable to Agreements between

New Mexico parties made and performed in that state, without regard to conflicts of law principles. Venue shall be in the Third Judicial District, State of New Mexico.

CONTRACTOR shall abide and be governed by all applicable state law, CITY ordinances, and laws regarding the CONTRACTOR'S services or any work done pursuant to this Agreement, including anti-discrimination.

20. BREACH
In the event CONTRACTOR breaches any obligation contained in this Agreement, prior to instituting any action or dispute resolution procedure, the CITY shall give CONTRACTOR written notice of such breach. In the event CONTRACTOR fails to remedy the breach within five (5) working days of receiving such written notice, the CITY, at its sole discretion, without any obligation to do so and in addition to other remedies available under applicable law, may remedy CONTRACTOR'S breach and recover any and all costs and expenses in so doing from CONTRACTOR.

21. DISPUTE RESOLUTION
In the event that a dispute arises between CITY and CONTRACTOR under this Agreement or as a result of breach of this Agreement, the parties agree to act in good faith to attempt to resolve the dispute.

22. NOTIFICATION
All notices required or permitted under this Agreement shall be in writing and shall be deemed sufficiently served if served by Registered Mail addressed as follows:

TO CITY:	City of Las Cruces PO Box 20000 Las Cruces, NM 88004 ATTENTION: Tony Trevino
With Copies to:	City Attorney Purchasing Manager
TO CONTRACTOR:	Wilson & Company, Inc., Engineers & Architects 414 N. Main St, Ste A Las Cruces, NM 88001 ATTENTION: Edward Cordova

23. SCOPE OF AGREEMENT
This Agreement incorporates all of the agreements, covenants, and understandings between the parties hereto concerning the subject matter hereof and that all such covenants, agreements, and understandings have been merged into this written agreement. No prior agreement or understanding verbal or otherwise of the parties or their agents shall be valid or enforceable unless embodied in this agreement.

24. SEVERABILITY
The parties agree that each provision of this Agreement is severable and the invalidity or unenforceability of any one or more of the provisions of this Agreement shall not affect the validity or enforceability of any other provision of this Agreement, and this Agreement shall be construed in all respects as if such invalid or unenforceable provisions were omitted.

25. CONFLICT OF INTEREST
CONTRACTOR represents and warrants that CONTRACTOR has no business, professional, personal, or other interest, including, but not limited to, the representation of other clients, that would conflict in any manner or degree with the performance of its obligations under this Agreement. If any such actual or potential conflict of interest arises under this Agreement, CONTRACTOR shall immediately inform the CITY in writing of such conflict. If, in the reasonable judgement of the CITY, such conflict poses a conflict to and with the performance of CONTRACTOR'S obligations under this Agreement, or is otherwise a violation of the CITY'S current policy or ordinances, then the CITY may terminate the Agreement immediately upon written notice to CONTRACTOR; such termination of the Agreement shall be effective upon the receipt of such notice by CONTRACTOR.

EXHIBIT A
SERVICES

A. Project Assignments
A Project assignment is initiated by the City providing the selected Engineer a detailed project description, including scope of work and any other special instructions needed by the Engineer to prepare items such as preliminary and final cost estimates, complete project plans and specifications, project reports, and other related engineering services. The awarded Engineers shall provide engineering services that may include but not be limited to, the following:
1. Computer network analyses for water, wastewater, and gas systems; design of water, wastewater, and gas utility systems; well house design; Supervisory Control and Data Acquisition (SCADA); water treatment process; master planning; feasibility studies; solid waste studies; land use permitting; subsurface utility exploration; boundary/easement survey; and National Pollutant Discharge Elimination System (NPDES) & Stormwater Pollution Prevention Plan (SWPPP) compliance.
2. Electrical design (wells, booster stations, lift stations, odor control stations, building electrical system design)
3. Computer network analysis for Gas (GasWork), Water (InfoWater), and Wastewater (InfoSewer). The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility
4. Solid waste studies, landfill system design and analysis
5. Environmental surveys, assessments monitoring and management, such as indoor air quality, asbestos, mold, and other related services for the City
6. Geotechnical Assessments, such as soil and groundwater testing for contamination and remediation, and other related services for the City
7. Expert witness in a judicial and/or quasi-judicial setting.
8. Project Management
9. Construction Inspection.

B. Project Assignment Agreements
A Project Assignment Agreement (a template of which is incorporated herein as ATTACHMENT “A”) will be negotiated and executed on a case-by-case basis for each specific project, and will include a cost proposal from the Engineering firm(s) proposing to do the work. The cost proposal may utilize one of the following pricing formats:
1. Lump Sum
2. Unit pricing to include:
    a. Hourly rate for various types of services requested by the City
    b. Charges for miscellaneous items such as blueprints, data, discs, rental of special equipment, etc.
    c. A statement of the billing procedures including minimum billing units, if any.
    d. Cost of sub-consultants (if any)
3. An alternative unit cost breakdown

C. Deliverables
Each project contract will require a list of deliverables, schedule/timeline and cost. The

Engineer may be required to supply to the City an of the following items, when specified and as requested on the Scope of Work for each individual project.

1. Preliminary report containing schedule of work and cost estimate.
2. Construction drawings and documents. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility. Provide hard copies and PDF format of the construction plans for Purchasing Section use.
   a. As-built drawings on electronic media and reproducible prints. Electronic drawings shall be submitted via City approved methods drawn in AutoCAD format. All horizontal and vertical location datum information shall be coordinated with the City Surveyor. The utility location information shall be tied to project control monuments and referenced to project construction stationing. The project control survey shall be certified by a New Mexico Registered Land Surveyor. Metadata or “data about the data” shall be submitted with each as-built electronic file, preferably as a separate text file on the electronic submittal media, and shall include:
      - Name, address and phone number of the responsible land surveyor.
      - Date of completion of survey.
      - Equipment used to conduct the survey.
      - Horizontal and vertical control marks used to tie the survey to the City approved control.
      - Transformation factors needed to reduce Ground (local coordinate system) to Grid and combined scale factor used.
   b. “RECORD DRAWINGS” shall be clearly labeled on each sheet.
3. Computer network analysis for gas, water, and wastewater shall be provided to the City in appropriate electronic format. It shall include the entire model, including changes and a text summary (report) of the network analysis that includes assumptions, procedures, and results, and any graphics that clarify the analysis. The Engineering firm(s) shall verify the report format with the City. The computer network analysis shall be provided using the software listed below. The Engineering firm(s) shall verify the latest software, version, and update in use by the City to ensure compatibility.
   a. Computer network analysis for Gas: GasWork
   b. Computer network analysis for Water: InfoWater
   c. Computer network analysis for wastewater: InfoSewer
   d. Other design computer programs as approved by the City
4. Project reports.
5. Any other item specified in the contract for that project
6. Easement map and recording information

D. The selection of an Engineer for a specific project shall be based on experience with similar projects, references, performance in similar projects, and availability. This will include the ability to meet schedules, cost control, and responsiveness to client.

E. The Engineer shall have an engineering staff on-site everyday who is responsible, on behalf of the Engineer, for providing timely completion and response for performance of the terms of each Project Assignment Agreement during the progress of each individual project. Any deviation from this requirement is at the discretion of the City and must be approved in writing by the City prior to the start of any individual project.

Re: RFP # 23-24-052, Utilities Engineering Services

Dear Selection Committee Members,

The City of Las Cruces (City) provides a critical service to the community by maintaining and improving infrastructure to enhance safety and support growth. Wilson & Company, Inc., Engineers & Architects (Wilson & Company) has provided many services to the City over the past decade, and we look forward to continuing our partnership with the City. Our local team will focus on collaboration, building on our strong relationship to meet your goals. We will remain dedicated to delivering successful projects by:

Employing the same team that knows your processes and procedures. Our unmatched knowledge from prior City contracts will minimize delays and readies this team for action. Since 2014, our Las Cruces office has grown to over 30 employees and is supported by 212 employees statewide. Our strategic partners, Intertek PSI Solutions (Intertek-PSI) and Construction Survey Technologies, Inc (CSTi), have local experience and are eager to provide geotechnical, construction materials testing, and groundwater sampling services, as needed.

Developing engaging, design-innovative concepts while meeting your on-call objectives. Our Wilson & Company staff brings performance-based solutions to a growing community. Our team's on-call experience reflects many years of dedicated technical know-how to address your infrastructure challenges and provide efficient solutions to optimize your budget. Our roadway engineers, drainage engineers, surveyors, environmental scientists, and construction administration professionals have the experience to control costs and initiate early coordination efforts to prevent delays if needed. This background enhances quality control and keeps projects on schedule to deliver a product that meets your expectations.

Our office is only minutes from City Hall on Main Street, which enables our team to continue developing our partnership with the City, contributing to improving your infrastructure with our knowledge, experience, and enthusiasm for collaboration. We support your goals to achieve a safer and more connected community and help accomplish your on-call objectives. We trust the information provided helps you realize we are the most qualified team for the on-call contract. If additional information is required, please reach out to Brian at 602 283 2720 or email brian.mcbride@wilsonco.com.

Sincerely,

Brian McBride, PE
Vice President,
Water/Wastewater Service Unit Manager

Brigitte Fuller, PE
Program Manager

Firm Commitment

Wilson & Company is committed to providing excellence in client services. Higher Relationships is the foundation of this commitment. Focusing on continuous improvement, 91 years of project lessons learned translates to experienced design services. Our experience is important, but what matters most is your experience. That is why we focus on your specific needs to deliver professional services with Higher Relationships in mind.

Organizational Structure

Wilson & Company is headquartered in Albuquerque, New Mexico, and has brought more than 700 people together in 15 offices over nine states to hone their craft with us. Our services include civil, mechanical, electrical, and structural engineering; architecture; planning; biology; surveying; mapping; geographic information system (GIS) specializations; drone piloting; financial analyses; program management; construction administration and inspection; and a growing number of multidisciplinary specialties. We seek to create value for a diverse client base, including federal and municipal governments, public transportation agencies, railroad companies, industrial and commercial corporations, and private developers.

With over 200 employees in New Mexico, we provide a full range of in-house engineering services that are available to support the City in your utility on-call projects.

91 years in business

81 years in New Mexico

10 years in Las Cruces

In ten years, our Las Cruces office has grown to 32 experienced staff who are only minutes from the City's office to provide quick response to the City's on-call needs.

Construction observer	7
Intern	4

Criteria 1

Technical approach

Program manager Brigitte Fuller, PE, will serve as the main point of contact for the City. Brigitte will work closely with the Public Works director and design staff and be available to the City's executive team to review weekly priorities, including technical and non-technical support. During visits, Brigitte will be available to meet with staff to discuss various topics/tasks, which can be further investigated as needed. She will include additional Wilson & Company staff at these meetings for topic discussion(s) so coordination with the proper team members can occur. Brigitte will pre-schedule all City Council meetings on her calendar and be available to attend.

For every project assignment, Brigitte will work with the appropriate technical staff to properly develop a comprehensive scope of work and fee proposal that confirms both parties understand the work involved and are aligned with the project expectations and outcomes.

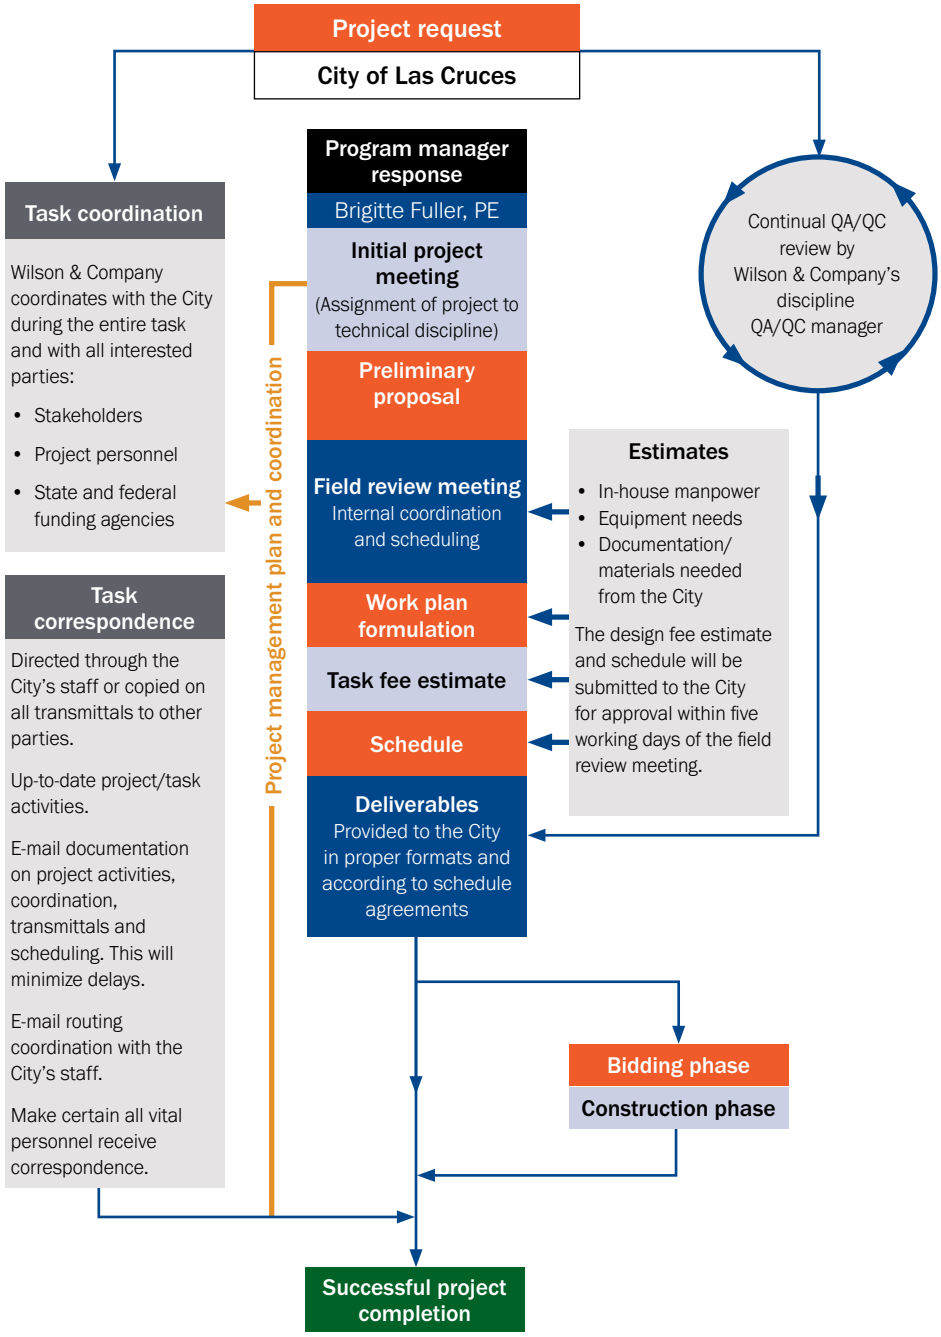
Our team will hold an initial project scoping meeting with internal team members. The goal of the meeting is to discuss the schedule and establish critical milestones and submittal dates (field check, office check, final completion, etc.). During this meeting, our team will confirm the sources of available project data, which may require supplemental field survey, data collection, or geotechnical services.

Our team will discuss the governing design criteria and design issues to make sure all parties are aware of the concerns that could be encountered. Brigitte will work with the assigned project manager to develop a Project Work Plan (PWP). The PWP is essential in our process to outline the best path to successfully completing the project and maintaining high quality deliverables following our Quality Assurance Program.

Brigitte will work directly with the City to present task orders to the City Council for acceptance where required by the City Manager for execution and move towards a Notice to Proceed (NTP).

Brigitte will provide the City and team members with a copy of the PWP. It will include the team's organizational structure (including Wilson & Company's resources as depicted in the organizational chart on page 6). Wilson & Company has committed staff with years of experience and knowledge in providing the same or similar services identified in the RFP.

Figure 1. Wilson & Company's on-call process



Major tasks to be accomplished

Successfully performing services under an on-call contract requires a team that is invested and committed to meeting your goals. Our dedicated and consistent team offers familiarity with City staff and your processes and provides expert services to reach your objectives. We offer the following services as identified in the RFP.

Computer network analyses for water, wastewater, and gas systems; design of water, wastewater, and gas utility systems; well house design; Supervisory Control and Data Acquisition (SCADA); water treatment process; master planning; feasibility studies; solid waste studies; land use permitting; subsurface utility exploration; boundary/easement survey; and National Pollutant Discharge Elimination System (NPDES) & Stormwater Pollution Prevention Plan (SWPPP) compliance: Communities depend on infrastructure to support essential services. Our team of experts and support staff are experienced in utility design for all dry and wet utilities, including gas, electric, cable, fiber optic, water, storm sewer, and sanitary sewer. We embrace sustainable design concepts, especially reuse and recharge, and many of our past projects incorporate recycled and

environmentally friendly materials. Our team has experience in the design and construction administration of utility system improvement projects; Wilson & Company offers a full spectrum of water, wastewater, and reuse-related engineering services for a diverse group of public and private clients. Our projects managers are also well versed in working with contractors for the implementation of NPDES best management practices in accordance with a SWPPP plan during construction to manage stormwater runoff by controlling peak runoff rate, improving water quality and inhibit site erosion or sediment movement offsite. Our experienced and dynamic professionals are committed to providing clients with quality, full-service engineering solutions, and our in-house expertise is valuable when planning full roadway reconstruction and mitigation of utility conflicts or relocation.

The electrical and water/wastewater design teams collaborate with each other in the development and implementation of control systems to manage the operation of booster pump stations, lift stations, and odor control stations. We assist in the development and review of process and instrumentation diagrams (P&IDs) that incorporate the necessary meters, control valves, transmitters, and gas detectors to provide monitoring and feedback of the system. Based on the P&IDs, Wilson & Company develops an input/output (I/O) list, block diagrams, and SCADA systems that are then used by third-party control system integrators who will provide the programmable logic controller (PLC) panels and control programming.

We have worked with numerous New Mexico communities to design new well houses. Most recently, we completed the Otowi 2 Well in Los Alamos, New Mexico, a 2,300-ft deep well that yields 1,300-gallons per minute (gpm). it is now the primary well source for Los Alamos.

Local survey teams have specialized experience and technical competence in a wide range of surveying and related services, including boundary/cadastral surveys, ROW and topographic surveys, alignment/utility location surveys, terrestrial lidar surveys, horizontal and vertical site control analysis, cross-section and profile surveys, legal boundary and plan and profile surveys, bathymetric and hydrographic surveys, geodetic network control surveys, construction layout and staking, rapid response emergency surveys, photogrammetric mapping control and aerial mapping, American Land Title, and GPS surveys, digital terrain modeling, and subdivision.

Electrical design (wells, booster stations, lift stations, odor control stations, building electrical system design): Our experienced electrical engineering staff has expertise in a wide range of electrical engineering services. Projects have included "green field" sites, along with challenging remodeling and existing facility modifications. Project-related experience also includes renewable energy, such as Solar Arrays and energy audits, and sports field and park lighting. We often provide construction-related services, including observation and commissioning on these projects. We also offer system analysis and code compliance review. Our electrical team works closely with our water/wastewater engineers to confirm the layouts, equipment, and overall site design is clearly and effectively completed to support efficient operation of all systems.

Design experience includes the following areas:

- PLC and control automation
- High voltage design (including substations, aerial/underground primary distribution)
- Site electrical design (includingi high mast lighting and power distribution)
- Security, fire alarm, closed circuit television (CCTV), and public address design
- Emergency power systems
- Grounding, bonding, and lighting protection
- Hazardous area electrical design
- Power generation facilities
- Rate studies and cost of service evaluation
- Groundwater testing and mitigation
- Gas distribution systems
- Control and plant automation systems
- Roadway lighting
- Groundwater wells
- Sanitary sewer lift stations
- Stormwater pump stations
- Booster pump stations
- Back-up power generators
- Chlorination stations

Computer network analysis for gas (GasWork), water (InfoWater), and wastewater (InfoSewer): Our water/wastewater engineers have a wide range

of experience in network analysis of water and sewer systems, we are well-versed in hydraulic modeling software platforms from InnoVyze (InfoWater and InfoSewer) and Bentley (WaterGEMS and SewerCAD) and have developed comprehensive system-wide models. Our experience includes transient analysis, contaminant transports modeling, operational control strategies and sequencing, fire flow analysis, sewer-shed analysis, and collection system modeling for gravity and/or low-pressure systems. These network analyses are usually a clear first-step in developing a water or sewer system design.

Solid waste studies, landfill system design, and analysis: It is inevitable that we will always produce and dispose of solid waste. However, more stringent regulations and increased public scrutiny have made locating and designing new solid waste facilities quite challenging. Our local expertise and national office network can provide you with innovative and cost-effective solutions to meet your waste management needs. Our in-house professionals provide:

- Permit registration, including preparation of general facility information, adjacent land ownership map, waste acceptance plan, transportation increase study, preliminary transfer station layout, drainage calculations, closure, and post-closure plan, and site operating plan
- Transfer station building layout
- Erosion control plan
- Design of a liner and leachate collection system and force main, leachate sump, pump, and pond design
- Groundwater monitoring wells engineering and design, and gas probe layout and design

Environmental surveys, assessments monitoring and management, such as indoor air quality, asbestos, mold, and other related services for the City: Wilson & Company's team has the expertise to provide environmental and cultural resource services including National Environmental Policy Act (NEPA) documentation; National Historic Preservation Act (NHPA) document preparation; Endangered Species Act compliance; Clean Water Act (CWA) permitting; biological and cultural resource surveys; phase I environmental site assessments (ESAs); regulatory compliance; project management; resource and environmental planning; public involvement; GIS mapping; administrative records; and agency coordination. We have a thorough understanding of NEPA as well as other federal, tribal, state, and local laws, regulations, and policies that govern Environmental Documents and land use planning.

Geotechnical assessments, such as soil and groundwater testing for contamination and remediation, and other related services for the City: With the enlistment of Intertek PSI as geotechnical Investigations experts, the Wilson & Company team offers services that include geotechnical and materials testing. These services encompass geotechnical investigations, aggregate source exploration, erosion, control design, foundation and retaining systems/ structure design, slope stability studies, deep foundation load testing, laboratory testing, quality control and quality acceptance testing, and inspection. Intertek PSI's experience with local projects like Paseo Real and County Line, Rio Grande Avenue Pavement, and Sunland Park Drive Phase I provides the technical competence and accuracy for efficient designs.

Expert witness in a judicial and/or quasi-judicial setting: Our team has provided expert investigations and testimony for several of our clients in judicial and quasi-judicial settings. We have extensive experience in handling a wide range of cases, including traffic accidents, property acquisition, and coordination issues. We closely collaborate with legal counsel to determine the issues and provide our opinions on the matter being considered. The key to our case preparation is coordination with City technical and legal staff.

Wilson & Company offers a comprehensive suite of expert witness services that include reviewing and assessing cases, coordinating special case needs, supporting the legal team in developing the case, conducting depositions, supporting plaintiff depositions, and providing expert testimony at a trial or hearing setting.

Project management: Wilson & Company's program manager, Brigitte Fuller, is the City's primary contact for on-call architecture and engineering needs. The company has selected lead engineers and architects with specialized expertise in the required disciplines and extensive experience in the region. They also engage with communities and work closely with Public Works directors and project managers to ensure higher levels

of project understanding.

The quality assurance staff will oversee technical aspects and ensure quality for each discipline. Brigitte will assign tasks and coordinate with leads for team member assignments. On-call services will receive special attention to meet your needs.

Construction inspection: A project's success is measured by the course of construction. It is in this phase that the Wilson & Company team will rise. Our experienced construction observers work closely with the design team to make certain the constructed project is in accordance with drawings and technical specifications. Our specifications detail startup procedures, documentation, and training for primary mechanical systems. Full mechanical system commissioning is an option that can alleviate many functional issues in the future. During the start-up and training phase, we work closely with the equipment manufacturer's representatives and the City's staff to make sure mechanical facilities are working correctly.

Our construction administration team is well versed in construction documents including Engineers Joint Contract Documents Committee (EJCDC), The American Institute of Architects (AIA), Community Development Block Grant (CDBG), New Mexico Department of Transportation (NMDOT) Standard Specifications for Highway and Bridge Construction, New Mexico American Public Works Association (APWA) Specifications for Public Works Construction, Uniform Building Code, International Building Code, Uniform Plumbing Code, Occupational Safety and Health Administration (OSHA), Environmental Protection Agency (EPA), and SWPPP.

Our inspectors are certified by the National Institute for Certification in Engineering Technologies (NICET) and American Concrete Institute (ACI). Inspectors are also certified to operate nuclear densometers and regularly attend courses at the Associated Contractors of New Mexico (ACNM) facility in Albuquerque and attend other local and regional trainings.

Project schedule/timeline

Our project schedule is the cornerstone of our project management strategy. We've created a sample schedule demonstrating our commitment to achieving each project milestone. The project milestones are the building blocks of our internal project timeline, which will be a tool to track our progress. This timeline will sequentially outline the tasks to move from one milestone to the next. Our internal timeline will be realistic and adjustable to meet the scope of work and the City's needs, reflecting our commitment to your schedule; it also facilitates keeping the tasks on time and on budget.

To provide a quick response and the highest technical capability to the City, Brigitte will rely on several project managers' technical expertise and experience. Our project managers will be instrumental in completing all aspects of this on-call contract, with each individual having unique and specialized skills to benefit the City. Brigitte will coordinate all team activities identified in the project structure and serve as the single point of contact for the City.

We expect to perform 85% of the work out of our Las Cruces office and the remaining from our El Paso, TX and Albuquerque, NM offices.

85% 414 N. Main Street, Suite A
Las Cruces, NM 88001

10% 5044 Doniphan Drive,

Brian is the principal member, responsible for the administration of the contract.

He is located at:
4401 Masthead Street NE
Albuquerque, NM 87109

P: 505 348 4076

Brian is a highly experienced professional in the water and wastewater field, offering program and project management, detailed design, construction services, and engineering studies. He has managed alternative delivery projects such as design-build and construction manager at risk (CMAR). Brian has extensive experience in detailed design, including water and wastewater treatment facilities, reservoirs, pump and lift stations, and pipelines. Additionally, he has performed engineering studies including treatment facility plans, feasibility studies, and site location studies.

Experience:

- Gallup Regional Wastewater Management Preliminary Engineering Report, Gallup, NM | QA/QC manager
- Wastewater Capacity Planning/Improvements, City of Casa Grande, AZ | Project manager
- Water and Sewer Improvements On-Call, City of Nogales, AZ | Project manager

Since 2001, Brian has held the position of Southwest Region water and wastewater engineering manager at Wilson & Company. He has an impressive track record of successfully completing projects ranging in construction costs from $20,000 to $31,000,000, including planning and designing water and wastewater facilities, utility master plans, sanitary sewer collection system designs, lift station and forcemain designs, and non-potable reuse systems for communities in New Mexico, Colorado, Kansas, and Oklahoma. Brian possesses extensive expertise in the company's quality control procedures and understands the standard level of care required to deliver successful results for the City's projects.

Experience:

- Ohkay Owingeh Wastewater Treatment Plans (New 0.233MGD activated sludge WWTP), Ohkay Owingeh, NM | Project manager
- High Resort Roadway Reconstruction Project (1.6-miles of recycled water line design & CM), City of Rio Rancho, NM | Lead utility engineer
- Casa Grande West Area Sanitary Sewer Interceptor (1-mile of 36" sanitary sewer interceptor), Casa Grande, AZ | Project manager
- Route 66 Visitors Center Water and Sewer Extension (1.5-miles of waterline, and 2-miles of sanitary sewer) – Albuquerque Bernalillo County Water Utility Authority, Albuquerque, NM | Project manager and lead engineer

Todd specializes in construction administration and is involved from the design phase through completion. He is responsible for contract administration and management, oversight of construction inspection, materials testing, project budgets, oversight of monthly pay applications, change orders, close-out documentation, certificates of compliance, and coordinating with engineers, observers, testing laboratories, owner staff, and regulatory agencies.

Experience:

- Elks Drive Multi-Use Trail, Doña Ana County, NM | Construction administration manager
- Alamo Street, Phase II Reconstruction Project, Otero County, NM | Project manager
- Bridge of Grace Reconstruction Project, Sierra County, NM | Project manager
- Rio Grande Trail Phase I - Improvements, City of Sunland Park, NM | Construction administration manager
- Anapra Phase II - Roadway, Drainage and Utility Infrastructure Improvements, City of Sunland Park, NM | Project manager

Subconsultants

Our selected teaming partners were strategically selected based on their strong performance, specialized skill sets, and knowledge of City of Las Cruces processes and procedures.

Intertek-PSI | Geotechnical services

Intertek-PSI has provided geotechnical engineering and construction services to southern New Mexico for over 20 years, with material testing, inspection, and investigation services. All PSI laboratory and field technical staff maintain certifications in testing and inspections in their areas of expertise. The PSI office is accredited through the American Association of State Highway and Transportation Officials (AASHTO) Materials Reference Laboratory (AMRL).

Intertek will provide geotechnical services and is located at:

5044 Doniphan Drive, Bldg D
El Paso, TX 79932

P: 915 584 1317

Construction Survey Technologies, Inc (CSTi)–SUE services

CSTi's SUE professionals deliver quality, accurate mapping of existing underground utilities and anomalies, helping clients avoid costly utility conflicts or construction delays caused by unknown or misrepresented utilities. The firm has in-house capability to obtain accurate horizontal and vertical positions of subsurface utilities by excavating a non-destructive test hole using wet/dry vacuum excavation equipment.

CSTi will provide SUE services and is located at:

277 E Amador, Suite 303
Las Cruces, NM 88044

P: 575 644 0250

Staff size: 12

Capabilities: SUE services, utility locating, utility designating, test hole excavation, research, GIS utility mapping.

Focusing on you

Through our work under the 2020-2024 on-call contract, our team developed strong relationships with City staff and gained intimate knowledge of your processes and standards. We know your expectations and strive to exceed them, from schedule and budget to sustainable and innovative concepts.

Criteria 3

Performance of the firm

The following projects showcase our experience delivering successful solutions to various projects. Through these projects, we have gained critical insight that can be applied to your on-call tasks, resulting in similar successes. We invite you to make inquiries of the provided references regarding our qualifications, performance, and quality of results.

WATER SYSTEM IMPROVEMENTS
CITY OF TRUTH OR CONSEQUENCES, NM

Our team assisted the City of Truth or Consequences with the preparation of a detailed city-wide project scope for water system improvements that address the City's concerns with meeting the demands of current and future water needs, increasing supply redundancy, controlling pressure problems, addressing the aging water distribution system, and reducing the overall operation and maintenance cost. Our intimate knowledge of the proposed project and operational goals helps us to represent the City's best interest.

Wilson & Company assisted with completing the Readiness to Proceed items for the funding application, which included the opinion of probable project cost and its phasing. Our team's extensive knowledge of CDBG program allows us to proactively engage the funding agency through every step of the project.

Government programs and agencies: Colonias Infrastructure Fund, USDA-RD WEP program, Rural Community Assistance Corporation (RCAC), NMED-Construction Programs Bureau, NMED-Drinking Water Bureau, NMDOT, Hidalgo County.

Wilson & Company provided hydraulic system modeling, planning, design, NEPA categorical exclusion, and construction administration of improvements to the City's water treatment facility and distribution network within the City's downtown area. In addition, we developed a PER in accordance with Rural Utilities Service (RUS) Bulletin 1780-2 that evaluated three (3) treatment methods for the removal of fluoride, iron, and manganese from the City's groundwater supply with the completion of a bench scale pilot. The methods evaluated were activated alumina, activated carbon, and RO. We recommended the treatment method of flow reversal RO, and a full-scale pilot of the system was conducted on site to confirm system sizing and operational parameters for the full build-out of the project. The project also included the replacement of 2.4 miles of mainline distribution, a new treatment facility building with offices, restrooms, HVAC, a reject evaporation pond, and accompanying appurtenances. Additional improvements included upgrades to the existing groundwater wells, installation of variable frequency drive (VFD) starters, expansion of the existing SCADA system, and connections to the existing network. Project management included monthly progress meetings with USDA and City staff, assistance with completion and tracking of items from the USDA Letter of Conditions, coordination with Bond Council, Local Attorney, RCAC and all other project stakeholders. Federal funding requirements applied to this project requiring American Iron & Steel (AIS) components and certificates. The construction phase included the bidding for contractors, facilitation of pre-bid and bid opening, evaluation and recommendation for award, construction administration and full-time construction observation.

WILLIAMSBURG WASTEWATER SYSTEM IMPROVEMENTS VILLAGE OF WILLIAMSBURG, NM

Grant Administration

This project included the development of a PER in accordance with RUS Bulletin 1780-2 that evaluated all system components and identified a project scope and cost used for USDA funding of design and construction. The scope included the rehabilitation of critical segments of gravity collection lines through cured in place pipe methods, structural repairs to manholes, epoxy coating to prevent deterioration due to H_2S, and lift station pump and control replacements with SCADA integration. The project also includes a low-pressure force main extension to serve new customers and preparation of utility easements on private property. Project management included monthly progress meetings with USDA and Village staff, assistance with completion and tracking of items from the USDA Letter of Conditions, coordination with Bond Council, local attorney, RCAC and all project stakeholders. Federal funding requirements apply to this project requiring AIS components and certificates. The construction phase will include the bidding for contractors, facilitation of pre-bid and bid opening, evaluation and recommendation for award, construction administration and full-time construction observation.

As noted below, Wilson & Company has significant experience managing on-call contracts for many clients throughout New Mexico. Our team completed numerous task orders ranging from a few hundred dollars to multimillion dollar, multidisciplined task orders. In addition, we provide statewide on-call engineering services that further demonstrate our familiarity with other agencies that may require additional coordination with the City, illustrating our capacity and capability to deliver multiple tasks concurrently.

Title: **A RESOLUTION ADOPTING THE MUNICIPAL ADOPTED BUDGET FOR FISCAL YEAR 2024-2025 FOR THE CITY OF LAS CRUCES, NEW MEXICO ON MAY 20, 2024.**

TYPE OF ACTION: ☒ **Administrative** ☐ **Legislative** ☐ **Quasi-Judicial**

PURPOSE(S) OF ACTION:
To adopt the Fiscal Year 2024-2025 budget.

BACKGROUND / KEY ISSUES / CONTRIBUTING FACTORS:
The City Manager's proposed budget has been available for public review since April 08, 2024. City Council held a pre-budget retreat on February 15 and 16, 2024, a work session on March 11, 2024, and a second work session and public hearing on April 22, 2024, regarding the proposed fiscal year 2024-2025 budget. Additionally, the Las Cruces Utilities Board met on April 11, 2024, and reviewed and recommended approval of the Utilities budget portion to be included as part of the City's Fiscal Year 2024-2025 annual budget.

The Fiscal Year 2024-2025 budget aligns with the goals of the City Council Strategic Plan and Elevate Las Cruces.

The City Charter, Sec. 5.06(c) states, "The council shall adopt the budget no later than thirty (30) days before the beginning of the fiscal year."

After the budget adoption by City Council, the adopted Fiscal Year 2024-2025 budget will be filed with the State of New Mexico Department of Finance and Administration by June 1, 2024 for approval as required by State Law (NMSA 1978 Chapter 6, Article 6).

Overall Budget Impact:
Approving FY2024-2025 Budget

Does this action amend the Capital Improvement Plan (CIP)?
☒ Yes
☐ No

Does this action align with Elevate Las Cruces?
☒ Yes
☐ No

OPTIONS / ALTERNATIVES:

1. Vote "Yes"; this will approve the Resolution and the City of Las Cruces will be compliant with the City Charter by adopting the budget for the forthcoming fiscal year no later than thirty days before the beginning of the fiscal year.
2. Vote "No"; this will not approve the Resolution and cause the City of Las Cruces to be non-compliant with the City Charter.
3. Vote to "Amend"; this would require direction from City Council and could potentially require pages in the Fiscal Year 2024-2025 budget document to be added, deleted, or modified.
4. Vote to "Table"; this will require a special meeting to prevent the City of Las Cruces from being non-compliant with the City Charter.

REFERENCE INFORMATION:

Approving FY2024-2025 Capital Improvements by separate Resolution.

RESOLUTION 24-121

A RESOLUTION ADOPTING THE MUNICIPAL ADOPTED BUDGET FOR FISCAL YEAR 2024-2025 FOR THE CITY OF LAS CRUCES, NEW MEXICO ON MAY 20, 2024.

The City Council is informed that:

WHEREAS, the City of Las Cruces has prepared its annual budget for Fiscal Year 2024-2025; and

WHEREAS, City Council held several work sessions for discussion purposes and a public hearing April 22, 2024, on the proposed annual budget; and

WHEREAS, the Las Cruces Utilities Board has reviewed and recommended approval of the Utilities portion of the Fiscal Year 2024-2025 annual budget.

NOW, THEREFORE, Be it Resolved by the Governing Body of the City of Las Cruces:

(I)

THAT the Fiscal Year 2024-2025 Budget, attached hereto as Exhibit "A" and made part of this Resolution, is hereby adopted in accordance with the City Charter, Sec. 5.06(c) and authorized to be the basis for submission of the "Municipal Budget and Report" to the Local Government Division of the Department of Finance and Administration for the State of New Mexico, as required by the Local Government Division Memorandum 63-43 and the New Mexico State Law, Section 6-6-2, NMSA 1978.

(II)

THAT City staff and officials are authorized to make expenditures as outlined and provided in the Fiscal Year 2024-2025 Annual Budget upon approval by the State of New Mexico.

(III)

THAT the Fiscal Year 2024-2025 Annual Budget attached and marked Exhibit "A", hereby directed to be on the City website and available for public inspection.

(IV)

THAT City staff is hereby authorized to do all deeds necessary in the accomplishment of the herein above.

BUDGET STATEMENT

Budget coordinates the preparation and development of the annual operating budget, capital budget, and multi-year Capital Improvements Program for the city. The city budget is the "Action Plan" used to implement the goals and objectives of the City Council. Activity-based budgeting isolates the costs of a government's operation by dividing the government into many different activities or support services and includes the direct and indirect costs of labor, contractual services, materials, and supplies.

BUDGET MESSAGE

FISCAL YEAR 2024-2025

PROPOSED BUDGET

FROM THE CITY MANAGER

April 4, 2024

Dear Honorable Mayor, Mayor Pro-Tem and Council Members:

As your newly appointed City Manager, I reiterate my promise to commit 120% to the City of Las Cruces and its people. Building upon the vision set forth by my predecessor, I am dedicated to see our City flourish, to see our community's quality of life increase, and to ensure public safety. My goal for this Fiscal Year 2025 is to create a budget that aligns with our community's needs, leading to a more sustainable environment and a more equitable community. Through the strategic implementation and ongoing support of various initiatives, we will work collectively to achieve these goals.

The Lift Up program, our inaugural anti-poverty initiative, is dedicated to enhancing our low-resource neighborhoods. Through a series of renovations, we aim to create ADA-accessible and pedestrian-friendly communities. Additionally, our Senior Centers citywide have expanded their offerings of recreational activities for senior residents, fostering an inclusive environment. In our commitment to public safety, the City is prioritizing the establishment of a Real Time Crime Center (RTCC). This innovative solution will provide critical support to officers as they respond to calls of service. New technologies will facilitate seamless communication for officers, enhancing situational awareness and safety for both officers and residents.

For Fiscal Year 2025, the City is anticipated to sustain consistent economic growth, despite the prevailing uncertainty posed by interest rate fluctuations and inflation. A conservative budget complemented by steady gross receipt and property tax revenues helps maintain a fiscally responsible government. According to the U.S. Census, the City of Las Cruces has experienced a 16.7 percent increase in population from 2010 to 2022. This influx is attributable to the diverse demographics and community-centric vision established by vast economic and educational opportunities, and the rich cultural environment of the area.

As I embark on this journey as City Manager for the vibrant city of Las Cruces, I am dedicated to promoting transparency in our government. Inspired by the remarkable efforts of our Mayor, Council, city staff and residents, I pledge unwavering commitment to serve our community and uphold the highest standards of excellence. I am humbled to have been chosen to serve as your City Manager and I promise that in all I do, I will lead with care and kindness for a Las Cruces that moves Adelante con Cariño!

Ikani Taumoepeau

STRATEGIC PLAN

FISCAL YEAR 2024-2025

PROPOSED BUDGET

City of Las Cruces, New Mexico

Strategic Plan

2021 – 2026

March 5, 2021

Message from Mayor Miyagishima

Dear Las Cruces Community Member:

The City Council is pleased to present the Las Cruces Strategic Plan for 2021 through 2026. It will serve as the City's policy direction for the allocation of resources and results. The process used to prepare this update to the 2017 - 2022 Strategic Plan included input from residents, business leaders, and other community stakeholders. Input and ideas from Las Cruces community members and city staff were used to identify strategic priorities, key objectives, and success measures. Importantly, the Strategic Plan is based on the vision and goals in the adopted *Elevate Las Cruces* Comprehensive Plan.

Over the next five years, the Strategic Plan will help Las Cruces' City leaders prioritize and plan our work. We will communicate with you regularly about our progress and outcomes as we work to accomplish the goals included in the plan.

We are excited about the future of our vibrant community and look forward to continuing our commitment to growth and transformation and meeting the needs of Las Cruces residents.

Respectfully,

Ken Miyagishima
Mayor
March 2021

Background

Introduction

This strategic planning effort allowed community members and City leaders an opportunity to determine what is important for future success by identifying priorities for improvement, which were aligned with short-term goals and initiatives included in *Elevate Las Cruces* and new goals confirmed by the City Council. The basis for the Strategic Plan is articulated in the vision, mission, and organizational values. These elements are foundational to the establishment of priorities and goals and guide the work of City staff. The implementation of the goals and priorities should occur thoughtfully and transparently with periodic review by the City Council to ensure progress. The development of this Strategic Plan was facilitated by Management Partners, a firm specializing in assisting local governments in the United States.

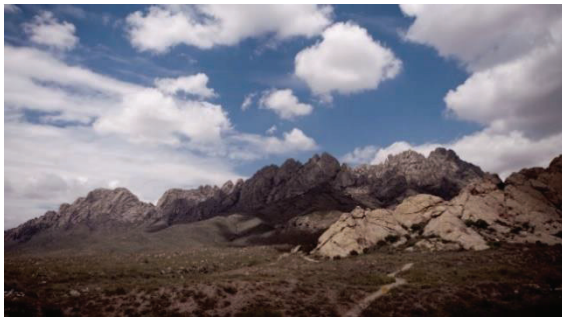
Methodology

The Las Cruces strategic planning effort incorporated the work done for *Elevate Las Cruces* to help prioritize the stages of the plan during the next few years. Management Partners developed and deployed two surveys, one for community members and one for City employees, to solicit input and feedback on key priorities. A series of four focus groups with staff and community members were held to gain greater insight and input about key themes identified from community survey respondents.

Management Partners also conducted interviews with the Mayor, Council members, City Manager, and other members of the leadership team and department directors to understand their perceptions about Las Cruces' strengths and opportunities and to identify key priorities for the future.

The Strategic Plan has six strategic themes that address community prosperity, education and community services, environmental sustainability, capital improvements and infrastructure, public safety, and communication, involvement, and follow-up. Accompanying the strategic themes are desired outcomes, goals, and performance measures. Once the Strategic Plan is finalized, PEAK performance measures will be developed for each department to guide progress in achieving each goal.

City of Las Cruces Strategic Themes



This Strategic Plan has six overarching themes as listed below. Each priority is accompanied by goals from the *Elevate Las Cruces* Comprehensive Plan and goals identified by City Council.

Community Prosperity

Education and Community Services

Environmental Sustainability

Capital Improvement and Infrastructure

Communication, Involvement and Follow Up

Public Safety

Vision, Mission and Organizational Values

Vision

Las Cruces is an inclusive community, recognized for its cultural diversity, enchanting natural amenities, and vibrant quality of life. We are committed to enhancing our livability, prosperity, and environment for the shared benefit of current and future generations of Las Crucens in a fiscally and socially sustainable manner.

Mission

The mission of the City of Las Cruces is to provide customer-focused municipal services to residents, businesses, and guests so they can experience a "quality of place" to live, work and play.

Organizational Values

City Leaders' and Employees' Values … We Value:

Diversity

Equity

Fiscal Responsibility

Professionalism

Respect

Responsive

Transparency

Strategic Theme 1: **Community Prosperity**

Desired Outcomes

- Expanded housing options for all income levels
- Enhanced economic diversity and business strength

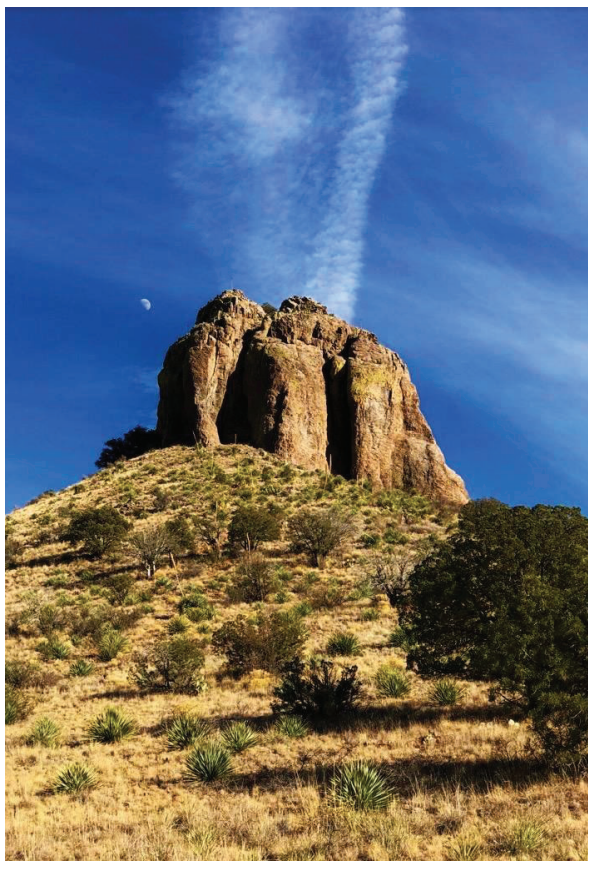
Performance Measures

- (To be developed by staff during the update of department strategic business plans)

The following goals are listed in priority order as ranked by City Council members.

1. ELC Goal CP-2: *Economic Equity.* Generate employment opportunities that create economic security for all residents.
2. ELC Goal CP-7: *Attainable Housing*. Provide affordable, clean, and safe housing options for all residents regardless of income.
3. ELC Goal CP-11: *Underserved Populations*. Develop and support programs that provide assistance to traditionally underserved populations.
4. ELC Goal CP-4: *Diversification*. Seek a balance of business recruitment, retention, and expansion to diversify economic opportunities.
5. ELC Goal CP-3: *Entrepreneurship*. Create a nurturing regulatory environment that generates entrepreneurship and small business investment.
6. ELC Goal CP-1: *Ready Workforce*. Develop a strong and educated workforce that supports an expanding local and regional economy.
7. ELC Goal CP-9: *Housing Diversity*. Provide a diverse range of housing options to accommodate residents at all stages in life.
8. *Council Goal*: Prioritize development of attractive, energy-efficient, mixed income housing in infill areas and along the El Paseo Corridor.
9. *Council Goal*: Establish a Behavioral Health District made up of governmental entities in Doña Ana County.
10. *Council Goal*: Establish a Building Local Wealth component within the city's Economic Development Department.

Elevate Las Cruces Goal Section Reference:
CP – Community Prosperity



11. ELC Goal CP-8: *Special Housing Needs*. Ensure that the housing needs of traditionally underserved populations are met.
12. ELC Goal CL-1: *Neighborhood Identity*. Promote community pride through neighborhood events and investments that create a shared identity.
13. ELC Goal CE-4: *Complete Neighborhoods*. Develop mixed-use neighborhoods that incorporate a wide range of recreational, commercial, employment, and civic uses.
14. ELC Goal CL-4: *Recreational Opportunity*. Offer a diverse suite of recreational facilities and programs to cater to varying community interests, ages, and abilities.
15. ELC Goal CE-3: *Centers and Corridors*. Support community growth through concentrated development at activity centers and along key corridors.
16. ELC Goal CE-7: *Accessible Social Spaces*. Create a community-wide network of social spaces through the design and distribution of parks, public grounds, and public rights-of-way.
17. ELC Goal CL-10: *Economic Outcomes*. Support transportation investments that improve economic development outcomes.
18. ELC Goal CL-13: *Supporting the Arts*. Support the vibrant arts culture within the community.
19. ELC Goal CL-15: *Historic & Cultural Values*. Value and protect the historic and cultural properties and sites in the community.

Elevate Las Cruces Goal Section Reference:
CE – Community Environment
CL – Community Livability
CP – Community Prosperity

Strategic Theme 2: **Education and Community Services**

Desired Outcomes

- Enhanced physical and mental health resources
- Improved access to healthy food options

Performance Measures

- (To be developed by staff during the update of department strategic business plans)

The following goals are listed in priority order as ranked by City Council members.

1. ELC Goal CP-10: *Community Health*. Promote and maintain a balanced system of community and human services for the health, safety and welfare of all residents.
2. ELC Goal CL-18: *Mental & Physical Health*. Provide opportunities for residents to improve their mental and physical health.
3. ELC Goal CP-6: *Community Schools*. Utilize schools as an integral component of neighborhood development and community life.
4. ELC Goal CL-17: *Food Security*. Transform Las Cruces into a food-secure community with improved access to healthy food options.

Elevate Las Cruces Goal Section Reference:
CL – Community Livability

CP – Community Prosperity

Strategic Theme 3: **Environmental Sustainability**

Desired Outcomes

- Achieve the goals included in the Climate Action Plan adopted in 2020
- Promote balanced growth

Performance Measures

- (To be developed by staff during the update of department strategic business plans)

Goals

The following goals are listed in priority order as ranked by City Council members.

1. ELC Goal CE-1: *Balanced Growth*. Encourage efficient land use development patterns that accommodate projected growth in a sustainable manner.
2. ELC Goal CL-19: *Environmental Justice*. Make public health improvements in an equitable manner that align with the tenets of environmental justice.
3. ELC Goal CE-9: *Sustainable Infrastructure Systems*. Enhance infrastructure to meet the demands of residents and businesses in a sustainable manner.
4. ELC Goal CE-8: *Energy Efficiency*. Increase the share of renewable energy alternatives to reduce the community's overall carbon footprint.
5. ELC Goal CE-14: *Open Space Lands*. Embrace open space for passive uses that protect the natural, cultural, or agricultural character.
6. ELC Goal CE-11: *Reliable Water Supply*. Preserve the region's natural resources by implementing quality control and conservation techniques.
7. ELC Goal CL-5: *Stewardship*. Deliver parks and recreation services in a collaborative manner that generates community enthusiasm and pride.
8. Council Goal: Provide direct support from Sustainability Office for all departments to help them meet goals in the Climate Action Plan and other adopted resiliency measures.

Elevate Las Cruces Goal Section Reference:
CL – Community Livability
CE – Community Environment

Strategic Theme 4: **Capital Improvement and Infrastructure**

Desired Outcomes

- Quality infrastructure that meets the community's needs
- Expanded transit access and options, including pedestrian and bicycle Improved road and pavement condition

Performance Measures

- (To be developed by staff during the update of department strategic business plans)

Goals

The following goals are listed in priority order as ranked by City Council members.

1. ELC Goal CE-6: *Context Sensitive Street Design*. Design streets to support varying levels of pedestrian activity based on the intended built context of surrounding development.
2. ELC Goal CL-6: *System Efficiency*. Build and maintain a coordinated transportation system that operates in an efficient and cost-effective manner.
3. ELC Goal CL-7: *Transportation-Land Use Connection*. Develop an accessible and efficient transportation system that provides seamless connectivity to surrounding land uses and complements various development patterns.
4. ELC Goal CL-8: *Multi-Modal System*. Develop an equitable, multi-modal transportation system that presents feasible travel options for residents.
5. ELC Goal CL-9: *Transportation Safety*. Incorporate public health and safety enhancements into transportation system investments and policies.
6. *Council Goal*: Develop a plan to increase the pavement condition index.

Elevate Las Cruces Goal Section Reference:
CL – Community Livability
CE – Community Environment

Strategic Theme 5: **Communication, Involvement and Follow-Up**

Desired Outcomes

- Robust communication channels with residents between City departments
- Timely and consistent follow up by City staff to residents and the public

Performance Measures

- (To be developed by staff during the update of department strategic plans)

Goals

The following goals are listed in priority order as ranked by City Council members.

1. ELC Goal CL-16: *Community Engagement*. Involve the community in historic preservation efforts.
2. ELC Goal CE-10: *Coordinated Service Delivery*. Improve coordination and communication amongst utility providers and agencies.
3. *Council Goal*: Identify appropriate communication methods to reach underrepresented groups.
4. *Council Goal*: Complete implementation of transparency and communication tools

Elevate Las Cruces Goal Section Reference:
CL – Community Livability
CE – Community Environment

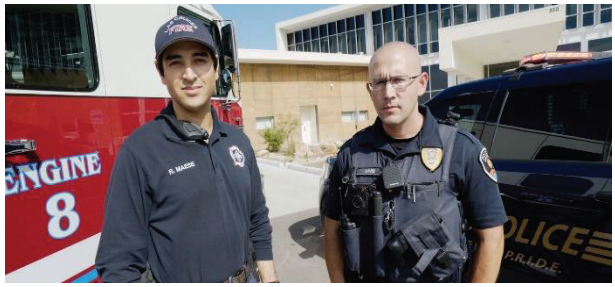
Strategic Theme 6: **Public Safety**

Desired Outcomes

- A more humane criminal justice system
- A safe and secure community

Performance Measures

- (To be developed by staff during the update of department strategic business plans)



Goals

1. ELC Goal CL-12: *Police & Criminal Justice*. Provide for a humane and responsible police and criminal justice system.
2. ELC Goal CL-11: *Emergency Services*. Ensure a safe and secure community through the provision of high-quality fire and emergency medical services.
3. *Council Goal*: Identify strategic areas for lighting improvements to improve safety
4. *Council Goal*: Continue to support the fire mobile integrated health program, the multi-disciplinary mental health response team, and the police critical incident crisis intervention team

This Strategic Plan provides a clear path forward for the City of Las Cruces. City leaders are committed to achieving the priorities, goals, and initiatives through the planned allocation of resources over the next five years. An Implementation Action Plan will be used to help guide our actions and progress over time, as City leaders work to accomplish the adopted priorities and goals.

Successful implementation will require a collective effort by City employees in all departments. The City of Las Cruces is committed to working collaboratively with members of our community and periodically communicating with residents and businesses about how we are doing, how we are going about our work, and how well we are delivering services.

We look forward to working with you to maintain a City that is vibrant and progressive, and committed to improving the prosperity Las Cruces residents.

1st Reading:		**Adopted:**	May 20, 2024
Drafter:	Cynthia Campo	**Department:**	City Manager's Office
Program:	CIP	**Line of Business:**	Planning and Implementation

Title:	**A RESOLUTION APPROVING THE CAPITAL IMPROVEMENTS PROGRAM (CIP) FOR FISCAL YEAR 2025 THROUGH FISCAL YEAR 2030.**

TYPE OF ACTION: **☒ Administrative** **☐ Legislative** **☐ Quasi-Judicial**

PURPOSE(S) OF ACTION:

To approve the Capital Improvements Program for Fiscal Year 2025 through Fiscal Year 2030.

BACKGROUND / KEY ISSUES / CONTRIBUTING FACTORS:

The Capital Improvements Program (CIP) is a six year program that identifies the infrastructure and capital funding, and funding needs. One year of funded projects is followed by five unfunded years identifying future needs.

Projects are listed under the following categories: Active Transportation, Airport, Attainable/Affordable Housing, City Operational Facilities, Equipment & IT, Non-Profit, Other, Park Improvements, Parks - New, Public Facilities, Public Safety (Police and Fire), Public Transit, Resiliency, Streets - New, Streets Improvements, and Utilities. Non-Profit Organizations are external to the City of Las Cruces for which fiscal agent agreements have been approved. The projects also identify the organizational units: Economic Development, Facilities Management, Las Cruces Airport, Parks & Recreation, Police Department, Fire Department, Public Works, Quality of Life, RoadRUNNER Transit, Sustainability, Utilities, and Visit Las Cruces.

Within each category, projects may be listed in one or more of the following types: Newly Funded, Carryover, Annual, and Future. Newly Funded projects are intended to receive funding in FY2025 for the first time. Carryover projects are those which had funding in fiscal years prior to FY2025. Annual projects are ongoing projects that receive funding each fiscal year. Future projects are planned projects for which funding has not been identified or allocated.

SUPPORT INFORMATION:

Exhibit "A" - FY2025-2030 CIP

PLAN(S):

City Council Strategic Plan, Elevate Las Cruces

DOES THIS AMEND THE BUDGET?:

☐ Yes
☒ No

Does this action amend the Capital Improvement Plan (CIP)?

☒ Yes

☐ No

Does this action align with Elevate Las Cruces?

☒ Yes

☐ No

OPTIONS / ALTERNATIVES:

1. Vote "Yes"; this will approve the City of Las Cruces FY2025 through FY2030 CIP.
2. Vote "No"; this will not approve the City of Las Cruces FY2025 through FY2030 CIP.
3. Vote to "Amend"; this could potentially amend the City of Las Cruces FY2025 through FY2030 CIP, requiring pages in the program document be added, deleted, or modified.
4. Vote to "Table"; this will delay the requirements for submittal to the New Mexico Department of Finance and Administration for the 2025 Legislative Session.

RESOLUTION 24-122

A RESOLUTION APPROVING THE CAPITAL IMPROVEMENTS PROGRAM (CIP) FOR FISCAL YEAR 2025 THROUGH FISCAL YEAR 2030.

The City Council is informed that:

WHEREAS, the Capital Improvements Program (CIP) is a six-year program that identifies capital projects that address capital needs to build, replace, expand, and improve infrastructure and systems; and

WHEREAS, pursuant to Article III. Section 3.02 of the City Charter, the CIP must be prepared and submitted to the City Council to keep the council fully advised of the current and future needs of the city; and

WHEREAS, pursuant to Article V. Section 5.06 of the City Charter, a public hearing for the proposed CIP was held on May 20, 2024, in addition to a CIP retreat on February 16, 2024; and City Council work session on April 22, 2024; and

WHEREAS, in accordance with the provisions of Article VI. Section 6.03 of the City Charter, the financing and location of capital improvements is guided by the City's Comprehensive Plan, Elevate Las Cruces.

NOW, THEREFORE, Be it Resolved by the Governing Body of the City of Las Cruces:

(I)

THAT the Capital Improvement Program (CIP) for FY2025 through FY2030, attached hereto and made part of this Resolution as Exhibit "A". is hereby approved and authorized to be the basis for submission to the "Infrastructure Capital Improvement Plan" of the State of New Mexico Department of Finance and Administration.

(II)

THATCity staff is hereby authorized to do all deeds as necessary in the accomplishment of the herein above.

DONE AND APPROVED this day of

Title: **AN ORDINANCE APPROVING A ZONE CHANGE FROM UR (URBAN RANCH) TO REM (SINGLE-FAMILY RESIDENTIAL ESTATE MOBILE) FOR TWO PROPERTIES ENCOMPASSING 1.15 + ACRES EACH AND LOCATED AT 6820 AND 6860 SHANNON DRIVE. SUBMITTED BY ALBERTO GUILLEN, PROPERTY OWNER. (24ZO0500024).**

TYPE OF ACTION: ☐ **Administrative** ☐ **Legislative** ☒ **Quasi-Judicial**

PURPOSE(S) OF ACTION:

Zone change.

BACKGROUND / KEY ISSUES / CONTRIBUTING FACTORS:

The City Council is required to review and take final action on zone changes per Section 38-10 B. 2. b. and 38-13 A. of the 2001 Zoning Code, as amended. A zoning district is a specifically delineated area where land use regulations uniformly govern the use, placement, spacing, density, bulk, height, and size of buildings and/or land.

The applicant is requesting a zone change from UR (Urban Ranch) to REM (Single-Family Residential Estate Mobile) for two properties approximately 1.15 acres in size each and located at 6820 and 6860 Shannon Drive. The purpose for the proposed zone change is to bring the properties into compliance with the 2001 Zoning Code, as amended and allow for development of the vacant/undeveloped properties.

The property owner is seeking rezoning from UR to REM because the present UR district designation is a defunct zoning designation that does not exist within the 2001 Las Cruces Zoning Code, as amended. The UR district existed in an earlier zoning code having been eliminated under the current Code. At the time of code adoption, a two-year grace period allowed any non-conforming zoning to remain in full force and effect until rezoning or conversion of zoning took place. Staff initiated rezoning/conversion efforts for related properties and encouraged property owners to come forward with requests of their own to bring about compliance with the 2001 district standards. Staff was unable at the time to reach out to all affected properties. Originally, the UR district was intended to allow single-family ranchettes and farms (1 acre minimum) for families maintaining a lifestyle that included the raising and keeping of large and small animals in a semi-rural atmosphere. Changing the zoning to REM brings the property into conformance with the 2001 Zoning Code zoning districts while maintaining the semi-rural atmosphere and the keeping of large and small animals. The REM district allows one dwelling per lot and the dwelling must be either site-built or a manufactured home.

The area surrounding the subject properties consist of large lot residential development in the form of site-built, and manufactured homes. The zoning districts supporting these types of residential uses include REM

(Residential Estate Mobile), and EE (Equestrian Estates). Given the development pattern described, there should be no impact to the surrounding neighborhood in terms of character and compatibility.

According to the Future Development Map in the Elevate Las Cruces Comprehensive Plan, the subject parcels fall within the Suburban Neighborhood Place Type. The Suburban Neighborhood Place Type is characterized as providing low-to-moderate density residential land uses intermixed with areas of commercial development. As the uses surrounding the subject properties are congruous to the suburban place type and well supported by various comprehensive goals and policies, staff feels the application is justified and should pose no conflict with the existing neighborhood.

On March 26, 2024, the case was heard by the Planning and Zoning Commission at their regular meeting. The Planning and Zoning Commission voted 4-0-0 (one Commissioner vacancy, two Commissioners absent). The zone change was approved on the consent agenda.

COMMITTEE/BOARD REVIEW:

P&Z

DOES THIS AMEND THE BUDGET?:

☐ Yes
☒ No

Does this action amend the Capital Improvement Plan (CIP)?

☐ Yes
☒ No

Does this action align with Elevate Las Cruces?

☒ Yes
☐ No

OPTIONS / ALTERNATIVES:

1. Vote "Yes"; this will approve the Ordinance and affirm the P&Z recommendation for approval. The subject properties located at 6820 and 6860 Shannon Drive will be rezoned from UR (Urban Ranch) to REM (Single-Family Residential Estate Mobile).
2. Vote "No"; this will deny the Ordinance and will reject the recommendation made by P&Z. The current non-conforming UR (Urban Ranch) zoning designation will remain.
3. Vote to "Amend"; this could allow the City Council to modify the Ordinance by adding conditions as deemed appropriate.
4. Vote to "Table"; this could allow the City Council to table/postpone the Ordinance and direct staff accordingly.

ORDINANCE 3068; COUNCIL BILL 24-026

AN ORDINANCE APPROVING A ZONE CHANGE FROM UR (URBAN RANCH) TO REM (SINGLE-FAMILY RESIDENTIAL ESTATE MOBILE) FOR TWO PROPERTIES ENCOMPASSING 1.15 + ACRES EACH AND LOCATED AT 6820 AND 6860 SHANNON DRIVE. SUBMITTED BY ALBERTO GUILLEN, PROPERTY OWNER. (24ZO0500024).

The City Council is informed that:

WHEREAS, Alberto Guillen, property owner, has submitted a request for a zone change from UR (Urban Ranch) to REM (Single-Family Residential Estate Mobile); and

WHEREAS, the subject properties are approximately 1.15 acres in size each, and the proposed zone change will bring the properties into compliance with the 2001 Zoning Code, as amended; and

WHEREAS, the proposed REM (Single-Family Residential Estate Mobile) zone is consistent with the Suburban Neighborhood Place Type per the Elevate Las Cruces Comprehensive Plan; and

WHEREAS, the Planning and Zoning Commission, after conducting a public hearing on March 26, 2024, recommended that the zone change request be approved by a vote of 4-0-0 (one Commissioner vacancy, two Commissioners absent).

NOW, THEREFORE, Be Ordained by the Governing Body of the City of Las Cruces:

(I)

THAT the land as reflected in Exhibit "A", attached hereto and made part of this Ordinance, is hereby zoned REM (Single-Family Residential Estate Mobile).

(II)

THAT the zoning is based on the findings contained in Exhibit "B", attached hereto and made part of this Ordinance.

(III)

THAT the zoning of said property be shown accordingly on the City Zoning Atlas.

(IV)

THATCity staff is hereby authorized to do all deeds as necessary in the accomplishment of the herein above.

Findings

- The properties under consideration have a non-conforming zoning designations that no longer exist in the 2001 Las Cruces Zoning Code, as amended.
- Prior to development, an appropriate zoning district designation needs to be established pursuant to code. The REM district designation is the most appropriate zoning district given the lot size, surrounding area, and development intentions stated by the owner.
- The subject properties fall within the Suburban Neighborhood Place Type. This classification is characterized by low to moderate density residential land uses intermixed with areas of commercial development. The classification is consistent with what the REM zone provides.
- The proposed zone change request is supported by the Elevate Las Cruces Comprehensive Plan and meets the purpose and intent of the 2001 Zoning Code (2001 Zoning Code, Section 38-2).
- The surrounding area is developed as large lot single-family development consistent with the REM zoning district. Several parcels adjacent to the subject property are already zoned REM.

ZONING

CITY OF LAS CRUCES

Planning & Zoning Commission March 26, 2024

CASE 24ZO0500024: 6820 & 6860 SHANNON DRIVE REZONING

STAFF CONTACT:	Adam Ochoa, (575) 528-3204, aochoa@lascruces.gov
OWNER:	Alberto Guillen
REPRESENTATIVE:	Same
DISTRICT:	District #6
SITE ADDRESSES:	6820 & 6860 Shannon Drive
EXISTING ZONING:	UR (Urban Ranch)
REQUEST:	Rezone from UR (Urban Ranch) to REM (Single-Family Residential Estate Mobile)
RELATED APPLICATIONS:	N/A
STAFF RECOMMENDATION:	Approval

SUMMARY OF CASE 24ZO0500024:
A request to approve the rezoning of two properties from UR (Urban Ranch) to REM (Single-Family Residential Estate Mobile) located at 6820 & 6860 Shannon Drive. The properties are 1.15 ± acres in size and within Council District 6. Submitted by Alberto Guillen, property owner.

SUMMARY OF RECOMMENDATION:
Staff is recommending **APPROVAL** based on the findings listed below:

- The properties under consideration have a non-conforming zoning designations that no longer exist in the 2001 Las Cruces Zoning Code, as amended.
- Prior to development, an appropriate zoning district designation needs to be established pursuant to code. The REM district designation is the most appropriate zoning district given the lot size, surrounding area, and development intentions stated by the owner.
- The subject properties fall within the Suburban Neighborhood Place Type. This classification is characterized by low to moderate density residential land uses intermixed with areas of commercial development. The classification is consistent with what theREM zone provides.

- The proposed zone change request is supported by the Elevate Las Cruces Comprehensive Plan and meets the purpose and intent of the 2001 Zoning Code (2001 Zoning Code, Section 38-2).
- The surrounding area is developed as large lot single-family development consistent with the REM zoning district. Several parcels adjacent to the subject property are already zoned REM.

PROPOSAL AND LAND USE HISTORY

DETAILED DESCRIPTION:

The property owner, is seeking rezoning from UR to REM in that the present UR district designation is a defunct zoning designation that does not exist within the 2001 Las Cruces Zoning Code, as amended. The UR district existed in an earlier zoning code having been eliminated under the current 2001 zoning code regime. At the time of code adoption, a two-year grace period allowed any non-conforming zoning to remain in full force and effect until rezoning or conversion of zoning took place. Staff initiated rezoning/conversion efforts for related properties and encouraged property owners to come forward with requests of their own to bring about compliance with the 2001 district standards. Due to the sheer number of properties that needed adjustment, staff could not reach out to all applicable property owners within the time frame provided even after extending the time frame for compliance. Originally, the UR district was intended to allow single-family ranchettes and farms (1 acre minimum) for families maintaining a lifestyle that included the raising and keeping of large and small animals in a semi-rural atmosphere. Changing the zoning to REM brings the zoning district into conformance while maintaining the semi-rural atmosphere and the keeping of large and small animals. One dwelling is allowed per lot and must be either site-built or a manufactured home meeting stipulated criterion.

LAND USE HISTORY:

The subject properties are believed to have been created prior to approval of the East Mesa/US70 Annexation by City Council in 1986. The properties are undeveloped and located amongst several others that were initially zoned with the intention of establishing large residential lots that specifically permitted the keeping of large and small animals in a manner established prior to annexation.

ZONING DECISION CRITERIA AND POLICIES

POLICY	DOES IT COMPLY?
Neighborhood Character and Compatibility	Yes
Elevate Las Cruces Comprehensive Plan	Yes
Thoroughfare Plans	Yes
Purpose and Intent of the Code: Section 38-2	Yes
Criteria for Decisions: Section 2-382	Yes

NEIGHBORHOOD CHARACTER AND COMPATIBILITY:
In large part, the area surrounding the subject properties consist of large lot residential development in the form of site-built, and manufactured homes. The zoning districts supporting the residential uses include UR (Urban Ranch), REM (Residential Estate Mobile), and EE (Equestrian Estates). Given the development pattern described, there should be no impact to the surrounding neighborhood in terms of character and compatibility.

COMPLIANCE WITH ELEVATE LAS CRUCES COMPREHENSIVE PLAN:
According to the Future Development Map in the Elevate Las Cruces Comprehensive Plan, the subject parcels fall within the Suburban Neighborhood Place Type. The Suburban Neighborhood Place Type is characterized as providing low-to-moderate density residential land uses intermixed with areas of commercial development.

The following goals, polices, and actions from Elevate Las Cruces are relevant to the proposed Zone Change:

- Community Environment:
    - Goal CE-1: Balanced Growth – Encourage efficient land use development patterns that accommodate projected growth in a sustainable manner.
        - Policy CE-1.2. – Promote investment within older areas of the city through redevelopment.
            - Action CE-1.2.3 - Partner with property owners of vacant land for infill opportunities.
    - Goal CE-5: Building and Site Design – Establish standards to integrate new development with surrounding built and natural features while mitigating long-term natural resources and climate impacts.
        - Policy CE-5.1 – Promote building form and scale that complements surrounding neighborhoods and creates strong linkages between the development site, the street, and other public grounds.
            - Action CE-5.1.2 – Provide gradual transitions between developments with residential lots of varying size and building heights.
- Community Prosperity:
    - Goal CP-9: Housing Diversity – Provide a diverse range of housing options to accommodate residents at all stages in life.

  Community Livability:
    - Goal CL-2: Neighborhood Conservation - Strengthen neighborhood condition through improvements to the built-environment.
        - Policy CL-2.2 – Encourage redevelopment of vacant properties within neighborhoods.

As the uses surrounding the subject properties are congruous to the suburban place type and well supported by various comprehensive goals and policies, staff feels the application is justified and should pose no conflict with the existing neighborhood.

COMPLIANCE WITH THOROUGHFARE PLAN:
Access to the subject properties will come from Shannon Drive. The road is a partially improved local roadway that lacks adequate right-of-way (ROW), curb, gutter, sidewalks, and lighting. Shannon Drive has approximately 20 feet of right-of-way width. Shannon Drive does not meet local roadway standards, but is adequate to accommodate any proposed single-family residential development.

CONSISTENCY WITH PURPOSE AND INTENT OF THE ZONING ORDINANCE:
Per Section 38-2: The intent of the Zoning Code is to encourage the most appropriate use of land and to promote the health, safety, and general welfare of the community for the purpose of improving each citizen's quality of life.
The regulations relevant to the proposed zone change include:

A. Ensure that all development is in accordance with this Code and the Elevate Las Cruces Comprehensive Plan and its elements.
B. Give reasonable consideration to the character of each zoning district and its peculiar suitability for particular uses.
H. Encourage the conservation of energy in the use of structures, buildings, and land.
J. Improve the design, quality, and character of new development.
K. Encourage development of vacant properties within established areas.
L. Ensure that development proposals are sensitive to the character of existing neighborhoods.
N. Conserve the value of buildings and land.

Review by City of Las Cruces staff determined the proposed zone change would not adversely impact the surrounding area. Future uses that may be authorized by the proposed district will be in keeping with the surrounding area per section 38-2 of the 2001 Zoning Code, as amended. Additionally, the proposed action will eliminate the issue with the non-conforming/defunct zoning district issue with the properties.

CRITERIA FOR DECISIONS:
Per Section 2-382 of the Las Cruces Municipal Code, the Planning and Zoning Commission shall determine the following:

A. The Planning and Zoning Commission shall review the comprehensive plan, and other applicable plans and codes and determine whether the request will:
    1. Impair an inadequate supply of light and air to adjacent property or otherwise adversely adjoining properties.
    2. Unreasonably increase the traffic in public streets.
    3. Increase the danger of fire or endanger the public safety.
    4. Deter the orderly and phased growth and development of the community.
    5. Unreasonably impair established property values within the surrounding area.
    6. In any other respect, impair the public health, safety, or general welfare of the city.
    7. Constitute a spot zone, and therefore, adversely affect adjacent property values.

8. Be in harmony with the purpose and intent of the zoning code, sign code, design standards, and other companion codes.

B. The commission shall take care that the development of the city, in accordance with present and future needs, best promotes the health, safety, morals, order, convenience, prosperity, and general welfare of the people. It shall also promote efficiency and economy in the process of development.

C. The commission shall encourage the proper use and development of land, shall seek to create, and maintain an aesthetic urban setting, and protect and preserve the quality of the water, air, and other environmental, natural, historical, and cultural resources for the city.

D. The commission shall use the comprehensive plan as a guide in making all future decisions concerning land use and development, and in the financing and location of capital improvements.

E. Before taking any action concerning land use and development and financing and location of capital improvements, the commission shall review the relationship between the proposed action and the comprehensive plan.

Upon internal review, Staff did not identify any issues that would deter the Planning and Zoning Commission from making an affirmative recommendation to City Council regarding the zone change request. Staff also considered the Criteria for Decisions stated above during the internal review process and has deemed the zone change request appropriate with a recommendation of approval.

DEVELOPMENT STANDARDS

SITE COMPLIANCE FOR USES UNDER CURRENT ZONING:

The subject properties are currently zoned UR. The UR zoning district is a defunct designation requiring that it be brought into compliance with current code prior to any development taking place on-site. The proposed zone change to REM seeks to accomplish this in a manner that is compatible with the surrounding area.

SITE SUITABILITY FOR USES UNDER PROPOSED ZONING:

If the subject properties are rezoned as proposed, the size of the lots and the access provided via Shannon Drive allows for future development of residential uses as envisioned by the property owner to take place. All development would then follow the requirements of the REM zoning district if approved.

ADEQUACY OF PUBLIC FACILITIES AND SERVICES:

City water and gas are currently in proximity of the subject properties and are accessible to the property owner. The available city utilities will not be negatively impacted by this zone change request and any resulting development. Septic tanks provide the means for sewer service and the subject parcels lot size will accommodate lot size standards established by the New Mexico Environment Department (NMED).

STAFF AND PUBLIC COMMENTS

PUBLIC NOTIFICATION AND INPUT:

Notification letters were mailed to property owners within 500 feet of the subject properties. Staff has not received any input regarding the pending zone change action as of packet preparation.

STAFF COMMENTS:

No reviewing department had any negative comments nor does any reviewing staff object to the proposed rezoning.

CITY OF LAS CRUCES

PLANNING AND ZONING COMMISSION
FOR THE
CITY OF LAS CRUCES
City Council Chambers
March 26, 2024 at 6:00 p.m.

BOARD MEMBERS PRESENT:
Scott Kaiser, Chair
Enrico Smith, Vice-Chair
Connor Murray, Member
Joaquin Acosta, Member

BOARD MEMBERS ABSENT:
James Bennett, Secretary

STAFF PRESENT:
David Weir, Deputy Director Community Planning
Adam Ochoa, Senior Planner/Building Inspection Supervisor
John Castillo, Planner
Brad Douglas, Assistant City Attorney
Becky Baum, Recording Secretary, RC Creations, LLC

1. CALL TO ORDER (6:05)

Kaiser: Welcome to the March 26th City of Las Cruces Planning and Zoning Commission meeting. We'll go ahead and call this meeting to order.

2. APPROVAL OF MINUTES – February 27, 2024

Kaiser: First item of business tonight is approval of the minutes from February 27th. Before we get a motion, is there anybody who had comments, corrections to make? Looking for a motion to approve.

Smith: I move that we approve the minutes from the last meeting.

Murray: I second.

Baum: Board Member Acosta.

Acosta: Yes.

Baum: Board Member Smith.

Smith: Yes.

Baum: Board Member Murray.

Murray: Yes.

Baum: Chair Kaiser.

Kaiser: Yes.

Baum: Motion passes.

3. CONFLICT OF INTEREST

Kaiser: All right. Any conflicts of interest tonight Commission? All right, seeing none.

We will go ahead and - before we get to the acceptance of the agenda I just want to make one administrative announcement for those that we have a captive audience and before folks take off after their respective items tonight. There is a public comment open for the update to the development code, which is essentially the giant binder of rules and regulations that dictate what we hear and see and do up here on this commission. That document is now available. And public comment is being accepted up until April 5th. And I will look to staff if they want to make any other comments on that.

Weir: Thank you, Mr. Chair. David Weir, of the Community Development Department. You are correct. The entire draft of our development code known as the Realize Las Cruces project is available on the project website, which is www.realizelascruces.com. And it will take you to a link that will take you to each chapter of the code. And there's also a tool that will allow you to comment online. If you'd like to comment directly to the Community Development Department, any of the planners here tonight, myself, Adam Ochoa, John Castillo, you can send those comments and we will provide those to the consultant. Thank you.

Kaiser: Thank you. So encourage everyone to go take a look at that. It's a very important document. It basically dictates how things get built in the City, which is why you all are here tonight. So we look forward to seeing your input, in that it's been I think over a year if not longer of a process to get to this point. And so we're excited to see the next phase, excited to get your all input, and then hopefully take it over the finish line.

4. ACCEPTANCE OF THE AGENDA

Kaiser: So with that, are there any postponements tonight? I don't believe there are. So looking for a motion to accept tonight's agenda.

Murray: I make a motion to accept tonight's agenda.

Smith: I second

Baum: Board Member Acosta.

Acosta: Yes.

Baum: Board Member Smith.

Smith: Yes.

Baum: Board Member Murray.

Murray: Yes.

Baum: Chair Kaiser.

Kaiser: Yes.

Baum: Motion passes.

5. PUBLIC PARTICIPATION

Kaiser: Okay, is there anybody in tonight's audience who wishes to speak on an item that is not on tonight's agenda? I see two hands. So we'll start with this lady over here. If you want to come forward. And please, please state your name for the record and I need to swear you in.

Bernal: Hi, my name is Dolores Bernal.

Kaiser: And do you swear or affirm that the testimony you're about to give is the truth and nothing but the truth under penalty of law?

Bernal: As far as I know.

Kaiser: I'll give you three minutes. Please go ahead.

Bernal: Thank you. Yes, again, my name is Dolores Bernal. I'm a cybersecurity professional and a former Las Cruces Sun News journalist. I live in District 3. I'm here today with some members of a fast growing group in Las Cruces called Save the Roadrunner. You can learn more about us at savetheroadrunner.org. It's time for this Commission to stop approving

large construction projects and development in Las Cruces with total disregard to the harm done to sensitive wildlife including our iconic roadrunners. Sightings of roadrunners and other protective birds within City limits have declined significantly, especially since 2020. Already, the burrowing owl, which was quite abundant in this area before, has been completely wiped out. More and more bird species are being decimated with every project that you approve. It's only a matter of time before you are contacted by federal or state agencies to investigate the destruction of roadrunner nests and killing of the roadrunner and other protected species. You cannot now however, an upgrade how you approve construction projects in the City. You can begin by requiring environmental impact assessments on proposed construction sites. These assessments involve checking for wildlife that can be harmed during the land clearing phase of a project and provide you with valuable information including when birds are mating and nesting. The expansion of Veterans Park took place at the height of breeding season. I and others saw many homeless roadrunners and quail who were desperately searching for their nest right after the bulldozer clear over two acres of land next to Veterans Park. I was able to record video of this and I am ready to turn it in to investigators when they request it. Roadrunners and other birds in our area are federally protected under the Migratory Bird Treaty Act of 1918. Roadrunners are also protected by the State of New Mexico. When construction projects are being reviewed, this Commission must do its due diligence and check to make sure these birds won't be killed during the projects. Our group is demanding that you begin requiring environmental impact assessments as soon as possible before more projects are approved. I can be a resource for us to start planning how an ordinance like that may look like, as well as other groups that can become involved including the Audubon Society. Thank you so much.

Kaiser: Thank you.

Shervanick: Gregory Shervanick.

Kaiser: And do you swear or affirm the testimony you're about to give is the truth and nothing but the truth and under penalty of law?

Shervanick: I do.

Kaiser: Go ahead.

Shervanick: Chair Kaiser and Commissioners, City staff. Thank you. And I'm glad that you brought up the topic of Realize Las Cruces development code. Tomorrow at 3:00 p.m. there will be a public meeting for this item, which the draft is now, as you said, online. I asked for the draft in February. Of course, the City couldn't give it to me even though it was online before. And

I wanted to read the mission statement so the people behind me realize how important this document is. The City development code regulates the use of the development of land within the City limits. The update process and focus on the amendment of the existing zoning regulations, zoning maps, subdivision regulations, sign regulations, design standards, such as parking, street designs, and landscape. This update also focuses on streamlining and simplifying, Commissioners, development process to ensure clear and efficient processes. The update will be driven by the policies and actions identified through Elevate Las Cruces Comprehensive Plan process. The overreaching purpose of this code update is to implement the vision that was established with Elevate plan, in addition to making the code more user friendly, and ensuring the compliance with state regulations. My observations over this last year, Chair, is that this is not a favorable or equitable design, and the citizens of Las Cruces will resent you for years to come. And of course, your predecessors who sit in those chairs will resent you if you accept this document as it is. First of all the communication of projects is still limited to 500 feet. And if you look at any of the zoning code signs that are provided on properties and projects, you'll find that the font is so small you can't even read it from the street. So it doesn't help people understand what is being asked for in regulations and zoning changes. Also, unfortunately, the sun does not rotate around the Earth, so most of the environmental, sustainability, and tree items in this document do not conform to primary physics, third grade physics. If you plant trees going east to west, the sun will never give them shade on a north to south boundary. Because that's not how the sun nor the solar energy functions. I thank you very much. And I ask everyone in this room to please go to Realize Las Cruces on the City website and read the document. Appreciate your time. Thank you.

Kaiser: Thank you, sir. All right. Anybody else in tonight's audience who wishes to speak on an item that is not on tonight's agenda? All right, I will close public comments.

6. POSTPONEMENTS

7. CONSENT AGENDA

7.1 Case No. 24ZO3000007: A request for approval of a final site plan, known as Metro West Phase 1, located within the Metro Verde Planned Unit Development (PUD). The proposed subdivision encompasses 17 ± acres, is zoned PUD and located at the northwest corner of Peachtree Hills Road and Red Hawk Golf Club. The final site plan proposes 98-single-family residential lots with a tract of land for drainage that will be dedicated to the City of Las Cruces. Submitted by Sierra Norte Development Inc., property owners. City Council District 5.

7.2 Case No. 24ZO0500024: A request to approve a zone change from UR (Urban Ranch) to REM (Residential Estate Mobile) for two lots each ± 1.15 acres in size and located at 6820 and 6860 Shannon Road. Submitted by Alberto Guillen, property owner. City Council District 6.

Kaiser: And we will move on to the consent agenda. Okay, get a motion to - I guess actually we will, for those in the audience these are the two items on tonight's consent agenda. 7.1 is a final site plan for Metro Verde West, 7.2 is a zone change. Is there anybody in the audience who would like to hear a discussion on one or both of these? Please show of hands. Okay, seeing none. Looking for a motion to approve tonight's consent agenda.

Smith: I move that we approve tonight's consent agenda 7.1 and 7.2.

Murray: I second.

Baum: Board Member Acosta.

Acosta: Yes.

Baum: Board Member Smith.

Smith: Yes.

Baum: Board Member Murray.

Murray: Yes.

Baum: Chair Kaiser.

Kaiser: Yes.

Baum: Motion passes.

8. OLD BUSINESS

Kaiser: All right, we have no old business.

9. NEW BUSINESS

9.1 Case 23CS0500013: A request for approval of a non-administrative replat known as Villa Mora Dam Replat No. 1. The subject property encompasses 56.51 + acres, is zoned R-1a (Single-Family Medium Density Residential) and is located at 2040, 2045, 2060, & 2065 E. Madrid Avenue. Submitted by the City of Las Cruces, property owner. City Council District 1.

Title: **AN ORDINANCE APPROVING A ZONE CHANGE FROM C-2 (COMMERCIAL MEDIUM INTENSITY) TO C-3 (COMMERCIAL HIGH INTENSITY) FOR A PROPERTY ENCOMPASSING 9.37 + ACRES AND LOCATED AT 1900 BATAAN MEMORIAL EAST. SUBMITTED BY UPWARD ARCHITECTS LLC, REPRESENTATIVE. (24ZO0500001).**

TYPE OF ACTION: ☐ **Administrative** ☐ **Legislative** ☒ **Quasi-Judicial**

PURPOSE(S) OF ACTION:

Zone change.

BACKGROUND / KEY ISSUES / CONTRIBUTING FACTORS:

The City Council is required to review and take final action on zone changes per Section 38-10 B. 2. b. and 38-13 A. of the 2001 Zoning Code, as amended. A zoning district is a specifically delineated area where land use regulations uniformly govern the use, placement, spacing, density, bulk, height, and size of buildings and/or land.

The applicant is requesting a zone change from C-2 (Commercial Medium Intensity) to C-3 (Commercial High Intensity) for property approximately 9.37 acres in size and located at 1900 Bataan Memorial East. The purpose for the proposed zone change is to bring the property into compliance with the 2001 Zoning Code, as amended and allow for redevelopment of a vacant building and parking lot for a multi-tenant retail project.

Due to the property remaining vacant since 2017, the property is now considered non-conforming as it does not meet the C-2 zoning district that has a maximum lot size requirement of 1 acre. The proposed zone change request to C-3 (Commercial High Intensity) would bring the property into compliance with the 2001 Zoning Code, as amended. When the subject property was initially zoned C-2 in 1988, the C-2 zoning designation was the most intense commercial zone in the City of Las Cruces and it had no maximum lot size requirement just like the proposed C-3 zoning designation.

The surrounding neighborhood includes a gas station, movie theater, restaurants, hotel, and a shopping center. The property has three access points, Telshor Boulevard, Del Rey Boulevard, and Bataan Memorial East, all of which are classified as arterials by the MPO Thoroughfare Map and where large-scale commercial development is encouraged.

The Regional Commercial place type encourages a diverse assortment of commercial and professional services that would be made available by allowing a broader spectrum of uses. The goals and policies outlined within this Comprehensive Plan support a variety of commercial choices within the City of Las Cruces

while maintaining a context-sensitive development that is compatible to the surrounding area. The zone change could lead to development of services and/or job opportunities for the community that are easily accessible and within walking distance of existing residential areas and transit systems.

On February 27, 2024, the case was heard by the Planning and Zoning Commission at their regular meeting. The zone change received one concern regarding the increase in traffic in the area. The Planning and Zoning Commission voted that the zone change request be approved 6-0-0 (one Commissioner vacancy).

DOES THIS AMEND THE BUDGET?:

☐ Yes
☒ No

Does this action amend the Capital Improvement Plan (CIP)?

☐ Yes
☒ No

Does this action align with Elevate Las Cruces?

☒ Yes
☐ No

OPTIONS / ALTERNATIVES:

1. Vote "Yes"; this will approve the Ordinance and affirm the P&Z recommendation for approval. The subject property located at 1900 Bataan Memorial East will be rezoned from C-2 (Commercial Medium Intensity) to C-3 (Commercial High Intensity).
2. Vote "No"; this will deny the Ordinance and will reject the recommendation made by P&Z. The current C-2 (Commercial Medium Intensity) will remain.
3. Vote to "Amend"; this could allow the City Council to modify the Ordinance by adding conditions as deemed appropriate.
4. Vote to "Table"; this could allow the City Council to table/postpone the Ordinance and direct staff accordingly.

ORDINANCE 3069; COUNCIL BILL 24-027

AN ORDINANCE APPROVING A ZONE CHANGE FROM C-2 (COMMERCIAL MEDIUM INTENSITY) TO C-3 (COMMERCIAL HIGH INTENSITY) FOR A PROPERTY ENCOMPASSING 9.37 + ACRES AND LOCATED AT 1900 BATAAN MEMORIAL EAST. SUBMITTED BY UPWARD ARCHITECTS LLC, REPRESENTATIVE. (24ZO0500001).

The City Council is informed that:

WHEREAS, Upward Architects LLC, representative, has submitted a request for a zone change from C-2 (Commercial Medium Intensity) to C-3 (Commercial High Intensity); and

WHEREAS, the subject property is approximately 9.37 acres in size, has a vacant building, and the proposed zone change will bring the property into compliance with the 2001 Zoning Code, as amended; and

WHEREAS, the proposed C-3 (Commercial High Intensity) zone is consistent with the Regional Commercial Place Type per the Elevate Las Cruces Comprehensive Plan and will provide job opportunities; and

WHEREAS, the Planning and Zoning Commission, after conducting a public hearing on February 27, 2024, recommended that the zone change request be approved by a vote of 6-0-0 (one Commissioner vacancy).

NOW, THEREFORE, Be it Ordained by the Governing Body of the City of Las Cruces:

(I)

THAT the land as reflected in Exhibit "A", attached hereto and made part of this Ordinance, is hereby zoned C-3 (Commercial High Intensity).

(II)

THAT the zoning is based on the findings contained in Exhibit "B", attached hereto and made part of this Ordinance.

(III)

THAT the zoning of said property be shown accordingly on the City Zoning Atlas.

(IV)

THATCity staff is hereby authorized to do all deeds as necessary in the accomplishment of the herein above.

Tempe, AZ 85281
Ph 602.753.5222 www.upwardarchitects.com

- The subject property is currently zoned C-2. The proposed zone change request to C-3 would bring the subject property into compliance with the2001 Zoning Code, as amended in terms of lot size (2001 Zoning Code, Article 4, Section 38-32D).
- The subject property is located along two major arterial roadways where high intensity commercial uses and zoning such as the proposed C-3zoning designation are encouraged.
- The proposed zone change will help ensure that the subject property remains sensitive to the character of the existing neighborhood. (2001Zoning Code, Article 1, Section 38-2L).
- Based upon staff’s analysis of the proposal, the proposed zone change request meets the intent of Elevate Las Cruces; is compatible with adjacent uses and zoning districts; meets the purpose and intent outlined in Section 38-2 of the 2001 Zoning Code, as amended; and fulfills the purpose of the Las Cruces Municipal Code Section 2-382.

ZONING

CITY OF LAS CRUCES

Planning & Zoning Commission 02/27/2024

CASE 24ZO0500001: REZONING

STAFF CONTACT:	Sara Gonzales, (575) 528-3049, sgonzales@las-cruces.org
OWNER:	KMLAS CRUCES LLC
REPRESENTATIVE:	Upward Architects LLC
DISTRICT:	District #3
SITE ADDRESS:	1900 Bataan Memorial East
EXISTING ZONING:	C-2 (Commercial Medium Intensity)
REQUEST:	Rezone from C-2 (Commercial Medium Intensity) to C-3 (Commercial High Intensity)
RELATED APPLICATIONS:	N/A
STAFF RECOMMENDATION:	Approval

SUMMARY OF CASE 24ZO0500001:
The applicant is requesting a zone change from C-2 (Commercial Medium Intensity) to C-3 (Commercial High Intensity) for a property located 1900 Bataan Memorial East and encompassing 9.37 ± acres to redevelop of an existing commercial property.

SUMMARY OF RECOMMENDATION:
Staff is recommending **APPROVAL** based on the findings listed below:

- The subject property is currently zoned C-2. The proposed zone change request to C-3 would bring the subject property into compliance with the 2001 Zoning Code, as amended in terms of lot size (2001 Zoning Code, Article 4, Section 38-32D).
- The subject property is located along two major arterial roadways where high intensity commercial uses and zoning such as the proposed C-3 zoning designation are encouraged.
- The proposed zone change will help ensure that the subject property remains sensitive to the character of the existing neighborhood. (2001 Zoning Code, Article 1, Section 38-2L).
- Based upon staff's analysis of the proposal, the proposed zone change request meets the intent of Elevate Las Cruces; is compatible with adjacent uses and zoning districts; meets the purpose and intent outlined in Section 38-2 of the 2001 Zoning Code, as amended; and fulfills the purpose of the Las Cruces Municipal Code Section 2-382.

PROPOSAL AND LAND USE HISTORY

PROJECT DESCRIPTION:

The property proposed for rezoning is located at 1900 Bataan Memorial East. The existing building on the subject property has been vacant for more than a year and the redevelopment requires the property to come into compliance with the 2001 Zoning Code, as amended. The 9.37 ± acre subject property is currently zoned C-2 (Commercial Medium Intensity) and the C-2 zoning district has a maximum lot size requirement of 1 acre making the property non-conforming. The proposed zone change request to C-3 (Commercial High Intensity) would bring the property into compliance with the 2001 Zoning Code, as amended. When the subject property was initially zoned C-2, the C-2 zoning designation was the most intense commercial zone in the City of Las Cruces and it had no maximum lot size requirement just like the proposed C-3 zoning designation.

The applicant is requesting the zone change to C-3 for future redevelopment of a multi-tenant retail project that will bring desirable services and amenities to the area.

LAND USE HISTORY:

The existing 95,071 square foot structure was built in 1988. The businesses that occupied the space included K-Mart and the Super 99 Cent Store. In September of 2017, both businesses closed their doors, and the site has remained vacant.

ZONING DECISION CRITERIA AND POLICIES

POLICY	DOES IT COMPLY?
Neighborhood Character and Compatibility	Yes
Elevate Las Cruces Comprehensive Plan	Yes
Mesilla Valley Metropolitan Planning Organization (MPO) Thoroughfare Plan	Yes
Purpose and Intent of the Code: Section 38-2	Yes
Criteria for Decisions: Section 2-382	Yes
New Mexico Case Law	Yes

NEIGHBORHOOD CHARACTER AND COMPATIBILITY:

The property is located along Bataan Memorial East in an area of the City of Las Cruces where a variety of high intensity commercial land uses exist and are allowed. The future redevelopment will a range in uses allowed by the C-3 zoning district which are compatible with and similar to surrounding uses. Those in close proximity to the subject property includes a gas station, movie theater, restaurants, hotel, and a shopping center.

COMPLIANCE WITH ELEVATE LAS CRUCES COMPREHENSIVE PLAN:

The property is in the Regional Commercial Place Type Overlay as shown on the Future Development Map in the Elevate Las Cruces Comprehensive Plan. The

following goals, polices, and actions from Elevate Las Cruces are relevant to the proposed zone change:

- Community Environment:
  - Goal CE-4: Complete neighborhoods - develop mixed-use neighborhoods that incorporate a wide range of recreational, commercial, employment, and civic uses.
- Community Livability:
  - Goal CL-7: Transportation-land use connection- develop an accessible and efficient transportation system that provides seamless connectivity to surrounding land uses and complements various development patterns.
    - Policy CL-7. 2: Promote street interconnectivity within and between neighborhoods, between commercial developments, and within town centers and neighborhood centers
- Community Prosperity
  - Goal CP-4: Diversification - Seek a balance of business recruitment, retention, and expansion to diversify economic opportunities.
    - Policy CP-4. - Support efforts to be regionally and nationally competitive in regard to retaining and growing businesses, jobs, and students.
      - Action CP-4.2.2 - Improve administrative process and procedures to eliminate barriers that impede the expansion of office, commercial or industrial developments.

The Regional Commercial place type encourages a diverse assortment of commercial and professional services that would be made available by allowing a broader spectrum of uses. The goals and policies outlined within this Comprehensive Plan support a variety of commercial choices within the City of Las Cruces while maintaining a context-sensitive development that is compatible to the surrounding area. The zone change could lead to development of services and/or job opportunities for the community that are easily accessible and within walking distance of existing residential areas and transit systems.

COMPLIANCE WITH MPO THOROUGHFARE PLAN:

Telshor Boulevard and Del Rey Boulevard are classified as a principal arterial roadways and Bataan Memorial East is classified as a minor arterial by the MPO Thoroughfare Map and the Future Thoroughfare Map in Elevate Las Cruces. Large scale commercial developments are encouraged along higher roadway classifications to accommodate increased traffic flow. Based on the three designated ingress/egress locations, the proposed zone change is appropriate for this area.

CONSISTENCY WITH PURPOSE AND INTENT OF THE ZONING ORDINANCE:

The relevant purpose and intent statements to the proposed rezoning are:

A. Ensure that all development is in accordance with this Code and the Elevate Las Cruces Comprehensive Plan and its elements.
C. Give reasonable consideration to the character of each zoning district and its peculiar suitability for particular uses.
H. Encourage the conservation of energy in the use of structures, buildings, and land.
K. Encourage development of vacant properties within established areas.

L. Ensure that development proposals are sensitive to the character of existing neighborhoods.
N. Conserve the value of buildings and land.

The proposed zone change would allow for reuse of an existing building and land where that are no known adverse offsite impacts or potential risks to the public's safety, health and welfare.

CRITERIA FOR DECISIONS:

- Impairment of adequate supply of light and air to adjacent property;
- Unreasonable increase in potential traffic;
- Increase the danger of fire or endanger the public safety;
- Determent of orderly and phased growth;
- Impairment of the public health, safety or general welfare of the city;
- Establishment of a spot zone; or the
- Contradiction of the purpose and intent of the zoning code, sign code, design standards and other companion codes.

Upon internal review, Staff did not identify any issues that would deter the Planning and Zoning Commission from making an affirmative recommendation to City Council regarding the zone change request. Staff also considered the Criteria for Decisions above and has deemed the zone change request appropriate with a recommendation of approval.

NEW MEXICO CASE LAW:

1. There was an error when the existing zoning map pattern was created; or
2. Changed neighborhood or community conditions justify the change; or
3. A different use category is more advantageous to the community, as articulated in the Comprehensive Plan or other applicable City master plan(s), even though criterion (1) or (2) above do not apply because
    a. there is a public need for a change of the kind in question, and
    b. that need will be best served by changing the classification of the particular piece of property in question as compared with other available property.

The redevelopment of this vacant building with retail and entertainment land uses are similar to the surrounding neighborhood that consists of commercial uses, justify the C-3 zoning designation on the subject property.

DEVELOPMENT STANDARDS

SITE COMPLIANCE FOR USES UNDER CURRENT ZONING:

The subject property is zoned C-2 and encompasses 9.37 ± acres. Currently the subject property is non-conforming due to the maximum lot size requirement under the C-2 zoning designation. The existing building meets all setback requirements of the 2001 Zoning Code. The site currently has an improved surface for parking with landscaped islands and parkways dispersed throughout.

SITE SUITABILITY FOR USES UNDER PROPOSED ZONING:

The proposed zone change will allow the property owner to use the vacant building on the property for a multi-tenant retail project. Aside from internal alterations of the structure in accordance with the applicable building codes for a change in use,

the property would be required to follow all applicable building, fire and zoning codes as part of redevelopment including ponding and additional landscaping.

ADEQUACY OF PUBLIC FACILITIES AND SERVICES:
City water, gas and sewer are available for the site and are adequate for any potential new construction. Bataan Memorial East is paved, including curb, gutter, and lighting. Del Rey Boulevard and Telshor Boulevard are paved including curb, gutter, lighting, and sidewalk. No additional improvements are currently required.

FLOOD PLAIN:
The property is not located in a flood zone.

STAFF AND PUBLIC COMMENTS

PUBLIC NOTIFICATION AND INPUT:
Notice of a Public Hearing was mailed to all property owners within 500 feet on February 12, 2024, for the Planning and Zoning Commission meeting. No public comment was received for the proposed zone change at the time of the drafting of this report.

STAFF COMMENTS:
No reviewing departments had any negative comments and there have been no objections to the proposed rezoning.

Applicants Documents

This Rezoning Narrative is submitted on behalf of KM Las Cruces, LLC, a Delaware limited liability company ("Applicant"). Applicant owns a 9.376 parcel of real property known as Lot 1- A of Coogan-Greet Subdivision No. 2, Replat No. 1, which is generally located to the southeast of the intersection of U.S. Highway 70 and Interstate 25 in, Las Cruces (the "City"), New Mexico (the "Property"). Applicant proposes to redevelop the Property by subdividing it into four separate parcels and rezoning all parcels in order to build a multi-tenant retail project (the "Project"). Applicant respectfully requests that the City approve its request to rezone the Property from C- 2/Commercial Medium Intensity (the "C-2 Zoning District") to C-3/Commercial High Intensity(the "C-3 Zoning District") to bring it in to compliance with the current zoning designations (the "Rezoning").

The Rezoning meets the criteria set forth in the Las Cruces Zoning Code (the "Code"), and furthers the goals, objectives and policies of *Elevate Las Cruces* (the "Plan"). As discussed below, the Rezoning will permit redevelopment of a mixed-use project that enhances and enriches the surrounding area, with new tenants who will bring desirable services and amenities that fit within
the already-existing neighborhood.

The Property and Current Entitlements

The Property is subject to the Coogan-Greer Subdivision No. 2, Replat No. 1, recorded on July 29, 1992. At the time it was platted and initially developed, through the date of this application, the Property has been within the C-2 Zoning District. However, during that period, the City revised the C-2 Zoning District development standards under the Code regarding maximum lot size, and as a result, the Property became legal non-conforming. As discussed below, the Rezoning will bring the Property into compliance with the Code and will pave the way for creation of a development that better fits the surrounding environment.

The Project

Applicant seeks to rezone and subdivide the Property into one primary lot and three outlots. The Rezoning will allow for reuse of an underdeveloped, underutilized parcel of land that already has infrastructure to support such development. Bringing the Property into compliance and allowing the out lots to be developed will stimulate growth by creating more retail opportunities, which in turn leads to job creation and increased tax revenue.

Criteria for Rezoning

Requests for rezoning are reviewed in relation to the goals, objectives and policies of the Plan, Plan elements, other applicable plans and the purpose and intent of the Code. *Code* §38-10(K). The Rezoning furthers the goals, objectives and policies of the Plan and Code, and the Project fits well within the description of the C-3 Zoning District, which encourages development "of those uses which provide retail, service, and wholesale activities within the City and a regional market,
whose use generally serves a population of over 15,000." *Code* §38-32(B).

Compliance with Elevate Las Cruces

The Plan "is not necessarily an endorsement of outward expansion" but rather "represents a more holistic view of positive change that places significant value on inward growth – promoting long-term community prosperity through the regeneration and rejuvenation of the community's existing built footprint." *Plan*, *Volume I*, p. 18. The Rezoning would allow for the regeneration and rejuvenation of an already existing, but underutilized, centrally located area, thereby promoting the basic tenants of the City's vision for future growth.

Vision Framework

The Rezoning is consistent with the Plan's vision for Las Cruces to be a livable community, create vibrant neighborhoods, and for new growth to foster economic prosperity and promote balanced development.

The Project is located less than a mile away from residential neighborhoods to the north, south, east and west. Consistent with the Plan's vision component to build a livable community and vibrant neighborhoods, the Rezoning will permit a development that increases access to new amenities and provides jobs and services, while adding non-residential infill development to an area that will benefit from such facilities. Rezoning the Property to the C-3 Zoning District will permit larger lot sizes that will, in turn, attract multiple service providers that would not be possible if the lot-size limitations imposed by the C-2 Zoning District are in place. Not only does this build a livable community, it fosters economic prosperity with the workforce development and multiple new businesses in the area (and resulting increased tax revenue), thereby contributing to a robust economy.

The Plan's vision for balanced development calls for "sustainable growth practices where smart investment in new development enhances long-term economic value through quality design and resource conservation." *Plan*, *Volume I*, p. 19. The current layout of the Property – one parcel that is almost 10 acres in size, with only one large building constructed on it – does not provide the maximal and best use. The Rezoning will promote development in an area that is already supported by roads and other services, thereby reducing the so-called "construction footprint" that would be required if the same amenities were built on an undeveloped parcel. The construction of modernized updated buildings that improve the Property's aesthetics will enhance the long-term economic value of the Property and the Project.

Physical Framework

The Property is in a location that is well-suited to accommodate the anticipated expansion that the Rezoning and the Project will generate. The surrounding neighborhoods will benefit from the new services and the existing transportation infrastructure can manage the growth.

Future Development Program and Future Development Map: the Property's place classification on the Future Development Map is Regional Commercial, within the Suburban designation, and it is identified as an area of non-residential growth. *Plan*, *Volume I*, p. 32; Figure 1.8. The Regional Commercial designation calls for areas "of contemporary development where land uses are dispersed among distinct residential neighborhoods, retail centers, office parks and industrial uses." There are no applicable areas of special consideration, place type overlays or areas of

special consideration set forth in the Plan. Land uses in Regional Commercial areas include general retail sales and services, shopping centers and professional offices. *Plan*, *Volume I*, p. 43. The Rezoning will permit desirable services, centers and offices to occupy the area that cannot conform to the C-2 Zoning District maximum lot size.

The Rezoning compliments the Plan's vision for the Property and fits the character of the surrounding area. While there are some nearby parcels that are within the C-2 Zoning District, the lot directly to the east of the Property is in the C-3 Zoning District and the lots directly to the north and south are PUD that are currently comprised of commercial buildings. Further, given the location of the Property, the Rezoning will provide more intensive and larger retail use near Highway 70 (designated by the Plan as a minor arterial road), Northrise drive (a principal arterial road), as well as Interstate 25, while providing desirable services for the nearby residential
neighborhoods. *Plan*, *Volume I*, p. 74.

Future Thoroughfare Program
The Future Thoroughfare Program looks at "essential principles to guide street network and facility development." This program is to be considered as new roadways are built, or existing roadways are improved. *Plan*, *Volume I*, p. 62. Roadway standards should be used to achieve the Plan's desired development character in the various classifications. *Plan*, *Volume I*, p. 64. Given the Project's suburban classification, the focus for streets should be multi-modal mobility.

On the Future Thoroughfare Map, the Project is adjacent to a minor arterial road (Highway 70), a principal arterial road (Northrise Drive), as well as Interstate 25. The Project is in a development with already established streets – both highways as well as local connector roads. The Project that will be possible with the Rezoning will be well-served by these existing roads and will be completed with designs and planning that incorporates the key suburban street considerations.

Policy Framework: The Plan's Policy Framework is meant to prioritize the City's methods to build an ever more sustainable, prosperous, and livable environment, incorporating the Plan's initiatives, which are discussed below.

1. Elevate our Community Environment. The Community Environment Policy Framework is organized around four topics: land use and community character; infrastructure, utilities and energy; natural resources and open spaces; and regionalism. This policy goal aims to preserve finite resources, as well as further efficient and harmonious interface with the natural environment. *Plan*, *Volume I*, p. 86. It points to the Future Development Map as providing key direction for land use and community character, and encourages more efficient and sustainable use of infrastructure, utilities and energy. *Plan*, *Volume I*, p. 87.

   As discussed above, the Rezoning is consistent with the Future Development Map and the development goals associated with the Regional Commercial classification. The Rezoning will allow for balanced, efficient and sustainable development because the Property is already served by utilities and roads; the Rezoning will pave the way for new businesses to use the Property, rather than build at a location without these existing features. New buildings will follow the City's design standards, which encourages steps like drought- friendly landscaping, and soil and wind erosion control.

2. Elevate our Community Prosperity: The Rezoning also furthers this policy goal, which focuses on ensuring that the basic daily needs of citizens are addressed, including economic development. With the businesses and amenities that will be possible with the Rezoning, it will contribute to a strengthened economy through business recruitment, providing services that will be enjoyed by the surrounding area, and offering employment opportunities for residents.

   The Property is approximately one mile away from the Infill Area Overlay District. *Plan, Volume II*, p. 46. The Rezoning would allow for a project that could provide gainful employment to a number of people near an area that has been identified as lacking in employment opportunities. The Property is near the Apodaca (QOZ) District within the Infill Area Overlay District, which were meant to create a more favorable jobs-housing balance, but have not generated a substantial increase in commercial development activity in the center of the City. *Plan, Volume II*, p. 45, 46. The Rezoning will encourage redevelopment and reinvestment one mile away from the overlay district that the City is seeking to promote.

Elevate our Community Livability: The Plan discusses the fact that a "community's prosperity is greatly dependent on access to services and amenities that enhance resident comfort and enjoyment, which contribute to the overall quality of life." *Plan*, *Volume I*, p. 176. As discussed above, the Rezoning will provide services and amenities to the residents in the nearby surrounding neighborhoods, while at the same time making good use of an underutilized property. The Rezoning will also create infill development, an aspect of creating safe, clean and vibrant neighborhoods. *Plan, Volume I*, p. 177, 181.

Compliance with the Purpose and Intent of the Code

The purpose of the Code is to implement the Plan and its elements, especially the land use element.
Code, §38-2. The intent of the Code "is to encourage the most appropriate use of land and to promote the health, safety, and general welfare of the community for the purpose of improving each citizen's quality of life." *Id*. As discussed above, the Rezoning is consistent with the Plan and furthers its land use objectives. Not only will the Rezoning bring the Property into compliance
with current standards, it will permit a more beneficial and appropriate use of the Property and allow for development that will bring desirable services and amenities to the surrounding neighborhoods, while at the same time repurposing an underutilized lot that already has access to utilities and main roadways.

CITY OF LAS CRUCES

PLANNING AND ZONING COMMISSION
FOR THE
CITY OF LAS CRUCES
City Council Chambers
February 27, 2023 at 6:00 p.m.

BOARD MEMBERS PRESENT:

Scott Kaiser, Chair
Enrico Smith, Vice-Chair
James Bennett, Secretary
Joaquin Acosta, Member
Connor Murray, Member
Vanessa Porter, Member

BOARD MEMBERS ABSENT:

STAFF PRESENT:

Larry Nichols, Director Community Development Department
Vincent Banegas, Interim Planner
John Castillo, Planner
Brad Douglas, City Attorney
Becky Baum, Recording Secretary, RC Creations, LLC

1. CALL TO ORDER (6:00)

Kaiser: All right. Good evening. It is 6:01. So I'm going to go ahead and call this meeting to order. It is the February 27th City of Las Cruces Planning and Zoning Commission meeting. Thank you all for coming out here tonight.

2. APPROVAL OF MINUTES – January 23, 2024

Kaiser: Before we get into the meat of our packed agenda tonight, do we have any conflicts of - or excuse me. Are there any comments on the previous meetings minutes from January? No comments. All right, looking for motion to approve.

Bennett: I make a motion to approve the previous meetings.

Murray: I'll second it.

Baum: Member Acosta.

Acosta: Yes.

Baum: Board Member Smith.

Smith: Yes.

Baum: Board Member Murray.

Murray: Yes.

Baum: Board Member Bennett.

Bennett: Yes.

Baum: Chair Kaiser.

Kaiser: Yes.

Baum: Motion passes.

3. CONFLICT OF INTEREST

Kaiser: All righty, Any conflicts of interest tonight from the Commission? All right, seeing none.

4. ACCEPTANCE OF THE AGENDA

Kaiser: We will go ahead and move into the acceptance of the agenda. But before we do, we have many items on our consent agenda this evening. If you see the slides up on the TVs behind me, you can see we have five items. So I'm going to go through this list. And if I can get a show of hands, anybody who wishes to hear a presentation on those items, please raise your hand so we can pull it from the consent agenda. If we don't pull it, then we're going to go ahead and move into approving the consent agenda. That will be the last that we hear on that item tonight. So is there anybody who wishes to hear a presentation on item 6.1? All right. So we'll go ahead and pull item 6.1. Is there anybody who wishes to hear a presentation on item 6.2? Seeing none. 6.3? I see two hands so we'll pull 6.3. 6.4? Seeing none. 6.5? I see two hands. We'll pill item 6.5 as well. All right, so that leaves items 6.2 and 6.4 on the consent agenda. So with those changes can I get a motion to approve tonight's agenda?

Bennett: I make a motion of tonight's agenda.

Smith: I second.

Baum: Board Member Acosta.

Acosta: Yes.

Baum: Board Member Smith.

Smith: Yes.

Baum: Board Member Porter.

Porter: Yes.

Baum: Board Member Murray.

Murray: Yes.

Baum: Board Member Bennett.

Bennett: Yes.

Baum: Chair Kaiser.

Kaiser: Yes.

Baum: Motion passes.

5. PUBLIC PARTICIPATION

Kaiser: All right. Now we will move into public participation. Is there anybody in the audience tonight who wishes to speak on an item that is not on tonight's agenda? I see one hand that's up. That's not on tonight's agenda. Is that correct? Okay. If you'll please come forward, I'll give you three minutes to speak.

SPEAKING, NOT AT THE MICROPHONE

Kaiser: So we're going to address that item later this evening, so thank you. Okay, seeing no other raised hands, we'll go ahead and close public participation for the minute.

7. NEW BUSINESS

Kaiser: All right, moving on to, I've lost my agenda, item 6.3. Staff, I'll turn it over to you.

Castillo: Good evening Commission. Today we have a property located at 1900 Bataan Memorial East. They are seeking a zone change. The current conditions of the property is it's located on the south side of the Bataan Memorial East and west side of Del Rey Boulevard. It currently encompasses 9.37 plus acres. It's zoned C-2 which is our commercial medium intensity. It's a vacant commercial building. It's been vacant since 2017.

Here's a zoning map of the property. Here's an aerial image of the property. Here's a proposed site plan for the property. So the proposal is to rezone from the C-2 to a C-3. This brings the property into compliance with the 2001 Zoning Code as amended, as the C-2 zoning designation only allows for a maximum of one acre. It will also allow the redevelopment of the property for a multitenant retail project. The analysis based on this was there was no health, safety, or welfare issues identified by staff. The zone change will allow the redevelopment of a vacant commercial building/ property. And the property is accessed via a minor and principal arterial roadways where C-3 zoning designations are encouraged.

At the time of this presentation staff had received no input from the public. Notice was sent to all surrounding properties within 500 feet as well. Today staff recommends approval for the zone change to C-3 to bring the property into compliance with the 2001 Zoning Code. The subject property is located along two major arterial roadways where high intensity commercial uses and zoning, such as the proposed designation are encouraged. The proposed zone change will help ensure the subject property remains sensitive to the character of the existing neighborhood. Based on staff's analysis of the proposal, the proposed zone change request meets the intent of Elevate Las Cruces, adjacent uses in zoning districts. It meets the intent and purpose of Section 38-2 and also fulfills the purpose of the Las Cruces Municipal Code Section 2-382. Today your options are to vote "yes" to approve, vote "no" to deny, vote "yes" with conditions, or vote to table.

Kaiser: Thank you. Any questions or comments from the Commission? All right, hearing none. Any members of the public that wish to speak on this item, please raise your hand. I see one gentleman please come forward.

Hernandez: How you doing?

Kaiser: Good. Please state your name for the record.

Hernandez: Dr. Edward Hernandez.

Kaiser: Do you swear or affirm that the testimony you're about to give is the truth and nothing but the truth under penalty of law?

Hernandez: Yes.

Kaiser: Go ahead.

Hernandez: My only concern is I'm very happy that that building is going to finally be occupied. You know it's been vacant for a number, for a long time. We have a lot of homeless now, it's getting worse in that area as well. I'm getting break ins in my office building. I have had at least two in the last four or five months. So that's a concern of mine. But the biggest concern I have is the intersection of Center Court Drive which is directly across from the Allen Telshor theater's entrance. Their main entrance to their parking lot, which is going to be just south of where this building is. So basically directly across the street. My office building is on Telshor, 2810 North Telshor. And you know, I'm a ophthalmologists. I'm an eye surgeon. So most of my patients are 60, 70, 80 years, 90 years old. Their reaction time is down. Their vision sometimes is impaired. And that intersection is pretty hazardous. I've cut down all my bushes as far as they can go. I've increased the visibility southward as much as I can, you know well over 100 feet, but when people are coming up from Sam's Club up that hill you know they're doing 50 miles an hour and they're on them so quickly that we've had a number of accidents on that intersection. So my concern is with the increased traffic in that area, what's going to happen to, and there's a geriatric practice right next door to mine, Dr. Duran's. So I know most of the traffic will probably occur after we're closed, but not all of it. So that's my only concern is traffic.

Kaiser: Thank you. All right, anybody else wishes to speak on this item? All right, seeing none. We'll come back to the Commission. Staff, I don't know if you have a response to that or not.

Castillo: Mr. Chair, Commission. Yes, I do have a response. At this time, it is strictly just bringing the property into conformance with zoning. At the time of development, once we've gone through the zone change process, we'll look at land uses on the property and then develop the necessary either trip generated models or if necessary what we call a trip traffic impact analysis, but some type of traffic study will be done at that point.

Kaiser: Thank you. All right. Any other questions from the Commission? All right, seeing nobody. Looking for a motion to approve

Bennett: I make a motion to approve 6.3.

Smith: I second.

Baum: Board Member Acosta.

Acosta: Yes, based on staff recommendation.

Baum: Board Member Smith.

Smith: Yes, based on staff recommendation and the goals of Elevate Las Cruces.

Baum: Board Member Porter.

Porter: Yes, based on staff recommendations.

Baum: Board Member Murray.

Murray: Yes, based on bringing it up to the standard codes and staff recommendation.

Baum: Board Member Bennett.

Bennett: Yes, based on staff recommendation.

Baum: Chair Kaiser.

Kaiser: Yes based on staff recommendation and consistency with Elevate Las Cruces.

Baum: Motion passes.
